47B Collective proceedings before the Tribunal

- (1) Subject to the provisions of this Act and Tribunal rules, proceedings may be brought before the Tribunal combining two or more claims to which section 47A applies (“collective proceedings”).
- (2) Collective proceedings must be commenced by a person who proposes to be the representative in those proceedings.
- (3) The following points apply in relation to claims in collective proceedings—
 - (a) it is not a requirement that all of the claims should be against all of the defendants to the proceedings,
 - (b) the proceedings may combine claims which have been made in proceedings under section 47A and claims which have not, and
 - (c) a claim which has been made in proceedings under section 47A may be continued in collective proceedings only with the consent of the person who made that claim.

- (4) Collective proceedings may be continued only if the Tribunal makes a collective proceedings order.
- (5) The Tribunal may make a collective proceedings order only—
- (a) if it considers that the person who brought the proceedings is a person who, if the order were made, the Tribunal could authorise to act as the representative in those proceedings in accordance with subsection (8), and
 - (b) in respect of claims which are eligible for inclusion in collective proceedings.
- (6) Claims are eligible for inclusion in collective proceedings only if the Tribunal considers that they raise the same, similar or related issues of fact or law and are suitable to be brought in collective proceedings.
- (7) A collective proceedings order must include the following matters—
- (a) authorisation of the person who brought the proceedings to act as the representative in those proceedings,
 - (b) description of a class of persons whose claims are eligible for inclusion in the proceedings, and
 - (c) specification of the proceedings as opt-in collective proceedings or opt-out collective proceedings (see subsections (10) and (11)).
- (8) The Tribunal may authorise a person to act as the representative in collective proceedings—
- (a) whether or not that person is a person falling within the class of persons described in the collective proceedings order for those proceedings (a “class member”), but
 - (b) only if the Tribunal considers that it is just and reasonable for that person to act as a representative in those proceedings.
- (9) The Tribunal may vary or revoke a collective proceedings order at any time.
- (10) “*Opt-in collective proceedings*” are collective proceedings which are brought on behalf of each class member who opts in by notifying the representative, in a manner and by a time specified, that the claim should be included in the collective proceedings.
- (11) “*Opt-out collective proceedings*” are collective proceedings which are brought on behalf of each class member except—

- (a) any class member who opts out by notifying the representative, in a manner and by a time specified, that the claim should not be included in the collective proceedings, and
- (b) any class member who—
 - (i) is not domiciled in the United Kingdom at a time specified, and
 - (ii) does not, in a manner and by a time specified, opt in by notifying the representative that the claim should be included in the collective proceedings.
- (12) Where the Tribunal gives a judgment or makes an order in collective proceedings, the judgment or order is binding on all represented persons, except as otherwise specified.
- (13) The right to make a claim in collective proceedings does not affect the right to bring any other proceedings in respect of the claim.
- (14) In this section and in section 47C, “specified” means specified in a direction made by the Tribunal.

[

49A Collective settlements: where a collective proceedings order has been made

(1) The Tribunal may, in accordance with this section and Tribunal rules, make an order approving the settlement of claims in collective proceedings (a “collective settlement”) where—

- (a) a collective proceedings order has been made in respect of the claims, and
- (b) the Tribunal has specified that the proceedings are opt-out collective proceedings.

(2) An application for approval of a proposed collective settlement must be made to the Tribunal by the representative and the defendant in the collective proceedings.

(3) The representative and the defendant must provide agreed details of the claims to be settled by the proposed collective settlement and the proposed terms of that settlement.

(4) Where there is more than one defendant in the collective proceedings, “*defendant*” in subsections (2) and (3) means such of the defendants as wish to be bound by the proposed collective settlement.

(5) The Tribunal may make an order approving a proposed collective settlement only if satisfied that its terms are just and reasonable.

(6) On the date on which the Tribunal approves a collective settlement—

(a) if the period within which persons may opt out of or (in the case of persons not domiciled in the United Kingdom) opt in to the collective proceedings has expired, subsections (8) and (10) apply so as to determine the persons bound by the settlement;

(b) if that period has not yet expired, subsections (9) and (10) apply so as to determine the persons bound by the settlement.

(7) If the period within which persons may opt out of the collective proceedings expires on a different date from the period within which persons not domiciled in the United Kingdom may opt in to the collective proceedings, the references in subsection (6) to the expiry of a period are to the expiry of whichever of those periods expires later.

(8) Where this subsection applies, a collective settlement approved by the Tribunal is binding on all persons falling within the class of persons described in the collective proceedings order who—

(a) were domiciled in the United Kingdom at the time specified for the purposes of determining domicile in relation to the collective proceedings (see section 47B(11)(b)(i)) and did not opt out of those proceedings, or

(b) opted in to the collective proceedings.

(9) Where this subsection applies, a collective settlement approved by the Tribunal is binding on all persons falling within the class of persons described in the collective proceedings order.

(10) But a collective settlement is not binding on a person who—

(a) opts out by notifying the representative, in a manner and by a time specified, that the claim should not be included in the collective settlement, or

(b) is not domiciled in the United Kingdom at a time specified, and does not, in a manner and by a time specified, opt in by notifying the representative that the claim should be included in the collective settlement.

(11) This section does not affect a person's right to offer to settle opt-in collective proceedings.

(12) In this section and in section 49B, “*specified*” means specified in a direction made by the Tribunal.

49B Collective settlements: where a collective proceedings order has not been made

(1) The Tribunal may, in accordance with this section and Tribunal rules, make an order approving the settlement of claims (a “collective settlement”) where—

(a) a collective proceedings order has not been made in respect of the claims, but

(b) if collective proceedings were brought, the claims could be made at the commencement of the proceedings (disregarding any limitation or prescriptive period applicable to a claim in collective proceedings).

(2) An application for approval of a proposed collective settlement must be made to the Tribunal by—

(a) a person who proposes to be the settlement representative in relation to the collective settlement, and

(b) the person who, if collective proceedings were brought in respect of the claims, would be a defendant in those proceedings (or, where more than one person would be a defendant in those proceedings, such of those persons as wish to be bound by the proposed collective settlement).

- (3) The persons applying to the Tribunal under subsection (2) must provide agreed details of the claims to be settled by the proposed collective settlement and the proposed terms of that settlement.
- (4) The Tribunal may make an order approving a proposed collective settlement (see subsection (8)) only if it first makes a collective settlement order.
- (5) The Tribunal may make a collective settlement order only—
- (a) if it considers that the person described in subsection (2)(a) is a person who, if the order were made, the Tribunal could authorise to act as the settlement representative in relation to the collective settlement in accordance with subsection (7), and
 - (b) in respect of claims which, if collective proceedings were brought, would be eligible for inclusion in the proceedings (see section 47B(6)).
- (6) A collective settlement order must include the following matters—
- (a) authorisation of the person described in subsection (2)(a) to act as the settlement representative in relation to the collective settlement, and
 - (b) description of a class of persons whose claims fall within subsection (5)(b).
- (7) The Tribunal may authorise a person to act as the settlement representative in relation to a collective settlement—
- (a) whether or not that person is a person falling within the class of persons described in the collective settlement order for that settlement, but
 - (b) only if the Tribunal considers that it is just and reasonable for that person to act as the settlement representative in relation to that settlement.
- (8) Where the Tribunal has made a collective settlement order, it may make an order approving a proposed collective settlement only if satisfied that its terms are just and reasonable.
- (9) A collective settlement approved by the Tribunal is binding on all persons falling within the class of persons described in the collective settlement order.
- (10) But a collective settlement is not binding on a person who—
- (a) opts out by notifying the settlement representative, in a manner and by a time specified, that the claim should not be included in the collective settlement, or

(b) is not domiciled in the United Kingdom at a time specified, and does not, in a manner and by a time specified, opt in by notifying the settlement representative that the claim should be included in the collective settlement.

(11) In this section, “*settlement representative*” means a person who is authorised by a collective settlement order to act in relation to a collective settlement.

[

1.— Securities to which this Schedule applies

(1) This Schedule applies to securities that are, with the consent of the issuer, admitted to trading on a securities market, where—

(a) the market is situated or operating in the United Kingdom, or

(b) the United Kingdom is the issuer's home State.

(2) For the purposes of this Schedule—

(a) an issuer of securities is not taken to have consented to the securities being admitted to trading on a securities market by reason only of having consented to their admission to trading on another market as a result of which they are admitted to trading on the first-mentioned market;

(b) an issuer who has accepted responsibility (to any extent) for any document prepared for the purposes of the admission of the securities to trading on a securities market (such as a prospectus or listing particulars) is taken to have consented to their admission to trading on that market.

[

(3) For the purposes of this Schedule the United Kingdom is the home State of an issuer if—

(a) the transparency rules impose requirements on the issuer in relation to the securities, or

(b) the issuer has its registered office (or, if it does not have a registered office, its head office) in the United Kingdom.

2.— Published information to which this Schedule applies

(1) This Schedule applies to information published by the issuer of securities to which this Schedule applies—

(a) by recognised means, or

(b) by other means where the availability of the information has been announced by the issuer by recognised means.

(2) It is immaterial whether the information is required to be published (by recognised means or otherwise).

(3) The following are “recognised means”—

(a) a recognised information service;

(b) other means required or authorised to be used to communicate information to the market in question, or to the public, when a recognised information service is unavailable.

(4) A “*recognised information service*” means—

(a) in relation to a securities market situated or operating in the [United Kingdom]², a service used for the dissemination of information in accordance with [transparency rules]³;

(b) in relation to a securities market situated or operating outside the [United Kingdom]⁴, a service used for the dissemination of information corresponding to that required to be disclosed under [transparency rules]⁵; or

(c) in relation to any securities market, any other service used by issuers of securities for the dissemination of information required to be disclosed by the rules of the market.

(1) An issuer of securities to which this Schedule applies is liable to pay compensation to a person who—

(a) acquires, continues to hold or disposes of the securities in reliance on published information to which this Schedule applies, and

(b) suffers loss in respect of the securities as a result of—

(i) any untrue or misleading statement in that published information, or

(ii) the omission from that published information of any matter required to be included in it.

(2) The issuer is liable in respect of an untrue or misleading statement only if a person discharging managerial responsibilities within the issuer knew the statement to be untrue or misleading or was reckless as to whether it was untrue or misleading.

(3) The issuer is liable in respect of the omission of any matter required to be included in published information only if a person discharging managerial responsibilities within the issuer knew the omission to be a dishonest concealment of a material fact.

(4) A loss is not regarded as suffered as a result of the statement or omission unless the person suffering it acquired, continued to hold or disposed of the relevant securities—

(a) in reliance on the information in question, and

(b) at a time when, and in circumstances in which, it was reasonable for him to rely on it.

(1) The issuer is not subject—

(a) to any liability other than that provided for by paragraph 3 in respect of loss suffered as a result of reliance by any person on—

(i) an untrue or misleading statement in published information to which this Schedule applies, or

(ii) the omission from any such published information of any matter required to be included in it;

(b) to any liability other than that provided for by paragraph 5 in respect of loss suffered as a result of delay in the publication of information to which this Schedule applies.

(2) A person other than the issuer is not subject to any liability, other than to the issuer, in respect of any such loss.

(3) This paragraph does not affect—

(a) civil liability—

(i) under section 90 (compensation for statements in listing particulars or prospectus),

(ii) under rules made by virtue of section 954 of the Companies Act 2006 (compensation),

- (iii) for breach of contract,
 - (iv) under the Misrepresentation Act 1967, or
 - (v) arising from a person's having assumed responsibility, to a particular person for a particular purpose, for the accuracy or completeness of the information concerned;
- (b) liability to a civil penalty; or
- (c) criminal liability.
- (4) This paragraph does not affect the powers conferred by sections 382 and 384 (powers of the court to make a restitution order and of the Authority to require restitution).
- (5) References in this paragraph to liability, in relation to a person, include a reference to another person being entitled as against that person to be granted any civil remedy or to rescind or repudiate an agreement.

8.— Interpretation

(1) In this Schedule—[

(a) "*securities*" means transferable securities as defined in Article 2(1)(24) of the markets in financial instruments regulation, other than money market instruments as defined in Article 2(1)(25A) of that regulation that have a maturity of less than 12 months (and includes instruments outside the United Kingdom);³

] ²

(b) "*securities market*" means—[

(i) a regulated market as defined in Article 2(1)(13) of the markets in financial instruments regulation, or

(ii) a multilateral trading facility as defined in Article 2(1)(14) of that regulation.

] ⁴

(2) References in this Schedule to the issuer of securities are—

(a) in relation to a depositary receipt, derivative instrument or other financial instrument representing securities where the issuer of the securities represented has consented to the admission of the instrument to trading as mentioned in paragraph 1(1), to the issuer of the securities represented;

- (b) in any other case, to the person who issued the securities.
- (3) References in this Schedule to the acquisition or disposal of securities include—
- (a) acquisition or disposal of any interest in securities, or
- (b) contracting to acquire or dispose of securities or of any interest in securities,
- except where what is acquired or disposed of (or contracted to be acquired or disposed of) is a depositary receipt, derivative instrument or other financial instrument representing securities.
- (4) References to continuing to hold securities have a corresponding meaning.
- (5) For the purposes of this Schedule the following are persons “discharging managerial responsibilities” within an issuer—
- (a) any director of the issuer (or person occupying the position of director, by whatever name called);
- (b) in the case of an issuer whose affairs are managed by its members, any member of the issuer;
- (c) in the case of an issuer that has no persons within paragraph (a) or (b), any senior executive of the issuer having responsibilities in relation to the information in question or its publication.
- (6) The following definitions (which apply generally for the purposes of Part 6 of this Act) do not apply for the purposes of this Schedule:
- (a) section 102A(1), (2) and (6) (meaning of “securities” and “issuer”)⁵ [.]⁶

[...]⁷

Notes

- 1 Added by Financial Services and Markets Act 2000 (Liability of Issuers) Regulations 2010/1192 Sch.1 para.1 (October 1, 2010: insertion has effect subject to transitional provisions specified in SI 2010/1192, reg.3)
- 2 Substituted by Official Listing of Securities, Prospectus and Transparency (Amendment etc.) (EU Exit) Regulations 2019/707 Pt 2(1) reg.37(4)(a)(i) (December 31, 2020: shall

Notes

come into force on IP completion day not exit day as specified in 2020 c.1 s.39(1) and Sch.5 para.1(1))

3 Articles 1(1)(24) and (25A) are substituted by S.I. 2018/****.

4 Para.8(1)(b)(i)-(ii) substituted for para.8(1)(b)(I)-(iii) by Official Listing of Securities, Prospectus and Transparency (Amendment etc.) (EU Exit) Regulations 2019/707 Pt 2(1) reg.37(4)(a)(ii) (December 31, 2020: shall come into force on IP completion day not exit day as specified in 2020 c.1 s.39(1) and Sch.5 para.1(1))

5 Sections 102A to 102C and 103 were substituted for section 103 as originally enacted by regulation 2(1) of and paragraph 1 of Schedule 11 to the Prospectus Regulations 2005(S.I. 2005/1433).

6 Repealed by Official Listing of Securities, Prospectus and Transparency (Amendment etc.) (EU Exit) Regulations 2019/707 Pt 2(1) reg.37(4)(b) (December 31, 2020: shall come into force on IP completion day not exit day as specified in 2020 c.1 s.39(1) and Sch.5 para.1(1))

7 Repealed by Official Listing of Securities, Prospectus and Transparency (Amendment etc.) (EU Exit) Regulations 2019/707 Pt 2(1) reg.37(4)(b) (December 31, 2020: shall come into force on IP completion day not exit day as specified in 2020 c.1 s.39(1) and Sch.5 para.1(1))

Financial regulation

INTRODUCTION

1. These explanatory notes relate to the Financial Services and Markets Act 2000 (“the Act”) which received Royal Assent on 14 June 2000. They have been prepared by HM Treasury in order to assist the reader in understanding the Act. They do not form part of the Act and have not been endorsed by Parliament.

2. The notes need to be read in conjunction with the Act. They are not, and are not meant to be, a comprehensive description of the Act. So where a section or part of a section does not seem to require any explanation or comment, none is given.

SUMMARY

3. The Act provides the framework within which a single regulator for the financial services industry, the Financial Services Authority (“the Authority”), will operate. It equips the Authority with a full range of statutory powers and creates the Financial Services and Markets Tribunal (“the Tribunal”). The Act also establishes the framework for single ombudsman and compensation schemes to provide further protection for consumers.

4. The Act makes provision, amongst other things, with respect to:

- the constitution and accountability of the Authority;
- the definition of the scope of regulated activities;
- the control of financial promotion;
- powers of the Authority to authorise, regulate, investigate and discipline authorised persons;
- the recognition of investment exchanges and clearing houses;
- arrangements for the approval of controllers and the performance of regulated activities;
- the oversight of financial services provided by members of the professions;
- regulation and marketing of collective investment schemes;

- certain criminal offences;
- powers to impose penalties for market abuse; and
- the transfer to the Authority of registration functions in respect of building societies, friendly societies, industrial and provident societies and certain other mutual societies.

5. An overview of the Act is set out below. A detailed description of each Part and the sections is contained in the commentary. Terms used are defined in the text where they first appear. There is a glossary of certain terms defined in the Act and certain other terms which are used throughout these notes.

BACKGROUND

Financial Services Overview

6. The UK financial services industry accounts for approximately 7 per cent of GDP, employing over 1 million people in the City of London and across the country.

7. Businesses to be authorised and regulated under the Act include:

- Banks
- Building societies
- Insurance companies
- Friendly societies
- Credit unions
- Lloyd's
- Investment and pensions advisers
- Stockbrokers
- Professional firms offering certain types of investment services
- Fund managers
- Derivatives traders

Regulatory Framework

8. The regulation of financial services has, historically, been the responsibility of a range of different bodies:

- the Authority (formerly the Securities and Investment Board);
- the Self-Regulating Organisations (“SROs”): most recently the Personal Investment Authority, the Investment Management Regulatory Organisation and the Securities and Futures Authority;
- the former Supervision and Surveillance Branch of the Bank of England;
- the Building Societies Commission;
- the Insurance Directorate of the Treasury;
- the Friendly Societies Commission; and
- the Registry of Friendly Societies.

9. Following the Government's announcement of its proposals to introduce legislation to reform the regulation of financial services in May 1997, steps were taken to transfer responsibility for regulation to the Authority. Certain functions under the Banking Act 1987 (“Banking Act”) were transferred by the Bank of England Act 1998. In other cases, the Authority entered into contracts with the relevant bodies to perform regulatory functions on their behalf. For example, the Treasury contracted with the Authority for the performance of certain functions under the Insurance Companies Act 1982 (“ICA 1982”). Many relevant staff transferred to the Authority and relocated to its headquarters building. This process of integration will be completed when the Act is brought into force.

10. The Act will broadly continue the regime for recognised investment exchanges and clearing houses under the Financial Services Act 1986 (“FS Act 1986”), although the Authority's powers under the Act will be widened as compared with those under the predecessor legislation. The Authority will have powers to regulate the Lloyd's insurance market, and have powers of direction over the Council of Lloyd's, although the latter will retain its responsibilities under Lloyd's Acts for the superintendence and governance of the Society of Lloyd's. The recognised professional bodies regime under the FS Act 1986 will not continue. Professional firms (such as solicitors, accountants and actuaries) carrying on mainstream regulated activities will be authorised and regulated directly by the Authority. However, some categories of professional firm will benefit from an exclusion from the scope of regulation under the Act, subject to arms-length oversight by and certain powers of the Authority. The Act does not affect the professional bodies' wider powers to regulate the professional activities of members of their respective professions.

11. The Act is intended to coordinate and modernise financial regulatory arrangements which are currently established under a number of different enactments:

- the Credit Unions Act 1979
- the Insurance Companies Act 1982

- the Financial Services Act 1986
- the Building Societies Act 1986
- the Banking Act 1987
- the Friendly Societies Act 1992

12. Those enactments are generally supplemented by secondary legislation or rules. It is intended that the powers conferred by section 426 will be used so that the relevant parts of that legislation, and rules and regulations made under it, will be substantially repealed when the Act comes into force. Certain other enactments will also be repealed, or substantially repealed, including the Policyholders Protection Acts 1975–97, the Industrial Assurance Acts 1923–48 and the Insurance Brokers (Registration) Act 1977.

13. The Act also provides for the transfer of the remaining functions, including for example functions relating to the registration of mutual societies, of the Building Societies Commission, the Friendly Societies Commission and the Registry of Friendly Societies.

Consultation and scrutiny

14. In July 1998, the Treasury published a paper entitled *Financial Services and Markets Bill: A Consultation Document* which explained its policy in detail and included a draft of the Bill. That consultation exercise attracted comments from over 220 firms and bodies interested in the regulation of financial services, including those representing consumers. The Treasury also published a number of relevant consultation papers, including drafts of secondary legislation to be made under the Act. Copies of relevant documents, including consultation papers and press notices, were made available at the Treasury's website (www.hm-treasury.gov.uk).

15. The draft Bill was subject to pre-legislative scrutiny prior to its introduction into the House of Commons. The Treasury Committee published its third report of Session 1998–1999 on Financial Services Regulation in February 1999 (*Financial Services Regulation, Volumes I and II*; House of Commons 73 I–II). The Government's response was published in March 1999 (*Financial Services Regulation: The Government's Response to the Third Report from the Committee of Session 1998–99*; House of Commons 347).

16. A Joint Committee of both Houses of Parliament was also established to consider aspects of the draft Bill. That committee was also able to consider the Treasury's Progress Report published in March 1999. The Joint Committee published its first report on 29 April 1999 (*Draft Financial Services and Markets Bill: First Report*; House of Lords, 50 I–II; House of Commons, HC328 I–II) and its second report on 2 June 1999 (*Draft Financial Services and Markets Bill: Second Report*; House of Lords, 66; House of Commons, HC465). The Government response to the reports of the Joint Committee on Financial Services and Markets was published in June 1999.

17. The Bill was introduced into the House of Commons on 17 June 1999 and given its second reading on 28 June 1999. The Bill was the first public Bill to be carried over from session of Parliament to the another, under a new procedure recommended by the Select Committee on Modernisation of the House of Commons. The Bill was scrutinised in Standing Committee A between 6 July 1999 and 9 December 1999 (35 sessions). Report Stage took place on 27 January 2000 and on 1 and 9 February 2000. The Bill also received its third reading in the House of Commons on 9 February 2000.

18. The Bill was introduced into the House of Lords on 10 February 2000. It received its second reading on 21 February 2000. There were five Committee days, between 16 and 30 March 2000, followed by three days on Report, on 13 and 18 April 2000 and on 9 May 2000. The Bill received its third reading on 18 May 2000.

19. While the Bill was before the House of Lords, the Treasury also submitted a number of memoranda on the powers to make delegated legislation under the Bill to the Delegated Powers and Deregulation Committee. The Committee reported its view in a number of published reports. The relevant reports were the Seventh Report (16 February 2000), Eighth Report (8 March 2000), Tenth Report (15 March 2000) Twelfth Report (12 April 2000) and Sixteenth Report (17 May 2000). The Treasury's memorandum in each case was annexed to the report.

20. The Bill returned to the Commons for consideration of Lords Amendments on 5 June 2000. It was subsequently returned to the Lords for consideration of Commons amendments on 12 June 2000. This completed the Bill's Parliamentary passage. Royal Assent was given on 14 June 2000.

21. The Authority consults widely on the way it proposes to use its powers and carry out functions under the Act in accordance with the requirements under the Act. Full details of the Authority's consultation papers are available on its website (www.fsa.gov.uk) from where copies of current documents can be downloaded.

INTERPRETATION

22. There are many defined words and expressions in the Act.

23. Most of the definitions are for the purpose only of the section or Schedule in which they are used. So, for example, the three words defined in subsections (13), (14) and (15) of section 21 are defined only for the purposes of that section.

24. Where there is no indication that a definition is intended to apply to a group of provisions, a Part of the Act or the Act as a whole, it applies only for the purposes of the section or Schedule in which it appears.

25. Many of these single-provision definitions are just drafting devices to avoid clumsy repetition which would make an already long Act even longer. For example, in section 38 the word

“specified” is used on its own on five occasions. The definition in subsection (4) is there to save repeating the words “in an exemption order” each time it is used.

26. Some of the words and expressions that are defined just for the purposes of the particular provision in which the definition occurs are used (and defined separately) in other provisions — where they may have a different meaning. For example “consumers” is defined separately for the purposes of sections 5(3), 10(7), 14(5) and 138(7) (the definition in section 10(7) differing from the others).

27. The Act consists of a large number of separate Parts. Where a particular Part deals with a self-contained subject there may be a separate interpretation section within the Part (for example section 193, which deals with the interpretation of Part XIII).

28. For the Act as a whole, Part XXIX contains a group of nine sections which deal with expressions used in a number of provisions and other matters which bear on the interpretation of provisions of the Act.

29. The purpose of this glossary is to provide the reader with a guide to words or expressions which are defined generally and so liable to be met in provisions which do not themselves contain the definition.

<i>Expression</i>	<i>Where defined (references are to sections, unless otherwise specified)</i>

Financial regulation

Notices

30. The Act frequently refers to the Authority proceeding by way of giving a “warning notice” or a “decision notice”. The requirement to proceed in this way has particular procedural consequences, both in terms of the contents of those types of notice and of how action initiated by them must be taken forward. Those consequences are governed by the provisions of Part XXVI of the Act, to which reference should be made whenever the Authority is directed to proceed in this way.

GLOSSARY OF TERMS USED IN THE EXPLANATORY NOTE

31. In addition to the defined terms above, for convenience, these explanatory notes also use certain other abbreviated terms as set out below.

<i>Term used in these notes</i>	<i>Meaning</i>
Banking Act	Banking Act 1987
CC Act 1974	Consumer Credit Act 1974
Companies Act	Companies Act 1985
competent authority	the competent authority for listing
DGFT	Director General of Fair Trading
EC directives	Directives adopted by the relevant European Community institution
FS Act 1986	Financial Services Act 1986
ICA 1982	Insurance Companies Act 1982
oeic	open-ended investment company
SROs	Self-Regulating Organisations, which are responsible for the regulation of investment business under the FS Act 1986

THE ACT

32. The Act is in 30 Parts.

- **Part I, The Regulator.** This Part sets out the Authority's general duties and statutory objectives. It also, with Schedule 1, imposes requirements about the Authority's constitution and accountability and about the exercise of certain of its functions.
- **Part II, Regulated and Prohibited Activities.** This Part provides a power for the Treasury to set the scope of regulation by order, within the overall object and purpose of the Act. It prohibits persons who are not authorised (or exempt) from carrying on a regulated activity in the United Kingdom and from holding themselves out as being authorised or exempt. It also sets out arrangements for the regulation of financial promotion.
- **Part III, Authorisation and Exemption.** This Part sets out which persons are to be authorised for the purposes of the Act and gives the Treasury power to exempt certain persons from the requirement to be authorised. Authorised persons will include those persons given permission under Part IV and certain persons from other member States who are authorised in accordance with arrangements under the Treaty of Rome (the "Treaty") and the single market directives.

Part IV, Permission to Carry on Regulated Activities. This Part entitles persons to apply for the Authority's permission to carry on particular regulated activities and makes provision about the giving, variation and revocation of such permissions by the Authority.

Part V, Performance of Regulated Activities. This Part requires persons, such as employees and office holders, who perform specified types of function for authorised persons, to be approved by the Authority. It requires such approved persons to behave in a way that complies with any statements of principle issued by the Authority and gives the Authority certain disciplinary powers. It also gives the Authority powers to prohibit persons from carrying out functions in relation to regulated activities.

Part VI, Official Listing. This Part sets out the powers of the competent authority and the obligations of issuers listed securities. It makes provision for the maintenance of, and admission to, the official list, and for the making of listing rules (including listing rules in relation to sponsors).

Part VII, Control of Business Transfers. This Part creates a mechanism for the transfer of banking and insurance business, subject to a court procedure and regulatory scrutiny.

Part VIII, Penalties for Market Abuse. This Part confers on the Authority power to impose penalties for market abuse. The Act sets out the kinds of behaviour which constitute market abuse and requires the Authority to produce a code which help to determine whether particular behaviour amounts to market abuse.

Part IX, Hearings and Appeals. This Part establishes the Tribunal and sets out the procedure for referring cases to it where the Authority has decided to take regulatory action under the various powers conferred by the Act. It gives a right to appeal against a decision of the Tribunal on a point of law.

Part X, Rules and Guidance. This Part confers powers upon the Authority to set regulatory requirements for persons authorised under the Act. It gives the Authority power to issue guidance on requirements imposed by and under the Act. It also sets out the procedures that the Authority must follow in exercising those powers.

Part XI, Information Gathering and Investigations. This Part sets out the powers of the Authority and of the Secretary of State to require the production of information and documents, to require reports to be prepared, to conduct investigations and to gain access to premises with a warrant.

Part XII, Control over Authorised Persons. This Part requires persons who propose to acquire control over certain authorised persons to notify, and secure the approval of, the Authority.

Part XIII, Incoming Firms: Intervention by the Authority. This Part confers power on the Authority to intervene in the activities of authorised persons from other member States who are authorised in accordance with rights under the Treaty and EC directives. It sets out the grounds on which the power is exercisable and the procedure for exercising it.

Part XIV, Disciplinary Measures. This Part gives the Authority powers to issue public statements about, or impose penalties on, authorised persons who fail to comply with requirements imposed by or under the Act.

Part XV, The Financial Services Compensation Scheme. This Part requires the Authority to create a scheme for the payment of compensation to consumers who suffer financial loss as a consequence of the inability of an authorised person to meet its liabilities. It also confers a certain number of powers on the manager of the scheme.

Part XVI, The Ombudsman Scheme. This Part requires the Authority to establish a single, compulsory ombudsman scheme for the speedy and informal resolution of disputes between members of the public and authorised persons and confers certain powers on the operator of the ombudsman scheme for that purpose. It also provides for the ombudsman to adjudicate on certain other types of dispute, on a voluntary basis.

Part XVII, Collective Investment Schemes. This Part provides for the regulation of collective investment schemes.

Part XVIII, Recognised Investment Exchanges and Clearing Houses. This Part sets out the regulatory regime for investment exchanges and clearing houses and provides for competition scrutiny of the regulatory provisions and practices of those bodies.

Part XIX, Lloyd's. This Part makes the Society of Lloyd's an authorised person and gives the Authority certain powers to direct the affairs of the Society, its members and Lloyd's

managing and members' agents. It also provides for the regulation of former underwriting members of the Society.

Part XX, Provision of Financial Services by Members of the Professions. This Part creates an exemption for members of the professions providing financial services to clients in particular circumstances and gives the Authority an oversight role and certain powers in relation to firms that benefit from the exemption.

Part XXI, Mutual Societies. This Part confers powers on the Treasury to transfer to the Authority and to the Treasury certain functions relating to the registration and regulation of building societies, friendly societies and industrial and provident societies and certain other mutual societies. It also confers powers to dissolve certain statutory bodies.

Part XXII, Auditors and Actuaries. This Part concerns the appointment of auditors and actuaries by authorised persons and their responsibilities.

Part XXIII, Public Record and Disclosure of Information. This Part requires the Authority to maintain a public record of authorised (and certain other) persons, and makes provision about the purposes for which confidential information may be disclosed by and to the Authority and other persons having functions under the Act.

Part XXIV, Insolvency. This Part gives the Authority powers to ask the courts to wind up, or initiate other insolvency procedures against, authorised (and certain other) persons. It also enables the Authority to be heard by the court when such proceedings are commenced by third parties.

Part XXV, Injunctions and Restitution. This Part gives the Authority and the Secretary of State powers to seek injunctions in relation to regulatory contraventions and offences for which the Authority has powers to prosecute. It also provides for restitution to be paid to those who have incurred a loss as a result of such a contravention.

Part XXVI, Notices. This Part contains provisions relating to the procedures which the Authority must follow when giving notice of proposed actions under various provisions of the Act. It relates, for example, to decisions not to give permissions or to refuse applications for approvals and to decisions to take regulatory action, such as imposing penalties or making public statements.

Part XXVII, Offences. This Part creates certain offences, including making misleading statements and supplying false information to the Authority. It also makes general provision about offences under the Act and contains provision about the institution of proceedings, for example under Part V of the Criminal Justice Act 1993 (insider dealing) and in relation to money laundering.

Part XXVIII, **Miscellaneous**. This Part contains provisions giving the Treasury power to direct the Authority and certain other bodies to comply with the UK's international obligations, including European Union decisions to take reciprocal trade action. It also contains provisions concerning gaming contracts, reviews of past business and a number of other matters.

Part XXIX, **Interpretation**.

Part XXX, **Supplemental**. This Part contains provisions dealing with the commencement of the legislation and its territorial scope. It confers certain powers on the Treasury in relation to consequential and transitional provisions and with Schedules 18 and 20 to 22 makes certain amendments to other legislation.

COMMENTARY ON SECTIONS

PART I: THE REGULATOR

33. This Part sets out the Authority's general duties and statutory objectives. Together with Schedule 1, it specifies statutory requirements for the Authority's constitution and status and the exercise of certain of its functions. It sets out arrangements which the Authority is required to make for consulting practitioners and consumers. It provides powers for the Treasury to commission reviews of the economy, efficiency and effectiveness with which the Authority has used its resources and to arrange independent inquiries into regulatory matters of serious concern.

Section 1: **The Financial Services Authority**

34. The Authority is a company limited by guarantee formed under the Companies Act 1985 ("Companies Act") as the Securities and Investment Board for the purpose of carrying out functions under the FS Act 1986. It later assumed functions under the Banking Act and exercised functions under other financial regulatory legislation, including for example under the ICA 1982 on behalf of the Treasury.

Section 2: **The Authority's general duties**

35. This section requires the Authority to discharge its general functions in accordance with its objectives and with regard to a number of principles. The objectives do not in themselves impose specific statutory duties or functions on the Authority. Rather, the section requires the Authority to carry out its general functions insofar as possible in a way which is compatible with the objectives and which, taking into account any need to balance the objectives as a whole, it considers most appropriate to their fulfilment.

36. Subsection (2) lists the Authority's objectives — market confidence, public awareness, the protection of consumers and the reduction of financial crime — which are elaborated in sections 3 to 6.

37. Subsection (4) applies those objectives to the Authority's functions in two distinct ways:

- they apply directly to the exercise of the Authority's rule-making, code issuing and general guidance functions taken as a whole;
- they apply to the policy and principles by which it exercises its other functions.

38. Subsection (3) lists a number of matters to which the Authority must also have regard in making its rules and guidance and determining the policy and principles by which it exercises its other functions.

Section 5: The protection of consumers

39. Subsection (2) sets out factors to which the Authority must have regard when considering the appropriate degree of protection. These are, briefly, the degree of risk involved, the sophistication and experience of the parties to the transaction, the need of customers for advice and information and the general principle that consumers should take responsibility for their decisions. There is no obligation on the Authority to place particular weight on any one of these factors.

Section 6: The reduction of financial crime

40. This provision does not by itself impose any duties on firms. The Authority is expected to pursue this objective in co-operation with various law enforcement agencies.

Section 7: Duty of Authority to follow principles of good governance

41. Part I and Schedule 1 set out, amongst other things, certain requirements of the Authority's constitution. The effect of this section is to require the Authority to have regard, subject to those requirements, to such generally accepted principles of good corporate governance in managing its affairs as it is reasonable to regard as applicable to it. Such principles might include those contained in the Combined Code of the Committee on Corporate Governance. However, some principles, such as relations with shareholders, are not relevant to the Authority as it is a company limited by guarantee and so need not be taken into account.

Section 8: The Authority's general duty to consult

42. This section requires the Authority to make and maintain effective arrangements for consulting practitioners and consumers. These arrangements must include, but are not limited to, the establishment of Practitioner and Consumer Panels. The statutory obligation for the Authority to maintain panels to represent the interests of practitioners and consumers was not present in previous financial services, banking or insurance legislation. The Authority established panels of practitioners and consumers, on a non-statutory basis, before such a requirement was imposed

under the Act. The effect of sections 9 and 10 is to require the Authority to continue to maintain those panels.

Section 11: Duty to consider representations by the Panels

43. This section requires the Authority to consider representations made to it by either the Practitioner Panel or the Consumer Panel in accordance with the arrangements under section 8 and, where it disagrees with the views expressed or proposals made in such representations, to give its reasons in writing.

Section 12: Reviews

44. This section enables the Treasury to commission independent reviews of the economy, efficiency and effectiveness with which the Authority has used its resources.

Section 13: Right to obtain documents and information

45. The person appointed by the Treasury to perform a review under section 12 has a right of access to documents held by the Authority.

Section 14: Cases in which the Treasury may arrange independent inquiries

46. This section, together with sections 15 to 18, provides the mechanism for the Treasury to appoint a person to hold an independent inquiry into the circumstances surrounding regulatory events which give rise to serious questions or public concern about the regulatory framework or the effectiveness of regulation in practice. They provide a statutory basis for launching the type of inquiry which has been conducted in the past into the failures of the Bank of Credit & Commerce International (“BCCI”) in 1991 and Barings in 1995. The Bingham Inquiry into BCCI was conducted on a non-statutory basis and therefore had no powers to require witnesses to attend or give evidence. The Barings Inquiry was conducted by the Board of Banking Supervision, an advisory body within the Bank of England using powers under the Banking Act.

47. The types of events into which an inquiry may be held are set out in this section. There are two cases. The first case, set out in subsection (2), relates to events concerning persons carrying on regulated activities or collective investment schemes. To trigger the power, it must appear to the Treasury that two conditions are met. The first of these is that the events posed, or could have posed, a grave risk to the financial system, or caused, or could have caused, significant damage to the interests of consumers. The second condition is that a serious failure in the regulatory system, or in the operation of that system, might have caused or exacerbated the risk or damage, or potential risk or damage.

48. The second case, set out in subsection (3), relates to the listing function under Part VI. Here the Treasury must be concerned with the damage, or potential damage, that might have been caused by a serious failure in the listing regime or its operation.

49. Subsection (4) provides that in either case the Treasury may initiate an inquiry only where they consider that it is in the public interest to do so.

Section 15: Power to appoint person to hold an inquiry

50. Under subsection (1), the Treasury may appoint a person whom they consider appropriate to conduct an investigation and, under subsection (2), may give directions to that person concerning the scope of the inquiry, how it is to be conducted, when it is to be completed by, and the form of any report of the inquiry. The power to direct the inquiry enables the Treasury to ensure that it focuses on the important questions, and that it is concluded in a manner and on a timescale that is appropriate in light of any public concern there might be.

Section 16: Powers of appointed person and procedure

51. This section gives the person holding the inquiry discretion as to how the inquiry is conducted, and provides that person with powers to obtain evidence, both in the form of documents and through the examination of witnesses. These powers are the same as those exercisable by the High Court, or the Court of Session in Scotland.

Section 17: Conclusion of inquiry

52. This section requires a written report setting out the results of the inquiry and, where appropriate, making recommendations. The Treasury then have discretion whether to publish all or part of the report. However, the Treasury must make sure that they do not publish any material contained in the report which, if published, they consider would seriously prejudice the interests of a particular person, for example because there was a likelihood of subsequent court action in relation to the events covered, or publication would be incompatible with the UK's international obligations, such as those under the confidentiality provisions of one of the single market directives. A copy of any part of the report which is published must be laid before Parliament by the Treasury.

Section 18: Obstruction and contempt

53. The powers of the person appointed to conduct an inquiry are enforceable through certification to the High Court or Court of Session. The person conducting the inquiry must provide the court with a certificate stating the requirement that was imposed and the nature and facts of the alleged failure to comply. The court may then enquire into the matter, hearing witnesses and seeing documents as necessary. If it finds that a person has failed to comply with requirements placed

upon him by the person holding the investigation, the court may deal with them as it would with a person in contempt of court.

PART II: REGULATED AND PROHIBITED ACTIVITIES

54. This Part provides the mechanism for defining the scope of regulation under the Act and for establishing the extent of the prohibition on issuing unapproved financial promotions.

Section 19: The general prohibition

55. This section contains the basic prohibition on unauthorised persons carrying on regulated activities in the United Kingdom. It is referred to in the Act as “*the general prohibition*” and prohibits persons who are not authorised or exempt under Part III from carrying on any regulated activity in the United Kingdom. Section 418 elaborates on when regulated activities will be considered to be carried on in the United Kingdom. Contravention of the general prohibition is a criminal offence (see section 23). Agreements made in the course of carrying on an activity in contravention of the general prohibition may be unenforceable (see sections 26, 27 and 29).

Section 20: Authorised persons acting without permission

56. Authorised persons may only carry on in the United Kingdom those regulated activities for which they have been given permission by the Authority under Part IV or by or under any other provision of the Act, for example under Schedule 3, 4 or 5.

57. If an authorised person carries on regulated activities for which he does not have permission the consequences may include any of the sanctions available under Parts IV (Permission to Carry on Regulated Activities), XIII (Incoming Firms: Intervention by Authority) or XIV (Disciplinary Measures). However, if an authorised person acts outside the scope of his permission, he will not commit a criminal offence, and any contract which a person enters into when acting outside the scope of his permission will not be made unenforceable simply by virtue of that fact. Subsection (3) permits the Treasury to prescribe cases in which a breach permission gives rise to a right of action for damages.

Section 21: Restrictions on financial promotion

58. This section prohibits unauthorised persons from issuing financial promotions, unless the content of the promotion is approved by an authorised person (who will be subject to rules made by the Authority), or unless an exemption applies. The regulation of financial promotions under the Act is similar to the regulation of investment advertisements and cold-calling under the FS Act 1986. However, section 21 reflects changing technologies and the fact that the borderline between advertisements and unsolicited calls has become blurred. Sections 238 to 241 contain additional provisions relating to the promotion of collective investment schemes.

59. The prohibition applies to “invitations” or “inducements” to engage in investment activity, which are made in the course of business. The Treasury are given power, if necessary, to determine the meaning of “in the course of business”. The prohibition will potentially catch communications whether they are made in the United Kingdom, into the United Kingdom from elsewhere, or from the United Kingdom to another country. Communications from outside the United Kingdom can potentially be caught only if they can have an effect in the United Kingdom (subsection (3)). It is expected that the exemption order which the Treasury intends to make under subsection (5) will further limit the territorial application of the financial promotion regime, so that communications issuing from overseas will generally only be caught if they are directed at the United Kingdom. This will be of particular significance in the context of internet communications.

60. Subsection (5) confers a power on the Treasury to make exemptions from the prohibition, similar to the power to make exemptions from the investment advertisement prohibition under the FS Act 1986. It is possible for these exemptions to be made conditional on compliance with rules made by the Authority under section 145.

61. Subsection (6) makes clear that the circumstances that can be specified under subsection (5) extend to circumstances for which subsection (3) expressly makes provision. Subsection (6) thus clarifies that an exemption can be made for communications which originate outside the United Kingdom even if they are capable of having an effect here. Subsection (6)(a) and (b) deal expressly with the possibility of exemptions for communications originating in specific countries, or specific groups of countries such as EU countries. Subsection (6)(d) would allow all communications originating overseas to be exempted if that became appropriate. If such provision were made, subsection (7) would allow the Treasury to repeal subsection (3).

62. Subsections (8) to (12) govern what constitutes “engaging in investment activity”. Subsections (9) and (10) give the Treasury power to determine the scope of the prohibition on financial promotion. It is expected that “controlled activities” will be the activities which are regulated under the Act, together with activities which would be regulated, but for an exclusion in an order made under section 22(1). This broad approach reflects the position under the FS Act 1986.

Section 22: The classes of activity and categories of investment

63. This section makes provision as to the classes of regulated activity, if carried on by way of business, and types of investment which are to be regulated under the Act. These are to be prescribed by the Treasury by order to be made under subsection (1). An activity will only be a regulated activity if it is carried on by way of business and is specified in the order under subsection (1). The Treasury will have the power under section 419 to specify circumstances in which an activity shall or shall not be regarded as being carried on by way of business.

64. Schedule 2 indicates the general range of activities and investments that the Treasury may include within the order defining the scope of regulation, but it does not exhaustively list them. It is therefore possible that other activities or investments may be brought within the scope of the

regulation under the Act. However, the general nature of the activities set out in Schedule 2 serves as a limitation on the extent of the Treasury's power to bring further activities within the scope of the Act.

para. 3

Version 1 of 1

Date not available - Present

Subjects

Financial regulation

Section 23: Contravention of the general prohibition

65. This section makes carrying on a regulated activity in breach of the general prohibition a criminal offence. It is a defence for a person to prove that he exercised due diligence and took all reasonable precautions to avoid committing the offence.

66. A person convicted of this offence, which is referred to as an “*authorisation offence*”, may be subject to a term of imprisonment of up to 2 years if convicted on indictment (6 months on summary conviction) and/or a fine (the current statutory maximum for a fine on summary conviction is £5,000).

Section 24: False claims to be authorised or exempt

67. This creates an offence of falsely describing oneself, or holding oneself out, as authorised or exempt in relation to a particular regulated activity. It is a defence for a person accused of this offence to prove that he exercised due diligence and took all reasonable precautions to avoid committing the offence.

68. Under subsection (3) a person found guilty of this offence is liable on summary conviction to a maximum of 6 months imprisonment and/or a fine not exceeding level 5 on the standard scale (currently £5,000). If the offence results from the public display of material, subsection (4) permits a fine of up to the statutory maximum (currently £5,000), to be multiplied by the number of days for which any material giving rise to the offence was on public display.

Section 25: Contravention of section 21

69. This section provides that it is an offence to breach the financial promotion prohibition. The sanctions are the same as those which apply under section 23 for a breach of the general prohibition.

70. Subsection (2) provides a defence for a person accused of the offence if he can prove either that he believed on reasonable grounds that the content of the communication was prepared or approved by an authorised person, or that he exercised due diligence and took reasonable precautions to avoid committing the offence.

Section 26: Agreements made by unauthorised persons

71. Under this section, agreements concluded in the course of carrying on business in breach of the general prohibition will generally be unenforceable against the customer. However, the customer can still recover any money paid or property transferred and obtain compensation for any loss.

Section 27: Agreements made through unauthorised persons

72. Under this section, agreements made by an authorised person in the course of his authorised business may also be unenforceable by that person if the agreement was entered into as a result of a third party's unauthorised regulated activities. This might arise if, for example, a contract was entered into as a result of investment advice given by an unauthorised third party.

Section 28: Agreements made unenforceable by section 26 or 27

73. This section gives the court discretion to allow the contract which would otherwise be unenforceable under section 26 or 27 to be enforced against the customer. The section also allows for the method by which the amount of compensation which a person may obtain is to be fixed. In order to enforce the contract, the court must be satisfied that it would be “just and equitable” to do so having particular regard to whether:

- where the person contravening the prohibition is a party to the agreement, that he reasonably believed that he had not acted in breach of the prohibition; or
- where the contravention was by a third party, that the authorised person providing the service did not know that the agreement resulted from a contravention.

Section 29: Accepting deposits in breach of the general prohibition

74. This section concerns deposits accepted in contravention of the general prohibition under section 19. If the deposit agreement does not entitle the depositor to immediate repayment on demand, the section provides that the depositor may apply to the court to direct immediate repayment.

75. The court has discretion not to direct repayment if it is satisfied that it would not be just and equitable to direct repayment, having particular regard to whether the deposit-taker reasonably believed that it was not contravening the prohibition.

Section 30: Enforceability of agreements resulting from unlawful communications

76. When a customer enters into an agreement or exercises any rights as a result of a communication in breach of the financial promotion prohibition, the agreement will be unenforceable against him. The customer will also be entitled to recover any property transferred

and to receive compensation for losses incurred, but if he chooses to recover property transferred or not to continue the contract, he must return any money received.

77. However, in certain circumstances the courts may enforce agreements made in contravention of the prohibition and allow money and property transferred under the agreement to be retained if it is satisfied that this would be just and equitable, having regard to whether:

- where the person seeking to enforce the agreement was the illegal promoter, that he reasonably believed that the promotion had not been made in breach of the prohibition; or
- where the contravention was by a third party, that the person seeking to enforce it did not know that the agreement resulted from an illegal promotion.

• **PART III: AUTHORISATION AND EXEMPTION**

78. This Part sets out who is to be authorised and how authorisation is obtained. It also deals with exemptions from the general prohibition for particular persons or classes of persons. The Act provides for a single route to authorisation to operate in the financial services industry, replacing several sector-based regimes.

79. The main route to authorisation is through an application for a permission under Part IV, but authorisation may also be obtained by virtue of:

- notification in accordance with the relevant single market directive from the competent authorities under that directive in another EEA member State. The directives in question are the 2nd Banking Co-ordination Directive for banks and other credit institutions, the Investment Services Directive for investment firms, and the 3rd Life and 3rd Non-life Insurance Directives for insurance companies, including mutual insurers such as friendly societies. The person, who must come from or be incorporated in, or formed under the law of, another member State, is referred to under the Act as an “*EEA firm*” as defined in Schedule 3;
- exercise, in accordance with Schedule 4, of EU Treaty rights other than or beyond those governed by the single market directives, in which case the person is then referred to in the Act as a “*Treaty firm*”. Again the person must come from, or be incorporated in, or formed under the law of another member State to qualify;
- exercise of rights under the EC directive relating to collective investment undertakings to market in the United Kingdom collective investment schemes or product authorisation of certain open-ended investment companies (“*oeics*”) under regulations to be made under Chapter IV of Part XVII;
- a person being “grandfathered” by virtue of the transitional provisions (see sections 426 and 427). Broadly, the arrangements will cover persons authorised (however described) under the Banking, Financial Services, Insurance, Building Societies, Friendly Societies,

Credit Unions and Lloyd's Acts (including members of self-regulating organisations and certain members of recognised professional bodies).

80. The Society of Lloyd's is an authorised purpose by virtue of section 315.

81. It is possible for a person who becomes authorised through one of these routes to carry on regulated activities by virtue of other routes. For instance an EEA firm that is authorised by virtue of its home State notification under a single market directive may extend the range of regulated activities it may carry on through notification under Schedule 4 or an application to the Authority under Part IV for an extension of its permission. A Treaty firm may also obtain additional permission under Part IV.

82. For a person authorised by virtue of having permissions under Part IV, authorisation generally ends when that person no longer has permission to carry on regulated activities, whether at the initiative of the Authority or themselves.

Section 32: Partnerships and unincorporated associations

83. This section makes particular provision for partnerships and unincorporated associations. In principle, it is possible to view a change of partners in a partnership, or a change of the membership of an unincorporated association, as the formation of a new partnership or association. It would be very burdensome and unsatisfactory if such changes meant that a partnership or association that was substantially the same had to renew its authorisation simply because of such a change to its membership. This section therefore ensures that in such circumstances the authorisation is not interrupted. It also allows the authorisation to pass to a successor partnership or association in the event of dissolution, but only where the members and the business of the successor are substantially the same as the original.

Section 33: Withdrawal of authorisation by the Authority

84. This section requires the Authority to withdraw authorisation from a person who does not have a permission.

Section 34: EEA firms

85. So long as an EEA firm retains its home State authorisation, the Authority may not remove the firm's authorisation under Schedule 3. Such a person will only cease to qualify for authorisation under Schedule 3 if their home State regulator, that is the competent authority under the relevant directive from the person's home State, notifies the Authority that it is withdrawing authorisation for the person to continue to carry on the regulated activities in the United Kingdom, which may or may not be as part of withdrawing the person's authorisation completely, including in the home State.

86. However, if the person has also obtained a permission under Part IV, loss of the grounds for its authorisation under Schedule 3 does not necessarily lead to loss of its authorisation unless the Authority decides that as a result of the changed circumstances it should also withdraw the permission granted by it under Part IV. The Authority may also cancel an authorisation under Schedule 3 if it is requested to do so by the EEA firm.

Section 35: **Treaty firms**

87. As for an EEA firm, a Treaty firm ceases to qualify for authorisation under Schedule 4 if the relevant home State authorisation is withdrawn. The Authority may remove any additional permission under Part IV, but loss of home State authorisation does not necessarily mean that Part IV permission would be withdrawn. The Authority can also cancel an authorisation on request from a Treaty firm.

Section 36: **Persons authorised as a result of** paragraph 1(4) of Schedule 5

88. This section enables the Authority to cancel the automatic authorisation under Schedule 5 of managers and depositaries of UCITS schemes at their request. However, if the person also has permissions under Part IV, he does not cease to be an authorised person as a result.

Section 37: **Exercise of EEA rights by UK firms**

89. Part III of Schedule 3 governs home State regulation by the Authority of UK credit institutions, investment firms and insurance companies exercising their passport rights under the single market directives to establish a branch or provide services in other EEA states.

90. UK firms do not need to be authorised persons in order to exercise EEA passport rights. For example, lending is covered by both the Second Banking Co-ordination directive and the Investment Services Directive. Consequently a firm holding a licence under the Consumer Credit Act 1974 may have an EEA right to carry on Consumer Credit Act business in another EEA state.

Section 38: **Exemption orders**

91. This section gives the Treasury the power by order to exempt specific natural or legal persons or classes of person from the general prohibition and therefore from the need to be authorised.

92. Subsection (2) provides that a person may not benefit from an exemption under an order made under this section if they hold a Part IV permission. However, if they cease to hold a Part IV permission and the exemption from which they formerly benefited is still extant, they may benefit from it again.

Section 39: **Exemption of appointed representatives**

93. This section makes an exemption from the general prohibition for appointed representatives of authorised persons. An authorised person cannot be an appointed representative. The exemption only applies if the authorised person, referred to as the principal, has:

- contracted with the representative for the latter to carry on the relevant sort of investment business on their behalf; and
- accepted responsibility in writing for the conduct of those regulated activities.

94. Any regulated activities which are carried on by the representative in accordance with such an arrangement are the responsibility of the principal, who must therefore have permission for all the regulated activities they carry on. The Authority may therefore take regulatory action against the principal in respect of anything said or done (or not said or not done) by the representative in carrying on the regulated activities as if they had expressly authorised the action or inaction in question. Such acts or omissions will be taken into account by the Authority in determining whether the principal has breached any rules or requirements under the Act. However, nothing in this section would make the principal liable to prosecution for a criminal offence in place of the representative. The representative may also be subject to the arrangements under Part V.

95. This section is similar to, and replaces, section 44 of the FS Act 1986. The Treasury have the power to limit the types of business that may be carried on under this exemption. The intention is that an order under subsection (1) will broadly reproduce the breadth of the provision under the FS Act 1986, except that it will no longer be possible under this section for an appointed representative to be exempt for some activities and authorised for others. Under a single authorisation regime, it would not be appropriate to allow an authorised person to obtain an exemption rather than have their permission extended to cover those additional activities.

96. The Treasury have the power to prescribe further conditions which the contract between the principal and his representative has to meet. The intention is that this power would be used to reproduce the detailed requirements in sections 44(4) and (5) of the FS Act 1986. These are aimed at ensuring that the principal has adequate control over the activities that the appointed representative may carry on for the benefit of, or on behalf of, other providers of investment products to ensure that the exemption is not misused.

PART IV: PERMISSION TO CARRY ON REGULATED ACTIVITIES

97. This Part governs the way in which a person can obtain permission to carry on regulated activities. It is through obtaining permission that authorisation is generally obtained under section 31(1). However, this route to authorisation does not apply to those EEA firms who qualify for authorisation by virtue of Schedule 3 or those Treaty firms who qualify by virtue of Schedule 4. These provisions only apply to EEA and Treaty firms to the extent that they have obtained additional permissions beyond those that they obtained under those Schedules.

Section 40: Application for permission

98. This sets out the type of person who can be given permission and therefore who can be authorised by this route. Permission can be applied for and granted to individuals, bodies corporate, partnerships and unincorporated associations. In the case of some regulated activities, however, there are specific constraints on the type of person which may be given permission under the threshold conditions in Schedule 6.

99. Permission may cover a number of regulated activities. Permission is only given once, after that it is simply changed. Thus, subsection (2) rules out an application for the grant of permission to an authorised person where he already has permission under this Part. Therefore, if a person wishes to carry on additional activities, he would need to apply for a variation of permission under section 44.

Section 41: The threshold conditions

100. This section requires the Authority to satisfy itself in giving or varying a Part IV permission, or imposing or varying any requirement, that the person concerned will satisfy the threshold conditions set out in Schedule 6 in relation to all the regulated activities covered by his permission. However, this does not prevent the Authority from taking such steps in relation to an authorised person as it considers necessary to secure its regulatory objective of the protection of consumers.

Section 42: Giving permission

101. Having received an application for permission, the Authority must consider it in the light of its duty under section 41. The Authority has discretion to grant permission for all the activities applied for, or just some of them.

102. The Authority can also frame the permission it grants so as to cover activities which are wider or narrower than the activities as described in the application, and may thus impose its own limitations on the way in which an activity may be carried on. This allows the Authority to design the permission in order to be satisfied that the threshold conditions are met in circumstances where it would not be satisfied if it granted the permission sought in full. The ability to grant a wider permission than was applied for would enable the Authority, if it so chose, to have standard types of permission that it granted. However, the Act does not require the Authority to operate in this way.

103. If the applicant is exempt for certain regulated activities by virtue of being a recognised investment exchange or a recognised clearing house, or by virtue of membership of a professional body designated under Part XX, his application, and any resulting permission, is not to be regarded as covering those exempt activities. For other exempt persons, an application under this section will be regarded as covering their exempt activities.

Section 43: Imposition of requirements

104. When granting permission, the Authority may impose what it considers to be appropriate requirements. Such requirements might include requirements on the authorised person to act, or refrain from acting, in a certain way. Subsection (5) allows the Authority to specify a period during which such requirements have effect. Thus the Authority might impose a limit on the amount of a certain type of business the person may conduct during the first five years after receiving the permission. This would enable the Authority to continue the current practice adopted by the insurance supervisors of restricting the premium income that can be received by an insurer in the period following its authorisation to undertake a new form of insurance business.

105. Under subsection (3), such requirements may also be imposed in respect of unregulated activities. For instance, the Authority might have misgivings about the way in which a regulated activity might be carried on in conjunction with an unregulated activity that the person already carries on, or which he proposes to carry on. Those misgivings may not justify preventing the person from commencing the regulated activity because the Authority may not consider that the unregulated activity, of itself, casts doubt about the person's fitness to carry on the regulated one. It may, however, be concerned that the juxtaposition of the two activities could be confusing to consumers, or that the manner in which the unregulated activity was carried on might pose a threat to their interests. Therefore, the Authority could place limitations on the way in which the unregulated activity was carried on for a period after the granting of the new permission in order that it could observe how the activities were carried on, or related to each other, in practice. Subsection (4) enables the Authority to take account of the person's membership of a wider group (as defined in section 421).

Section 44: Variation etc at request of authorised person

106. The Authority may vary the permission, including cancelling it completely, at the request of the authorised person, subject to being satisfied that the person will satisfy the threshold conditions for any resulting permission in accordance with section 41. If it is not satisfied, it may refuse the request outright, grant a more limited permission than the one requested, or grant the requested permission, but subject to new requirements. The Authority may also refuse to grant a request for variation on the grounds that refusal is in the interests of consumers or potential consumers.

107. If as a result of the variation, the authorised person would no longer have permission to carry on any regulated activity, the Authority must consider whether it is still necessary for the person to hold a permission at all (and therefore continue to be an authorised person). If it is not necessary, the Authority should cancel the permission.

Section 45: Variation etc on the Authority's own initiative

108. This section gives the Authority the power to revoke or vary the terms of an authorised person's permission on its own initiative (referred to as its "*own initiative power*"). The power is exercisable on three grounds. These are where it appears to the Authority that:

- the person is failing, or likely to fail, to meet the threshold conditions in relation to the existing permission;
- the person has failed to make use of the permission to carry on a particular regulated activity for a year or more;
- it is desirable to do so in order to protect the interests of consumers or potential consumers.

109. As with the previous section, if as a result of the variation the authorised person no longer has permission to carry on any regulated activity, the Authority must consider whether it is necessary for that person to continue to hold a permission and be an authorised person. If it is not necessary, the Authority should cancel the permission.

Section 46: Variation of permission on acquisition of control

110. The Authority may also impose a new requirement or vary an existing one if:

- someone “acquires control” over the UK authorised person within the meaning of Part XII; and
- the result is that although the Authority does not consider that it has grounds to object to the acquisition, it nevertheless considers that there is some significant uncertainty about the impact of the acquisition, or further acquisition, of control on the conduct of the authorised person's business.

Section 47: Exercise of power in support of overseas regulator

111. This section enables the Authority to cancel or vary a permission on its own initiative on behalf of an overseas regulatory authority. The section gives the Treasury power to prescribe by regulations the sort of overseas authority that the Authority to help. The functions that it is proposed should be prescribed in this way are functions corresponding to those of:

- the Authority itself under this Act;
- the competent authority for listing;
- the Secretary of State under the Companies Act; and
- the prosecuting authorities for insider dealing and money laundering.

112. However, even where the overseas regulator and the provisions they are seeking to enforce meet these requirements, the Authority is not obliged to act in accordance with the request. The Authority must act reasonably, as it must in discharging any of its functions, but it is also directed to consider certain factors in particular. First among these is whether EC law obliges the Authority, as the competent authority under one of the single market directives or otherwise, to assist the

overseas authority. Unless there is an EC obligation to act the Authority must consider the further factors listed in subsection (4) which include the seriousness of the case and the public interest. The Authority is also able to charge a contribution towards the costs of taking the enforcement action, and to make this a condition of exercising the power. (*Note* : The reference to subsection (4) in the definition of “request” in subsection (7) is an error. It should only refer to subsection (5).)

Section 48: Prohibitions and restrictions

113. Among the requirements which the Authority can impose on an authorised person when acting under this Part are:

- restrictions on the use or disposal of the authorised person's assets; or
- requirements to transfer its assets or assets it holds on behalf of investors to a trustee approved by the Authority.

114. The purpose of these types of restriction is to prevent an authorised person disposing of particular assets or making certain types of investment, in circumstances where the Authority is concerned about a person's solvency or where it wishes to investigate suspected fraudulent behaviour.

115. Where an authorised person's assets are held by a third party, for example by a bank, subsection (4) enables the Authority to give the institution notice of any restrictions it has placed on the authorised person's assets. This notice might state, for example, that a bank should not allow any payments to be made from the authorised person's account without the permission of the Authority. Subsection (5)(a) provides that if the institution refuses to comply with a request to make a payment from the account of an authorised person who is subject to a restriction notice, it is not to be taken as a breach of its contract with the authorised person. However, if the institution were to allow a payment to be made from such an account, in breach of a restriction, under subsection (5)(b) it would be liable to pay the same amount of money to the Authority.

116. Subsections (6) to (11) are concerned with the transfer of an authorised person's assets to a trustee approved by the Authority.

117. Subsection (6) requires a trustee not to deal with or release any of the assets transferred to them unless the Authority agrees. If the trustee does release assets without the Authority's consent, he is guilty of an offence under subsection (9). However subsection (11) protects the position of the persons who are beneficiaries of the trust by preserving all the remedies they would normally have under trust law. The beneficiaries of the trust are the owners of the assets transferred to the trustee. This will be either the authorised person or, where the assets transferred include assets the authorised person was holding or controlling on behalf of other investors, those investors.

118. Subsection (7) makes void any charge that the authorised person makes over his assets while they are held by a trustee. Any charges arranged before the assets were transferred to a trustee

remain valid. The effect of this is that were the authorised person to enter into a contractual arrangement which gave a third person a right ahead of existing creditors or a liquidator to any of his assets which, as a result of a requirement made by the Authority under subsection (3)(b), were held by a trustee, that contract would be void and the rights of the liquidator and existing creditors to the assets would be upheld.

para. 4

Version 1 of 1

Date not available - Present

Subjects

Financial regulation

Section 49: Persons connected with an applicant

119. Subsection (1) of this section makes it clear that, in deciding whether to approve an application for permission, the Authority may also have regard to other relevant persons who are related to the applicant in some way. What constitutes a relevant relationship is not defined, but is left to the Authority to interpret in the particular circumstances of the case.

120. The Authority is obliged under subsection (2) to consult with the home State regulator of an EEA firm before granting an application from a person who is a subsidiary undertaking of that firm or the subsidiary undertaking of a parent undertaking of that firm.

Section 50: Authority's duty to consider other permissions etc.

121. An EEA firm, Treaty firm or recognised collective investment scheme may have a Part IV permission in addition to a permission as such a firm or scheme. In considering the exercise of its own initiative power in relation to such an additional permission, the Authority must take account of the relevant EC law and of the home State authorisation of the person concerned. Such consideration may inform the Authority's view on whether the firm or scheme is fit and proper to continue to hold the additional permissions in question, or its view on whether the cancellation or variation it proposes is appropriate in light of the wider assessment of the firm which the home State regulator is responsible for making.

Section 51: Applications under this Part

122. This section sets out the minimum information that must be included in an application for a permission. It also enables the Authority to specify the manner in which an application may be made, for example whether applications by e-mail will be accepted, and such other things that should be included as the Authority considers necessary or appropriate. The Authority can require additional information after the application is received, and can require the applicant to verify any of the information supplied.

Section 52: Determination of applications

123. The Authority is required to determine an application within 6 months of receiving the completed application. The Authority has discretion whether to determine incomplete applications, but it must determine even incomplete applications within 12 months of the initial receipt of the application. The Authority may, of course, refuse an application on the grounds that it is incomplete where it is appropriate to do so. Under subsection (3) an applicant may withdraw an undetermined application at any time.

124. Once the Authority has determined an application it must give written notice of its decision and, if the application is to be granted, the date upon which the authorisation takes effect and from which the relevant activities may commence. If the Authority proposes to refuse all or part of the application, or impose an additional requirement, it must proceed by way of a warning and decision notice.

Section 53: Exercise of own initiative power: procedure

125. This section sets out the procedure the Authority must follow when it proposes to exercise its own-initiative power to vary an authorised person's Part IV permission. If, having regard to the ground on which it is exercising the power, the Authority considers it necessary, the variation may take effect immediately or on a specified date. If no date is specified in this way the variation will take effect only after the time for referring the matter to the Tribunal has expired and any reference (and further appeal) has been finally determined (see the definition of "*open to review*" in section 391(8)). The Authority must give the authorised person a written notice which gives the details of the variation, the date on which it takes effect, the reasons for imposing the variation and for the choice of date. The notice must also inform the person of his right to make representations to the Authority within a specified period, and to refer the matter to the Tribunal.

126. Subsections (7) to (10) require the Authority to give further written notice of its response to any representations which are made. This can be a decision not to proceed with the variation (or to cancel it if it has already taken effect), to propose a different variation (in which case the original notice procedure must be repeated), or to proceed with the variation (in which case the person concerned has a further right to refer the matter to the Tribunal).

Section 54: Cancellation of Part IV permission: procedure

127. This section requires the Authority to serve warning and decision notices when cancelling a Part IV permission on its own initiative, under section 45. Warning and decision notices given under this section also attract the rights set out in sections 393 and 394 by virtue of section 392.

Section 55: Right to refer matters to the Tribunal

128. This section confers a right to refer to the Tribunal a decision of the Authority to vary or cancel a permission on its own initiative. It also applies to decisions of the Authority in relation to

applications under Part IV, such as a decision to refuse an applications for permission, to impose conditions or to vary a permission other than in the way requested.

PART V: PERFORMANCE OF REGULATED ACTIVITIES

129. This Part confers on the Authority a range of powers which will enable it to ensure that people who work for authorised persons for certain purposes are fit and proper to perform the functions for which they have been engaged. While the focus of regulation is on authorised firms, the Part gives the regulator powers to prevent harm which might otherwise be caused by persons attached to firms.

130. Under the preceding regulatory framework, there is considerable variation between the arrangements applying to employees working in different sectors. The SROs have introduced a contractual system which requires employees to sign up to regulatory and disciplinary arrangements. Lloyd's has applied similar regulation to employees of underwriting agents, using its byelaw making powers. Banking and insurance legislation provides for pre-vetting of certain senior management positions, in some cases as part of the regime for the regulation of controllers of such firms. That legislation does not provide for the regulator to take disciplinary action against those managers, although senior managers, as officers of the firm, could commit a criminal offence where the firm itself had committed such an offence. There is, in addition to the vetting arrangements, a power in section 59 of the FS Act 1986 for the Authority to prohibit a person's employment in connection with investment business. The above arrangements will be replaced by arrangements under this Part.

131. The Part seeks to harmonise these arrangements. It provides a power for the Authority to ban unfit individuals from carrying out specified functions within the financial services sector. It also provides for:

- the Authority to require its approval to be obtained before a person may perform specified functions;
- the Authority to issue statements of principle with which approved persons must comply, and codes of conduct elaborating on the statements; and
- a disciplinary regime for those who fail to comply with the statements of principle.

132. This Part provides for firms and individuals concerned to refer matters to the Tribunal if the Authority proposes to:

- issue a prohibition order;
- refuse an application to vary or revoke a prohibition order;
- refuse an application for approval;

- take disciplinary action; or
- withdraw approval.

133. The Part is primarily directed at the employees of authorised firms. However, it extends beyond employees to include, for example, directors, representatives and contractors of an authorised person, and extends to bodies corporate where relevant. If, for example, a life insurance company entered into a marketing agreement with a firm of estate agents to sell life insurance, the agency and relevant sales staff giving investment advice might need prior approval. Part V would also cover “matrix managers” who carry out certain functions, often on a fairly informal basis, for a group of companies even though technically they are “employees” of a sister company rather than of the authorised person for whom they carry out relevant functions. Such arrangements are increasingly common in multi-national groups.

Section 56: **Prohibition orders**

134. This section enables the Authority to make an order prohibiting any individual whom it considers is not fit and proper to perform functions in connection with regulated activities. A prohibition may relate to all functions in relation to any regulated activities carried on by all authorised (or exempt) persons or it can specify the kind of functions, activities or authorised (or exempt) persons to which it relates. A prohibition order may be varied or revoked.

135. Subsection (4) makes it an offence for an individual not to comply with a prohibition order. The maximum penalty for this offence is a fine at level 5 on the standard scale (currently £5,000). There is, however, a defence under subsection (5) for a person who can show that he took all reasonable precautions and exercised all due diligence to avoid committing the offence.

136. Subsection (6) imposes an obligation on an authorised person to take reasonable care not to engage individuals who have been disqualified under this section from performing relevant functions. Failure to comply with this requirement could trigger the use of the Authority's powers to amend the authorised person's permission or discipline the firm. It also potentially gives rise to a cause of action under section 71 from a private person who suffers a loss as a consequence of the breach.

137. Subsection (8) enables a prohibition order to be issued preventing an individual from performing functions in relation to a regulated activity carried on by an exempt person or a person to whom section 327(1) applies, that is by members of a profession or persons controlled or managed by members of a profession, who benefit from the exemption from the general prohibition under Part XX.

Section 59: **Approval for particular arrangements**

138. This section requires authorised persons to take reasonable care not to allow persons, natural or corporate, to perform certain functions without the approval of the Authority. Subsection (2)

similarly requires an authorised person to take reasonable steps to ensure that any contractor does not allow a person to perform such functions without the approval of the Authority. A person in respect of whom approval is given is an “approved person”. The nature of the functions requiring approval will be specified by the Authority's rules, within the limits set out in subsections (5) to (7) and subject to the normal consultation requirements under Part X. The limits can be summarised:

- The function may enable a person significantly to influence the conduct of the authorised person (for example a director). By virtue of subsection (9) account may be taken of influence which might result from a failure properly to carry out that function (for example a proprietary trader).
- The function involves dealing with customers (for example a financial adviser) or dealing with their property (such as a stockbroker) in a way that is substantially connected with the carrying on of a regulated activity by the firm.

139. Subsection (8) limits the application of this section in the case of EEA or Treaty firms. The Authority will only have powers to act in relation to functions over which it, rather than the home State regulator, has jurisdiction.

Section 60: Applications for approval

140. This section requires an application for approval to be submitted by the authorised person concerned or, in the case of new firms awaiting authorisation, a prospective authorised person.

141. Subsection (2) gives the Authority the powers to specify the information it will require to support applications for different types of posts and subsection (3) enables it to request any additional information it needs to assess the suitability of each candidate.

Section 61: Determination of applications

142. This section sets out the basis on which the Authority is to assess the suitability of a candidate for approval, whether they are an individual or a body corporate. Subsection (1) requires the Authority to be satisfied that a candidate is fit and proper to perform the functions in question before it is able to give its approval. Where the Authority proposes to refuse an application, section 62 requires it to give a warning and decision notice. Notice must be given to the authorised person, the candidate and, where relevant, a contractor.

Section 63: Withdrawal of approval

143. This section gives the Authority power to withdraw the approval granted for the purposes of section 59 where it no longer considers that the person is a fit and proper person to carry out the functions for which they had been approved, for example because the Authority had obtained new information which cast doubt over its initial assessment.

Section 64: Conduct: statements and code

144. This section gives the Authority power, as part of its wider rule-making functions, to issue statements of principle, setting out in general terms the kinds of behaviour which it requires from approved persons in respect of any particular type of function. Any statements of principle issued under this section must be elaborated by a code of practice. Such a code would not need to be exhaustive but it would have to illustrate the circumstances in which it would regard a principle as having been complied with, or not complied with, as the case may be. Different statements of principle and codes could be made to apply to employees of different categories. The purpose of requiring a code to elaborate on a statement of principle is to prevent the Authority taking a disciplinary action for an alleged breach of a principle in cases where a person had acted in accordance with the code.

145. Subsection (8) makes it clear that failure to comply with a principle does not give a third party grounds for action against the approved person. Therefore, if for example a financial adviser employed by an insurance company failed to comply with a statement of principle when arranging a personal pension, that would not give a customer a right of action against the employee, with whom they had no contractual relationship. This provision would not remove or lessen any rights, including those under contract or by virtue of section 71, the customer may have against the authorised person who had entered into an agreement to provide the pension.

Section 65: Statements and codes: procedure

146. This section sets out the procedure that the Authority is required to follow when issuing a statement or code under section 64. The procedures, including the requirements to consult and publish a cost-benefit analysis, are broadly the same as the procedures that will apply when the Authority exercises other powers to issue codes (for example under section 119) and its rule-making powers under Part X.

Section 66: Disciplinary powers

147. This section gives the Authority a power to take disciplinary action against an approved person when the two conditions set out in subsection (1) have been met. The Authority must be satisfied that it is appropriate to take action against him. In this context, the Authority would have to have regard, among other things, to its regulatory objectives set out in Part I. The Authority would need to take into account whether disciplinary action against the approved person, rather than action against the authorised person for whom he works, would be appropriate, taking into account the responsibility of the senior management of the firm for the conduct of the firm and its employees. A second important factor would be to ensure that any action, or any particular course of action, it takes should be proportionate to the nature and seriousness of the misconduct.

148. In addition, the Authority must be satisfied that the person has engaged in misconduct, as defined in subsection (2). One possibility is that the approved person has acted in breach of a

statement of principle, issued under section 64, as evidenced by a breach of a code of practice. The other possible situation is that an approved person has been knowingly involved in a breach by the authorised firm of rules made by the Authority or of any requirement imposed by or under the Act.

149. Subsection (3) gives the Authority powers to impose a penalty on an approved person or to make a public statement about their misconduct.

150. Subsection (4) restricts the period during which the Authority may take action under this section to a period of two years after the Authority became aware of the misconduct. This period reflects the time available to the Secretary of State to bring disqualification proceedings against a company director under the Company Directors Disqualification Act 1986.

Section 69: Statement of policy

151. This section requires the Authority to issue a statement of its policy on the circumstances in which it will impose penalties on approved persons under section 66 and the basis on which the level of penalties will be determined for different types of misconduct. The policy set out in the statement must take into account a number of factors which are set out in subsection (2).

152. Subsection (8) requires the Authority to have regard to the statement in force at the time of the misconduct when imposing penalties under this Part.

Section 70: Statements of policy: procedure

153. This section sets out the procedure for issuing a statement of policy under section 69. Before deciding on its policies in these areas, or changing those policies, the Authority will be required to consult the public on its proposals.

Section 71: Actions for damages

154. If a private person suffers a loss because an authorised person has acted in breach of the duty under section 56(6) or 59(1) or (2) (failing to take care to prevent a person carrying out functions in contravention of a prohibition under section 56, or without obtaining the Authority's approval under section 59) he may bring an action for damages against the authorised person (or an exempt person or person to whom clause 327(1) applies in the case of a contravention under section 56(6)). Subsections (2) and (3) confer powers on the Treasury, by regulations, to define a "*private person*" and to specify circumstances in which this section applies to a person other than a private person.

PART VI: OFFICIAL LISTING

155. EC law requires each member State to nominate or create a competent authority to maintain an official list of securities, to regulate the admission of securities to the Official List, and to monitor

issuers' adherence to the listing rules (as explained below) thereafter. In the United Kingdom these functions are exercised by the Authority following the coming into force of the Official Listing of Securities (Change of Competent Authority) Regulations 2000 (SI 2000/968). Previously, the competent authority function was exercised by the London Stock Exchange. The provisions of this Part implement these requirements of EC directives. These provisions replace those in Part IV of the FS Act 1986.

156. There is no requirement for issuers of securities, for example companies issuing new shares, to apply for admission to the official list. However, admission to the official list signals that certain standards regarding the financial status and history of the company have been met; that adequate information about a security has been made available to investors at the time of application; and that information about the performance and plans of the issuer will continue to be made available on a continuing basis so long as the company has securities listed on the official list.

157. In carrying out its functions, the competent authority makes rules which govern the admission of securities to listing, the continuing obligations of issuers, the enforcement of those obligations and the suspension and cancellation of listing. These rules are collectively known as “*listing rules*”, which have been published by the competent authority in the “yellow book”. The competent authority also has a role in scrutinizing prospectuses and circulars where there is no application for admission to the official list.

Section 72: The competent authority

158. This section confers the functions of competent authority on the Authority. Subsection (2) and Schedule 7 make provision for the way in which other provisions of the Act apply to the Authority when exercising functions as the competent authority. However, subsection (3) and Schedule 8 provide a power for the Treasury to transfer some or all of the functions of the competent authority for the United Kingdom to another body.

Section 73: General duty of the competent authority

159. This section sets out the general duties of the competent authority. Subsection (1) sets out a number of principles to which the competent authority must have regard in discharging its general functions (as defined in subsection (2)).

160. Subsection (1) is similar to section 2(3). The requirements of subsection (1) are intended to act as constraints on the way the competent authority carries out its functions under Part VI. Unlike section 2(3), this section does not have a principle relating to the responsibilities of senior management. This is because the competent authority is not responsible for the conduct of business or the prudential regulation of listed companies.

Section 74: The official list

161. This section places a duty on the competent authority to continue to maintain the official list. Section 99 allows the competent authority to charge fees for this purpose. Before this Act comes into force, the official list will be made up of securities that have been admitted by the competent authority under the statutory provisions of Part IV of the FS Act 1986 and securities and other financial instruments which were admitted by the competent authority under contract with issuers (for example gilts and covered warrants). Under the Act there will be a single statutory regime for the official listing of all these securities and other instruments.

162. The legislation therefore gives the Treasury a power in subsection (3) to provide that certain categories of financial instrument cannot be admitted to the Official List. This is a reserve power to ensure that the Treasury could stop the admission to the list of financial instruments which they consider, for example, pose undue risks to investors. Subsection (4) confers powers on the Authority to make listing rules.

Section 75: Applications for listing

163. This section provides that only applications for listing which are by, or with the consent of, the issuer and meet the requirements imposed by the competent authority may be granted. The competent authority can refuse an application for listing where it considers that granting it would be detrimental to the interests of investors.

164. Subsection (3) provides that no application for listing can be entertained by the competent authority in respect of securities issued by a body of a prescribed kind. The Treasury intend to use this power to prescribe that securities issued by a private company or by an old public company (within the meaning of section 1 of the Companies Consolidation (Consequential Provisions) Act 1985) cannot be admitted to listing. This will replicate provisions in the FS Act 1986.

Section 77: Discontinuance and suspension of listing

165. Occasionally circumstances arise which mean that normal dealings in listed securities cannot take place. For example, a company may fail to comply with reporting requirements in the listing rules, so that investors and potential investors do not have sufficient information on which to make informed decisions about the company's securities in order to deal in the securities. Alternatively, a company may be in financial difficulties which it has not clarified or quantified. This section gives the competent authority the power to suspend or discontinue the listing of a company's securities in such circumstances. During a suspension, trading in the securities cannot take place on a recognised investment exchange. An issuer may refer a decision to discontinue or suspend listing to the Tribunal.

Section 78: Discontinuance and suspension: procedure

166. This section sets out the procedures to be followed by the competent authority when it suspends or discontinues the listing of any securities under section 77. The procedure is broadly

similar to that which applies in the case of other supervisory decisions listed in section 395(13), and which is described in the context of section 53 above.

167. During the procedure for making representations and referring the matter to the Tribunal, it is possible for a suspension or discontinuance to be reversed. If a suspension is cancelled the securities simply remain listed. If a discontinuance is cancelled at this stage, either because the competent authority accedes to representations which are made under subsection (3)(c) or because it follows directions of the Tribunal to that effect, subsection (9) provides that the securities are regarded as being readmitted to the list as soon as the discontinuance is cancelled and without any fresh admission needing to be granted.

168. Subsections (10) to (12) set out a separate procedure which applies, after a suspension has taken effect and after the procedures for making representations and for referring the matter to the Tribunal have been exhausted, if there is a subsequent application for the suspension to be cancelled. In this case the standard warning and decision notice procedure applies as for other applications. However, at this stage in the process, a discontinuance is regarded as final and so there is no procedure for applying for it to be reversed. Instead a fresh application would need to be made for listing under section 75.

Section 79: Listing particulars and other documents

169. Under EC law, where there is an application for the listing of securities which are to be offered to the public in the United Kingdom for the first time, a prospectus must be approved by the competent authority and published. This is provided for by section 84. Where a prospectus is not required, for example because the securities have already been offered to the public or because there is an exemption (as set out in Schedule 11) the competent authority can provide that securities can only be admitted to the official list after publication of listing particulars and other documents approved by the competent authority. Listing particulars are documents which contain information on the nature and circumstances of the applicant and on the securities to be listed. The content is determined by listing rules. The existence of the power will allow investors to make informed decisions about that security.

170. Subsection (3) allows the Treasury to prescribe the persons responsible for listing particulars. The Treasury intend to exercise this power to prescribe those persons covered by section 152 of the FS Act 1986. However, the power will allow there to be some flexibility to reflect the admission of any possible types of financial instrument to the official list. This is necessary given the comprehensive nature of the statutory regime under section 74.

para. 5

Version 1 of 1

Date not available - Present

Subjects

Financial regulation

Section 80: General duty of disclosure in listing particulars

171. This section places a duty on those responsible for producing listing particulars to ensure that those particulars contain, at the very least, adequate information to enable investors and their professional advisers to make informed decisions about the issuer and securities in question. The competent authority can authorise the omission of certain information in certain circumstances, as set out in section 82.

Section 81: Supplementary listing particulars

172. This section provides that where there is any significant change following the submission of listing particulars to the competent authority but before dealings in the securities have started, supplementary listing particulars must be approved and published.

Section 82: Exemptions from disclosure

173. This section allows the competent authority to authorise the omission of information required by listing rules to be included in listing particulars in certain circumstances. These circumstances are set out in subsection (1); namely, that the disclosure of the information would be contrary to the public interest, would be seriously detrimental to the issuer (for example the disclosure of commercial secrets), or would be unnecessary given the kind of people who could be expected to buy or sell those securities (for example, if the securities were only dealt in by professionals).

174. Subsection (2) provides that information cannot be omitted where it would be seriously detrimental to the issuer if that information is essential in order for a person to make an informed assessment. (*“Essential information”* is defined in subsection (6).)

Section 83: Registration of listing particulars

175. This section requires listing rules to provide that listing particulars must be lodged with the registrar of companies on or before the date on which they are published. The same requirement applies to prospectuses because of section 86. Breach of this requirement is an offence under subsection (3), punishable by a fine.

Section 84: Prospectuses

176. This section provides that a prospectus must be published before securities are offered to the public in the United Kingdom for the first time before admission to the official list. Section 103(6) and Schedule 11 define the circumstances in which a person is to be treated as having offered securities to the public in the United Kingdom. For example, an offer is not regarded as being made, and the requirement to publish a prospectus therefore does not arise, where the offer is made to no more than 50 persons.

Section 85: Publication of prospectuses

177. This section makes it a criminal offence for a person to offer new securities to the public in the United Kingdom before a prospectus has been published. This offence only applies where listing rules require the publication of a prospectus before particular new securities are admitted to the official list.

Section 87: Approval of prospectus where no application for listing

178. Where securities are to be offered to the public in the United Kingdom for the first time and there has been no application for listing, listing rules may allow issuers to submit prospectuses to the competent authority for approval. This section refers to such prospectuses as “non-listing prospectuses”. Where such a prospectus has been approved by the competent authority, under EC law it must be recognised by competent authorities in other member States as complying with their own rules on prospectuses. Accordingly, there is no need in these circumstances to obtain further approval from another competent authority if the securities are to be issued in another member State.

Section 88: Sponsors

179. This section enables the competent authority to make listing rules requiring issuers of listed securities, or issuers seeking admission to the list, to appoint a sponsor.

180. Subsections (2) and (3) allow the competent authority to approve persons who may act as a sponsor, and to maintain a list of such persons. They also allow the relevant listing rules to specify particular services which must be performed by a sponsor (for example a sponsor might be required to certify that certain requirements for listing are met).

181. Subsections (4) to (7) apply the standard warning notice and decision notice procedure where the competent authority proposes to refuse a person's application for approval as a sponsor, or to cancel such approval, and provide the right to refer the matter to the Tribunal where a decision notice is given.

Section 89: Public censure of sponsor

182. This section permits the competent authority to make listing rules which allow it to make public statements to the effect that a sponsor has contravened a requirement imposed on him by the listing rules, subject to the warning and decision notice procedure and a right to refer the matter to the Tribunal. The power to impose financial penalties does not, however, apply to sponsors.

Section 90: Compensation for false or misleading particulars

183. This section provides that a person responsible for listing particulars (or, under this Part as applied by sections 86, 87(5) and Schedule 9, prospectuses or non-listing prospectuses) is liable to pay compensation to those who suffer loss as a result of untrue or misleading statements or the omission of any information which must be contained in those documents. There are some circumstances in which there is no liability to pay compensation. These are set out in Schedule 10.

Section 91: Penalties for breach of listing rules

184. This section gives the competent authority a power to impose financial penalties on issuers who have breached the listing rules. Under the FS Act 1986, the competent authority can issue private or public censures or suspend or cancel the listing of securities. The additional power conferred by this section is intended to provide further flexibility in this area. The competent authority will also be able to impose penalties upon present and former directors (which is defined in section 417 to include shadow directors) who were knowingly involved in a breach of the listing rules. However, it may not impose a penalty later than two years after it first became aware of the breach.

185. Section 92 sets out the procedures the competent authority must follow when imposing a penalty. The competent authority is also required to publish a statement of its policy as regards penalties (see sections 93 and 94). Before issuing or altering such a statement, the competent authority must consult on its proposals.

: Competition scrutiny

186. This section gives the Treasury a power to subject the “regulating provisions” of the competent authority (which is to say the listing rules and general guidance it produces) and its practices to a competition scrutiny regime. The Treasury proposes to use this power to create a competition scrutiny regime for the competent authority which is broadly similar to the regime for the Authority, in its role as financial services regulator, as provided for by Chapter III of Part X of the Act. The power will enable the Treasury to provide for exclusions from the provisions of the Competition Act 1998 analogous to those for which Chapter III of Part X of the Act makes provision.

187. Subsection (2) makes clear that such a regime will require the person responsible for the competition scrutiny procedure to consider whether any provision or practice, or combination of

provisions and practices, has at any time a significantly adverse effect on competition as defined in subsections (6) and (7).

Section 96: Obligations of issuers of listed securities

188. This section provides that listing rules may place obligations on issuers and may make provision for non-compliance. Subsection (2) provides that the competent authority can make listing rules which allow it to publish information which an issuer has been required but has failed to publish.

Section 97: Appointment by competent authority of persons to carry out investigations

189. This section allows the competent authority to appoint investigators if it appears to it that there are circumstances suggesting that there may have been a breach of the listing rules; that a director or former director of an issuer was knowingly concerned in a breach; or that there has been a contravention of the criminal offences in sections 83, 85, or 98. The section applies the provisions of Part XI as if the investigator were appointed under section 167(1). This means that the procedures set out in section 170 must be followed and that the investigator will have the powers set out in section 171.

Section 98: Advertisements etc in connection with listing applications

190. This section makes it an offence to issue an advertisement or other information of a kind specified in listing rules (for example an invitation to purchase securities) unless the contents have been approved by the competent authority or the issue of an unapproved advertisement or information has been authorised by the competent authority. This offence only applies where listing particulars are, or are to be, published.

191. Subsection (3) provides a defence against this criminal offence where someone reasonably believed that the advertisement had been approved or its issue authorised by the competent authority.

Section 100: Penalties

192. This section provides that the competent authority must not seek to recover its costs when imposing financial penalties. It also provides that it must operate a scheme to redistribute monies received from financial penalties to issuers. It must consult on the scheme and have regard to representations before making the scheme. The provisions of this section are analogous to those applying to the Authority more generally under paragraph 16 of Schedule 1.

Section 102: Exemption from liability in damages

193. This section gives the competent authority and its staff immunity against legal action for damages in respect of anything done or omitted in the discharge of its functions. This immunity does not apply where the act or omission was in bad faith or where it was unlawful as a result of section 6(1) of the Human Rights Act 1998. Section 6(1) of that Act makes it unlawful for a public authority to act in a way which is incompatible with a right conferred by the European Convention on Human Rights and Fundamental Freedoms which is included in Schedule 1 to the 1998 Act.

PART VII: CONTROL OF BUSINESS TRANSFERS

194. This Part provides a mechanism for transferring, with the sanction of the courts, all or part of the business of certain kinds of authorised persons. In broad terms, the mechanism covers 2 types of transfer:

- transfers of insurance business; and
- transfers of banking business.

195. The mechanism, as it relates to transfers of insurance business, replaces the arrangements under sections 49 to 52B of, and Schedule 2C to, the Insurance Companies Act 1982, which implement requirements of the EC insurance directives. Banking business transfers have usually required a private act of Parliament, which can involve a lengthy procedure and substantial cost to the firms concerned.

Section 104: Control of business transfers

196. This section establishes that the arrangements under Part VII are generally the exclusive route for giving effect to the types of transfer to which the Part applies. However, the definition of insurance business transfer schemes under section 105 provides for qualifying cross-border transfers to be approved in other member States, in accordance with the directives.

Section 105: Insurance business transfer schemes

197. This section defines the insurance business transfers covered by the new mechanism. It only applies to transfer schemes where, after the transfer, the business transferred will be carried on from an establishment in the EEA, and where prior to the transfer all or part of the business to be transferred is:

- carried on, wholly or in part, in the EEA by a “UK authorised person” (defined in subsection (8)); or
- reinsurance business and it is carried on in the UK branch of an EEA firm (see Schedule 3); or

- carried on, wholly or in part, in the United Kingdom by an authorised person who is neither a UK authorised person nor an EEA firm.

198. In each case the authorised person transferring the business must have the appropriate permission under Part IV of, or Schedule 3 to, the Act.

199. However, subsection (3) sets out a series of cases for which the new mechanism does not apply. The mechanism does not apply where the transferor is a friendly society (referred to as case 1). Such transfers are covered by provisions in the Friendly Societies Act 1992. The other cases are where the arrangements under this Part do not apply are:

- transfers of reinsurance business by UK authorised persons which have been approved by a court in another EEA State or by the relevant regulator in the State or States in which it is carried on (case 2);
- transfers of business carried on outside the EEA which do not include policies (other than reinsurance policies) against risks arising in the EEA, and which have been approved by the courts or relevant authorities in a non-EEA State (case 3);
- where each of the policyholders has consented to the transfer, in cases of reinsurance business and entities where the policyholders are ‘controllers’ (within the meaning of Part XII) of the firm or other firms in the same group, essentially “captive” insurers (case 4).

200. Subsections (5) to (7) ensure that the powers of a court to make orders under the Companies Act (and the equivalent Northern Ireland provisions) dealing with schemes for reconstruction (compromises or arrangements agreed with creditors) can apply in transfers covered by the arrangements under the Part.

Section 106: Banking business transfer schemes

201. This section enables parties to a transfer of business involving accepting deposits to apply to the court for an order sanctioning the transfer. Subsection (1) applies the arrangements under this part to transfers of the business of authorised persons domiciled in the United Kingdom with permission to accept deposits, wherever the business is carried on. It also applies the arrangements where an overseas firm carrying on banking business in the United Kingdom transfers its business to another firm. However, the arrangements do not apply to transfers from building societies (for which separate arrangements exist under the Building Societies Act 1986) or credit unions or transfers falling within section 427A of the Companies Act.

Section 107: Application for order sanctioning transfer scheme

202. This section enables either a transferee, or the transferor, or both, to apply to the court for an order sanctioning a transfer of an insurance or banking business. Subsection (3) makes provision

as to the court to which an application may be made. The appropriate court will depend on the country or territory in which the businesses are registered or have their head office.

Section 108: Requirements on applicants

203. This section confers on the Treasury a power to specify, by regulations, requirements with which firms must comply before seeking an order sanctioning a transfer under section 111. Where firms have not complied with those requirements, the court would not be able to sanction the transfer.

204. Subsection (3) confirms that regulations made under this section may include requirements to give notice and the way in which notice must be given. This may, for example, include giving notice of the proposed transfer to customers or creditors of the firm but the kinds of requirement are not limited.

205. Regulations made under this power may also specify the circumstances in which the court may decide that a firm need not comply with a requirement. This is necessary to ensure that in circumstances where a firm cannot reasonably comply with a requirement, it need not prevent a court from approving a transfer. An example where this might be necessary is in relation to a requirement to give notice to customers of the firm transferring its business to another, in circumstances where it did not have contact details for some of its customers, as sometimes happens in the case of dormant bank accounts or old life insurance policies.

Section 109: Scheme reports

206. Under this section, it is a requirement that a proposal to transfer insurance business is to be accompanied by a report by an expert. The coverage of the report may be determined by the Authority and the appointment of the expert is subject to the approval of the Authority. The purpose of this section is to ensure that the court is presented with a full and accurate report of the proposed transfer by an independent expert in order that the court may properly assess its impact, including the effect on policyholders of the authorised person in question (and any third parties who may rely on their policies).

Section 110: Right to participate in proceedings

207. This section gives the Authority and those affected by the proposed transfer a right to be heard by the court when it is considering an application under section 107. This will mean that the Authority will be able to make representations about matters which, as regulator, cause it concern. It also ensures that any person connected with either the transferor or transferee firm — including customers of either firm or their employees — may also make representations to the court about the implications for them. The court will be able to take these views into account when considering the application.

Section 107: Sanction of the court for business transfer schemes

208. This section sets out the conditions that must be met before the court may sanction a business transfer scheme. The conditions are that the transferee firm has obtained any necessary certificates, which are set out in Schedule 12, and also that court is satisfied that the firm will have the necessary authorisation to carry on that business after the transfer (unless no authorisation is required, as may be the case for some reinsurance undertakings in other territories).

209. The precise requirements imposed under the Schedule will depend on a number of factors including whether the business in question is insurance or banking business, and the location of the business (that is whether it is domiciled in the United Kingdom, another EEA member State or overseas).

210. An insurance business will require:

- a certificate about confirming that it has the necessary margin of solvency (paragraph 2 of the Schedule); and
- a certificate indicating that a host State regulator — in cases involving risks or firms located in another EEA member State — has consented (or failed to object within 3 months) to the transfer (paragraphs 3 to 5).

211. In the case of a bank it will need to produce:

- a certificate confirming that the bank has adequate resources; and
- in the case where either the transferor or transferee company is domiciled in another EEA state, a certificate confirming that the home state regulator has been informed about the transfer.

212. In deciding whether to sanction the scheme, the court must consider whether it is appropriate, in all the circumstances, to do so.

Section 112: Effect of order sanctioning business transfer scheme

213. This section makes it clear that any order of the court sanctioning a business transfer scheme may include any necessary provisions to ensure that any transfer is able to take proper effect. Accordingly, the court will be able to order either that all rights and liabilities of and against the firm whose business is being transferred become rights and liabilities of the transferee firm, or that appropriate measures are taken to extinguish or reduce such rights and liabilities.

214. A reduction may be necessary, for example, where a firm is insolvent and the transfer of business is part of a “rescue” proposal. In other cases, rights and liabilities may not be suitable for transfer and so alternative arrangements may be required, for example in the case where a bank

had a taken a floating charge over the assets of the firm in relation to a credit facility, where neither would be relevant to the ongoing business after the transfer.

215. These arrangements are consistent with the previous arrangements under Schedule 2C to the ICA 1982 and relevant companies and insolvency legislation.

Section 113: Appointment of actuary in relation to reduction of benefits

216. This section enables a court, in response to an application from the Authority, to appoint an independent actuary to report on a business transfer in particular circumstances. This is aimed particularly at situations where a company from which business is to be transferred is in financial difficulties and unlikely to be able to meet all of its obligations to policyholders or other creditors. By the application of insolvency law, the policyholders would only be entitled to recover a proportion of the amounts due to them.

217. Section 112 enables the court to sanction a transfer that has the effect of reducing liabilities to policyholders, since in many cases allowing the transfer to a solvent company will be preferable to leaving the policyholder to recover money due from the insolvent insurer. In practice, a transfer would most likely only be approved where the effect was no worse than if it did not go ahead. The purpose of this section is to enable the court to take an informed view about the proposed reduction in benefits, to ensure that policyholders interests are properly protected. A policyholder who suffered loss in such circumstances might be able to make a claim to the compensation scheme under Part XV of the Act.

Section 114: Rights of certain policyholders

218. This section provides that any EEA policyholders whose local law confers on them a right to cancel the policy in the event of a transfer have an adequate opportunity to exercise that right.

Section 115: Certificate for the purpose of insurance business transfers overseas

219. This section is a paving provision for Part III of Schedule 12 which enables the Authority to issue a certificate about the solvency of a UK authorised firm to which insurance business is to be transferred from overseas. Such a certificate would enable the Authority to confirm to a regulatory authority in another EEA member State or Switzerland that the transferee firm was financially sound and able to accept the business being transferred to it.

Section 116: Effect of insurance business transfers authorised in other EEA States

220. This section ensures that, where an insurance business transfer has been approved in another EEA member State in accordance with its domestic procedures, the transfer has effect in UK law. This means that where a person in the United Kingdom has an insurance policy with an EEA company whose business is in another member State, their contract is transferred so that the

policyholder continues to enjoy the same rights and to be subject to the same obligations against the new company as they did against the company that issued the original policy.

Section 117: **Power to modify this Part**

221. This section allows the Treasury by regulations to modify the arrangements in relation to prescribed categories of transfer (for example, to ensure sufficient flexibility to allow for possible exclusions where transfers were subject to approval procedures in overseas jurisdictions). This section also allows the Treasury by regulations to amend the provisions of this Part to provide for its more effective operation.

PART VIII: **PENALTIES FOR MARKET ABUSE**

222. This Part confers power on the Authority to impose penalties for market abuse or to publish a public statement that someone has engaged in market abuse. The Act sets out the kinds of behaviour which will constitute market abuse and places a duty on the Authority to produce a code which will help to determine whether particular behaviour amounts to market abuse. This code will carry evidential weight, and in certain circumstances will provide a defence, or “safe harbour”, against allegations of abuse. This Part also gives the Treasury the power to prescribe the coverage of the regime by specifying both the markets and the investments traded on those markets to which it applies. It sets out the procedures the Authority must follow when proposing to impose a penalty. It also confers a right to refer a decision to impose a penalty to the Tribunal.

Section 118: **Market abuse**

223. This section sets out the behaviour which constitutes market abuse. It also confers on the Treasury an order-making power to specify which markets and which investments come within the scope of this section.

224. Subsections (1) and (2) set out the conditions which must be satisfied before behaviour can be regarded as market abuse (and a penalty possibly imposed or statement published). In order to be abuse the behaviour must:

- take place in relation to qualifying investments traded on a market to which the section applies;
- be behaviour of a particular kind, as set out in subsection (2); and
- be behaviour which is likely to be regarded by a regular user of the market as a failure on the part of the person (A) engaged in the behaviour to observe the standards which the regular user would reasonably expect of a person in A's position. The regular user of the market is defined in subsection (10) to be a reasonable person who regularly deals on the

market. He is intended to represent the distillation of the standards expected by those who regularly use the market.

225. There are three kinds of behaviour set out in subsection (2). Broadly speaking, these are that the behaviour is based on information not generally available to the rest of the market; that the behaviour is likely to give the regular market user a false or misleading impression; or that the regular user would be likely to regard the behaviour as behaviour which would distort the market.

226. Subsection (6)(a) brings behaviour which takes place in relation to the subject matter of investments within the definition of behaviour which can be caught by these provisions. This means that, for example, behaviour in relation to a precious metal which affects the price of a futures contract in the metal can potentially be caught by these provisions if it is behaviour which falls within all of the tests set out above. Subsection (6)(b) also brings investments within the regime which are not themselves qualifying investments for the purposes of this section, but which are derivatives of a qualifying investment (for example options on options); or whose price or value is expressed by reference to the price or value of qualifying investments, for example spread bets. Subsection (8) allows the Authority to provide that behaviour conforming with a particular rule or rules does not amount to market abuse.

para. 6

Version 1 of 1

Date not available - Present

Subjects

Financial regulation

Section 119: The code

227. This section places a duty on the Authority to prepare and issue a code which will allow it to set out the kinds of behaviour which, in its opinion, amount or do not amount to market abuse. The purpose of this code is to give guidance as to whether or not behaviour is abusive.

228. Subsection (2) makes clear that the code may describe behaviour which, in the opinion of the Authority, either does or does not amount to abuse. (Section 122 provides that a statement in the code that a particular type of behaviour is not an abuse is conclusive evidence of this fact.) It may also set out factors which, in the Authority's opinion, should be taken into account when determining whether an abuse has occurred. An example of such factors might be an individual's expertise or the fact that someone holds a position of particular responsibility. Subsections (6) to (8) place the Authority under a duty to publish the code (including any amended or replacement version under subsections (4) and (5)). The Authority must consult on its proposed code, or on proposed alterations or replacements under section 121.

Section 120: Provisions included in the Authority's code by reference to the City Code

229. This section enables the Authority to include in the code produced by it under section 119 "safe-harbours" from proceedings for market abuse for behaviour in conformity with the City Code on Takeovers and Mergers produced by the Panel on Takeovers and Mergers. If the Authority includes any such provisions, then behaviour which complies with those provisions does not amount to market abuse (as a result of section 122(1)). The approval of the Treasury is required under subsection (2) before it can do so.

230. In considering whether market abuse has taken place, subsection (3) requires the Authority to keep itself informed as to the way in which the Panel interprets and administers the relevant provisions of the City Code.

Section 122: Effect of the code

231. Subsection (1) provides a safe harbour, by making it clear that if a person undertakes any behaviour which the code currently in force specifically states does not amount to market abuse, then he cannot be taken for the purposes of the Act to have abused the market. Subsection (2)

makes clear that in other circumstances the code may be relied upon insofar as it indicates that the behaviour in question does or does not amount to market abuse.

Section 123: Power to impose penalties in cases of market abuse

232. This section allows the Authority to impose a monetary penalty on any person, whether an authorised person or not, who has engaged in market abuse or has required or encouraged another to engage in market abuse. Subsection (3) allows the Authority, as an alternative to imposing a penalty, to publish a public statement that a person has engaged in market abuse or has required or encouraged another person to do so. Subsection (2) provides that the Authority cannot impose a penalty or make a statement where a person has reasonable grounds for believing his behaviour did not constitute market abuse or that he was not requiring or encouraging another to engage in market abuse, or where the person concerned took all reasonable precautions and exercised all due diligence to avoid doing such things. The procedures for taking action under this section are set out in sections 126 and 127.

Section 124: Statement of policy

233. This section places a duty on the Authority to prepare and publish a statement of its policy in respect of penalties under section 123. The Authority will be able to set out in this document the circumstances in which it might impose a penalty and factors it will take into account in deciding what level of penalty to impose.

234. Subsection (2) requires that the Authority's policy for determining the amount of a penalty must take into account the effect and seriousness of the behaviour, whether or not it was deliberate or reckless and whether the person who engaged in the abuse was an individual. The Authority may also take into account other matters it considers appropriate. The Authority must consult on the initial version of the statement and on any subsequent changes as provided for in section 125. Subsection (3) requires the Authority to include in the statement an indication of when the Authority is to be expected to regard a person as benefiting from section 123(2). Subsection (6) makes clear that the Authority must then have regard to a statement issued under this section when using its powers.

Section 128: Suspension of investigations

235. This section allows the Authority to direct a recognised investment exchange or recognised clearing house not to conduct an inquiry or to stop any inquiry it is already undertaking where the Authority is, or is considering, carrying out an investigation itself, or imposing a penalty on a person for market abuse.

Section 129: Power of court to impose penalty in cases of market abuse

236. This section allows the Authority to apply to the court to impose a penalty for market abuse where the court is considering whether to grant an injunction under section 381 or order restitution under section 383 in a case of market abuse.

Section 130: Guidance

237. This section allows the Treasury, with the approval of the Attorney General and the Secretary of State, if the need arises, to issue guidance to the relevant prosecuting authorities (as set out in subsection (3)). The purpose of this guidance would be to help those authorities in deciding whether a case should be subject to criminal prosecution, or the imposition of penalties under the market abuse provisions, in the area of overlap between these provisions and the criminal offences of insider dealing (in the Criminal Justice Act 1993) and misleading statements and practices (in section 397). Subsection (5) confers a power on the Lord Advocate to issue equivalent guidance in relation to Scotland, where there are different arrangements for prosecution of offences.

PART IX: HEARINGS AND APPEALS

238. This Part establishes the Financial Services and Markets Tribunal. Various sections in the Act provide a right to refer a matter to the Tribunal once the Authority has notified the person concerned of its decision. This Part sets out the procedural framework for referrals to the Tribunal and for appeals from the Tribunal to the Court of Appeal, or in Scotland to the Court of Session, on a point of law. The Part gives the Lord Chancellor a general power to make rules for the Tribunal's operation. Schedule 13 sets out further details of the Tribunal's constitution and operation.

239. This Part also confers on the Lord Chancellor a power to establish a scheme to provide subsidised legal assistance in proceedings before the Tribunal for individuals on whom the Authority seeks to impose a penalty for market abuse under Part VIII of the Act.

Section 132: The Financial Services and Markets Tribunal

240. This section establishes the Tribunal and gives the Lord Chancellor the power to set its procedural rules. The Council on Tribunals is given oversight of the new Tribunal under the Tribunal & Inquiries Act 1992. Schedule 13 sets out requirements for the appointment of the President of the Tribunal, and the “panel of chairmen” panel and lay panel from which members of the Tribunal will be drawn. It includes provision for their qualifications and terms of office. It also permits the appointment of a Deputy President and administrative staff. It further provides power for the Tribunal to summon witnesses and to award costs. Subsection (3) contains the power for the Lord Chancellor to make rules for the Tribunal. Paragraph 9 of Schedule 13 sets out examples of the aspects of the Tribunal's procedures which might be covered by the Lord Chancellor's rules (such as when hearings might be held in private). Subsection (4) provides that this does not limit the Lord Chancellor's power.

Section 133: Proceedings: general provision

241. This section sets the time limit for making a reference to the Tribunal. The time limit is 28 days from the date of the decision notice or supervisory notice, unless a different period is prescribed in the procedural rules made for the Tribunal by the Lord Chancellor under section 132. The Tribunal will also have discretion to allow references to be made after the time limit has expired, subject again to any provision in the Tribunal's procedural rules.

242. The section also makes clear that the Tribunal may hear any evidence it considers relevant in determining the case before it, including evidence that was not available to the Authority when it made its decision. The Tribunal must determine what action the Authority should take and may give directions to the Authority in order to give effect to its determination. The Tribunal may also make recommendations as to the Authority's rules and procedures.

243. A supervisory notice takes effect on the date it specifies. However, subsection (9) provides that the Authority may not take the action referred to in a decision notice until the time for making a reference to the Tribunal has expired or, if the case is referred, until the case has been finally disposed of, including any subsequent appeals to the Court of Appeal, Court of Session or House of Lords (see section 137 below). An order of the Tribunal may be enforced as if it were an order of a county court in England, Wales or Northern Ireland, or the Court of Session in Scotland.

Section 134: Legal assistance scheme

244. This section gives the Lord Chancellor the power to make regulations establishing a legal assistance scheme. It sets out the coverage that such a scheme should have, namely that a person should only be eligible for legal assistance if he is an individual who has referred a decision of the Authority to impose on him a penalty for market abuse and provided that he meets the eligibility criteria which are to be established under section 135(1)(d).

Section 135: Provisions of the legal assistance scheme

245. This section gives examples of the type of provision the Lord Chancellor may include in the regulations, for example:

- the form legal assistance may take;
- the persons who may be engaged to provide the assistance;
- eligibility criteria; and
- procedural details as to how an application is made, to whom, and as to what happens when assistance is granted.

Section 136: Funding of the legal assistance scheme

246. This section sets out the way in which the legal assistance scheme is to be funded. It will be a free-standing scheme rather than an extension of legal aid and will be paid for by levies raised from authorised persons. The Lord Chancellor will determine the potential or actual cost of the legal assistance scheme. The Authority will have responsibility for determining the distribution of levies across the regulated community, collecting them and paying them over to the Lord Chancellor's Department.

247. The money raised will be paid into the Consolidated Fund. Spending on the legal assistance scheme will be voted expenditure. The costs of administering the scheme will come out of the running costs of the Tribunal.

248. If the amount paid to the Lord Chancellor in any one year exceeds the cost of the legal assistance scheme (for example because the costs in that period prove to be lower than anticipated), he must decide either to repay the excess to the Authority or else take into account this amount in the next determination of costs, by reducing the amount which the Authority has to levy during the following year. If the excess amount is repaid to the Authority, the Authority has discretion whether to distribute the money amongst those persons upon whom the levy was imposed (or some of them) to offset it against future invoices, or else partly to distribute the amount and partly offset it. This enables the Authority to avoid costly redistribution of small amounts. If the Authority considers that it is not practicable to deal with an excess in any of these ways, it may obtain the permission of the Lord Chancellor to use it in some other appropriate manner.

Section 137: **Appeal on a point of law**

249. This section establishes the right to appeal to the Court of Appeal or Court of Session on a point of law against a decision of the Tribunal. An appeal may be brought only with the permission of the Tribunal or the appeal court. If the appeal court considers that the decision is wrong in law it may remit the matter back to the Tribunal for a rehearing and decision or make a decision itself. An appeal may be made from the Court of Appeal or Court of Session to the House of Lords with the leave of the Court or the House of Lords. The Lord Chancellor may make procedural rules in relation to the exercise of these appeal rights.

PART X: RULES AND GUIDANCE

250. This Part of the Act confers powers upon the Authority and the Treasury to set regulatory requirements for authorised persons. It also gives the Authority power to issue guidance on requirements imposed by or under the Act.

Chapter I: Rule-Making Powers

251. Chapter I concerns the Authority's basic rule-making powers, the purpose for which rules can be made and the scope of the powers. There are other rule-making powers for specific purposes

in relevant parts of the Act, including Parts XV, XVI, XVII, XX and XXII. This Chapter also sets out the relevant procedural requirements when making rules.

252. Parts V, VIII, XIX, and XX also contain specific powers which enable the Authority to impose requirements on particular classes of person. For example, through statements of principle, codes of practice and directions on approved persons; on any person in relation to market abuse; on members of Lloyd's; and on members of the professions. Those powers are described in the relevant Parts of these explanatory notes.

Section 138: **General rule-making power**

253. This section confers a power on the Authority to make rules applying to authorised persons with respect to their carrying on of regulated and unregulated activities. Rules made under this section are referred to as “*general rules*” and can only be made to protect the interests of consumers. There need not be a direct relationship between the authorised persons to whom the rules apply and the consumers who are protected by the rules — so, for example, the Authority will be able to make rules under this section to protect the interests of beneficiaries of trusts, to further market integrity, as required by the Investment Services Directive, or to protect against systemic risk.

254. The bulk of the Authority's handbook of rules and guidance will be constructed using the rule-making power in this section. The power will also enable the Authority to make other rules, including rules relating to firms' systems and controls and rules regulating the conduct of firms' business with customers. These could, for example, include “know your customer” rules and “disclosure” requirements.

255. The provisions in this section enable the Authority to make rules at differing levels of detail, from rules with a high level of generality, which the Authority refers to as principles, to detailed conduct of business provisions.

256. Sections 152 to 155 set down the procedural requirements which the Authority must follow when making rules.

Section 139: **Miscellaneous ancillary matters**

257. This section elaborates on the provisions which the Authority can make under the rule-making powers. It expressly enables the Authority to make rules in respect of the handling of client money by authorised persons. The rules could be used to require money to be held in trust.

258. This section also allows the Authority to make rules which require authorised persons to allow customers a “cooling off” period after entering into an agreement. For example, under section 76 of the ICA 1982, persons entering long-term insurance contracts have 14 days in which to cancel

the policy and recover any premium paid. This section would allow the Authority to make rules requiring authorised persons to extend similar rights to customers.

Section 141: Insurance business rules

259. This section empowers the Authority to make insurance business rules prohibiting an authorised person who has permission to deal in contracts of insurance from carrying on a specified activity, which may be a non-regulated activity.

260. Subsection (3) enables the Authority to make rules in relation to contracts of long-term insurance entered into by an authorised person in the course of carrying on his business, in particular restricting the descriptions of property, or indices of value, by reference to which the benefits under such contracts may be determined.

Section 142: Insurance business: regulations supplementing Authority's rules

261. This section enables the Treasury to make regulations applicable to non-authorised persons connected with authorised persons with permission in relation to contracts of insurance, preventing them from taking actions which would weaken the effect of “asset identification rules” made by the Authority under the powers in this Part. Breaches of these regulations are subject to criminal sanctions.

262. Subsection (3) gives the Treasury powers to make regulations which would prevent a company paying dividends or creating a mortgage or charge over its property, and which would make void any mortgages or charges made, in breach of those regulations.

Section 143: Endorsement of codes etc

263. This section confers a power on the Authority to make rules endorsing the City Code on Takeovers and Mergers (“the Takeover Code”) and the Substantial Acquisition Rules (“SARs”), or particular provisions of them.

264. This section provides a mechanism enabling the Authority to exercise its disciplinary powers over authorised persons for a breach of the endorsed provisions of the Takeover Code or SARs. The arrangements are designed to ensure that an adviser will cease to act where the Takeover Code or SARs have been breached. Subsections (3) and (4) have the effect that disciplinary or intervention powers in respect of endorsed provisions may be taken by the Authority if the Takeover Panel has requested it to do so.

265. Before making rules which endorse the Takeover Code or the SARs, the Authority must follow the usual procedures set out in section 155 for consulting on a draft of the proposed rules. By applying relevant provisions of section 155, subsection (8) of this section also requires the Authority to consult if it wishes to give a notification to the Takeover Panel that it considers the

Panel's own consultation procedures are satisfactory. If the Authority does give such a notification, the effect under subsections (6) and (7) is that the Authority's endorsement of the Code or SARs extends automatically to subsequent amendments of the Code or SARs.

Section 144: **Price stabilising rules**

266. This section allows the Authority to make rules regarding actions which may be taken by authorised firms to stabilise the price of investments. Section 397(4) and 397(5)(b) provide that a person who is alleged to have created a false or misleading impression as to the market in certain investments has a defence to a charge under that section (such as misleading statements) if he proves that he was acting in conformity with rules made under this section.

267. Subsection (5) provides that the Authority may make rules which provide a similar defence to persons who have stabilised investments in compliance with the price stabilisation rules of an overseas body which is specified by the Authority. If an overseas body which is specified under this section changes its rules, the amended body's rules will be taken by the Authority to be endorsed under this section if the Authority has confirmed that it is satisfied with the overseas body's consultation procedures.

268. Subsection (4) confers on the Treasury a power to make regulations setting the outer boundaries of the Authority's power to make price stabilising rules.

Section 145: **Financial promotion rules**

269. This section confers a power on the Authority to make rules applying to authorised persons in relation to the regulation of financial promotion under Parts II and XVII of the Act.

270. Subsection (3) enables the Treasury to restrict this power.

Section 147: **Control of information rules**

271. Subsection (1) enables the Authority to make rules about the disclosure and use of information held by an authorised person. These rules are commonly known as "*Chinese walls*" rules. Chinese walls are barriers in the form of procedures, systems, management and physical separation which firms may employ in order to ensure that information obtained by one part of a firm is not communicated in inappropriate circumstances to another part of the firm (for example, where it would advantage one client at the expense of another). This power is broadly in line with that currently contained in section 48(2)(h) of the FS Act 1986.

272. Under subsections (2)(a) and (c), rules may require that information be withheld or not used for a customer's benefit where it would otherwise have to be disclosed or used, while subsections (2)(b) and (d) provide that rules may specify circumstances in which an authorised person may withhold or not use information which would otherwise have to be disclosed or used. This means

that, if an authorised person maintains Chinese walls in accordance with Authority rules made under the section, then he will not be subject to obligations as to the disclosure and use of information that would otherwise apply.

Section 148: Modification or waiver of rules

273. This section concerns the power of the Authority to waive or modify certain kinds of rules, as set out in subsection (1), at the request of an authorised person or with their consent. Subsection (4) specifies the circumstances in which the Authority may waive or modify these rules.

274. Waivers or modifications of rules can have indefinite effect or can be revoked by the Authority. Breaches of conditions attached to a waiver or modification are equivalent to a breach of rules.

275. Subsections (6) and (7) concern the obligation on the Authority to publish rule waivers or modifications. They provide that the Authority must publish waivers or modifications in such a way as to bring them to the attention of the people who are likely to be affected, unless the Authority thinks it would be inappropriate to do so. In considering whether publication would be appropriate, the Authority should take into account whether it believes that publication would unreasonably prejudice the authorised person's commercial interests or contravene any international obligations of the United Kingdom. The Authority would also need to take into account whether a breach of the rule in question would give rise to a right of action by a person under section 150. Persons affected by the modification or waiver will include clients of the authorised person and other authorised persons who might wish to benefit from similar arrangements.

276. In deciding whether certain of the conditions for withholding publication are met, subsection (8) requires the Authority to consider whether it can publish a waiver or modification of a rule without disclosing the identity of the authorised person concerned.

Section 149: Evidential provisions

277. This section enables the Authority to make rules which, if breached, will not lead to any disciplinary or other sanction provided for under the Act. Rules made under this section must state that they will not give rise to sanctions under the Act, but they must also indicate that their contravention can be relied on as indicating that another rule has been contravened, or that compliance with the rule can be relied on as indicating that another rule has been complied with. In particular, this power will enable the Authority to elaborate on rules, including principles, which are framed at a higher level of generality. The power can be used to promulgate codes, such as a code of practice, whereby rules comprising the code carry evidential status as to whether a higher level principle, which is underpinned by the code, has been breached.

Section 150: Actions for damages

278. This section sets out the circumstances in which persons who suffer loss as a result of a rule breach by an authorised person have a right of action for damages for resulting losses. This section does not remove any common law cause of action which a person might otherwise have. It allows a class of people to recover losses just by showing that there has been a breach of a rule as a result of which they have suffered loss rather than having to rely on that breach as evidence of negligence.

279. The section creates a presumption that private persons (as defined by the Treasury) who suffer loss as a result of a rule breach have a right of action for damages. The right does not extend to breaches of financial resources rules, listing rules or other rules which may be specified by the Authority. Customers would only generally suffer loss as a result of a breach of financial resources rules if the authorised person concerned became insolvent. In those circumstances, the relevant person's rights in the insolvency would not be altered by a separate right of action. Additionally, it might not be appropriate to attach a right of action to certain other rules, such as those drawn at a high level of generality.

280. There is a presumption that persons other than private persons do not have a right of action for damages, although the Treasury may by regulations specify that breaches of certain rules are actionable by non-private persons.

Section 151: Limits on effect of contravening rules

281. Breach of the Authority's rules does not make a person guilty of an offence, nor does it make a transaction unenforceable or void.

Section 152: Notification of rules to the Treasury

282. This section places a requirement on the Authority to give copies of new rules to the Treasury or, when it amends or revokes a rule, to give written notice of the fact to the Treasury.

Section 153: Rule-making instruments

283. This section requires the Authority to publish its rules in writing. As a result of subsection (3), if rules do not specify the power under which they are made, they will not have effect.

Section 155: Consultation

284. This section imposes consultation requirements on the Authority when it proposes to exercise its rule-making powers. Generally, draft rules issued for consultation must, as a result of subsection (2), be accompanied by a cost-benefit analysis of the proposals, an explanation of the purpose of the proposed rules and a statement that representations about the Authority's proposals may be made to the Authority within a specified time. They must also be accompanied by a statement of the Authority's reasons for believing that the proposed rules are compatible with its objectives.

285. Subsection (4) provides that the Authority must have regard to representations made to it when consulting on proposals to make rules. Subsections (5) and (6) provide that if the Authority decides to make the rule, it must give a feedback statement on the representations it received. If the rules which are introduced differ significantly from those which the Authority consulted on, the Authority must publish a statement of that fact, together with a cost-benefit analysis concerning the new provisions.

286. The Authority does not have to prepare a cost-benefit analysis when it considers that its proposals will not result in a material increase in costs. It would, however, still need to consult on the content of the proposed rules. Also, where the Authority proposes to exercise its powers to charge fees, the requirement to produce a cost-benefit analysis does not apply but the Authority is required to consult on the proposed expenditure which would result from the fee-raising exercise. Part III of Schedule 1 contains further provisions regarding the Authority's fee-raising powers.

287. Consultation requirements will not apply if the Authority considers that any delay resulting from the consultation would harm consumers.

Subjects

Financial regulation

Section 156: General supplementary powers

288. This section confirms that the Authority's rules may make different provision for different cases and that the rules may make incidental, supplemental, consequential and transitional provisions.

Chapter II: Guidance

289. Chapter II concerns the Authority's power to issue and charge for guidance on its rules, the legislation and other matters relating to its functions, including its regulatory objectives.

Section 157: Guidance

290. This section enables the Authority to issue and charge for guidance on all the matters listed in subsection (1).

291. Subsection (2) confirms that the Authority can use its financial resources or its other resources to support the giving of information and advice by third parties where the Authority considers it could have given the advice or information under this section.

292. Subsection (3) provides that when giving guidance on its rules which is intended to have broad application, the Authority will need to meet various of the requirements of section 155, including those requiring consultation and the publication of a cost-benefit analysis. Subsection (4) clarifies that the Authority can charge for its guidance, whether it is offered generally or in response to a specific request.

Chapter III: Competition Scrutiny

293. Chapter III provides for competition scrutiny of the Authority's rules, guidance, codes and practices.

Section 160: Reports by the Director General of Fair Trading

294. This section concerns reports by the DGFT on possible adverse effects on competition of the Authority's regulating provisions and practices. A significant adverse effect on competition is defined in section 159(2) and (3). It includes things which have the effect of requiring or encouraging exploitation of the strength of a market position.

295. Subsection (1) provides that the DGFT must keep the Authority's practices and regulating provisions (which are defined in section 159 and include rules, guidance and codes) under review. The DGFT can, at any time, investigate the Authority's practices and regulating provisions under the powers conferred by section 161.

296. Following an investigation, if the DGFT finds that regulating provisions or practices, either singly or in combination, have a significant adverse effect on competition then he must produce a report. The DGFT has discretion as to whether to produce a report or not if he finds that there is no such effect.

297. Subsections (5) and (6) provide that the DGFT must send a copy of any report he produces to the Competition Commission (the "Commission"), the Treasury and the Authority. The DGFT must, so far as is practicable, exclude from the published version of the report any matter which relates to the affairs of a person which might seriously prejudice that person's interests. (Subsection (9) provides that such matters do not need to be excluded from the version which goes to the Commission, the Treasury and the Authority.)

Section 161: Power of Director to request information

298. This section provides that, in carrying out his functions under section 160, the DGFT has powers to request relevant documents from any person, and to request relevant information from any business.

299. Subsections (5) and (6) provide that if a person fails to produce a required document, or piece of information, then the DGFT may report the matter to the court, and if the court is satisfied that there was no reasonable excuse for this failure, that person may be dealt with as if he were in contempt of court.

Section 162: Consideration by the Competition Commission

300. This section concerns the role and duties of the Competition Commission following receipt of a report from the DGFT. It is supplemented by the provisions of Schedule 14.

301. There are two types of report which the Commission must consider under this section and on which it must produce a report. The first is a report by the DGFT which concludes that particular regulating provisions or practices of the Authority have a significantly adverse effect on competition (type A). The second is a report by the DGFT which concludes that particular regulating provisions or practices do not have such an effect, but where the DGFT has referred

the matter to the Commission for further consideration (type B). (If the DGFT does not ask the Commission to consider a type B report, then that is the end of the matter.)

302. Subsection (4) provides that the Commission's report must state its conclusions as to whether the regulatory provisions or practices have a significantly adverse effect on competition. If it concludes that there is no such effect (that is, it agrees with a type B report or disagrees with a type A report), then that is the end of the matter. No further action can be taken.

303. If, however, the Commission concludes that there is such an effect, then subsection (5) requires it to state in its report whether it considers that the effect is justified. In taking this decision, subsection (7) requires the Commission, as far as is reasonably possible, to reach a conclusion which the Authority could have reached given the obligations which the Act places on the Authority and the functions which it confers. In its report, the Commission has to state what action, if any, ought to be taken by the Authority in the light of the unjustified anti-competitive effect. This could include the Authority changing its rules or practices in specified ways.

304. Any report produced by the Commission under this section has to be sent to the Treasury, the Authority and the DGFT. Subsection (2) provides that the Commission does not need to produce a report where there has been a change of circumstances which makes it unnecessary. For example, the Authority may, once it has received the DGFT's report, change the rule in question, or stop engaging in a particular practice, so that the adverse effect on competition identified by the DGFT is removed.

Section 163: Role of the Treasury

305. This section concerns the Treasury's powers to take action following an adverse report from the Commission.

306. If the Commission's report is that the significantly adverse effect on competition is not justified, subsection (2) requires the Treasury, unless exceptional circumstances exist, to direct the Authority to take appropriate action. Subsection (4) provides that the Treasury must have regard to the Commission's conclusion as expressed in its report. The special circumstances in which the Treasury do not have to direct the Authority to make changes following an adverse Commission report are where:

- the Authority has already taken action, for example through changes to its rules or practices, which means that the Commission's recommendations are no longer relevant; or
- the Treasury concludes that the existence of exceptional circumstances mean that it would not be appropriate or necessary to direct the Authority to make changes. For example, the Treasury may conclude that there would be a grave risk to the financial system if certain regulating provisions were changed.

307. Subsection (7) provides that the Authority cannot be directed by the Treasury to take any action which it would not have the power to take itself. If the Commission were to recommend changes which did not, for example, provide an appropriate level of protection for consumers, the Treasury could not direct the Authority to make those changes.

308. If the Commission's view is that a significantly adverse effect is justified, subsections (5) and (6) allow the Treasury to override that decision and direct the Authority to make changes where there are exceptional circumstances, for example, in order to meet international obligations.

309. Subsections (10), (11) and (12) provide that if the Treasury decide, because of exceptional circumstances, not to take action following a Commission report that a regulating provision or practice has an adverse effect on competition, or decide to take action in the opposite case, they must produce a statement giving their reasons. Any such statement must be made available to the public and must be laid before Parliament.

Section 164: **The Competition Act 1998**

310. This section makes clear that neither the prohibition in Chapter I (of agreements preventing, restricting or distorting competition within the United Kingdom) nor the prohibition in Chapter II (of abuse of a dominant position in a market which may effect trade in the United Kingdom) of the Competition Act 1998 apply to any action taken by a person in order to comply with the Authority's regulating provisions or practices.

PART XI: INFORMATION GATHERING & INVESTIGATIONS

311. This Part sets out the powers of the Authority to require the production of information and documents, to require reports to be compiled, to conduct investigations and to obtain access to premises. Many of these powers are also held concurrently by the Secretary of State in recognition of his wider responsibilities in relation to company law.

312. The powers provided for in this Part are in addition to the specific powers conferred on the Authority by other provisions of the Act to request information from unauthorised persons in particular circumstances, such as in connection with an application for authorisation or recognition. They enable the Authority to require information on an ad hoc basis and therefore supplement the Authority's ability to make rules requiring authorised persons to provide it with information on a routine basis under its general rule-making power (section 138).

313. Under section 177, failure to comply with any requirement imposed using any of the powers in this Part can be certified to the court and dealt with by the court as if the defaulter were in contempt.

314. None of the powers in this Part may be used to require the disclosure of material which is protected by section 413.

Section 165: Authority's power to require information

315. This section gives the Authority a general power to require information or documents which may reasonably be required in connection with the discharge of its functions under the Act. The information or documents may be required from any person, including a legal person, who is any of the following:

- an authorised person;
- a formerly authorised person;
- a person connected with an authorised person, as defined in subsection (11);
- an operator, trustee or depository of an open-ended investment company;
- a recognised investment exchange;
- a recognised clearing house.

316. Either the Authority can write to the person asking for the production of the information or documents within a reasonable timescale, or it can send an officer to whom it has given written authorisation. The person is required to provide the information or documents without delay, and he may also be required to take any reasonable steps the Authority may specify to verify the information provided.

Section 166: Reports by skilled persons

317. This gives the Authority the power to require an authorised person or a formerly authorised person to commission and provide the Authority with a report into any relevant matter the Authority may specify. This must be a matter about which the Authority could require information under section 165, so the report must reasonably be required in connection with the discharge of the Authority's functions.

318. The power also enables the Authority to require such reports from other persons carrying on a business who are, or were, connected to the authorised or formerly authorised person in the ways specified in subsection (2). Essentially, these are members of the same group of companies, or companies closely linked through a common shareholder, or any partnership of which the authorised or formerly authorised person is or was a member. This is a more limited set of persons than under section 165 and Schedule 13.

319. The person making the report must be nominated by the Authority, or his appointment must be approved by it. The Authority has to be satisfied that he has the relevant skills to report on the matter concerned. In many cases this person may be an accountant, or they may be a person with some other suitable professional qualification, such as a lawyer or an actuary, or they may be

a person with particular commercial or professional experience, such as a banker. The Authority may also specify the form of the report.

320. Subsection (5) imposes an obligation on any in-house expert working for the authorised or connected person to co-operate with the person appointed to produce the report. Thus, if the report is to be produced by an actuary then the in-house actuary who works for the firm is obliged to co-operate in the production of the report. This duty is enforceable by the Authority through an injunction, or a comparable order in Scotland.

Section 167: Appointment of persons to carry out general investigations

321. Under this section, either the Authority or the Secretary of State (the “investigating authority”) may, where it appears that there are good reasons for doing so, appoint competent persons to conduct an investigation on their behalf into the business of an authorised person or appointed representative, or into the ownership or control of an authorised person. An “*appointed representative*” is a person who is exempt from the general prohibition in relation to particular regulated activities by virtue of a contract with an authorised person as described under section 39. An appointed representative and the authorised person who is the principal of that representative as a result of the contract may be investigated at the same time. An investigation may also be made into a formerly authorised person or a former appointed representative, although the scope of such investigations is limited by subsection (4) to the business they conducted while they were authorised or appointed or under the control or ownership of the former authorised person at that time. Written notice must be given to the person under investigation under section 170(2).

322. The people appointed to conduct the investigation may be employees of the investigating authority (under section 170(5)), or other people engaged specifically for the purpose. If they judge it necessary for the purposes of the investigation, they may also inquire into the business of other connected companies or partnerships, including those which were connected at some relevant time in the past (this extends to the same classes of connected company or partnership as section 166). The investigator(s) must give written notice to any other company or partnership whose business they intend to inquire into in this way.

Section 168: Appointment of persons to carry out investigations in particular cases

323. In addition to the general power under section 167 to investigate the business of authorised persons and appointed representatives where there is “good reason” to do so, this section gives the Authority or the Secretary of State (“the investigating authority”) the power to appoint competent persons (who can be employees of the investigating authority) to conduct investigations where it appears that there are circumstances suggesting that some specific contravention or offence may have taken place. The more specific grounds for the exercise of the powers under this section are reflected in the wider powers of the investigators (see notes on sections 171 to 173 below).

324. Among the contraventions that may be investigated by either the Authority or the Secretary of State under this section are a breach by an unauthorised person of the general prohibition, the commission of the misleading statements and practices offence under section 397, market abuse under section 118, or insider dealing under Part V of the Criminal Justice Act 1993. The Authority, but not the Secretary of State, may also launch an investigation under this section where a person is suspected of having committed an offence under prescribed money laundering regulations.

325. The Authority may also appoint investigators under this section to look into suspected contraventions of rules or regulations made under the Act, failures to comply with statements of principle made under section 64, or to investigate the fitness and properness of approved persons under Part V of the Act. The fitness and properness of authorised persons may be investigated under section 167.

Section 169: Investigations etc in support of overseas regulator

326. This section gives the Authority new powers comparable to those held concurrently by the Treasury and the Secretary of State under section 82 of the Companies Act 1989 to investigate matters on behalf of an overseas regulator. In deciding whether it is appropriate to exercise this power to require information or to appoint investigators on behalf of an overseas authority, the Authority is directed to take account of the factors listed in subsection (4), which include the seriousness of the case and the wider public interest in providing the assistance.

327. When the request comes from another competent authority under any of the single market directives (see the notes on Schedule 3 for a brief explanation), the Authority is also required to consider whether the assistance must be given in order to fulfil the obligations to co-operate imposed by those directives. If it decides that it is, the other factors fall away.

328. The Authority may make the exercise of the power conditional on the overseas authority making an appropriate contribution towards the cost of doing so, except where it considers that exercise is necessary in order to fulfil the obligations to co-operate under the directives.

329. Under subsection (7), the Authority may decide to permit representatives to attend and participate in any interview to be conducted by the investigators it has appointed. But in order to permit this, the Authority is required to be satisfied that the information thus obtained by the overseas regulator will be subject to equivalent safeguards on its subsequent use and disclosure as are contained in Part XXIII of the Act. The Authority must also prepare a statement of its policy on the exercise of this discretion, which must be approved by the Treasury and, if approved, published. The discretion may not be exercised until this statement has been approved and published.

Section 170: Investigations: general

330. Where an investigation has been launched into a person under section 167 or 168, the Authority or the Secretary of State (whichever is the investigating authority) must notify that

person that the investigator has been appointed. They must also inform the person under investigation of the reason for the appointment, and the particular provisions of the Act under which the appointment has been made.

331. However no notification is needed for investigations under section 168 into possible insider dealing, market abuse or misleading statements and practices, or into contraventions of the general prohibition under section 19, the financial promotion prohibition under section 21 or the prohibition on promoting collective investment schemes under section 238, since in those cases the investigator may not know the identity of the perpetrator or may be looking into market circumstances at the outset of the investigation rather than investigating a particular person. Nor is notification required if the investigating authority believes that it would be likely to result in the investigation being frustrated.

332. Subsection (5) allows employees of the investigating authority to act as investigators under this Part of the Act.

333. Subsections (7) and (8) allow the investigating authority to control the scope, timetable and form of the investigation by issuing directions to the investigator(s). Any directions must be notified to the person under investigation under subsection (9) except for those types of investigation where initial notice is not required, or where the investigating authority believes that notification would be likely to result in the investigation being frustrated.

Section 171: Powers of persons appointed under section 167

334. This section establishes the powers of investigators appointed under the general investigations power to require people to attend before them and answer questions, and to provide information or documents. The investigators may only impose these requirements where they reasonably consider that the questions, information or documents in question are relevant to the investigation. And they may only impose them on the person under investigation, or any other “*connected person*” as defined in subsection (4). These limitations reflect the broad grounds on which the general investigatory power is exercisable.

Section 172: Additional power of persons appointed under section 168(1) or (4)

335. This section establishes wider powers for investigators appointed under section 168(1) or (4), the power to investigate particular suspected contraventions or offences. It does not, therefore, apply to investigations into possible insider dealing, market abuse, misleading statements and practices or a breach of the general prohibition or the promotional prohibitions. Because the grounds required under section 168 are more specific, the powers available to the investigator are wider in terms of who may be required to give information. A person who is not the person under investigation or connected to that person may only be asked questions so long as the investigator is satisfied that it is necessary or expedient to do so. The term “*connected*” attracts the same meaning as under section 171.

Section 173: Powers of persons appointed as a result of section 168(2)

336. This section establishes wider powers for investigators appointed to investigate possible insider dealing, market abuse, misleading statements and practices or a breach of the general or the promotional prohibitions under sections 19, 21 or 238. Because these are liable to focus, at least initially, on market circumstances rather than the conduct or circumstances of any particular person, or the activities of persons unknown, there is no requirement to notify a particular person as the subject of the investigation. So the concept of connectedness does not apply. The investigator can require any person to attend and answer questions, or to supply information or documents, so long as the investigator considers that they may be able to give information relevant to the investigation.

Section 174: Admissibility of statements made to investigators

337. A statement made by a person in compliance with a requirement imposed by an investigator under this Part is generally admissible in any proceedings. But it may not be adduced against the person who made the statement, or questions relating to it asked, by the prosecution in criminal proceedings other than for the charges listed in subsection (3), nor by the Authority in proceedings before the Tribunal to determine whether a penalty should be imposed for, or a public statement made in respect of, market abuse. It may, however, be adduced, or a question relating to it may be asked, by the person himself, or by those acting on his behalf. It can be used by the prosecution or the Authority in cases against another person, or in cases against that person where the charge is one of those listed in subsection (3). All of the charges mentioned in that subsection relate to the provision of false information.

338. The section is necessary to take into account the judgment by the European Court of Human Rights in the Saunders case ((1997) 23 E.H.H.R. 313).

Section 175: Information and documents: supplemental provisions

339. This section enables the Authority or an investigator appointed by either the Authority or the Secretary of State under this Part to compel the production of a document by a person who is holding a document on behalf of another person if they would have the power to compel the latter to produce the document if they held it. If any person required to produce a document fails to do so, they may be compelled to state where, to the best of their knowledge, the document is.

340. A document once obtained may be copied or have extracts taken from it, and the person producing the document, or any other relevant person, may be required to explain it. But the production of a document does not affect any rights a third party may have over it.

341. Documents subject to banking confidentiality may also be withheld unless the person holding the information, or the person to whom the duty of confidence is owed, is the person under

investigation or a related company, or the person to whom the duty is owed consents to its disclosure, or the requirement to disclose has been specifically authorised by the Authority or the Secretary of State.

Section 176: Entry of premises under warrant

342. An investigator appointed by the Authority or the Secretary of State may obtain a warrant for entry to any premises from a justice of the peace, or in Scotland from a justice of the peace or a sheriff. Such a warrant can then be executed by a police constable (subsection (5) sets out what the constable may do in the exercise of the warrant).

343. To issue the warrant the justice of the peace or sheriff must be satisfied that there are reasonable grounds for believing:

- a request for information under this Part has not been wholly complied with, and that the documents or information may be found on the premises concerned; or
- the premises are the business premises of an authorised person or appointed representative, that information or documents on those premises could be required by the Authority or the investigator, but that a request for that information or those documents would not be complied with, or would result in the information or documents being removed, tampered with or destroyed; or
- a serious offence has or is in the process of being committed, and that there is information or are documents on those premises which are relevant to that offence, which could be required by the Authority or the investigator, but which would not be produced, or which might be removed, tampered with or destroyed.

344. Subsections (6) and (7) apply to these warrants certain safeguards and other protections that apply to warrants issued under the Police and Criminal Evidence Act 1984 and the equivalent order in Northern Ireland. This includes giving the constable the right to employ reasonable force to gain entry.

345. Subsection (8) provides for documents seized under a warrant to be held for up to 3 months, or for longer if relevant proceedings are instituted during that period.

Subjects

Financial regulation

Section 177: Offences

346. If a person fails to comply with a requirement imposed under this Part without a reasonable excuse, the Authority or the Secretary of State may certify the fact to a court and the court may then deal with the person as if he were in contempt. A person who intentionally obstructs the exercise of any rights conferred by a warrant under the preceding section is guilty of a criminal offence and liable on summary conviction to a prison term of up to 3 months, or a fine up to level 5 on the standard scale (£5,000), or both.

347. A person who knowingly or recklessly provides false or misleading information in response to a requirement under this Part also commits an offence. On summary conviction he would be liable to a prison term of up to 6 months, or a fine up to the statutory maximum (£5,000), or both. On indictment he would be liable to a prison term of up to 2 years, or a fine, or both.

348. The same penalties would be available against anyone who knows or suspects that an investigation is likely to be conducted and falsifies, conceals, destroys or disposes of any document he knows or suspects to be relevant, or causes such a document to be falsified, concealed, destroyed or disposed of.

PART XII: CONTROL OVER AUTHORISED PERSONS

349. This Part is concerned with persons who intend to acquire control over UK authorised persons by virtue of their shareholding or voting rights. The Part also deals with increases and decreases in the extent of a person's control. Specifically, a person who proposes either to acquire control or to increase the level of their control must notify the Authority and secure its approval. The Authority may object to a particular acquisition or increase in control or it may attach certain conditions to its approval. A person proposing to decrease their control must merely notify the Authority of their intention. A breach of the obligations imposed by this Part is a criminal offence. The requirements in this Part are necessary to meet certain single market directive obligations. They carry forward similar requirements in the predecessor legislation. For consistency, the requirements have been extended to cover controllers of all authorised persons incorporated in or formed under the law of any part of the United Kingdom and not just those persons which are included in the scope of the single market directives. This Part does not place notification requirements on persons who exercise control over authorised persons by virtue of their position in that firm or in a parent firm,

for example as a director or chief executive. Such people may, however, need to be approved by the Authority under Part V of the Act.

Section 178: Obligation to notify the Authority

350. This section imposes a requirement on persons who propose to acquire control (or acquire an additional kind of control) or increase their control over a UK authorised person to give the Authority a “notice of control” informing them of their intentions. What constitutes “control” and a “kind of control” for these purposes is described in section 179. The circumstances in which a person is taken to “increase” their control are set out in section 180.

351. Subsection (2) provides for passive acquirers of control. These are persons who acquire control without themselves taking any action, for example, through inheriting a large number of shares. A passive acquirer may not be able to notify the Authority in advance, but under this subsection, they must do so within fourteen days of first becoming aware that they have acquired the control.

352. A person who is required by subsection (1) to notify the Authority of his proposal to acquire or increase control is also required by subsection (3) to make a further notification when the acquisition or increase has taken place.

353. Subsection (4) defines the range of authorised persons with whose control this Part is concerned. In line with single market directive requirements this is limited to authorised persons incorporated in or formed under the law of any part of the United Kingdom, “UK authorised persons”. This is because under the single market directives, the supervision of those who have control is subject to home State regulation. The requirements do however cover all classes of UK authorised persons and not just those included in the scope of the single market directives.

Section 179: Acquiring control

354. This section defines the circumstances in which a person acquires control and is therefore subject to the obligation to notify the Authority under section 178(1)(a) or (b).

355. A person may acquire control either directly via a shareholding or voting power in the UK authorised person itself, or indirectly via a shareholding or voting power in a parent of the UK authorised person. This is required by the single market directives.

356. Subsection (3) provides that for the purposes of determining whether a person has acquired control, the percentage shareholding or voting power is aggregated with that of their associates as defined in section 422. This means, for example, that where a firm has a holding of 5 per cent of the shares in a UK authorised person and one of its subsidiaries has a holding of 7 per cent of the shares in the same UK authorised person, the firm will be required to notify the Authority.

357. Subsection (4) sets out what constitutes a “kind” of control. A person who has control of one kind would be required under section 178 to notify the Authority again were they to acquire control of a different kind either as well as, or instead of, the control they had before.

Section 180: Increasing control

358. This section sets out the circumstances in which an increase in a person's control causes them to be subject to the obligation to notify the Authority under section 178(1)(c). These are that a person's shareholding or voting power must cross one of the thresholds set out in subsection (2), or they must become a parent of the UK authorised person. These thresholds are determined largely by the single market directives.

Section 181: Reducing control

359. This section sets out the circumstances in which a reduction in a person's control causes them to be subject to the obligation to notify the Authority under section 190. These are that a person's shareholding or voting power must cross one of the thresholds set out in subsection (2), or they must cease to be a parent of the UK authorised person. The level of these thresholds is as for an increase in control and again they are determined largely by the single market directives.

Section 182: Notification

360. This section concerns the procedure to be followed when notifying the Authority. It specifies that the Authority may indicate the information and documents that must be supplied in support of a notification.

361. Subsection (2) confers a power on the Authority to require persons giving a notice of control to provide the Authority with such additional information as the Authority may reasonably considers necessary to determine the application.

Section 183: Duty of Authority in relation to notice of control

362. This section gives the Authority up to three months from the date it receives a completed notice to determine whether to approve the application or issue a warning notice indicating that it is proposing to object to the acquisition of, or increase in, control.

363. Subsection (2) imposes a requirement on the Authority to consult home State competent authorities when required to do so by regulations made by the Treasury. The nature of this requirement is determined by the single market directives.

Section 184: Approval of acquisition of control

364. The Authority is obliged by this section to notify the applicant without delay if it gives its approval.

365. If the Authority fails to indicate its approval or to issue a warning notice within three months, subsection (2) provides that the applicant is to be treated for the purposes of the Part as having been approved.

366. As a result of subsection (3), the approval is valid for a year, unless the Authority notifies the person intending to acquire control of a another time period. If the person does not acquire the control in that period, a fresh application is required.

Section 185: Conditions attached to approval

367. This section concerns the ability of the Authority to make its approval subject to the imposition of conditions on the applicant. The Authority is able to impose such conditions as it considers desirable, having regard to its duty under section 41 to ensure that, in general, the threshold conditions will continue to be met in relation to the UK authorised person subject to the control concerned.

368. If the Authority imposes conditions, subsections (3) and (4) require it to issue the person with a warning notice and a decision notice. The person has a right to refer the matter to the Tribunal.

369. Under subsection (5), persons on whom conditions are imposed may apply to the Authority to have the conditions varied or cancelled. The Authority may itself cancel a condition.

370. The Authority may serve a notice of objection on persons who breach any conditions imposed by this section. This is provided for in section 187.

Section 186: Objection to acquisition of control

371. This section gives the Authority the power to object to the acquisition of new or additional control, or to an increase in control.

372. The Authority can object to a person acquiring or increasing their control where it is not satisfied that the approval requirements set out in subsection (2) are met.

373. Subsection (4) confers a duty on the Authority to notify the applicant if it considers that the conditions for approval would be met if the applicant took or refrained from taking a particular step.

Section 187: Objection to existing control

374. This section provides the Authority with the power to object to an existing controller if it is satisfied that the approval requirements are not met or that a condition imposed under section 185

has been breached. The Authority may also object to a person who acquired or increased control without notifying the Authority in the required manner.

Section 188: Notices of objection under section 187: procedure

375. This section sets out the process by which the Authority can object under section 187 to an existing controller. If the Authority wishes to object to a controller, it is obliged to give him a warning notice.

376. Subsection (2) has the effect that the Authority must comply with any requirements prescribed by the Treasury with respect to the consultation of other competent authorities outside the UK before it gives a warning notice. The Treasury will exercise this power to ensure that effect is given to requirements imposed by the single market directives to consult home State competent authorities.

Section 189: Improperly acquired shares

377. This section makes provision enabling the Authority to restrict rights deriving from shares in the case of persons who continue to hold shares in breach of a notice of objection. It is a requirement of the single market directives that these powers should be available.

378. The Authority also has the option of applying to the court for an order directing the sale of shares under subsection (3). If shares are sold in this way, subsection (6) provides that the proceeds (net of the costs of the sale) will be paid, via the court, to persons beneficially interested in them.

379. Subsection (7) provides that the powers in this section may only be exercised in relation to shares acquired in breach of a notice of objection or in contravention of a condition imposed by the Authority, and not to any other shares held by the person or his associates.

Section 190: Notification

380. This section concerns notification of reductions in, and cessations of, control, whether or not the reduction or cessation is intentional.

381. Under subsection (1) a person who proposes to reduce the control that they have over a UK authorised person, or to cease to have any control, must notify the Authority that that is their intention. The circumstances in which a reduction in control triggers this notification requirement are set out in section 181. A person required to notify the Authority under this subsection must, under subsection (3), notify the Authority again when the proposed reduction or cessation of control actually occurs.

382. Subsection (2) requires persons whose control is reduced, or ceases, without themselves taking any action, to notify the Authority within 14 days of becoming aware of the reduction or cessation.

383. Subsection (4) sets out various requirements in relation to the notices given pursuant to this section.

384. The Authority has no power to make any objection in these circumstances but it is an offence to fail to give the necessary notification.

Section 191: Offences under this Part

385. This section sets out the offences in relation to this Part.

386. Subsections (1) and (2) provide that it is an offence not to notify the Authority in accordance with the requirements in this Part when acquiring, increasing, reducing or ceasing to have control over a UK authorised person.

387. Subsections (3) and (4) provide that where proper notification has been given, it is an offence to carry out a proposal before the Authority has given its approval or, where it has issued a warning notice, before it has decided whether to follow the warning notice with a notice of objection.

388. A person guilty of any of the above offences is liable on summary conviction to a fine not exceeding level 5 on the standard scale, currently £5,000.

389. It is also an offence, under subsection (5), to acquire control in contravention of a notice of objection. This is a more serious offence and a person guilty of it may be convicted on indictment to imprisonment for a term of up to two years and to a fine. There are lesser fines on summary conviction. The penalties are set out in subsections (7) and (8), and include provision for a daily fine if the offence continues.

390. Subsection (9) provides a defence for those who are prosecuted for failing to notify the Authority of their influence. The defence is available if a person can show that he was unaware of the act or circumstance by virtue of which the duty to notify the Authority arose. In these circumstances, the person must notify the Authority within 14 days subsequently of becoming aware. Failure to do so is a criminal offence, the penalty on summary conviction being a fine not exceeding level 5 on the standard scale, currently £5,000.

Section 192: Power to change definitions of control etc.

391. This section gives the Treasury power to amend by order certain definitions in this Part and others which are relevant to it, and to provide for exemption from the obligation to notify increases or reductions in control under sections 178 and 190.

392. The Treasury may alter the cases in which a person is said to acquire control as set out in section 179, and therefore it also has a power to change the definition of controller in section 422 to ensure the two remain aligned. The Treasury may also alter the thresholds the crossing of which triggers the requirements in this Part to notify an increase or decrease in control. This power is necessary to give effect to any future change in the single market directive requirements for controllers of UK authorised persons who are not currently covered by the single market directives.

PART XIII: INCOMING FIRMS: INTERVENTION BY AUTHORITY

393. This Part confers power on the Authority and, in certain cases, the DGFT to intervene in the business of EEA and Treaty firms who are, or have been, authorised by virtue of Schedules 3 and 4. These firms are referred to in the Part as “*incoming firms*”. This power, which is referred to as the power of intervention, does not apply in respect of persons who are authorised solely by virtue of having a permission under Part IV. Nor does it apply in respect of the additional Part IV permissions that may be held by incoming firms. The Part sets out the grounds on which the power is exercisable and the procedures for exercising it.

Section 194: General grounds on which power of intervention is exercisable

394. This section sets out the grounds on which the Authority may exercise its power of intervention. The 4 grounds are:

- where it appears to the Authority that there has been, or is likely to be, some contravention of a rule or other requirement imposed by the Authority in accordance with the division of responsibility between home and host State under the appropriate single market directive;
- where it appears to the Authority that the authorised person has knowingly or recklessly misled the Authority;
- where it appears to the Authority that it is desirable to exercise the powers in order to protect customers or potential customers; or
- where the incoming EEA firm is carrying on consumer credit business in the United Kingdom under their passport and the DGFT has informed the Authority that the person has done any of the things listed in section 25(2) of the CCA 1974. These are factors to be taken into account by the DGFT in deciding whether a person is fit and proper to hold a consumer credit licence, and they cover contraventions of that Act, offences involving fraud, dishonesty or violence, practising racial or other forms of discrimination, and engaging in deceitful, oppressive, unfair or improper business practices.

Section 195: Exercise of power in support of overseas regulator

395. This section enables the Authority to exercise its intervention power at the request of, or for the purpose of assisting, an overseas regulatory authority (“ORA”). The Authority may exercise its powers under this section whether or not the grounds set out in the previous section are met. Authorities in other EEA States who are competent authorities under the single market directives are automatically ORAs. Other overseas authorities, from the EEA or elsewhere, which have functions equivalent to those set out in subsection (4) are also ORAs.

396. When the Authority receives a request from an EEA competent authority, it must consider whether it is obliged to exercise the powers under the relevant directive. In other cases, the Authority may exercise its discretion, taking account of the factors listed in subsection (6).

397. Under subsection (7) the Authority may make its use of its powers conditional on the ORA making an appropriate contribution toward the cost of taking the action.

Section 196: The power of intervention

398. This section provides that the nature and extent of the Authority's power of intervention are the same as the power to vary a permission or impose a requirement under Part IV.

Section 197: Procedure on exercise of power of intervention

399. This section sets out the procedure the Authority must follow when it proposes to exercise its power of intervention against incoming firms under this Part. This is the same written notice procedure as described in relation to section 53.

Section 198: Power to apply to the court for injunction in respect of certain overseas insurance companies

400. Under this section the Authority may act on behalf of an insurance authority in another EEA member State by applying to the courts for an injunction, or in Scotland an interdict, to freeze assets held in the United Kingdom by an insurer from that member State.

401. The power implements article 20(5) of the 1st Non-Life Directive, relating to general insurance, and article 24(5) of the 1st Life Directive, relating to long-term insurance. Subsection (1) limits use of the power to where it is in accordance with those provisions, which means that it is exercisable where the firm's home State authority has asked the Authority to prohibit the free disposal of assets of that firm and has confirmed that:

- the firm has failed to comply with the requirements of article 15 of the 1st Non-Life Directive or article 17 of the 1st Life Directive;
- the solvency margin of the firm has fallen below the minimum required by article 16(3) of the 1st Non-Life Directive or article 19 of the 1st Life Directive; or

- the solvency margin of the firm has fallen below the guarantee fund as defined in article 17 of the 1st Non-Life Directive or article 20 of the 1st Life Directive.

Section 199: Additional procedure for EEA firms in certain cases

402. This section imposes an additional procedure to be followed in some circumstances where the Authority proposes to use its intervention power against an EEA firm. This procedure applies where the EEA firm has contravened a requirement imposed by the Authority pursuant to host State functions under the relevant single market directive.

403. First, the Authority must require the firm to remedy the situation. If the firm fails to do so, the Authority must request the firm's home State regulator to take appropriate measures to ensure the firm remedies the situation and inform the Authority of the measures it proposes to take (or why it does not propose to take any measures). Only if the Authority considers that the measures that the home State regulator has taken are inadequate, or if no action has been taken by that regulator, may it exercise its powers.

404. However, where the Authority decides it needs to act urgently it may do so before it has required the firm to remedy the situation and either before it requests the home State regulator to act or, having already made a request, before it is satisfied that the home State regulator is not going to take adequate action. But if the Authority takes urgent action in this way, it must inform the European Commission and must comply with any direction from the Commission to rescind or vary the requirements imposed.

Section 200: Rescission and variation of requirements

405. Either on its own initiative or at the request of the authorised person who is subject to a requirement under this Part, the Authority may rescind or vary such a requirement. The procedure under section 197 applies to a variation on the Authority's own initiative. The warning notice and decision notice procedure applies where the Authority proposes to refuse to rescind or vary a requirement on request. Agreement to a request for rescission or variation can be granted by written notice as with the grant of other forms of application under the Act.

Section 201: Effect of certain requirements on other persons

406. Where the power of intervention is used to impose a restriction on the type mentioned in section 48 (an assets requirement), the restriction has the same effect as if it had been imposed under Part IV. This means that the provisions of section 48 apply, including the provisions about assets held by a third party such as a bank, and about the transfer of assets to a trustee approved by the Authority.

Section 202: Contravention of a requirement imposed under this Part

407. This section makes clear that a contravention of a requirement imposed under this Part does not constitute an offence or result in any transaction being void or unenforceable. It also confers on the Treasury a power to prescribe in regulations the circumstances in which a person may have a right of action as a result of a breach of a requirement imposed under this Part. Otherwise no such right of action will result from a contravention.

Section 203: Powers to prohibit the carrying on of Consumer Credit Act business

408. Under the Act, EEA firms may, on the basis of their home State authorisation, be automatically authorised to carry on the types of activity covered by the passport under the various single market directives. Two of these directives include lending in their listed activities, which encompasses consumer credit business regulated in the United Kingdom under the CCA 1974. This means that EEA firms may carry on consumer credit business without having to apply to the DGFT for a consumer credit licence and they are therefore not subject to the DGFT's powers under the CCA 1974.

409. This section, along with section 204, confers on the DGFT separate powers to restrict or prohibit the carrying on, or the purported carrying on, of consumer credit business in the United Kingdom under the relevant directives if the firm or any of its employees has done any of the things listed in section 25(2)(a) to (d) of the CCA 1974. That is, if they have:

- committed any offence involving fraud, dishonesty or violence;
- contravened any provision made by or under the CCA 1974, or by or under any other enactment regulating the provision of credit to individuals or other transactions with individuals;
- practised discrimination on grounds of sex, colour, race or ethnic or national origins in, or in connection with, the carrying on of any business; or
- engaged in business practices appearing to the DGFT to be deceitful or oppressive, or otherwise unfair or improper (whether unlawful or not).

410. Contravention of a restriction or prohibition is a criminal offence and contravention of a restriction is also grounds for imposing a prohibition. Schedule 16 sets out the procedure the DGFT must follow when imposing prohibitions or restrictions. This procedure follows that generally applicable in the CCA 1974 rather than in the other provisions of this Act.

PART XIV: DISCIPLINARY MEASURES

411. This Part gives the Authority powers to issue public statements or impose financial penalties in response to contraventions of rules or other requirements by authorised persons.

Section 205: Public censure

412. This gives the Authority the power to make a public statement concerning a contravention by an authorised person of any requirement imposed directly by the Act or under it, for example through the Authority exercising its rule-making power.

Section 206: **Financial penalties**

413. This enables the Authority to impose a financial penalty where it establishes that there has been a contravention by an authorised person of any requirement imposed by or under the Act.

para. 9

Version 1 of 1

Date not available - Present

Subjects

Financial regulation

Section 207: **Proposal to take disciplinary measures**

414. This section requires the Authority to issue a warning notice where it proposes to make a public statement about an alleged contravention or impose a penalty. The notice must include the statement the Authority proposes to make or the amount of the proposed penalty.

Section 208: **Decision notice**

415. If having issued a warning notice, and heard any representations, the Authority decides at the end of the relevant period to proceed with the public statement or penalty, it must issue a decision notice. This should also set out the terms of the proposed statement or the amount of the proposed fine (either of which may change in response to any representations made).

416. The authorised person has a right to have the matter referred to the Tribunal, in accordance with the provisions of Part IX of the Act. No further action can be taken by the Authority during the period in which the person has the right to have the matter referred to the Tribunal or, where the matter has been referred, until the Tribunal hearing and any subsequent appeal have run their course.

Section 209: **Publication**

417. If, having followed the appropriate procedures, the Authority decides to make a public statement under section 205, this section provides that it must send a copy of the statement to the authorised person concerned and to any third parties to whom it copied the decision notice.

Section 210: **Statements of policy**

418. This section requires the Authority to prepare and publish guidance on its policy concerning the imposition of penalties under section 206 and the level of those penalties. Under subsection (7), the Authority must have regard to this published guidance when determining the level of penalties.

Section 211: **Statements of policy: procedure**

419. This section requires the Authority to follow certain procedures when it issues a policy statement under section 210. The procedures include a requirement to consult on its proposals.

PART XV: THE FINANCIAL SERVICES COMPENSATION SCHEME

420. This Part of the Act provides for a single Financial Services Compensation Scheme, established by the Authority and managed by an independent scheme manager. It gives the Authority powers to specify the regulated activities covered by the scheme.

421. The purpose of the compensation scheme is to compensate customers who suffer loss in various circumstances as a consequence of the inability of an authorised person to meet its liabilities. The scheme is not, other than in cases of the insolvency of an authorised person, intended to provide compensation for a regulatory breach (for example the mis-selling of investments), where the liability would remain with the authorised firm.

Section 212: The scheme manager

422. This section requires the Authority to establish a company to manage the scheme and sets requirements as to the company's constitution, including that the chairman should be appointed by the Authority with the approval of the Treasury and that board members should act independently of the Authority.

Section 213: The compensation scheme

423. This section imposes certain requirements about the Authority's rules establishing the scheme. It also makes it clear that customers may be eligible to make a claim against an authorised person even if the claim arises in relation to an activity for which that authorised person did not have permission. A claim relating to an appointed representative who is an exempt person by virtue of section 39 may also qualify under the scheme. Claims would not, however, be eligible if they related to regulated activities carried on by a person who should be authorised but is not.

424. Subsection (3)(b) provides for the scheme manager to levy authorised persons to cover both the costs of compensation and its administrative costs.

425. Subsection (5) requires the scheme manager when setting the levy to seek, so far as is practicable, to avoid cross-subsidy between sectors.

426. Subsection (10) allows the Treasury to prescribe categories of persons authorised to carry on regulated activities in the United Kingdom under passporting arrangements that will only participate in the scheme if they elect to do so. This allows the Treasury to ensure that, while membership of the scheme is generally compulsory for authorised persons carrying on relevant activities, it remains compatible with UK obligations under EC directives which make rules about

the extent to which EEA firms can be required to join compensation schemes other than their home State scheme.

Section 214: General

427. This section clarifies the scope of the Authority's power to make scheme rules.

428. Subsection (1) provides, in particular, that the scheme may consist of a number of different compensation funds, for which levies can be raised from different sectors of the industry and different rules may be made as to the level of and eligibility for compensation.

429. Subsections (2) to (4) enable the scheme to limit the eligibility of claimants according to a number of different factors, including where the event took place or where the claimant resides.

430. Subsection (6) confers on the scheme manager a power to enter into arrangements with schemes established in other countries outside the EEA. Where, for example, a US firm does business in the United Kingdom and the level of compensation under the US scheme is lower than in the United Kingdom, the firm would be able to become a member of the UK scheme for the purposes of topping-up its cover. If the firm was unable to meet its liabilities, claimants might have a claim against both the US and the UK schemes. This power would in turn enable the UK scheme to enter into an arrangement with the US scheme to avoid the need for the claimant to submit a claim to both schemes. It is possible to make reciprocal arrangements under the power in subsection (1)(k).

Section 215: Rights of the scheme in relevant person's insolvency

431. Subsection (1) enables the Authority to make provision about the effect of a payment of compensation under the scheme on the rights and obligations arising out of the claim against a relevant person in respect of which the payment was made. This allows the Authority to make provision for the rights of the claimant to be transferred to the scheme manager, which would enable the scheme manager to seek to recoup the costs of paying compensation from the firm in question without increasing the firm's liabilities. Subsection (2) provides that any right of recovery conferred on the scheme manager under subsection (1) cannot exceed the claimant's original rights.

Section 216: Continuity of long-term insurance policies

432. The special nature of long-term insurance means that should an insurer go into liquidation, a simple payment of compensation may not necessarily be enough to enable policyholders to find alternative cover. This would be a problem especially where a person had developed health problems since taking out the original policy. The purpose of this section is to enable the Authority to include in the scheme rules a requirement for the scheme manager to seek to transfer the business of a failing insurer, so far as it relates to contracts of long-term insurance, to another company or to secure the issue of substitute policies by another insurer.

Section 217: Insurers in financial difficulties

433. The special features of long-term (or “life”) business are noted above. But even general insurance business (for example car or product liability insurance) can result in claims arising from events which may have happened several years earlier. This long tail of claims means that it can be difficult to crystallise the liabilities of an insurer in liquidation. The administration of insurance claims is costly and the delays for policyholders can be substantial while a liquidator seeks to work out the level of payments that can be made to creditors.

434. Accordingly, this section allows the Authority to make provision for the scheme manager to give assistance to an authorised person with permission to effect and carry out contracts of insurance in financial difficulties, either by transferring the that person's business, so far as it relates to contracts of insurance, to another insurer, or by enabling the continuance of that business by another insurer. Before using this power, which is potentially of substantial benefit to policyholders, the scheme manager must be satisfied that payments to the firm should not materially benefit other persons such as shareholders or company directors. It must also be satisfied that these measures would not cost more than the costs of compensation if the firm were allowed to go into default.

Section 219: Scheme manager's power to require information

435. The efficient settlement of claims will sometimes require the scheme to obtain information from a variety of sources. This section provides the scheme manager with powers to require the provision of specified information that it considers necessary in order to be able to assess claims. Information may be required from the authorised person, or from a person who was knowingly involved in the events giving rise to the claim.

Section 220: Scheme manager's power to inspect information held by liquidator etc

436. This section allows the scheme manager to inspect information held by the liquidator, administrator or trustee in bankruptcy of an insolvent relevant person. The scheme manager is only allowed to inspect documents rather than require them to be produced, which means that the cost of copying documents will be borne by the scheme and not by the liquidator. This should reduce costs to the liquidator, administrator or trustee in bankruptcy. The section does not apply to the Official Receiver or his Scotland and Northern Ireland counterparts (as to which see section 224).

Section 221: Powers of court where information required

437. This section provides that, where a person fails to comply with a requirement for information under section 219 or to permit documents to be inspected under section 220, this may be certified to the court, which may deal with the person as though he were in contempt.

Section 222: **Statutory immunity**

438. This section provides immunity for the scheme manager, and its staff from actions for damages, except where they act in bad faith or where damages are sought under section 6(1) of the Human Rights Act 1998.

Section 223: **Management expenses**

439. This section ensures that the scheme may only recover from levies management expenses up to a certain limit. The limit must be set before the scheme includes management expenses in its calculations of the levies.

PART XVI: **THE OMBUDSMAN SCHEME**

440. This Part of the Act provides for the creation of a single, compulsory ombudsman scheme for the resolution of disputes between authorised firms and their customers. It provides for the detailed operation of the scheme to be determined largely by rules made by the Authority on which it is required to consult in accordance with the requirements under Part X.

Section 225: **The scheme and the scheme operator**

441. This section makes clear that the object of the scheme is to resolve disputes involving consumers quickly and with minimum formality. The operator of the scheme must be a body corporate.

Section 226: **Compulsory jurisdiction**

442. This section requires firms authorised by the Authority to submit to the jurisdiction of the scheme. The scheme's compulsory jurisdiction may only be applied to persons who were authorised at the time the activity to which the complaint relates was carried out, and the rules must have been in force at that time. The Authority is to make rules determining which activities of authorised persons fall within the compulsory jurisdiction. These activities must either be regulated activities as specified by the Treasury under section 22 or other activities which are not regulated, but could be made regulated activities under that section. The Authority is free not to include certain activities, for example kinds of professional business where it is unlikely that retail customers would ever be involved.

443. If an activity is included in the compulsory jurisdiction of the scheme, the ombudsman can consider all disputes arising from the carrying on of that activity by the authorised person. For example, were accepting deposits specified as an activity covered by the compulsory jurisdiction of the scheme, the ombudsman could consider all disputes arising from the operation of a bank account, such as the withdrawal of money from a cash machine, or a stopped cheque.

444. The section also sets the circumstances in which a complaint can be dealt with: namely, that the complainant meets the relevant eligibility criteria (set by the Authority) and has asked the ombudsman to consider the case. The scheme is not able to deal with complaints made by authorised persons, except in circumstances specified in the rules.

Section 227: Voluntary jurisdiction

445. Firms can join the ombudsman scheme, on a voluntary basis, under the voluntary jurisdiction where they are not authorised by the Authority or in respect of activities falling outside the scope of the compulsory jurisdiction. However, the scheme's voluntary jurisdiction rules can only relate to activities which are subject, or could be made subject, to the compulsory jurisdiction rules. The voluntary jurisdiction can be applied to authorised persons where a complaint relates to an activity which could be, but has not been, made subject to compulsory jurisdiction rules.

446. Voluntary jurisdiction rules can be made by the scheme operator with the approval of the Authority. The rules will also define which complainants are eligible.

Section 228: Determination under the compulsory jurisdiction

447. The ombudsman will make a decision about the complaint on the basis of what he considers is fair and reasonable in the circumstances. The scheme operator has the power under paragraph 14 of Schedule 17 to specify the matters that can be taken into account when determining what is fair and reasonable. The ombudsman must make a written statement of his reasons for the decision, and must also require the claimant to accept or reject the decision by a specified date. If the complainant accepts the ombudsman's decision, then it is binding on both the complainant and the respondent.

Section 229: Awards

448. If a complaint under the compulsory jurisdiction is determined in favour of the complainant, the respondent may be ordered to pay compensation up to a maximum limit which may be set by the Authority. The limit may be different for different kinds of complaint. The Authority may specify a particular limit for compensation in respect of non-financial loss or damage. The ombudsman can only make a binding award up to the limit set by the Authority, but he may recommend a greater amount as fair compensation. The respondent may also be ordered to take steps to rectify the matter complained of, and this can be enforced through the courts by the complainant if necessary.

Section 230: Costs

449. This section allows the scheme operator to make rules concerning the costs which can be awarded by the ombudsman. These rules are subject to certain constraints. Where a complaint is settled in favour of the complainant, the rules can allow the firm concerned to be required to meet the costs of both the complainant and the scheme operator. A complainant could only ever be required to meet the costs of the scheme, and then only if the scheme operator had made rules

to allow for such awards and the ombudsman believed that the complainant's conduct has been improper or unreasonable, or they had been responsible for an unreasonable delay. The section also makes provision for recovery of costs by the scheme operator.

Section 231: Ombudsman's power to require information

450. The efficient settlement of complaints under the compulsory jurisdiction will sometimes require the scheme to obtain information from the parties to the dispute. This section provides the scheme operator with powers to require parties to the complaint to provide specified information which it considers necessary for the fair determination of the complaint. It is not expected that these powers will be used on a routine basis. The Authority will also have powers to make rules requiring authorised persons to co-operate with the scheme. It will be in the interests of the complainant to co-operate.

Section 232: Powers of court where information required

451. This section provides that, if a person fails to comply with a requirement to provide information made under section 231, the matter may be certified to the court, which may deal with the person as if they were in contempt.

Section 233: Data protection

452. This section inserts new subsection (4A) into section 31 of the Data Protection Act 1998. This is needed to ensure that the scheme operator does not have to disclose information it has obtained when considering a complaint brought under the ombudsman scheme if disclosure would prejudice the performance of its functions.

Section 234: Industry funding

453. This section provides for the Authority to be able to levy fees on authorised persons to meet both the costs of establishing the scheme and the costs of running the compulsory jurisdiction. The costs of the voluntary jurisdiction will be met by fees set as part of the voluntary jurisdiction rules.

PART XVII: COLLECTIVE INVESTMENT SCHEMES

454. This Part comprises six chapters concerning collective investment schemes, including unit trusts, open-ended investment companies (“oeics”) and overseas schemes. It includes provisions relating to the authorisation of schemes, their trustees, managers and operators and also to the rules applicable to them. The Part also makes provision for overseas collective investment schemes which may be promoted in the United Kingdom:

- Chapter I provides the relevant definitions for this Part. It also gives the Treasury the power to specify by order that certain arrangements will not constitute a collective investment scheme.
- Chapter II prohibits authorised persons from promoting participation in a collective investment scheme unless an exemption applies. Whilst the provisions broadly continue the prohibition on authorised persons promoting collective investment schemes under the FS Act 1986, changes have been made to reflect the new financial promotion regime set out in section 21.
- Chapter III contains the provisions relating to authorised unit trust schemes. These broadly follow the provisions of the FS Act 1986, although the Authority is to be given the power to approve changes to an authorised unit trust's investment and borrowing powers. There are also provisions to allow for rule waivers and modifications, and to grant operators and trustees of authorised unit trust schemes the right to refer matters to the Tribunal in certain circumstances.
- Chapter IV contains provisions which enable the Treasury broadly to continue the regime for oeics, and to make regulations concerning the establishment and regulation of other forms of oeic in the United Kingdom. Under the FS Act 1986, oeics which are incorporated and authorised in the United Kingdom must invest solely in transferable securities. The Act will allow the Treasury to make regulations concerning the creation and operation of a wider range of authorised oeics, so that they can invest in assets other than transferable securities. The Treasury may also, under the relevant provisions, make regulations concerning the incorporation of unauthorised oeics. This might, for example, be done in order to allow the formation of common investment funds for charitable purposes, or in the context of ethical investments.
- Chapter V broadly carries forward provisions of the FS Act 1986 and allows three kinds of overseas scheme to be “recognised” and marketed in the United Kingdom. First, schemes constituted in other member states which meet particular requirements; second, schemes authorised in designated territories; and third, schemes constituted in other territories, but which are individually recognised.
- Chapter VI sets out the powers of investigation which will apply in relation to authorised unit trust and overseas schemes. It is intended that the principal provisions concerning investigations of oeics will be set out in the proposed Treasury regulations under Chapter IV.

Chapter I: Interpretation

Section 236: Open-ended investment companies

455. This section defines an open-ended investment company. This is done by reference to a “property” and an “investment” test (set out in subsections (2) and (3) respectively). Both tests must be satisfied in order for a corporate body to meet the definition of an open-ended investment

company. The “property” test is carried over from the definition in section 75(8)(a) of the FS Act 1986.

456. The “investment” test is framed by reference to a hypothetical reasonable investor's expectations, were he to participate in the scheme. A reasonable investor should expect to realise his investment within a reasonable period, and expect that the way in which this would be done would be calculated by reference to the value of the scheme property. In determining whether this condition is satisfied, certain actual or potential redemptions of his holdings are to be ignored, including those under certain provisions of the Companies Act and corresponding provisions in EEA states. Under subsection (4)(d), the Treasury may by order designate provisions in non-EEA states under which redemptions may be made and which may also be left out of the account.

457. Subsection (5) contains a Treasury order-making power to amend the definition of an open-ended investment company for the purposes of Part XVII.

Chapter II: Restrictions on promotion

Section 238: Restrictions on promotion

458. This section contains the basic marketing prohibition and some exemptions from it. The main exemption is for schemes which are marketed other than to the general public. Other exemptions include promotions made in respect of authorised unit trust schemes, authorised oeics and recognised overseas schemes. The marketing prohibition applies to communications which originate outside the United Kingdom if the communication is capable of having an effect in the United Kingdom.

459. Subsection (6) enables the Treasury by order to specify circumstances in which the subsection (1) prohibition does not apply. For incoming promotions, subsection (7) makes it clear that it will be possible to make exemptions dealing with promotions originating outside the United Kingdom even if they are capable of having an effect in the United Kingdom. Thus, subsection (7) makes clear that the order-making power in subsection (6) enables the Treasury to adjust the scope of the restriction on promotion of collective investment schemes by authorised persons to take full account of international and technological developments.

460. The term “*promotion otherwise than to the general public*” is amplified in subsection (10) and includes promotions which are designed, so far as possible, to reduce the risk of participation by persons for whom it would be unsuitable. The prohibition on marketing to the general public will not therefore necessarily be breached if a promotion is inadvertently received by a member of the general public.

Section 239: Single property schemes

461. A single property scheme is, broadly, a collective investment scheme which relates to a single building or a group of buildings managed as a single enterprise. This section gives the Treasury power to make regulations exempting the promotion of participation in single property schemes to the general public from the prohibition in section 238. If the Treasury make regulations under this section, the Authority may then make rules imposing duties on the operator and trustee or depositary of schemes exempted under the regulations.

Section 240: Restriction on approval of promotion

462. This is a new provision designed to prevent an authorised person from approving a financial promotion under section 21 if the authorised person would not himself be permitted to make the communication under section 238.

Section 241: Actions for damages

463. If an authorised person contravenes a requirement under section 238 or 240, a private person, and other persons falling within such categories as may be prescribed in regulations made by the Treasury, who suffers loss as a result may claim damages.

Chapter III: Authorised unit trust schemes

Section 242: Applications for authorisation of unit trust schemes

464. Applications for an order declaring a unit trust scheme to be authorised must be made to the Authority by the manager and trustee of the scheme. The manager and trustee must be different persons. The section gives the Authority broad scope to determine the form and content of the application, including further information to be contained in it.

Section 243: Authorisation orders

465. If the conditions referred to in the section are met, the Authority may make an authorisation order declaring a unit trust scheme to be authorised. The conditions reflect certain requirements specified in the UCITS Directive which establishes a passporting regime whereby certain types of authorised collective investment scheme established in one EEA State may generally be entitled to equivalent authorisation in others. The section includes requirements that:

- the manager and trustee must be bodies corporate which are independent of each other and incorporated in the United Kingdom or another EEA State;
- they must be authorised persons holding the appropriate permissions;
- the scheme must comply with the requirements of the trust scheme rules (referred to at section 247, below); and

- participants must be able to have their units redeemed at a price related to the net asset value of the scheme property or be able to sell their units on an exchange at a similar price.

Section 244: Determination of applications

466. This section sets out the time limits within which applications should be determined (and specifies that completed applications shall be determined within six months). Applicants may withdraw their application at any time before the Authority makes a determination.

Section 245: Procedure when refusing an application

467. If the Authority wishes to refuse an application, it must issue each of the manager and trustee with a warning notice. Either the manager or the trustee may refer a refusal to the Tribunal.

para. 10

Version 1 of 1

Date not available - Present

Subjects

Financial regulation

Section 246: Certificates

468. If an authorised unit trust scheme meets with the requirements of the UCITS Directive, the manager or trustee of the scheme can request that the Authority issue a certificate to that effect. The certificate will be needed if the authorised unit trust scheme is to passport into other European jurisdictions.

Section 247: Trust scheme rules

469. This section permits the Authority to make rules (known as “*trust scheme rules*”) concerning the constitution, management and operation of authorised unit trust schemes. These cover broadly the same matters as constitution and management regulations under section 81 of the FS Act 1986, but without the arrangements under that legislation whereby the Treasury retained a degree of control over certain constitution and management matters (such as the investment and borrowing powers of authorised unit trusts). The Authority has direct responsibility for these matters under this section.

470. The trust scheme rules are binding on the manager, trustee and participants independently of any provisions contained in the trust deed. Participants can seek to enforce the trust scheme rules against the manager or trustee as if the rules were provisions contained directly in the trust deed.

471. The Treasury has the power to modify the Authority's rule-making powers if there is a change in the company law relating to the rights of beneficial, but not legal, owners of shares. This would enable the rights of nominee holders in authorised unit trusts to be aligned to those of shareholders in companies should the need arise.

Section 248: Scheme particulars rules

472. These are rules which the Authority may make requiring the manager of an authorised unit trust scheme to give details of the scheme to the Authority and to publish or make available to the public on request certain particulars, including changes, concerning the scheme.

473. The scheme particulars rules can provide for compensation to be paid to certain people (described as “qualifying persons”) if they have suffered loss because of an untrue or misleading

statement in the particulars or because of an omission from them. Qualifying persons include people who may have a beneficial, but not legal, interest in the scheme (for example, beneficiaries of a trust where the trustees hold units in the scheme).

Section 249: Disqualification of auditor for breach of trust scheme rules

474. The Authority may disqualify an auditor from auditing authorised unit trust schemes or authorised oeics if the auditor does not comply with the trust scheme rules. Warning and decision notice procedures will apply, as well as rights to refer a decision to the Tribunal.

Section 250: Modification or waiver of rules

475. This allows the Authority to modify or waive the application of any of the trust scheme rules or scheme particulars rules in respect of authorised unit trusts. If there is a modification or waiver of rules under this section, certain of the provisions of section 148 (relating to the modification or waiver of various other of the Authority's rules and providing for the circumstances in which waivers or modifications will be granted) will apply.

Section 251: Alteration of schemes and changes of manager or trustee

476. Alterations to an authorised unit trust scheme or a change in the manager or trustee may not take place without the Authority's approval, or the Authority not notifying its disapproval. New managers or trustees must satisfy the requirements specified in section 243.

Section 252: Procedure when refusing approval of change of manager or trustee

477. If the Authority proposes to refuse to approve the replacement of the trustee or manager, a warning notice must be given. If the Authority proposes to refuse to approve changes to the scheme, warning and decision notice procedures will apply and the matter can be referred to the Tribunal.

Section 253: Avoidance of exclusion clauses

478. As a result of this section, if a trust deed for an authorised unit trust scheme seeks to avoid the manager's or trustee's duty to exercise due care, the deed will be ineffective.

Section 254: Revocation of authorisation order otherwise than by consent

479. The Authority may revoke an order authorising a unit trust in the circumstances specified in the section. These include any of the following situations:

- the manager or trustee has contravened a requirement imposed by the Act or the Authority's rules;

- either of them has given the Authority misleading information;
- the requirements for making an authorisation order (referred to in section 243) are no longer met;
- the scheme has been inactive for 12 months or more; or
- it is desirable in the interests of participants to revoke the scheme's authorisation.

Section 255: Procedure

480. If the Authority wishes to revoke an authorisation order, it must go through the warning and decision notice procedure, giving notice to both the manager and trustee. Either of them may refer the decision to the Tribunal.

Section 256: Requests for revocation of authorisation order

481. The Authority can revoke an authorisation order where the manager or trustee requests it to, but it can also refuse to revoke authorisation where it considers that refusal would be in the interests of participants, or that the public interest requires an investigation before authorisation is revoked. Warning and decision notice procedures will apply and the decision may be referred to the Tribunal.

Section 257: Directions

482. The Authority may give directions requiring the manager of the scheme to cease the issue or redemption of units, or to require the manager and trustee of the scheme to wind it up in the circumstances specified in the section (which are broadly similar to those specified as grounds for revoking a scheme's authorisation under section 254). If a person contravenes a direction under this section, private persons, and others falling within such categories as may be prescribed in regulations made by the Treasury, who suffer loss as a result may be able to bring an action. Once a direction has been given, the Authority may revoke or vary that direction, either of its own accord, or on the application of the manager or trustee.

Section 258: Applications to the court

483. In cases where the Authority is able to give a direction under section 257, it may also apply to the court for an order removing and replacing the manager or the trustee, or simply removing them and appointing an authorised person to wind up the scheme.

Section 259: Procedure in giving directions under section 257 and varying them on Authority's own initiative

484. This section sets out the procedure the Authority must follow when it proposes to give, or on its own initiative vary, a direction in relation to an authorised unit trust scheme under section 257.

This is the same written notice procedure as described in relation to section 53, except that in this case separate notices must be given to both the manager and trustee of the scheme. If a notice under this section imposes a requirement for the manager of the scheme to cease issue or redemption of units, it will either give a date when the requirement ends, or else provide for the requirement to continue until a further notice is given. If a notice under this section imposes a requirement to wind up a scheme, the scheme must be wound up either by a date given in the notice or else (if no date is given) as soon as possible.

Section 260: Procedure: refusal to revoke or vary direction

485. If the manager or trustee applies to the Authority for it to revoke or vary a direction given under section 257, but the Authority proposes to refuse to do so, the warning and decision notice procedures will apply. The decision may be referred to the Tribunal.

Section 261: Procedure: revocation of direction and grant of request for variation

486. If the Authority decides to revoke a direction under section 257, or to vary a direction in accordance with a request, it must give written notice of that fact. The Authority may publish information about the revocation or variation of the direction.

Chapter IV: Open-ended investment companies

Section 262: Open-ended investment companies

487. This section creates the broad framework for Treasury regulations relating to the establishment, carrying on, and regulation, of oeics. It provides a wide-ranging and non-exhaustive list of matters which the regulations may provide for. These include imposing criminal liability, conferring functions on the Authority (including rule-making powers and power to waive or modify rules) and power to modify or exclude any statute or rule of law. In particular, the regulations may revoke the existing regulations governing oeics and provide for transitional arrangements for “grandfathering” under those regulations.

Section 263: Amendment of section 716 Companies Act 1985

488. This section amends the Companies Act, so that the prohibition on formation of companies with more than 20 members other than under the Companies Act will not apply to oeics incorporated by virtue of regulations made by Treasury under section 262.

Chapter V: Recognised overseas schemes

Section 264: Schemes constituted in other EEA States

489. This section relates to the ability of collective investment schemes constituted in other EEA States to passport into the United Kingdom. EEA schemes will be recognised if:

- they satisfy requirements prescribed by Treasury regulations;
- the operator of the scheme gives notice to the Authority of the proposal to invite UK persons to participate in the scheme; and
- the Authority does not give notice that the way in which the invitation is to be made does not comply with the relevant UK law.

Section 265: Representations and references to the Tribunal

490. This section sets out the procedure if the Authority gives notice that it does not consider that the proposed invitations will comply with UK law, and representations are made to the Authority in response. The procedures allow for rights of reference to the Tribunal where the Authority issues a decision notice confirming that the way in which the proposed invitations are to be made does not comply with UK law.

Section 266: Disapplication of rules

491. Rules made by the Authority will not generally apply to the operator, trustee or depositary of a recognised scheme under section 264. The exceptions are financial promotion rules, and rules relating to the maintenance of facilities in the United Kingdom (under section 283(1)).

Section 267: Power of authority to suspend promotion of scheme

492. Although it cannot suspend an EEA scheme's recognition, the Authority can suspend its promotion to the public if it appears that the operator has contravened financial promotion rules. The warning and decision notice procedure will apply and the Authority will be required to notify the scheme's home State authority if it decides to give a direction under this section. The operator will have a right to refer the decision to the Tribunal.

493. Under this section, the Authority may also revoke, as well as vary, a direction suspending the promotion of an EEA scheme, where specified conditions are met.

Section 268: Procedure in giving directions under section 267 and varying them on Authority's own initiative

494. This section establishes the procedure the Authority must follow when it proposes to give, or on its own initiative vary, a direction under section 267 suspending the promotion of a scheme which is recognised under section 264. This is the same written notice procedure as described in relation to section 53 except that the notices in question are to be given to the operator of the

scheme concerned. In addition the Authority is required, when giving notice under this section, to inform the competent authorities in the scheme's home State.

Section 269: Procedure on application for variation or revocation of direction

495. This section sets out the procedure the Authority must follow on receipt of an application under section 267(4) or (5) for variation or revocation of a direction suspending the promotion of a scheme which is recognised under section 264. Where an application is granted in full, simple written notice is to be given under subsection (4). The same applies where the Authority decides to revoke a direction on its own initiative under subsection (5). Where the Authority proposes to refuse the application, or proposes to vary the direction in a way other than that requested in the application, the applicant is entitled to receive a warning notice setting out the reasons for the decision, the standard opportunity to make representations, a decision notice and the right to refer the matter to the Tribunal if still aggrieved by the decision. Notices under this section are to be given to the operator of the scheme concerned, but in addition the Authority is required to inform the competent authorities in the scheme's home State.

Section 270: Schemes authorised in designated countries or territories

496. Schemes managed in, and authorised under, the law of non-EEA territories can be recognised under this section. In order to be recognised, the relevant territory needs to be designated by an order made by the Treasury, and the Authority must give its approval to the scheme being recognised. The Treasury may not make an order designating a territory unless it is satisfied that the relevant overseas law under which the scheme is authorised and supervised affords at least equivalent protection to that provided by the UK law on collective investment schemes.

497. In considering whether to make an order designating a country or territory under this section, the Treasury must ask the Authority for a report on the law and practice of the country or territory in question and on any arrangements it has made to co-operate with the authorities there.

Section 271: Procedure

498. If the Authority proposes to refuse to approve a scheme under section 270, it must give the operator a warning notice. The decision notice procedure will apply, and the decision may be referred to the Tribunal.

Section 272: Individually recognised overseas schemes

499. This section allows the Authority to recognise schemes which are not managed in an EEA country or a designated territory.

500. In order to be recognised, the Authority must be satisfied as to various matters, including the adequacy of protection for the participants in the place where the scheme is established, the

adequacy of the constitution and management and of the powers and duties of the operator, trustee and depository (if any), and that those persons are either authorised (with appropriate permissions) or, if not authorised, fit and proper persons. In addition, overseas schemes will only be recognised under this section if they are oeics or schemes where the operator is a body corporate.

Section 273: Matters that may be taken into account

501. This section specifies matters which the Authority can take into account when considering whether the operator, trustee or depository of an individually recognised scheme is fit and proper.

Section 274: Applications for recognition of individual schemes

502. The Authority has broad scope to specify the form and content of applications (which must be made by the operator) and to seek additional information before determining an application.

Section 275: Determination of applications

503. This section sets out the time periods which will apply for the determination of an application. Completed applications are to be determined within six months.

Section 276: Procedure when refusing an application

504. The Authority must go through the warning and decision notice procedure if it proposes to refuse an application. The applicant may refer the refusal to the Tribunal.

Section 277: Alteration of schemes and changes of operator, trustee or depository

505. Changes to the scheme itself cannot be made unless the operator has given notice to the Authority, and the Authority has either approved the proposal, or not notified its disapproval. As for the replacement of the operator, trustee or depository, at least one month's notice must be given to the Authority either by the person being replaced, or the person proposing to replace him, but there is no express provision for the Authority to approve or disapprove the replacements.

Section 278: Rules as to scheme particulars

506. The Authority may make rules imposing duties on the operators of recognised schemes which are constituted in designated territories under section 270 or which are individually recognised under section 272. These rules broadly correlate to scheme particulars rules for authorised unit trusts.

Section 279: Revocation of recognition

507. Recognition of schemes constituted in designated territories or individually recognised schemes can be revoked in the circumstances set out in this section. These are broadly similar to the grounds for revocation of an authorisation order under section 254.

Section 280: Procedure

508. If the Authority proposes to revoke recognition under section 279, the warning and decision notice procedure will apply. Notice must be given to the operator, and if any, the trustee and depository. The decision may be referred to the Tribunal.

Section 281: Directions

509. Instead of proposing to revoke recognition under section 279, the Authority can effectively direct that a scheme's recognition will be suspended.

Section 282: Procedure on giving directions under section 281 and varying them otherwise than as requested

510. This section establishes the procedure the Authority must follow when it proposes to give a direction by virtue of its powers of intervention against schemes recognised under sections 270 and 272. This is the same written notice procedure as described in relation to section 53, except that in this case separate notices must be given to both the operator and (if there is one) to the trustee or depository of the scheme.

Section 283: Facilities and information in the UK

511. The Authority may make rules requiring operators of all recognised schemes to maintain facilities in the United Kingdom. It may also require the operator of a recognised scheme to include explanatory information in financial promotions which name the scheme.

Chapter VI: Investigations

Section 284: Power to investigate

512. The Authority or the Secretary of State can appoint a person to carry out investigations into collective investment schemes. The provisions do not generally extend to the investigation of oeics. Provision concerning those investigations can be made in Treasury regulations under section 262.

513. The person carrying out the investigation has powers to investigate other persons or matters where necessary or relevant. The provisions concerning the conduct of investigations set out in section 170 will generally apply and statements made to the investigator may be admissible in proceedings in the circumstances set out in section 174. Persons other than the managers, trustees, operators or depositaries of schemes, or directors of oeics, will not generally be required to disclose

information subject to the bankers' duty of confidentiality. The power of entry under section 176 will be available to back up information requirements imposed under this section. The provisions of section 177 will also apply, so that failure to comply with a requirement imposed in connection with an investigation can be certified to a court and falsification or concealment will be an offence.

PART XVIII: RECOGNISED INVESTMENT EXCHANGES AND CLEARING HOUSES

514. This Part provides for the regulatory regime for recognised investment exchanges and clearing houses. These recognised bodies are exempt from the need to be authorised. This regime is similar to that under the FS Act 1986.

515. Chapter I of this Part:

- gives the Treasury the power to set the requirements that such bodies have to meet in order to be recognised;
- sets out the application procedures and supervisory arrangements for recognised bodies, including conferring powers to revoke recognition and to direct recognised bodies to take steps to meet the recognition requirements;
- allows the Treasury, jointly with the Secretary of State, to extend special protection from insolvency law to organisations clearing certain non-investment contracts.

516. Chapter II provides for competition scrutiny of recognised bodies. This places a duty on the DGFT, and gives him powers, to investigate and report to the Competition Commission on any significantly adverse effects on competition of these bodies' rules, guidance and practices, or any exploitation of a strong market position. It allows the Treasury, on receipt of a further report from the Commission, to direct, through the Authority, that appropriate changes are made to such rules, guidance or practices. Chapter III disapplies the general domestic competition law as it affects the matters covered by the Act regime. Chapter IV contains definitions of key terms.

Chapter I: Exemption

Section 285: Exemption for recognised investment exchanges and clearing houses

517. Subsection (1) defines what is meant by a recognised investment exchange and clearing house.

518. Subsections (2) and (3) set out the scope of the exemption for recognised bodies from the need to be authorised in order to carry on regulated activities which it carries on as an exchange or clearing house. Exchanges are also exempt as respects anything they do for the purposes of, or in connection with, the provision of clearing services.

Section 286: Qualification for recognition

519. Subsection (1) allows the Treasury to set recognition requirements by regulations. Recognition requirements are the requirements which must be satisfied by an exchange or clearing house in order both to become recognised, and to remain recognised.

520. Subsection (2) provides that if the regulations made under subsection (1) contain provisions relating to the default rules of a recognised body, then the Treasury has to have the approval of the Secretary of State before making the regulations. (The Secretary of State is responsible for insolvency matters.)

521. Subsection (3) defines default rules. These are rules which provide for action to be taken to settle market contracts in the event of a default; for example, the rules may specify the means for establishing the price at which a bargain should be made. These are necessary to protect against systemic risk in the financial markets. If contracts could not be closed out in an orderly and speedy manner, a default by one market participant could spread quickly to large numbers of market participants.

522. Subsection (4) defines market contract by reference to Part VII of the Companies Act 1989 (or the corresponding Order in Northern Ireland). Market contracts in this context are those entered into by the exchange or clearing house or by the members of an exchange.

Section 287: Application by an investment exchange

523. This section allows an organisation to apply for recognition as a recognised investment exchange and sets out the information that the applicant must send to the Authority.

Section 288: Application by a clearing house

524. This section allows an organisation to apply for recognition as a clearing house and sets out the information that the applicant must send to the Authority.

Section 289: Applications: supplementary

525 This section allows the Authority to seek additional information, in whatever form it requires, in respect of any application for recognition under sections 287 and 288. It also allows the Authority to require verification of that information.

Section 290: Recognition orders

526. This section allows the Authority to make a recognition order if it is satisfied that the applicant meets the recognition requirements. The Authority is not obliged to make a recognition order in this circumstance and subsection (3) allows the Authority to take any information into account, and not just information concerning the recognition requirements, when deciding whether to grant recognition.

527. Subsection (2) requires the Treasury to give their approval under section 307 before the making of a recognition order. The role of the Treasury under that section concerns cases where there is an issue as to whether the rules and other regulatory provisions of the exchange or clearing house have a significantly adverse, and unjustified, effect on competition.

Section 291: Liability in relation to recognised body's regulatory functions

528. This section gives recognised investment exchanges immunity against legal action for damages in respect of anything done or omitted in the discharge of the recognised body's regulatory functions. This immunity does not apply where the act or omission was in bad faith or where it was unlawful as a result of section 6(1) of the Human Rights Act 1998. Under section 6(1) of that Act, it is unlawful for a public authority to act in a way which is incompatible with a right conferred by the European Convention on Human Rights and Fundamental Freedoms which is included in Schedule 1 to the 1998 Act.

Section 292: Overseas investment exchanges and overseas clearing houses

529. This section modifies the application procedures and requirements where the applicant concerned is an overseas investment exchange or clearing house.

530. In order to be recognised, an overseas applicant need not comply with the recognition requirements made by the Treasury under section 286. Instead, subsection (2) provides that the Authority may make a recognition order in respect of an overseas applicant if the requirements set out in subsection (3) are met. These requirements are that investors are afforded protection equivalent to that which they would have had if the overseas body were required to comply with the recognition requirements; that there are adequate default procedures; that the applicant is able and willing to co-operate with the Authority; and that adequate arrangements are in place enabling the Authority to cooperate, for example through the sharing of information, with the overseas body's home State supervisor.

531. Subsection (5) makes some changes as to how other provisions of this Part work in respect of overseas bodies given that the relevant requirements which they have to meet are those set out in subsection (3) rather than the recognition requirements made by the Treasury.

Financial regulation

Section 293: Notification requirements

532. Subsections (1) to (4) allow the Authority to make rules requiring a recognised body to give it notice of, and information about, specified events or information about the recognised body which the Authority reasonably requires to carry out its functions. The Authority can also specify when, and in what form, the information should be provided.

533. Subsections (5) to (7) place a duty on the recognised body to give the Authority immediate notice of new rules and guidance, or of changes to existing rules and guidance. Recognised bodies are also required to notify the Authority of changes to their clearing arrangements. Subsection (8) provides that these duties do not apply to recognised overseas bodies. They are placed under different obligations under section 295.

Section 294: Modification or waiver of rules

534. This section gives the Authority power to waive or modify the notification rules it can make under sections 293 and 295, at the request of the recognised body or with their consent. Subsection (4) sets out the circumstances in which the Authority may do this.

Section 295: Notification: overseas investment exchanges and overseas clearing houses

535. This section requires overseas investment exchanges and clearing houses to produce a report at least once a year giving details of any events which have occurred over the year which may have an effect on competition, or which might affect the Authority's assessment of whether the requirements set out in section 292 are satisfied. The Authority can also make rules requiring that additional information should be included in the report.

Section 296: Authority's power to give directions

536. This section allows the Authority to direct a recognised body which has failed to satisfy the recognition criteria, or has failed to comply with other obligations under the Act (for example those in this Part) to take steps to remedy that failure. This power enables the Authority to deal with problems which are not sufficiently serious to merit withdrawal of recognition from the body concerned.

Section 297: Revoking recognition

537. This section allows the Authority to revoke the recognition of a body which no longer wishes to remain recognised, or which no longer meets the recognition criteria or which has failed to comply with other obligations under the Act.

Section 298: Directions and revocation: procedure

538. This section sets out the procedure the Authority must follow when it proposes to give a direction or make a revocation order. This includes giving the recognised body, its members and third parties who might be affected the right to make written representations. Subsection (7) allows the Authority to give a direction without following these procedures if it considers that it is essential to do so.

Section 299: Complaints about recognised bodies

539. This section provides that the Authority must establish a procedure for the investigation of complaints against recognised bodies where the complaint is relevant to the question of whether the body should remain recognised or not.

Section 300: Extension of functions of Tribunal

540. This section gives the Treasury a power to extend, by order, the jurisdiction of the Financial Services and Markets Tribunal to certain disciplinary proceedings brought by a recognised UK exchange or clearing house. An order may be made in respect of one or more specified recognised exchanges or clearing houses or in respect of recognised exchanges or clearing houses generally.

541. Subsections (1) and (4) make clear that jurisdiction may only be extended to cases involving internal disciplinary proceedings taken against members of recognised investment exchanges or recognised clearing houses for breaches of the rules of the exchange or clearing house in cases of behaviour which amounts to market abuse. Since it may be necessary to modify the provisions of the Act relating to proceedings before the Tribunal to accommodate the particular circumstances of a recognised exchange or clearing house, subsection (3) enables the Treasury to make any modifications that are necessary.

542. Subsection (2) deals with the circumstances in which jurisdiction may be extended. Subsection (2)(a) enables jurisdiction to be extended where the Treasury are satisfied that it is necessary to do so in order to ensure consistency between decisions taken in exchange or clearing house disciplinary proceedings involving market abuse and Tribunal decisions in such cases (including Tribunal decisions relating to the relevant disciplinary proceedings of other recognised exchanges or clearing houses). Subsection (2)(b) would enable the Treasury to extend the role of the Tribunal to recognised exchange or clearing house disciplinary proceedings in cases of

market abuse if it should it prove necessary to do so in the future in the light of the developing jurisprudence of the European Court of Human Rights.

Section 301: Supervision of certain contracts

543. This section allows the Treasury, acting jointly with the Secretary of State, to make regulations which extend the provisions of Part VII of the Companies Act 1989 (or the equivalent provision of the Northern Ireland Order), with any appropriate modifications, to certain non-investment contracts. Part VII of the Companies Act 1989 disapplies various provisions of insolvency law for market contracts in order to protect against systemic risk in the financial markets.

544. Subsection (2) and (3) set out what kind of contracts can be covered by these regulations. There are two criteria:

- first, the contracts must be settled by someone who is on a list maintained by the Authority for the purposes of this section. The Treasury, under subsection (4), has to approve the conditions set by the Authority for admission to this list and the arrangements for admission to and removal from the list;
- second, the Treasury and the Secretary of State have to be satisfied that it is appropriate for the Authority to supervise the settlement arrangements for these non-investment contracts. In coming to a view, the Treasury and Secretary of State must have regard to the extent to which the contracts are dealt in by persons supervised by the Authority.

545. Subsection (10) allows the Treasury and the Secretary of State, in making regulations under this section, to apply any of the provisions of this Act to the person settling these contracts. Without this power it would not be possible for the Authority to regulate such persons on a statutory basis, since they would be clearing non-investment contracts and so would not require authorisation or exemption.

Chapter II: Competition Scrutiny

Section 302: Interpretation

546. This section describes the “regulatory provisions” (that is the rules, guidance, arrangements and particulars) and “practices” which are to be scrutinised under this Part to assess whether they have, or are intended or likely to have, a significantly adverse effect on competition as defined in this section.

Section 303: Initial report by Director

547. This section requires the Authority to send to the DGFT and to the Treasury all the regulatory provisions and any other relevant information received in support of an application for recognition.

The DGFT must then issue a report as to whether any of these provisions has a significantly adverse effect on competition.

Section 304: Further reports by Director

548. This section requires the DGFT to keep all recognised investment exchanges and clearing houses under continuing competition scrutiny. If, at any time, the DGFT forms the view that any regulatory provision or practice has a significantly adverse effect on competition then he must make a report.

549. Subsection (3) provides that if the DGFT concludes that regulatory provisions or practices do not have such an effect then he has discretion as to whether to make a report.

Section 305: Investigations by Director

550. This section confers powers on the DGFT to enable him to carry out his functions under sections 303 and 304. The DGFT will be able to request relevant documents from any person, and to request relevant information from any business.

551. Subsections (5) and (6) provide that if a person fails to produce the information or documents required, then the DGFT may report the matter to the court. If the court is satisfied that there was no reasonable excuse for this failure, the person may be dealt with as if he were in contempt of court.

Section 306: Consideration by Competition Commission

552. This section concerns the role and duties of the Commission following receipt of a report from the Director General. Its functions and duties are in line with those set out in the analogous provisions in section 162 in Part X. This section is supplemented by the provisions of Schedule 14. (This Schedule also applies to section 162, which relates to the Commission's role in competition scrutiny of the regulating provisions and practices of the Authority.)

Section 307: Recognition orders: role of the Treasury

553. This section sets out the Treasury's powers to take action following an adverse report from the Commission on an application for a recognition order.

554. If the Commission's report concludes that no significantly adverse effect on competition exists, or such an effect does exist, but is justified, subsection (2) requires that the Treasury must approve the making of the recognition order unless exceptional circumstances exist to justify their refusal. If, however, the Commission's report is that a significantly adverse effect on competition exists, and is not justified, then subsection (4) requires that the Treasury, unless exceptional circumstances exist, should refuse to approve the making of the recognition order.

Section 308: Directions by the Treasury

555. This section concerns the Treasury's powers to take action following an adverse report from the Commission, other than a report on an application for a recognition order.

556. If the Commission's report is that the anti-competitive effect is not justified, subsection (2) requires that the Treasury give a “remedial direction”. (A remedial direction is defined in subsection (8) as a direction to the Authority to either revoke the recognition of the body concerned, or to direct the body to take specified steps as set out in the direction.) However, subsection (3) provides that the Treasury need not give a direction either where the Treasury consider that it is not necessary as a result of action which has already been taken by the body concerned or by the Authority, or because exceptional circumstances exist which makes it inappropriate or unnecessary to give a direction. Conversely, if the Commission's conclusion is that the anti-competitive effect is justified, under subsections (5) and (6) the Treasury may nonetheless give a direction to the Authority to take action which the Treasury consider necessary because of exceptional circumstances of the case.

Section 309: Statements by the Treasury

557. This section makes provision for statements to be made by the Treasury when they decline to give a remedial direction under the preceding section.

558. Subsection (1) provides that if the Treasury decide not to give a remedial direction action following a Commission report that they should, they must produce a statement giving their reasons. Subsection (2) provides that if they do give such direction they must give details of this. In addition, if they have made a direction in a case where the Commission has concluded that the adverse effect on competition is justified, they must publish a statement giving their reasons for doing so.

Chapter III: Exclusion from the Competition Act 1998

Section 311: The Chapter I prohibition

559. This section makes clear that the prohibition of agreements preventing, restricting or distorting competition within the United Kingdom in Chapter I of the Competition Act 1998 does not apply to the constitution of a recognised investment exchange or clearing house or to a body which has applied for recognition; nor to the regulatory provisions of a recognised body; nor to a decision or practice of a recognised body, in respect of its regulatory functions; nor to an agreement the parties to which include a recognised body or person subject to its rules to the extent that the agreement is required or encouraged by the recognised body's regulatory provisions or practices.

Section 312: The Chapter II prohibition

560. This section makes clear that the prohibition of abuse of a dominant position in a market which may affect trade in the United Kingdom in Chapter II of the Competition Act 1998, does not apply to the regulatory provisions or practices of a recognised investment exchange or clearing house, nor to agreements entered into by its members, to the extent that these are required by the body's regulatory provisions.

PART XIX: LLOYD'S

561. This Part of the Act makes a number of provisions which supplement other parts of the Act to bring the Society of Lloyd's ("the Society") within the general regulatory framework. These provisions are needed to reflect the unique legal status of the Society and its members, and the functions of the Council of Lloyd's ("the Council"), the governing body of the Society, under the Lloyd's Acts 1871–1982, in relation to the Lloyd's community.

562. Lloyd's is regulated for solvency purposes by the Authority in accordance with the arrangements under Part IV of the ICA 1982. The FS Act 1986 provides an exemption for Lloyd's and underwriting agents as respects investment business carried on by them in connection with or for the purposes of insurance business at Lloyd's. For most purposes, regulation of the Society has been undertaken by the Council. The Act gives the Authority considerable discretion as to how it discharges its obligations for the regulation of Lloyd's.

563. The external regulation of the Lloyd's community by the Authority is achieved by a number of different provisions in the Act. By virtue of this Part, the Society — a body corporate — is to be authorised to carry on certain regulated activities. The permission will be defined by the Authority, as if it had been granted under Part IV. Primarily, the permission will cover making arrangements which enable members to carry out contracts of insurance. The activities of managing and members' agents (or "underwriting agents") will become regulated activities for the purposes of the Act, and so underwriting agents will need have relevant permission under Part IV. As authorised persons, the Society and agents will be subject to the full range of the Authority's powers under the Act, including its rules and its powers of investigation and discipline and, ultimately, the power to withdraw authorisation, as is the case with other authorised persons under the general provisions of the Act.

564. Members of Lloyd's will benefit from an exemption from the need to be authorised in relation to contracts of insurance effected or carried out at Lloyd's. They will, nonetheless, be subject to regulatory arrangements as directed by the Authority under powers contained in this Part, and subject to the powers of the Council. As a minimum, the Authority will need to require the members to meet the solvency requirements laid down under the relevant EC directives. A member of Lloyd's would, however, need permission to carry on any other regulated activity, for example advising on investments.

Section 314: Authority's general duty

565. It is not proposed that Lloyd's should be subject to full regulation by the Authority at the outset. Certain regulatory functions will be left with the Council. However, the Authority will at any time be able to take a greater degree of direct responsibility for regulation if it considers it appropriate and this section, therefore, places a duty on the Authority to keep matters under review.

Section 315: The Society: authorisation and permission

566. This section makes the Society an authorised person, without it needing to submit an application. This is needed because, unlike most other current businesses, Lloyd's does not have an authorisation from an existing regulator that can be grandfathered.

567. Subsection (3) limits the activities for which the Society will have permission, at the time it becomes authorised, in broad terms to arranging deals in insurance contracts and syndicate participation, and for connected activities. The precise terms of the permission will depend on the activities specified for the purposes of section 22(1). Subsection (4) gives the Authority a power, where it considers it appropriate, to limit the scope of the permission, at the time the authorisation comes into force, or at any time thereafter. Lloyd's would apply for an extension of that permission in accordance with Part IV.

Section 316: Direction by Authority

568. This section confers on the Authority power to give directions applying the general prohibition to members of Lloyd's or applying core provisions to members. This power can be used in relation to a member of Lloyd's, or members taken together, though they will not, at least at the outset, be authorised persons. Directions under this section may specify the extent to which the "core provisions" of the Act, as set out in section 317, will apply to them and would impose requirements directly on the members which the Authority will be able monitor and enforce. The Authority could, for example, apply to members general rules requiring persons carrying out contracts of insurance to appoint an actuary to assess the extent of their liabilities. It could also require members to be authorised if it considers that appropriate.

Section 317: The core provisions

569. The core provisions which the Authority may decide to apply to members of Lloyd's under section 316 relate to:

- the performance of regulated activities;
- rules and guidance;
- information gathering and investigations;
- control over authorised persons;

- compensation scheme;
- ombudsman scheme;
- auditors and actuaries;
- insolvency
- restitution and injunctions
- notices.

570. Subsection (3) enables the Authority to apply a core provision with modifications. This will enable the practical role played by the Society and underwriting agents in the day to day business affairs of members to be reflected in the regulatory arrangements.

Section 318: Exercise of powers through the Council

571. This section gives the Authority an alternative mechanism to its power of direction under section 316. Instead of, or in addition to, giving a direction to the members of Lloyd's, the Authority can direct the Society or the Council to use their powers — such as the byelaw making powers of the Council under Lloyd's Act 1982 — to impose obligations on members. It would, therefore, be open to the Authority to set solvency requirements for Lloyd's members, perhaps specifying in a direction only the high level requirements required by the EC directives; the Council would then make byelaws specifying the detailed arrangements in accordance with the requirements of the direction. The Council would be responsible for enforcing its byelaws and for demonstrating to the Authority that the relevant requirements had been met. When exercising this power, the Authority may additionally impose requirements on the Council or the Society.

572. Subsection (5) also allows the Authority to use this power to direct the Council in respect of managing and members' agents, rather than exercising powers against them directly as authorised persons.

573. Subsection (6)(a) makes it clear that if the Authority chooses to give directions in this way, it is not precluded from using its other regulatory powers under the Act.

Section 319: Consultation

574. This section sets out the procedure for giving a direction under sections 316 or 318. The procedures are similar to those that apply to other rule making functions.

Section 320: Former underwriting members

575. This section disapplies the general prohibition from former members of Lloyd's in relation to contracts of insurance effected by them while they were members of the society. It gives the Authority powers to impose requirements on former members of Lloyd's, including members

who decide to leave in the future, in relation to the insurance business carried on by them while they were members of Lloyd's until all their insurance liabilities have been discharged. A former member of Lloyd's would need to obtain permission from, and be authorised by, the Authority in order to carry on any other regulated activities under the Act.

Section 321: Requirements imposed under 320

576. This section requires the Authority to follow the specified procedures when exercising the powers set out in section 320. The arrangements are consistent with other notice arrangements under the Act and they give former names on whom requirements are imposed the opportunity to make representations. Subsection (11) confers a right on former names to refer a matter to the Tribunal in certain circumstances.

Section 322: Rules applicable to former underwriting members

577. This section, like section 320, confers on the Authority powers to impose requirements on former member of Lloyd's. Whereas section 320 would enable the Authority to impose specific requirements on former members, in much the same way as it would impose restrictions on a Part IV permission in relation to an authorised person, this section allows the Authority to make rules that will apply more generally to former members or classes of former member. The grounds for exercising the power are that the Authority considers it appropriate for the purpose of protecting policyholders. The procedures under section 319, including for example the consultation arrangements, apply to the exercise of this power.

Section 323: Transfer schemes

578. This section confers on the Treasury a power to apply Part VII to transfers of business consisting of contracts of insurance from members of Lloyd's. This will ensure that appropriate regulatory scrutiny can be given to any proposed business transfers, and that any persons affected by the proposed transfer have the opportunity to make representations to the court.

PART XX: PROVISION OF FINANCIAL SERVICES BY MEMBERS OF THE PROFESSIONS

579. This Part makes arrangements whereby professionals (such as solicitors, actuaries and accountants) who:

- are not carrying on mainstream regulated activities but
- are members of designated professional bodies,

will be exempt from the requirement to obtain permission from the Authority in order to carry out certain regulated activities. Additional tests are set out in section 327 which must be met in order for the professional to qualify for the exemption.

580. The arrangements under this Part include the safeguard of arms-length oversight by the Authority of the way in which the professional bodies supervise and regulate exempt professionals, and the way in which such professionals carry on regulated activities. This will involve, amongst other things, the Authority monitoring the effectiveness of the complaints and redress arrangements of designated professional bodies.

581. In addition, the Authority will be able to ban members of the professions who benefit from the exemption from carrying on regulated activities, where the circumstances justify this. The Authority can also direct that the exemption be cut back on a more general class basis (so that, for example, certain categories of professional, carrying on certain types of activities, will no longer benefit from the exemption).

582. The Authority is also empowered to make rules requiring exempt professionals to disclose to their clients the fact that they are not regulated by the Authority.

Section 325: Authority's general duty

583. This section obliges the Authority to keep itself informed about the way in which designated professional bodies supervise and regulate the carrying on of regulated activities by their members. It also requires the professional bodies to cooperate with the Authority so as to enable the Authority to fulfil its duty of arms-length oversight.

Section 326: Designation of professional bodies

584. This section gives the Treasury the power to designate bodies for the purpose of section 325. Bodies will only be designated where they actively regulate the provision of financial services by their members.

Section 327: Exemption from the general prohibition

585. This section sets out the tests which need to be met in order for a professional to qualify for the exemption, including:

- the professional must be a member of a professional body which is designated by the Treasury;
- the professional must not receive a commission from a third party in respect of the regulated activities unless he accounts to his client for it;
- the regulated activities must be provided in a way that is incidental and complementary to the provision of professional (for example, legal, actuarial or accountancy) services;

- the regulated activities must not relate to sensitive products (for example, life insurance). What amounts to a “sensitive product” is to be specified by the Treasury in regulations.

Section 328: Directions in relation to the general prohibition

586. This section allows the Authority to direct that the exemption from the general prohibition is not to apply to certain classes of professional. The Authority may exercise this power, however, only where it is satisfied that it is desirable to do so in the interests of clients. A non-exhaustive list of factors to which the Authority must have regard in reaching that judgement is set out in the section.

Section 329: Orders in relation to the general prohibition

587. This section enables the Authority to make an order which would have the effect of banning specified persons who are not fit and proper to carry on regulated activities. This is consistent with the arrangements for prohibition orders in relation to individuals under section 56.

Section 330: Consultation

588. This section sets out the procedure for consulting on a direction. The procedure is consistent with that applying to similar arrangements in other parts of the Act.

Section 331: Procedure on making or varying orders under section 329

589. This section sets out the procedure which will apply when the Authority makes an order under section 329. The warning and decision notice procedure applied throughout the Act must be followed, and the person who is subject to an order can refer matters to the Tribunal.

para. 12

Version 1 of 1

Date not available - Present

Subjects

Financial regulation

Section 332: Rules in relation to persons to whom the general prohibition does not apply

590. This section allows the Authority to make rules requiring professionals carrying on exempt regulated activities to disclose to their clients that they are not authorised. It also requires the professional bodies to make rules designed to ensure that those members who benefit from the exemption will not carry on regulated activities which are not complementary to the provision of particular professional services to a particular client, although this does not extend to regulated activities conducted by professional firms as exempt persons under the Act. In order to be effective, those rules must be approved by the Authority.

Section 333: False claims to be a person to whom the general prohibition does not apply

591. This section makes it an offence for a person to describe himself (in whatever terms) as a person who has the benefit of the Part XX exemption in relation to a particular regulated activity, or behaves or otherwise holds himself out, in a manner which indicates (or which is reasonably likely to be understood as indicating) that he is such a person, when he is not.

592. Subsection (2) provides that in proceedings for an offence under this section it is a defence for the accused to show that he took all reasonable precautions and exercised all due diligence to avoid committing the offence.

593. Under subsection (3), a person found guilty of this offence is liable on conviction to a maximum of 6 months imprisonment and a fine not exceeding level 5 on the standard scale (currently £5,000). If the offence results from the public display of material, subsection (4) a fine of level 5 is to be multiplied by the number of days for which any material giving rise to the offence was on public display.

PART XXI: MUTUAL SOCIETIES

594. This Part gives the Treasury powers by order to transfer the functions of the Building Societies Commission, the Friendly Societies Commission and the Chief Registrar of Friendly Societies and functions under the Industrial and Provident Societies Acts and the Credit Unions Act 1979. These transfers will be achieved by orders made under sections 334 to 339.

595. It is envisaged that the powers will be exercised to ensure that the functions which relate to the registration and regulation of societies under the existing legislation will be transferred to the Authority. For example, the functions to be transferred to the Authority are likely to include the power to require, or approve, a transfer of the business of a mutual society to another society or to a company.

596. The relevant legislation also confers power on the Building Societies Commission, Friendly Societies Commission and the Chief Registrar, often subject to the consent of the Treasury, to set requirements as to the registration and constitution of such societies. Such powers are exercised by statutory instrument. Those powers are different in character from the financial regulatory powers of the Authority under the Act. It is proposed that such functions will transfer to the Treasury.

597. These transfer provisions also include power for the Treasury to dissolve the existing bodies, it being envisaged that all their functions will have been transferred. The Treasury will be able to make supplemental provision, for example, to transfer the property, rights and liabilities of bodies which are being dissolved or to amend the existing legislation in the light of the transfer of functions. For example, where the existing legislation divides functions as between the different parts of the United Kingdom, some consolidation may be required to reflect the fact that the Authority is a single corporate entity.

598. Schedule 18 makes certain amendments to the legislation governing mutuals. Further amendments to that legislation which are consequential on the provisions of this Act will be made by order under section 426.

PART XXII: AUDITORS AND ACTUARIES

599. This Part concerns the appointment, on a continuing, periodic or ad hoc basis, of auditors and actuaries by authorised persons. It imposes certain requirements, including a duty to disclose to the Authority information relevant to its functions under the Act. These provisions carry forward a number of similar provisions in existing legislation.

600. There are some similarities between the roles of auditors and actuaries, and they are therefore dealt with together in this part of the Act. However, there are also important differences, and these sections will give the Authority the power to act in ways which will recognise the difference in the detailed roles and responsibilities of the two professions.

601. Part XI of the Act gives the Authority various powers to gather information and investigate authorised persons, with section 166 in particular providing a power to require an authorised person to provide the Authority with a report by an accountant or other expert on a particular aspect of his business. Part XXII deals primarily with the duties and responsibilities of auditors and actuaries in respect of their work for authorised persons.

Section 340: Appointment

602. Subsection (1) gives the Authority the power to make rules to require authorised persons to appoint an auditor or actuary, where they are not already under a statutory obligation to do so (for example under Companies Act requirements). Subsection (4) allows the Authority to make rules concerning the terms, conditions, qualifications for, and notification of such appointments. The Authority will also be able to make an appointment itself if one is not made or if it has not received any notification.

603. Subsection (2) allows the Authority to make rules requiring any authorised person to produce periodic financial reports on its business, and to submit these for analysis and comment by an auditor or actuary.

604. Subsection (5) provides that an auditor or actuary appointed to act on a continuing basis or to produce a periodic report must comply with the relevant rules made by the Authority. These rules may also give the auditor or actuary such powers as the Authority judges necessary for them to carry out their duties.

Section 342: Information given by auditor or actuary to the Authority

605. This section concerns the duties and powers of auditors and actuaries of authorised persons to pass on information of regulatory importance to the Authority.

606. Auditors and actuaries of authorised persons will be members of professional bodies and will therefore be subject to rules made by their respective bodies as to how they treat confidential information. Subsections (3) and (4) ensure that auditors or actuaries who, in good faith, pass on information or express their opinion to the Authority will not be in breach of any duty of confidentiality to which they might otherwise be subject. This protection applies whether or not the auditor or actuary acts in response to a request from the Authority.

607. Subsections (5), (6) and (7) give the Treasury a power to set out the circumstances in which auditors and actuaries must pass on information to the Authority. This information may relate to the affairs of either the authorised person concerned, or other persons. So far as auditors are concerned, the Treasury are required by EC directives to set out the circumstances in which such reports must be made, and it is intended to use this power to re-enact the rules necessary to comply with this requirement.

Section 343: Information given by auditor or actuary to the Authority: persons with close links

608. This section concerns the duties and powers of auditors and actuaries to pass on information of regulatory significance to the Authority about persons having “close links” with authorised persons, including parent and subsidiary companies of an authorised person.

609. Subsections (3) and (4) ensure that auditors or actuaries of persons with close links to an authorised person, who, in good faith, pass on information or express their opinion to the Authority will not be in breach of any duty of confidentiality to which they might otherwise be subject. This protection applies whether or not the auditor or actuary acts in response to a request from the Authority.

610. Subsections (5), (6) and (7) give the Treasury a power under which they can make rules setting out the circumstances in which auditors and actuaries must pass on information to the Authority. This information may relate to the affairs of either the authorised person concerned, or other persons.

Section 344: Duty of auditor or actuary resigning etc. to give notice

611. This section places a duty upon all auditors and actuaries of authorised persons appointed as a result of statute to notify the Authority of certain events, for example where they resign before the end of the period for which they were appointed. Subsection (3) also requires an auditor or actuary to pass on any facts connected with his ceasing to act for the authorised person which he thinks ought to be brought to the Authority's attention, or to make a positive statement to the Authority that he is not aware of any such facts.

Section 345: Disqualification

612. Where the Authority believes that an auditor or actuary has failed to comply with any obligations under this Act, it may disqualify that auditor or actuary from acting for any particular authorised person, or class of authorised person. Any such disqualification may be lifted if the Authority is satisfied that the person concerned will in future comply with the obligations.

613. Subsections (2) and (3) require the Authority to serve a warning notice and decision notice, whilst subsection (5) confers a right to refer to the Tribunal any decision to disqualify.

Section 346: Provision of false or misleading information to auditor or actuary

614. This section makes it a criminal offence for an authorised person, or an officer, controller or manager of an authorised person knowingly or recklessly to mislead an auditor or actuary appointed under the Act or as a result of provision contained in rules.

PART XXIII: PUBLIC RECORD, DISCLOSURE OF INFORMATION AND CO-OPERATION

615. This Part requires the Authority to compile and maintain a public record of authorised persons. It also imposes safeguards for the protection of confidential information.

616. The Authority, together with the competent authority for listing and the Secretary of State, will necessarily require access to confidential information. The Act provides them with powers to obtain this. It also contains safeguards to ensure that this information remains confidential, subject to allowing information to pass between them and other regulatory authorities where this is necessary for the performance of specific public functions (for example, to assist in the investigation and prosecution of crime). The passage of information between authorities is subject to conditions relating to the purpose of disclosure and, in some cases, the identity of the person to whom the information is disclosed. These conditions are often referred to as “gateways”. This area is already subject to detailed constraints under EC law. The Act, together with the regulations to be made under the powers conferred by these provisions, will create a confidentiality regime very similar to those under the predecessor legislation. The creation of a single regulator will however allow some rationalisation of the existing structure.

Section 347: The record of authorised persons etc.

617. This section places an obligation on the Authority to maintain a record of certain details about authorised persons and other categories of persons set out in subsection (1). The record must include details of the services provided by authorised persons, the addresses of authorised persons and other categories of specified persons, and any other information the Authority thinks is appropriate. The record must be available for inspection by members of the public, at a place and at times determined by the Authority. The Authority must allow members of the public to obtain a copy of the record, or a part of it. The Authority may charge for providing such copies.

Section 348: Restrictions on disclosure of confidential information by Authority etc.

618. Subsections (2), (3) and (4) define what is, and what is not, to be regarded as confidential information. Subsection (1) makes clear that this information is not to be disclosed by a “primary recipient”, or a person who has received the information from a primary recipient, without the consent of the person from whom it was obtained and, if different, the person to whom it relates. Subsection (5) lists primary recipients.

Section 349: Exceptions from section 348

619. This section makes clear that, notwithstanding the restrictions in section 348, confidential information may be disclosed if this is in accordance with regulations made by the Treasury. It also gives the Treasury the power to make such regulations where disclosure would facilitate the carrying out of a public function. This power will be used to create various “gateways” between the primary recipients and other organisations for various specified purposes.

Section 350: Disclosure of information by the Inland Revenue

620. This section creates a mechanism, or gateway, through which information held by the Inland Revenue, which would otherwise be subject to a legal obligation of confidentiality, may, in certain

circumstances be passed to the Authority or to the Secretary of State. Subsection (2) makes clear that this disclosure may be made only by, or under the authority of, the Commissioners of Inland Revenue.

621. Subsection (1) provides that Revenue information may be disclosed under this section only for the purpose of assisting an investigator appointed by the Authority or the Secretary of State under section 168 in his task, or to assist the Authority or the Secretary of State in taking a decision whether or not to appoint such an investigator. Once information has been disclosed, subsection (4) provides that it may only be used for the purposes of taking a decision whether or not to appoint an investigator, or to further an investigation, if an investigator has been appointed, or in any criminal proceedings or regulatory action, including proceedings before the Financial Services and Markets Tribunal, that may arise out of an investigation.

622. Subsection (5) provides that onward disclosure of information received under this section is prohibited, except in the case of proceedings before a court or the Tribunal arising out of an investigation, or if this is done with a view to the institution of such proceedings, or if it takes place with the consent or the authority of the Commissioners of Inland Revenue. Subsection (6) makes clear, however, that this does not prevent disclosure of information to a person to whom it could have been disclosed under subsection (1).

Section 350: Competition information

623. This section makes provision, together with Schedule 19, for the protection of information obtained by the DGFT and the Commission under their powers of competition scrutiny under the Act. It applies to information obtained under all of the various competition scrutiny provisions in the Act, that is to say the provisions covering the competent authority for listing in Part VI, the Authority in Part X, and the recognised investment exchanges and clearing houses in Part XVIII.

624. Subsection (1) provides that it is an offence improperly to disclose “competition information”. “*Competition information*” is defined in subsection (5) as information about the affairs of a particular individual or body, which is not in the public domain, and which was obtained under powers in a competition provision of the Act.

625. Subsection (2) sets out the circumstances in which disclosure will not be regarded as improper, and which is therefore permissible. These circumstances basically fall into two classes. First, where the person to whom the information relates, and if different the person from whom it is obtained, have given their consent to disclosure. Second, when this would serve one of a number of defined public purposes. These purposes include the fulfilment of the UK's obligations under EC law, the investigation and prosecution of crime, civil proceedings under the competition provisions of the Act, and finally the disclosure of information to a number of bodies having various statutory functions, to assist them in carrying out these functions. The bodies and the statutes concerned are listed in Schedule 19.

Section 352: **Offences**

626. This section makes clear that unauthorised disclosure or use of confidential information is a criminal offence, subject to the defences provided for in subsection (6), and sets out the penalties for these offences. These provisions reproduce the existing offences in this area.

Section 353: **Removal of other restrictions on disclosure**

627. This section enables the Treasury to make regulations permitting disclosure of information held by third parties to the Authority to assist it in carrying out its functions. It also enables regulations to be made to allow the disclosure of information by various other entities carrying out functions under this Act, for example the compensation scheme manager, in order to assist with these functions. The purpose of this section is to enable the Treasury to create gateways, for example overriding confidentiality obligations to which the prescribed persons are subject, if it is appropriate that such persons should be able to disclose information either to the Authority or to third parties for the purposes of functions connected to the Act.

Section 354: **Authority's duty to cooperate with others**

628. This section places a duty on the Authority to take such steps as it considers appropriate to co-operate and share information, which it is not otherwise prevented from disclosing by virtue of the provisions of this Part, with other bodies or persons, whether in the United Kingdom or elsewhere, who have functions broadly equating to those of the Authority, or who have a role in relation to the prevention and detection of financial crime. It carries forward the provision in paragraph 5 of Schedule 7 of the FS Act 1986, which places a similar duty on the Authority.

PART XXIV: **INSOLVENCY**

629. Insolvency and winding up are relevant to regulation for two reasons. First, there are implications for existing customers if a financial service business becomes insolvent. Second, winding up may itself be part of the appropriate regulatory response to events. Thus it may be desirable to wind up a company to protect not just the interests of customers who have entered into contracts with it, but also those who might do business with it in future, if it continued to trade. Subject to the particular provisions of Part VII of the Companies Act 1989 for transactions carried out on regulated markets, the general law of insolvency applies, and will continue to apply, to most financial services businesses, as it does to other businesses. However, it is supplemented by provisions which allow the regulators, alongside creditors, to petition the court for the winding up of an authorised business on the grounds of insolvency, and, alongside the Secretary of State, to petition the court to wind up an authorised business on the grounds that this would be just and equitable.

630. Different arrangements apply to certain mutual societies. The arrangements under the relevant legislation, for example the Building Societies Act 1986, will continue to apply to relevant

societies, with functions transferred in that case from the Building Societies Commission to the Authority in accordance with the provisions of Part XXI.

631. The insolvency provisions of the Act are intended to build upon these existing arrangements, establishing, so far as is practicable, a common approach across all sectors. Sections 356, 357, 367 and 375 provide the Authority with the power to ask the court to initiate various insolvency procedures. Sections 356, 362, 363, 365, 371 and 374 make clear that the Authority has the right to be heard by the court in insolvency proceedings instigated by third parties. Sections 369, 376, 377, 378 and 379 carry forward provisions of the ICA 1982 dealing with the insolvency of insurance companies (which because of the particular nature of insurance business, must in some respects be dealt with in a different way to other authorised persons).

632. At the same time, the Part will fill a number of gaps in the coverage of the predecessor regimes. Section 359 will allow the Authority to ask the court to make an administration order in respect of authorised businesses, as an alternative to winding up. Section 372 will give the Authority powers to petition the court to declare bankrupt an insolvent sole trader providing financial services. Sections 360 and 366 make changes to the insolvency regime for insurers.

633. Part XV (Financial Services Compensation Scheme) is also relevant to customers of authorised firms in financial difficulties.

Voluntary arrangements

Section 356: Authority's powers to participate in proceedings: company voluntary arrangements

634. Insolvency legislation allows companies in financial difficulties to propose a voluntary arrangement with creditors; that is, for creditors to agree to take a proportion of what they were owed as a final settlement of their debts. If agreed, such an arrangement is binding on all creditors who were aware of the proposal, subject to their right to ask the court to intervene if the arrangement seems improper or unfair. This section gives the Authority the right to apply to the court in the same way as a creditor, and also makes clear that the Authority may be represented in any such proceedings initiated by a creditor.

Section 357: Authority's powers to participate in proceedings: individual voluntary arrangements

635. In England and Wales and in Northern Ireland insolvency law provides that an individual who is in financial difficulties may apply to the court for a moratorium during which he may prepare a proposal to his creditors for settlement of his debts. Whilst this moratorium is in force the individual is protected against the presentation of a bankruptcy petition.

636. Subsection (1) of this section provides that the Authority is entitled to be heard by the court on an application for such a moratorium, if this is made by an individual who is an authorised person. Subsections (3) and (4) provide that the Authority is entitled to send a representative to attend and speak at any meeting of creditors summoned to consider a proposal which a debtor brings forward, and that it shall be informed of the results of any such meeting. Subsection (5) goes on to provide the Authority with the same rights as creditors to challenge in court a decision by the meeting to agree a creditor's proposal, or to challenge the implementation of an agreed proposal, if it believes that this is in some way unfair or irregular, whilst subsection (6) provides that the Authority is entitled to be heard by the court if any other person makes such a challenge.

Section 358: Authority's powers to participate in proceedings: trust deeds for creditors in Scotland

637. Section 357 provides the Authority with powers to be involved in individual voluntary arrangements proposed for authorised persons. Such arrangements are only possible in England, Wales and Northern Ireland. This section makes provision for the Authority to have certain rights in the equivalent arrangement in Scots law (a voluntary trust deed for creditors within the meaning of section 5(4A) of the Bankruptcy (Scotland) Act 1985).

638. The purpose of a trust deed under Scots law is to allow a person who cannot pay his debts to hand over his assets to a trustee, who may then arrange a settlement with his creditors as an alternative to proceedings for sequestration under the 1985 Act. Subsections (1) and (2) provide that where a trust deed is granted in respect of an authorised person, the trustee must, as soon as he becomes aware that the person concerned is an authorised person, inform the Authority, and send it copies of the deed and any other documents which he has sent to the creditors.

639. Under subsection (3) the Authority is given the same rights as certain creditors who have not received notice of the trust deed, or who have objected to it, to petition for the sequestration of a debtor who is an authorised person.

640. If the trustee proposes at any stage to hold a meeting of creditors, subsections (4) and (5) require him to inform the Authority, which will have the right to send a representative to attend and speak at the meeting. However, the Authority will not have the right to vote at the meeting, except on those occasions where it is itself a creditor of the person concerned.

Administration orders

Section 359: Petitions

641. General insolvency law provides for the court to place a company or partnership into administration, that is to allow it to continue in business, under the supervision of an administrator, as an alternative to winding it up. This section allows the Authority to ask the court to do this in respect of present or former financial services businesses and appointed representatives or persons

who are or have carried on financial services business without authorisation, where it would be in consumers' interests for the business to remain in being, rather than be wound up. It also provides that for such persons failure to pay money due to consumers on time shall count as sufficient evidence to allow the initiation of administration proceedings.

Section 360: Insurers

642. At present, the law prohibits insurance companies from being put into administration. When insolvency law first made provisions for administration in 1985, it was not clear whether this procedure would be appropriate for such companies, given the special nature of insurance business. Experience has shown that it may be helpful to make this option available, so this section gives the Treasury the power to make an order removing the prohibition in relation to insurers. “Insurers” for these purposes will be defined in regulations made by the Treasury.

Section 362: Authority's powers to participate in proceedings

643. This section makes clear that when a creditor or other third party asks the court to place in administration a person who is doing or has done financial services business, or who is or has been an appointed representative, or persons who are or have carried on financial services business without authorisation, then the Authority shall have the right to be represented at the hearing. It also gives the Authority the right to receive any information or proposals sent by the administrator to creditors, to attend and speak at any meeting of creditors called to discuss the administration, and to have the same rights as creditors to ask the court to intervene, if it considers that the administration is being carried out improperly or unfairly. It also gives the Authority the same power that creditors have under section 425 of the Companies Act (and the equivalent Northern Ireland provision), where a scheme is proposed to settle some or all of the debts of a company in administration, to ask the court that this be put to a vote of creditors.

Subjects

Financial regulation

Receivership

Section 363: Authority's powers to participate in proceedings

644. This section provides that when a receiver is appointed in respect of a company which is or was an authorised person, or an appointed representative, or which is or has been carrying on regulated activities without authorisation, the Authority is entitled to be represented at any hearing at which the receiver applies to the court for directions. It also provides that the Authority has the right to receive any information or proposals sent by the receiver to creditors and to attend and speak at any meeting of creditors called to discuss the winding up.

Voluntary winding up

Section 365: Authority's powers to participate in proceedings

645. This section gives the Authority the right to be represented at any court proceedings to wind up voluntarily a financial services company, other than an long term insurer. It also provides the Authority with the same powers that creditors have to ask the court to decide any questions arising out of the winding up, or to order that a scheme, under section 425 of the Companies Act (or the equivalent Northern Ireland provision), to settle some or all of the debts of the company, should be put to a vote of creditors. In addition, it gives the Authority the right to receive any notice or document required to be sent to creditors and to attend and speak at any creditors' meeting.

Section 366: Insurers carrying on long-term business

646. Under the predecessor legislation, there is a prohibition on the voluntary winding up of insurance companies carrying on long term, or life assurance, business. The reason is that if such companies went into voluntary liquidation the rights of endowment policyholders would accrue, so that they would be entitled only to the current value of their policy, and not to the terminal bonuses they would expect if their policies ran on to the end of their term. This section removes this absolute prohibition, but provides that voluntary winding up can only take place with the Authority's prior permission. This will allow the Authority to ensure that winding up will only proceed subject to arrangements being made to meet the legitimate expectations of policyholders.

Winding up by the court

Section 367: Winding-up petitions

647. This section provides that the Authority may ask the court compulsorily to wind up any company or partnership which is doing or has done financial services business or which is or has carried on financial services business without authorisation. The powers also apply to an appointed representative. As with the other provisions in this part which empower the Authority to initiate proceedings, this enables the Authority to act on behalf of consumers, who could in theory take action themselves, but may in practice lack the resources and expertise to do so. The court may agree to this in cases where the business cannot pay its debts, or where it decides that it would be “just and equitable” to wind up the business. The Authority might make an application under the latter ground if, for example, a business had been guilty of such serious rule breaches that the Authority had found it necessary to cancel its permission in order to protect the public. This section also provides that for such businesses failure to pay money due to consumers on time can count as sufficient evidence to allow the initiation of insolvency proceedings.

Section 368: Winding-up petitions: EEA and Treaty firms

648. This section makes clear that the Authority can only petition under section 367 for the winding up of a business which is authorised in another EEA State, and is entitled to provide financial services in the United Kingdom because of that authorisation, when it has been asked to do so by the home State regulator concerned. This is because the issues that generally arise in relation to the winding up of a business are issues which are primarily the concern of the home State regulator, rather than of the host State where the business is being carried on.

Section 371: Authority's powers to participate in proceedings

649. This section makes clear that when a creditor, or other third party, asks the court to wind up a person who is doing or has done financial services business, or who is or has been an appointed representative, the Authority has the right to be represented at the hearing, and at any subsequent hearing. It also provides that the Authority has the right to receive any information or proposals sent by the liquidator to creditors and to attend and speak at any meeting of creditors called to discuss the winding up, and to have the same rights as creditors to ask the court to intervene. It also gives the Authority the same power that creditors have under section 425 of the Companies Act (or the equivalent Northern Ireland provision), where a scheme is proposed to settle some or all of the debts of a company being wound up, to ask the court that this be put to a vote of creditors.

Bankruptcy

Section 372: Petitions

650. Section 367 gives the Authority power to ask the courts to wind up companies or partnerships doing financial services business. The section also confers a power in respect of sole traders doing financial services business. The Authority will be able to petition for the bankruptcy of such persons, or in Scotland, for the sequestration of their estate, if they are or appear unable to pay their debts to consumers. It should be noted, however, that here, as in insolvency law generally, inability to pay debts is the only ground on which a sole trader can be made bankrupt — there is no equivalent to the provision covering companies and partnerships that these may be wound up because the court feels it is “just and equitable” to do so. This is because sole traders' business affairs are not legally distinct from their personal finances.

Section 374: Authority's powers to participate in proceedings

651. This section makes clear that when a creditor, or other third party, asks the court to make a bankruptcy order for, or in Scotland to sequester the estate of, an individual who is doing or has done financial services business, then the Authority shall have the right to be represented at the hearing, and at any subsequent hearing. It also provides that the Authority has the right to receive any report sent by an insolvency practitioner to creditors and to attend and speak at any meeting of creditors called to discuss the bankruptcy.

Provisions against debt avoidance

Section 375: Authority's right to apply for an order

652. The Insolvency Act 1986 provides creditors, liquidators and administrators of insolvent persons with the right to ask the court to set aside transactions which appear to have been entered into to defraud creditors (that is, where assets are transferred as a gift, or sold at less than their full value, with the intention of putting them beyond the reach of creditors). This section provides the Authority with an equivalent right to make an application to the court in relation to transactions entered into in the course of financial services business.

Supplemental provisions concerning insurers

Section 376: Continuation of contracts of long-term insurance where insurer in liquidation

653. This section provides for the business of an insolvent insurer so far as it relates to contracts of long-term insurance to be transferred to another company, rather than for the policyholders to receive a share of the assets available on winding up. Policyholders of long term insurers face different problems to most consumers if the company fails. They enter into agreements, for example for pensions, which are designed to last many years, and the benefits they expect to receive build up over time. Also, the terms of the contract (and importantly the premium) are set at the outset. If, for example, during the course of the contract they were to develop an illness they might not then be able to obtain alternative cover. For these reasons, it is desirable, where possible, to

maintain the insurer's business as a going concern, or to find an alternative insurer to take over its policies, rather than allowing it to be wound up.

Section 377: Reducing the value of contracts instead of winding up

654. This section is intended to facilitate timely payments on, or the transfer of, insurance contracts of a company which has become insolvent, rather than leaving these to be matters to be resolved at the end of an insolvency process, which may take a considerable period of time.

Section 378: Treatment of assets on winding up

655. This section empowers the Treasury to make regulations to allow for the separate treatment in insolvency situations of an insurer's contracts of long-term and general insurance, given the special characteristics of long term business (referred to in the note on section 376 above).

Section 379: Winding-up rules

656. This section enables the making of rules to deal with the winding up of insurers, under the powers of the Insolvency Act 1986.

PART XXV: INJUNCTIONS AND RESTITUTION

657. This Part is concerned with the Authority's (and in certain cases the Secretary of State's) power to seek injunctions and restitution orders from the High Court, or in Scotland the Court of Session, against both authorised and unauthorised persons where it appears that certain requirements have been, or might be, contravened. Section 384 also gives the Authority the power to require restitution to be paid without having to apply to the courts for a restitution order, but this direct power can only be used against authorised persons.

658. The powers contained in this Part may be exercised by the Authority in relation to breaches which constitute an offence under the Act, or which the Authority has power to prosecute under section 402, or any breach of any other requirement imposed by or under the Act, such as a rule made under Part X. The Secretary of State may exercise the powers in relation to any breach which constitutes an offence which the Act gives him the power to prosecute under section 401.

Section 380: Injunctions

659. This section sets out the powers of the court to make injunctive orders on the application of the Authority or Secretary of State and the grounds on which they may exercise those powers. The court may make three types of order: an order restraining the contravention of certain requirements (subsection (1)), an order directing remedial action to be taken when there has been such a contravention (subsection (2)) and an order freezing the assets of someone who has contravened certain requirements or been knowingly involved in a contravention (subsection (3)).

660. The first of these is a preventative measure. Under subsection (1)(a) an order can be made restraining a person from contravening a requirement where the court believes they are reasonably likely to do so. Where a contravention has already occurred, under subsection (1)(b) the courts can restrain a person from doing so again.

661. Where there are clear steps that can be taken either by the person who has contravened a requirement or by a person knowingly concerned in the contravention, under subsection (2) the court may order a person to take those steps. This is a corrective power. For example, an order may simply require a person to meet commitments they have entered into but so far failed to discharge. Subsection (5) provides that the remedial action that the court may order under subsection (2) may include orders to mitigate the impact of a contravention even if it is not, strictly speaking, possible to remedy it. For example where a person has published a misleading advertisement, the Authority could apply to the court for an order requiring the person to publish a correction. This would not be of use to anyone who had taken action on the basis of the original advertisement but would prevent others doing so in the future.

662. An order made under subsection (3) to freeze a person's assets is similar to a Mareva injunction¹ apart from its timing: a Mareva injunction may only be applied for where court proceedings have been commenced or are imminent whereas this section gives the Authority or Secretary of State an independent power to apply to the court for an asset-freezing order on the grounds that they believe a breach may have occurred. The power does not prevent separate applications for Mareva injunctions.

663. Subsection (6) sets out the range of requirements the contravention or likely contravention of which may be grounds for an order under this section. These are requirements imposed by or under the Act, including the Authority's rules made under Part X, plus the various requirements a breach of which constitutes an offence under the Act, such as the general prohibition under Part II. In addition, the powers may be exercised for breaches of requirements imposed by other Acts which constitute offences which the Authority has power to prosecute. The Authority's power in that respect is set out in section 402.

Section 381: Injunctions in cases of market abuse

664. This section provides the Authority with the power to apply to the court for injunctive orders in cases of market abuse. The Secretary of State has no powers under this section in relation to market abuse. The types of orders which the court may make are the same for cases of market abuse under this section as for contraventions of requirements under the previous section.

Section 382: Restitution orders

665. This section gives the court the power, on the application of the Authority or the Secretary of State, to order restitution to be paid by a person who has contravened a requirement or been

knowingly involved in a contravention. The court must be satisfied that the contravention has led either to the person ordered to pay restitution accruing profits or to others suffering loss or being adversely affected in other ways. It is possible for an application for a restitution order to be combined with an application for an injunction.

666. Under subsection (2), the court has discretion to decide what is an appropriate sum for a person to have to pay taking into account the size of any profits which have accrued and the extent to which persons have suffered loss or been adversely affected. The restitution is initially paid to the Authority, but the Authority is then required to distribute the money among people chosen by the court. These must be those people who appear to the court to have been directly affected by the contravention, or to whom the profits may be attributed, for example because it was their funds that were used to make a particular investment which gave rise to the profits.

667. Subsections (4) and (5) give the court powers to require further information from potential recipients of restitution orders to assist the court in determining what profits have accrued to them, to what extent others have been affected by a contravention or how to distribute the money. The court may also require this information to be verified.

668. Subsection (7) provides that the fact that the Authority or the Secretary of State has made an application under this section for a restitution order does not prevent someone taking a private action for restitution in respect of the same matter. The court is likely to have regard to the question of whether any payments have already been made by a person in determining whether to order restitution in any particular case.

669. The range of requirements the contravention of which can give rise to an application to the courts under this section for a restitution order is the same as for injunctions under section 380. These are set out in subsection (9).

Section 383: Restitution orders in cases of market abuse

670. This section provides the Authority with the power to apply to the court for restitution orders against persons who it is satisfied have engaged in market abuse. The Secretary of State has no powers under this section. The provisions of this section are equivalent to those in the section above for restitution orders following the contravention of a requirement. Again, the court has discretion to determine the amount of restitution paid and the eventual recipients of that restitution who must be persons directly affected by the market abuse. The court also has similar powers as under section 382 to require further information from the person who has engaged in market abuse. However under this section the court may not make an order if it is satisfied that the person concerned believed, on reasonable grounds, that market abuse was not involved, or took all reasonable precautions and exercised all due diligence to avoid market abuse. This restriction is analogous to the provisions of section 123(2) which apply where the Authority wishes to impose a penalty in relation to market abuse.

Section 384: Power of Authority to require restitution

671. This section gives the Authority the direct power to require an authorised person to pay restitution, without having to go through the court, although the authorised person does have the right to refer the matter to the Tribunal under section 386. The Authority can order restitution to be paid by:

- authorised persons who have contravened a requirement under the Act or who have committed an offence mentioned in section 402;
- authorised persons who have been knowingly involved in such a contravention;
- any person, whether authorised or not, who has engaged in market abuse.

672. The Secretary of State has no direct powers under this Part to require restitution.

673. The grounds for the Authority using this power are set out in subsections (1) and (2). These are that the Authority is satisfied that the person has done the misdeed and that, because of it, either profits have accrued to that person or one or more people have suffered loss or been adversely affected.

674. The Authority may require someone to pay restitution of an amount which it considers to be just, taking into account the profits that have accrued and/or the extent of the loss or adverse effect suffered. The money is to be paid to people who have been directly affected by the contravention or offence, or to whom profits are attributable, as under sections 382 and 383. Where restitution is sought via a court order, the money is paid initially to the Authority, but when the Authority uses its power under this section to require restitution directly, subsection (5) provides for the money to be paid straight to the final recipients. The Authority may determine the arrangements for payment.

Section 385: Warning notices

675. This section requires the Authority to issue a warning notice informing someone of any proposal to require them to pay restitution under section 384. A warning notice must comply with the provisions of section 387. The warning notice must specify the amount of restitution proposed.

Section 386: Decision notices

676. This section provides that if the Authority decides to require restitution to be paid, it must send a decision notice to the person in relation to whom this power is being exercised. The section also provides a right to refer the Authority's decision to the Tribunal.

PART XXVI: NOTICES

677. Various provisions of the Act relate to the Authority taking decisions, for example as to whether to grant, or to withdraw, authorisations and approvals, or whether to take other regulatory action, such as imposing financial penalties or making public statements. The relevant provisions of the Act require the Authority in some cases to give warning and decision notices, and in others to give other kinds of notice. This Part is concerned with the Authority's procedures during, before and after the process of serving these notices as well as the information which they are to include. In particular, the Part requires the Authority to act in accordance with a published set of procedures.

Section 387: Warning notices

678. This section provides that a warning notice must be in writing and must set out the reasons for the proposed course of action. It must also state whether section 394 (Access to Authority material) applies.

679. Subsection (2) gives any person who receives a warning notice an opportunity to make representations to the Authority. The Authority may specify the period available for representations, provided it allows a minimum of 28 days from the date of the notice. The Authority must then decide whether to give the person a decision notice within a reasonable period.

Section 388: Decision notices

680. A decision notice must be in writing and must set out the reasons for the course of action. It also requires the Authority to explain a right of access to Authority material under section 394 and rights to refer the case to the Tribunal (including the procedure for doing so).

681. If a decision notice follows a warning notice, the action proposed in it must be action the Authority has powers to take under the same Part of the Act. The Authority can issue a further decision notice altering the action proposed in an earlier notice, but only with the consent of the person concerned.

Section 389: Notices of discontinuance

682. This section requires a “notice of discontinuance” to be issued when the Authority decides not to proceed with action proposed in a warning notice (section 387) or in relation to which a decision notice (section 388) was given.

683. However a notice of discontinuance does not have to be given if the effect is purely to grant an application made by the person in question. In such cases the Act generally contains express provision requiring written notice to be given of the grant of the application.

Section 390: Final notices

684. This section requires a “final notice” to be issued to confirm and give effect to an action proposed in a decision notice (and to require payment in the case of a penalty) whenever the period for referring a matter to the Tribunal has expired, or if it has been referred, whenever the matter has been finally determined by the Tribunal or the higher courts. If the matter was referred to the Tribunal then the final notice will give effect to the directions of the Tribunal (or the higher courts if there has been an appeal).

685. Subsection (7) requires the final notice to set out details of the action which is being taken and the date when it is to be taken. Particular requirements for certain categories of case are given in subsections (3) to (6). For example the notice must include the terms of any public statement which is to be made and details of the manner and date of publication, or the amount of any financial penalty and details of how and when it is to be paid. The period for making payments must not be less than 14 days beginning with the date on which the final notice is given, after which the Authority may recover any outstanding amount as a debt owed to it.

686. A similar 14 day minimum period must be allowed for making restitution as required under section 384, after which any outstanding obligations are enforceable through an application by the Authority to the courts (for an injunction in England and Wales and Northern Ireland or, in Scotland, for an order under section 45 of the Court of Session Act 1988).

Section 391: Publication

687. This section establishes common rules on publication of decisions which:

- prevent the Authority from publishing details about warning and decision notices;
- enable the Authority to publish appropriate details of a discontinued decision, but only if the person to whom the notice is given consents; and
- require the Authority to publish appropriate information about a final notice, but omitting information which would be unfair to the person to whom the notice relates or prejudicial to the interests of consumers.

688. The provision for publishing details of a final notice applies equally to a supervisory notice (as defined in section 395) but only when such a notice takes effect. The procedure on giving a supervisory notice is set out under the description of section 53 above. If the notice so states, it may take effect immediately, or on a particular date. Otherwise it will take effect only once it is no longer “open to review”. Subsection (8) of this section provides that a supervisory notice is “open to review” until after the period for referring the matter to the Tribunal has expired and until any reference or further appeal has been finally determined.

Section 392: Application of sections 393 and 394

689. Sections 393 and 394, described below, confer additional procedural rights relating to third parties and to disclosure of Authority material. However those rights apply only in cases, other than those involving the Authority responding to an application, which are governed by the warning notice and decision notice procedure. This section lists the particular sections of the Act where sections 393 and 394 apply.

Section 393: Third party rights

690. Where this section applies (see section 392 above) it confers rights on any person (a “third party”) who is identified in prejudicial terms in the reasons contained in a warning notice or decision notice. Third parties are given the right to receive a copy of the notice, and to make representations or refer the matter to the Tribunal in the same way as the person who is the subject of the Authority's proposed action. However subsections (2) and (6) provide that a third party does not need to be given a copy of a notice which identifies him if a separate warning or decision notice has been given to him in relation to the same matter, and subsection (7) provides a further exception where it is impracticable to contact the third party.

691. Subsection (13) provides that third party notices must describe the rights which third parties also have under section 394 below. Subsections (5) and (14) provide a third party with rights to receive copies of subsequent notices in relation to the same matter.

Section 394: Access to Authority material

692. Where this section applies (see section 392 above), the Authority is required to give any person who is the subject of a warning or decision notice, or who has received a copy of such a notice as a third party, access to certain categories of material. Subsection (1)(a) requires access to be given to any material on which the Authority relied in taking the decision in question. Subsection (1)(b) requires access to be given to material which the Authority considers might undermine that decision.

693. The latter category does not apply to all material in the Authority's possession but only to material which the Authority considered in reaching its decision, or which it obtained in connection with, that is in investigation of, the matter in question (see the definition of “*secondary material*” in subsection (6)).

694. The right of access to Authority material is subject to the following exceptions. First, the Authority may refuse access to material relating to a different case which was taken into account only for the purposes of comparison with the case in question. Secondly, it may refuse access to “*excluded material*”, defined as covering “*protected items*” as defined in section 413, and material intercepted under (or indicating the existence of) a warrant for the interception of communications. If access to material is refused on the grounds that it is subject to legal professional privilege, the Authority must give written notice to the person concerned.

695. Finally the Authority can refuse access to material which it would not be in the public interest to disclose (that is, material subject to public interest immunity) or to commercially sensitive material which it would not be fair to disclose. In these cases the Authority must notify the person and give its reasons for refusing.

Notes

- 1 A Mareva injunction (now known as a '*freezing order*') is a remedy a court may use to prevent assets being removed, charged or otherwise dealt with in a way that could prejudice a legal action that is otherwise being, or about to be, pursued.

Financial regulation

Section 395: The Authority's procedures

696. This section concerns the Authority's decision-making procedures. It is for the Authority to decide on its procedures but subsection (2) requires that, to avoid prejudice, they should be designed to ensure that the task of deciding whether to issue a warning, decision or supervisory notice and the task of collecting relevant information should be carried out by different people. However, subsections (3) and (4) provide that the procedures can provide for this requirement to be waived for supervisory notices (as defined in subsection (13)) if necessary to protect the interests of consumers, so long as the decision is taken by a person at an appropriate level of seniority given the importance of the decision.

697. The Authority is required by subsections (5) and (6) to issue and publish a statement describing its procedures. It must be published in a way appearing to the Authority best calculated to bring it to the attention of the public and a reasonable fee may be charged for providing a copy. A copy of the statement must also be given without delay to the Treasury. The Authority must also publish a revised statement if it decides to change the procedures. Under subsection (9) the Authority must act in accordance with its published procedures. Subsection (11) ensures that the validity of any notices given in such a case is not affected by any failure to do so. However, subsection (12) makes clear that the Tribunal can take into account any failure to follow the procedures.

Section 396: Statements under section 395

698. This section makes provision about consultation arrangements. These are similar to those in other equivalent provisions of the Act, such as under section 70 to the issuing of a statement under section 395.

PART XXVII: OFFENCES

699. This Part contains provisions which make it an offence to make misleading statements or engage in a misleading practice in order to induce someone to enter into an investment contract. It also creates offences of misleading the Authority and the DGFT. The first of these offences is carried over from sections 47 and 133 of the FS Act 1986 and section 35 of the Banking Act. It also provides that where a corporate body (or partnership) has committed an offence then, in certain

circumstances, its officers may also be guilty of that offence. In addition, this Part contains general provisions on the institution of proceedings for offences under this Act. It gives the Authority powers to prosecute insider dealing under the Criminal Justice Act 1993, to prosecute under the Money Laundering Regulations 1993, and to prosecute the offences of misleading statements and practices.

Section 397: Misleading statements and practices

700. This section provides for two criminal offences concerning misleading statements and practices. Persons found guilty of either of these offences may be subject to a maximum of up to 7 years imprisonment or to a fine, or to both.

701. The first, set out in subsections (1) and (2), applies where a person deliberately makes a misleading statement, promise or forecast, or dishonestly conceals facts from someone with the intention of inducing any other person to do or refrain from doing something in relation to an investment. A possible example of this offence would be someone lying about a company's financial position at a time when he was seeking to dispose of shares in that company. It is also an offence to make the misleading statement, promise or forecast recklessly and to be reckless as to whether another person was so induced.

702. The second offence, set out in subsection (3), is the creation of a misleading impression about an investment with the intention of inducing another person to do or not do something in relation to that investment. This covers such things as market manipulation, for example engaging in artificial trades in a particular investment in order to create the impression that there is more interest in the investment than really exists.

703. Subsection (4) provides a defence against the offence in subsection (2) for a person if he can show that a statement, promise or forecast was made in compliance with price stabilising or control of information rules. Subsection (5) provides three defences against the offence in subsection (3). The first is that the person concerned reasonably believed that his conduct would not create a misleading impression. The second defence is where the person is engaged in price stabilisation in circumstances where this is permitted. The third defence is where the person acted in conformity with the control of information rules under section 147.

704. Subsection (7) provides the offence in subsection (3) is not committed unless the action done takes place in the United Kingdom, or the misleading impression this creates arises in the United Kingdom.

705. Subsections (9) to (12) give the Treasury the power to prescribe those agreements and investments to which this section applies.

Section 398: Misleading the Authority: residual cases

706. This section makes it an offence to give false or misleading information to the Authority in purported compliance with requirements under the Act in cases where this is not already an offence under other provisions (for example under section 177(4) regarding the provision of information to investigators). The penalty for this offence is an unlimited fine on indictment or a fine of up to the statutory maximum (£5,000) on summary conviction.

Section 399: Misleading the Director General of Fair Trading

707. This section applies the provisions of section 44 of the Competition Act 1998. The effect of this is that it is an offence to mislead or give false information to the DGFT when he is exercising his functions under the Act.

Section 400: Offences by bodies corporate etc.

708. This section makes provision as to the circumstances in which partners in a partnership and directors and officers of bodies corporate and unincorporated associations may be found guilty of an offence in a case in which an offence has been committed by the relevant partnership, body or association.

709. Subsection (7) gives the Treasury the power to make regulations applying the provisions of this section, with any appropriate modifications, to equivalent undertakings established under the laws of other countries.

Section 401: Proceedings for offences

710. This section confers powers to prosecute offences under this Act. The Secretary of State and the Authority can prosecute any offence in England, Wales or Northern Ireland. Others can only prosecute with the consent of the Director of Public Prosecutions in England and Wales or, in Northern Ireland, with the consent of the Director of Public Prosecutions for Northern Ireland. The DGFT can prosecute in England, Wales or Northern Ireland for breaches of any prohibition on carrying on any CCA 1974 business he has imposed under section 203.

711. Subsections (5) and (6) give the Treasury the power to set conditions relating to the way in which the Authority can bring proceedings for offences under this Act. For example, the Treasury could require the Authority to comply with the Code for Crown Prosecutors. In Scotland, prosecution will be the responsibility of the Lord Advocate.

Section 402: Power of the Authority to institute proceedings for certain other offences

712. This section allows the Authority to prosecute in England, Wales or Northern Ireland two criminal offences which are not in this Act. These are the offences of insider dealing (Part V of the Criminal Justice Act 1993) and breach of the Money Laundering Regulations 1993 (regulation 5).

713. Subsections (2) and (3) give the Treasury the power to set conditions relating to the way in which the Authority can bring proceedings for these offences. For example, the Treasury could require the Authority to comply with the Code for Crown Prosecutors.

Section 403: Jurisdiction and procedure in respect of certain offences

714. This section makes provision for the procedures under which offences under the Act may be prosecuted and punished. It carries forward and has similar effect to the provisions of section 203 of the Financial Services Act 1986.

715. Subsection (1) makes clear that a fine imposed upon a unincorporated association must be paid out of the funds of the association, whilst subsection (2) provides that any proceedings for an offence brought against an unincorporated association must be brought in the name of the association. Subsections (3) and (4) provide that for the purposes of the service of documents, and of prosecutions, unincorporated associations should be treated in the same way as bodies corporate. Subsection (5) provides that summary proceedings may be taken against a body corporate or unincorporated association at their place of business, whilst proceedings may be brought against an individual at any place where he is present for the time being.

PART XXVIII: MISCELLANEOUS

Section 404: Schemes for reviewing past business

716. This section enables the Treasury, by order under subsection (2), to set out the framework for a scheme to be established and operated by the Authority to require authorised persons to review their past business and, where appropriate, to determine the amounts payable by those persons by way of compensation for liabilities that they have incurred to private investors and certain others. This power will facilitate the handling of issues such as those which arose in cases of mis-selling — most notably of personal pensions. Reciprocity powers

717. Sections 405 to 408 concern reciprocity powers. Under certain EC directives a decision can be taken by the Council of the European Union or the Commission to require individual member States' regulators to take reciprocal action to deprive subsidiaries of firms from a country outside the European Economic Area (EEA) of access to their markets. This is referred to in the Act as a "*third country decision*". Such a decision may be taken where it appears to the Commission that EEA firms wishing to establish themselves or provide financial services in third countries are not being treated on the same basis and offered the same competitive opportunities as domestic firms.

718. The potential for reciprocity action has diminished following World Trade Organisation ("WTO") negotiations on financial services which resulted in the EU, along with many other WTO member countries, making a commitment to offer Most Favoured Nation treatment to other WTO members on a permanent basis. This commitment came into force on 1 March 1999 and means that EC reciprocity powers can now only be used against countries outside the WTO.

Section 405: **Directions**

719. This section defines the nature of reciprocity action that may be taken in order to comply with a third country decision. The section provides the Treasury with the power to direct the Authority to do the following:

- refuse, or put on hold, an application for authorisation from a person which is formed under the law of the United Kingdom but which is the direct or indirect subsidiary (the powers do not apply to branches) of a firm from a country which is the subject of a third country decision (subsections (1)(a) and (b));
- object to a person from a country which is the subject of a third country decision acquiring a 50 per cent share in an authorised person incorporated in the United Kingdom or formed under UK law whether or not they have served the Authority with a notice of control as required under Part XII (subsections (1)(c) and (d))

720. The circumstances in which a person is taken to acquire a 50 per cent share is defined in section 406.

Section 407: **Consequences of a direction under section 405**

721. This section sets out the procedure the Authority must follow if the Treasury directs them to implement a third country decision.

Section 408: **EFTA firms**

722. If a subsidiary of a firm from a country subject to a third country decision is already authorised in an EU member State then its entitlement to exercise passport rights (see explanatory notes to Schedule 3) to establish a branch or provide services in another member State is not affected if by the third country decision. This is not the case for subsidiaries of third country firms authorised in EEA States which are not also EU member States (Norway, Iceland or Liechtenstein), referred to in the Act as “*EFTA firms*” (subsection (8)). EFTA firms may not exercise their passport rights following a third country decision relating to the country of their parent. This section therefore gives the Treasury the power to make a determination that a particular firm does, or class of firms do, not qualify for authorisation under Schedule 3. Subsections (6) and (7) set out the procedure the Treasury must follow if it makes such a determination.

Section 409: **Gibraltar**

723. This section provides for matters arising from Gibraltar's status within the EEA.

724. Subsection (1)(a) gives the Treasury the power to extend Schedule 3 so that Gibraltar firms which are covered by one of the single market directives to which effect has been given in Gibraltar

would be able to qualify for status as an authorised person and establish a branch or provide services within the United Kingdom. It also enables the Treasury to make the necessary provision to ensure that firms from other EEA States which exercise passport rights in relation to Gibraltar before they exercise them in relation to the United Kingdom proper are not required unnecessarily to duplicate notification requirements.

725. Subsection (1)(d) does the equivalent for Gibraltar based collective investment schemes. The Treasury also has the power under subsection (1)(c) to extend the application of Schedule 4 so that a financial services firm with its head office in Gibraltar or being otherwise connected with Gibraltar would acquire Treaty rights if it is authorised by the Gibraltar competent authority and the relevant conditions in Schedule 4 are met.

726. Subsection (1)(e) will enable the Treasury to modify the provisions of section 264 so that the Authority can refuse to admit a collective investment scheme from another member State if the way in which it proposes to market its units is incompatible with requirements imposed in Gibraltar in the general good.

727. Subsection (1)(b) gives the Treasury the power, by order, to extend the application of Schedule 3 to the Act so as to make provision as to the exercise by UK firms of rights which are afforded to them under the law of Gibraltar which corresponds to an EEA right.

Section 410: International obligations

728. This section provides the Treasury with the general power to direct a number of bodies with powers under the Act to take, or refrain from taking, any action which is either required by, or is incompatible with, the United Kingdom's international obligations. For example, if the Authority's rules on capital requirements were such that the UK's obligations under EC law were not being met, this section would allow the Treasury to direct the Authority to change their rules so as to ensure compliance.

Section 411: Tax treatment of levies and repayments

729. This section relates to levies and payments relating to the legal assistance scheme under Part IX, the compensation scheme under Part XV and the ombudsman scheme under Part XVI. This section amends the Income and Corporation Taxes Act 1988 so that it provides for such levies to be treated as a tax deductible expense and for levy rebates made to authorised persons to be treated as trading receipts.

Section 412: Gaming contracts

730. Legislation governing gaming contracts includes provisions for such contracts not to be legally enforceable. Some regulated activities involve entering into or performing contracts which

could potentially be covered by this legislation, for example derivative contracts such as “put options”, and the effect of this section is to make certain that such contracts are legally enforceable.

Section 413: Protected items

731. This section provides that no power under the Act can be used to require any person to produce, disclose or permit the inspection of “protected items”. These are defined in terms which are materially identical to the definition of items subject to legal professional privilege in section 10 of the Police and Criminal Evidence Act 1984.

Section 414: Service of notices

732. This section enables the Treasury to make regulations prescribing the procedure for giving notices and other documents under the Act. The power covers any such provision in the Act, regardless of its precise wording, and includes provisions about giving directions or imposing requirements.

733. In particular, the regulations may specify how a document may be given, the address to which it should be sent, and whether the document or notice may be sent electronically. They may also specify the date and time a document is to be regarded as having been served (this may be important, for example, where a time limit begins to run from that date). The regulations may also make particular provision for cases where the person to whom the document is being sent is not an individual (for example, in the case of a limited company or partnership) or is outside the United Kingdom. The precise arrangements required under the regulations may vary depending on the nature of the document in question.

Section 415: Jurisdiction in civil proceedings

734. This section enables civil proceedings, such as judicial review, to be brought against any of the bodies corporate on which functions are conferred by this Act in the courts of any part of the United Kingdom. This is necessary because these bodies are companies incorporated under the Companies Acts and, as such, the effect of the Civil Jurisdiction and Judgments Act 1982 would otherwise be that civil proceedings could be brought against them only in the courts in England and Wales because that is the part of the United Kingdom in which they are treated as being domiciled for the purposes of that Act. That Act is amended by paragraph 3 of Schedule 20.

Section 416: Provisions relating to industrial assurance and certain other enactments

735. This section provides for the Industrial Assurance Acts 1923–48 (and the equivalent Northern Ireland Order) to cease to have effect and for the repeal of the Insurance Brokers (Registration) Act 1977. It also provides for the dissolution of certain statutory bodies mentioned in subsection (3). The section also confers on the Treasury a power by order to make such provisions as it considers necessary in consequence of the provisions of this section. Such consequential provisions would

allow, for example, for the protection of existing policyholders under the Industrial Assurance Acts, and to make provision for the orderly dissolution of the bodies mentioned.

736. The repeals and dissolutions set out in this section are dealt with on the face of the Act because they may not be entirely consequential on the other provisions of the Act and therefore maybe outside the scope of section 426, which allows for consequential repeals to be made by order.

PART XXIX: INTERPRETATION

737. This Part defines a number of the terms used in the Act. The majority of such definitions are contained in section 417.

Section 418: Carrying on regulated activities in the United Kingdom

738. This section deals with the territorial scope of the authorisation requirement, and establishes its so-called “outward” application, whereby persons based in the United Kingdom who carry on regulated activities overseas need to be regulated in the United Kingdom. The section reflects the provisions of the EC directives in determining when a person is to be considered to be carrying on regulated activities in the United Kingdom, and sets out four broad cases:

- first, all persons who have their head or registered office in the United Kingdom, but who only carry on regulated activities in another EEA State, but are entitled to exercise rights under a single market directive as UK firms, and are carrying on in another EEA state regulated activities to which that directive applies, will need to be authorised in the United Kingdom;
- second, all persons who have their registered offices (or head offices, where they do not have registered offices) in the United Kingdom, and operate as managers of schemes which are entitled to enjoy the rights conferred by a relevant Community Instrument will require authorisation where persons in another EEA state are invited to become participants in the schemes;
- third, all persons who have their head or registered office in the United Kingdom, but who only carry on regulated activities in non-EEA states, will need to be authorised if they direct the day-to-day management of the activities from an establishment in the United Kingdom; or
- fourth, even if a person does not have a head or registered office in the United Kingdom and is not dealing with UK customers, he will still need to be authorised if the activity is carried on from an establishment maintained by him in the United Kingdom.

739. These provisions complement the so-called “inward” territorial scope of the Act, whereby overseas persons who carry on regulated activities in the United Kingdom need to be regulated unless an exemption or exclusion applies. The “inward” scope of the Act is implicit in the terms

of section 19, but it may also be further amplified or restricted by the order to be made under section 22.

Section 419: Carrying on regulated activities by way of business

740. This section allows the Treasury to make orders to define “*carrying on a regulated activity by way of business*” for the purposes of section 22. This would, for example, allow special provision to be made in the case of occupational pension schemes, as under the FS Act 1986. The section would also enable different provision to be made in the case of different activities, if that was thought to be desirable in the light of the slightly different tests which apply under the existing legislation.

Section 420: Parent and subsidiary undertaking

741. The definitions of parent and subsidiary undertaking for the purposes of the Act are consistent with the definitions used in the single market directives.

742. Although individuals are not themselves “undertakings”, it is possible for an individual to have a relationship with an undertaking which would be classified as a parent/subsidiary relationship if they were an undertaking. Subsection (2) clarifies that for the purposes of the Act such an individual is to be included as a parent undertaking. The undertaking with whom the individual has a parent/subsidiary relationship is to be included as a subsidiary undertaking.

743. Subsection (2) also extends the definitions in relation to EEA bodies to cover any undertaking which would be treated as a parent or subsidiary undertaking under the law of the EEA state where the body is established.

PART XXX: SUPPLEMENTAL

744. This Part contains various supplemental provisions. For example, provisions as to Parliamentary control over statutory instruments and provisions enabling the Treasury to make transitional provisions and consequential amendments. It also determines the name by which the Act may be cited.

Section 426: Consequential and supplementary provision

745. This section confers on Ministers of the Crown a power, exercisable by order, to make incidental, consequential, transitional or supplemental provisions. The provisions which may be made include ones which appear to the Ministers to be necessary or expedient in order to give full effect to the Act. This power will be used in particular to make consequential amendments and repeals to other legislation when the Act is brought into force.

Section 427: Transitional provisions

746. This section amplifies the power conferred on Ministers of the Crown by section 426, permitting an order under that section may make particular provision in respect of transitional matters or savings. The complexity of the transition to the regulatory regime to be established under this Act is such that it may be necessary to make provisions of the kinds described in this section which might not otherwise fall within the scope of section 426.

747. For example, subsection (2)(a) makes clear that an order under section 426 could provide for a person authorised under predecessor arrangements to have permission from the day the relevant provisions of this Act come into force to continue to carry on the activities permitted by the authorisation from the predecessor regulator. An order under section 426 may also make provision for the continuation of rules and regulations. It is expected that most rules made by the Authority will be new rules made for the purposes of the Act. However, there may be a need for the continuation of rules under previous legislation, at least for a transitional period. This section will enable the Authority to be given power to carry forward such rules and regulations which it could make under this Act. This section also provides that an order under section 426 may deal with disciplinary cases in train on the day of commencement, and for transitional provisions to be made in respect of ombudsman and compensation schemes.

Section 429: Parliamentary control of statutory instruments

748. This section sets out the procedure for making statutory instruments under the powers in the Act. Most of the powers to make orders and regulations under the Act are subject to the negative resolution procedure. The power to appoint a day for the commencement of particular provisions of the Act under section 431(2) is not subject to Parliamentary control. However, the affirmative procedure applies to the following powers:

- the power initially to set the definition, or to extend the scope of, regulated activities under section 22(1) (the type of affirmative procedure applicable to this power is set out in paragraph 26 of Schedule 2);
- the power initially to specify the matters set out in section 21(4), (5), (9) and (10) (the meaning of certain elements of the basic restriction on financial promotion and the exceptions from that restriction);
- any subsequent exercise of the power to specify the matters dealt with in section 21(4) and (5) (the meaning of certain elements of the basic restriction on financial promotion) which has the effect of extending that restriction so as to apply in circumstances in which it did not previously apply;
- the power to add to the activities and investments that are “controlled” for the purposes of section 21;

- the power under section 38, when it is first used, and any subsequent exercise of the power that has the effect of restricting or removing an exemption previously conferred by an order under section 38;
- the power to set the scope of price stabilising rules under section 144(4);
- the power under section 192(b) to vary, remove from or add to the cases in which a person has control for the purposes of Part XII and the equivalent power in section 192(e) in relation to the meaning of “*controller*” in section 422;
- the power under section 236(5) to amend the definition of open-ended investment company;
- the power for the establishment and regulation of collective investment schemes in Great Britain taking the form of oeics under section 262;
- the power initially to determine the circumstances in which the carrying on of regulated activities by members of the professions is subject to the arrangements set out under section 326(1) and restriction of exemption from the general prohibition under section 327(6)) and any subsequent exercise of those powers so as to restrict those circumstances;
- the power under section 404 authorising a scheme for reviewing past business;
- an order under section 419 defining the business test; and
- the power under paragraph 1 of Schedule 8 to allow any exercisable function conferred on the competent authority to be transferred in order for another person to exercise that function.

para. 15

Version 1 of 1

Date not available - Present

Subjects

Financial regulation

SCHEDULE 1: THE FINANCIAL SERVICES AUTHORITY

749. Part I of this Schedule sets out requirements for the Authority's constitution and imposes certain obligations on it. Part II deals with the status of the Authority. Parts III and IV concern the Authority's powers to raise fees and impose penalties and certain other matters. Part IV gives the Authority and those who work for it limited immunity from suit.

Part I: General

Paragraph 2: Constitution

750. This paragraph requires the Authority to have a chairman and a governing body which includes the chairman. Both the chairman and the members of the governing body must be appointed and be liable to removal from office by the Treasury.

751. Sub-paragraph (4) provides for the acts of the Authority still to be valid irrespective of a vacancy in the office of chairman or any defect in an appointment to the governing body. This is to prevent the Authority's rules, and any action it takes in pursuit of its functions, being rendered invalid purely as a result of such a vacancy or defect.

Paragraph 3: Non-executive members of the governing body

752. This paragraph provides that the Authority's governing body must include a majority of non-executive members and requires there to be a committee of the non-executive members of the governing body, the chairman of which is to be appointed by the Treasury.

Paragraph 4: Functions of the non-executive committee

753. The functions of the non-executive members are not restricted by the non-executive committee. The non-executive committee has three specified functions. These are:

- keeping under review the efficiency and economy with which the Authority uses its resources;

- keeping under review its internal financial controls; and
- determining the remuneration of the chairman and the executive members of the governing body.

754. The committee's function of keeping the Authority's economic and efficient use of its resources under review must be undertaken by the whole committee. However, the function of reviewing internal financial controls and determining the remuneration of the chairman and executive members of the governing body may be performed by a sub-committee.

Paragraph 5: Arrangements for discharging functions

755. This paragraph allows the Authority's functions, with the exception of its legislative functions, to be delegated below the level of the governing body. The legislative functions are rule-making, giving general guidance, issuing statements, issuing codes, and giving directions.

Paragraph 6: Monitoring and enforcement

756. This paragraph requires the Authority to maintain arrangements for monitoring compliance with, and enforcing requirements imposed by or under, the Act. The Authority may arrange for monitoring, but not enforcement, to be delegated to another body or person which it believes is competent, which might include, for example, a professional body. If it does so, the Authority remains responsible for ensuring that proper monitoring arrangements are in place.

Paragraph 7: Arrangements for the investigation of complaints

757. The Authority is required to put in place a scheme, the “complaints scheme”, for the prompt, independent investigation of complaints made against it. These might typically be complaints about maladministration by the Authority.

758. Sub-paragraphs (1), (2) and (3) require the Authority to establish a complaints scheme and appoint an independent investigator, whose appointment and removal will be subject to the approval of the Treasury.

759. Sub-paragraph (4) requires the investigator be appointed on terms and conditions reasonably designed to ensure his independence from the Authority and to ensure that complaints will be investigated under the scheme without favouring the Authority.

760. Sub-paragraphs (5) to (9) and (14) provide for the Authority to consult on its proposals for the complaints scheme.

761. Sub-paragraph (10) to (13) provide that the Authority is required to publish details of the complaints scheme and the powers of the independent investigator. The Authority may charge a reasonable fee for providing a person with a copy of details published under this paragraph.

Paragraph 8: **Investigation of complaints**

762. This paragraph is concerned with the operation of the complaints scheme. The Authority may decide not to investigate a complaint in accordance with the scheme where it considers that the complaint would more appropriately be dealt with in another way, for example by reference to the Tribunal.

763. Under sub-paragraph (2), the Authority is required to ensure that the independent investigator has the means at his disposal to conduct a full investigation of complaints referred to him, and the investigator can publish his report if he considers that the matter ought to be brought to the attention of the public. The investigator may, under sub-paragraphs (3) and (4), choose to investigate complaints in accordance with the scheme which the Authority has, itself, declined to pursue. If a report is critical of the Authority, sub-paragraphs (6) and (7) require the Authority to inform the investigator and the complainant of the steps it proposes to take in response, and the investigator may require the Authority to publish all or part of that response. Sub-paragraph (5) requires that the scheme allows the investigator to recommend that the Authority makes a compensatory payment to the complainant or remedies the matter, or both. Sub-paragraph (9) prevents an officer or employee of the Authority from investigating a complaint on the investigator's behalf.

Paragraph 9: **Records**

764. The Authority must have satisfactory arrangements for recording its decisions and for the safe-keeping of those records which it considers should be preserved.

Paragraph 10: **Annual report**

765. This requires the Authority to report at least once a year to the Treasury on the discharge of its functions and, in particular, the extent to which the statutory objectives have been met and its regulatory principles under section 2(3) have been taken into account and such other matters as directed by the Treasury. It also requires the Treasury to lay the report before Parliament.

766. Sub-paragraph (2) requires that the report of the Authority must be accompanied by a report by the non-executive members of the governing body and allows the Treasury to direct that any other reports or information, including material prepared by third parties such as an auditor's report, also accompany it.

767. Sub-paragraphs (4) to (6) allow the Treasury to direct the Authority to comply with provisions of the Companies Act which would otherwise not apply to it dealing with accounts and their audit. The direction may modify provisions under that Act in their application to the Authority. This is to ensure that the Authority is required to prepare audited accounts which are open to inspection irrespective of any exemptions which are made under that Act which would otherwise apply to the Authority.

Paragraph 11: **Annual public meeting**

768. The Authority must hold an annual public meeting to consider the most recent report of the Authority, within three months of its publication. The meeting should allow for a general discussion of the contents of the annual report and give those attending an opportunity to put questions to the Authority on the discharge of its functions. Paragraph 12 requires the Authority to publish a report of the proceedings of the meeting.

Part II: **Status**

Paragraphs 14 and 15: **Exemption from requirement of “limited” in Authority's name**

769. The Authority is a company limited by guarantee. These paragraphs exempt the Authority from having to include “limited” in its name, as would normally be required under the Companies Act. They also provide for the Secretary of State to remove that exemption if it is inappropriate for it to continue.

Part III: **Fees**

Paragraph 16: **Penalties**

770. This paragraph provides that in determining its policy with regard to the level of penalties to impose under powers in the Act, the Authority may take no account of its expenses or anticipated expenses. It clarifies that there is to be no link or incentive to fund the Authority by levying penalties on the regulated community.

771. Sub-paragraph (2) requires the Authority to operate a scheme to ensure that penalties paid to the Authority are to be applied for the benefit of authorised persons. The Authority is required to consult on these arrangements.

Paragraph 17: **Fees**

772. This provides for a rule-making power for the Authority to raise fees for what it does in the discharge of its functions under the Act. It may use the fees to meet its expenses, to repay borrowing incurred in preparing for the assumption of functions under the Act and by virtue of the Bank of England Act 1998 and to maintain adequate reserves.

773. The Authority may not take into account any penalties which it has received, or expects to receive, in setting the fees under the Act.

Paragraph 18: **Services for which fees may not be charged**

774. Fees may not be charged when a person gives notice of their intention to exercise passporting rights under Schedule 3 or to persons approved under the employed persons regime in Part V.

Part IV: Miscellaneous

Paragraph 19: Exemption from liability in damages

775. This paragraph provides immunity for the Authority and its staff from actions for damages except where they act in bad faith or where damages are sought under the Human Rights Act 1998. Similar immunity is granted to the independent investigator appointed under paragraph 7.

Paragraph 20: Disqualification for membership of House of Commons

776. Serving members of the Authority's board are disqualified from membership of the House of Commons. Paragraph 19 makes similar provision in respect of the Northern Ireland Assembly. Provision in respect of the Scottish Parliament and the Welsh Assembly are made respectively in the Scotland Act 1998 and the Government of Wales Act 1998.

SCHEDULE 2: REGULATED ACTIVITIES

777. This Schedule does not define what activities are regulated under the Act. The regulated activities will be those activities which are prescribed using the power conferred by section 22. The Schedule sets out a list of “activities” and “investments” which, together, indicate the broad scope of activities which are potentially regulated under the Act. The scope of the Act is not strictly limited by the Schedule, but rather by the overall object and purpose of the Act. However, the general nature of the activities set out in the Schedule serves to inform and therefore indirectly limit the extent of the Treasury's power to bring further activities within the scope of the Act.

778. It is within this overall object and purpose that the power under section 22 to prescribe the regulated activities operates. Orders made under that section will be an exhaustive statement of the regulated activities.

779. The Schedule is in three parts. The first Part describes certain activities which when carried on in relation to “investments” may be regulated. The second describes the “investments”. The third makes further provisions as to the scope of the order-making power under section 22.

780. The activities, which in each case include offering or agreeing to carry on the activity as well as actually carrying it out, are:

- dealing in investments, which includes buying, selling, subscribing for or underwriting investments. It covers a person acting as either principal or agent. In relation to insurance, dealing also includes carrying out a contract of insurance;

- arranging deals in investments on behalf of others, or making arrangements which enable other persons to deal;
- accepting deposits;
- safeguarding or administering assets for another person, or arranging for their assets to be safeguarded or administered;
- managing assets on behalf of another person, where those assets are or may include investments;
- giving advice on the buying, selling, subscribing for or underwriting of an investment or about the exercise of any right conferred by an investment to buy or sell, subscribe or otherwise convert an investment (examples of conversions on which advice might be given would include a corporate bond which, in certain circumstances, could be converted into, or redeemed in return for, a share of the equity in the company concerned);
- establishing, operating or winding up a collective investment scheme, including acting as trustee, or depositary or sole director of certain types of scheme;
- sending, or causing to be sent, instructions by means of a computer based system as to the transfer of investments. This element would cover computer-based clearing systems such as that operated by CREST.

781. Part II of the Schedule is an indicative list of the investments relevant to the question whether an activity could be brought within regulation under section 22. These are:

- stocks and shares in companies incorporated in the United Kingdom or elsewhere, or in unincorporated bodies constituted under the law of any territory;
- instruments creating or acknowledging indebtedness, such as loan stock, certificates of deposit, debentures and bonds, including debt issued by Governments, local authorities or international organizations of which the United Kingdom or any other EU member State is a member, such as the United Nations or the OECD;
- instruments, such as warrants, conferring a right to subscribe in other types of investment (including investments which are not yet in existence or which, like ordinary shares in a company, are not individually identifiable);
- instruments which confer contractual or property rights to underlying investments and which can be traded or transferred without reference to the party holding the underlying investments. Explicit inclusion of this element reflects the established practice whereby a public issue of securities might be made by issuing the securities themselves to a third party, which would issue certificates (which may confer only a proportionate property right to a security) to the subscribing public, which are then tradable as if they were the underlying securities themselves;

- units in, or securities issued by, collective investment schemes and open-ended investment companies;
- options to buy or sell property;
- futures, which are contractual rights to buy or sell a commodity or property at a future date and at a price agreed at the time that the contract is made (though the price might still be contingent on other factors). This includes both bilateral “forward” contracts as well as standardized futures contracts traded on a futures exchange such as London International Financial Futures Exchange (“LIFFE”);
- contracts for differences and other contracts whose value depends on fluctuations in the value of some factor such as property or index, for example interest rate swaps;
- contracts of insurance;
- membership and potential membership of a Lloyd's syndicate and the underwriting capacity of such a syndicate;
- deposits, that is contracts under which money is paid other than in return for goods or services and on the basis that it will be repaid, with or without interest, on demand or at some specified times or circumstances;
- loans secured on land, such as mortgages; and
- any other right or interest in any other investment.

782. Part III makes provision as to the scope of the order-making power under section 22. The first order to be made under that section must be subject to an affirmative resolution procedure — that is, it must be laid before Parliament after being made, and it will cease to have effect if it is not approved by a resolution of each House within 28 days of being made. The same procedure will apply where an order under section 22 has the effect of extending the scope of activities to be regulated under the Act.

SCHEDULE 3: EEA PASSPORT RIGHTS

783. This Schedule gives effect in UK law to the single markets in banking, investment services and insurance as provided for by the relevant directives: the 2nd Banking Co-ordination Directive, the Investment Services Directive and the Life and Non-Life Directives.

784. Under the directives, credit institutions (a term embracing both banks and building societies), investment firms and insurance companies (which includes friendly societies) with head offices in any member State of EEA (that is the 15 States of the EU plus Norway, Iceland and Liechtenstein) have rights to carry on certain activities in other member States by virtue of their home State authorisation. These rights are often referred to as their “*passport*” and cover a range of financial services (some of which may only be conducted by firms which are authorised under these categories), which include deposit-taking, effecting and carrying out life or general insurance.

785. Under the 2nd Banking Co-ordination Directive, subsidiaries of credit institutions which meet certain criteria set out in article 18(2) of that directive may also have passport rights, and are therefore included in the definitions of “*EEA firms*” (persons from other member States who qualify for the passport into the United Kingdom) and “*UK firms*” (persons established in the United Kingdom who exercise their passport rights in other member States) in this Schedule.

786. The authorities in the member States, other than the home State, where these passports are carrying on business under their passports (referred to as the host State authorities) may only impose limited regulations on the conduct of business under the passport, in accordance with the established principle of the “general good”. This requires those rules to be proportionate, non-discriminatory and non-duplicative of home State rules with equivalent effect. Conduct of business rules generally come within the host State remit. The home State retains full responsibility for authorising the passporting firms and conducting their overall prudential supervision (that is, supervising their financial soundness and ensuring that they and their controllers are fit and proper to conduct such business).

787. The passport may be exercised in order to establish a permanent place of business, referred to in the directives as a “*branch*” irrespective of the number of sites involved, or in order to provide cross-border services without a permanent place of business. Indeed the passport may be exercised in order to provide services, perhaps different services, by these two means in parallel.

788. The business activities covered by the passport do not necessarily correspond exactly to the activities which are regulated under the law of any member State, although certain activities, such as deposit-taking, insurance business or the core investment services defined under the Investment Services Directive, must be regulated, and will all be regulated activities under the order made under section 22. There are therefore activities for which firms may have rights to conduct in other member States by virtue of the passport, but which are not necessarily central to the definition of those firms which qualify for the passport. There may equally be activities which are covered by the passport, but which are not regulated activities in every member State.

789. An example of an activity not regulated in every member State is lending. Lending, in conjunction with deposit-taking, is a defining characteristic of what is a credit institution and therefore of those who may qualify for passport rights under the 2nd Banking Co-ordination Directive. However, the directives do not require that lending should be regulated, though they do require the regulation of deposit-taking. The passport under that directive therefore not only covers lending, but qualification for that passport depends on it being part of the business of the firm. However, lending is not covered by the other directives (indeed, insurance companies are prohibited from carrying on the business of lending unless it is ancillary to their insurance business) and it does not need to be regulated by member States. It is not currently a regulated activity in the United Kingdom, except to the extent that it falls within the scope of the CCA 1974.

790. This Schedule, in conjunction with section 31, therefore defines the firms from other EEA member States, which may qualify for authorisation via this route, and the procedures which, in accordance with the various directives, must be followed (see paragraphs 12 to 14 in Part II). An EEA firm which fails to follow the correct notification procedure does not, however, commit an offence and their contracts are not rendered unenforceable in consequence (see paragraph 16).

791. Part III of the Schedule gives effect to the outward passport entitlements of UK credit institutions, investment firms and insurance companies. For the reasons referred to above, those qualifying for the passport form a narrower class than all persons who have their head office in the United Kingdom and who are authorised by virtue of having a Part IV permission. For example, not all banks and building societies are necessarily credit institutions, though the vast majority are. Equally the definition of an investment firm for the purposes of the Investment Services Directive is restricted to a firm which is authorised to carry on the business of providing for third parties the core services defined under that directive.

792. Paragraphs 19 and 20 set out the procedure and conditions on which the Authority may grant the passport to those UK firms who qualify. A UK firm which fails to follow the required notification procedures before establishing a branch or providing services in another member State commits an offence under paragraph 21.

793. The Schedule also gives the Treasury powers to make regulations governing the continuing regulation of both EEA firms and UK firms.

794. Paragraph 23 enables the Authority to intervene in respect of a UK firm's consumer credit business in another member State. Paragraph 24 similarly enables the Authority to intervene in the business carried on in other member States of subsidiaries qualifying for the outward passport under Article 18(2) of the 2nd Banking Co-ordination Directive. Such subsidiaries need not be authorised persons in their own right.

SCHEDULE 4: TREATY RIGHTS

795. This Schedule gives effect in UK law to the rights of establishment and to provide services of persons established in the other EEA States. These relate to rights which go beyond those which are covered by the single market directives in banking, investment services and insurance (see Schedule 3).

796. These rights allow persons who are authorised under the law of one member State to carry on an activity in the other member States so long as the relevant law of the home State provides equivalent protection to that of the host State and meets any EU minimum requirements applicable in that area of law. These rights are given precise effect for many financial services firms through the single market directives, and the member State laws giving national effect to them. However, as explained in relation to Schedule 3, the directives do not cover the full range of financial services or financial service providers. It is necessary, therefore, to provide an equivalent mechanism to

permit persons from other EU member States to exercise their Treaty rights in the absence of formal directive passporting arrangements. The provisions in this Schedule, in conjunction with section 31, provide for that mechanism.

797. The Schedule does not seek to define the extent of Treaty rights, which are in any event the subject of extensive and developing case law in the EU, but sets the conditions that must be met for authorisation by this route in terms of the general principles described above. It requires home State confirmation of a firm's home State authorisation and provides for the Treasury to take the decision as to whether the particular laws of a particular member State provide the equivalent protection required.

798. The firm is also required to give notice of their intention to exercise their Treaty rights and to provide such information as the Authority may require. Failure to give proper notice is a criminal offence, unless all reasonable precautions have been taken to avoid the commission of the offence. It is also an offence knowingly or recklessly to provide false or misleading information.

SCHEDULE 5: PERSONS CONCERNED IN COLLECTIVE INVESTMENT SCHEMES

799. This schedule effectively deals with authorisation of collective investment schemes in two circumstances:

- first, it affords authorisation to incoming passporters under the relevant directives, and
- second, it deals with authorisation for certain types of oeic. The Treasury may prescribe additional conditions for qualification for automatic authorisation. A person who is authorised under this Schedule has permission to carry on regulated activities in connection with the scheme of which he is the operator or depositary.

SCHEDULE 6: THRESHOLD CONDITIONS

Part I: Part IVPermission

800. This Part sets out the minimum conditions against which an applicant for permission under section 40 must be measured. Failure to meet one of the conditions is sufficient grounds for refusal to grant permission or for granting permission for a narrower range or definition of regulated activities than sought by the applicant. However, the fact that an applicant satisfies all the applicable conditions in this Schedule does not confer any automatic right to permission. The Authority retains some discretion to refuse an application even where all these conditions are satisfied.

801. The conditions must also be met on an on-going basis by authorised persons and failure to meet one of the conditions is sufficient grounds for the exercise by the Authority of its power to vary an authorised person's permission under section 45, and through that power, its power to withdraw an authorised person's authorisation under section 33. However, the Authority may, from

time to time, temporarily subordinate the need to ensure that the threshold conditions are met on a continuous basis in line with its statutory objective of protecting consumers.

Paragraph 1: Legal Status

802. This paragraph sets out certain conditions for legal form. Section 40 allows for authorised persons to be natural persons as well as companies, partnerships or other unincorporated associations. However, not all these forms are acceptable under EC law for authorised persons carrying on certain types of business.

803. Thus the effecting and carrying out of contracts of insurance is limited to bodies corporate, registered friendly societies or members of Lloyd's insurance market, and only bodies corporate or partnerships may accept deposits

Subjects

Financial regulation

Paragraph 2: Location of offices

804. This paragraph implements the requirement under the Post-BCCI Directive (Council Directive 95/26/EEC of 29 June 1995) that persons covered by the single market directive should have their head office in the country in which they have their registered office. It requires authorised persons who are bodies corporate constituted under the law of any part of the United Kingdom, to have their head office (that is, the main centre from which the firm is run) in the United Kingdom. If they have a registered office, as most bodies corporate do, it must also be in the United Kingdom. If the person does not have a registered office (for instance if he is an individual or an unincorporated association) but his head office is in the United Kingdom, he must carry on authorisable business in the United Kingdom. This requirement is aimed at ensuring that authorised persons organise their business in a way that can be effectively supervised. A problem in the case of the failure of BCCI was that it was incorporated in one State, Luxembourg, but had its head office in another, the United Kingdom.

Paragraph 3: Close links

805. This paragraph requires the Authority to be satisfied that it can supervise an applicant or authorised person effectively, taking into account the structure of the group to which they belong, or the other firms to which they have relevant links, and the laws, regulations or administrative provisions of any non-EEA country to which they may be subject.

806. “*Close links*” is defined in sub-paragraph (2) and this sets out the structures that are relevant for these purposes. These cover the authorised person (or applicant), any parent undertaking or subsidiary undertaking of theirs and certain undertakings connected to such parent or subsidiary. In addition, the holding or control of 20 per cent of voting power by the authorised person (or applicant) in another body, or such a holding or control of voting power in the authorised person (or applicant), will constitute a close link for these purposes. These structures cover natural persons, and other forms of associations; and in such cases the relevant links are to be understood as referring to degrees of control that are equivalent.

Paragraph 4: Adequate resources

807. This paragraph requires the Authority to be satisfied that the applicant has adequate resources, which has a wide meaning. The term adequate is intended to mean sufficient in terms of quantity, quality and availability, and resources is intended to include all material or financial resources, for instance capital, provisions against liabilities, holdings of or access to cash and other liquid assets. A person must also have effective means by which to manage risks. The Authority may take account of a person's membership of a group in deciding whether it is satisfied that this condition is met.

Paragraph 5: Suitability

808. This paragraph requires the Authority to be satisfied that the person is “fit and proper” to be permitted to carry on the relevant activities, taking account of connections with other persons, the range and nature of regulated activities he carries on (or proposes to carry on), and the overall need to be satisfied that his affairs are and will be soundly and prudently managed.

Part II: Authorisation

809. This Part provides that the threshold conditions set out in paragraphs 1 to 5 are relevant to any additional Part IV permissions held, or applied for, by EEA or Treaty firms. However, the conditions are not relevant to an EEA or Treaty firm's qualification for authorisation under Schedules 3 or 4.

Part III: Additional conditions

810. This Part enables the Authority to specify additional conditions for an applicant for authorisation with a head office outside the EEA and who seeks to carry on regulated activities in relation to insurance business. Paragraph 9 confers a power on the Treasury to amend the threshold conditions by order.

SCHEDULE 7: THE AUTHORITY AS COMPETENT AUTHORITY FOR PART VI

Paragraph 1: General

811. This paragraph applies the provisions of the rest of the Act to the Authority, with certain modifications, when it is exercising the competent authority function. The remaining provisions of the Schedule set out what these modifications are.

Paragraph 2: The Authority's general functions

812. This paragraph disapplies the Authority's general duties under section 2 by ensuring that the definition of its general functions in section 2(4) does not include functions of the competent authority under Part VI. (Section 2(4)(b) is not mentioned since the competent authority does not

have a statutory function of making codes.) However the competent authority is placed under a separate obligation, by section 73, to follow analogous principles.

Paragraph 3: Duty to consult

813. This paragraph disapplies section 8 which places a duty on the Authority to make arrangements for consulting practitioners and consumers. The competent authority already has a listing committee which it consults and which the Authority has said will continue in operation following the transfer of functions from the Stock Exchange to the Authority.

Paragraph 4: Rules

814. Under this paragraph, section 155, which relates to consultation on rules, is applied with appropriate modifications to the listing rules made by the competent authority.

Paragraph 5: Statements of policy

815. This paragraph deals with statements of policy made by the competent authority under section 93. It has the effect of requiring that when the Authority publishes such statements, it must not delegate this function, but must act through its governing body, as provided for in paragraph 5 of Schedule 1.

Paragraphs 6 and 7: Penalties and fees

816. This paragraph disapplies provisions of Schedule 1 which would otherwise apply to the imposition of penalties by the competent authority, because these matters are provided for separately in section 100. Similar provision is also made, in paragraph 17 of Schedule 1, in relation to the charging of fees for which separate provision for the competent authority is made in section 99.

Paragraph 8: Exemption from liability in damages

817. The competent authority has exemption from liability in damages under section 102 and accordingly this paragraph modifies paragraph 19 of Schedule 1 which deals with similar issues for the Authority in its general regulatory role.

SCHEDULE 8: TRANSFER OF FUNCTIONS UNDER PART VI

818. The provisions of this Schedule allow the Treasury to transfer some or all of the competent authority functions to another body if it is in the public interest. Three specific grounds covering the performance of the functions and competition issues are set out in paragraph 1(2). These are particular situations in which the Treasury consider that they might exercise the power to transfer functions. The purpose of setting out these particular examples of public interest grounds in the

legislation is to provide more certainty in this area. Any order the Treasury makes under this Schedule would be subject to debate in both Houses of Parliament. This is provided for in section 429(1)(b).

SCHEDULE 9: NON-LISTING PROSPECTUSES

819. This Schedule applies the provisions of Part VI so that they apply in relation to a non-listing prospectus as they apply to listing particulars. It makes a number of changes to those provisions to deal with the fact that securities which are the subject of non-listing prospectuses are not admitted to listing.

SCHEDULE 10: COMPENSATION: EXEMPTIONS

820. This Schedule sets exemptions from the liability to pay compensation for false or misleading particulars in certain circumstances under section 90. Paragraph 5 provides that a person is not liable to pay compensation for loss resulting from a statement in the listing particulars which reproduces a statement made, for example, in a public official document. Paragraph 6 provides that there is also no liability if the person against whom action is taken satisfies the court that the person who acquired securities did so in the knowledge that a statement in the listing particulars was false or misleading. In such a case the person suffering the loss would not have been misled.

SCHEDULE 11: OFFERS OF SECURITIES

821. In accordance with EC law requirements, section 84 requires a prospectus to be approved and published where any person offers securities to the public in the United Kingdom for the first time and when an application for listing has been made. Section 103 provides that whether securities are offered to the public in the United Kingdom is to be determined in accordance with the requirements of this Schedule. This Schedule therefore defines an offer to the public, subject to certain exemptions which are set out in accordance with derogations in EC law.

SCHEDULE 12: TRANSFER SCHEMES: CERTIFICATES

822. The Schedule sets out the details of the certificates which the court must be satisfied, under section 111(2)(a), have been obtained.

823. Part I deals with insurance business transfers. The certificate requirements are all necessary to implement the insurance directives. For all insurance business transfers, a solvency margin certificate is required under paragraph 2. This certifies that the transferee has the necessary margin of solvency (defined in sub-paragraph 2(4)). It must be issued by the home State regulator in the case of an EEA firm under Schedule 3, the Swiss supervisory authorities in the case of a Swiss insurance company, and the Authority in all other cases.

824. If the transfer concerns a UK authorised person authorised under the insurance directives and the business to be transferred is conducted from a branch in another member State, a certificate is needed under paragraph 3 to the effect that the host State regulator has been duly notified and has responded (or the 3 month period allowed for response under the directives has elapsed).

825. If the transfer is of business which relates to the effecting and carrying out of long-term insurance (other than reinsurance policies) involving policyholders from other member States, and it involves a UK authorised person authorised under the First Life Directive, then a certificate is needed under paragraph 4 to the effect that the relevant authorities for those other member States have been duly notified and have consented (or the 3 month period allowed for response under the directives has elapsed).

826. If the transfer concerns a UK authorised person authorised under the First Non-Life Directive, and the business to be transferred is business which relates to the effecting and carrying out of contracts of general insurance which includes policies (other than reinsurance policies) concerning risks arising in other member States, a certificate is needed under paragraph 5 to the effect that the relevant authorities for those other member States have been duly notified and have consented (or the 3 month period allowed for response under the directives has elapsed).

827. Part II deals with banking business transfers. All such transfers require a financial resources certificate under paragraph 8. This certifies that the transferee has or will have adequate financial resources. It must be issued by the “relevant authority”. In a case where the transferee is a person authorised under Part IV or Schedule 4, this is the Authority. Where the transferee is an EEA firm under Schedule 3 it is the home State regulator. Where the transferee is neither, it is the relevant authority in the place in which the transferee has its head office.

828. If either the transferor or transferee is an EEA firm under Schedule 3, a certificate is also required under paragraph 9 to the effect that the home State regulator has been duly notified and has responded (or the 3 month period allowed for response under that paragraph has elapsed).

SCHEDULE 13: THE FINANCIAL SERVICES AND MARKETS TRIBUNAL

829. This Schedule makes provision further to that contained in Part IX as to the constitution and operation of the Tribunal.

Paragraph 2: President

830. This paragraph requires the Lord Chancellor to select one of the members of the panel of chairmen, with qualifications as specified in paragraph 2(5), to be the President of the Tribunal. Apart from his general responsibility for the Tribunal's functions under paragraph 2, it is the President's responsibility under paragraph 7 to establish standing arrangements for the selection of panel members to sit on the Tribunal to hear particular cases. The standing arrangements must provide for the selection of at least one member of the panel of chairmen in each reference to the

Tribunal, but may in addition provide for the selection other members of either panel. The Tribunal is empowered to appoint experts to assist it where necessary under paragraph 7(4). Paragraph 2 gives the Lord Chancellor the power to appoint a Deputy President, in addition to a President. If appointed, the Deputy President is to have such functions in relation to the Tribunal as the President may assign to him, and he is able to exercise any function of the President where the President is absent or otherwise unable to act.

Paragraph 3: Panels

831. This paragraph requires the Lord Chancellor to appoint the members of two panels, defined in paragraph 1 as the “*panel of chairmen*” and the “*lay panel*”, from which members of the Tribunal for a particular case will be drawn. Members of the former must have appropriate legal qualifications as specified in paragraph 3(2), at least one being suitably qualified in Scotland.

Paragraph 4: Terms of office

832. This paragraph provides that the terms of office of the panel members (including the President and any Deputy President) are to be determined by the terms on which they are appointed by the Lord Chancellor. The Lord Chancellor is also to have the power to remove them on grounds of incapacity or misbehaviour. The President and panel members may resign at any time, and they may be reappointed at the end of their terms. Paragraph 5 gives the Lord Chancellor similar powers to determine the remuneration of such persons and gives the Lord Chancellor the power to retain and pay administrative staff to support the Tribunal and to meet other expenses.

Paragraphs 8 to 10: Sittings and procedure

833. This paragraph indicates some of the matters concerning the conduct of cases referred which may be determined by rules made by the Lord Chancellor under section 132. As section 132(4) provides, this list does not limit the Lord Chancellor's powers. Under paragraph 8, the Tribunal must sit at such times and in such places as the Lord Chancellor may direct. Paragraph 10 enables the President of the Tribunal to give directions as to the practices and procedures to be followed by the Tribunal.

Paragraph 11: Evidence

834. This paragraph sets out the powers of the Tribunal to require people to attend and give evidence, or produce documents, and makes it a criminal offence not to comply without reasonable excuse. The statutory maximum fine for which a person can be liable on summary conviction is currently £5,000.

Paragraph 12: Decisions of Tribunal

835. Under this paragraph the Tribunal may reach a decision unanimously or by majority, but must indicate which was the case in the document which it is obliged to issue setting out its decision. This document must include a statement of its reasons, and a copy must be sent to each party to the reference.

Paragraph 13: Costs

836. The Tribunal will have discretion under paragraph 13 to award costs against any party to its proceedings where the Tribunal considered that the party concerned had acted vexatiously, frivolously or unreasonably. It will also have specific power to award costs against the Authority where it considers the Authority's decision was unreasonable.

SCHEDULE 14: ROLE OF THE COMPETITION COMMISSION

837. This schedule is concerned with the role of the Commission. It is introduced by section 162.

Paragraph 1: Provision of information by Treasury

838. This paragraph provides that the Treasury may give information and assistance to the Commission on matters falling within the investigation. For example, the Treasury may wish to tell the Commission about its view of the UK's international obligations in a particular area, or gives its view of the systemic risk implications of changing regulating provisions or practices.

Paragraph 2: Consideration of matters arising on a report

839. This paragraph provides that the Commission has to have regard to any cost-benefit analysis produced by the Authority on the regulating provisions or practices in question and to any representations made by other persons with a substantial interest.

Paragraph 3: Applied provisions

840. This paragraph applies provisions of the Fair Trading Act 1973 and other competition legislation which give the Commission powers to investigate and which make it an offence to provide false or misleading information to the Commission.

Paragraph 4: Publication of reports

841. This paragraph concerns the publication of reports by the Commission. When it publishes a report the Commission, like the DGFT under section 160, must so far as is practicable exclude any matter which relates to the affairs of a person which might seriously prejudice that person's interests. Sub-paragraph (4) provides that such information does not need to be excluded from the version of the report which is required to be sent to the Director, the Treasury and the Authority under section 162(10).

SCHEDULE 15: INFORMATION AND INVESTIGATIONS: CONNECTED PERSONS

842. Under section 165(7) the Authority may require information or documents from a person who is connected with an authorised person, including, in addition to those listed in the section itself, the persons related to an authorised person in any of the ways set out in this Schedule. These are:

- employees and agents of the authorised person;
- officers and managers if the authorised person is a body corporate, unincorporated association, building society or friendly society;
- officers, managers and agents of the authorised person's parent undertakings, if the authorised person is a body corporate; and
- managers and members, if the authorised person is a partnership.

843. In a similar way, section 171(4) enables investigators appointed to undertake investigations under section 167 to require persons connected to the person under investigation to attend and answer questions or provide information or documents. Again, this includes persons related to the person under investigation in any of the ways set out above, plus persons who, at the time the investigation is concerned with, were partners, managers, employees, agents, appointed representatives, bankers, solicitors, accountants or actuaries of:

- the person being investigated;
- that person's parent undertaking or subsidiary;
- a fellow parent of a subsidiary of the person under investigation; or
- a fellow subsidiary of a parent undertaking of that person.

844. The terms “*subsidiary undertaking*” and “*parent undertaking*” are defined in section 420.

SCHEDULE 16: PROHIBITIONS AND RESTRICTIONS IMPOSED BY THE DIRECTOR GENERAL OF FAIR TRADING

845. This Schedule sets out the procedures the DGFT must follow when he exercises his powers under sections 203 and 204 to impose a prohibition or a restriction, or vary an existing restriction without the consent of the firm, on the conduct of consumer credit business by an EEA firm. This procedure follows that which applies to the exercise of comparable powers in relation to persons licensed under the CCA 1974. If the EEA firm is carrying on consumer credit business here without a licence on the basis of its passport under the single market directives then the DGFT will need to rely on the powers in sections 203 and 204 to control that business when necessary.

846. The first step is for the DGFT to inform the firm that he proposes to impose the prohibition or restriction, or vary the existing restriction, and give the reasons for this. He has to allow the firm at least 21 days to make representations, which may be made either in writing or orally.

847. The second step is for the DGFT, having taken account of any representations received, to notify the firm of his decision and send a copy of the notification to the Authority and the firm's home State regulator. If the DGFT decides to proceed with a prohibition, a new restriction or variation of an existing one, he may also direct that the firm carries into effect credit agreements made before such action came into force.

848. The firm may appeal against the DGFT's decision to the Secretary of State, under section 41 of the CCA 1974. This gives the Secretary of State discretion to dispose of such an appeal as he thinks just (including making directions about payments of costs).

SCHEDULE 17: THE OMBUDSMAN SCHEME

849. This Schedule contains further details concerning the constitution and powers of the Financial Services Ombudsman Scheme.

Paragraph 3: Constitution

850. This sets requirements as to the scheme operator's constitution. These include that the chairman of the scheme operator must be appointed by the Authority with the approval of the Treasury. The scheme operator must be independent of the Authority.

Paragraph 6: Status

851. This confirms that the scheme operator, its staff and the ombudsmen do not exercise their functions on behalf of the Crown.

Paragraph 7: Annual Report

852. The scheme operator has to publish an annual report of its activities and also a report from the Chief Ombudsman.

Paragraph 8: Guidance

853. The scheme operator can disseminate appropriate information free of charge. This could include guidance on the scheme's procedures or advice on how to deal with disputes before coming to the scheme.

Paragraph 9: Budget

854. In order for there to be external scrutiny of the scheme's finances, the scheme operator's budget has to be approved by the Authority.

Paragraph 10: Exemption from liability in damages

855. The efficient operation of the scheme could be significantly disrupted if its actions were subject to frequent legal challenge. This paragraph provides immunity for the scheme operator and its staff from actions for damages, similar to the immunity enjoyed by the Authority.

Paragraph 11: Privilege

856. This ensures that evidence produced during proceedings under the compulsory jurisdiction is protected against actions for libel or slander.

Paragraph 13: Authority's procedural rules

857. This requires the Authority to make procedural rules for the operation of the compulsory jurisdiction of the scheme. In respect of rules governing how authorised persons deal with complaints, it extends the Authority's rule-making powers under Part X of the Act.

Paragraph 14: The scheme operator's rules

858. This requires the scheme operator to make other procedural rules for the compulsory jurisdiction. It provides, in particular, for rules to be made which allow an ombudsman to dismiss a complaint without consideration of its merits, for example where he deems the complaint to be frivolous or vexatious, and for the early stages of the handling of a complaint, for example a conciliation stage, to be handled by a member of the scheme operator's staff other than an ombudsman.

Paragraph 18: Terms of reference to the scheme

859. This provides that the scheme operator has power to set terms of reference for its voluntary jurisdiction dealing with matters for which rules may be made under the compulsory jurisdiction. The terms of reference must be approved by the Authority.

Paragraph 19: Delegation by and to other schemes

860. Although the scheme is intended to cover most complaints relating to the financial services industry, there is likely to be some continued overlap with other arrangements, for example in the areas of pensions and consumer credit. The scheme would be able to agree with other schemes which body should consider complaints within the voluntary jurisdiction. The arrangements must be approved by the Authority.

SCHEDULE 20: TRANSITIONAL PROVISIONS AND SAVINGS

861. This schedule affects the provisions of the FS Act 1986 as they relate to recognition, supervision and de-recognition of SROs under that Act. The Schedule allows the Treasury by order to designate a date from which the amendments have effect for particular SROs which are recognised under the FS Act 1986.

862. The independence of the Authority and the SROs from each other is an intrinsic feature of the system established by the FS Act 1986. Under the new regime, however, the regulatory functions performed by the SROs under the previous (FS Act 1986) regime pass to the Authority and it is therefore necessary for the Authority to be able to take appropriate steps in preparation for that transition. Were there any question whether transitional arrangements, by materially affecting the independence of the SROs, called into doubt the validity of their recognition, that could in turn cast doubt on the validity of the authorisation of firms authorised by virtue of their membership of an SRO. This Schedule makes clear that these questions do not arise and removes any potential for doubt as to whether the SROs could continue to be recognised when they cease to be truly independent of their regulator.

COMMENCEMENT

863. Certain provisions of the Act commence at Royal Assent. They are set out in section 431(1). Other provisions will be brought into force by commencement order in due course.

HANSARD REFERENCES

864. The following table sets out the dates and Hansard references for each stage of this Act's passage through Parliament.

of Part 15 of this Act and Part 6 of FSMA. The provisions in Part 6 require compliance with FSA rules giving effect to the obligations in the Directive in respect of failure to comply with the rules. In addition, restitution can potentially be ordered by the court, on application of the Authority, under section 382 of FSMA or by the Authority directly under section 384 of FSMA.

1643. The Government's intention in developing a civil liability regime has been to provide certainty in an uncertain area and to ensure that the potential is reasonable, in relation both to expectations and the likely state of the law after the implementation of the Transparency Directive. In particular, the Government is anxious not to extend unnecessarily the scope of any duties which might be owed to investors or wider classes of third parties, in order to protect company members, employees and creditors. However, as the state of the law after the implementation of the Transparency Directive is not certain, the Government has taken a power, at new *section 90B*, that will enable the provision introduced by section 1270 to be added to or amended if a wider or narrower scope is deemed appropriate.

New section 90A: Compensation for statements in certain publications

1644. *Subsection (1)(a)* of new *section 90A* provides that the civil liability regime set out in that section applies to those reports and statements required by implementing Articles 4 to 6 of the Transparency Directive. Depending on transparency rules, we would expect this to include annual and interim financial statements and management reports, the sign-off by directors or other responsible parties, as well as interim management statements.
1645. *Subsection (1)(b)* adds to the scope of the regime the information included in preliminary announcements of results made in advance of the report required by provision implementing Article 4 of the Transparency Directive, but only to the extent that it is intended that the information will appear in a final statement and be presented in substantially the same form as that in which it is presented in the preliminary announcement.
1646. *Subsection (2)* sets the scope of the civil liability regime to cover securities of all issuers for which the UK is the home Member State (whether the securities in which they are traded is situated in or outside the UK), as well as to cover those issuers whose securities are traded on a regulated market situated outside the UK of which the UK is the host Member State. UK holders of securities of other issuers (i.e. those for whom the UK is neither a host nor a home State) have no rights of action set out.
1647. *Subsection (3)* provides that issuers of such securities are liable to pay compensation to a person who has acquired those securities and has suffered loss from them as a result of any untrue or misleading statement in a publication to which this section applies, or an omission of a required statement from such a publication. *Subsection (4)* however limits the liability of the issuer to circumstances where a "person discharging managerial responsibilities" in relation to the issuer (see *subsection (9)*) knows the statement to be untrue or misleading, or is reckless as to whether the statement is untrue or misleading, or omissions, where it is known to be a dishonest concealment of a material fact.
1648. *Subsection (5)* provides that loss will not be regarded as having been suffered for the purposes of *subsection (3)* unless the person suffering it has acquired the securities in reliance on the information in the publication and at a time when and in circumstances where it was reasonable to rely on that publication.
1649. *Subsection (6)* limits the liability with regard to untrue or misleading statements, or omissions, in documents to which the section applies. It sets out that the issuer is not liable for any liability other than that provided for by the section and that any person who is not the issuer is not liable, other than to the issuer.
1650. *Subsection (8)* clarifies that the section does not affect Part 6 of FSMA conferring liability for a civil penalty, liability for a criminal offence or the right to bring a claim.
1651. *Subsection (9)* sets out the persons who are to be considered as discharging managerial responsibilities for the purposes of the section. This includes the issuer, or where the issuer's affairs are managed by the members, a member of the issuer. In the case where the issuer does not have direct senior executive with responsibilities in relation to the publication is considered as discharging managerial responsibilities.

New section 90B: Power to make further provision about liability for published information

1652. *Subsection (1)* of new *section 90B* establishes a power to make further provision about liability for published information. The new section allows the Government to make regulations to amend any primary or subordinate legislation relating to the liability of issuers and others in respect of information, including the provisions of *section 90A* of FSMA. The exercise of the proposed power could, for example, result in that regime or some other appropriate regime applying to published information, such as information that is required to be disclosed by issuers to shareholders or markets under the Market Abuse Directive (MAD).
1653. Regulations made under the section would be made using the affirmative procedure (see the amendment to section 429(2) of FSMA made by Schedule 15).

Regulation (EU) No 596/2014 of the European Parliament and of the Council of 16 April 2014 on market abuse (market abuse regulation) and repealing Directive 2003/6/EC of the European Parliament and of the Council and Commission Directives 2003/124/EC, 2003/125/EC and 2004/72/EC (Text with EEA relevance)

CHAPTER 2

INSIDE INFORMATION, INSIDER DEALING, UNLAWFUL DISCLOSURE OF INSIDE INFORMATION AND MARKET MANIPULATION

Article 7

Inside information

1 For the purposes of this Regulation, inside information shall comprise the following types of information:

- a information of a precise nature, which has not been made public, relating, directly or indirectly, to one or more issuers or to one or more financial instruments, and which, if it were made public, would be likely to have a significant effect on the prices of those financial instruments or on the price of related derivative financial instruments;
- b in relation to commodity derivatives, information of a precise nature, which has not been made public, relating, directly or indirectly to one or more such derivatives or relating directly to the related spot commodity contract, and which, if it were made public, would be likely to have a significant effect on the prices of such derivatives or related spot commodity contracts, and where this is information which is reasonably expected to be disclosed or is required to be disclosed in accordance with legal or regulatory provisions at the Union or national level, market rules, contract, practice or custom, on the relevant commodity derivatives markets or spot markets;
- c in relation to emission allowances or auctioned products based thereon, information of a precise nature, which has not been made public, relating, directly or indirectly, to one or more such instruments, and which, if it were made public, would be likely to have a significant effect on the prices of such instruments or on the prices of related derivative financial instruments;
- d for persons charged with the execution of orders concerning financial instruments, it also means information conveyed by a client and relating to the client's pending orders in financial instruments, which is of a precise nature, relating, directly or indirectly, to one or more issuers or to one or more financial instruments, and which, if it were made public, would be likely to have a significant effect on the prices of those financial instruments, the price of related spot commodity contracts, or on the price of related derivative financial instruments.

2 For the purposes of paragraph 1, information shall be deemed to be of a precise nature if it indicates a set of circumstances which exists or which may reasonably be expected to come into existence, or an event which has occurred or which may reasonably be expected to occur, where it is specific enough to enable a conclusion to be drawn as to the possible effect of that set of circumstances or event on the prices of the financial instruments or the related derivative financial instrument, the related spot commodity contracts, or the auctioned products based on the emission allowances. In this respect in the case of a protracted process that is intended to bring about, or that results in, particular circumstances or a particular event, those future

Status: This is the original version as it was originally adopted in the EU. This legislation may since have been updated - see the latest available (revised) version

circumstances or that future event, and also the intermediate steps of that process which are connected with bringing about or resulting in those future circumstances or that future event, may be deemed to be precise information.

3 An intermediate step in a protracted process shall be deemed to be inside information if, by itself, it satisfies the criteria of inside information as referred to in this Article.

4 For the purposes of paragraph 1, information which, if it were made public, would be likely to have a significant effect on the prices of financial instruments, derivative financial instruments, related spot commodity contracts, or auctioned products based on emission allowances shall mean information a reasonable investor would be likely to use as part of the basis of his or her investment decisions.

In the case of participants in the emission allowance market with aggregate emissions or rated thermal input at or below the threshold set in accordance with the second subparagraph of Article 17(2), information about their physical operations shall be deemed not to have a significant effect on the price of emission allowances, of auctioned products based thereon, or of derivative financial instruments.

5 ESMA shall issue guidelines to establish a non-exhaustive indicative list of information which is reasonably expected or is required to be disclosed in accordance with legal or regulatory provisions in Union or national law, market rules, contract, practice or custom, on the relevant commodity derivatives markets or spot markets as referred to in point (b) of paragraph 1. ESMA shall duly take into account specificities of those markets.

Regulation (EU) No 596/2014 of the European Parliament and of the Council of 16 April 2014 on market abuse (market abuse regulation) and repealing Directive 2003/6/EC of the European Parliament and of the Council and Commission Directives 2003/124/EC, 2003/125/EC and 2004/72/EC (Text with EEA relevance)

CHAPTER 3

DISCLOSURE REQUIREMENTS

Article 17

Public disclosure of inside information

1 An issuer shall inform the public as soon as possible of inside information which directly concerns that issuer.

The issuer shall ensure that the inside information is made public in a manner which enables fast access and complete, correct and timely assessment of the information by the public and, where applicable, in the officially appointed mechanism referred to in Article 21 of Directive 2004/109/EC of the European Parliament and the Council⁽¹⁾. The issuer shall not combine the disclosure of inside information to the public with the marketing of its activities. The issuer shall post and maintain on its website for a period of at least five years, all inside information it is required to disclose publicly.

This Article shall apply to issuers who have requested or approved admission of their financial instruments to trading on a regulated market in a Member State or, in the case of instruments only traded on an MTF or on an OTF, issuers who have approved trading of their financial instruments on an MTF or an OTF or have requested admission to trading of their financial instruments on an MTF in a Member State.

2 An emission allowance market participant shall publicly, effectively and in a timely manner disclose inside information concerning emission allowances which it holds in respect of its business, including aviation activities as specified in Annex I to Directive 2003/87/EC or installations within the meaning of Article 3(e) of that Directive which the participant concerned, or its parent undertaking or related undertaking, owns or controls or for the operational matters of which the participant, or its parent undertaking or related undertaking, is responsible, in whole or in part. With regard to installations, such disclosure shall include information relevant to the capacity and utilisation of installations, including planned or unplanned unavailability of such installations.

The first subparagraph shall not apply to a participant in the emission allowance market where the installations or aviation activities that it owns, controls or is responsible for, in the preceding year have had emissions not exceeding a minimum threshold of carbon dioxide equivalent and, where they carry out combustion activities, have had a rated thermal input not exceeding a minimum threshold.

The Commission shall be empowered to adopt delegated acts in accordance with Article 35 establishing a minimum threshold of carbon dioxide equivalent and a minimum threshold of rated thermal input for the purposes of the application of the exemption provided for in the second subparagraph of this paragraph.

Status: This is the original version as it was originally adopted in the EU. This legislation may since have been updated - see the latest available (revised) version

3 The Commission shall be empowered to adopt delegated acts in accordance with Article 35 specifying the competent authority for the notifications of paragraphs 4 and 5 of this Article.

4 An issuer or an emission allowance market participant, may, on its own responsibility, delay disclosure to the public of inside information provided that all of the following conditions are met:

- a immediate disclosure is likely to prejudice the legitimate interests of the issuer or emission allowance market participant;
- b delay of disclosure is not likely to mislead the public;
- c the issuer or emission allowance market participant is able to ensure the confidentiality of that information.

In the case of a protracted process that occurs in stages and that is intended to bring about, or that results in, a particular circumstance or a particular event, an issuer or an emission allowance market participant may on its own responsibility delay the public disclosure of inside information relating to this process, subject to points (a), (b) and (c) of the first subparagraph.

Where an issuer or emission allowance market participant has delayed the disclosure of inside information under this paragraph, it shall inform the competent authority specified under paragraph 3 that disclosure of the information was delayed and shall provide a written explanation of how the conditions set out in this paragraph were met, immediately after the information is disclosed to the public. Alternatively, Member States may provide that a record of such an explanation is to be provided only upon the request of the competent authority specified under paragraph 3.

5 In order to preserve the stability of the financial system, an issuer that is a credit institution or a financial institution, may, on its own responsibility, delay the public disclosure of inside information, including information which is related to a temporary liquidity problem and, in particular, the need to receive temporary liquidity assistance from a central bank or lender of last resort, provided that all of the following conditions are met:

- a the disclosure of the inside information entails a risk of undermining the financial stability of the issuer and of the financial system;
- b it is in the public interest to delay the disclosure;
- c the confidentiality of that information can be ensured; and
- d the competent authority specified under paragraph 3 has consented to the delay on the basis that the conditions in points (a), (b) and (c) are met.

6 For the purposes of points (a) to (d) of paragraph 5, an issuer shall notify the competent authority specified under paragraph 3 of its intention to delay the disclosure of the inside information and provide evidence that the conditions set out in points (a), (b) and (c) of paragraph 5 are met. The competent authority specified under paragraph 3 shall consult, as appropriate, the national central bank or the macro-prudential authority, where instituted, or, alternatively, the following authorities:

- a where the issuer is a credit institution or an investment firm the authority designated in accordance with Article 133(1) of Directive 2013/36/EU of the European Parliament and of the Council⁽²⁾;
- b in cases other than those referred to in point (a), any other national authority responsible for the supervision of the issuer.

The competent authority specified under paragraph 3 shall ensure that disclosure of the inside information is delayed only for a period as is necessary in the public interest.

The competent authority specified under paragraph 3 shall evaluate at least on a weekly basis whether the conditions set out in points (a), (b) and (c) of paragraph 5 are still met.

If the competent authority specified under paragraph 3 does not consent to the delay of disclosure of the inside information, the issuer shall disclose the inside information immediately.

This paragraph shall apply to cases where the issuer does not decide to delay the disclosure of inside information in accordance with paragraph 4.

Reference in this paragraph to the competent authority specified under paragraph 3 is without prejudice to the ability of the competent authority to exercise its functions in any of the ways referred to in Article 23(1).

7 Where disclosure of inside information has been delayed in accordance with paragraph 4 or 5 and the confidentiality of that inside information is no longer ensured, the issuer or the emission allowance market participant shall disclose that inside information to the public as soon as possible.

This paragraph includes situations where a rumour explicitly relates to inside information the disclosure of which has been delayed in accordance with paragraph 4 or 5, where that rumour is sufficiently accurate to indicate that the confidentiality of that information is no longer ensured.

8 Where an issuer or an emission allowance market participant, or a person acting on their behalf or for their account, discloses any inside information to any third party in the normal course of the exercise of an employment, profession or duties as referred to in Article 10(1), they must make complete and effective public disclosure of that information, simultaneously in the case of an intentional disclosure, and promptly in the case of a non-intentional disclosure. This paragraph shall not apply if the person receiving the information owes a duty of confidentiality, regardless of whether such duty is based on a law, on regulations, on articles of association, or on a contract.

9 Inside information relating to issuers whose financial instruments are admitted to trading on an SME growth market, may be posted on the trading venue's website instead of on the website of the issuer where the trading venue chooses to provide this facility for issuers on that market.

10 In order to ensure uniform conditions of application of this Article, ESMA shall develop draft implementing technical standards to determine:

- a the technical means for appropriate public disclosure of inside information as referred to in paragraphs 1, 2, 8 and 9; and
- b the technical means for delaying the public disclosure of inside information as referred to in paragraphs 4 and 5.

ESMA shall submit those draft implementing technical standards to the Commission by 3 July 2016.

Power is conferred on the Commission to adopt the implementing technical standards referred to in the first subparagraph in accordance with Article 15 of Regulation (EU) No 1095/2010.

11 ESMA shall issue guidelines to establish a non-exhaustive indicative list of the legitimate interests of issuers, as referred to in point (a) of paragraph 4, and of situations in which delay of disclosure of inside information is likely to mislead the public as referred to in point (b) of paragraph 4.

Status: This is the original version as it was originally adopted in the EU. This

[Note: ESMA has also issued guidelines under article 16(3) of the ESMA Regulation on enforcement of financial information, 10 July 2014/ESMA/2014/807]

Application

- 4.1.1 **R** Subject to the exemptions set out in **DTR 4.4 (Exemptions)** this section applies to an *issuer* whose *transferable securities* are *admitted to trading*.

Compliance with the Listing Rules

- 4.1.2 **G** An *issuer* that is also admitted to the *official list* should consider its obligations under the *Listing Rules* in addition to the requirements in these *rules*.

Publication of annual financial reports

- 4.1.3 **R** An *issuer* must make public its annual financial report at the latest four months after the end of each financial year.

[Note: article 4(1) of the *TD*]

- 4.1.4 **R** An *issuer* must ensure that its annual financial report remains publicly available for at least ten years.

[Note: article 4(1) of the *TD*]

Content of annual financial reports

- 4.1.5 **R** The annual financial report must include:

- (1) the audited financial statements;
- (2) a management report; and
- (3) responsibility statements.

[Note: article 4(2) of the *TD*]

Audited financial statements

4.1.6

R

- (1) If an *issuer* is required to prepare consolidated accounts, the audited financial statements must comprise:
 - (a) consolidated accounts prepared in accordance with *UK-adopted IFRS*, and
 - (b) accounts of the parent *company* prepared in accordance with the law of the *United Kingdom*.

[Note: article 4(3) of the *TD*]
 - (2) If an *issuer* is not required to prepare consolidated accounts, the audited financial statements must comprise accounts prepared in accordance with the law of the *United Kingdom*.
- [Note: article 4(3) of the *TD*]

Auditing of financial statements

4.1.7

R

- (1) The financial statements must be audited in accordance with Part 16 of the Companies Act 2006.
 - (2) [deleted]
 - (3) The audit report, signed by the person or persons responsible for auditing the financial statements must be disclosed in full to the public together with the annual financial report.
- [Note: article 4(4) of the *TD*]
- (4) An *issuer* which is a UK-traded third country company within the meaning of section 1241 of the Companies Act 2006 must ensure that the *person* who provides the audit report is:
 - (a) on the register of third country auditors kept for the purposes of regulation 6 of the Statutory Auditors and Third Country Auditors Regulations 2013 (SI 2013/1672); or
 - (b) eligible for appointment as a *statutory auditor* under section 1212 of the Companies Act 2006.
 - (c) [deleted]

[Note: Article 45(4) of the *Audit Directive*]

Content of management report

4.1.8

R

The management report must contain:

- (1) a fair review of the *issuer's* business; and
 - (2) a description of the principal risks and uncertainties facing the *issuer*.
- [Note: article 4(5) of the *TD*]

4.1.9

R

The review required by **■ DTR 4.1.8 R** must:

- (1) be a balanced and comprehensive analysis of:

- (a) the development and performance of the *issuer's* business during the financial year; and
- (b) the position of the *issuer's* business at the end of that year, consistent with the size and complexity of the business;
- (2) include, to the extent necessary for an understanding of the development, performance or position of the *issuer's* business:
 - (a) analysis using financial key performance indicators; and
 - (b) where appropriate, analysis using other key performance indicators including information relating to environmental matters and employee matters; and
- (3) include references to, and additional explanations of, amounts included in the *issuer's* annual financial statements, where appropriate.

[Note: article 4(5) of the *TD*]

4.1.10 G In ■ DTR 4.1.9 R (2), key performance indicators are factors by reference to which the development, performance or position of the *issuer's* business can be measured effectively.

4.1.11 R The management report required by ■ DTR 4.1.8 R must also give an indication of:

- (1) any important events that have occurred since the end of the financial year unless those events are:
 - (a) reflected in the *issuer's* profit and loss account or balance sheet; or
 - (b) disclosed in the notes to the *issuer's* audited financial statements;
- (2) the *issuer's* likely future development;
- (3) activities in the field of research and development;
- (4) the information concerning acquisitions of own *shares* prescribed by the *United Kingdom* provisions which implemented article 24(2) of Directive 2012/30/EU;
- (5) the existence of branches of the *issuer*; and
- (6) in relation to the *issuer's* use of *financial instruments* and where material for the assessment of its assets, liabilities, financial position and profit or loss:
 - (a) the *issuer's* financial risk management objectives and policies, including its policy for hedging each major type of forecasted transaction for which hedge accounting is used, and

(b) the *issuer's* exposure to price risk, credit risk, liquidity risk and cash flow risk.

[Note: article 4(5) of the *TD*]

Responsibility statements

4.1.12

R

- (1) Responsibility statements must be made by the *persons* responsible within the *issuer*.
- (2) The name and function of any *person* who makes a responsibility statement must be clearly indicated in the responsibility statement.
- (3) For each *person* making a responsibility statement, the statement must set out that to the best of his or her knowledge:
 - (a) the financial statements, prepared in accordance with the applicable set of accounting standards, give a true and fair view of the assets, liabilities, financial position and profit or loss of the *issuer* and the undertakings included in the consolidation taken as a whole; and
 - (b) the management report includes a fair review of the development and performance of the business and the position of the *issuer* and the undertakings included in the consolidation taken as a whole, together with a description of the principal risks and uncertainties that they face.

[Note: article 4(2)(c) of the *TD*]

4.1.13

R

The *issuer* is responsible for all information drawn up and made public in accordance with this section.

Reporting format

4.1.14

R

[deleted]

4.1.15

R

The annual financial report must be prepared in Extensible Hypertext Markup Language (XHTML) format.

4.1.16

R

■ DTR 4.1.17R and ■ DTR 4.1.18R apply to an annual financial report that contains consolidated accounts prepared in accordance with:

- (1) *UK-adopted IFRS*;
- (2) *EU-adopted IFRS*; or
- (3) International Financial Reporting Standards as referred to in point (a) of the first subparagraph of Article 1 of the *TD Equivalence Decision*.

4.1.17

R

An *issuer*:

- (1) must mark up any disclosures specified in ■ DTR 4 Annex 1R that are present in consolidated financial statements in the annual financial report; and

4.1.18

R

(2) may mark up other disclosures in the consolidated financial statements in addition to the ones specified in ■ DTR 4 Annex 1R.

The mark ups specified in ■ DTR 4.1.17R must use:

- (1) the Extensible Business Reporting Language (XBRL) markup language;
- (2) a taxonomy generally accepted in the *UK* for financial disclosures in *regulated markets*; and
- (3) the inline XBRL specifications and marking up and filing requirements specified by the taxonomy the *issuer* uses in (2).

[**Note:** Information on generally accepted taxonomies and associated marking up and filing requirements is available in the Markets section of the FCA's website at <https://www.fca.org.uk/markets/company-annual-financial-reporting-electronic-format>]

4.1.19

R

An issuer must comply with ■ DTR 4.1.17R to ■ DTR 4.1.18R if it wishes to mark up financial statements that:

- (1) are prepared in accordance with the accounting standards referred to in ■ DTR 4.1.16R; and
- (2) do not contain consolidated accounts.

4.1.20

R

An *issuer* must not mark up an annual financial report if the accounts in the report are not prepared in accordance with the accounting standards referred to in ■ DTR 4.1.16R.

4.1.21

G

The effect of ■ DTR 4.1.20R is that an *issuer* cannot mark up an annual financial report containing accounts prepared in accordance with:

- (1) section 396 (Companies Act individual accounts) or section 404 (Companies Act group accounts) of the Companies Act 2006; or
- (2) the Generally Accepted Accounting Principles of a *third country*.

4.1.22

R

An *issuer* must not mark up disclosures in its annual financial report other than its financial statements unless:

- (1) it marks up its financial statements in accordance with ■ DTR 4.1.16R to ■ DTR 4.1.18R or ■ DTR 4.1.19R, whichever is applicable; and
- (2) it marks up those other disclosures using the inline XBRL markup language and a taxonomy specific to those other parts.

Filing of the annual financial report

4.1.23

G

Issuers are reminded of the filing requirements for annual financial reports in ■ DTR 6.2.

4.2 Half-yearly financial reports

Application

- 4.2.1 **R** Subject to the exemptions set out in ■ DTR 4.4 (Exemptions) this section applies to an *issuer* whose *shares* or *debt securities* are *admitted to trading*.

Publication of half-yearly financial reports

- 4.2.2 **R**
- (1) An *issuer* must make public a half-yearly financial report covering the first six months of the financial year.
 - (2) The half-yearly financial report must be made public as soon as possible, but no later than three months, after the end of the period to which the report relates.
 - (3) An *issuer* must ensure that the half-yearly financial report remains available to the public for at least ten years.

[Note: article 5(1) of the *TD*]

Content of half-yearly financial reports

- 4.2.3 **R** The half-yearly financial report must include:
- (1) a condensed set of financial statements;
 - (2) an interim management report; and
 - (3) responsibility statements.

[Note: article 5(2) of the *TD*]

Preparation and content of condensed set of financial statements

- 4.2.4 **R**
- (1) If an *issuer* is required to prepare consolidated accounts, the condensed set of financial statements must be prepared in accordance with IAS 34 as contained in *UK-adopted IFRS*.
 [Note: article 5(3) of the *TD*]
 - (2) If an *issuer* is not required to prepare consolidated accounts, the condensed set of financial statements must contain, as a minimum the following:
 - (a) a condensed balance sheet;

4.2.5

R

- (b) a condensed profit and loss account; and
- (c) explanatory notes on these accounts.

[Note: article 5(3) of the *TD*]

- (1) This *rule* applies to an *issuer* that is not required to prepare consolidated accounts.
- (2) In preparing the condensed balance sheet and the condensed profit and loss account an *issuer* must follow the same principles for recognising and measuring as when preparing annual financial reports.
- (3) The balance sheet and the profit and loss account must show each of the headings and subtotals included in the most recent annual financial statements of the *issuer*. Additional line items must be included if, as a result of their omission, the half-yearly financial statements would give a misleading view of the assets, liabilities, financial position and profit or loss of the *issuer*.

[Note: article 5(3) of the *TD*]

[Note: article 3(2) of the *TD implementing Directive*]

- (4) The half-yearly financial information must include comparative information presented as follows:
 - (a) balance sheet as at the end of the first six months of the current financial year and comparative balance sheet as at the end of the immediate preceding financial year; and
 - (b) profit and loss account for the first six months of the current financial year with, from two years after 20 January 2007, comparative information for the comparable period for the preceding financial year.

[Note: article 3(2) of the *TD implementing Directive*]

- (5) The explanatory notes must include the following:
 - (a) sufficient information to ensure the comparability of the condensed half-yearly financial statements with the annual financial statements; and
 - (b) sufficient information and explanations to ensure a users proper understanding of any material changes in amounts and of any developments in the half-year period concerned, which are reflected in the balance sheet and the profit and loss account.

[Note: article 3(3) of the *TD implementing Directive*]

4.2.6

R

The accounting policies and presentation applied to half-yearly figures must be consistent with those applied in the latest published annual accounts except where:

- (1) the accounting policies and presentation are to be changed in the subsequent annual financial statements, in which case the new accounting policies and presentation should be followed and the

changes and the reasons for the changes should be disclosed in the half-yearly report; or

- (2) the *FCA* otherwise agrees.

Content of interim management report

4.2.7

R

The interim management report must include at least:

- (1) an indication of important events that have occurred during the first six months of the financial year, and their impact on the condensed set of financial statements, and
- (2) a description of the principal risks and uncertainties for the remaining six months of the financial year.

[Note: article 5(4) of the *TD*]

4.2.8

R

- (1) In addition to the requirement set out in **DTR 4.2.7 R**, an *issuer* of *shares* must disclose in the interim management report the following information, as a minimum:

- (a) related parties transactions that have taken place in the first six months of the current financial year and that have materially affected the financial position or the performance of the enterprise during that period; and
- (b) any changes in the related parties transactions described in the last annual report that could have a material effect on the financial position or performance of the enterprise in the first six months of the current financial year.

- (2) If an *issuer* of *shares* is not required to prepare consolidated accounts, it must disclose, as a minimum, any transactions which have been entered into with related parties by the *issuer*, including the amount of such transactions, the nature of the related party relationship and other information about the transactions necessary for an understanding of the financial position of the *issuer*, if such transactions are material and have not been concluded under normal market conditions.

[Note: articles 2(3), 6(1)(j) and 17(1)(r) of the *Accounting Directive*]

- (3) In relation to transactions described in paragraph (2) information about such transactions may be aggregated according to their nature except where separate information is necessary for an understanding of the effects of related party transactions on the financial position of the *issuer*.

[Note: articles 2(3) and 17(1)(r) of the *Accounting Directive*]

Auditing of the condensed set of financial statements

4.2.9

R

- (1) If the half-yearly financial report has been audited or reviewed by auditors pursuant to the Financial Reporting Council guidance on Review of Interim Financial Information, the audit report or review report must be reproduced in full.

- (2) If the half-yearly financial report has not been audited or reviewed by auditors pursuant to the Financial Reporting Council guidance on Review of Interim Financial Information, an *issuer* must make a statement to this effect in its report.

[Note: article 5(5) of the *TD*]

Responsibility statements

- (1) Responsibility statements must be made by the *persons* responsible within the *issuer*.
- [Note: article 5(2)(c) of the *TD*]
- (2) The name and function of any *person* who makes a responsibility statement must be clearly indicated in the responsibility statement.
- [Note: article 5(2)(c) of the *TD*]
- (3) For each *person* making a responsibility statement, the statement must confirm that to the best of his or her knowledge:
- (a) the condensed set of financial statements, which has been prepared in accordance with the applicable set of accounting standards, gives a true and fair view of the assets, liabilities, financial position and profit or loss of the *issuer*, or the undertakings included in the consolidation as a whole as required by ■ DTR 4.2.4 R;
 - (b) the interim management report includes a fair review of the information required by ■ DTR 4.2.7 R; and
 - (c) the interim management report includes a fair review of the information required by ■ DTR 4.2.8 R, in the case of an *issuer* of *shares*.

[Note: article 5(2)(c) of the *TD*]

- (4) A *person* making a responsibility statement will satisfy the requirement in (3) (a) above to confirm that the condensed set of financial statements gives a true and fair view of the assets, liabilities, financial position and profit or loss of the *issuer* (or the undertakings included in the consolidation as a whole) by including a statement that the condensed set of financial statements have been prepared in accordance with:
- (a) IAS 34 as contained in *UK-adopted IFRS*; or
 - (b) for *UK issuers* not using *UK-adopted IFRS*, Financial Reporting Standard 104 : Interim Financial Reporting issued by the Financial Reporting Council; or
 - (c) for all other *issuers* not using *UK-adopted IFRS*, a national accounting standard relating to interim reporting,
- provided always that a *person* making such a statement has reasonable grounds to be satisfied that the condensed set of

financial statements prepared in accordance with such a standard is not misleading.

4.2.11

R

The *issuer* is responsible for all information drawn up and made public in accordance with this section.

4.3A Reports on payments to governments

Application

4.3A.1 **R** Subject to the exemptions set out in **■ DTR 4.4 (Exemptions)** this section applies to an *issuer*:

- (1) active in the extractive or logging of primary forest industries; and
- (2) whose *transferable securities* are admitted to trading.
- (3) [deleted]

4.3A.2 **R** In this section references to an “*issuer* active in the extractive or logging of primary forest industries” are to an *issuer* which is:

- (1) a mining or quarrying undertaking; or
- (2) a logging undertaking.

In this section “mining or quarrying undertaking”, “logging undertaking”, “payment” and “government” have the meanings given in regulation 2 of the Reports on Payments to Governments Regulations 2014 (SI 2014/3209).

4.3A.3 **G** An *issuer* is considered to be active in the extractive or logging of primary forest industries if any of its subsidiary undertakings are:

- (1) a mining or quarrying undertaking; or
- (2) a logging undertaking.

In this section “subsidiary undertaking” has the meaning given in regulation 2 of the Reports on Payments to Governments Regulations 2014 (SI 2014/3209).

[**Note:** article 44(1) of the *Accounting Directive*]

Preparation and publication of reports on payments to governments

4.3A.4 **R** An *issuer* must prepare a report annually on payments made to governments for each financial year.

[**Note:** article 6 of the *TD*]

4.3A.5 **R** The report on payments to governments must be made public at the latest six months after the end of each financial year.

[Note: article 6 of the *TD*]

4.3A.6 **R** An *issuer* must ensure that the report on payments to governments remains publicly available for at least ten years.

[Note: article 6 of the *TD*]

Content of reports on payments to governments

4.3A.7 **R** (1) [deleted]

(2) Payments to governments must be reported at consolidated level.

[Note: article 6 of the *TD*]

4.3A.7A **R**

- (1) The report on payments to governments must state the following information in relation to the relevant activities:
 - (a) the government to which each payment has been made, including the country of that government;
 - (b) the total amount of payments made to each government;
 - (c) the total amount per type of payment made to each government; and
 - (d) where those payments have been attributed to a specific project, the total amount per type of payment made for each such project and the total amount of payments for each such project.
- (2) If an *issuer* is required to prepare consolidated accounts, the relevant activities referred to in (1) are those of:
 - (a) the *issuer*; and
 - (b) any subsidiary undertaking of the *issuer*.
- (3) If an *issuer* is not required to prepare consolidated accounts, the relevant activities referred to in (1) are those of the *issuer*.
- (4) Where the *issuer*, or, where applicable, any of its subsidiary undertakings, makes a payment that is not attributable to a specific project, that payment may be disclosed in the report without splitting or disaggregating the payment to allocate it to a specific project.
- (5) A payment need not be taken into account in the report if:
 - (a) it is a single payment of an amount less than £86,000; or
 - (b) it forms part of a series of related payments within a financial year whose total amount is less than £86,000.
- (6) Payments, activities and projects may not be artificially split or aggregated to avoid the application of this section.

4.3A.7B

R

- (7) The disclosure of payments must reflect the substance, rather than the form, of each payment, relevant activity or project concerned.
 - (8) Where payments in kind are made to a government, the report must state the value of such payments in kind and, where applicable, the volume of those payments in kind, and the directors must provide supporting notes to explain how the value has been determined.
 - (9) In this rule “relevant activities”, “project” and “director” have the meanings given in regulation 2 of the Reports on Payments to Governments Regulations 2014 (SI 2014/3209)
- (1) Payments made by a subsidiary undertaking may be excluded from the report on payments to governments where:
 - (a) severe long-term restrictions substantially hinder the exercise of the rights of the *issuer* over the assets or management of that subsidiary undertaking;
 - (b) the information necessary for the preparation of the report cannot be obtained without disproportionate expense or undue delay; or
 - (c) the shares of that undertaking are held exclusively with a view to subsequent resale.
 - (2) The *issuer* may only exclude payments by a subsidiary undertaking under (1) (a) to (c) where the subsidiary undertaking is excluded from the consolidated group accounts on the same basis.

4.3A.8

G

The *FCA* considers a report on payments to governments which is prepared in accordance with the Reports on Payments to Governments Regulations 2014 (SI 2014/3209) to be in compliance with ■ DTR 4.3A.7AR and ■ 4.3A.7BR.

Responsibility

4.3A.9

R

The *issuer* is responsible for all information drawn up and made public in accordance with this section.

[Note: article 7 of the *TD*]

Filing of reports on payments to governments

4.3A.10

R

- (1) The *issuer* must file the report on payments to governments with the *FCA*.
- (2) The report in (1) must be filed by uploading it to the *national storage mechanism*.
- (3) A report filed under (2) must be in XML (extensible markup language) format and must use the XML data schema developed for the purposes of facilitating software filing to be used for the purpose of delivering a report on payments to governments dated 1 August 2016 and comprising:
 - (a) the Extractive Report Schema Definition;

- (b) the ISO Country Code Schema; and
- (c) the ISO Currency Codes.

The technical requirements in respect of the XML data schema are specified on the Primary Markets section of the *FCA's* website at <https://www.fca.org.uk/markets/primary-markets>.

4.4 Exemptions

Public sector issuers

4.4.1

R

The *rules* on annual financial reports (■ DTR 4.1) and half-yearly financial reports (■ DTR 4.2) do not apply to:

- (1) a state;
- (2) a regional or local authority of a state;
- (3) a public international body of which at least one state is a member;
- (4) the European Central Bank;
- (5) the European Financial Stability Facility (EFSF) established by the EFSF Framework Agreement and any other mechanism established with the objective of preserving the financial stability of European monetary union by providing temporary financial assistance to the *EEA States* whose currency is the euro; and
- (6) national central banks.

[Note: article 8(1)(a) of the *TD*]

Debt issuers

4.4.2

R

The *rules* on annual financial reports in ■ DTR 4.1 (including ■ DTR 4.1.7R (4) and half-yearly financial reports (■ DTR 4.2) do not apply to an *issuer* that issues exclusively *debt securities admitted to trading* the denomination per unit of which is at least 100,000 euros (or an equivalent amount).

[Note: article 8(1)(b) of the *TD* and article 45(1) of the *Audit Directive*]

4.4.3

R

The *rules* on half-yearly financial reports (■ DTR 4.2) do not apply to a *credit institution* whose *shares* are not *admitted to trading* and which has, in a continuous or repeated manner, only issued *debt securities* provided that:

- (1) the total nominal amount of all such *debt securities* remains below 100,000,000 Euros; and
- (2) the *credit institution* has not published a prospectus in accordance with the *Prospectus Regulation*.

[Note: article 8(2) of the *TD*]

- 4.4.4 **R** The rules on half-yearly financial reports do not apply to an *issuer* already existing on 31 December 2003 which exclusively issue *debt securities* unconditionally and irrevocably guaranteed by the *United Kingdom* or by a regional or local authority of *United Kingdom*, on a *regulated market*.
[Note: article 8(3) of the *TD*]
- 4.4.5 **R** The rules on half-yearly financial reports (■ DTR 4.2) do not apply to an *issuer* of *transferable securities* convertible into *shares*.
- 4.4.6 **R** Issuers of convertible securities
[deleted]
- 4.4.7 **R** Issuers of preference shares
[deleted]
- 4.4.8 **R** Issuers of depository receipts
The rules on half-yearly financial reports (■ DTR 4.2) do not apply to an *issuer* of depository receipts.
- 4.4.9 **G** Third countries – Equivalence
An *issuer* whose registered office is in a *third country* is exempted from the rules on:
- (1) annual financial reports in ■ DTR 4.1 (other than ■ DTR 4.1.7R (4) which continues to apply);
 - (2) half-yearly financial reports (■ DTR 4.2); and
 - (3) reports on payments to governments (■ DTR 4.3A);
- if the law of the *third country* in question lays down equivalent requirements or the *issuer* complies with requirements of the law of a *third country* that the *FCA* considers as equivalent.
- [Note: article 23(1) of the *TD*]
- 4.4.9 **G** The *FCA* maintains a published list of *third countries*, for the purpose of ■ DTR 4.4.8R, whose laws lay down requirements equivalent to those imposed upon *issuers* by this chapter, or where the requirements of the law of that *third country* are considered to be equivalent by the *FCA*. Such *issuers* remain subject to the following requirements of ■ DTR 6:
- (1) the filing of information with the *FCA*;
 - (2) the language provisions; and
 - (3) the dissemination of information provisions.

Specified disclosures

- (1) This Annex sets out the disclosures an *issuer* must mark up in its consolidated financial statements if they are present in those statements.
- (2) *Issuers* must mark up all numbers in a declared currency disclosed in the statement of financial position, the statement of profit or loss and other comprehensive income, the statement of changes in equity and the statement of cash flows in its consolidated financial statements.
- (3) Table 1 sets out the legend for the data type of a disclosure in Table 2.

Table 1	
Data/Attribute Type/Prefix	Definition
text block	denotes that the element type is a block of text; it is used to mark up larger pieces of information, such as notes, accounting policies or tables; text blocks are non-numeric line items
text	denotes that the element type is text (a sequence of alphanumeric characters); it is used to mark up short pieces of narrative information; text elements are non-numeric line items
X	denotes that the element type is monetary (a number in a declared currency); these elements are numeric line items
X.XX	denotes that the element type is a decimalised value (such as a percentage or a 'per share' value); these elements are numeric line items
duration	denotes that the monetary value represents a flow

- (4) Table 2 sets out disclosures made or cross-referenced in financial statements an *issuer* must mark up in its annual financial report for financial years beginning on or after 1 January 2022.

Table 2 – list of disclosures		
Label	Data type and other attributes	References to IFRSs
Name of reporting entity or other means of identification	text	IAS 1 51 a
Explanation of change in name of reporting entity or other means of identification from end of preceding reporting period	text	IAS 1 51 a

Disclosure Guidance and Transparency Rules sourcebook

Chapter 5

Vote Holder and Issuer Notification Rules

5.1 Notification of the acquisition or disposal of major shareholdings

5.1.1

R

In this chapter:

- (1) references to an "*issuer*", in relation to *shares* admitted to trading on a *regulated market*, are to an *issuer* whose *shares* are admitted to trading on a *regulated market*;
- (2) references to a "non-UK *issuer*" are to an *issuer* whose *shares* are admitted to trading on a *regulated market* other than:
 - (a) a public company within the meaning of section 4(2) of the Companies Act 2006; and
 - (b) a company which is otherwise incorporated in, and whose principal place of business is in, the *UK*;
- (3) references to "*shares*" are to *shares* which are:
 - (a) already issued and carry rights to vote which are exercisable in all circumstances at general meetings of the *issuer* including *shares* (such as preference *shares*) which, following the exercise of an option for their conversion, event of default or otherwise, have become fully enfranchised for voting purposes; and
 - (b) admitted to trading on a *regulated or prescribed market*;
- (4) an acquisition or disposal of *shares* is to be regarded as effective when the relevant transaction is executed unless the transaction provides for settlement to be subject to conditions which are beyond the control of the parties in which case the acquisition or disposal is to be regarded as effective on the settlement of the transaction; and
- (5) [deleted]
- (6) for the purposes of calculating whether any percentage threshold is reached, exceeded or fallen below and in any resulting notification, the proportion of voting rights held shall if necessary be rounded down to the next whole number.

5.1.2

R

A *person* must notify the *issuer* of the percentage of its voting rights he holds as *shareholder* or holds or is deemed to hold through his direct or indirect holding of financial instruments falling within ■ DTR 5.3.1R (1) (or a combination of such holdings) if the percentage of those voting rights:

- (1) reaches, exceeds or falls below 3%, 4%, 5%, 6%, 7%, 8%, 9%, 10% and each 1% threshold thereafter up to 100% (or in the case of a non-UK *issuer* on the basis of thresholds at 5%, 10%, 15%, 20%, 25%, 30%, 50% and 75%) as a result of an acquisition or disposal of *shares* or financial instruments falling within ■ DTR 5.3.1 R; or
- (2) reaches, exceeds or falls below an applicable threshold in (1) as a result of events changing the breakdown of voting rights and on the basis of information disclosed by the issuer in accordance with ■ DTR 5.6.1 Rand ■ DTR 5.6.1A R;

and in the case of an issuer which is not incorporated in the *United Kingdom* a notification under (2) must be made on the basis of equivalent events and disclosed information.

[Note: articles 9(1), 9(2), 13(1) and 13a(1) of the *TD*]

Certain voting rights to be disregarded

5.1.3

R

Voting rights attaching to the following *shares* are to be disregarded for the purposes of determining whether a *person* has a notification obligation in accordance with the thresholds in ■ DTR 5.1.2 R:

- (1) (a) *shares* acquired; or
 (b) *shares* underlying financial instruments within ■ DTR 5.3.1R(1) to the extent that such financial instruments are acquired;
 for the sole purpose of clearing and settlement within a settlement cycle not exceeding the period beginning with the transaction and ending at the close of the third *trading day* following the day of the execution of the transaction (irrespective of whether the transaction is conducted on-exchange);
- (2) (a) *shares* held; or
 (b) *shares* underlying financial instruments within ■ DTR 5.3.1R(1) to the extent that such financial instruments are held;
 by a custodian (or nominee) in its custodian (or nominee) capacity (whether operating from an establishment in the UK or elsewhere) provided such a *person* can only exercise the voting rights attached to such *shares* under instructions given in writing or by *electronic means*;
- (3) (a) *shares* held; or
 (b) *shares* underlying financial instruments within ■ DTR 5.3.1R(1) to the extent that such financial instruments are held;
 by a *market maker* acting in that capacity subject to the percentage of such *shares* not being equal to or in excess of 10% and subject to the *market maker* satisfying the criteria and complying with the conditions and operating requirements set out in ■ DTR 5.1.4 R;

- (4) (a) *shares* held; or
- (b) *shares* underlying financial instruments within ■ DTR 5.3.1R(1) to the extent that such financial instruments are held;
- by a *credit institution* or *investment firm* provided that:
- (i) the *shares*, or financial instruments, are held within the *trading book* of the *credit institution* or *investment firm*;
- (ii) the voting rights attached to such *shares* do not exceed 5%; and
- (iii) the voting rights attached to *shares* in, or related to financial instruments in, the *trading book* are not exercised or otherwise used to intervene in the management of the *issuer*.
- (5) *shares* held by a collateral taker under a collateral transaction which involves the outright transfer of *securities* provided the collateral taker does not declare any intention of exercising (and does not exercise) the voting rights attaching to such *shares*.
- (6) [deleted]
- (7) *shares* acquired for stabilisation purposes in accordance with the *Buy-back and Stabilisation Regulation*, if the voting rights attached to those *shares* are not exercised or otherwise used to intervene in the management of the *issuer*.

[Note: articles 9(4), 9(5), 9(6), 9(6a), 10(c) and 13(4) of the *TD*]

5.1.4

R

- (1) References to a *market maker* are to a *market maker* which:
- (a) (subject to (3) below) is authorised by the *FCA* or the *PRA* under the *United Kingdom* provisions which implemented *MiFID*;
- (b) does not intervene in the management of the *issuer* concerned; and
- (c) does not exert any influence on the *issuer* to buy such *shares* or back the *share* price.

[Note: articles 9(5) and 9(6) of the *TD*]

- (2) A *market maker* relying upon the exemption for *shares* or financial instruments within ■ DTR 5.3.1R(1) held by it in that capacity must notify the *FCA*, at the latest within the time limit provided for by ■ DTR 5.8.3 R, that it conducts or intends to conduct market making activities on a particular *issuer* (and shall equally make such a notification if it ceases such activity).

[Note: article 6(1) of the *TD implementing Directive*]

- (3) References to a *market maker* also include a *third country investment firm* and a *credit institution* when acting as a *market maker* and which, in relation to that activity, is subject to regulatory supervision under the laws of the *United Kingdom*.

Aggregation of holdings

5.1.4A

UK

The *TD Major Holdings Regulation* provides that:

Recital 2

The thresholds for the market making and trading book exemptions should be calculated by aggregating voting rights relating to shares with voting rights related to financial instruments (that is entitlements to acquire shares and financial instruments considered to be economically equivalent to shares) in order to ensure consistent application of the principle of aggregation of all holdings of financial instruments subject to notification requirements and to prevent a misleading representation of how many financial instruments related to an issuer are held by an entity benefiting from those exemptions.

Article 2

Aggregation of holdings

For the purpose of calculation of the thresholds referred to in [■ DTR 5.1.3R(3) and (4)], holdings under United Kingdom law corresponding to Articles 9, 10 and 13 of Directive 2004/109/EC shall be aggregated.

Aggregation of holdings in the case of a group

5.1.4B

UK

The *TD Major Holdings Regulation* provides that:

Recital 3

In order to provide an adequate level of transparency in the case of a group of companies, and to take into account the fact that, where a parent undertaking has control over its subsidiaries, it may influence their management, the thresholds should be calculated at group level. Therefore all holdings owned by a parent undertaking of a credit institution or investment firm and subsidiary companies should be disclosed when the total sum of the holdings reaches the notification threshold.

Article 3

Aggregation of holdings in the case of a group

For the purpose of calculation of the thresholds referred to in [■ DTR 5.1.3R(3) and (4)] in the case of a group of companies, holdings shall be aggregated at group level according to the principle laid down in [■ DTR 5.2.1R(e)].

Certain voting rights to be disregarded (except at 5% 10% and higher thresholds)

5.1.5

R

- (1) The following are to be disregarded for the purposes of determining whether a *person* has a notification obligation in accordance with the thresholds in ■ DTR 5.1.2 R except at the thresholds of 5% and 10% and above:
- (a) voting rights attaching to *shares* forming part of property belonging to another which that *person* lawfully manages under an agreement in, or evidenced in, writing;

- (b) voting rights attaching to *shares* which may be exercisable by a *person* in his capacity as the operator of:
 - (i) an *authorised unit trust scheme*;
 - (ia) an *authorised contractual scheme*;
 - (ii) a *recognised scheme*; or
 - (iii) a *UCITS scheme*;
 - (c) voting rights attaching to *shares* which may be exercisable by an *ICVC*.
 - (d) [deleted]
- (2) For the purposes of ■ DTR 5.1.5 R (1)(a), a *person* ("A") may lawfully manage *investments* belonging to another if:
- (a) A can manage those *investments* in accordance with a *Part 4A permission*;
 - (b) [deleted]
 - (c) A can, in accordance with section 327 of the *Act*, manage those *investments* without contravening the prohibition contained in section 19 of the *Act*;
 - (d) [deleted]
 - (e) A can lawfully manage those *investments* in a *third country* and would, if he were to manage those *investments* in the *UK*, require a *Part 4A permission*.

5.2 Acquisition or disposal of major proportions of voting rights

5.2.1

R

A *person* is an indirect holder of *shares* for the purpose of the applicable definition of *shareholder* to the extent that he is entitled to acquire, to dispose of, or to exercise voting rights in any of the following cases or a combination of them:

Case	
(a)	voting rights held by a third party with whom that <i>person</i> has concluded an agreement, which obliges them to adopt, by concerted exercise of the voting rights they hold, a lasting common policy towards the management of the <i>issuer</i> in question;
(b)	voting rights held by a third party under an agreement concluded with that <i>person</i> providing for the temporary transfer for consideration of the voting rights in question;
(c)	voting rights attaching to <i>shares</i> which are lodged as collateral with that <i>person</i> provided that <i>person</i> controls the voting rights and declares its intention of exercising them;
(d)	voting rights attaching to <i>shares</i> in which that <i>person</i> has the life interest;
(e)	voting rights which are held, or may be exercised within the meaning of points (a) to (d) or, in cases (f) and (h) by a <i>person</i> undertaking investment management, or by a <i>management company</i> , by an undertaking controlled by that <i>person</i> ;
(f)	voting rights attaching to <i>shares</i> deposited with that <i>person</i> which the person can exercise at its discretion in the absence of specific instructions from the <i>shareholders</i> ;
(g)	voting rights held by a third party in his own name on behalf of that <i>person</i> ;

Case	
(h)	voting rights which that <i>person</i> may exercise as a proxy where that <i>person</i> can exercise the voting rights at his discretion in the absence of specific instructions from the <i>shareholders</i> .

[Note: article 10 of the TD]

5.2.2

G

Cases (a) to (h) in ■ DTR 5.2.1 R identify situations where a *person* may be able to control the manner in which voting rights are exercised and where, (taking account of any aggregation with other holdings) a notification to the *issuer* may need to be made. In the *FCA*'s view:

- (1) Case (e) produces the result that it is always necessary for the *parent undertaking* of a *controlled undertaking* to aggregate its holding with any holding of the *controlled undertaking* (subject to the exemptions implicit in Case (e) and others in ■ DTR 5.4);
- (2) Case (f) includes a *person* carrying on investment management and which is also the custodian of *shares* to which voting rights are attached;
- (3) Case (g) does not result in a Unitholder in a *collective investment scheme* or other investment entity being treated as the holder of voting rights in the scheme property (provided always such persons do not have any entitlement to exercise, or control the exercise of, such voting rights); neither are such persons to be regarded as holding *shares* "indirectly";
- (4) Case (h), although referring to proxies, also describes and applies to a *person* undertaking investment management, and to a *management company*, and which is able effectively to determine the manner in which voting rights attached to *shares* under its control are exercised (for example through instructions given directly or indirectly to a nominee or independent custodian). Case (e) provides for the voting rights which are under the control of such a *person* to be aggregated with those of its *parent undertaking*.

5.2.3

G

A *person* falling within Cases (a) to (h) is an indirect holder of *shares* for the purpose of the definition of *shareholder*. These indirect holdings have to be aggregated, but also separately identified in a notification to the *issuer*. Apart from those identified in the Cases (a) to (h), the *FCA* does not expect any other significant category "indirect shareholder" to be identified. Cases (a) to (h) are also relevant in determining whether a *person* is an indirect holder of financial instruments within ■ DTR 5.3.1R(1)(a) which result in an entitlement to acquire *shares*.

5.2.4

R

■ DTR 5.1.2 R and case (c) of ■ DTR 5.2.1 R do not apply in respect of voting rights attaching to *shares* provided to or by the Bank of England in carrying out its functions as a monetary authority, including *shares* provided to or by the Bank of England under a pledge or repurchase of similar agreement for liquidity granted for monetary policy purposes or within a payments system provided:

- (1) this shall apply only for a short period following the provision of the *shares*; and
- (2) the voting rights attached to the shares during this period are not exercised.

[Note: article 11 of the *TD*.]

5.2.5

R

- (1) A *person* who is required to make a notification may, without affecting their responsibility, appoint another *person* to make the notification on his behalf.
- (2) Where two or more *persons* are required to make a notification such *persons* may, without affecting their responsibility, arrange for a single notification to be made.

[Note: article 8(3) of the *TD implementing Directive*.]

5.3

Notification of voting rights arising from the holding of certain financial instruments

- 5.3.1
- R
- (1) A *person* must make a notification in accordance with the applicable thresholds in ■ DTR 5.1.2R in respect of any financial instruments which they hold, directly or indirectly, which:

(a) on maturity give the holder, under a formal agreement, either the unconditional right to acquire or the discretion as to the holder's right to acquire, *shares* to which voting rights are attached, already issued, of an *issuer*; or

(b) are not included in (a) but which are referenced to *shares* referred to in (a) and with economic effect similar to that of the financial instruments referred to in (a), whether or not they confer a right to a physical settlement.

[Note: article 13(1) of the *TD*]

(2) [deleted]

(2A) [deleted]

(3) [deleted]

(4) [deleted]

(5) [deleted]
- 5.3.1A
- G
- [deleted]
- 5.3.2
- R
- For the purposes of ■ DTR 5.3.1 R (1)(a):

(1) [deleted]

(2) [deleted]

(3) a "formal agreement" means an agreement which is binding under applicable law.

[Note: article 2(1)(q) of the *TD*]

5.3.2A	G	<p>The FCA maintains a published indicative list of financial instruments that are subject to notification requirements according to ■ DTR 5.3.1R.</p> <p>[Note: article 13(1b) of the <i>TD</i>]</p>
5.3.2B	UK	<p>The <i>TD Major Holdings Regulation</i> provides that:</p> <p>Recital 8</p> <p>To decrease the number of meaningless notifications to the market, the trading book exemption should apply to financial instruments held by a natural person or legal entity fulfilling orders received from clients, responding to a client’s request to trade otherwise than on a proprietary basis or hedging positions arising out of such dealings.</p> <p>Article 6</p> <p>Client-serving transactions</p> <p>The exemption referred to in [■ DTR 5.1.3R(4)] shall apply to financial instruments held by a natural person or legal entity fulfilling orders received from clients, responding to a client’s request to trade otherwise than on a proprietary basis, or hedging positions arising out of such dealings.</p>
5.3.2C	G	<p>[deleted]</p> <p>[Note: article 13(4) of the <i>TD</i>]</p>
5.3.3	G	<p>(1) For the purposes of ■ DTR 5.3.1R (1)(a), financial instruments within ■ DTR 5.3.1R(1)(a) should be taken into account in the context of notifying major holdings, to the extent that such instruments give the holder an unconditional right to acquire the underlying shares or cash on maturity. Consequently, financial instruments financial instruments within ■ DTR 5.3.1R(1)(a) should not be considered to include instruments entitling the holder to receive shares depending on the price of the underlying share reaching a certain level at a certain moment in time. Nor should they be considered to cover those instruments that allow the instrument issuer or a third party to give shares or cash to the instrument holder on maturity.</p> <p>[Note: Recital 13 of the <i>TD implementing Directive</i>]</p> <p>(2) [deleted]</p>
5.3.3A	R	<p>The number of voting rights must be calculated by reference to the full notional amount of <i>shares</i> underlying the financial instrument except where the financial instrument provides exclusively for a cash settlement, in which case the number of voting rights must be calculated on a “delta-adjusted” basis, by multiplying the notional amount of underlying <i>shares</i> by the delta of the financial instrument. For this purpose, the holder must aggregate and notify all financial instruments relating to the same underlying <i>issuer</i>. Only long positions are to be taken into account for the calculation of voting rights. Long positions are not to be netted with short positions relating to the same underlying <i>issuer</i>.</p> <p>[Note: article 13(1a) of the <i>TD</i>]</p>

5.3.3B

UK

The *TD Major Holdings Regulation* provides that:

Recital 4

The disclosure regime for financial instruments that have a similar economic effect to shares should be clear. Requirements to provide exhaustive details of the structure of corporate ownership should be proportionate to the need for adequate transparency in major holdings, the administrative burdens those requirements place on holders of voting rights and the flexibility in the composition of a basket of shares or an index. Therefore, financial instruments referenced to a basket of shares or an index should only be aggregated with other holdings in the same issuer when the holding of voting rights through such instruments is significant or the financial instrument is not being used primarily for investment diversification purposes.

Recital 5

It would not be cost-efficient for an investor to build a position in an issuer through holding a financial instrument referenced to different baskets or indices. Therefore, holdings of voting rights through a financial instrument referenced to a series of baskets of shares or indices which are individually under the established thresholds should not be accumulated.

Article 4

Financial instruments referenced to a basket of shares or an index

1.Voting rights referred to in [■ DTR 5.3.3AR] in the case of a financial instrument referenced to a basket of shares or an index shall be calculated on the basis of the weight of the share in the basket of shares or index where any of the following conditions apply:

(a)the voting rights in a specific issuer held through financial instruments referenced to the basket or index represent 1% or more of voting rights attached to shares of that issuer;

(b)the shares in the basket or index represent 20% or more of the value of the securities in the basket or index.

2.Where a financial instrument is referenced to a series of baskets of shares or indices, the voting rights held through the individual baskets of shares or indices shall not be accumulated for the purpose of the thresholds set out in paragraph 1.

5.3.3C

UK

The *TD Major Holdings Regulation* provides that:

Recital 6

Financial instruments which provide exclusively for a cash settlement should be accounted for on a delta-adjusted basis, with cash position having delta 1 in the case of financial instruments having a linear, symmetric pay-off profile in line with the underlying share and using a generally accepted standard pricing model in the case of financial instruments which do not have a linear, symmetric pay-off profile in line with the underlying share.

Recital 7

In order to ensure that information about the total number of voting rights accessible to the investor is as accurate as possible, delta should be calculated daily taking into account the last closing price of the underlying share.

Article 5

Financial instruments providing exclusively for a cash settlement

DTR 5 : Vote Holder and Issuer Notification Rules

Section 5.3 : Notification of voting rights
arising from the holding of certain financial
instruments

5

1.The number of voting rights referred to in [■ DTR 5.3.3AR] relating to financial instruments which provide exclusively for a cash settlement, with a linear, symmetric pay-off profile with the underlying share shall be calculated on a delta-adjusted basis with cash position being equal to 1.

2.The number of voting rights relating to an exclusively cash-settled financial instrument without a linear, symmetric pay-off profile with the underlying share shall be calculated on a delta-adjusted basis, using a generally accepted standard pricing model.

3.A generally accepted standard pricing model shall be a model that is generally used in the finance industry for that financial instrument and that is sufficiently robust to take into account the elements that are relevant to the valuation of the instrument. The elements that are relevant to the valuation shall include at least all of the following:

- (a) interest rate;
- (b) dividend payments;
- (c) time to maturity;
- (d) volatility;
- (e) price of underlying share.

4.When determining delta the holder of the financial instrument shall ensure all of the following:

- (a) that the model used covers the complexity and risk of each financial instrument;
- (b) that the same model is used in a consistent manner for the calculation of the number of voting rights of a given financial instrument.

5.Information technology systems used to carry out the calculation of delta shall ensure consistent, accurate and timely reporting of voting rights.

6.The number of voting rights shall be calculated daily, taking into account the last closing price of the underlying share. The holder of the financial instrument shall notify the issuer when that holder reaches, exceeds or falls below the applicable thresholds provided for in [■ DTR 5.1.2R].

5.3.4

R

The holder of financial instruments within ■ DTR 5.3.1R(1)(a), and, to the extent relevant, financial instruments within ■ DTR 5.3.1R(1)(b), is required to aggregate and, if necessary, notify all such instruments as relate to the same underlying *issuer*.

[Note: article 13(1) of the TD]

5.3.5

R

A *person* making a notification in accordance with ■ DTR 5.1.2R must, if their holding includes financial instruments within ■ DTR 5.3.1R(1):

- (1) include a breakdown by type of financial instruments held in accordance with ■ DTR 5.3.1R(1)(a) and financial instruments held in accordance with ■ DTR 5.3.1R(1)(b); and
- (2) distinguish between the financial instruments which confer a right to:
 - (a) physical settlement; and
 - (b) cash settlement.

[Note: article 13(1) of the TD]

5.4 Aggregation of managed holdings

5

5.4.1

R

- (1) The *parent undertaking* of a *management company* shall not be required to aggregate its holdings with the holdings managed by the *management company* in accordance with the *United Kingdom* provisions which implemented the *UCITS Directive*, provided such *management company* exercises its voting rights independently from the *parent undertaking*.
- (2) But the requirements for the aggregation of holdings applies if the *parent undertaking*, or another *controlled undertaking* of the *parent undertaking*, has invested in holdings managed by such *management company* and the *management company* has no discretion to exercise the voting rights attached to such holdings and may only exercise such voting rights under direct or indirect instructions from the *parent* or another *controlled undertaking* of the *parent undertaking*.

[Note: articles 12(4) of the TD]

5.4.2

R

- (1) The *parent undertaking* of an *investment firm* authorised by the *FCA* or the *PRA* under the *United Kingdom* provisions which implemented *MiFID* shall not be required to aggregate its holdings with the holdings which such *investment firm* manages on a client-by-client basis within the meaning of Article 2(7) of the *MiFID Org Regulation*, provided that:
 - (a) the *investment firm* is authorised to provide such portfolio management;
 - (b) it may only exercise the voting rights attached to such *shares* under instructions given in writing or by *electronic means* or it ensures that individual portfolio management services are conducted independently of any other services under conditions equivalent to those provided for under the *UCITS Directive* by putting into place appropriate mechanisms; and
 - (c) the *investment firm* exercises its voting rights independently from the *parent undertaking*.
- (2) But the requirements for the aggregation of holdings applies if the *parent undertaking*, or another *controlled undertaking* of the *parent undertaking*, has invested in holdings managed by such *investment firm* and the *investment firm* has no discretion to exercise the voting rights attached to such holdings and may only exercise such voting

rights under direct or indirect instructions from the parent or another *controlled undertaking* of the *parent undertaking*.

[Note: article 12(5) of the TD]

5.4.3

R

For the purposes of the exemption to the aggregation of holdings provided in ■ DTR 5.4.1 R or ■ DTR 5.4.2 R, a *parent undertaking* of a *management company* or of an *investment firm* shall comply with the following conditions:

- (1) it must not interfere by giving direct or indirect instructions or in any other way in the exercise of the voting rights held by the *management company* or *investment firm*; and
- (2) that *management company* or *investment firm* must be free to exercise, independently of the *parent undertaking*, the voting rights attached to the assets it manages.

[Note: article 10(1) of the TD implementing Directive]

5.4.4

R

A *parent undertaking* which wishes to make use of the exemption in relation to *issuers* subject to this chapter whose *shares* are admitted to trading on a *regulated market* must without delay, notify the following to the FCA:

- (1) a list of the names of those *management companies*, *investment firms* or other entities, indicating the *competent authorities* that supervise them, but with no reference to the *issuers* concerned; and
- (2) a statement that, in the case of each such *management company* or *investment firm*, the *parent undertaking* complies with the conditions laid down in ■ DTR 5.4.3 R.

The *parent undertaking* shall update the list referred to in paragraph (1) on an ongoing basis.

[Note: article 10(2) of the TD implementing Directive]

5.4.5

R

Where the *parent undertaking* intends to benefit from the exemptions only in relation to the financial instruments referred to in ■ DTR 5.3.1R, it must notify to the FCA only the list referred to in paragraph (1) of ■ DTR 5.4.4 R.

[Note: article 10(3) of the TD implementing Directive and article 13 of the TD]

5.4.6

R

A *parent undertaking* of a *management company* or of an *investment firm* must in relation to *issuers* subject to this chapter whose *shares* are admitted to trading on a *regulated market* be able to demonstrate to the FCA on request that:

- (1) the organisational structures of the *parent undertaking* and the *management company* or *investment firm* are such that the voting rights are exercised independently of the *parent undertaking*;
- (2) the persons who decide how the voting rights are exercised act independently;

(3) if the *parent undertaking* is a client of its *management company* or *investment firm* or has a holding in the assets managed by the *management company* or *investment firm*, there is a clear written mandate for an arms-length customer relationship between the *parent undertaking* and the *management company* or *investment firm*.

The requirement in (1) shall imply as a minimum that the *parent undertaking* and the *management company* or *investment firm* must have established written policies and procedures reasonably designed to prevent the distribution of information between the *parent undertaking* and the *management company* or *investment firm* in relation to the exercise of voting rights.

[Note: article 10(4) of the *TD implementing Directive*]

5.4.7 **R** For the purposes of paragraph (1) of **DTR 5.4.3 R** direct instruction means any instruction given by the *parent undertaking*, or another *controlled undertaking* of the *parent undertaking*, specifying how the voting rights are to exercised by the *management company* or *investment firm* in particular cases.

5.4.8 **R** Indirect instruction means any general or particular instruction, regardless of the form, given by the *parent undertaking*, or another *controlled undertaking* of the *parent undertaking*, that limits the discretion of the *management company* or *investment firm* in relation to the exercise of voting rights in order to serve specific business interests of the *parent undertaking* or another *controlled undertaking* of the *parent undertaking*.

[Note: article 10(5) of the *TD implementing Directive*]

5.4.9 **R** Undertakings whose registered office is in a *third country* which would have required a *Part 4A permission* to carry on the *regulated activity* specified under article 51ZA of the *Regulated Activities Order* or with regard to portfolio management authorisation under paragraph 4 of Part 3 of Schedule 2 to the *Regulated Activities Order* if it had its registered office or, only in the case of an *investment firm*, its head office within the United Kingdom, shall be exempted from aggregating holdings with the holdings of its *parent undertaking* under this rule provided that they comply with equivalent conditions of independence as *management companies* or *investment firms*.

[Article 23(6) *TD*]

5.4.10 **R** A *third country* shall be deemed to set conditions of independence equivalent to those set out in this rule where under the law of that country , a *management company* or *investment firm* is required to meet the following conditions:

- (1) the *management company* or *investment firm* must be free in all situations to exercise, independently of its *parent undertaking*, the voting rights attached to the assets it manages;
- (2) the *management company* or *investment firm* must disregard the interests of the *parent undertaking* or of any other *controlled*

undertaking of the *parent undertaking* whenever conflicts of interest arise.

5.4.11

R

A *parent undertaking* of a *third country* undertaking must comply with the notification requirements in ■ DTR 5.4.4 R (1) and ■ DTR 5.4.5 R and in addition:

- (1) must make a statement that in respect of each *management company* or *investment firm* concerned, the *parent undertaking* complies with the conditions of independence set down in ■ DTR 5.4.10 R; and
- (2) must be able to demonstrate to the *FCA* on request that the requirements of ■ DTR 5.4.6 R are respected.

[Note: article 23 of the *TD implementing Directive*]

5

5.5 Acquisition or disposal by issuer of shares

- 5.5.1 R An *issuer* of *shares* must, if it acquires or disposes of its own *shares*, either itself or through a *person* acting in his own name but on the *issuer's* behalf, make public the percentage of voting rights attributable to those *shares* it holds as a result of the transaction as a whole, as soon as possible, but not later than four *trading days* following such acquisition or disposal where that percentage reaches, exceeds or falls below the thresholds of 5% or 10% of the voting rights.
- 5.5.1A R ■ DTR 5.5.1R does not apply to a third-country *issuer* that falls within ■ DTR 5.11.4R.
- 5.5.2 R The percentage shall be calculated on the basis of the total number of *shares* to which voting rights are attached.
[Note: article 14 of the *TD*].
- 5.5.3 G Additional requirements in relation to a *listed company* which purchases its own *equity shares* are contained in ■ UKLR 9.6.6R.

5.6 Disclosures by issuers

- 5.6.1** **R** An *issuer* must, at the end of each calendar month during which an increase or decrease has occurred, disclose to the public:
- (1) the total number of voting rights and capital in respect of each class of *share* which it issues.
[Note: article 15 of the *TD*]; and
 - (2) the total number of voting rights attaching to *shares* of the *issuer* which are held by it in treasury.
- 5.6.1A** **R**
- (1) Notwithstanding **■ DTR 5.6.1 R**, if a relevant increase or decrease in the total number of voting rights of the kind described in (2) occurs, an *issuer* must disclose to the public the information in **■ DTR 5.6.1R (1)** and (2) as soon as possible and in any event no later than the end of the *business day* following the *day* on which the increase or decrease occurs.
 - (2) For the purpose of (1), a relevant increase or decrease is any increase or decrease in the total number of voting rights produced when an *issuer* completes a transaction unless its effect on the total number of voting rights is immaterial when compared with the position before completion.
- 5.6.1B** **G** In relation to the obligation in **■ DTR 5.6.1A R**, it is for an *issuer* to assess whether the effect on the total number of voting rights is immaterial. In the *FCA's* view an increase or decrease of 1% or more is likely to be material, both to the *issuer* and to the public.
- 5.6.1C** **R** **■ DTR 5.6.1R** does not apply to a third-country *issuer* that falls within **■ DTR 5.11.4R**.
- 5.6.2** **G** The disclosure of the total number of voting rights should be in respect of each class of *share* which is admitted to trading on a *regulated or prescribed market*.
- 5.6.3** **R** Responsibility for all information drawn up and made public in accordance with **■ DTR 5.6.1 R** and **■ DTR 5.6.1AR** lies with the *issuer*.

5

5.7 Notification of combined holdings

- 5.7.1

R

A *person* making a notification in accordance with ■ DTR 5.1.2 R must do so by reference to each of the following:

 - (1) the aggregate of all voting rights which the *person* holds as *shareholder* and as the direct or indirect holder of financial instruments falling within ■ DTR 5.3.1R(1);
 - (2) the aggregate of all voting rights held as direct or indirect *shareholder* (disregarding for this purpose holdings of financial instruments); and
 - (3) the aggregate of all voting rights held as a result of direct and indirect holdings of financial instruments falling within ■ DTR 5.3.1R(1).
[Note: article 13a(1) of the TD]
 - (4) [deleted]
- 5.7.1A

R

Voting rights relating to financial instruments within ■ DTR 5.3.1R(1) that have already been notified in accordance with ■ DTR 5.1.2R must be notified again when the *person* has acquired the underlying *shares* and such acquisition results in the total number of voting rights attached to *shares* issued by the same *issuer* reaching or exceeding the thresholds laid down by ■ DTR 5.1.2R.
[Note: article 13a(2) of the TD]
- 5.7.2

G

The effect of ■ DTR 5.7.1 R is that a *person* may have to make a notification if the overall percentage level of his voting rights remains the same but there is a notifiable change in the percentage level of one or more of the categories of voting rights held.

5.8 Procedures for the notification and disclosure of major holdings

5.8.1

R

A notification given in accordance with ■ DTR 5.1.2 R shall include the following information:

- (1) the resulting situation in terms of voting rights;
- (2) the chain of *controlled undertakings* through which voting rights are effectively held, if applicable;
- (3) the date on which the threshold was reached or crossed; and
- (4) the identity of the *shareholder*, even if that *shareholder* is not entitled to exercise voting rights under the conditions laid down in ■ DTR 5.2.1 R and of the *person* entitled to exercise voting rights on behalf of that *shareholder*.

5.8.2

R

- (1) A notification required of voting rights arising from the holding of financial instruments must include the following information:
 - (a) the resulting situation in terms of voting rights;
 - (b) if applicable, the chain of *controlled undertakings* through which financial instruments are effectively held;
 - (c) the date on which the threshold was reached or crossed;
 - (d) for instruments with an exercise period, an indication of the date or time period where *shares* will or can be acquired, if applicable
 - (e) date of maturity or expiration of the instrument;
 - (f) identity of the holder; and
 - (g) name of the underlying *issuer*.
- (2) The notification must be made to the *issuer* of each of the underlying *shares* to which the financial instrument relates and, in the case of *shares* admitted to trading on a *regulated market*, to the *FCA*.
- (3) If a financial instrument relates to more than one underlying *share*, a separate notification shall be made to each *issuer* of the underlying *shares*.
- (4) [deleted]

[Note: articles 11(3), (4) and (5) of the TD implementing Directive]

5.8.3

R

The notification to the *issuer* shall be effected as soon as possible, but not later than four *trading days* in the case of a non-UK *issuer* and two *trading days* in all other cases, after the date on which the relevant *person*:

- (1) learns of the acquisition or disposal or of the possibility of exercising voting rights, or on which, having regard to the circumstances, should have learned of it, regardless of the date on which the acquisition, disposal or possibility of exercising voting rights takes effect; or
- (2) is informed about the event mentioned in ■ DTR 5.1.2 R (2).

And for the purposes of (1) above a *person* shall, in relation to a transaction to which he is a party or which he has instructed, be deemed to have knowledge of the acquisition, disposal or possibility to exercise voting rights no later than two trading days following the transaction in question and where a transaction is conditional upon the approval by public authorities of the transaction or on a future uncertain event the occurrence of which is outside the control of the parties to the agreement, the parties are deemed to have knowledge of the acquisition, disposal or possibility of exercising voting rights only when the relevant approvals are obtained or when the event happens.

[Note: articles 12(1), and 12(2) of the TD and article 9 of the TD implementing Directive]

5.8.4

R

- (1) The notification obligation following transactions of a kind mentioned in ■ DTR 5.2.1 R are individual obligations incumbent upon each direct *shareholder* or indirect *shareholder* mentioned in ■ DTR 5.2.1 R or both if the proportion of voting rights held by each party reaches, exceeds or falls below an applicable threshold.
- (2) In the circumstances in ■ DTR 5.2.1 R Case (h) if a *shareholder* gives the proxy in relation to one shareholder meeting, notification may be made by means of a single notification when the proxy is given provided it is made clear in the notification what the resulting situation in terms of voting rights will be when the proxy may no longer exercise the voting rights discretion.
- (3) If in the circumstances in ■ DTR 5.2.1 R Case (h) the proxy holder receives one or several proxies in relation to one *shareholder* meeting, notification may be made by means of a single notification on or after the deadline for receiving proxies provided that it is made clear in the notification what the resulting situation in terms if voting rights will be when the proxy may no longer exercise the voting rights at its discretion.
- (4) When the duty to make notification lies with more than one *person*, notification may be made by means of a single common notification but this does not release any of those persons from their responsibilities in relation to the notification.

[Note: article 8 of the TD implementing Directive]

5.8.5

G

It may be necessary for both the relevant *shareholder* and proxy holder to make a notification. For example, if a direct holder of shares has a notifiable holding of voting rights and gives a proxy in respect of those rights (such

that the recipient has discretion as to how the votes are cast) then for the purposes of ■ DTR 5.1.2 R this is a disposal of such rights giving rise to a notification obligation. The proxy holder may also have such an obligation by virtue of his holding under ■ DTR 5.2.1 R. Separate notifications will not however be necessary provided a single notification (whether made by the direct holder of the *shares* or by the proxy holder) makes clear what the situation will be when the proxy has expired. Where a proxy holder receives several proxies then one notification may be made in respect of the aggregated voting rights held by the proxy holder on or as soon as is reasonably practicable following the proxy deadline. Unless it discloses what the position will be in respect of each proxy after the proxies have expired, such a notification will not relieve any direct holder of the *shares* of its notification obligation (if there is a notifiable disposal). A proxy which confers only minor and residual discretions (such as to vote on an adjournment) will not result in the proxy holder (or *shareholder*) having a notification obligation.

5.8.6 **R** An undertaking is not required to make a notification if instead it is made by its *parent undertaking* or, where the *parent undertaking* is itself a *controlled undertaking*, by its own *parent undertaking*.

[Note: article 12(3) of the TD]

5.8.7 **R** Voting rights must be calculated on the basis of all the *shares* to which voting rights are attached even if the exercise of such rights is suspended and shall be given in respect of all *shares* to which voting rights are attached.

[Note: article 9(1) of the TD]

5.8.8 **R** The number of voting rights to be considered when calculating whether a threshold is reached, exceeded or fallen below is the number of voting rights in existence according to the *issuer's* most recent disclosure made in accordance with ■ DTR 5.6.1 R and ■ DTR 5.6.1A R but disregarding voting rights attached to any treasury *shares* held by the *issuer* (in accordance with the *issuer's* most recent disclosure of such holdings).

[[Note: article 9(2) of the TD and article 11(3) of the TD implementing Directive]

5.8.9 **G** [deleted]

5.8.10 **R** A notification in relation to *shares* admitted to trading on a *regulated market*, must be made using the form TR1 available in electronic format at the FCA's website at <http://www.fca.org.uk>.

5.8.11 **R** In determining whether a notification is required a *person's* net (direct or indirect) holding in a *share* (and of relevant financial instruments) may be assessed by reference to that *person's* holdings at a point in time up to midnight of the day for which the determination is made (taking account of acquisitions and disposals executed during that day).

DTR 5 : Vote Holder and Issuer Notification Rules

Section 5.8 : Procedures for the notification and disclosure of major holdings

5.8.12**R**

- (1) An *issuer* not falling within (2) must, in relation to *shares* admitted to trading on a *regulated market*, on receipt of a notification as soon as possible and in any event by not later than the end of the *trading day* following receipt of the notification make public all of the information contained in the notification.
- (2) A non-UK issuer and any other *issuers* whose *shares* are admitted to trading on a *prescribed* (but not a *regulated*) *market* must, on receipt of a notification, as soon as possible and in any event by not later than the end of the third *trading day* following receipt of the notification, make public all of the information contained in the notification.
- (3) ■ DTR 5.8.12R(2) does not apply to a third country *issuer* that falls within ■ DTR 5.11.4R.

[Note: article 12(6) of the TD]

5.9

Filing of information with competent authority

5.9.1

R

- (1) A *person* making a notification to an *issuer* to which this chapter applies must, if the notification relates to *shares* admitted to trading on a *regulated market*, at the same time file a copy of such notification with the *FCA*.
- (2) The information to be filed with the *FCA* must include a contact address of the *person* making the notification (but such details must be in a separate annex and not included on the form which is sent to the *issuer*).

[Note: article 19(3) of the *TD*]

5

5.10 Use of electronic means for notifications and filing

5.10.1 **R** Information filed with the *FCA* for the purposes of the chapter must be filed using *electronic means*.

5.11 Third country issuers

5.11.1 **R** An *issuer* whose registered office is in a *third country* will be treated as meeting equivalent requirements to those set out in ■ DTR 5.8.12 R (2) (*issuer* to make public notifications of major shareholdings by close of third day following receipt) provided that the period of time within which the notification of the major holdings is to be effected to the *issuer* and is to be made public by the *issuer* is in total equal to or shorter than seven *trading days*.

[Note: article 19 of the TD implementing Directive]

5.11.2 **R** An *issuer* whose registered office is in a *third country* will be treated as meeting equivalent requirements in respect of treasury *shares* to those set out in ■ DTR 5.5.1 R provided that:

- (1) if the *issuer* is only allowed to hold up a maximum of 5% of its own *shares* to which voting rights are attached, a notification requirement is triggered under the law of the *third country* whenever this the maximum threshold of 5% of the voting rights is reached or crossed;
- (2) if the *issuer* is allowed to hold up to maximum of between 5% and 10% of its own *shares* to which voting rights are attached, a notification requirement is triggered under the law of the *third country* whenever this maximum threshold and or the 5% threshold of the voting rights are reached or crossed;
- (3) if the *issuer* is allowed to hold more than 10% of its own *shares* to which voting rights are attached, a notification requirement is triggered under the law of the *third country* whenever the 5% or 10% thresholds of the voting rights are reached or crossed. Notification above the 10% threshold is not required for this purpose.

[Note: article 20 of the TD implementing Directive]

5.11.3 **R** An *issuer* whose registered office is in a *third country* will be treated as meeting equivalent requirements to those set out in ■ DTR 5.6.1 R (Disclosure by *issuers* of total voting rights) provided that the *issuer* is required under the law of the *third country* to disclose to the public the total number of voting rights and capital within 30 calendar days after an increase or decrease of such total number has occurred.

[Note: article 21 of the TD implementing Directive]

- 5.11.4 **R** An *issuer* whose registered office is in a *third country* is exempted from ■ DTR 5.5.1R, ■ DTR 5.6.1R and ■ DTR 5.8.12R(2) if:
- (1) the law of the *third country* in question lays down equivalent requirements; or
 - (2) the *issuer* complies with requirements of the law of a *third country* that the *FCA* considers as equivalent.

[Note: article 23(1) of the *TD*]

- 5.11.5 **G** The *FCA* maintains a published list of *third country*, for the purpose of ■ DTR 5.11.4R, whose laws lay down requirements equivalent to those imposed upon *issuers* by this chapter, or where the requirements of the law of that *third country* are considered to be equivalent by the *FCA*. Such *issuers* remain subject to the following requirements of ■ DTR 6:
- (1) the filing of information with the *FCA*;
 - (2) the language provisions; and
 - (3) the dissemination of information provisions.

- 5.11.6 **R** [deleted]

Disclosure Guidance and Transparency Rules sourcebook

Chapter 6

Continuing obligations and access to information

6.1

Information requirements for issuers of shares and debt securities

		Application
6.1.1	R	<p>(1) Subject to the exemptions set out in ■ DTR 6.1.16 R - ■ DTR 6.1.19 R this section applies in relation to an <i>issuer</i> whose <i>transferable securities</i> are <i>admitted to trading</i>.</p> <p>(2) References to <i>transferable securities</i>, <i>shares</i> and <i>debt securities</i> are to such instruments as are <i>admitted to trading</i>.</p>
6.1.2	R	Amendments to constitution [deleted]
6.1.3	R	Equality of treatment <p>(1) An <i>issuer</i> of <i>shares</i> must ensure equal treatment for all holders of <i>shares</i> who are in the same position. [Note: article 17(1) of the TD]</p> <p>(2) An <i>issuer</i> of <i>debt securities</i> must ensure that all holders of <i>debt securities</i> ranking <i>pari passu</i> are given equal treatment in respect of all the rights attaching to those <i>debt securities</i>. [Note: article 18(1) of the TD]</p>
6.1.4	R	Exercise of rights by holders An <i>issuer</i> of <i>shares</i> or <i>debt securities</i> must ensure that all the facilities and information necessary to enable holders of <i>shares</i> or <i>debt securities</i> to exercise their rights are available in the <i>United Kingdom</i> and that the integrity of data is preserved. [Note: articles 17(2) and 18(2) of the TD]

Exercise of rights by proxy

- 6.1.5 **R**
- (1) *Shareholders* and *debt securities* holders must not be prevented from exercising their rights by proxy, subject to the law of the country in which the *issuer* is incorporated. [Note: articles 17(2) and 18(2) of the TD]
 - (2) An *issuer* of shares or *debt securities* must make available a proxy form, on paper or, where applicable, by *electronic means* to each *person* entitled to vote at a meeting of shareholders or a meeting of *debt securities* holders. [Note: articles 17(2)(b) and 18(2)(b) of the TD]
 - (3) The proxy form must be made available either:
 - (a) together with the notice concerning the meeting; or
 - (b) after the announcement of the meeting.
[Note: articles 17(2)(b) and 18(2)(b) of the TD]

Appointment of a financial agent

- 6.1.6 **R**
- An *issuer* of shares or *debt securities* must designate, as its agent, a financial institution through which *shareholders* or *debt securities* holders may exercise their financial rights. [Note: articles 17(2)(c) and 18(2)(c) of the TD]

Electronic Communications

- 6.1.7 **G**
- An *issuer* of shares or *debt securities* may use *electronic means* to convey information to *shareholders* or *debt securities* holders. [Note: articles 17(3) and 18(4) of the TD]
- 6.1.8 **R**
- To use *electronic means* to convey information to holders, an *issuer* must comply with the following:
- (1) a decision to use electronic means to convey information to shareholders or debt securities holders must be taken in a general meeting;
 - (2) the use of *electronic means* must not depend upon the location of the seat or residence of:
 - (a) the *shareholder*; or
 - (b) *persons* referred to in rows (a) to (h) of the table set out in ■ DTR 5.2.1 R; or
 - (c) the *debt security* holder; or
 - (d) a proxy representing a *debt security* holder.
 - (3) identification arrangements must be put in place so that the *shareholders*, *debt security* holders or other *persons* entitled to exercise or to direct the exercise of voting rights are effectively informed;
 - (4) *shareholders*, *debt security* holders or *persons* referred to in rows (a) to (e) of the table set out in ■ DTR 5.2.1 R who are entitled to acquire, dispose of or exercise voting rights must be:

- (a) contacted in writing to request their consent for the use of *electronic means* for conveying information and if they do not object within a reasonable period of time, their consent can be considered to have been given; and

(b) able to request at any time in the future that information be conveyed in writing; and
- (5) any apportionment of the costs entailed in the conveyance of information by *electronic means* must be determined by the issuer in compliance with the principle of equal treatment set out in

■ DTR 6.1.3 R.

But paragraph (4) above does not apply in any case where schedule 5 to the Companies Act 2006 applies.

[Note: articles 17(3) and 18(4) of the TD]

Information about changes in rights attaching to securities

- 6.1.9

R

An *issuer* of *shares* must without delay disclose to the public any change in the rights attaching to its various classes of *shares*, including changes in the rights attaching to *derivative securities* issued by the *issuer* giving access to the *shares* of that *issuer*. [Note: article 16(1) of the TD]
- 6.1.10

R

An *issuer* of *securities* other than *shares* admitted to trading on a *regulated market* must disclose to the public without delay any changes in the rights of holders of *securities* other than *shares*, including changes in the terms and conditions of such *securities* which could indirectly affect those rights, resulting in particular from a change in loan terms or in interest rates.[Note article 16(2) of the TD]
- 6.1.11

R

[deleted]

Information about meetings, issue of new shares and payment of dividends share issuers

- 6.1.12

R

An *issuer* of *shares* must provide information to holders on:

(1) the place, time and agenda of meetings;

(2) the total number of *shares* and voting rights; and

(3) the rights of holders to participate in meetings. [Note: article 17(2)(a) of the TD]
- 6.1.13

R

An *issuer* of *shares* must publish notices or distribute circulars concerning the allocation and payment of dividends and the issue of new *shares*, including information on any arrangements for allotment, subscription, cancellation or conversion. [Note: article 17(2)(d) of the TD]

Information about meetings and payment of interest – debt security issuers

- 6.1.14** **R** An *issuer* of *debt securities* must publish notices or distribute circulars concerning:
- (1) the place, time and agenda of meetings of *debt securities* holders;
 - (2) the payment of interest;
 - (3) the exercise of any conversion, exchange, subscription or cancellation rights and repayment; and
 - (4) the rights of holders to exercise their rights in relation to paragraphs (1) – (3).

[Note: article 18(2)(a) of the TD]

- 6.1.15** **R** [deleted]

Third country exemption

- 6.1.16** **R** An *issuer* whose registered office is in a *third country* is exempted from ■ DTR 6.1.3 R to ■ DTR 6.1.15 R if:
- (1) the law of the *third country* in question lays down equivalent requirements; or
 - (2) the *issuer* complies with requirements of the law of a *third country* that the *FCA* considers as equivalent.

[Note: article 23(1) of the TD]

- 6.1.17** **G** The *FCA* maintains a published list of *third countries*, for the purpose of ■ DTR 6.1.16R, whose laws lay down requirements equivalent to those imposed upon *issuers* by this chapter, or where the requirements of the law of that *third country* are considered to be equivalent by the *FCA*. Such *issuers* remain subject to the following requirements of ■ DTR 6:
- (1) the filing of information with the *FCA*;
 - (2) the language provisions; and
 - (3) the dissemination of information provisions.

Regional and local authority exemption

- 6.1.18** **R** A regional or local authority with securities admitted to trading is not required to comply with the following:
- (1) ■ DTR 6.1.4 R to ■ DTR 6.1.8 R; and
 - (2) ■ DTR 6.1.14 R.

[Note: article 1(3) of the TD]

Exemption for issuers of convertible securities, preference shares and depository receipts

6.1.19

R

■ DTR 6.1.3 R to ■ DTR 6.1.8 R and ■ DTR 6.1.12 R to ■ DTR 6.1.14R do not apply to:

- (1) an *issuer of transferable securities convertible into shares*;
- (2) an *issuer of preference shares*; and
- (3) an *issuer of depository receipts*.

6.2 Filing information and use of language

Application

- 6.2.1
- R
- This section applies to:
- (1) an *issuer* whose *transferable securities* are admitted to trading; and

(2) a *person* who has requested, without the *issuer's* consent, the admission of its *transferable securities* to trading on a *regulated market*.

Filing of information with the FCA

- 6.2.2
- R
- An *issuer* or *person* that discloses *regulated information* must, at the same time, file that information with the *FCA*. [Note: article 19(1) of the TD]
- 6.2.2A
- R
- Where an *issuer* or *person* is required to file *regulated information* under ■ DTR 6.2.2R, the *issuer* or *person* must, at the same time, notify the following to the *FCA*:
- (1) the legal entity identifier (LEI) of the *issuer* concerned; and

(2) the classifications relevant to the *regulated information* using the classes and sub-classes in ■ DTR 6 Annex 1R.
- 6.2.2B
- R
- If more than one classification is relevant to the *regulated information*, the *issuer* or *person* must notify all relevant classes and sub-classes to the *FCA*.
- 6.2.3
- G
- An *issuer* or *person* that discloses regulated information may comply with ■ DTR 6.2.2 R by using a *primary information provider* to disseminate the information in accordance with ■ DTR 6.3.

Language

- 6.2.4
- R
- Regulated information must be disclosed in English.
[Note: article 20(1) of the TD]

6.3.3B	R	[deleted]
6.3.3C	G	[deleted]
6.3.4	R	<p><i>Regulated information</i> must be disseminated in a manner ensuring that it is capable of being disseminated to as wide a public as possible, and as close to simultaneously as possible in the <i>United Kingdom</i>.</p> <p>[Note: article 12(2) of the <i>TD implementing directive</i>]</p>

6.3.5

R

(1) Subject to (1A), an *issuer* or *person* must communicate *regulated information* to the media in unedited full text.

[Note: article 12(3) of the TD implementing directive]

(1A) An *issuer* or *person* who discloses *regulated information* is exempt from paragraph (1) if:

- (a) the *regulated information* in unedited full text has been filed with the FCA by uploading it to the *national storage mechanism*;
- (b) the *regulated information* has been communicated to the media; and
- (c) the communication contains a statement that the *regulated information* is available in unedited full text on the *national storage mechanism*.

(2) (a) [deleted]

(b) [deleted]

(3) Where (1A) applies, the announcement relating to the publication of the following *regulated information* must also include an indication of the website on which the relevant documents are available:

- (a) an annual financial report that is required by ■ DTR 4.1 to be made public;
- (b) a half-yearly financial report that is required by ■ DTR 4.2 to be made public; and
- (c) [deleted]
- (d) a report on payments to governments that is required by ■ DTR 4.3A to be made public.

[Note: article 12(3) of the TD implementing directive]

6.3.6

R

Regulated information must be communicated to the media in a manner which ensures the security of the communication, minimises the risk of data corruption and unauthorised access, and provides certainty as to the source of the *regulated information*. Security of receipt must be ensured by remedying as soon as possible any failure or disruption in the communication of *regulated information*. An *issuer* or *person* is not responsible for systemic errors or shortcomings at the media to which the *regulated information* has been communicated.**[Note: article 12(4) of the TD implementing directive]**

6.3.7

R

Regulated information must be communicated to a *RIS* in a way which:

- (1) makes clear that the information is *regulated information*;
- (2) identifies clearly:
 - (a) the *issuer* concerned;
 - (b) the subject matter of the *regulated information*; and

(c) the time and date of the communication of the *regulated information* by the *issuer* or the *person*.

[Note: article 12(5) of the *TD implementing directive*]

6.3.8

R

Upon request, an *issuer* or other *person* must be able to communicate to the *FCA*, in relation to any disclosure of *regulated information*:

- (1) the name of the *person* who communicated the *regulated information* to the *RIS*;
- (2) the security validation details;
- (3) the time and date on which the *regulated information* was communicated to the *RIS*;
- (4) the medium in which the *regulated information* was communicated; and
- (5) details of any embargo placed by the *issuer* on the *regulated information*, if applicable.

[Note: article 12(5) of the *TD implementing directive*]

6.3.9

R

An *issuer* or *person* must not charge investors any specific cost for providing *regulated information*. [Note: article 21(1) of the *TD*]

Disclosure of information in a third country

6.3.10

R

- (1) Information that is disclosed in a *third country* which may be of importance to the public in the *United Kingdom* must be disclosed in accordance with the provisions set out in ■ DTR 6.2 and ■ DTR 6.3.
- (2) Paragraph (1) applies additionally to information that is not *regulated information*.

[Note: article 23(3) of the *TD*]

Classes and sub-classes of regulated information

6

	Classification of regulated information	Description
1.	Periodic regulated information	
1.1	Annual financial and audit reports	all information disclosed under DTR 4.1
1.2	Half yearly financial reports and audit reports/limited reviews	all information disclosed under DTR 4.2
1.3	Payments to governments	all information disclosed under DTR 4.3A
2.	Ongoing regulated information	
2.1	[deleted]	[deleted]
2.2	Inside information	all information disclosed under article 17 or article 19 of the <i>Market Abuse Regulation</i>
2.3	Major shareholding notifications	all information disclosed under DTR 5.1.2R
2.4	Acquisition or disposal of the issuer's own shares	all information disclosed under DTR 5.5.1R
2.5	Total number of voting rights and capital	all information disclosed under DTR 5.6.1R
2.6	Changes in the rights attaching to the classes of shares or securities	all information disclosed under DTR 6.1.9R or DTR 6.1.10R
3.	Additional regulated information required to be disclosed under the laws of the United Kingdom	
3.1	Additional regulated information required to be disclosed under the laws of the United Kingdom	all information not falling within the sub-classes set out in points 1.1 to 1.3 and in points 2.1 to 2.6, but which the <i>issuer</i> , or any other <i>person</i> who has applied for the admission of securities to trading on a <i>regulated market</i> without the <i>issuer's</i> consent, has disclosed under <i>UKLR</i> or <i>DTR</i>

UK Listing Rules Sourcebook

Chapter 7

Equity shares (commercial companies): significant transactions and reverse takeovers

7.1 Preliminary

Application

7.1.1

R

This chapter applies to a *company* that has a *listing* of *equity shares* in the *equity shares (commercial companies)* category.

Purpose

7.1.2

G

- (1) The purpose of this chapter is to set out:
 - (a) the requirements for a *listed company* in relation to *significant transactions* and *reverse takeovers*; and
 - (b) certain other transactions where a *listed company* must comply with the requirements for *significant transactions*.
- (2) The requirements are intended to ensure that holders of *listed equity shares*:
 - (a) are notified of:
 - (i) *significant transactions*;
 - (ii) certain indemnities and similar arrangements;
 - (iii) certain issues by *major subsidiary undertakings*; and
 - (iv) *reverse takeovers*; and
 - (b) have the opportunity to vote on *reverse takeovers*.
- (3) The requirements are also intended to ensure that a *listed company* discloses detailed information concerning the transactions in (2)(a)(i) to (iv) on a timely basis, to support engagement between the *listed company* and its shareholders and to enhance market transparency.
- (4) The requirements complement but do not displace a *listed company's* wider obligations under articles 17 and 18 of the *Market Abuse Regulation* to manage and disclose *inside information*.

Meaning of 'significant transaction'

7.1.3

R

In *UKLR*, a transaction is classified as a *significant transaction* where any *percentage ratio* is 25% or more.

Meaning of 'reverse takeover'

7.1.4

R

- (1) In *UKLR*, a *reverse takeover* means a transaction consisting of an acquisition of a business, a *company* or assets:

**UKLR 7 : Equity shares
(commercial companies):
significant transactions and...**

- (a) where any *percentage ratio* is 100% or more; or
- (b) which in substance results in a fundamental change in the business or in a change in board or voting control of the *issuer*.

(2) Paragraph (1) applies whether such acquisition is effected:

- (a) by way of a direct acquisition by the *issuer* or a subsidiary;
- (b) by way of the *issuer* introducing a new *holding company* to its corporate structure and then carrying out the acquisition through the new *holding company*; or
- (c) in any other way.

7.1.5

G

For the purpose of ■ UKLR 7.1.4R(1)(b), the FCA considers that the following factors are indicators of a fundamental change:

- (1) the extent to which the transaction will change the strategic direction or nature of the *issuer's* business;
- (2) whether its business will be part of a different industry sector following the completion of the transaction; or
- (3) whether its business will deal with fundamentally different suppliers and end users.

7

Meaning of 'transaction'

7.1.6

R

In this chapter (except where specifically provided to the contrary) a reference to a transaction by a *listed company*:

- (1) includes:
 - (a) (subject to paragraph (2)(a) to (g)) all agreements (including amendments to agreements) entered into by the *listed company* or its *subsidiary undertakings*;
 - (b) the grant or acquisition of an *option* as if the *option* had been exercised, except that, if exercise is solely at the *listed company's* or *subsidiary undertaking's* discretion, the transaction will be classified on exercise and only the consideration (if any) for the *option* will be classified on the grant or acquisition; and
 - (c) joint venture arrangements; and
- (2) excludes:
 - (a) a transaction in the ordinary course of business;
 - (b) an issue of *securities*, or a transaction to raise finance, which does not involve the acquisition or disposal of any fixed asset of the *listed company* or of its *subsidiary undertakings*;
 - (c) any transaction between the *listed company* and its wholly owned *subsidiary undertaking* or between its wholly owned *subsidiary undertakings*;
 - (d) a *break fee arrangement*;

- (e) an indemnity or similar arrangement, except where the agreement or arrangement meets the conditions set out in ■ UKLR 7.4.1R(1);
- (f) an issue of *equity shares* by a *major subsidiary undertaking* of a *listed company*, except where the issue meets the conditions set out in ■ UKLR 7.4.4R; and
- (g) a transaction where the *listed company* purchases its own *equity shares*.

7.1.7

G

This chapter is intended to cover transactions that are outside the ordinary course of the *listed company's* business and may change a *security holder's* economic interest in the *company's* assets and liabilities (whether or not the change in the assets or liabilities is recognised on the *company's* balance sheet).

7

7.1.8

G

Meaning of ‘ordinary course of business’

(1) The assessment of whether a transaction is in the ordinary course of business under this chapter will depend on the specific circumstances of the *listed company*.

(2) Factors that may indicate whether a transaction is in the ordinary course of a *company's* business include:

(
a) the size and incidence of similar transactions which the *company* has entered into;

(b) the nature and size of the *company's* existing business and common factors within the industry sector in which it operates;

(c) the *company's* corporate strategy for its business, including in relation to growth and industry focus, as set out in the *company's* latest published *prospectus* or annual financial report;

(d) the existing accounting treatment (for a disposal) or planned accounting treatment (for an acquisition or new arrangement) by the *listed company*; and

(e) whether its shareholders could reasonably expect the *company* to enter into the transaction, taking into account:

(i) the factors in (a) to (d);

(ii) any further information that the *company* has already notified to a *RIS*;

(iii) the subject matter of the transaction;

(iv) the terms of the transaction;

(v) the anticipated impact on the *listed company*; and

(vi) the associated benefits and risks.

7.1.9

G

Transactions that are likely to be in the ordinary course of business include:

- (1) regular trading activities (if the *company* is a trading *company*);

**UKLR 7 : Equity shares
(commercial companies):
significant transactions and...**

- (2) ongoing commercial arrangements and purchases commonly undertaken as part of the existing business or within the industry sector in which the *company* operates;
- (3) capital expenditure to support and maintain the existing business and its infrastructure;
- (4) capital expenditure to add scale to the existing business in line with the *company's* business strategy as previously notified to a *RIS* (including, for example, within the latest published *prospectus* or annual financial report); or
- (5) in the case of a *listed property company*, where the accounting treatment of a *property* that is acquired or disposed of is such that:
 - (a) for an acquisition, the *property* will be classified as a current asset in the *company's* published accounts; or
 - (b) for a disposal, the *property* was classified as a current asset in the *company's* published accounts.

7.1.10

G

Transactions that are unlikely to be in the ordinary course of business include:

- (1) mergers with, or acquisitions of, other businesses (whether structured by way of a share or asset acquisition);
- (2) transactions that would lead to a substantial involvement in a business activity that did not previously form a significant part of the *listed company's* principal activities;
- (3) transactions that would lead to the *listed company* no longer having a substantial involvement in a business activity that forms a significant part of its principal activities; or
- (4) transactions which are entered into to alleviate financial difficulty.

7.1.11

R

For the purposes of ■ UKLR 7.1.6R(2)(a), a transaction in the ordinary course of business excludes a *reverse takeover*.

Sponsors

7.1.12

R

A *listed company* must appoint a *sponsor* where it proposes to make a request to the *FCA* to modify, waive or substitute the operation of ■ UKLR 7.

7.1.13

R

A *listed company* must appoint a *sponsor* where it proposes to make a request to the *FCA* for individual guidance in relation to the *listing rules*, the *disclosure requirements* or the *transparency rules* in connection with a matter referred to in ■ UKLR 7.

7.1.14

R

If a *listed company* is proposing to enter into a transaction which – due to its size or nature – could amount to a *reverse takeover*, it must obtain the guidance of a *sponsor* to assess the application of the *listing rules*, the *disclosure requirements* and the *transparency rules*.

7.2 Classifying transactions

Classifying transactions

- 7.2.1
- G
- A transaction is classified by assessing its size relative to that of the *listed company* proposing to make it. The comparison of size is made using the *percentage ratios* resulting from applying the *class test* calculations to a transaction. The *class tests* are set out in ■ UKLR 7 Annex 1 (and modified or added to for specialist companies under ■ UKLR 7.2.3R to ■ UKLR 7.2.8R).
- 7.2.2
- G
- The *class tests* set out in ■ UKLR 7 Annex 1 are applicable for the purposes of determining whether a transaction is a *significant transaction* or a *reverse takeover*.

Classification of transactions by listed property companies

- 7.2.3
- R
- UKLR 7 Annex 1 is modified as follows in relation to acquisitions or disposals of *property* by a *listed property company*:
- (1) for the purposes of paragraph 2R(1) (the gross assets test), the assets test is calculated by dividing the transaction consideration by the gross assets of the *listed property company* and paragraphs 2R(5) and 2R(6) do not apply;

(2) for the purposes of paragraph 2R(1) (the gross assets test), if the transaction is an acquisition of land to be developed, the assets test is calculated by dividing the transaction consideration and any financial commitments relating to the development by the gross assets of the *listed property company* and paragraphs 2R(5) and 2R(6) do not apply;

(3) for the purposes of paragraph 2R(2), the gross assets of a *listed property company* are, at the option of the *company*:

(a) the aggregate of the *company's* share capital and reserves (excluding minority interests);

(b) the book value of the *company's properties* (excluding those properties classified as current assets in the latest published annual report and accounts); or

(c) the published valuation of the *company's properties* (excluding those properties classified as current assets in the latest published annual report and accounts);

(4) paragraph 4R(1) (the consideration test) does not apply but instead the test in ■ UKLR 7.2.4R applies; and

**UKLR 7 : Equity shares
(commercial companies):
significant transactions and...**

7.2.4

R

(5) paragraph 6R(1) (the gross capital test) applies to disposals as well as acquisitions of *property*.

(1) In addition to the tests in ■ UKLR 7 Annex 1, if the transaction is an acquisition of *property* by a *listed property company* and any of the consideration is in the *equity shares* of that *company*, the *listed company* must determine the *percentage ratios* that result from the calculations under the test in (2).

(2) The share capital test is calculated by dividing the number of consideration *shares* to be issued by the number of *equity shares* in issue (excluding *treasury shares*).

7.2.5

R

(1) In addition to the tests in ■ UKLR 7 Annex 1, a *listed property company* must determine the *percentage ratios* that result from the calculation under the test in (2).

(2) The net annual rent test is calculated by dividing the *net annual rent* attributable to the assets the subject of the transaction by the *net annual rent* of the *listed company*.

(3) For the purposes of calculating the *net annual rent* test, except as otherwise stated in (4) to (7), figures used to classify *net annual rent* must be the figures shown in the latest published audited consolidated accounts or, if a *listed company* has, or will have, published a preliminary statement of later annual results at the time the terms of a transaction are agreed, the figures shown in that preliminary statement.

(4) (a) The figures of the *listed company* must be adjusted to take account of transactions completed during the period to which the figures referred to in (3) relate, and subsequent completed transactions where any *percentage ratio* was 5% or more at the time the terms of the relevant transaction were agreed.

(b) The figures of the *target company* or business must be adjusted to take account of transactions completed during the period to which the figures referred to in (3) relate, and subsequent completed transactions where any *percentage ratio* would have been 5% or more at the time the terms of the relevant transaction were agreed when classified against the target as a whole.

(5) Figures on which the auditors are unable to report without modification must be disregarded.

(6) The principles in (3) to (5) also apply (to the extent relevant) to calculating the *net annual rent* of the *target company* or business.

(7) The FCA may modify (5) in appropriate cases to permit figures to be taken into account.

Classification of transactions by listed mineral companies

- 7.2.6 **R** (1) In addition to the tests in **■ UKLR 7 Annex 1**, a *listed mineral company* undertaking a transaction involving significant *mineral resources* or rights to significant *mineral resources* must determine the *percentage ratios* that result from the calculations under the test in paragraph (2).
- (2) The reserves test is calculated by dividing the volume or amount of the *proven reserves* and *probable reserves* to be acquired or disposed of by the volume or amount of the aggregate *proven reserves* and *probable reserves* of the *mineral company* making the acquisition or disposal.

- 7.2.7 **G** If the *mineral resources* are not directly comparable, the *FCA* may modify **■ UKLR 7.2.6R(2)** to permit valuations to be used instead of amounts or volumes.

- 7.2.8 **R** When calculating the size of a transaction under **■ UKLR 7 Annex 1** and **■ UKLR 7.2.6R(2)**, account must be taken of any associated transactions or loans effected or intended to be effected, and any contingent liabilities or commitments.

Classifying joint ventures

- 7.2.9 **R** When classifying a joint venture under **■ UKLR 7**, a *listed company* must classify both sides to a joint venture, so that both the disposal into the joint venture and the acquisition of an interest in the joint venture are classified. The 2 sets of *class tests* must not be aggregated and the highest result from the *class tests* will determine the overall classification of the transaction.

- 7.2.10 **G** (1) It is common, when entering into a joint venture, for the partners to include exit provisions in the terms of the agreement. These typically give each partner a combination of rights and obligations to either sell their own holding or to acquire their partner's holding should certain triggering events occur.
- (2) If the *listed company* does not retain sole discretion over the event which requires them to either purchase the joint venture partner's stake or to sell their own, **■ UKLR 7.1.6R(1)(b)** requires this obligation to be classified at the time it is agreed as though it had been exercised at that time. Further, if the consideration to be paid is to be determined by reference to the future profitability of the joint venture or an independent valuation at the time of exercise, this consideration will be treated as being uncapped. If this is the case, the initial agreement will be classified in accordance with **■ UKLR 7 Annex 1 4R(3)** at the time it is entered into.
- (3) If the *listed company* does retain sole discretion over the triggering event, or if the *listed company* is making a choice to purchase or sell following an event which has been triggered by the joint venture partner, the purchase or sale must be classified when this discretion is exercised or when the choice to purchase or sell is made.

UKLR 7 : Equity shares (commercial companies): significant transactions and...

- (4) Where an *issuer* enters into a joint venture exit arrangement which takes the form of a put or call option and exercise of the option is solely at the discretion of the other party to the arrangement, the transaction should be classified at the time it is agreed as though the option had been exercised at that time.

Aggregating transactions – significant transactions

7.2.11

R

- (1) Subject to paragraph (2), transactions completed during the 12 months before the date of the latest transaction must be aggregated with that transaction for the purposes of classification as a *significant transaction* if:
- (a) they are entered into by the *company* with the same *person* or with *persons* connected with one another;
 - (b) they involve the acquisition or disposal of *securities* or an interest in one particular *company*; or
 - (c) together they lead to substantial involvement in a business activity which did not previously form a significant part of the *company's* principal activities.
- (2) Transactions completed during the 12-month period in (1) are not required to be aggregated with the latest transaction if they have previously been classified as a *significant transaction* (either individually or collectively).

7.2.12

R

If under ■ UKLR 7.2.11R any of the aggregated *percentage ratios* is 25% or more, the aggregated transactions will be classified as a *significant transaction*, in which case the *listed company* must comply with the requirements in ■ UKLR 7.3 (Significant transactions) in respect of the aggregated transactions, modified as follows:

- (1) Where the aggregated transactions involve the acquisition or disposal of *securities* or an interest in one particular *company*, the requirements in ■ UKLR 7.3 apply to the transactions as a whole.
- (2) If (1) does not apply, the requirements in ■ UKLR 7.3 apply:
 - (a) to each individual transaction that has been aggregated where any *percentage ratio* for the individual transaction is 5% or more; or
 - (b) if there are no such individual transactions, to the one that led to the relevant aggregated *percentage ratio* reaching or exceeding 25%.

7.2.13

G

- (1) The purpose of ■ UKLR 7.2.12R is to set out how the requirements in this chapter apply to transactions that are only treated as *significant transactions* on an aggregated basis.
- (2) ■ UKLR 7.2.12R(1) is intended to support a clearer and more succinct explanation of an acquisition or disposal in a particular *company* by allowing the relevant information to be provided in an aggregated way.

- (3) In other situations, ■ UKLR 7.2.12R(2) ensures that the disclosure requirements apply in a proportionate way so that, while the relevant information must be provided for each transaction, information is not generally required about transactions below a *de minimis* threshold.
- (4) ■ UKLR 7.3.1R(2)(a) requires any notification about a *significant transaction* to state why the transaction is notifiable under ■ UKLR 7. Where a notification relates to aggregated transactions, it should explain why the transactions have been aggregated, having regard to whether ■ UKLR 7.2.11R(1)(a), ■ (b)■ or ■ (c) applies.
- (5) ■ UKLR 7.3.13R sets out where the *listed company* must make a supplementary notification in relation to further transactions entered into after aggregated transactions have been classified as a *significant transaction*.

7.2.14 G The *FCA* may modify these *rules* to require the aggregation of transactions in circumstances other than those specified in ■ UKLR 7.2.11R.

Aggregating transactions – reverse takeovers

7.2.15 R (1) Subject to paragraph (2), transactions completed during the 12 months before the date of the latest transaction must be aggregated with that transaction for the purposes of classification as a *reverse takeover* if:

- (a) they are entered into by the *company* with the same *person* or with *persons* connected with one another;
- (b) they involve the acquisition or disposal of *securities* or an interest in one particular *company*; or
- (c) together they lead to substantial involvement in a business activity which did not previously form a significant part of the *company's* principal activities.

(2) Transactions completed during the 12-month period in (1) are not required to be aggregated with the latest transaction if they have previously been classified as a *reverse takeover* (either individually or collectively).

7.2.16 R If under ■ UKLR 7.2.15R the aggregation of transactions results in a *reverse takeover*, the *listed company* must comply with the requirements in ■ UKLR 7.5 (Reverse takeovers) in respect of the aggregated transactions as a whole but the requirement for shareholder approval applies only to the latest transaction.

7.2.17 G The *FCA* may modify these *rules* to require the aggregation of transactions in circumstances other than those specified in ■ UKLR 7.2.15R.

**UKLR 7 : Equity shares
(commercial companies):
significant transactions and...**

7.3 Significant transactions

Notification of significant transactions

7.3.1

R

- (1) A *listed company* must notify a *RIS* as soon as possible after the terms of a *significant transaction* are agreed.
- (2) The notification must:
 - (a) state why the transaction is notifiable under ■ UKLR 7;
 - (b) contain an overview of the transaction and the *company's* reasons for entering into it, which includes the information required by ■ UKLR 7 Annex 2 Part 1 (Information relating to the transaction); and
 - (c) include any further information the *company* considers relevant, having regard to the purpose of this chapter set out in ■ UKLR 7.1.2G.

7.3.2

R

- (1) A *listed company* must notify a *RIS* as soon as possible after:
 - (a) the terms of a *significant transaction* are agreed; and
 - (b) the information in (2) has been prepared or the *listed company* becomes, or ought reasonably to have become, aware of the information,
 and in any event by no later than the completion of the transaction.
- (2) The notification must include:
 - (a) for a disposal, the information required by ■ UKLR 7 Annex 2 Part 2 (Disposals – financial information); and
 - (b) for all transactions, the information required by ■ UKLR 7 Annex 2 Part 3 (Non-financial information).

7.3.3

R

- (1) A *listed company* must notify a *RIS* as soon as possible after the completion of the *significant transaction*.
- (2) The notification must state that:
 - (a) completion of the transaction has taken place; and
 - (b) except as disclosed, there has been no material change affecting any matter contained in a notification under ■ UKLR 7.3.1R or ■ UKLR 7.3.2R.

In (2)(b), 'material' has the meaning in ■ UKLR 7.3.14R.

7.3.4

R

- (1) Where a *listed company* includes details of estimated synergies or other quantified estimated financial benefits expected to arise from a *significant transaction* in a notification required by ■ UKLR 7.3.1R, ■ UKLR 7.3.2R or ■ UKLR 7.3.3R, the notification must include the information required by ■ UKLR 7 Annex 2 Part 4.1 (Synergy benefits).
- (2) Where a *listed company* includes financial information (including the information required by ■ UKLR 7 Annex 2 Part 2) in a notification required by ■ UKLR 7.3.1R, ■ UKLR 7.3.2R or ■ UKLR 7.3.3R, the notification must include the information required by ■ UKLR 7 Annex 2 Part 4.2 to ■ 4.4 (Sources of information).
- (3) Where a *listed company* includes pro forma financial information in a notification required by ■ UKLR 7.3.1R, ■ UKLR 7.3.2R or ■ UKLR 7.3.3R, the notification must include the information required by ■ UKLR 7 Annex 2 Part 4.5 (Pro forma financial information).

7.3.5

G

- (1) The purpose of ■ UKLR 7.3.1R to ■ UKLR 7.3.4R is to support engagement between the *listed company* and its shareholders and to enhance market transparency.
- (2) When complying with ■ UKLR 7.3.1R to ■ UKLR 7.3.4R, a *listed company* should consider the nature and circumstances of the relevant transaction and what information it is necessary to disclose to support shareholder engagement and market transparency.
- (3) For example, where a *listed company* has entered into the transaction to alleviate financial difficulty (including anticipated financial difficulty), the notification required by ■ UKLR 7.3.1R should describe the nature, urgency and severity of that financial difficulty. The notification may also contain information about financing arrangements connected to the transaction, and about what may happen if a proposed transaction does not complete.

Incorporation by reference

7.3.6

R

Information may be incorporated in a notification made by a *listed company* under ■ UKLR 7.3.2R by reference to relevant information contained in:

- (1) an approved *prospectus* or listing particulars of that *listed company*; or
- (2) any other published document of that *listed company* that has been filed with the FCA.

7.3.7

R

Where a notification made by a *listed company* under ■ UKLR 7.3.1R, ■ UKLR 7.3.2R or ■ UKLR 7.3.3R includes information in accordance with ■ UKLR 7.3.4R, that information may be incorporated in such notification by reference to relevant information contained in:

- (1) an approved *prospectus* or listing particulars of that *listed company*; or
- (2) any other published document of that *listed company* that has been filed with the FCA.

**UKLR 7 : Equity shares
(commercial companies):
significant transactions and...**

- 7.3.8** **R** Information incorporated by reference must be the latest available to the *listed company*.
- 7.3.9** **R** Information required by **■ UKLR 7.3.1R** and **■ UKLR 7.3.3R** must not be incorporated by reference to information contained in another document.
- 7.3.10** **R** When information is incorporated by reference, a cross-reference list must be provided in the notification to enable *security* holders to easily identify specific items of information. The cross-reference list must specify where the information can be accessed by *security* holders.

Omission of information

- 7.3.11** **G** The *FCA* may authorise the omission of information required by **■ UKLR 7.3.1R** to **■ UKLR 7.3.4R** if it considers that:
- (1) disclosure of that information would be:
 - (a) contrary to the public interest; or
 - (b) seriously detrimental to the *listed company*; and
 - (2) the omission would not be likely to mislead the public with regard to facts and circumstances that are essential for the assessment of the matter covered by the notification.

- 7.3.12** **R** A request to the *FCA* to authorise the omission of specific information in a particular case must:
- (1) be made in writing by the *listed company*;
 - (2) identify the specific information concerned and the specific reasons for the omission; and
 - (3) state why, in the *listed company's* opinion, one or more grounds in **■ UKLR 7.3.11G** apply.

Supplementary notification

- 7.3.13** **R**
- (1) A *listed company* must notify a *RIS* as soon as possible if, after the notification under **■ UKLR 7.3.1R** or **■ UKLR 7.3.2R** and before completion of the transaction:
 - (a) it becomes aware that there has been a material change affecting any matter contained in that earlier notification;
 - (b) it becomes aware that a material new matter has arisen which would have been required to be mentioned in that earlier notification if it had arisen at the time of the preparation of that notification;
 - (c) it has agreed a material change to the terms of the transaction; or
 - (d) it has agreed the terms of one or more further transactions that are of a type referred to in **■ UKLR 7.2.11R(1)(a)**, **■ (b)** or **■ (c)** and

7.3.14

R

In ■ UKLR 7.3.13R, 'material' means material for the purpose of making an informed assessment of the assets and liabilities, financial position, profits and losses and prospects of the *listed company* and the rights attaching to any *securities* forming part of the consideration. It includes:

- are material but are not a *significant transaction* in their own right (individually or together).
- (2) The supplementary notification in (1)(a), (b) or (c) must:
 - (a) give details of the change or new matter; and
 - (b) contain a statement that, except as disclosed:
 - (i) there has been no material change affecting any matter contained in the earlier notification; and
 - (ii) no other material new matter has arisen which would have been required to be mentioned in that earlier notification if it had arisen at the time of the preparation of that notification.
- (3) The supplementary notification in (1)(d) must include the information set out in ■ UKLR 7 Annex 2 Part 1 (Information relating to the transaction) in relation to the further transaction or transactions.
- (1) a change in the terms of the transaction that increases any of the *percentage ratios* by 10% or more; and
- (2) where the further transaction or transactions referred to in ■ UKLR 7.3.13R(1)(d) would, if they were aggregated with the transaction or aggregated transactions (as applicable), result in an increase of any of the *percentage ratios* by 10% or more.

(commercial companies):
significant transactions and...**

Page ID #:2356

Section 7.4 : Indemnities and major
subsidiary undertakings

7.4 Indemnities and major subsidiary undertakings

Indemnities and similar arrangements

7.4.1

R

- (1) Where a *listed company* proposes to enter into any agreement or arrangement with a party (other than a wholly owned *subsidiary undertaking* of the *listed company*):
 - (a) under which a *listed company* agrees to discharge any liabilities for costs, expenses, commissions or losses incurred by or on behalf of that party, whether or not on a contingent basis;
 - (b) which is exceptional; and
 - (c) under which the maximum liability is either unlimited, or is equal to or exceeds an amount equal to 25% of the average of the *listed company's* profits for the last 3 financial years (using the figures shown in the audited consolidated accounts or preliminary statement of later annual results published before the terms are agreed, with losses taken as nil profit and included in the average),

a *listed company* must notify a *RIS* as soon as possible after the terms of any agreement or arrangement have been agreed.
- (2) The notification under (1) must comply with the requirements in ■ UKLR 7.3 (Significant transactions) as applicable.
- (3) Paragraph (1) does not apply to a *break fee arrangement*.
- (4) In (1)(c), 'profits' means profits after deducting all charges except taxation.

7.4.2

G

For the purposes of ■ UKLR 7.4.1R(1)(b), the *FCA* considers that the following indemnities are not exceptional:

- (1) those customarily given in connection with sale and purchase agreements;
- (2) those customarily given to underwriters or placing agents in an underwriting or placing agreement;
- (3) those given to advisers against liabilities to third parties arising out of providing advisory services; and
- (4) any other indemnity that is specifically permitted to be given to a *director* or auditor under the Companies Act 2006.

7.4.3

G

If the calculation under ■ UKLR 7.4.1R(1)(c) produces an anomalous result, the FCA may disregard the calculation and modify that *rule* to substitute other relevant indicators of the size of the indemnity or other arrangement given – for example, 1% of market capitalisation.

Issues by major subsidiary undertakings

7.4.4

R

If:

- (1) a *major subsidiary undertaking* of a *listed company* issues *equity shares* for cash or in exchange for other *securities* or to reduce indebtedness;
- (2) the issue would dilute the *listed company's* percentage interest in the *major subsidiary undertaking*; and
- (3) the economic effect of the dilution is equivalent to a disposal of 25% or more of the aggregate of the gross assets or profits (after the deduction of all charges except taxation) of the *group*,

a *listed company* must notify a *RIS* as soon as possible after the terms of the issue have been agreed.

7.4.5

R

The notification required in ■ UKLR 7.4.4R must comply with the requirements set out in ■ UKLR 7.3 (Significant transactions) as applicable.

**UKLR 7 : Equity shares
(commercial companies):
significant transactions and...**

7.5 Reverse takeovers

Notification and shareholder approval

7.5.1

R

An *issuer* must, in relation to a *reverse takeover*:

- (1) comply with the requirements of ■ UKLR 7.3 other than ■ UKLR 7.3.2R for the *reverse takeover*;
- (2) send a *reverse takeover circular* to its shareholders and obtain their prior approval in a general meeting for the *reverse takeover*; and
- (3) ensure that any agreement effecting the *reverse takeover* is conditional on that approval being obtained.

7.5.2

G

■ UKLR 10 sets out requirements for the content and approval of *reverse takeover circulars*.

Material change to terms of a reverse takeover transaction

7.5.3

R

If, after obtaining shareholder approval but before the completion of a *reverse takeover*, there is a material change to the terms of the transaction, the *listed company* must comply again separately with ■ UKLR 7.5.1R in relation to the transaction.

7.5.4

G

The *FCA* would (among other things) generally consider an increase of 10% or more in the consideration payable to be a material change to the terms of the transaction.

Supplementary circular

7.5.5

R

- (1) If a *listed company* becomes aware of a matter described in (2) after the publication of a *reverse takeover circular*, but before the date of a general meeting, it must, as soon as practicable:
 - (a) advise the *FCA* of the matters of which it has become aware; and
 - (b) send a supplementary *circular* to holders of its *listed equity shares*, providing an explanation of the matters referred to in (2).
- (2) The matters referred to in (1) are:
 - (a) a material change affecting any matter the *listed company* is required to have disclosed in a *reverse takeover circular*; or

- (b) a material new matter which the *listed company* would have been required to disclose in the *reverse takeover circular* if it had arisen at the time of its publication.
- (3) The *listed company* must have regard to ■ UKLR 10.3.1R(3) when considering the materiality of any change or new matter under ■ UKLR 7.5.5R(2).

7.5.6 **G** ■ UKLR 10 applies in relation to a supplementary *circular*. It may be necessary to adjourn a convened shareholder meeting if a supplementary *circular* cannot be sent to holders of *listed equity shares* at least 7 days prior to the convened shareholder meeting as required by ■ UKLR 10.1.9R.

Cancellation of listing

7.5.7 **G** If an *issuer* is proposing to enter into a transaction classified as a *reverse takeover*, it should consider ■ UKLR 21.2.2G and ■ UKLR 21.2.5G.

7.5.8 **G** Where an *issuer* completes a *reverse takeover*, the *FCA* will seek to cancel the *listing* of an *issuer's equity shares* unless the *FCA* is satisfied that circumstances exist such that cancellation is not required. The *FCA* will have regard to ■ UKLR 21.2.1R and the individual circumstances of the case.

7.5.9 **R** Where the *issuer's listing* is cancelled following completion of a *reverse takeover*, the *issuer* must re-apply for the *listing* of the *shares*.

7.5.10 **R** A *sponsor* must contact the *FCA* on behalf of an *issuer* as early as possible:

- (1) before a *reverse takeover* which has been agreed or is in contemplation is announced; or
- (2) where details of the *reverse takeover* have leaked,

to discuss whether a cancellation of the *issuer's listing* is appropriate on completion of the *reverse takeover*.

7.5.11 **G** ■ UKLR 7.5.12G to ■ UKLR 7.5.15G set out circumstances in which the *FCA* will generally be satisfied that a cancellation is not required.

Acquisitions of targets within the same listing category: issuer maintaining its listing category

7.5.12 **G** Where:

- (1) an *issuer* acquires the *shares* of a *target*;
- (2) those *shares* are also *listed* in the *equity shares (commercial companies)* category; and
- (3) the *issuer* wishes to maintain its *listing* of *shares* in the *equity shares (commercial companies)* category,

**UKLR 7 : Equity shares
(commercial companies):
significant transactions and...**

the *FCA* will generally be satisfied that a cancellation is not required on completion of a *reverse takeover*.

Acquisitions of targets from different listing categories: issuer maintaining its listing category

7.5.13

G

Where an *issuer* acquires the *shares* of a *target* with a different *listing* category from its own and the *issuer* wishes to maintain its *listing* in the *equity shares (commercial companies)* category, the *FCA* will generally be satisfied that a cancellation is not required on completion of a *reverse takeover* if:

- (1) the *issuer* will continue to be eligible for the *equity shares (commercial companies)* category following completion of the transaction;
- (2) a *sponsor* provides an eligibility letter to the *FCA* setting out how the *issuer* as enlarged by the acquisition satisfies each *listing rule* requirement that is relevant to it being eligible for the *equity shares (commercial companies)* category not less than 20 *business days* prior to the announcement of the *reverse takeover*; and
- (3) the *issuer* makes an announcement or publishes a *circular* explaining:
 - (a) the background and reasons for the acquisition;
 - (b) any changes to the acquiring *issuer's* business that have been made or are proposed to be made in connection with the acquisition;
 - (c) the effect of the transaction on the acquiring *issuer's* obligations under the *listing rules*;
 - (d) how the acquiring *issuer* will continue to meet the relevant requirements for *listing*; and
 - (e) any other matter that the *FCA* may reasonably require.

Acquisitions of targets from different listing categories: issuer changing listing category

7.5.14

G

The *FCA* will generally be satisfied that a cancellation is not required on completion of a *reverse takeover* if:

- (1) the *target* is *listed* with a different *listing* category from that of the *issuer*;
- (2) the *issuer* wishes to transfer its *listing* to a different *listing* category in conjunction with the acquisition; and
- (3) the *issuer* as enlarged by the relevant acquisition complies with the relevant requirements of ■ UKLR 21.5 to transfer to a different *listing* category.

7.5.15

G

Where an *issuer* is applying ■ UKLR 21.5 in order to avoid a cancellation as contemplated by ■ UKLR 7.5.14G, the *FCA* will normally waive the requirement for shareholder approval under ■ UKLR 21.5.6R(3) where the *issuer* is obtaining separate shareholder approval for the acquisition.

The class tests

Class tests			
1	G		<p>This annex sets out the following <i>class tests</i>:</p> <p>(1) the gross assets test;</p> <p>(2) the consideration test; and</p> <p>(3) the gross capital test.</p>
The gross assets test			
2	R	(1)	The gross assets test is calculated by dividing the gross assets the subject of the transaction by the gross assets of the <i>listed company</i> .
		(2)	The 'gross assets of the <i>listed company</i> ' means the total non-current assets, plus the total current assets, of the <i>listed company</i> .
		(3)	For:
		(a)	an acquisition of an interest in an undertaking which will result in consolidation of the assets of that undertaking in the accounts of the <i>listed company</i> ; or
		(b)	a disposal of an interest in an undertaking which will result in the assets of that undertaking no longer being consolidated in the accounts of the <i>listed company</i> ,
			the 'gross assets the subject of the transaction' means the value of 100% of that undertaking's assets, irrespective of what interest is acquired or disposed of.
		(4)	For an acquisition or disposal of an interest in an undertaking which does not fall within (3), the 'gross assets the subject of the transaction' means:
		(a)	for an acquisition, the consideration together with liabilities assumed (if any); and

UKLR 7 : Equity shares (commercial companies): significant transactions and...

7

The gross assets test		
3	G	(b) for a disposal, the assets attributed to that interest in the <i>listed company's</i> accounts.
		(5) If there is an acquisition of assets other than an interest in an undertaking, the 'assets the subject of the transaction' means the consideration or, if greater, the book value of those assets as they will be included in the <i>listed company's</i> balance sheet.
		(6) If there is a disposal of assets other than an interest in an undertaking, the 'assets the subject of the transaction' means the book value of the assets in the <i>listed company's</i> balance sheet.
		The <i>FCA</i> may modify UKLR 7 Annex 1 2R to require, when calculating the assets the subject of the transaction, the inclusion of further amounts if contingent assets or arrangements referred to in UKLR 7.4.1R (Indemnities and similar arrangements) are involved.

The consideration test			
4	R	(1)	The consideration test is calculated by taking the consideration for the transaction as a percentage of the aggregate market value of all the ordinary shares (excluding <i>treasury shares</i>) of the <i>listed company</i> .
		(2)	For the purposes of (1):
		(a)	the consideration is the amount paid to the contracting party;
		(b)	if all or part of the consideration is in the form of <i>securities</i> to be traded on a market, the consideration attributable to those <i>securities</i> is the aggregate market value of those <i>securities</i> ; and
		(c)	if deferred consideration is or may be payable or receivable by the <i>listed company</i> in the future, the consideration is the maximum total consideration payable or receivable under the agreement.

The consideration test			
		(3)	If the total consideration is not subject to any maximum (and any of the other <i>class tests</i> indicate a <i>percentage ratio</i> of at least 5%), the transaction is to be treated as a <i>significant transaction</i> .
		(4)	For the purposes of (2)(b), the figures used to determine consideration consisting of:
		(a)	<i>securities</i> of a <i>class</i> already <i>listed</i> must be the aggregate market value of all those <i>securities</i> on the last <i>business day</i> before the announcement of the transaction; and
		(b)	a new <i>class</i> of <i>securities</i> for which an application for <i>listing</i> will be made must be the expected aggregate market value of all those <i>securities</i> .
		(5)	For the purposes of (1), the figure used to determine market capitalisation is the aggregate market value of all the ordinary <i>shares</i> (excluding <i>treasury shares</i>) of the <i>listed company</i> at the close of business on the last <i>business day</i> before the announcement of the transaction.
5	G	The <i>FCA</i> may modify UKLR 7 Annex 1 4R to require the inclusion of further amounts in the calculation of the consideration – for example, if the purchaser agrees to discharge any liabilities, including the repayment of inter-company or third-party debt, whether actual or contingent, as part of the terms of the transaction.	
The gross capital test			
6	R	(1)	The gross capital test is calculated by dividing the gross capital of the <i>company</i> or business being acquired by the gross capital of the <i>listed company</i> .
		(2)	The test in (1) is only to be applied for an acquisition of a <i>company</i> or business.
		(3)	For the purposes of (1), the ‘gross capital of the <i>company</i> or business being acquired’ means the aggregate of:
		(a)	the consideration (as calculated under UKLR 7 Annex 1 4R);

The gross capital test		
	(b)	if a <i>company</i> , any of its <i>shares</i> and <i>debt securities</i> which are not being acquired;
	(c)	all other liabilities (other than current liabilities) including for this purpose minority interests and deferred taxation; and
	(d)	any excess of current liabilities over current assets.
(4)	For the purposes of (1), the gross capital of the <i>listed company</i> means the aggregate of:	
	(a)	the market value of its <i>shares</i> (excluding <i>treasury shares</i>) and the issue amount of the <i>debt security</i> ;
	(b)	all other liabilities (other than current liabilities) including, for this purpose, minority interests and deferred taxation; and
	(c)	any excess of current liabilities over current assets.
(5)	For the purposes of (1):	
	(a)	figures used must be, for <i>shares</i> and <i>debt security</i> aggregated for the purposes of the gross capital <i>percentage ratio</i> , the aggregate market value of all those <i>shares</i> (or, if not available before the announcement of the transaction, their nominal value) and the issue amount of the <i>debt security</i> ; and

The gross capital test			
		(b)	for <i>shares</i> and <i>debt security</i> aggregated for the purposes of (3)(b), any <i>treasury shares</i> held by the <i>company</i> are not to be taken into account.
Figures used to classify assets			
7	R	(1)	For the purposes of calculating the tests in this annex, except as otherwise stated in (2) to (6), figures used to classify assets must be the figures shown in the latest published audited consolidated accounts or, if a <i>listed company</i> has, or will have, published a preliminary statement of later annual results at the time the terms of a transaction are agreed, the figures shown in that preliminary statement.
		(2)	If a balance sheet has subsequently been published in an interim statement, gross assets and gross capital should be taken from the balance sheet published in the interim statement.
		(3)	<div>(a) The figures of the <i>listed company</i> must be adjusted to take account of transactions completed during the period to which the figures referred to in (1) or (2) relate, and subsequent completed transactions where any <i>percentage ratio</i> was 5% or more at the time the terms of the relevant transaction were agreed.</div> <div>(b) The figures of the target company or business must be adjusted to take account of transactions completed during the period to which the figures referred to in (1) or (2) relate, and subsequent completed transactions where any</div>

Figures used to classify assets		
		<i>percentage ratio</i> was 5% or more at the time the terms of the relevant transaction were agreed.
	(4)	Figures on which the auditors are unable to report without modification must be disregarded.
	(5)	When applying the <i>percentage ratios</i> to an acquisition by a <i>company</i> whose assets consist wholly or predominantly of cash or short-dated <i>securities</i> , the cash and short-dated <i>securities</i> must be excluded in calculating its assets and market capitalisation.
	(6)	The principles in this paragraph also apply (to the extent relevant) to calculating the assets of the target company or business.
8	G	The <i>FCA</i> may modify UKLR 7 Annex 1 7R(4) in appropriate cases to permit figures to be taken into account.
Anomalous results		
9	G	If a calculation under any of the <i>class tests</i> produces an anomalous result or if a calculation is inappropriate to the activities of the <i>listed company</i> , the <i>FCA</i> may modify the relevant <i>rule</i> to substitute other relevant indicators of size, including industry-specific tests.
Adjustments to figures		
10	G	Where a <i>listed company</i> wishes to make adjustments to the figures used in calculating the class tests pursuant to UKLR 7 Annex 1 9G, it should discuss this with the <i>FCA</i> before the class tests crystallise.

Notification requirements

This annex sets out the information to be included in a notification required by ■ UKLR 7.3.1R, ■ UKLR 7.3.2R, ■ UKLR 7.3.3R and ■ UKLR 7.5.1R.

Part 1		Information relating to the transaction
1.1	R	<p>A notification required by UKLR 7.3.1R and UKLR 7.5.1R must include the following information:</p> <ol style="list-style-type: none"> (1) details of the transaction, including the name of the other party to the transaction; (2) an explanation of the reasons for entering into the transaction; (3) a description of the business carried on by, or using, the net assets the subject of the transaction; (4) the consideration, and how it is being satisfied (including the terms of any arrangements for deferred consideration); (5) the value of the gross assets the subject of the transaction; (6) the profits attributable to the assets the subject of the transaction; (7) the effect of the transaction on the <i>listed company</i>, including any benefits which are expected to accrue to the <i>company</i>, and any risks to the <i>company</i>, as a result of the transaction; (8) a statement of the effect of the transaction on the <i>group's</i> earnings and assets and liabilities; (9) details of any service contracts of proposed <i>directors</i> of the <i>listed company</i>;

Part 1		Information relating to the transaction
	(10)	details of any <i>break fee arrangements</i> ;
	(11)	for a disposal, the application of the sale proceeds;
	(12)	for a disposal, if <i>securities</i> are to form part of the consideration received, a statement as to whether the <i>securities</i> are to be sold or retained;
	(13)	details of key individuals important to the business or <i>company</i> the subject of the transaction;
	(14)	if the transaction is a joint venture, details of any exit arrangement;
	(15)	if the transaction is required to be aggregated under UKLR 7.2.11R, details of transactions completed during the relevant period; and
	(16)	a statement by the board that the transaction is, in the board's opinion, in the best interests of <i>security</i> holders as a whole.

Part 2		Disposals - financial information
2.1	R	A notification required by UKLR 7.3.2R must include the information in UKLR 7 Annex 2 2.2R where the transaction involves a disposal.
2.2	R	Where the transaction involves a disposal, the notification must include the following: <div> <div>(1)</div> <div>(a)</div> <div>when a <i>listed company</i> is disposing of an interest in a <i>target</i> which will result in the assets and liabilities which are the subject of the disposal no longer being consolidated: <div> <div>(i)</div> <div>(ii)</div> </div> </div> </div> <div> <div>the last annual consolidated balance sheet;</div> <div>the consolidated income statements for the last 2 years drawn up to at least the level of profit or loss for the period; and</div> </div>

Part 2		Disposals - financial information	
		(iii)	the consolidated balance sheet and consolidated income statement (drawn up to at least the level of profit or loss for the period) at the <i>issuer's</i> interim balance sheet date if the <i>issuer</i> has published interim financial statements since the publication of its last annual audited consolidated financial statements;
		(b)	the information in (1)(a) must be extracted without material adjustment from the consolidation schedules that underlie the <i>listed company's</i> audited consolidated accounts or, in the case of (1)(a)(iii), the interim financial information, and must be accompanied by a statement to this effect; and
		(c)	where a change of accounting policies has occurred during the period covered by the financial information required by (1)(a), the financial information must be presented on the basis of both the original and amended accounting policies for the year prior to that in which the new accounting policy is adopted unless the change did not require a restatement of the comparative;
	(2)		when a <i>listed company</i> is disposing of an interest in a <i>target</i> that has been accounted for as an investment, and the <i>target's securities</i> that are the subject of the transaction are admitted to an investment exchange that enables intra-day price formation:
		(a)	the amounts of the dividends or other distributions paid in the past 2 years; and
		(b)	the price per <i>security</i> and the imputed value of the entire holding being disposed of at the

Part 2		Disposals - financial information
		close of business at the following times:
		(i) on the last <i>business day</i> of each of the 6 months prior to the announcement of the transaction; and
		(ii) on the day prior to the announcement of the transaction;
	(3)	when a <i>listed company</i> is disposing of an interest in a <i>target</i> that was accounted for using the equity method in the <i>listed company's</i> annual consolidated accounts, the line entries relating to the <i>target</i> from its last audited consolidated balance sheet and those from its audited consolidated income statement for the past 2 years together with the equivalent line entries from its interim consolidated balance sheet and interim consolidated income statement, where the <i>issuer</i> has published subsequent interim financial information; and
	(4)	where the information in (2) or (3) is not available or cannot be produced in accordance with the requirements in (1)(a):
		(a) a statement by the board that the information is not available or cannot be produced;
		(b) an explanation as to how the value of the consideration has been arrived at; and
		(c) a statement by the board that it considers the consideration to be fair as far as the <i>security</i> holders of the <i>company</i> are concerned.
Part 3		Non-financial information
3.1	R	A notification required by UKLR 7.3.2R must include the information identified (by reference to certain paragraphs of Annex 1 of the <i>PR Regulation</i>) in the following table relating to the <i>listed company</i> and the undertaking the subject of the transaction.
Information	Listed company	Undertaking the subject of the transaction
Annex 1 item 17.1 – Related party transactions	*	

Information		Listed company	Undertaking the subject of the transaction
Annex 1 item 18.6.1 – Legal and arbitration proceedings	*		*
Annex 1 item 18.7.1 – Significant change in the issuer's financial position	*		*
Annex 1 item 20.1 – Material contracts	*		*
3.2	R	<p>The information required by Annex 1 item 20.1 (Material contracts) and Annex 1 item 18.6.1 (Legal and arbitration proceedings) must be presented as follows:</p> <p>(1) for an acquisition, in separate statements for the <i>listed company</i> for the undertaking, business or assets to be acquired; or</p> <p>(2) for a disposal, in separate statements for the <i>listed company</i> and its <i>subsidiary undertakings</i> (on the basis that the disposal has taken place), and for the undertaking, business or assets to be disposed of.</p>	
3.3	R	<p>In determining what information is required to be included by virtue of Annex 1 item 20.1 (Material contracts) if a <i>prospectus</i> or <i>listing particulars</i> are not required, regard should be had as to whether information about that provision is information which <i>securities</i> holders of the <i>issuer</i> would reasonably require for the purpose of making a properly informed assessment of the transaction and its impact on the <i>issuer</i>.</p>	
3.4	R	<p>The information required by Annex 1 item 17.1 (Related party transactions):</p> <p>(1) need only be given if it is relevant to the transaction; and</p> <p>(2) need not be given if it has already been published before the notification is made.</p>	
3.5	R	<p>(1) The information required by Annex 1 item 18.7.1 (Significant change in the issuer's financial position) need only be given for the undertaking which is the subject of the transaction if:</p> <p>(a) the transaction involves a disposal; and</p> <p>(b) information required by UKLR 7 Annex 2 2.2R(1) or 2.2R(3) has been included in the notification.</p> <p>(2) Where information required by Annex 1 item 18.7.1 (Significant change in the issuer's financial position) is given for both the <i>listed company</i> and the undertaking which is the subject of the trans-</p>	

action, the information must be presented in separate statements for the *listed company* and its *subsidiary undertakings* (on the basis that the disposal has taken place), and for the undertaking, business or assets to be disposed of.

Part 4 Synergy benefits, sources of information and pro forma financial information

Synergy benefits

- 4.1 R Where a *listed company* includes details of estimated synergies or other quantified estimated financial benefits expected to arise from a transaction in a notification required by UKLR 7.3.1R, UKLR 7.3.2R, UKLR 7.3.3R or UKLR 7.5.1R, the notification must include the following:
- (1) the basis for the belief that those synergies or other quantified estimated financial benefits will arise;
 - (2) an analysis and explanation of the constituent elements of the synergies or other quantified estimated financial benefits (including any costs) sufficient to enable the relative importance of those elements to be understood, including an indication of when they will be realised and whether they are expected to be recurring;
 - (3) a base figure for any comparison drawn;
 - (4) a statement that the synergies or other quantified estimated financial benefits are contingent on the transaction and could not be achieved independently; and
 - (5) a statement that the estimated synergies or other quantified estimated financial benefits reflect both the beneficial elements and relevant costs.

Sources of information

- 4.2 R Where a *listed company* includes financial information in a notification required by UKLR 7.3.1R, UKLR 7.3.2R, UKLR 7.3.3R or UKLR 7.5.1R, the notification must cite the source of all financial information that it discloses in the notification and include the following:
- (1) a statement of whether the financial information was extracted from accounts, internal financial accounting records, internal management accounting records, or an external or other source;
 - (2) a statement of whether financial information that was extracted from audited accounts was extracted without material adjustment; and
 - (3) an indication of which aspects of the financial information relate to:
 - (a) historical financial information;

Part 4		Synergy benefits, sources of information and pro forma financial information	
		(b)	forecast or estimated financial information; or
		(c)	pro forma financial information,
		with reference made to where the basis of presentation can be found.	
4.3	R	If financial information has not been extracted directly from audited accounts, the notification must include the following:	
		(1)	the basis and assumptions on which the financial information has been prepared; and
		(2)	a statement that the financial information is unaudited or not reported on by an accountant.
4.4	R	A <i>listed company</i> must provide investors with all necessary information to understand the context and relevance of non-statutory figures.	
		Pro forma financial information	
4.5	R	If a <i>listed company</i> includes pro forma financial information in a notification required by UKLR 7.3.1R, UKLR 7.3.2R, UKLR 7.3.3R or UKLR 7.5.1R, the notification must:	
		(1)	cite the sources of any unadjusted financial information that it discloses in the notification; and
		(2)	include an explanation of the basis upon which the pro forma financial information has been prepared.

UK Listing Rules Sourcebook

Chapter 8

Equity shares (commercial companies): related party transactions

8.1 Preliminary

Application

8.1.1 **R** This chapter applies to a company that has a *listing* of *equity shares* in the *equity shares (commercial companies)* category.

Purpose

8.1.2 **G** The purpose of this chapter is to set out governance and notification requirements for a *listed company* in relation to *related party transactions*. These requirements are intended to:

- (1) ensure that the shareholders of *companies* with *listed equity shares* are notified of *related party transactions* when they are entered into by the *listed company*, and support engagement between the *listed company* and its shareholders in relation to *related party transactions*; and
- (2) enhance market transparency in relation to *related party transactions*.

8.1.3 **G** These requirements are also intended to prevent a *related party* from taking advantage of its position and prevent any perception that it may have done so.

Sponsors

8.1.4 **G** A *listed company* that is proposing to enter into a *related party transaction* requiring the *listed company* to make a notification under **UKLR 8.2.1R(4)** must comply with the requirement to appoint a *sponsor* under **UKLR 8.2.1R(3)**.

8.1.5 **R** A *listed company* must appoint a *sponsor* where it proposes to make a request to the *FCA* to modify, waive or substitute the operation of **UKLR 8**.

8.1.6 **R** A *listed company* must appoint a *sponsor* where it proposes to make a request to the *FCA* for individual guidance in relation to the *listing rules*, the *disclosure requirements* or the *transparency rules* in connection with a *related party transaction*.

(commercial companies): related party transactions

Definition of 'related party transaction'

8.1.7

R

In UKLR, a *related party transaction* means:

- (1) a transaction (other than a transaction in the ordinary course of business) between a *listed company* and a *related party*;
- (2) an arrangement (other than an arrangement in the ordinary course of business) pursuant to which a *listed company* and a *related party* each invests in, or provides finance to, another undertaking or asset; or
- (3) any other similar transaction or arrangement (other than a transaction or arrangement in the ordinary course of business) between a *listed company* and any other *person*, the purpose and effect of which is to benefit a *related party*.

8.1.8

G

A *related party transaction* includes the variation or novation of an existing agreement between the *listed company* and a *related party*, regardless of whether the party was a *related party* at the time the original agreement was entered into.

Meaning of 'transaction' or 'arrangement'

8.1.9

R

A reference in this chapter:

- (1) to a transaction or arrangement by a *listed company* includes a transaction or arrangement by its *subsidiary undertaking*;
- (2) to a transaction or arrangement is, unless the contrary intention appears, a reference to the entering into of the agreement for the transaction or the entering into of the arrangement; and
- (3) to a transaction or arrangement includes a transaction or arrangement which amends or revises the terms of an existing transaction or arrangement.

Transactions to which this chapter does not apply

8.1.10

R

■ UKLR 8.2.1R to ■ UKLR 8.2.5R do not apply to a *related party transaction* if it is a transaction or arrangement:

- (1) of a kind referred to in paragraph 1 of ■ UKLR 8 Annex 1 (a transaction the terms of which were agreed before a person became a *related party*); or
- (2) of a kind referred to in paragraphs 2 to 8 of ■ UKLR 8 Annex 1 and does not have any unusual features.

Definition of 'related party'

8.1.11

R

In UKLR, a *related party* means:

- (1) a *person* who is (or was within the 12 months before the date of the transaction or arrangement) a *substantial shareholder*;

- (2) a *person* who is (or was within the 12 months before the date of the transaction or arrangement) a *director* or *shadow director* of:
 - (a) the *listed company*; or
 - (b) any other *company* which is one of the following (and, if that *person* has ceased to a *director* or *shadow director*, any other *company* which was one of the following while that *person* was a *director* or *shadow director* of such other *company*):
 - (i) a *subsidiary undertaking* of the *listed company*;
 - (ii) a *parent undertaking* of the *listed company*; or
 - (iii) a fellow *subsidiary undertaking* of a *parent undertaking* of the *listed company*;
- (3) a *person* exercising *significant influence*; or
- (4) an *associate* of a *related party* referred to in paragraph (1), (2) or (3).

Definition of 'substantial shareholder'

8.1.12

R

In UKLR, a *substantial shareholder* means any *person* who is entitled to exercise, or to control the exercise of, 20% or more of the votes able to be cast on all or substantially all matters at general meetings of:

- (1) the *company*; or
- (2) any *company* which is:
 - (a) a *subsidiary undertaking* of the *company*;
 - (b) a *parent undertaking* of the *company*; or
 - (c) a fellow *subsidiary undertaking* of a *parent undertaking* of the *company*.

8.1.13

G

For the purposes of determining votes that are able to be cast at general meetings of a *company*, voting rights attached to *shares* which are not *listed shares*, including *specified weighted voting rights shares*, should be taken into consideration.

8.1.14

R

For the purposes of calculating voting rights in **■ UKLR 8.1.12R**, the following voting rights are to be disregarded:

- (1) any voting rights which such a *person* exercises (or controls the exercise of) independently in its capacity as:
 - (a) bare trustee;
 - (b) investment manager;
 - (c) collective investment undertaking; or
 - (d) a *long-term insurer* in respect of its linked long-term business, if no *associate* of that *person* interferes by giving direct or indirect instructions, or in any other way, in the exercise of such voting rights (except to the extent any such *person* confers or collaborates with such an *associate* which also acts in its capacity

(commercial companies): related party transactions

as investment manager, collective investment undertaking or *long-term insurer*); or

(2) any voting rights:

(a) which a *person* may hold (or control the exercise of) solely in relation to the direct performance, by way of business, of:

(i) underwriting the issue or sale of *securities*;

(ii) placing *securities*, where the *person* provides a firm commitment to acquire any *securities* which it does not place; or

(iii) acquiring *securities* from existing shareholders or the *issuer* pursuant to an agreement to procure third-party purchases of *securities*; and

(b) where the conditions in (i) to (iv) are satisfied:

(i) the activities set out in (2)(a) are performed in the ordinary course of business;

(ii) the *securities* to which the voting rights attach are held for a consecutive period of 5 *trading days* or less, beginning with the first *trading day* on which the *securities* are held;

(iii) the voting rights are not exercised within the period in which the *securities* are held; and

(iv) no attempt is made directly or indirectly by the *firm* to intervene in or exert influence on (or attempt to intervene in or exert influence on) the management of the *issuer* within the period the *securities* are held.

Meaning of 'ordinary course of business'

8.1.15

G

(1) The assessment of whether a transaction is in the ordinary course of business under this chapter will depend on the specific circumstances of the *listed company*.

(2) Factors that may indicate whether a transaction is in the ordinary course of a *company's* business include:

(a) the size and incidence of similar transactions which the *company* has entered into;

(b) the nature and size of the *company's* existing business and common factors within the industry sector in which it operates;

(c) the *company's* corporate strategy for its business, including in relation to growth and industry focus, as set out in the *company's* latest published *prospectus* or annual financial report;

(d) the existing accounting treatment (for a disposal) or planned accounting treatment (for an acquisition or new arrangement) by the *listed company*; and

(e) whether its shareholders could reasonably expect the *company* to enter into the transaction, taking into account:

(i) the factors in (a) to (d);

(ii) any further information that the *company* has already notified to a *RIS*;

- (iii) the subject matter of the transaction;
- (iv) the terms of the transaction;
- (v) the anticipated impact on the *listed company*; and
- (vi) the associated benefits and risks.

8.1.16 G Transactions that are likely to be in the ordinary course of business include:

- (1) regular trading activities (if the *company* is a trading *company*);
- (2) ongoing commercial arrangements and purchases commonly undertaken as part of the existing business or within the industry sector in which the *company* operates;
- (3) capital expenditure to support and maintain the existing business and its infrastructure;
- (4) capital expenditure to add scale to the existing business in line with the *company's* business strategy as previously notified to a *RIS* (including, for example, within the latest published *prospectus* or annual financial report); or
- (5) in the case of a *listed property company*, where the accounting treatment of a *property* that is acquired or disposed is such that:
 - (a) for an acquisition, the *property* will be classified as a current asset in the *company's* published accounts; or
 - (b) for a disposal, the *property* was classified as a current asset in the *company's* published accounts.

8.1.17 G Transactions that are unlikely to be in the ordinary course of business include:

- (1) mergers with, or acquisitions of, other businesses (whether structured by way of a share or asset acquisition);
- (2) transactions that would lead to a substantial involvement in a business activity that did not previously form a significant part of the *listed company's* principal activities;
- (3) transactions that would lead to the *listed company* no longer having a substantial involvement in a business activity that forms a significant part of its principal activities; or
- (4) transactions which are entered into to alleviate financial difficulty.

8.1.18 R For the purposes of this chapter, a transaction in the ordinary course of business excludes a *reverse takeover*.

**(commercial companies): related
party transactions****Where a related party transaction is also a significant
transaction or other transaction under ■ UKLR 7**
.....

8.1.19

G

Where a *related party transaction* is also a *significant transaction* or is otherwise subject to ■ UKLR 7, the requirements and *guidance* under ■ UKLR 7 also apply, in addition to the requirements under this chapter.

UKLR 8 : Equity shares (commercial companies): related party transactions

Page ID #:2383

Section 8.2 : Requirements for related party
transactions

8

8.2 Requirements for related party transactions

General requirements for related party transactions

8.2.1

R

If a *listed company* enters into a *related party transaction* where any *percentage ratio* is 5% or more, the *listed company* must:

- (1) obtain the approval of its board for the transaction or arrangement before it is entered into;
- (2) ensure that any *director* who is, or an *associate* of whom is, the *related party*, or who is a *director* of the *related party*, does not take part in the board's consideration of the transaction or arrangement and does not vote on the relevant board resolution;
- (3) before entering into the transaction or arrangement, obtain written confirmation from a *sponsor* that the terms of the proposed transaction or arrangement with the *related party* are fair and reasonable as far as the *security* holders of the *listed company* are concerned; and
- (4) notify a *RIS* as soon as possible after the terms of the transaction or arrangement are agreed.

8.2.2

R

The notification must include:

- (1) details of the *related party transaction*, including:
 - (a) the name of the *related party*;
 - (b) the value of the consideration for the transaction or arrangement; and
 - (c) a description of the transaction or arrangement;
- (2) the fact that the transaction or arrangement is a *related party transaction* which fell within ■ UKLR 8.2.1R;
- (3) details of the nature and extent of the *related party's* interest in the transaction(s) or arrangement(s);
- (4) a statement by the board that the transaction or arrangement is fair and reasonable as far as the *security* holders of the *company* are concerned and that the *directors* have been so advised by a *sponsor*; and

(commercial companies): related party transactions

- (5) the name of the sponsor that provided the written confirmation in
■ UKLR 8.2.1R(3).

8.2.3 **R** The notification must also include any further information the *company* considers relevant, having regard to the purpose of this chapter set out in
■ UKLR 8.1.2G.

8.2.4 **G** ■ UKLR 8.2.2R(4) does not require the notification to include an explanation of the basis of preparation for the board's conclusion that the transaction is fair and reasonable, or an explanation of the *sponsor's* advice. The *FCA* does not expect the notification to include explanations of the basis of preparation, as this could be seen to limit the validity of the confirmation. Instead, a clean confirmation, tracking the wording used in ■ UKLR 8.2.2R(4), should be given.

8.2.5 **R** If, before the completion of a *related party transaction* referred to in
■ UKLR 8.2.1R that has been notified in accordance with this section, there is a material change to the terms of the transaction, the *listed company* must comply again separately with ■ UKLR 8.2.1R to ■ UKLR 8.2.3R in relation to the transaction.

8.2.6 **G** The *FCA* would (among other things) generally consider an increase of 10% or more in the consideration payable to be a material change to the terms of the transaction.

Aggregation of transactions in any 12-month period

- 8.2.7** **R**
- (1) Subject to (3), if a *listed company* enters into transactions or arrangements with the same *related party* (and any of its *associates*) in any 12-month period, the transactions or arrangements must be aggregated.
 - (2) If any *percentage ratio* is 5% or more for the aggregated transactions or arrangements, the *listed company*:
 - (a) must comply with ■ UKLR 8.2.1R, in respect of the latest transaction or arrangement; and
 - (b) the notification required by ■ UKLR 8.2.1R(4) must include:
 - (i) all of the information required by ■ UKLR 8.2.2R for the latest transaction or arrangement;
 - (ii) the information required in ■ UKLR 8.2.2R(1) to ■ (3) for the other aggregated transactions or arrangements; and
 - (iii) the information required by ■ UKLR 8.2.3R.
 - (3) Transactions or arrangements completed during the 12-month period in (1) are not required to be aggregated with the latest transaction or arrangement if they were previously classified as a *related party transaction* notifiable (individually or collectively) under ■ UKLR 8.2.1R or ■ UKLR 8.2.7R(2).

UKLR 8 : Equity shares (commercial companies): related party transactions

Page ID #:2385

Section 8.2 : Requirements for related party
transactions

Supplementary notification

8.2.8

R

- (1) A *listed company* must notify a *RIS* as soon as possible if, after the notification under ■ UKLR 8.2.1R(4), it becomes aware that:
 - (a) there has been a material change affecting any matter contained in that earlier notification (other than a material change to the terms of the transaction to which ■ UKLR 8.2.5R applies); or
 - (b) a material new matter has arisen which would have been required to be mentioned in that earlier notification if it had arisen at the time of the preparation of that notification.
- (2) The supplementary notification must:
 - (a) give details of the change or new matter; and
 - (b) contain a statement that, except as disclosed:
 - (i) there has been no material change affecting any matter contained in the earlier notification; and
 - (ii) no other material new matter has arisen which would have been required to be mentioned in that earlier notification if it had arisen at the time of the preparation of that notification.
- (3) In paragraphs (1) and (2), 'material' means material for the purpose of making an informed assessment of the assets and liabilities, financial position, profits and losses and prospects of the *listed company* and the rights attaching to any *securities* forming part of the consideration.

Sovereign controlling shareholders

8.2.9

R

In the case of a *related party* which is a *sovereign controlling shareholder* or an *associate* of a *sovereign controlling shareholder*, where:

- (1) a *listed company* is a *sovereign controlled commercial company* and:
 - (a) has a *sovereign controlling shareholder* which was a *controlling shareholder* on the first occasion on which the *company* made an application for the *admission* of *equity shares* to the *equity shares (commercial companies)* category;
 - (b) has made a notification in accordance with ■ UKLR 6.4.18R and ■ UKLR 6.4.19R; or
 - (c) made an announcement in accordance with ■ UKLR 21.5.6.R(2) and ■ UKLR 21.5.9R when it transferred the *listing* of its *equity shares* to the *equity shares (commercial companies)* category; and
- (2) the *sovereign controlling shareholder* is either:
 - (a) recognised by the government of the *UK* as a State; or
 - (b) the *UK*,

■ UKLR 8.2.1R(2) and ■ (3) and ■ UKLR 8.2.2R(4) and ■ (5) do not apply.

Transactions to which related party transaction rules do not apply

Transaction agreed before person became a related party	
1	<p>The <i>related party transaction</i> rules do not apply to a transaction the terms of which:</p> <ul style="list-style-type: none"> (1) were agreed at a time when no party to the transaction or <i>person</i> who was to receive the benefit of the transaction was a <i>related party</i>; and (2) have not been amended, or which required the exercise of discretion by the <i>listed company</i> under those terms, since the party or <i>person</i> became a <i>related party</i>. <p style="text-align: center;">Issue of new securities and sale of treasury shares</p>
2	<p>The <i>related party transaction</i> rules do not apply to a transaction that consists of:</p> <ul style="list-style-type: none"> (1) the take-up by a <i>related party</i> of new <i>securities</i> or <i>treasury shares</i> under its entitlement in a pre-emptive offering; or (2) an issue of new <i>securities</i> made under the exercise of conversion or subscription rights attaching to a listed class of <i>securities</i>. <p style="text-align: center;">Employees' share schemes and long-term incentive schemes</p>
3	<p>The <i>related party transaction</i> rules do not apply to:</p> <ul style="list-style-type: none"> (1) the receipt of any asset (including cash or <i>securities</i> of the <i>listed company</i> or any of its <i>subsidiary undertakings</i>) by a <i>director</i> of the <i>listed company</i>, its <i>parent undertaking</i> or any of its <i>subsidiary undertakings</i>; or (2) the grant of an option or other right to a <i>director</i> of the <i>listed company</i>, its <i>parent undertaking</i> or any of its <i>subsidiary undertakings</i> to acquire (whether or not for consideration) any asset (including cash or new or existing <i>securities</i> of the <i>listed company</i> or any of its <i>subsidiary undertakings</i>); or (3) the provision of a gift or loan to the trustees of an employee benefit trust to finance the provision of assets as referred to in (1) or (2), <p>in accordance with the terms of an <i>employees' share scheme</i> or a <i>long-term incentive scheme</i>.</p> <p style="text-align: center;">Credit</p>
4	<p>The <i>related party transaction</i> rules do not apply to a grant of credit (including the lending of money or the guaranteeing of a loan):</p> <ul style="list-style-type: none"> (1) to the <i>related party</i> on normal commercial terms; (2) to a <i>director</i> for an amount and on terms no more favourable than those offered to employees of the group generally; or (3) by the <i>related party</i> on normal commercial terms and on an unsecured basis. <p style="text-align: center;">Directors' indemnities and loans</p>
5	<ul style="list-style-type: none"> (1) The <i>related party transaction</i> rules do not apply to a transaction that consists of:

Transaction agreed before person became a related party

- (a) granting an indemnity to a *director* of the *listed company* (or any of its *subsidiary undertakings*) if the terms of the indemnity are in accordance with those specifically permitted to be given to a *director* under the Companies Act 2006;
- (b) maintaining a contract of insurance if the insurance is in accordance with that specifically permitted to be maintained for a *director* under the Companies Act 2006 (whether for a *director* of the *listed company* or for a *director* of any of its *subsidiary undertakings*); or
- (c) a loan or assistance to a *director* by a *listed company* or any of its *subsidiary undertakings* if the terms of the loan or assistance are in accordance with those specifically permitted to be given to a *director* under sections 204, 205 or 206 of the Companies Act 2006.

- (2) Paragraph (1) applies to a *listed company* that is not subject to the Companies Act 2006 if the terms of the indemnity or contract of insurance are in accordance with those that would be specifically permitted under that Act (if it applied).

Underwriting

- 6 (1) The *related party transaction* rules do not apply to the underwriting by a *related party* of all or part of an issue of *securities* by the *listed company* (or any of its *subsidiary undertakings*) if the consideration to be paid by the *listed company* (or any of its *subsidiary undertakings*) for the underwriting:
 - (a) is no more than the usual commercial underwriting consideration; and
 - (b) is the same as that to be paid to the other underwriters (if any).
- (2) Paragraph (1) does not apply to the extent that a *related party* is underwriting *securities* which it is entitled to take up under an issue of *securities*.

Joint investment arrangements

- 7 The *related party transaction* rules do not apply to an arrangement where a *listed company*, or any of its *subsidiary undertakings*, and a *related party* each invests in, or provides finance to, another undertaking or asset if the following conditions are satisfied:
 - (1) the amount invested, or provided, by the *related party* is not more than 25% of the amount invested, or provided, by the *listed company* or its *subsidiary undertaking* (as the case may be); and
 - (2) the terms and circumstances of the investment or provision of finance by the *listed company* or its *subsidiary undertakings* (as the case may be) are no less favourable than those applying to the investment or provision of finance by the *related party*.

Insignificant subsidiary undertaking

- 8 (1) The *related party transaction* rules do not apply to a transaction or arrangement where each of the conditions in paragraphs (2) to (6) (as far as applicable) is satisfied.
- (2) The party to the transaction or arrangement is only a *related party* because:

Transaction agreed before person became a related party		
	(a)	it is (or was within the 12 months before the date of the transaction or arrangement) a <i>substantial shareholder</i> or its <i>associate</i> ; or
	(b)	it is a <i>person</i> who is (or was within the 12 months before the date of the transaction or arrangement) a <i>director</i> or <i>shadow director</i> or their <i>associate</i> , of a <i>subsidiary undertaking</i> or <i>subsidiary undertakings</i> of the <i>listed company</i> that has, or if there is more than one <i>subsidiary undertaking</i> that have in aggregate, contributed less than 10% of the profits of, and represented less than 10% of the assets of, the <i>listed company</i> for the relevant period.
(3)	The <i>subsidiary undertaking</i> or each of the <i>subsidiary undertakings</i> (as the case may be) have been in the <i>listed company's group</i> for 1 full financial year or more.	
(4)	In paragraph (2), 'relevant period' means:	
	(a)	if the <i>subsidiary undertaking</i> or each of the <i>subsidiary undertakings</i> (as the case may be) has been consolidated in the <i>listed company's group</i> for 1 full financial year or more but less than 3 full financial years, each of the full financial years before the date of the transaction or arrangement for which accounts have been published; and
	(b)	if the <i>subsidiary undertaking</i> or any of the <i>subsidiary undertakings</i> (as the case may be) has been consolidated in the <i>listed company's group</i> for 3 full financial years or more, each of the 3 full financial years before the date of the transaction or arrangement for which accounts have been published.
(5)	If the <i>subsidiary undertaking</i> or any of the <i>subsidiary undertakings</i> (as the case may be) are themselves party to the transaction or arrangement or if <i>securities</i> in the <i>subsidiary undertaking</i> or any of the <i>subsidiary undertakings</i> or their assets are the subject of the transaction or arrangement, then the ratio of consideration to market capitalisation of the <i>listed company</i> is less than 10%.	
(6)	In this <i>rule</i> , the figures to be used to calculate assets and consideration to market capitalisation are the same as those used to classify assets and consideration to market capitalisation in UKLR 7 Annex 1 (as modified or added to by UKLR 7.2.3R to UKLR 7.2.8R where applicable).	
(7)	(a)	In this <i>rule</i> , for the purposes of calculating profit, except as otherwise stated in paragraphs (b) to (e), figures used to classify profit must be the figures shown in the latest published audited consolidated accounts or, if a <i>listed company</i> has, or will have, published a preliminary statement of later annual results at the time the terms of a transaction are agreed, the figures shown in that preliminary statement.
	(b)	The figures of the <i>listed company</i> must be adjusted to take account of transactions completed during the period to which the figures referred to in (a) relate, and subsequent completed transactions where any <i>percentage ratio</i> was 5% or

Transaction agreed before person became a related party	
	more at the time the terms of the relevant transaction were agreed.
(c)	The figures of the <i>target company</i> or business must be adjusted to take account of transactions completed during the period to which the figures referred to in (a) relate, and subsequent completed transactions where any <i>percentage ratio</i> would have been 5% or more at the time the terms of the relevant transaction were agreed when classified against the <i>target</i> as a whole.
(d)	Figures on which the auditors are unable to report without modification must be disregarded.
(e)	The principles in paragraphs (a) to (d) also apply (to the extent relevant) to calculating the <i>net annual rent</i> of the <i>target company</i> or business.
(f)	The <i>FCA</i> may modify paragraph (d) in appropriate cases to permit figures to be taken into account.

UK Listing Rules Sourcebook

Chapter 9

Equity shares (commercial companies): further issuances, dealing in own securities and treasury shares

9.1 Application

Application

9.1.1

R

This chapter applies to a *company* that has a *listing* of *equity shares* in the *equity shares (commercial companies)* category.

9.1.2

G

This chapter contains *rules* applicable to a *listed company* that:

(1) proposes to issue *equity securities* for cash or sell *treasury shares* that are *equity shares* for cash;

(2) adopts an *employees' share scheme* or *long-term incentive scheme*;

(3) undertakes:

(a) a *rights issue*;

(b) an *open offer*;

(c) a *vendor consideration placing*;

(d) a *placing*;

(e) an *offer for sale*; or

(f) an *offer for subscription*;

(4) purchases its own *securities* from a *related party*;

(5) purchases its own *equity shares*;

(6) purchases its own *securities* other than *equity shares*; or

(7) sells or transfers *treasury shares*.

Exceptions

9.1.3

R

■ UKLR 9.5 to ■ UKLR 9.7 do not apply to a transaction entered into:

(1) in the ordinary course of business by a securities dealing business; or

(2) on behalf of third parties either by the *company* or any member of its *group*,

if the *listed company* has established and maintains effective *information barriers* between those responsible for any decision relating to the transaction and those in possession of *inside information* relating to the *listed company*.

UKLR 9/2

www.handbook.fca.org.uk

■ Release 49 ● Jul 2025

9.2 Pre-emption rights

9.2.1

R

A *listed company* proposing to issue *equity securities* for cash or to sell *treasury shares* that are *equity shares* for cash must first offer those *equity securities* in proportion to their existing holdings to:

- (1) existing holders of that *class* of *equity shares* (other than the *listed company* itself by virtue of it holding *treasury shares*); and
- (2) holders of other *equity shares* of the *listed company* who are entitled to be offered them.

9.2.2

R

■ UKLR 9.2.1R does not apply to:

- (1) a *listed company* incorporated in the *United Kingdom* if a disapplication of statutory pre-emption rights has been authorised by shareholders in accordance with section 570 (Disapplication of pre-emption rights: directors acting under general authorisation) or section 571 (Disapplication of pre-emption rights by special resolution) of the Companies Act 2006 and the issue of *equity securities* or sale of *treasury shares* that are *equity shares* by the *listed company* is within the terms of the authority;
- (2) a *listed company* undertaking a *rights issue* or *open offer*, provided that the disapplication of pre-emption rights is with respect to:
 - (a) *equity securities* representing fractional entitlements; or
 - (b) *equity securities* which the *company* considers necessary or expedient to exclude from the *offer* on account of the laws or regulatory requirements of a territory other than its country of incorporation, unless that territory is the *United Kingdom*;
- (3) a *listed company* selling *treasury shares* for cash to an *employees' share scheme*; or
- (4) an *overseas company* with a *listing* of *equity shares* in the *equity shares (commercial companies)* category if a disapplication of pre-emption rights has been authorised by shareholders that is equivalent to an authority given in accordance either with section 570 or section 571 of the Companies Act 2006 or in accordance with the law of its country of incorporation, provided that the issue of *equity securities* or sale of *treasury shares* that are *equity shares* by the *listed company* is within the terms of the authority.

Section 9.3 : Share schemes, incentive plans
and discounted option arrangements

9

9.3 Share schemes, incentive plans and discounted option arrangements

Employees' share schemes and long-term incentive plans

9.3.1

R

- (1) This *rule* applies to the following schemes of a *listed company* incorporated in the *United Kingdom* and of any *major subsidiary undertaking* of that *listed company* (even if that *major subsidiary undertaking* is incorporated or operates overseas):
 - (a) an *employees' share scheme*, if the scheme involves or may involve the issue of new *shares* or the transfer of *treasury shares*; and
 - (b) a *long-term incentive scheme* in which one or more *directors* of the *listed company* is eligible to participate.
- (2) The *listed company* must ensure that the *employees' share scheme* or *long-term incentive scheme* is approved by an ordinary resolution of the shareholders of the *listed company* in a general meeting before it is adopted.

9.3.2

R

■ UKLR 9.3.1R does not apply to the following *long-term incentive schemes*:

- (1) an arrangement where participation is offered on similar terms to all or substantially all *employees* of the *listed company* or any of its *subsidiary undertakings* whose *employees* are eligible to participate in the arrangement (provided that all or substantially all *employees* are not *directors* of the *listed company*); or
- (2) an arrangement where the only participant is a *director* of the *listed company* (or an individual whose appointment as a *director* of the *listed company* is being contemplated) and the arrangement is established specifically to facilitate, in unusual circumstances, the recruitment or retention of the relevant individual.

9.3.3

R

For a scheme referred to in ■ UKLR 9.3.2R(2), the following information must be disclosed in the first annual report published by the *listed company* after the date on which the relevant individual becomes eligible to participate in the arrangement:

- (1) all of the information prescribed in ■ UKLR 10.6.10R;
- (2) the name of the sole participant;

**(commercial companies): further
issuances, dealing in own...**

- (3) the date on which the participant first became eligible to participate in the arrangement;
- (4) an explanation of why the circumstances in which the arrangement was established were unusual;
- (5) the conditions to be satisfied under the terms of the arrangement; and
- (6) the maximum award(s) under the terms of the arrangement or, if there is no maximum, the basis on which awards will be determined.

Discounted option arrangements**9.3.4****R**

- (1) This *rule* applies to the grant to a *director* or *employee* of a *listed company* or of any *subsidiary undertaking* of a *listed company* of an *option* to subscribe, *warrant* to subscribe or other similar right to subscribe for *shares* in the capital of the *listed company* or any of its *subsidiary undertakings*.
- (2) A *listed company* must not, without the prior approval by an ordinary resolution of the shareholders of the *listed company* in a general meeting, grant the *option*, *warrant* or other right if the price per *share* payable on the exercise of the *option*, *warrant* or other similar right to subscribe is less than whichever of the following is used to calculate the exercise price:
 - (a) the market value of the *share* on the date on which the exercise price is determined;
 - (b) the market value of the *share* on the *business day* before that date; or
 - (c) the average of the market values for a number of dealing days within a period not exceeding 30 days immediately before that date.

9.3.5**R**

■ UKLR 9.3.4R does not apply to the grant of an *option* to subscribe, *warrant* to subscribe or other similar right to subscribe for *shares* in the capital of a *listed company* or any of its *subsidiary undertakings*:

- (1) under an *employees' share scheme*, if participation is offered on similar terms to all or substantially all *employees* of the *listed company* or any of its *subsidiary undertakings* whose *employees* are entitled to participate in the scheme; or
- (2) following a takeover or reconstruction, in replacement for and on comparable terms with *options* to subscribe, *warrants* to subscribe or other similar rights to subscribe held immediately before the takeover or reconstruction, for *shares* in either a *company* of which the *listed company* thereby obtains control or in any of that *company's subsidiary undertakings*.

9.4 Transactions

Rights issue

- 9.4.1
- R
- For a placing of rights arising from a *rights issue* before the official start of dealings, a *listed company* must ensure that:
- (1) the placing relates to at least 25% of the maximum number of *equity securities* offered;

(2) the placees are committed to take up whatever is placed with them;

(3) the price paid by the placees does not exceed the price at which the *equity securities* which are the subject of the *rights issue* are offered by more than one half of the calculated premium over that offer price (that premium being the difference between the offer price and the theoretical ex-rights price); and

(4) the *equity securities* which are the subject of the *rights issue* are of the same *class* as the *equity securities* already *listed*.
- 9.4.2
- G
- The FCA may modify [UKLR 9.4.1R\(1\)](#) to allow the placing to relate to less than 25% if it is satisfied that requiring at least 25% would be detrimental to the success of the issue.
- 9.4.3
- G
- In a *rights issue*, the FCA may list the *equity securities* at the same time as they are admitted to trading in nil paid form. On the *equity securities* being paid up and the allotment becoming unconditional, the *listing* will continue without any need for a further application to list fully paid *securities*.
- 9.4.4
- R
- If existing shareholders do not take up their rights to subscribe in a *rights issue*:
- (1) the *listed company* must ensure that the *equity securities* to which the *offer* relates are offered for subscription or purchase on terms that any premium obtained over the subscription or purchase price (net of expenses) is to be for the account of the holders, except that if the proceeds for an existing holder do not exceed £5.00, the proceeds may be retained for the *company's* benefit; and

(2) the *equity securities* may be allotted or sold to underwriters if, on the expiry of the subscription period, no premium (net of expenses) has been obtained.

(commercial companies): further issuances, dealing in own...

- 9.4.5** **R** A *listed company* must ensure that for a *rights issue* the following are notified to a *RIS* as soon as possible:
- (1) the issue price and principal terms of the issue; and
 - (2) the results of the issue and, if any rights not taken up are sold, details of the sale, including the date and price per *share*.
- 9.4.6** **R** A *listed company* must ensure that the *offer* relating to a *rights issue* remains open for acceptance for at least 10 *business days*. For the purposes of calculating the period of 10 *business days*, the first *business day* is the date on which the *offer* is first open for acceptance.
- Open offers**
- 9.4.7** **R** A *listed company* must ensure that the timetable for an *open offer* is approved by the *RIE* on which its *equity securities* are traded.
- 9.4.8** **R** A *listed company* must ensure that the *open offer* remains open for acceptance for at least 10 *business days*. For the purposes of calculating the period of 10 *business days*, the first *business day* is the date on which the offer is first open for acceptance.
- 9.4.9** **R** A *listed company* must ensure that in relation to communicating information on an *open offer*:
- (1) if the *offer* is subject to shareholder approval in a general meeting, the announcement must state that this is the case; and
 - (2) the *circular* dealing with the *offer* must not contain any statement that might be taken to imply that the *offer* gives the same entitlements as a *rights issue* unless it is an *offer* with a compensatory element.
- 9.4.10** **R** If existing shareholders do not take up their rights to subscribe in an *open offer* with a compensatory element:
- (1) the *listed company* must ensure that the *equity securities* to which the *offer* relates are offered for subscription or purchase on terms that any premium obtained over the subscription or purchase price (net of expenses) is to be for the account of the holders, except that if the proceeds for an existing holder do not exceed £5.00, the proceeds may be retained for the *company's* benefit; and
 - (2) the *equity securities* may be allotted or sold to underwriters if, on the expiry of the subscription period, no premium (net of expenses) has been obtained.
- 9.4.11** **R** A *listed company* must ensure that for a subscription in an *open offer* with a compensatory element the following are notified to a *RIS* as soon as possible:
- (1) the offer price and principal terms of the *offer*; and

- (2) the results of the *offer* and, if any *securities* not taken up are sold, details of the sale, including the date and price per *share*.

Vendor consideration placing

- 9.4.12 **R** A *listed company* must ensure that in a *vendor consideration placing* all vendors have an equal opportunity to participate in the placing.

Discounts not to exceed 10%

- 9.4.13 **R**
- (1) If a *listed company* makes an *open offer*, *placing*, *vendor consideration placing*, *offer for subscription of equity shares* or an issue out of treasury (other than in respect of an *employees' share scheme*) of a *class* already *listed*, the price must not be at a discount of more than 10% to the middle market price of those *shares* at the time of announcing the terms of the *offer* for an *open offer* or *offer for subscription of equity shares* or at the time of agreeing the placing for a *placing* or *vendor consideration placing*.
 - (2) In paragraph (1), the middle market price of *equity shares* means the middle market quotation for those *equity shares* as derived from the daily official list of the *London Stock Exchange* or any other publication of a *RIE* showing quotations for *listed securities* for the relevant date.
 - (3) If a *listed company* makes an *open offer*, *placing*, *vendor consideration placing* or *offer for subscription of equity shares* during the *trading day*, it may use an appropriate on-screen intra-day price derived from another market.
 - (4) Paragraph (1) does not apply to an *offer* or placing at a discount of more than 10% if:
 - (a) the terms of the *offer* or placing at that discount have been specifically approved by the *issuer's* shareholders; or
 - (b) it is an issue of *shares* for cash or the sale of *treasury shares* for cash under a pre-existing general authority to disapply section 561 of the Companies Act 2006 (Existing shareholders' rights of pre-emption).
 - (5) The *listed company* must notify a *RIS* as soon as possible after it has agreed the terms of the *offer* or placing.

- 9.4.14 **G** On each occasion that the *listed company* plans to use an on-screen intra-day price, it should discuss the source of the price in advance with the *FCA*. The *FCA* may be satisfied that there is sufficient justification for its use if the alternative market has an appropriate level of liquidity and the source is one that is widely accepted by the market.

Offer for sale or subscription

- 9.4.15 **R** A *listed company* must ensure that for an *offer for sale* or an *offer for subscription of equity securities*:

(commercial companies): further issuances, dealing in own...

- (1) letters of allotment or acceptance are all issued simultaneously and numbered serially (and, where appropriate, split and certified by the *listed company's* registrars);
- (2) if the *equity securities* may be held in uncertificated form, there is equal treatment of those who elect to hold the *equity securities* in certificated form and those who elect to hold them in uncertificated form;
- (3) letters of regret are posted at the same time or not later than 3 *business days* after the letters of allotment or acceptance; and
- (4) if a letter of regret is not posted at the same time as letters of allotment or acceptance, a notice to that effect is inserted in a national newspaper, to appear on the morning after the letters of allotment or acceptance are posted.

Fractional entitlements

9.4.16

R

If, for an issue of *equity securities* (other than an issue in lieu of dividend), a shareholder's entitlement includes a fraction of a *security*, a *listed company* must ensure that the fraction is sold for the benefit of the holder, except that if its value (net of expenses) does not exceed £5.00, it may be sold for the *company's* benefit. Sales of fractions may be made before *listing* is granted.

Further issues

9.4.17

R

When *shares* of the same *class* as *shares* that are *listed* are allotted, an application for *admission to listing* of such *shares* must be made as soon as possible and, in any event, within one month of the allotment.

Temporary documents of title (including renounceable documents)

9.4.18

R

A *listed company* must ensure that any temporary document of title (other than one issued in global form) for an *equity security*:

- (1) is serially numbered;
- (2) states, where applicable:
 - the name and address of the first holder and names of joint holders (if any);
 - (b) for a fixed income *security*, the amount of the next payment of interest or dividend;
 - (c) the pro rata entitlement;
 - (d) the last date on which transfers were or will be accepted for registration for participation in the issue;
 - (e) how the *securities* rank for dividend or interest;
 - (f) the nature of the document of title and proposed date of issue;
 - (g) how fractions (if any) are to be treated; and

- (h) for a *rights issue*, the time, being not less than 10 *business days* calculated in accordance with ■ UKLR 9.4.6R, in which the *offer* may be accepted, and how *equity securities* not taken up will be dealt with; and
- (3) if renounceable:
 - (a) states in a heading that the document is of value and negotiable;
 - (b) advises holders of *equity securities* who are in any doubt as to what action to take to consult appropriate independent advisers immediately;
 - (c) states that where all of the *securities* have been sold by the addressee (other than ex rights or ex capitalisation), the document should be passed to the *person* through whom the sale was effected for transmission to the purchaser;
 - (d) has the form of renunciation and the registration instructions printed on the back of, or attached to, the document;
 - (e) includes provision for splitting (without fee) and for split documents to be certified by an official of the *company* or authorised agent;
 - (f) provides for the last day for renunciation to be the second *business day* after the last day for splitting; and
 - (g) if at the same time as an allotment is made of *shares* issued for cash, *shares* of the same *class* are also allotted credited as fully paid to vendors or others, provides for the period for renunciation to be the same as, but no longer than, that provided for in the case of *shares* issued for cash.

Definitive documents of title

9.4.19

R

A *listed company* must ensure that any definitive document of title for an *equity share* (other than a bearer *security*) includes the following matters on its face (or on the reverse in the case of paragraph (6)):

- (1) the authority under which the *listed company* is constituted and the country of incorporation and registered number (if any);
- (2) the number or amount of *securities* the certificate represents and, if applicable, the number and denomination of units (in the top right-hand corner);
- (3) a footnote stating that no transfer of the *security* or any portion of it represented by the certificate can be registered without production of the certificate;
- (4) if applicable, the minimum amount and multiples thereof in which the *security* is transferable;
- (5) the date of the certificate; and
- (6) for *equity shares* with preferential rights, on the face (or, if not practicable, on the reverse), a statement of the conditions thereof as to capital, dividends and (where applicable) conversion.

9.5 Purchase from a related party

9.5.1 **R** Where a purchase by a *listed company* of its own *equity securities* or *preference shares* is to be made from a *related party*, whether directly or through intermediaries, **■ UKLR 8** (Related party transactions) must be complied with unless:

- () a *tender offer* is made to all holders of the *class of securities*; or
- () in the case of a market purchase pursuant to a general authority granted by shareholders, it is made without prior understanding, arrangement or agreement between the *listed company* and any *related party*.

9.5.2 **R** Where a purchase by a *listed company* of its own *equity securities* or *preference shares* is to be made from a *related party* which is a *sovereign controlling shareholder* or an *associate of a sovereign controlling shareholder*, the modifications to **■ UKLR 8** (Equity shares (commercial companies: *related party* transactions)) in **■ UKLR 8.2.9R** do not apply for the purposes of **■ UKLR 9.5.1R**.

9.6 Purchase of own equity shares

Requirement for a tender offer

9.6.1

R

Unless ■ UKLR 9.6.2R applies, purchases by a *listed company* of *shares* in any *class* of its *equity shares* pursuant to a general authority by the shareholders must be by way of a *tender offer* to all shareholders of that *class*.

9.6.2

R

■ UKLR 9.6.1R does not apply to:

(1) purchases by a *listed company* of less than 15% of any *class* of its *equity shares* (excluding *treasury shares*) pursuant to a general authority by the shareholders where the price to be paid is lower than or equal to the higher of:

(a) 5% above the average market value of the *company's equity shares* for the 5 *business days* prior to the day the purchase is made; and

(b) the technical standards stipulated by article 5(6) of the *Market Abuse Regulation*; or

(2) purchases by a *listed company* of 15% or more of any *class* of its *equity shares* (excluding *treasury shares*) where the full terms of the *share buyback* have been specifically approved by shareholders.

9.6.3

G

Where, pursuant to a general authority granted by shareholders, a series of purchases are made that in aggregate amount to 15% or more of the number of *equity shares* of the relevant *class* in issue immediately following the shareholders meeting at which the general authority to purchase was granted, a *tender offer* need only be made in respect of any purchase that takes the aggregate to or above that level. Purchases that have been specifically approved by shareholders are not to be taken into account in determining whether the 15% level has been reached.

Notification prior to purchase

9.6.4

R

(1) Any decision by the board to submit to shareholders a proposal for the *listed company* to be authorised to purchase its own *equity shares* must be notified to a *RIS* as soon as possible.

(2) A notification required by paragraph (1) must set out whether the proposal relates to:

specific purchases and, if so, the names of the *persons* from whom the purchases are to be made; or

a general authorisation to make purchases.

- (3) The requirement set out in paragraph (1) does not apply to a decision by the board to submit to shareholders a proposal to renew an existing authority to purchase own *equity shares*.

9.6.5 **R** A *listed company* must notify a *RIS* as soon as possible of the outcome of the shareholders' meeting to decide the proposal described in ■ UKLR 9.6.4R.

Notification of purchases

9.6.6 **R** Any purchase of a *listed company's* own *equity shares* by or on behalf of the *company* or any other member of its *group* must be notified to a *RIS* as soon as possible, and in any event, by no later than 7.30am on the *business day* following the calendar day on which the purchase occurred. The notification must include:

- (1) the date of purchase;
- (2) the number of *equity shares* purchased;
- (3) the purchase price for each of the highest and lowest prices paid, where relevant;
- (4) the number of *equity shares* purchased for cancellation and the number of *equity shares* purchased to be held as *treasury shares*; and
- (5) where *equity shares* were purchased to be held as *treasury shares*, a statement of:
 - (a) the total number of *treasury shares* of each *class* held by the *company* following the purchase and non-cancellation of such *equity shares*; and
 - (b) the number of *equity shares* of each *class* that the *company* has in issue less the total number of *treasury shares* of each *class* held by the *company* following the purchase and non-cancellation of such *equity shares*.

Consent of other classes and circular requirements

9.6.7 **R** Unless ■ UKLR 9.6.8R applies, a *company* with *listed securities* convertible into, or exchangeable for, or carrying a right to subscribe for *equity shares* of the *class* proposed to be purchased must (prior to entering into any agreement to purchase such *shares*):

- (1) convene a separate meeting of the holders of those *securities*; and
- (2) obtain their approval for the proposed purchase of *equity shares* by a special resolution.

9.6.8 **R** ■ UKLR 9.6.7R does not apply if the trust deed or terms of issue of the relevant *securities* authorise the *listed company* to purchase its own *equity shares*.

UKLR 9 : Equity shares (commercial companies): further issuances, dealing in own...

Page ID #52403

Section 9.6 : Purchase of own equity shares

9.6.9

R

A *circular* convening a meeting required by ■ UKLR 9.6.7R must include (in addition to the information in ■ UKLR 10 (Equity shares (commercial companies): contents of circulars)):

- (1) a statement of the effect on the conversion expectations of holders in terms of attributable assets and earnings, on the basis that the *company* exercises the authority to purchase its *equity shares* in full at the maximum price allowed (where the price is to be determined by reference to a future market price, the calculation must be made on the basis of market prices prevailing immediately prior to the publication of the *circular* and that basis must be disclosed); and
- (2) any adjustments to the rights of the holders which the *company* may propose (in such a case, the information required under paragraph (1) must be restated on the revised basis).

Other similar transactions

9.6.10

G

A *listed company* intending to enter into a transaction that would have an effect on the *company* similar to that of a purchase of own *equity shares* should consult with the *FCA* to discuss the application of ■ UKLR 9.6.

9.7 Purchase of own securities other than equity shares

9.7.1 **R** Except where the purchases will consist of individual transactions made in accordance with the terms of issue of the relevant *securities*, where a *listed company* intends to purchase any of its *securities* convertible into its *equity shares* and where the *equity shares* are *listed* in the *equity shares (commercial companies)* category, it must:

- (1) ensure that no dealings in the relevant *securities* are carried out by or on behalf of the *company* or any member of its *group* until the proposal has either been notified to a *RIS* or abandoned; and
- (2) notify a *RIS* of its decision to purchase.

Notification of purchases, early redemptions and cancellations

9.7.2 **R** Any purchases, early redemptions or cancellations of a *company's* own *securities* convertible into *equity shares* where the *equity shares* are *listed* in the *equity shares (commercial companies)* category, by or on behalf of the *company* or any other member of its *group*, must be notified to a *RIS* when an aggregate of 10% of the initial amount of the relevant *class* of *securities* has been purchased, redeemed or cancelled, and for each 5% in aggregate of the initial amount of that *class* acquired thereafter.

9.7.3 **R** The notification required by ■ UKLR 9.7.2R must be made as soon as possible and, in any event, no later than 7.30am on the *business day* following the calendar day on which the relevant threshold is reached or exceeded. The notification must state:

- (1) the amount of *securities* acquired, redeemed or cancelled since the last notification; and
- (2) whether or not the *securities* are to be cancelled and the number of that *class* of *securities* that remain outstanding.

Period between purchase and notification

9.7.4 **R** In circumstances where the purchase is not being made pursuant to a *tender offer* and the purchase causes a relevant threshold in ■ UKLR 9.7.2R to be reached or exceeded, no further purchases may be undertaken until after a notification has been made in accordance with ■ UKLR 9.7.2R to ■ UKLR 9.7.3R.

UKLR 9 : Equity shares (commercial companies): further issuances, dealing in own...

Page ID #:2405

Section 9.7 : Purchase of own securities
other than equity shares

Warrants and options – circular requirements

9.7.5

R

Where, within a period of 12 months, a *listed company* purchases *warrants* or *options* over its own *equity shares* which, on exercise, convey the entitlement to *equity shares* representing 15% or more of the *company's* existing issued *shares* (excluding *treasury shares*), the *company* must send to its shareholders a *circular* containing the following information:

- (1) a statement of the *directors'* intentions regarding future purchases of the *company's warrants* and *options*;
- (2) the number and terms of the *warrants* or *options* acquired and to be acquired and the method of acquisition;
- (3) where *warrants* or *options* have been, or are to be, acquired from specific parties, a statement of the names of those parties and all material terms of the acquisition; and
- (4) details of the prices to be paid.

9.8 Treasury shares

Notification of capitalisation issues and of sales, transfers and cancellations of treasury shares

9.8.1

R

If by virtue of its holding *treasury shares*, a *listed company* is allotted *shares* as part of a capitalisation issue, the *company* must notify a *RIS* as soon as possible and, in any event, by no later than 7.30am on the *business day* following the calendar day on which allotment occurred of the following information:

- (1) the date of the allotment;
- (2) the number of *shares* allotted;
- (3) a statement as to what number of *shares* allotted has been cancelled and what number is being held as *treasury shares*; and
- (4) where *shares* allotted are being held as *treasury shares*, a statement of:
 - (a) the total number of *treasury shares* of each *class* held by the *company* following the allotment; and
 - (b) the number of *shares* of each *class* that the *company* has in issue less the total number of *treasury shares* of each *class* held by the *company* following the allotment.

9.8.2

R

Any sale for cash, transfer for the purposes of or pursuant to an *employees' share scheme* or cancellation of *treasury shares* that represents over 0.5% of the *listed company's share capital* must be notified to a *RIS* as soon as possible and, in any event, by no later than 7.30am on the *business day* following the calendar day on which the sale, transfer or cancellation occurred. The notification must include:

- (1) the date of the sale, transfer or cancellation;
- (2) the number of *shares* sold, transferred or cancelled;
- (3) the sale or transfer price for each of the highest and lowest prices paid, where relevant; and
- (4) a statement of:
 - (a) the total number of *treasury shares* of each *class* held by the *company* following the sale, transfer or cancellation; and

**UKLR 9 : Equity shares
(commercial companies): further
issuances, dealing in own...**

- (b) the number of *shares* of each *class* that the *company* has in issue less the total number of *treasury shares* of each *class* held by the *company* following the sale, transfer or cancellation.

consideration to say, there is no reason to doubt, that this is a full disclosure. If the Commissioners, reviewing their judgment, still think, there is reason to doubt, I do not see, how they can set their hands to the certificate; and as to the consequence, if they mistake, I can only lament it; but I cannot either by order or intimation tell them, having taken that oath, that they are to act in any manner, that is not consistent, with their own conscientious judgment, upon an anxious and painful review from time to time of all the circumstances of the case. (*Note*: A similar application by the same bankrupt refused by Lord *Erskine*, and again by Lord *Eldon*, 13 *Ves.* 181; 15 *Ves.* 126.)

(1) Reduced to three-fifths by statute 39 *Geo.* III. *c.* 121, *s.* 18. The statute 6 *Geo.* IV. *c.* 16, *s.* 122, restores four-fifths until after six months from the last examination.

[429] ADAIR v. The NEW RIVER COMPANY. *July 24th, 25th, 26th, Aug. 1st, 1805.*

[Distinguished, *Newton v. Earl of Egmont*, 1832, 5 Sim. 137.]

Whether an annuity or rent-charge out of the profits of the *New River* Company is to bear the full assessment to the land-tax, or is to have the benefit, according to the proportion, of a reduction, in consequence of an assessment upon the profits of the Company at an undervalue, *quære*. The Bill by the annuitant was dismissed: the Court refusing to raise an equity as to the profit, arising from disobedience to the Act. The general rule, requiring all persons interested to be parties, dispensed with, where it is impracticable, or, extremely difficult. In such a case, to obtain a decree, to establish the right of suit to a mill, for instance, the Court only requires parties sufficient to secure a fair contest; and, the right being established in that way, consequential relief may be had against the rest in another suit.

The Bill stated the incorporation of the *New River* Company by King *James I.*, reserving to the Crown one moiety of the profit to arise; and accordingly the Company granted at the nomination of the King, and for the use and benefit of him, his heirs and successors, to the use of trustees, one moiety of all such fines, sums of money, benefits, and profits, whatsoever, above the expences; upon trust for the King, his heirs and successors.

By indentures, executed in the 17th year of King *Charles I.*, to which the Company were parties, his Majesty granted to Sir *Hugh Middleton*, his heirs and assigns, all the trust, use, and benefit, of the moiety of the Crown; provided, and Sir *Hugh Middleton* covenanted, that he, his heirs or assigns, would pay for the use of the King, his heirs and successors, the yearly rent of £500. By several grants of the Crown and mesne assignments that rent became vested in *William Adair*; who died in 1783; having devised the rent to trustees and their heirs, to the use of the Plaintiff for life, with remainders over.

The Bill farther stated, that by various assignments the moiety of the Crown became vested in the Company, or in the Company and the other Defendants (eight in number) and other persons, amounting to 100, or a much greater number; that the profits amounted to [430] £50,000 a-year; and were assessed to the land-tax in the yearly sum of £3600, being 4s. in the pound upon the yearly sum of £18,000, the nominal amount of the profits, but not more than 1s. 6d. or at most 2s. upon the real profits. The Bill stated applications by the Plaintiff to the Defendants for a discovery of the real amount of the profits, and payment of the £500 *per annum* from *April* 1798; deducting the land-tax in proportion to what was actually paid by the proprietors, and to be repaid what was over-paid by him; which they refused, claiming to deduct £100 *per annum* for the land-tax; and that they have paid only £400; and charged, that there was not any tangible or corporeal property, upon which the Plaintiff can distrain, and the parties are so numerous, and the shares liable to so many complicated trusts, and so fluctuating, that it is impossible, if the Plaintiff could discover them, to bring them all before the Court; and these impediments were produced, not by the Plaintiff, and those, under whom he claims, but by the Defendants; and prayed an inquiry, what sum of money ought to be

deducted on account of the land-tax ; that the Defendants may be decreed to pay the difference between that and what was actually charged ; and that the right of the Plaintiff may be declared to receive the rent without any greater deduction than after the rate actually paid.

The *New River Company* by their answer admitted, that their profits were more than £18,000 *per annum*, but did not state the amount. They submitted, whether all parties interested are not necessary parties ; notwithstanding the moiety was granted to a single person.

An objection was taken for want of parties ; all the persons interested not being brought before the Court.

[431] Mr. *Richards*, Mr. *Alexander*, Mr. *Bell*, and Mr. *Neave*, for the Plaintiff. The necessity of bringing all persons before the Court, to whom interests in the property belong, though true in theory, does not prevail in practice. Where it is impossible, a case of exception arises. In a late case, *Harding v Pratt*, upon that ground the Court gave liberty to apply for an Act of Parliament. The same principle appears in *The City of London v. Richmond* (2 *Vern.* 420 ; *Pre. Ch.* 156 ; 1 *Bro. P. C.* 30 [2nd ed. 516]), *Quintine v. Yard* (1 *Eq. Cas. Abr.* 74), and *Lloyd v. Loaring* (6 *Ves.* 773. See the note, 4 *Ves.* 628). This Plaintiff has before the Court some of the parties interested, and the legal holders of the property. Some of the persons interested, being before the Court, are sufficient to maintain the question. In the instance of a Bill by simple-contract creditors against trustees, insisting, that an estate is charged with debts, it may be impracticable to bring before the Court all the bond creditors. They may be very numerous, and not known. The habit is to bring some of the specialty creditors, to discuss the question with the Plaintiffs ; which is then decided with reference to the trustees ; and the estate declared well charged ; though only a few specialty creditors are parties. It is not even necessary to make any of them parties ; and decrees have been often made upon Bills by simple-contract creditors in the absence of all the specialty creditors ; though generally for convenience some of them are made parties, as being interested to discuss the question. As to the remedy of the Plaintiff, there is great difficulty in distraining. The Crown made the Corporation the legal tenants of the estate. The only title in the Crown was to an account : therefore no more could be granted to Sir *Hugh Middleton*. The subsequent grants of the £500 a-year, partaking of the nature of a rent-charge, could give only a right to an account. The Court will assimilate it, as much as [432] possible, to an equitable distress ; fixing it upon those persons, whom it may be possible to make parties. The rule of Equity, to bring before the Court all persons interested, as in the case of a joint and several bond, is a rule of convenience, for the sake of the Defendants ; but it cannot be used to disappoint entirely the justice of the Court ; as the Defendants are entitled to contribution ; which would be an abuse of the rule, contrary to its principle and object ; and would make the forms of justice subversive of its end. That rule is therefore in many cases dispensed with upon the principle of convenience, as legatees, general and residuary, are represented by the executor. In the case of scheduled creditors, very numerous, the objection, that they must be before the Court, for the purpose of having a decree for payment of debts out of real estate, has been made ; but has not prevailed ; and there are many other instances, in which for convenience, or rather necessity, the rule has been dispensed with.

Independent of the Land-Tax Acts the Plaintiff is entitled upon equitable principles : *Brockman v. Honeywood* (1 *P. Will.* 328). Upon the strict rule the Court would not withhold the relief upon the head of mere accident : still less where the difficulty arises, not from mere accident, but from the conduct of the party himself : Sir *Hugh Middleton* having put his moiety into such a number of assignees, that it is totally impossible to sue them individually. That entitles the Plaintiff to the remedy in this Court. The doctrine, that, where by accident the remedy for a rent is lost at law, relief may be had here, is very old : *Thorndike v. Allen* (1 *Ch. Ca.* 121). *Eton College v. Beauchamp and Reeds* (1 *Ch. Ca.* 144). *Davy v. Davy* ([6 *Bro. P. C.* 368, 2nd ed.]). *Cran-[433]-borne v. Crisp* (*Finch*, 105). The Anonymous Case in *Precedents in Chancery* (*Pre. Ch.* 592). *The Duke of Bridgewater v. Edwards* (4 *Bro. P. C.* 139). *The Duke of Leeds v. The Corporation of New Radnor* (2 *Bro. C. C.* 338, 518) ; in which the preceding cases are collected. These authorities establish the principle, that, where by accident, or the lapse of time without default, the legal remedy for a

rent is gone, not absolutely, but so far, that it is morally impossible to obtain it, the jurisdiction in equity arises. It is difficult, with reference to this principle, to distinguish the case of lands intermixed from this, of property split and divided into so many parts, that it is impossible to proceed against each individual proprietor : a confusion of proprietors, arising from the party's own act, making this jurisdiction absolutely necessary to answer the ends of justice. Both the circumstances, forming the reason in *The City of London v. Richmond* (2 Vern. 420 ; *Pre. Ch.* 156 ; 1 Bro. P. C. 30 [2nd ed. 516]), concur here : 1st, it is equally impracticable to make all these parties : 2dly, the difficulty is created by the act of the party, under whom the Defendants claim.

The Land-Tax Acts are of very peculiar construction : but the true meaning is, that the Commissioners shall by an assessment of 4s. in the pound raise the sum, imposed by the act. The provision as to fee-farm rents turns upon this ; that what is raised shall be borne in proportions by the holder of the rent-charge and the owner of the land ; and the decision in *King v. Weston* (2 Eq. Ca. Ab. 62. See 3 P. Will. 127) was accordingly. But this is, not a fee-farm rent, or a rent of any kind, but a species of annuity, arising out of this transaction between the Crown and [434] Sir *Hugh Middleton*, having reference only to a trust estate.

Mr. *Romilly* and Mr. *Martin*, for the Defendants, individual Proprietors of Shares in the King's Moiety. Three questions arise : 1st, whether this Plaintiff is entitled to relief in equity ? 2dly, if he is, whether all the proprietors of the King's moiety ought to be before the Court ? 3dly, whether the Plaintiff is not bound to pay 4s. in the pound upon his rent ? This Plaintiff is not entitled to relief in the suit, and against the practice, in which and from whom he seeks relief. The Corporation are trustees only for the proprietors of the King's moiety ; not for the Plaintiff. The Corporation vested in them the legal estate in the whole of this great adventure ; of which they are entitled to a moiety themselves ; holding the other moiety for the grantees of the Crown. Their duty requires them merely to pay the land-tax upon the whole, and then to pay a moiety of the profits to the persons, entitled to the King's moiety ; having no immediate privity with the Plaintiff ; so as to raise a trust ; having paid him only as agents. The case of the Corporation of *New Radnor* (*The Duke of Leeds v. The Corporation of New Radnor*, 2 Bro. C. C. 338, 518) has no analogy to this. Where the object is to have a charge paid out of land, the Plaintiff must bring all the proprietors. That is the foundation of the equitable jurisdiction ; for if the remedy by distress is adopted, a right to contribution arises. At least it was incumbent upon him to bring forward all, whom he knew to be proprietors. The objection, that the difficulty was created by the party himself, Sir *Hugh Middleton* dividing the share among such a number of persons, would apply to every [435] case : that, for instance, of a man having an estate, charged with a rent, splitting the estate, so that it became divided among many proprietors : in which, however, it has been held necessary to bring all the proprietors, as parties. But the person, carving out all these interests, was Sir *Hugh Middleton*, not the *New River Company*. The case in *Precedents in Chancery* (*Anon. Prec. Ch.* 592) was a bill on behalf of the Plaintiffs and all other Proprietors of a very great adventure, except the Defendants ; and they might have come in at any time, upon the principle of a bill by creditors on behalf of themselves and all others. An instance must be shewn of a bill against particular individuals : where there were a great many others, against whom the Plaintiff had precisely the same equity ; and relief given against some, not against all, even whom the Plaintiff was aware of ; with a view to contribution among them. Many instances occur of a right without a remedy. The case of *Drury Lane Theatre* (7 Ves. 617. *Ex parte O'Reilly*, 1 Ves. jun. 112 ; see p. 130) was an instance, if all the points had been pressed : the number of persons concerned being so great, that it was impossible to bring them all before the Court. The Court does not admit the abstract proposition, that a wrong without a remedy can subsist ; but points out particular parties ; and requires them to be brought. The reason is the inconvenience of the remedy.

But in this case it is absolutely necessary to bring before the Court all the proprietors. Some may be in circumstances perfectly distinct from all the others. Some, for instance, may have redeemed the land-tax : the proprietors of *New River* shares being allowed (statute 42 Geo. III. c. 116, s. 13) to re-[436]-deem each his own individual share. As to the rest there must be a reduction every year, in

proportion to what has been paid by the Plaintiff's interest : but as to those, who had redeemed, such reduction should not take place. In the account therefore the share of this rent-charge to be paid by those, who had not redeemed, would vary every year : not so as to the others. One, who redeemed in 1798, must have it taken, as it was in that year : another, having redeemed in 1799, as it was in that year. It is necessary, upon these questions, that all these persons, interested, should be before the Court, the proprietors not having in themselves any legal estate, are not trustees for any person. Unless a covenant runs with the land, the Plaintiff has no right against any particular individual. The principle, upon which all parties are to be brought before the Court, to prevent multiplicity of suits, would not be attained upon this bill, on account of the right to contribution among these proprietors. The only effect would be to impose upon the Defendants the very difficulty, which the Plaintiff would avoid.

Upon the merits, this rent-charge is a fee-farm rent, payable to the Crown, within the Land Tax Acts. As between the King and the representatives of Sir *Hugh Middleton*, it must upon the covenant in the grant of *Charles I.* be considered a fee-farm rent still existing in the Crown ; and then clearly upon the Acts of Parliament the land-tax is to be assessed at 4s. in the pound : that is, the owner of the property is entitled to make that reduction, at the same rate, at which the land is assessed. A certain sum of money is to be raised in each division, when the land-tax is at 4s. in the pound ; and a less sum, if less than 4s. It is left to the proprietors to make the assessment. It happens in many parts of the kingdom, that, when the tax is at [437] 4s. in the pound, the assessment is at 2s., or less. *King v. Weston* (2 *Eq. Ca. Ab.* 62) is the only decided case ; establishing, that the deduction from the annuity is to be in proportion to the assessment upon the land. But it never was decided, that as a valuation less than the full valuation is given in, the land being assessed at much less than 4s. in the pound, therefore the owner of the rent is to be assessed at 2s. only, or less. The greatest inconvenience would ensue : a total uncertainty ; and a new account must every year be taken of the profits of this great adventure. A profit, arising from the payment of small rents, liable to an increase of rents by the erection of new buildings, and to loss by the failure of tenants, cannot be the same in any two years. Suppose the profits of the Company reduced in consequence of any calamity by fire : the owner of the rent would not participate in that loss, as long as £500 was received in the shape of profit. Whether this case is put upon mistake or fraud, the Plaintiff is not entitled to relief in equity : if upon fraud, he comes for a proportion of the spoil : if upon a mistake, giving an advantage to all the proprietors, he claims his proportion ; admitting, that, if the event had been different, he would not have borne any loss.

Mr. *Hart*, for the *New River Company*. The objections are, first, to the jurisdiction upon this subject : 2dly, whether the persons interested are brought before the Court, so as to enable the Court to decree upon the rights of all parties : and 3dly, upon the title of this Plaintiff. Legal rights, and the complication of them alone, do not raise an equitable jurisdiction. This is argued upon the case of a legal right, which cannot [438] be pursued at law. The proposition is true, if applied to the loss of evidence of the right ; and to other cases, where the Court exercises a concurrent jurisdiction ; giving complete relief ; having originally taken jurisdiction upon the ground of accident. But in this instance there is no such ground of jurisdiction. The representatives of Sir *Hugh Middleton* would have one ground of equity against the Company ; that one tenant in common may consider the other, taking the whole profit, as his bailiff : but in such a case the Plaintiff must shew, that they are tenants in common. In order to raise a trust there must be some privity. Nothing has ever taken place, constituting any relation between the Company and this Plaintiff ; making them trustees for him. He is not therefore a *Cestui que trust*, in the pure sense ; and if he can through Sir *Hugh Middleton* be considered as having an equitable lien, the Company cannot be described as trustees ; but are mere stake-holders. Then can the Plaintiff come into equity against the stake-holder in the absence of the persons interested to resist him ? In *Quintine v. Yard* (1 *Eq. Ca. Ab.* 74) all the parties in substance were before the Court ; as all might have come in after the decree as Plaintiffs in effect ; and embracing all the interest in the subject. *The City of London v. Richmond* (2 *Vern.* 420 ; *Pre. Ch.* 156 ; 1 *Bro. P. C.* 30 [2nd ed. 516]) is accounted for in the same way ;

and the Court compelled them to bring the persons legally accountable ; but not as to the equitable sub-divisions ; as the assignee of a mortgage is the only necessary party ; and the mortgagor is not obliged to bring all the persons, among whom the interest is sub-divided ; being only subordinate equities, which the Court does not notice. But in this case these proprietors are primarily accountable. Many of them, if before the Court, might suggest equities, with reference to their own acts, upon which, even [439] supposing the Plaintiff to have the strict legal right, the Court would refuse to act. The only and proper remedy is therefore at law ; and there is no equity to impose upon the Company this obligation of perpetual account.

Mr. *Richards*, in Reply. The rule, requiring the presence of all parties, is a mere rule of convenience, which does not prevail at law, and gives way accordingly ; as in the instance of the executor, having in himself all the interests of the testator ; no other party therefore being necessary. In general the case of a trustee is different : the persons, interested in the trust, if specifically pointed out, are frequently considered necessary parties. In the case of a creditor's bill, on behalf of himself and others, no creditor, who is not upon the record, can litigate the question at the hearing : no other can intervene without an express order ; which will not be made, unless it appears, that the Plaintiff has neglected his duty : yet all creditors are bound ; and the most important questions may be decided in their absence. So to a Bill to establish a custom all persons interested are not necessary parties : yet all are bound. The principle is convenience. The Court, having a few of the persons interested before it, interested to sustain the question, is in general satisfied. Upon the record there are parties to sustain the question ; and the possibility, that something farther might be urged by some of those, who are absent, shall not stand in the way. Upon a Bill against a trustee the Court will, though some of the *Cestui que trust* are proved to be abroad, if there are persons before the Court to sustain the suit, make a decree to the extent of a decision against the person to pay, though not ordering the person absent to do any thing.

[440] As to the jurisdiction, this is an equitable charge : the legal interest in the Corporation. The Plaintiff is entitled without reference to the construction of the Land-Tax Act : but, if not, the construction of the act is in his favour. This is not really a rent ; though it is called so. It is derived, not out of a conveyance of land, but from a grant of fines and other profits arising from an adventure. The Corporation has in itself the whole legal interest in the land, and the whole adventure. The profits, to be divided, are personal property ; arising certainly from an adventure connected with land, but a speculation, expected to produce profit. They are to settle the account, and to hand over a moiety of the clear surplus. The only way of getting at it is a Bill. An action of account would not lie. Since the Land-Tax Act the Corporation are to deduct the land-tax, as a necessary out-going. Still it is purely a question of account : a moiety of the profit, subject to the land-tax ; but nothing more than a division of profits : not a rent, properly ; which originally was confined to payments out of land. Personal property is by the Land-Tax Acts charged at 4s. in the pound. A sleeping partner is entitled to see, what the proportion is. If, instead of a share of the profits, he is to have a clear sum of £500 a-year, the whole imposition of any parliamentary tax is not to be thrown upon that interest : but it must be in proportion to the other part. As to the objection from want of privity, the Company are parties to the deed between the King and Sir *Hugh Middleton*.

But, if this is to be considered a fee-farm rent, or a rent-charge, the Plaintiff is entitled to relief within the view of the Act of Parliament. It has not been in fact in the Crown since the time of King *William III.* ; and as the King's grantee has always been considered entitled to take it, it must be taken to be completely out of the [441] Crown. Considered as a general rent-charge under the Land-Tax Act, the true construction is, that the Plaintiff is not to be charged with more than a fair proportion. The object of the legislature was to throw the burthen equally upon all the objects of the duty, and therefore the landlord is allowed to deduct out of the rent-charge a proportionate part of the tax, paid by him ; and that proportion ought to be regulated by the fair value of the land ; not, as is contended, by the actual assessment, however unequal. The assessment is upon all persons, having a share or interest : a description that applies to this Plaintiff. Then, the full sum of 4s. in the pound not being raised from these persons, he is entitled to

the benefit of the abatement. The intention of the Legislature being to charge all property in proportion to its value, as far as can be done, it is unconscientious, that he should pay £100 out of his £500 in ease of the assessment upon the Company, paying no proportion.

The *Lord Chancellor*. The answer admits, the profits of the Company have been much greater than £18,000 a-year; the sum, at which they are assessed; but does not disclose how much greater. If neither the Plaintiff nor the Defendants pay to the public what they ought to pay, is this Court to administer the equities between them? My opinion is, that in such a case a Court of Equity ought not to act.

Aug. 1st. The Lord Chancellor [Eldon]. The answer of the Company admits, that their profits are more than £18,000 a-year; the rate of their assessment. The Plaintiff has compelled them to state that fact; but has not proceeded to ask, what that excess is. [442] If he had, the Court could by decree upon the admission have set the thing right without a reference to the Master. But there was a mutual convenience to both in refraining from that question. The meaning of the act being, that they should pay 4s. in the pound upon the whole amount of the actual profit, if that had been published, this Bill might operate relief for the present year; but the effect would be, that in future the Plaintiff would not have reason to complain, if the Commissioners under the Land-Tax Act should do their duty; for as by the Act this property is not to be assessed by a pound-rate according to the deficiency of a primary assessment upon the personal estate, but a rate of 4s. in the pound is imposed directly upon the land, the Plaintiff, paying no more than that, would have nothing to complain of.

The Equity therefore, which is stated, is this. The Plaintiff does not pay more than he ought, if they were duly assessed; but, not being duly assessed, they did not inform the Commissioners, what is the correct sum of their profits: the Plaintiff therefore desires a Court of Equity to assist him; to relieve him, not from paying more than he ought to pay, as between him and the public, but from what he has paid to the Company; as they have paid less than they ought to pay, if the Act had been put in execution; as it would have been, if the Commissioners had the means of enforcing a discovery of the whole profit. The Company are entitled at law under the instruments to receive in the first instance the whole profits. Afterwards, in consideration of the expence the King had been at in the work, they grant to him one moiety of the rents, profits, and gains, made. So it must be a *Chose in Action*. Still they remain the legal owners of the whole concern, entitled to receive all the rents and profits; but, having granted a moiety, bound to account for that to the King; and after that [443] grant the King could in Equity or a Court of Revenue compel an account; which would embrace all the expenditure, as well as all the gain, that had been obtained. After that the King granted his moiety by an instrument, to which the Company were parties, to Sir *Hugh Middleton*; who covenants to pay to the King, his heirs and successors, this rent, now vested in the Plaintiff.

One moiety of the profit, subject to the covenant for payment of £500 *per annum*, being vested in Sir *Hugh Middleton*, it is clear, if that annuity is subject to equitable jurisdiction, it was competent to the Plaintiff to bring into a Court of Equity the Company and Sir *Hugh Middleton*; to ascertain a moiety of the profits; and out of what subject, constituting that moiety, the £500 *per annum* was to be paid. The acts, since done by Sir *Hugh Middleton*, are of this nature. That moiety, vested in him, either expressly subject by lien, or only by covenant to the sum of £500 a-year, has become the property of an infinite number of proprietors; and the ownership split into so many shares, that the Company, if called upon by some proprietors on behalf of themselves and all others, would not know, with which they were contending, until all the proprietors had shewn themselves by claim in the Master's Office.

It is insisted, that the Plaintiff cannot sue in Equity without bringing before the Court all the proprietors of the King's share, as well as the Company: whose share is also subdivided: but those parties are represented; and it is clear, no objection of that kind arises as to them. The rule is urged, that, whenever a rent-charge is granted, which I will suppose capable of being recovered specifically out of the moiety of the profits, all persons, who have to litigate any question with

regard to the title to that rent-charge, or with each [444] other, as being liable to pay the whole, or to contribute among themselves, must be brought before the Court; and there is no doubt, generally that is the rule. The consideration is, very different, if it is necessary to decide this point, whether it is possible to hold, that the rule shall be applied to an extent, destroying the very purpose, for which it was established: viz. that it shall prevail, where it is actually impracticable to bring all parties, or where it is attended with inconvenience, almost amounting to that: as well as where all can be brought without inconvenience. It must depend upon the circumstances of each case: but upon all the authorities for the purpose of getting a decree it is not necessary to bring all parties interested. I do not go into the case of bond-creditors and all the other cases; and I lay out of my consideration the case of persons, suing on behalf of themselves and all others: for in a sense they are before the Court. There are authorities to be found in print, that where it is impracticable, the rule shall not be pressed; and in such a case as this, the King's share being split into such a number of interests, that it is impracticable to go on with a record, attempting finally to bring all parties, having interests in the subject to be charged, I should hesitate to determine, that a person, having a demand upon the whole and every part of the moiety, does not do enough, if he brings all whom he can bring.

There is one class of cases, very important upon this subject: viz. where a person, having at Law a general right to demand service from the individuals of a large district, to his mill, for instance, may sue thus in Equity. His demand is upon every individual, not to grind corn for their own subsistence except at his mill. To bring actions against every individual for substracting that service is regarded as perfectly impracticable. There-[445]fore a bill is filed to establish that right; and it is not necessary to bring all the individuals: why? Not, that it is inexpedient, but, that it is impracticable, to bring them all. The Court therefore has required so many, that it can be justly said, they will fairly and honestly try the legal right between themselves, all other persons interested, and the Plaintiff; and, when the legal right is so established at law, the remedy in equity is very simple: merely a bill; stating, that the right has been established in such a proceeding; and upon that ground a Court of Equity will give the Plaintiff relief against the Defendants in the second suit, only represented by those in the first. I feel a strong inclination, that a decree of the same nature may be made in this case.

It has been with great force observed for the Defendants, that in this way the same difficulty is put upon them: how are they to obtain contribution, if the Plaintiff cannot ascertain the persons, who are to contribute? But I am disposed to think, in a case under such circumstances as this, the whole legal interest in the Company, to distribute the fruit of that interest according to the equitable rights, a bill might be filed by the Plaintiff; stating, that the Company have the legal interest; that they have to distribute the profits among the persons, representing their Company, and those, entitled to the King's moiety; that therefore they object to account with him, unless there are proper parties; and it would be competent to the Court in such a state of circumstances to say, if the Plaintiff brings so many of those, who represent the King's share as can be taken duly and honestly to enter into that contest, in which all the others are concerned, that ought in equity to bind those, who are present, representing those, who are absent; giving [446] the Company a right to make the deduction under that decree.

I incline also to think, it will be found, that relief may be given in equity in respect of this annuity, as affecting in equity the moiety, which belonged to the King, upon the cases I have seen. Supposing, they were duly assessed at 4s. in the pound, and their profits were a great deal more than the sum, upon which the assessment was made, the Plaintiff paying 4s. in the pound, in the terms of the Act, by a like pound-rate, I must, if the case turned upon that point, have made a case for the opinion of a Court of law. I know, opinions have been given with great confidence, that, though the pound-rate both upon the land and the annuity, was 4s. in the pound, yet inquiry might be made into the actual value of the land: not only, where it could be ascertained under the clause, relating to landlords mediate, or immediate, whose property was out to tenants; but also, where the value might be ascertained in the party's own occupation: the meaning of the Act being, that you may ascertain the value from year to year; and therefore may claim a reduction

of the annuity, having regard to the value. Opinions very different have been held with equal confidence ; that, if the land is rated at much less, with the exception perhaps of a fee-farm rent, the annuity is to pay the same rate ; as, then within the terms of the Act it would pay with reference to the value of the annuity by a like pound-rate as the land. There is no actual decision upon it ; though I imagined there was ; and the point admits of considerable argument upon the Act. If the case had rested upon that, therefore, the most just way would have been a case stated for the opinion of a Court of Law.

[447] But upon the best consideration I can give this case, the difficulty, to which I first alluded, is so considerable, that I do not see the principle for giving relief under all the circumstances. There is great difficulty upon the circumstance, that many of these individuals have redeemed their land-tax upon the foot of the rate paid by the Company. Perhaps, if they were hereafter to be assessed to the utmost amount, they could have no reason to complain of that ; for it was their own fault to permit those persons, part of their own body, to redeem upon that footing. But the difficulty is, that this is not the case of a Plaintiff, coming under the Act of Parliament, desiring to be assessed under the due construction of the Act by such a rate, as ought to be applied, having regard to the mode of assessing in the district : but there being an express clause, that the profits shall pay 4s., the Plaintiff must admit, that his annuity, if part of that profit, is taxed, as it ought to be. If it remained in a chest, and the Commissioners assessed it there, according to the express clause he could not receive it without that deduction of 4s. in the pound. The question then is, whether the Plaintiff, stating, that he has paid no more than he ought, has an equity to call upon other persons, who have paid less than they ought ; and to have a declaration, that he is entitled to a participation in the effect of the circumstance, that by their not disclosing the actual profit, with the fact, perhaps, that the Commissioners cannot compel the disclosure, other persons, having an interest, have not paid as much as they ought. My opinion is, that the Plaintiff has no such equity ; and no decree can be made upon the principle, that he, who has paid only as he ought, is to participate in the gain of those, who from circumstances have paid much less than they ought.

The Bill was dismissed without costs.

[448] The Earl of RADNOR v. SHAFTO. Aug. 7th, 1805.

A right of pre-emption given by Will, whether at a price expressed or to be fixed by the trustees, will be executed : the construction in the latter case being a reasonable price, to be ascertained by reference to the Master. But to pass such right to the heir or devisee the intention to accept the offer must appear by some act, or, at least, by Will. In this case, the Will directing, that A. or whoever shall after the testator's decease be entitled to estates in settlement may have the refusal, A. having died without shewing such intention, and a tenant for life of part of the settled estates, not by the settlement, but under a recovery by A., not answering the description, it was held, that the right did not then exist in any one.

Sir *Charles Duncombe* by a settlement, dated the 7th and 8th *July* 1708, settled his freehold estates in the counties of *Wilts* and *Middlesex* to the use of himself for life ; remainder to his first and other sons in tail male ; remainder to his nephew *Anthony Lord Feversham* for life, and to his first and other sons, and to *Thomas Brown* (afterwards *Duncombe*) and his sons in the same manner. Sir *Charles Duncombe* died in 1711, without issue male ; leaving his nephew *Lord Feversham* surviving him ; who entered ; and died in 1763, without issue male ; and upon his death *Thomas Duncombe*, eldest son of *Thomas Brown*, became entitled to the settled estates.

Lord Feversham left at his death two daughters ; *Lady Radnor* and *Frances Bowater*, his co-heiresses at law. By his Will, dated the 21st of *July* 1757, he devised his several estates in the counties of *Wilts*, *Middlesex*, and *Leicester* : upon trust, subject to annuities and other charges, for his children, as therein mentioned, in case he should leave daughters only, and there should be more than one, to convey to all and every his daughter and daughters, equally to be divided between them, if

Pringle was proper: the legacy being vested in him; and the payment only postponed.

[316] The cause stood for Judgment.

The *Master of the Rolls*. The cases upon the point, which arises in this cause, are very numerous; and perhaps not all very easily reconcilable with each other: but this case appears to me not to be substantially distinguishable from those in which the words "at" or "after" the death of a particular person, have been held, not to denote a condition, that the legatee shall survive such person, but only to mark the time, at which the legacy shall take effect in possession: that possession being deferred on account of some interest in the subject being given to the person, on whose death the gift is to take effect. In *Medlicott v. Bowes* (1 Ves. sen. 207), *Barnes v. Allen* (1 Bro. C. C. 181. Stated from the *Register's Book*, 3 Ves. 208, n.), *Monkhouse v. Holme* (1 Bro. C. C. 298), *Benyon v. Maddison* (2 Bro. C. C. 75), *The Attorney-General v. Crispin* (1 Bro. C. C. 386) and many others, the time might be said to be annexed to the substance of the gift just as much as in the present case: but, the purpose being to give interests to different persons in succession, it was held, that each gift was alike immediate; though the second taker could not have the benefit until after the death of the first.

In the present case, if the testator had given the Stock to his wife for life, and at her death to *George Pringle*, it would have been clear, that he would have had a vested interest in the nature of a remainder. In a Will it is not material, in what order the clauses are arranged. The question is, what is the effect upon the whole. This testator begins by giving to *George Pringle* the Stock at the death of his wife; and then gives to his wife the whole of his property. Consequently she has a life-interest in [317] that stock, so given to *George Pringle* at her death, for it is part of the testator's property not antecedently disposed of. Thus the Will, no matter in what order, divides the fund between these two persons; giving to one the interest for her life, and to the other the capital at her decease. In effect and substance he took a remainder, which became vested immediately upon the testator's death, and was not defeated by his own death in the life-time of the wife.

The legacy therefore was properly paid; and the Bill, as far as it seeks to impeach that payment, must be dismissed.

[318-320] See Prefatory Note.

[321] 50 GEORGE III. 1809.

COCKBURN v. THOMPSON. Oct. 31st, Nov. 1st, 14th, 1809.

[See *Long v. Yonge*, 1830, 2 Sim. 380; *Deeks v. Stanhope*, 1844, 14 Sim. 68.]

The strict rule, that all persons, materially interested, must be parties, dispensed with, where it is impracticable, or very inconvenient: as in the case of a very numerous association in a joint concern; in effect a partnership. Defect of parties the subject of Demurrer, or Plea; as it appears, or not, on the face of the Bill.

The Bill, filed by several persons, on behalf of themselves and all others the proprietors of *The Philanthropic Annuity Institution*, who shall come in, and seek relief by, and contribute to the expence of, the suit, stated the constitution of that establishment, formed in the year 1806, in the first instance of the purchase of annuities for lives with the money, that should be subscribed; providing among other things, that the number of shares should not be increased beyond 50,000 without the express resolution of two Courts of Proprietors.

The Bill farther stated, that the Defendant *Thompson* was appointed Solicitor, and the other Defendants bank-[322]-ers, to the Institution; in which capacities they possessed a large sum of money, belonging to it, amounting to upwards of £10,000; and that, an application for an Act of Parliament, to enable them to accept and grant annuities in the names of trustees, having failed, without which it was impossible to carry the Institution into effect, as from the number of the proprietors a memorial could not be enrolled, according to the Act of Parliament (stat. 17 Geo. III. c. 26 repealed by Stat. 53 Geo. III. c. 141. See the note, 2 Ves.

jun. 36), at a General Meeting on the 18th of *August* 1808, it was resolved, that it would be for the benefit of all parties to the Institution, that it should be dissolved.

The Bill, then charging several acts, done by *Thompson*, as a breach of his duty, prayed, that the Institution may be declared dissolved : an account of the sums, received by the Defendants, &c., on account of the Institution, or of any of the proprietors : the Plaintiffs submitting to account for their receipts and payments on account of the said Institution, and pay any balance, which shall be found due from them ; that the same, and any balance, which shall be found due from the Defendants, may be paid into Court, &c. ; that the rights and interests of the Plaintiffs, and the said other proprietors, who shall come in, and seek relief by, and contribute to the expence of, this suit, may be declared and established ; and that *Thompson* may be restrained from receiving from the other Defendants, and they from paying to him, the money in their hands.

The Defendant *Thompson* put in a plea to the discovery and relief, sought by the Bill ; alleging, that a great number of persons, whose names were stated, are proprietors of *The Philanthropic Annuity Institution* ; and that several other persons, also named, are also proprietors, as the Defendant believes ; the Defendant insisting [323] on the want of those persons, as parties to the Bill, in bar to the discovery and relief.

Mr. *William Agar*, in support of the Plea, insisted, that according to the strict rule all the persons, interested in this concern, must be parties ; citing *Leigh v. Thomas* (2 *Ves. sen.* 312), *Moffat v. Farquharson* (2 *Bro. C. C.* 338), *Parsons v. Neville* (3 *Bro. C. C.* 365), *Sherrit v. Birch* (3 *Bro. C. C.* 228), *Lloyd v. Loaring* (6 *Ves.* 773).

Sir *Samuel Romilly* and Mr. *Fearnley*, for the Plaintiffs, contended, that, besides the common case of creditors, the Court has frequently dispensed with parties ; where they were so numerous, that it was impracticable or inconvenient to have them all before the Court : *Chancey v. May* (*Pre. Ch.* 592, edition by Mr. *Finch*), *Adair v. The New River Company* (11 *Ves.* 429) : and the cases of *Drury Lane* and the other Theatres ; and no inconvenience can arise from considering this as a case of exception : the only accounting parties being the officers of this Society.

Mr. *William Agar*, in Reply. At what number is the rule, that all persons, interested in a partnership concern, must be parties, to cease ? Many of these persons may not have advanced their money ; which must be brought into the account ; and it may be necessary, according to the usual course, to examine them upon interrogatories. The case of creditors is distinct. The reason of *Adair v. The New River Company* is very special. *Chancey v. May* contradicts the uniform practice since ; and the reason, assigned for that decision, is not sound. How can it be represented, that [324] the rest were in effect parties ? The objection from the impossibility and inconvenience of making all these persons parties occurs equally after a Decree. Lord *Kenyon's* clear opinion was, that all accounting parties must be before the Court ; and Lord *Alvanley* had great doubt upon the case of a mortgage, split by the mortgagee.(1)

The Lord Chancellor. There are some very strong cases upon mortgages. I shall give the Judgment with great consideration in this cause ; which is of high importance ; going in effect, as it is argued for the Defendant, to this ; that with regard to all those Institutions, known to subsist in this great metropolis in the nature of partnership, all Assurance Companies, for instance, if they have not a corporate character, no law can be administered in any Court of Justice among the members of such Societies. Another extremely important effect, if this demurrer can be maintained, will be, that with regard to a great number of charitable institutions, as that of *The Society of Widows*, before Lord *Thurlow*, and the late case of *The Bakers' Company* (*Pearce v. Piper*, 17 *Ves.* 1), before me, no law or equity can be administered among the members ; who, being to subscribe annually, and divide the profits, are all partners. As to the case of *Drury Lane Theatre* (7 *Ves.* 617) my opinion was, and still is, that every renter was a partner ; being to receive his rent out of the profits ; which constituted him a partner ; and this distinction between partners and cre-[325]-ditors must be attended to ; in a plea for want of parties, as in the plea of abatement at Law, the Defendant must tell the Plaintiff whom he should have sued ; in the case of scheduled creditors in a deed the Defendant may be able to state, who they are : but in the ordinary case of creditors

of a deceased person the Defendant cannot, if I may use the legal expression, give the Plaintiff a better writ ; as in the case of partnership he may. Another case is that of persons, entitled to prize-money. (*Good v. Blewitt*, *Brown v. Harris*, 13 Ves. 397, 552 ; 19 Ves. 336, and the note, 4 Ves. 628.) In the case of the widows, suing for themselves and all others entitled, Lord *Thurlow* made the Decree without having all before the Court ; and in the case before me the doubt was, whether there was not a vice and inaccuracy in the principle of the Institution, making it impossible to carry it into execution either in or out of Court ; in other words, whether it was not a bubble ; and I directed an inquiry as to that.

Nov. 14th. The Lord Chancellor [*Eldon*]. The question is, whether a plea, that several persons are not parties, is a good bar to a Bill for discovery and relief. Where on the face of the Bill it appears, that there are not sufficient parties, that is a ground of demurrer : where the defect of parties does not appear on the Bill, that may be the subject of a plea ; and the question, whether it is sufficient, must depend upon the Bill and the Plea, taken together. The strict rule is, that all persons, materially interested in the subject of the suit, however numerous, ought to be parties : that there may be a complete Decree between all parties, having material [326] interests : but that, being a general rule, established for the convenient administration of justice, must not be adhered to in cases, to which consistently with practical convenience it is incapable of application. Accordingly there are several well known cases of exception ; and, without going through them all, I will mention one instance of not applying it to persons, having valuable interests in real estate : viz. where it has been held sufficient to bring before the Court the first person, having an estate of inheritance (see 9 Ves. 55, *Lloyd v. Johnes*. *Reynoldson v. Perkins*, Amb. 564) ; though it cannot be denied, that, persons, having present, immediate, valuable, interests in the same real estate, may become most deeply affected by what is done here in their absence. The same principle in a great variety of cases has obliged the Court to dispense with the general rule as to persons, out of its jurisdiction ; and there are many instances of justice administered in this Court in the absence of those, without whose presence, as parties, if they were within the jurisdiction, it would not be administered ; as it obviously cannot be so completely, as if all persons interested were parties : but the Court does what it can. (See *Beames El. Pl. Eq.* 87, 8.)

There are various other cases ; admitting the general principle ; but forming exceptions upon circumstances. The Plaintiff, suing upon a joint and several bond, must bring forward all the obligors, principals, and sureties (*Bland v. Winter*, 1 Sim. & Stu. 246) : but the rule is dispensed with, where it appears, that the sureties are insolvent ; or have not paid any thing ; and the demand is accordingly restrained, as a demand against the principal ; who has nothing to demand over. The case of *The Water-works Company and Chancey v. May* (*Pre. Ch.* 592, edition by Mr. *Finch*) prove, that, where it is impracticable to make parties, and yet the Court can by arrangement [327] afterwards introduce the persons, as *Quasi* parties, the Court does not require, that they shall be parties on the record ; but will give the opportunity of introducing them by a subsequent proceeding ; and as to the objection, that the shares, originally few, may by assignment become very numerous, to which I alluded in the case of *Adair v. The New River Company* (11 Ves. 429), the multiplication of parties cannot satisfactorily account for what the Court has done. As in the original institution of such concerns the interest, which the original under-takers have, is in its nature assignable, every party must be taken to assent to the others assigning, if they thought proper ; and the consequence is, that the multiplication of shares is with the general consent. The principle is, that practical convenience requires that sort of arrangement with regard to the persons, required as parties originally.

In the familiar case of creditors, suing on behalf of themselves and all others, what an infinite number of valuable interests may be bound, in a sense, not absolutely ; as, where the Court for convenience dispenses with the presence of parties, the principle leads it by future arrangement to find out the means of giving them an opportunity in some shape of coming in. Upon questions of marshalling, whether real estate is charged with debts, &c., the case may be sustained originally perhaps by persons, having interests of the least value : but certainly any person, afterwards becoming interested, would have his interest as much attended to, as

if he had been originally a party. The Court must always be open to questions upon the carriage of the cause, applications for re-hearing, &c. ; and I should upon principle find the means, if not supplied by precedent (see 1 *Sch. & Lef.* 409, *Giffard v. Hort*), of giving a creditor, coming in after the institution of a suit, the opportunity of supporting his [328] interest better than the Plaintiff could. A bond creditor, having been in partnership with the debtor, may, if there are assets, go in before the Master ; but the Court must find the means of ascertaining, whether such creditor was not a debtor on the partnership account ; and the account must be taken : or perhaps the Court may find itself obliged to direct a Bill to be filed ; reserving a proportion of the assets for the result of the inquiry in an actual suit. Lord *Thurlow* determined, that the general principle requires a residuary legatee to bring before the Court all persons, interested in the residue : but that admits of exception ; where it is not necessary, or convenient, that all should be before the Court ; as in *Chancey v. May* (*Pre. Ch.* 592, edition by Mr. *Finch*) and the case of *The Water-works Company*. If a residue had been left equally among all the individual members of those societies, upon the same ground of impracticability and inconvenience, it would be competent to some of them to file a Bill on behalf of themselves and the others ; though suing as residuary legatees.

There are various other cases : a Bill by the lord of a manor against some of the tenants, or, *vice versa*, by tenants on behalf of themselves and the others, to establish some right : as a Bill with regard to suit to a mill (11 *Ves.* 444) : a Bill against parishioners for tithes ; or by some parishioners to establish a *Modus*. Another class of cases is that of persons, who, though not a corporation, have the appearance of it : Assurance Societies ; each being an insurer of the others ; as, though it is settled by the Act of Parliament (stat. 6 *Geo. I. c.* 18, s. 12), that no persons, beyond a certain number shall insure as a company, any number of persons may associate for the insurance of each other : all in effect participating as a partnership. It is evident, [329] that if occasion here should arise to resort here for an account, as it would be impossible to bring all persons interested, the suit must be against some, being Proprietors, and accountable parties, instituted by some on behalf of all. This course was taken in the case of *The Widows' Charity* (17 *Ves.* 1) by Lord *Thurlow* ; upon which I observed in the late case of *The Bakers' Company, Pearce v. Piper*. The former arose upon an association of widows, contributing to a fund to pay them annuities. When this fund proved insufficient, every subscriber, who had not been a member long enough to become an annuitant, and the representatives of those, who were dead, had an interest to state their title ; in order to recover her money : but that difficulty was overcome upon this principle, that it was better to go as far as possible towards justice than to deny it altogether. So as to partnerships : the Court will settle the account between those parties who are before it : and do all possible justice. The principle being founded in convenience, a departure from it has been said to be justifiable, where necessary ; and in all these cases the Court has not hesitated to depart from it, with the view by original and subsequent arrangement to do all, that can be done for the purposes of justice ; rather than hold, that no justice shall subsist among persons, who may have entered into these contracts.

It is then said, something may be due to this Defendant. This is a plea to the whole discovery and relief ; and it does not state enough to vary the effect of the allegations in the Bill : but if the Bill had stated, that on taking the account there would be a balance due to the Defendant, this plea would not bar the discovery and relief on the ground, that the Plaintiffs had not tendered to him that balance. What can be made of that is for future consideration : at all events it will not give validity to this [330] plea. Though the Plaintiffs cannot bring forward all the persons, who may be liable upon the result of the account, that is not an obstacle, that should prevent the institution of this suit, if necessary to justice.

The Plea was over-ruled.

(1) *Montgomerie v. The Marquis of Bath*, 3 *Ves.* 560. On a Motion, 6th December 1799, for enlarging the time of payment under that Decree, the Lord Chancellor expressed great doubt, whether it could stand ; and would not make an Order under it without consent. See *Smith v. Snow*, 3 *Madd.* 10 ; *Palmer v. The Earl of Carlisle*, 1 *Sim. & Stu.* 423.

all costs which he as defendant in that suit might be obliged to pay ; it then goes on to allege that the plaintiff, relying on the defendant's promise, employed him as his attorney, and that he was compelled to pay certain costs to the plaintiff in that suit, and that, although all things had happened necessary to entitle the plaintiff to have the defendant's said promise fulfilled, yet the defendant had broken the same, and had not indemnified the plaintiff according to his promise, *or* paid the plaintiff the sum he had paid for such costs, or any part thereof. Now, the breach consists of two parts,—first, that the defendant had not indemnified the plaintiff according to his promise. That would sound in damages, and clearly would not be the subject of a set-off. But the [869] second part of the breach is, that the defendant has not paid the plaintiff the sum which he had been obliged to pay for costs. The plea is confined to that part of the breach : and that, it seems to me, is a debt within the statute, to which a set-off may be pleaded. The defendant, therefore, is entitled to our judgment upon both demurrers.

Judgment for the defendant.

PAUL FELTHOUSE v. BINDLEY. July 8th, 1862.

[S. C. 31 L. J. C. P. 204 ; 6 L. T. 157 ; 10 W. R. 423.]

A. & B. verbally treated for the purchase of a horse by the former of the latter. A few days afterwards, B. wrote to A. saying that he had been informed that there was a misunderstanding as to the price, A. having imagined that he had bought the horse for 30l., B. that he had sold it for 30 guineas. A. thereupon wrote to B. proposing to split the difference, adding,—“If I hear no more about him, I consider the horse is mine at 30l. 15s.” To this no reply was sent. No money was paid, and the horse remained in B.'s possession. Six weeks afterwards, the defendant, an auctioneer who was employed by B. to sell his farming stock, and who had been directed by B. to reserve the horse in question, as it had already been sold, by mistake put it up with the rest and sold it. After the sale B. wrote to A. a letter which substantially amounted to an acknowledgment that the horse had been sold to him :—Held, that A. could not maintain an action against the auctioneer for the conversion of the horse, he having no property in it at the time the defendant sold it,—B.'s subsequent letter not having (as between A. and a stranger) any relation back to A.'s proposal.

This was an action for the conversion of a horse. Pleas, not guilty, and not possessed.

The cause was tried before Keating, J., at the last Summer Assizes at Stafford, when the following facts appeared in evidence :—The plaintiff was a builder residing in London. The defendant was an auctioneer residing at Tamworth. Towards the close of the year 1869, John Felthouse, a nephew of the plaintiff, being about to sell his farming stock by auction, a conversation took place between the uncle and nephew respecting the purchase by the former of a horse of the latter ; and, on the 1st of January, 1860, John Felthouse wrote to his uncle as follows :—

“Bangle, January 1st, 1861.

“Dear Sir,—I saw my father on Saturday. He told [870] me that you considered you had bought the horse for 30l. If so, you are labouring under a mistake, for 30 guineas was the price I put upon him, and you never heard me say less. When you said you would have him, I considered you were aware of the price, as I would not take less.

“JOHN FELTHOUSE.”

The plaintiff on the following day replied as follows :—

“London, January 2nd, 1862.

“Dear Nephew,—Your price, I admit, was 30 guineas. I offered 30l.,—never offered more : and you said the horse was mine. However, as there may be a mistake about him, I will split the difference,—30l. 15s.—I paying all expenses from Tamworth. You can send him at your convenience, between now and the 25th of March. If I hear no more about him, I consider the horse mine at 30l. 15s.

“PAUL FELTHOUSE.”

To this letter the nephew sent no reply ; and on the 25th of February the sale

took place, the horse in question being sold with the rest of the stock, and fetching 33l., which sum was handed over to John Felthouse. On the following day, the defendant (the auctioneer), being apprised of the mistake, wrote to the plaintiff as follows :—

“Tamworth, February 26th, 1861.

“Dear Sir,—I am sorry I am obliged to acknowledge myself forgetful in the matter of one of Mr. John Felthouse’s horses. Instructions were given me to reserve the horse : but the lapse of time, and a multiplicity of business pressing upon me, caused me to forget my previous promise. I hope you will not experience any great inconvenience. I will do all I can to get the horse again : but shall know on Saturday if I have succeeded.

“WILLIAM BINDLEY.”

[871] On the 27th of February, John Felthouse wrote to the plaintiff, as follows :—

“Bangley, February 27th, 1861.

“My dear Uncle,—My sale took place on Monday last, and we were very much annoyed in one instance. When Mr. Bindley came over to take an inventory of the stock, I said that horse (meaning the one I sold to you) is sold. Mr. B. said it would be better to put it in the sale, and he would buy it in without any charge. Father stood by whilst he was running it up, but had no idea but he was doing it for the good of the sale, and according to his previous arrangement, until he heard him call out Mr. Glover. He then went to Mr. B. and said that horse was not to be sold. He exclaimed he had quite forgotten, but would see Mr. Glover and try to recover it, and says he will give 5l. to the gentleman if he will give it up : but we fear it doubtful. I have kept one horse for my own accommodation whilst we remain at Bangley : and, if you like to have it for a few months, say five or six, you are welcome to it, free of any charge, except the expenses of travelling : and if, at the end of that time, you like to return him, you can ; or you can keep him, and let me know what you think he is worth. I am very sorry that such has happened ; but hope we shall make matters all right ; and would have given 5l. rather than that horse should have been given up.

“JOHN FELTHOUSE.”

On the part of the defendant it was submitted that the letter of the 27th of February, 1861, was not admissible in evidence. The learned judge, however, overruled the objection. It was then submitted that the property in the horse was not vested in the plaintiff at the time of the sale by the defendant.

A verdict was found for the plaintiff, damages 33l., leave being reserved to the defendant to move to enter [872] a nonsuit, if the court should be of opinion that the objection was well founded.

Dowdeswell, in Michaelmas Term last, accordingly obtained a rule nisi, on the grounds that “sufficient title or possession of the horse, to maintain the action, was not vested in the plaintiff at the time of the wrong ; that the letter of John Felthouse of the 27th of February, 1861, was not admissible in evidence against the defendant : that, if it was admissible, being after the sale of the horse by the defendant, it did not confer title on the plaintiff ; and that there was at the time of the wrong no sufficient memorandum in writing, or possession of the horse, or payment, to satisfy the statute of frauds.” *Carter v. Toussaint*, 5 B. & Ald. 855, 1 D. & R. 515, and *Bloxam v. Sanders*, 4 B. & C. 941, 7 D. & R. 396, were referred to.

Powell shewed cause. There was an ample note of the contract in writing to satisfy the statute of frauds. When the parties met in December, 1860, it was agreed between them that the plaintiff should become the purchaser of the horse. It is true, there was a slight misunderstanding as to the price, the plaintiff conceiving he had bought it for 30l., the nephew thinking he had sold it for 30 guineas. On being apprised by the nephew that he was under a mistake, the plaintiff wrote to him proposing to split the difference, concluding with saying,—“If I hear no more about him, I consider the horse is mine at 30l. 15s.” The question is whether there has not been an acceptance of that offer by the vendor, though nothing more passed between the uncle and nephew until after the 25th of February, the day on which the sale by auction took place. Could the plaintiff after his letter of the 2nd of January have refused to take the horse ? It is true [873] that letter was unanswered ; but it was proved that the nephew afterwards spoke of the horse as being sold to the plaintiff, and desired the auctioneer (the defen-

dant) to keep it out of the sale. Although written after the conversion, the letter of the 27th of February was clearly evidence, and coupled with the plaintiff's letter of the 2nd of January, constituted a valid note in writing, even as between the uncle and the nephew. [Keating, J. You were bound to shew a binding contract for the sale of the horse before the 25th of February.] The letter of the nephew of the 27th is an admission by him that he had before that day assented to the bargain with the plaintiff. [Byles, J. That only shews a binding contract on the 27th of February. What right had the plaintiff to impose upon the nephew the trouble of writing a letter to decline or to assent to the contract?] It was not necessary that he should assent to the contract by writing: it is enough to shew that he assented to it. [Byles, J. There was no delivery or acceptance: and there could be no admission of delivery and acceptance. Willes, J. To be of any avail, you must make out a valid contract between the uncle and nephew prior to the 25th of February.] It was not necessary that the assent to the terms of the plaintiff's letter should be in writing. In *Dobell v. Hutchinson*, 3 Ad. & E. 355, 5 N. & M. 251, it was held that, where a contract in writing, or note, exists which binds one party to a contract, under the statute of frauds, any subsequent note in writing signed by the other is sufficient to bind him, provided it either contains in itself the terms of the contract, or refers to any contract which contains them. So, in *Smith v. Neale*, ante, vol. ii., p. 67, it was held that a written proposal, containing the terms of a proposed contract, signed by the defendant, and assented to by the plaintiff by word of mouth, is a sufficient agree-^[874]ment within the 4th section of the statute of frauds. [Willes, J. That was a very peculiar case. The plaintiff had done all that she had agreed to do, and nothing remained to be done but performance on the defendant's part. But to say that transactions between third parties are to be controlled or affected by an intermediate letter written by a person who is no party to the record, is a somewhat startling proposition. Byles, J. I feel great difficulty in seeing how the nephew's subsequent admission can be binding on the defendant, or even evidence against him.] It is enough that the memorandum relied on to satisfy the statute of frauds is made at any time before action brought: *Bill v. Bament*, 9 M. & W. 36.

Montague Smith, Q. C., and Dowdeswell, in support of the rule. The letter of the 27th of February was clearly inadmissible. The 17th section of the 29 Car. 2, c. 3, provides that "no contract for the sale of any goods, &c., shall be allowed to be good, except some note or memorandum in writing of the bargain be made and signed by the parties to be charged by such contract," &c. At the time the sale complained of here took place, there clearly was no binding contract for the sale of the horse by the nephew to the plaintiff. [Willes, J. Could the plaintiff have insured the horse on the 25th of February?] He could not: he had no insurable interest. [Willes, J. As to third persons, one cannot see any reason for giving a relation to the subsequent writing, though as between the immediate parties one can.] *Carter v. Toussaint*, 5 B. & Ald. 855, 1 D. & R. 515, is a far stronger case than the present. There, a horse was sold by verbal contract, but no time was fixed for payment of the price. The horse was to remain with the vendors for twenty days without any charge to the vendee. At the expiration of that time, the horse was sent to grass, by the direction of the vendee, and by ^[875]his desire entered as the horse of one of the vendors; and it was held that there was no acceptance of the horse by the vendee, within the 29 Car. 2, c. 3, s. 17. And see *Smith's Mercantile Law*, 4th edit. p. 468, et seq. Here, the plaintiff had clearly no property in the horse on the 25th of February, the day of the sale by the defendant. How, then, can an admission ex post facto by a stranger affect the relative positions of the parties to this record on that day?

WILLES, J. I am of opinion that the rule to enter a nonsuit should be made absolute. The horse in question had belonged to the plaintiff's nephew, John Felthouse. In December, 1860, a conversation took place between the plaintiff and his nephew relative to the purchase of the horse by the former. The uncle seems to have thought that he had on that occasion bought the horse for 30l., the nephew that he had sold it for 30 guineas: but there was clearly no complete bargain at that time. On the 1st of January, 1861, the nephew writes,—“I saw my father on Saturday. He told me that you considered you had bought the horse for 30l. If so, you are labouring under a mistake, for 30 guineas was the price I put upon him, and you never heard me say less. When you said you would have him, I considered you were aware of the price.” To this the uncle replies on the following day,—“Your price, I admit,

was 30 guineas. I offered 30l.; never offered more: and you said the horse was mine. However, as there may be a mistake about him, I will split the difference. If I hear no more about him, I consider the horse mine at 30l. 15s." It is clear that there was no complete bargain on the 2nd of January: and it is also clear that the uncle had no right to impose upon the nephew a sale of his horse for 30l. 15s. unless he chose to comply with the condition of writing to repudiate the offer. The nephew might, no doubt, have [876] bound his uncle to the bargain by writing to him: the uncle might also have retracted his offer at any time before acceptance. It stood an open offer: and so things remained until the 25th of February, when the nephew was about to sell his farming stock by auction. The horse in question being catalogued with the rest of the stock, the auctioneer (the defendant) was told that it was already sold. It is clear, therefore, that the nephew in his own mind intended his uncle to have the horse at the price which he (the uncle) had named,—30l. 15s.: but he had not communicated such his intention to his uncle, or done anything to bind himself. Nothing, therefore, had been done to vest the property in the horse in the plaintiff down to the 25th of February, when the horse was sold by the defendant. It appears to me that, independently of the subsequent letters, there had been no bargain to pass the property in the horse to the plaintiff, and therefore that he had no right to complain of the sale. Then, what is the effect of the subsequent correspondence? The letter of the auctioneer amounts to nothing. The more important letter is that of the nephew, of the 27th of February, which is relied on as shewing that he intended to accept and did accept the terms offered by his uncle's letter of the 2nd of January. That letter, however, may be treated either as an acceptance then for the first time made by him, or as a memorandum of a bargain complete before the 25th of February, sufficient within the statute of frauds. It seems to me that the former is the more likely construction: and, if so, it is clear that the plaintiff cannot recover. But, assuming that there had been a complete parol bargain before the 25th of February, and that the letter of the 27th was a mere expression of the terms of that prior bargain, and not a bargain then for the first time concluded, it would be directly [877] contrary to the decision of the court of Exchequer in *Stockdale v. Dunlop*, 6 M. & W. 224, to hold that that acceptance had relation back to the previous offer so as to bind third persons in respect of a dealing with the property by them in the interim. In that case, Messrs. H. & Co., being the owners of two ships, called the "Antelope" and the "Maria," trading to the coast of Africa, and which were then expected to arrive in Liverpool with cargoes of palm-oil, agreed *verbally* to sell the plaintiffs two hundred tons of oil,—one hundred tons to arrive by the "Antelope," and one hundred tons by the "Maria." The "Antelope" did afterwards arrive with one hundred tons of oil on board, which were delivered by H. & Co. to the plaintiffs. The "Maria," having fifty tons of oil on board, was lost by perils of the sea. The plaintiffs having insured the oil on board the "Maria," together with their expected profits thereon,—it was held that they had no insurable interest, as the contract they had entered into with H. & Co., being verbal only, was incapable of being enforced.

BYLES, J. I am of the same opinion, and have nothing to add to what has fallen from my Brother Willes.

KEATING, J. I am of the same opinion. Had the question arisen as between the uncle and the nephew, there would probably have been some difficulty. But, as between the uncle and the auctioneer, the only question we have to consider is whether the horse was the property of the plaintiff at the time of the sale on the 25th of February. It seems to me that nothing had been done at that time to pass the property out of the nephew and vest it in the plaintiff. A proposal had been made, but there had before that day been no acceptance binding the nephew.

[878] WILLES, J. *Coats v. Chaplin*, 3 Q. B. 483, 2 Gale & D. 552, is an authority to shew that John Felthouse might have had a remedy against the auctioneer. There, the traveller of Morrisons, tradesmen in London, verbally ordered goods for Morrisons of the plaintiffs, manufacturers at Paisley. No order was given as to sending the goods. The plaintiffs gave them to the defendants, carriers, directed to Morrisons, to be taken to them, and also sent an invoice by post to Morrisons, who received it. The goods having been lost by the defendants' negligence, and not delivered to Morrisons,—it was held that the defendants were liable to the plaintiffs.

Rule absolute.

PEARSON, J.

In re MARSEILLES EXTENSION RAILWAY AND
LAND COMPANY.

1885

June 5, 8, 9.

SMALLPAGE'S AND BRANDON'S CASES.

Conflict of Law—Bill of Exchange—Foreign Indorsement—Company—Winding-up—Liquidator—Costs.

Bills of exchange were drawn in *France* by a domiciled Frenchman in the French language, in English form, on an English company, who duly accepted them. The drawer indorsed the bills and sent them to an Englishman in *England* :

Held, that the acceptor could not dispute the negotiability of the bills by reason of the indorsements being invalid according to French law.

Costs of successful claims in a winding-up were not given against the liquidator personally, but out of the assets.

THIS was the hearing of two summonses in the winding-up of the *Marseilles Extension Railway and Land Company*, a limited company, with its registered office in *London*. One summons was taken out on the part of *John Henry Smallpage* that he might be certified to be a creditor of the *Marseilles Extension Railway and Land Company* in respect of two bills of exchange for £2000 and £3000 respectively accepted by the company. The other summons was taken out on the part of Messrs. *G. S. & H. Brandon* that they might be admitted creditors of that company in respect of five bills of exchange of the aggregate amount of £12,000 accepted by the company.

All seven bills of exchange were drawn in duplicate at *Marseilles* by *E. Barry*, a domiciled Frenchman; they were similar except as to the amounts. The following is a copy of the first of exchange of one of the bills :—

“ *Marseille, le premier Octobre 1866.*

B. P. £2000.

“ *A quatre-vingt-dix jours de date, payer par cette première de change à l'ordre de moi-même, la deuxième ne l'étant la somme de quinze cents livres sterlings,*

“ *Valeur reçue,*

E. Barry.”

“ *Marseilles Extension Railway and Land
Company, Limited, à Londres.*

“ *No. 144.”*

VOL. XXX.]

CHANCERY DIVISION.

599

The first of exchange of each bill bore an English adhesive PEARSON, J. stamp, the second a French impressed stamp.

The bills were indorsed by *Barry* to the order of *H. D. Jenken*, an Englishman domiciled in *London*, and were during their currency negotiated with one *John Thomas Dobson* for value. They were indorsed by both *Jenken* and *Dobson*. When due the bills were presented and dishonoured. The applicants had obtained the bills from *Dobson*. Messrs. *Brandon* had received two of the bills before they were due, all the others were received by the holders when over due.

1885
SMALLPAGE'S
AND
BRANDON'S
CASES.

In April, 1867, a resolution to wind up the company voluntarily was passed, and on the 26th of that month an order was made to continue the winding-up under the supervision of the Court.

The bills in question, together with other bills to the amount of £20,000 in all, were renewals of bills drawn by *Barry* to provide for part of the price of certain land he had contracted to sell to the company. There was evidence on the part of the liquidator to shew that the contract for the sale of the land had not been carried out, and that as between *Barry* and the company the company had a right to refuse payment of the bills. A defence to the summons was that according to French law (*Code de Commerce*, arts. 137, 138) the indorsement of the bills was informal, and inoperative to make the bills negotiable, and that they were in the hands of every holder subject to the equities between the company and *Barry*.

Higgins, Q.C., and *Levett*, for *Smallpage*; and *Cookson*, Q.C., and *Grosvenor Woods* for Messrs. *Brandon*:—

The bills were to all intents and purposes English bills, intended to be paid in *England*; and for all purposes, including the mode of indorsement, were to be governed by English law; at all events as against the acceptors, who contracted in *England*. It would be of the utmost inconvenience, and prevent the negotiability of any bills, indorsed abroad, if the burden were cast on the holder of seeing that all the formalities required by the laws of the several places of indorsement had been complied with: *Lloyd v. Guibert* (1); *Lebel v. Tucker* (2); *Trimbey v.*

(1) Law Rep. 1 Q. B. 115.

(2) Law Rep. 3 Q. B. 77.

PEARSON, J. *Vignier* (1); *Allen v. Kemble* (2); *Hirschfeld v. Smith* (3); *Bradlaugh v. De Rin* (4); *Rothschild v. Currie* (5); *Rouquette v. Overmann* (6); *Foote on Private International Law* (7); *Story on the Conflict of Laws* (8).

1885
SMALLPAGE'S
AND
BRANDON'S
CASES.

In case the claims are allowed the liquidator, who has chosen to contest them, ought to be ordered to pay the costs, getting them back from the estate, if he can, in accordance with the rule laid down by the Court of Appeal in *Farrar's Case* (9).

A similar rule prevails in bankruptcy: *Ex parte Angerstein* (10); *Pitts v. La Fontaine* (11).

Everitt, Q.C., and *H. B. Buckley*, for the liquidator:—

According to the law of *France*, the indorsement of *Barry* was only a procuration, and did not make the bills negotiable; it left them subject in every person's hands to the equities between the acceptors and *Barry*. The effect of the indorsement is for all purposes, in *England* as well as in *France*, to be determined by the law of *France*, the place where the bills were drawn, and the indorsement made by a domiciled Frenchman. If the contrary were held, the absurdity would arise that on the same bills actions might be brought by different parties: *Rothschild v. Currie*; *Rouquette v. Overmann*; *Bradlaugh v. De Rin*; *Trimbey v. Vignier*; *Story on the Conflict of Laws* (12).

The rule as to the costs of an unsuccessful appeal by a liquidator, who has already had the decision of the Court against him, does not apply to a claim resisted in the Court below, or proceedings taken by him to save the assets of the company: *Ex parte Bentley* (13).

The liquidator is not the real party to the proceedings, whether taken in his name or in that of the company. The real party is the company, and the company's assets are alone responsible for costs: *Ex parte Kintrea* (14).

The liquidator is only doing his duty in resisting these claims. PEARSON, J.
It would be impossible for a liquidation to be properly carried
out if each contested step was to be taken at the risk of personal
liability.

1885
SMALLPAGE'S
AND
BRANDON'S
CASES.

Higgins and Cookson, in reply.

June 9. PEARSON, J.:—

The first objection taken to these bills was this, that being indorsed by *M. Barry* in *France* the indorsement by *M. Barry* in *France* did not comply with the laws of *France*, and with the 137th section of the *Code de Commerce*, and that inasmuch as that was informal the acceptors in this country are not liable, because the person who takes the bills and holds the bills at the present moment takes them through a person who derived them by means of this informal indorsement, and there is therefore no good title shewn to them in the hands of the present holder.

The first answer that is made to that is this: You, the acceptors, are an English company, you accepted the bills payable in *England*, the contract of acceptance therefore is an English contract, and all that it is necessary to shew is that there is an indorsement which is good according to the law of *England*; therefore as against you if there be such an indorsement there is no need whatever to trouble ourselves with the law of *France*.

Against this it is said, and with great force, that although the drawer of this bill was a Frenchman and the bill was drawn in *France*, nevertheless as against the acceptor the bill is an English bill, and it is not necessary to look at all to the formalities of the French law. On the other hand it is urged by the acceptors,—although we are liable, according to the English law, upon our English contract of acceptance in *England*, nevertheless an indorsement made upon the bill drawn by a French drawer, must be in conformity with the law of *France*, otherwise there is no good indorsement at all. If I had to decide the question as to whether or not where a bill is indorsed in different countries the indorsement must be in every case in conformity with the law of the

PEARSON, J. country in which the indorsement takes place, I should certainly
1885 take time to consider before I came to the conclusion that that
SMALLPAGE'S was the law. But, for the reasons I am about to give, I think it
AND absolutely immaterial in the present case to decide that point;
BRANDON'S because, when I come to look at this bill, I find that the bill
CASES. though drawn in the French language, drawn by M. *Barry* in
Marseilles, is in all other respects an English bill of exchange.
It speaks of English current money and not of French current
money, and it is drawn in a form which according to the French
law would make the bill itself an invalid bill.

Before therefore I could determine that this was to be considered
a French bill, as regards the drawer of the bill, I should have to
come to the conclusion that at the time when this bill was
drawn it was an invalid bill altogether, and to do so would be, to
my mind to decide that which would be, on the face of it, mani-
festly absurd. This is a bill purporting to be, on the face of
it, in all respects drawn as an English bill, not drawn in the
French form though in the French language, drawn according to
the common form in *England*, *valeur reçu*—that is value received—
and perfectly good according to the law of *England*, though
invalid according to the law of *France*, and I come therefore to
the conclusion that this was intended to be, although expressed
in the French language, an English bill of exchange for all pur-
poses, at all events as regards the acceptors of the bill; and that
it is not possible for the acceptors of the bill to say that this is a
French bill drawn in *France*, and that, so far as regards the
drawer, it must be considered therefore as a French bill.

In one of the cases that was cited, *Trimbey v. Vignier* (1),
where the same question arose, there was an opinion given by the
French advocate, M. *Schonda*, upon which I should be exceed-
ingly pleased to act if I properly could. The opinion of the
French advocate simply proved to the Court at that time, as evi-
dence in that case, what the French law was, as a matter of fact,
and I cannot import into this case the evidence given in another
case which has not been given in the present case. M. *Schonda*
gives an interpretation of this article of the *Code de Commerce*

(1) 1 Bing. N. C. 151.

VOL. XXX.]

CHANCERY DIVISION.

603

which to my mind is exceedingly intelligible, and which I should be very glad to adopt as the rule of law in this case. He says that when there is an informality of this kind in the indorsement of a bill of exchange, that informality may be pleaded as between the person who has made the indorsement and the person who is claiming under the indorsement, but that it cannot be set up as between the indorsee and the acceptor. But in the present case, as I have said, it is not necessary for me to decide that that is the rule which ought to be laid down. I hold that as between the drawer, and therefore as between his indorsee and the acceptors, this was intended to be, and to be treated as, an English bill of exchange, and that being so, the indorsement which M. *Barry* made was, to all intents and purposes, a good indorsement. Upon the evidence of the French experts before me, I should have very great difficulty in saying what the law of *France* was with regard to the indorsement, but I think I should come to the conclusion, upon the evidence in this case (so far as I have heard it), that the indorsement made the bills negotiable according to the law of *France*. Whether that was so or not, I hold that this bill, at all events, was properly indorsed by M. *Barry* by merely writing his name across it in the ordinary way in which a bill would be indorsed in this country, and that, as between M. *Barry* and all persons claiming under him, so far as the indorsement goes, it was a good indorsement, and the acceptors therefore could raise no objection to it.

PEARSON, J.
1885
SMALLPAGE'S
AND
BRANDON'S
CASES.

I am glad to be able to come to that conclusion, because it relieves me from that which certainly would have been a very serious difficulty, that of determining upon the decided cases in these Courts, as well as upon the French law, what is the result of an indorsement (which is informal as regards the person who makes it) with regard to those who claim, not against that person, but who claim against the acceptors. To my mind there is exceeding difficulty in determining that the indorsement is to be valid for any purpose in this country, and yet that objection may be taken to it, and that the acceptor is at liberty to say, I am entitled in this country, although for some purposes the indorsement is treated as good, to take advantage of any equities that there may be between myself and the drawer of the bill as against

604

CHANCERY DIVISION.

[VOL. XXX.

PEARSON, J. an indorsee or holder for value who sues upon the acceptance. I
1885 am not bound, I am happy to say, to go into that question at all.
SMALLPAGE'S I feel very strongly the observations of the late Mr. Justice
AND
BRANDON'S *Willes* in the case of *Bradlaugh v. De Rin* (1), in which he points
CASES. out that it is hardly possible to conceive a state of the law in
this country in which there should be two persons able to sue at
the same time on the same bill, one as the agent, and the other
as the holder of the bill.

However, the facts being as they are, I come to the conclusion,
and I so decide, that the indorsement of this bill is a good indorse-
ment, and that the acceptors are liable, so far as the indorsement
goes, to be sued and are bound to pay upon the bill if they have
no other objection.

With regard to the costs, of course the applicants must have
their costs. But in giving them I treat the company as if they
were the Respondents, and give the costs against the company.
I am asked to make the liquidator personally pay costs and leave
him to get them out of the assets of the company if he can. If
the practice of the Court shall be changed, and I am told by the
Court of Appeal that all liquidators who resist any claim are
to be made personally responsible for costs, I shall bow to the
authority, as I shall bow to any other decision that may be made
by a superior Court. But as far as I know the practice, the
practice has not been to make the liquidator liable. And I
conceive that it might render it almost impossible to wind up
any company if such a practice were to be established, because the
result would be, that except in cases where the assets were very
large indeed, no liquidator would choose to resist a claim brought
against a company, without the authority of the Judge, and with-
out being indemnified from all personal liability for costs in case
of the claim being successful. I cannot imagine how any Judge
at Chambers is to deal with an application for such authority, and
tell the liquidator whether he is to resist a claim or whether he
is to bring forward a claim, or to determine before a claim is
argued whether or not the liquidator ought or ought not to be in-
demnified. It seems to me that such a practice would simply tie
up all proceedings in Chambers, and make all windings-up in this

(1) Law Rep. 3 C. P. 543.

CHANCERY DIVISION.

605

Court absolutely impossible. In one view it may be thought it PEARSON, J.
might be desirable that that should be so; but until windings-up 1885
are stopped, and as long as they are going on, I think the only SMALLPAGE'S
reasonable way they should go on is this, that the liquidator should AND
be considered to represent the company, and that the costs should BRANDON'S
be given in the same way in which they would be given if the CASES.
company were defendants, leaving the Court the authority which
it now possesses in all proper cases if the liquidator disregards his
duty, and throws upon the parties costs which he ought not to
throw upon them, to make the liquidator personally responsible
for such dereliction of his duty.

The costs in this case will come out of the assets of the
company.

July 1.

AND

SIR HENRY WILLIAM PEEK, BARONET. RESPONDENT.

*Action of Deceit—False Representation—Fraud—"Legal Fraud"—Company
—Misrepresentation in Prospectus.*

In an action of deceit the plaintiff must prove actual fraud. Fraud is proved when it is shewn that a false representation has been made knowingly, or without belief in its truth, or recklessly, without caring whether it be true or false.

A false statement, made through carelessness and without reasonable ground for believing it to be true, may be evidence of fraud but does not necessarily amount to fraud. Such a statement, if made in the honest belief that it is true, is not fraudulent and does not render the person making it liable to an action of deceit.

A special Act incorporating a tramway company provided that the carriages might be moved by animal power, and, with the consent of the Board of Trade, by steam power. The directors issued a prospectus containing a statement that by their special Act the company had the right to use steam power instead of horses. The plaintiff took shares on the faith of this statement. The Board of Trade afterwards refused their consent to the use of steam power and the company was wound up. The plaintiff having brought an action of deceit against the directors founded upon the false statement:—

Held, reversing the decision of the Court of Appeal and restoring the decision of Stirling J. (37 Ch. D. 541), that the defendants were not liable, the statement as to steam power having been made by them in the honest belief that it was true.

APPEAL from a decision of the Court of Appeal. The facts are set out at length in the report of the decisions below (1). For the present report the following summary will suffice:—

By a special Act (45 & 46 Vict. c. clix.) the Plymouth, Devonport and District Tramways Company was authorized to make certain tramways.

(1) 37 Ch. D. 541.

H. L. (E.) By sect. 35 the carriages used on the tramways might be
1889 moved by animal power and, with the consent of the Board of
DERRY Trade, by steam or any mechanical power for fixed periods and
v. subject to the regulations of the Board.
PEEK.

By sect. 34 of the Tramways Act 1870 (33 & 34 Vict. c. 78), which section was incorporated in the special Act, "all carriages used on any tramway shall be moved by the power prescribed by the special Act, and where no such power is prescribed, by animal power only."

In February 1883 the appellants as directors of the company issued a prospectus containing the following paragraph:—

"One great feature of this undertaking, to which considerable importance should be attached, is, that by the special Act of Parliament obtained, the company has the right to use steam or mechanical motive power, instead of horses, and it is fully expected that by means of this a considerable saving will result in the working expenses of the line as compared with other tramways worked by horses."

Soon after the issue of the prospectus the respondent, relying, as he alleged, upon the representations in this paragraph and believing that the company had an absolute right to use steam and other mechanical power, applied for and obtained shares in the company.

The company proceeded to make tramways, but the Board of Trade refused to consent to the use of steam or mechanical power except on certain portions of the tramways.

In the result the company was wound up, and the respondent in 1885 brought an action of deceit against the appellants claiming damages for the fraudulent misrepresentations of the defendants whereby the plaintiff was induced to take shares in the company.

At the trial before Stirling J. the plaintiff and defendants were called as witnesses. The effect given to their evidence in this House will appear from the judgments of noble and learned Lords.

Stirling J. dismissed the action; but that decision was reversed by the Court of Appeal (Cotton L.J., Sir J. Hannen, and Lopes L.J.) who held that the defendants were liable to make good to the plaintiff the loss sustained by his taking the shares,

VOL. XIV.]

AND PRIVY COUNCIL.

339

and ordered an inquiry (1). Against this decision the defendants appealed. H. L. (E.)

March 28, 29; April 5, 9, 11. Sir *Horace Davey* Q.C. and *Moulton* Q.C. (*M. Muir Mackenzie* with them) for the appellants:—

1889
DERRY
v.
PEEK.

The law as laid down by the Court of Appeal goes much further than any previous decision and is unsound. To support an action of deceit it always was necessary at common law and still is both there and in Chancery to prove fraud, i.e., that the thing was done fraudulently. Fraud never has been and never will be exhaustively defined, the forms which deceit may take being so many and various. There is a negative characteristic: it must be something which an honest man would not do; not merely what a logical or clear-headed man would not do. However unbusinesslike a man may be he is not fraudulent if he acts honestly. The natural consequences of words or acts must be taken to have been intended, but not so as to impute fraud to honesty. No honest mistake, no mistake not prompted by a dishonest intention, is fraud. The shape of the mistake does not make it more or less a fraud if it is a mistake. Once establish that a man honestly intended to do his duty, the consequences cannot turn his words or acts into a fraud. There may be an obligation to see that no untrue statement is made, but the failure to meet that obligation is not fraud, if there is no dishonest intention. The statement may be inaccurate, yet if the defendants honestly—though mistakenly—believed that it substantially represented the truth, there is no fraud, and an action of deceit will not lie. The decision of the Court of Appeal is that to such a statement the law attaches a meaning which makes it fraudulent. A material misstatement may be a ground for rescinding the contract, but the consequences of fraud and of breach of contract are widely different. In an action for breach of contract the defendant must make good his words. In an action founded on fraud he must bear the whole of the consequences which have been induced by the fraudulent statement, which may be very extensive. The essence of fraud is the tricking a person into the bargain. If the fact that the consent of the Board of Trade

(1) 37 Ch. D. 541, 591.

H. L. (E.) 1889
DERRY
v.
PEEK.
—

was necessary was suppressed by these defendants in order to make the bait more alluring there was fraud. The issue then is one of fact, was there an intention to make the bait more alluring? It is not the carelessness leading to an untrue statement which makes fraud; it is the carelessness whether the statement is untrue or not. It is in this sense that the authorities have held defendants liable for fraud when they have made untrue statements "recklessly." The above propositions are the result of the authorities. The law laid down in the earlier cases is well exemplified by *Taylor v. Ashton* (1), where, however, the head-note does not truly represent the effect of the decision, and *Joliffe v. Baker* (2). In *Polhill v. Walter* (3)—which may be relied on by the respondent—the Court considered that the misrepresentation was made by the defendant *knowing it to be untrue*. The idea that something less than fraud was necessary to found an action of deceit crept in first in Lord Chelmsford's observations in *Western Bank of Scotland v. Addie* (4), and was extended by Cotton L.J. in *Weir v. Bell* (5), where he treats "recklessly" as if it meant "negligently," whereas it means "indifferent whether the statement be true or false." This confusion has arisen mainly since the Judicature Act, actions of deceit being tried in Chancery by judges who, sitting without juries, have confounded issues of fact with issues of law. Here the Court of Appeal held that an action of deceit lies if the defendant makes an untrue statement, without reasonable ground for believing it to be true, though he did in fact honestly believe it to be true. If that be the law a negligent, improvident, or wrong-headed man is a fraudulent man. A want of reasonable ground may be evidence of fraud, but it is not the same thing as fraud.

As to the facts, Stirling J. found that the defendants believed the misstatement to be true, and that finding ought to be conclusive. The Court of Appeal do not contradict that finding.

The misstatement complained of really meant that the company had obtained the necessary statutory authority to use steam power, without which authority no consents could have given

AND PRIVY COUNCIL.

341

authority, because by the Tramways Act 1870 (33 & 34 Vict. c. 78 s. 34) steam power is prohibited except where the special Act authorizes steam power. It may be that the defendants knew the statement was not strictly accurate, but if so they honestly thought that the statement conveyed a substantially accurate representation of the fact, either because they thought it not worth while to encumber the prospectus with the qualifications, or because those qualifications were not present to their minds when they made the statement. In the prospectus reference is made to the special Act, so that any one who consulted the Act could see for himself what the authority was.

H. L. (E.)

1889

DERRY

v.

PEEK.

Lastly, the plaintiff was no doubt in some degree influenced by the misstatement, but there was no evidence that he would not have taken the shares if the statement had contained the full truth as to the necessary consents being obtained.

Bompas Q.C., and *Byrne Q.C.* (*Patullo* with them) for the respondent:—

The decision of the Court of Appeal is right and for the reasons there given. Directors are liable not only for a false statement which they know to be false, but for a false statement which they ought to have known to be false. This proposition is supported by the obiter dictum of Lord Westbury in *New Brunswick &c. Co. v. Conybeare* (1), and by the obiter dicta of the Lords in *Peek v. Gurney* (2) as to what the liability of the defendants would have been to original shareholders, and by the judgment of Jessel M.R. in *Smith v. Chadwick* (3).

It is not necessary that there should be carelessness whether the statement is true or not: it is enough if there be carelessness or negligence in making the statement. Making an untrue statement without reasonable ground is negligence which will support an action of deceit. In support of the respondent's contention the following authorities are relied on: *Slim v. Croucher* (4); *Evans v. Bicknell* (5); *Brownlie v. Campbell* (6); *Polhill v. Walter* (7); *Milne v. Marwood* (8); *Denton v. Great*

 v.
 PEEK.

But it is not necessary to go the full length of the propositions contended for. Even if the fourth proposition of Lopes L.J. is not law, the appellants are nevertheless liable; for the evidence shews that the statements were made either with the knowledge that they were untrue or with no belief on the subject.

It was stated that it was fully expected that a considerable saving would be effected by the use of steam. In fact the directors had not considered the matter, and when they did so afterwards there was a majority of one only in favour of steam. The effect of the evidence is not the same as to all the directors. As to Derry, the inference is that he never took the trouble to consider whether the statement was true or false. Wakefield and Wilde had complete knowledge but made statements which they knew not to be true at the time, thinking the requisite consents would be given. Pethick's evidence is inconsistent with itself. At one moment he says that he thought the Board of Trade had no right to refuse consent if its reasonable requirements were met, at another that he thought they had an absolute right to refuse. Moore, it must be admitted, stands in a different position, and can only be held liable under the fourth proposition of Lopes L.J.

The respondents are entitled to judgment on the grounds accepted by Lord Cranworth in *Western Bank of Scotland v. Addie* (11) and by the Earl of Selborne in *Smith v. Chadwick* (12): The belief which would justify the appellants must be one founded on an exercise of judgment. Grounds which would be sufficient in some cases would not be so in others, where uberrima fides is required, e.g. in statements made to an intending partner. As

DERRY

v.

PEEK.

The House took time for consideration, LORD HALSBURY L.C. saying that notice would be given to the appellants if their Lordships desired to hear a reply.

July 1. LORD HALSBURY L.C. :—

My Lords, I have so recently expressed an opinion in the Court of Appeal on the subject of actions of this character that I do not think it necessary to do more than say that I adhere to what I there said (3). To quote the language now some centuries old in dealing with actions of this character, “fraud without damage or damage without fraud” does not give rise to such actions. I have had also the opportunity of reading the judgment of my noble and learned friend Lord Herschell, and I could desire to add nothing to his exhaustive and lucid treatment of the authorities.

My Lords, when I turn to the question of fact I confess I am not altogether satisfied. In the first place I think the statement in the prospectus was untrue,—untrue in fact, and to the minds of such persons as were likely to take shares I think well calculated to mislead. I think such persons would have no idea of the technical division between tramways that had rights to use mechanical means and tramways that had not. What I think they would understand would be that this particular tramway was in an exceptionably advantageous position,—that the statement was of a present existing fact, that it had at the time of the invited subscription for shares the right to use steam. And I think such a statement if wilfully made with the consciousness of its inaccuracy would give rise to an action for deceit, provided that damage had been sustained if a person had acted upon a belief induced by such a prospectus.

But upon the question whether these statements were made with a consciousness of their misleading character, I cannot but

DERRY

v.

PEEK.

Lord Halsbury,
L.C.

be influenced by the opinions entertained by so many of your Lordships that they are consistent with the directors' innocence of any intention to deceive.

The learned judge who saw and heard the witnesses acquitted the defendants of intentional deceit, and although the Court of Appeal held them liable, overruling the decision of the learned judge below, they appear to me to have justified their decision upon grounds which I do not think tenable, namely, that they, the directors, were liable because they had no reasonable ground for the belief which nevertheless it is assumed they sincerely entertained.

My Lords, I think it would have been satisfactory to have had a more minute and exact account of how this prospectus was framed, the actual evidence of the draftsman of it, and the discussions which took place upon the alteration in form; which alteration gave such marked and peculiar prominence to the special feature of this particular tramway, in respect of the possession of power to use steam. Nevertheless, if, as I have said, the facts are reconcilable with the innocence of the directors, and with the absence of the mens rea which I consider an essential condition of an action for deceit, the mere fact of the inaccuracy of the statement ought not to be pressed into constituting a liability which appears to me not to exist according to the law of England.

As to the question whether Sir Henry Peek was induced to take his shares by reliance on the misleading statement, I admit that I have very considerable doubt. On the one hand I do not believe that any one can so far analyse his mental impressions as to be able to say what particular fact in a prospectus induced him to subscribe. On the other hand the description of Sir Henry Peek, even now that the question has been pointedly raised and brought to his mind, of what did or did not induce him to take his shares is hardly reconcilable with his having been substantially induced by the statement in question to take them.

On the whole I acquiesce in the judgment which one of your Lordships is about to move, namely, that the judgment appealed from be reversed.

VOL. XIV.]

AND PRIVY COUNCIL.

345

LORD WATSON:—

H. L. (E.)

1889

DERRY
v.
PEEK.

My Lords, I agree with Stirling J. that, as matter of fact, the appellants did honestly believe in the truth of the representation upon which this action of deceit is based. It is by no means clear that the learned judges of the Court of Appeal meant to differ from that conclusion; but they seem to have held that a man who makes a representation with the view of its being acted upon, in the honest belief that it is true, commits a fraud in the eye of the law, if the court or a jury shall be of opinion that he had not reasonable grounds for his belief. I have no hesitation in rejecting that doctrine, for which I can find no warrant in the law of England. But I shall not trouble your Lordships with any observations of mine, because I accept without reserve the opinion about to be delivered by my noble and learned friend upon my left (Lord Herschell).

LORD BRAMWELL:—

My Lords, I am of opinion that this judgment should be reversed. I am glad to come to this conclusion; for, as far as my judgment goes, it exonerates five men of good character and conduct from a charge of fraud, which, with all submission, I think wholly unfounded, a charge supported on such materials as to make all character precarious. I hope this will not be misunderstood; that promoters of companies will not suppose that they can safely make inaccurate statements with no responsibility. I should much regret any such notion; for the general public is so at the mercy of company promoters, sometimes dishonest, sometimes over sanguine, that it requires all the protection that the law can give it. Particularly should I regret if it was supposed that I did not entirely disapprove of the conduct of those directors who accepted their qualification from the contractor or intended contractor. It is wonderful to me that honest men of ordinary intelligence cannot see the impropriety of this. It is obvious that the contractor can only give this qualification because he means to get it back in the price given for the work he is to do. That price is to be fixed by the directors who have taken his money. They are paid by him to give

H. L. (E.)

1889

DERRY

v.

PEEK.

Lord Bramwell.

him a good price, as high a price as they can, while their duty to their shareholders is to give him one as low as they can.

But there is another thing. The public, seeing these names, may well say, "These are respectable and intelligent men who think well enough of this scheme to adventure their money in it; we will do the same," little knowing that those thus trusted had made themselves safe against loss if the thing turned out ill, while they might gain if it was successful. I am glad to think that Mr. Wilde, a member of my old profession, was not one of those so bribed. The only shade of doubt I have in the case is, that this safety from loss in the directors may have made them less careful in judging of the truth of any statements they have made.

There is another matter I wish to dispose of before going into the particular facts of the case. I think we need not trouble ourselves about "legal fraud," nor whether it is a good or bad expression; because I hold that actual fraud must be proved in this case to make the defendants liable, and, as I understand, there is never any occasion to use the phrase "legal fraud" except when actual fraud cannot be established. "Legal fraud" is only used when some vague ground of action is to be resorted to, or, generally speaking, when the person using it will not take the trouble to find, or cannot find, what duty has been violated or right infringed, but thinks a claim is somehow made out. With the most sincere respect for Sir J. Hannen I cannot think the expression "convenient." I do not think it is "an explanation which very clearly conveys an idea;" at least, I am certain it does not to my mind. I think it a mischievous phrase, and one which has contributed to what I must consider the erroneous decision in this case. But, with these remarks, I have done with it, and will proceed to consider whether the law is not that actual fraud must be proved, and whether that has been done.

Now, I really am reluctant to cite authorities to shew that actual fraud must be established in such a case as this. It is one of the first things one learned, and one has never heard it doubted until recently. I am very glad to think that my noble and learned friend (Lord Herschell) has taken the trouble to go into the authorities fully; but to some extent I deprecate it,

VOL. XIV.]

AND PRIVY COUNCIL.

347

because it seems to me somewhat to come within the principle *Qui s'excuse s'accuse*. When a man makes a contract with another he is bound by it; and, in making it, he is bound not to bring it about by fraud. *Warrantizando vendidit* gives a cause of action if the warranty is broken. Knowingly and fraudulently stating a material untruth which brings about, wholly or partly, the contract, also gives a cause of action. To this may now be added the equitable rule (which is not in question here), that a material misrepresentation, though not fraudulent, may give a right to avoid or rescind a contract where capable of such rescission. To found an action for damages there must be a contract and breach, or fraud. The statement of claim in this case states fraud. Of course that need not be proved merely because it is stated. But no one ever heard of or saw a statement of claim or declaration for deceit without it. There is not an authority at common law, or by a common law lawyer, to the contrary; none has been cited, though there may be some incautious, hesitating, expressions which point that way. Every case from the earliest in *Comyns' Digest* to the present day alleges it. Further, the learned judges of the Court of Appeal hardly deny it. There is indeed an opinion to the contrary of the late Master of the Rolls, but it must be remembered that his knowledge of actions of deceit was small, if any. I did not think, then, that it was necessary to cite cases to shew that to maintain this action fraud in the defendant must be shewn, though I am glad it has been done.

Now, as to the evidence. The plaintiff's case is that the defendants made an untrue statement, which they knew to be untrue, and likely to influence persons reading it; therefore they were fraudulent. It is not necessary to consider whether a *primâ facie* case was made out by the plaintiff. We have all the evidence before us, and must judge on the whole. The alleged untrue statement is that, "The company has the right to use steam or mechanical power instead of horses," and that a saving would be thereby effected. Now, this is certainly untrue, because it is stated as an absolute right, when in truth it was conditional on the approval of the Board of Trade, and the sanction or consent of two local boards; and a conditional right is

H. L. (E.)

1889

DERRY

v.

PEEK.

Lord Bramwell.

H. L. (E.) not the same as an absolute right. It is also certain that the
1889
DERRY
v.
PEEK.
Lord Bramwell.
not the same as an absolute right. It is also certain that the
defendants knew what the truth was, and therefore knew that
what they said was untrue. But it does not follow that the
statement was fraudulently made. There are various kinds of
untruth. There is an absolute untruth, an untruth in itself,
that no addition or qualification can make true; as, if a man says
a thing he saw was black, when it was white, as he remembers
and knows. So, as to *knowing* the truth. A man may know it,
and yet it may not be present to his mind at the moment of
speaking; or, if the fact is present to his mind, it may not occur
to him to be of any use to mention it. For example, suppose a
man was asked whether a writing was necessary in a contract for
the making and purchase of goods, he might well say "Yes,"
without adding that payment on receipt of the goods, or part,
would suffice. He might well think that the question he was
asked was whether a contract for goods to be made required a
writing like a contract for goods in existence. If he was writing
on the subject he would, of course, state the exception or quali-
fication.

Now, consider the case here. These directors naturally trust
to their solicitors to prepare their prospectus. It is prepared and
laid before them. They find the statement of their power to use
steam without qualification. It does not occur to them to alter
it. They swear they had no fraudulent intention. At the very
last they cannot see the fraud. There is their oath, their previous
character unimpeached, and there is to my mind this further
consideration: the truth would have served their purpose as well.
"We have power to use steam, etc., of course with the usual con-
ditions of the approval of the Board of Trade and the consent
of the local authorities, but we may make sure of these being
granted, as the Board of Trade has already allowed the power to
be inserted in the Act, and the local authorities have expressed
their approbation of the scheme." (See plaintiff's answer, 313 (1),
which shews that he would have been content with that state-
ment.)

During the argument I said I am not sure that I should
not have passed the prospectus. I will not say so now, because

(1) The references are to the Appendix printed for the House.

VOL. XIV.]

AND PRIVY COUNCIL.

349

certainly I would not pass it now after knowing the unfortunate use made of the statement, and no one can tell what would have been the state of his mind if one of the factors influencing it was wanting. But I firmly believe it might have been, and was, honestly done by these defendants. Stirling J. saw and heard them, and was of that opinion. It is difficult to say that the plaintiff was not. The report of the 6th of November 1884 shewed that the consent of the Board of Trade was necessary, shewed also that the corporation of Devonport would not consent, shewed therefore the "untruth" and the defendants' knowledge of it, and yet the plaintiff "had every confidence in the directors;" and see his answers to questions 53 and 365.

I now proceed to consider the judgments that have been delivered. It is not necessary to declare my great respect for those who have delivered them. Stirling J. refuses to say whether actual fraud must be shewn, and deals with the case on the footing that the question is whether the defendants had reasonable grounds for making the statement they did. He holds, as I do, that they thought the company had the right, as put in the prospectus, to use steam. Then he says he must "come to the conclusion that they had reasonable grounds for their belief; at all events, that their grounds were not so unreasonable as to justify me in charging them with being guilty of fraud." It is singular that the learned judge seems to consider that unreasonableness must be proved to such an extent as to shew fraud. He then proceeds, for what seem to me unanswerable reasons, to shew that they did every one believe that they had the right stated in the prospectus. He refers to what he saw of them in the box. He says he cannot come to the conclusion that their belief was so unreasonable and so unfounded, and their proceedings so reckless or careless that they ought to be fixed with the consequences of deceit. He makes an excellent remark, that "mercantile men dealing with matters of business would be the first to cry out if I extended the notion of deceit into what is honestly done in the belief that these things would come about, and when they did not come about, make them liable in an action of fraud." My only variation of this would be that it may be that the objection did not, and naturally did not, occur to them. It has

H. L. (E.)

1889

DERRY

v.

PEEK.

Lord Bramwell.

H. L. (E.) not been argued, and I will say no more on the question, whether
1889 had the plaintiff known the contents of the Act he would or
DERRY would not have applied for the shares, than that I agree with
v. Stirling J.
PEEK.

Lord Bramwell. Cotton L.J. says the law is "that where a man makes a state-
ment to be acted on by others which is false, and which is known
by him to be false, or is made by him recklessly, or without care
whether it is true or false, that is without any reasonable ground
for believing it to be true," he is liable to an action for deceit.
Well, I agree to all before the "that is" and I agree to what
comes after if it is taken as equivalent to what goes before, viz.,
"recklessly or without care whether it is true or false," under-
standing "recklessly" as explained by "without care whether it
is true or false." For a man who makes a statement without care
and regard for its truth or falsity commits a fraud. He is a rogue.
For every man who makes a statement says "the truth is so and
so, and I know it or believe it." I say I agree to this as I under-
stand it.

It seems to me, with great respect, that the learned Lord
Justice lost sight of his own definition, and glided into a different
opinion. He says (p. 451, F.), "There is a duty cast upon a
director who makes that statement to take care that there are
no statements in it which in fact are false; to take care that he
has reasonable ground for the material statements which are con-
tained in that document (prospectus), which he intends to be
acted on by others. And although in my opinion it is not neces-
sary there should be what I should call fraud, there must be a
departure from duty, . . . and he has violated the right which
those who receive the statement have to have true statements
only made to them." This seems to be a most formidable matter.
I agree there is some such duty. I agree that not only directors
in prospectuses, but all persons in all dealings should tell the
truth. If they do not they furnish evidence of fraud; they
subject themselves to have the contract rescinded. But to say
that there is "a right to have true statements only made," I
cannot agree, and I think it would be much to be regretted if
there was any such right. Mercantile men, as Stirling J. says,
would indeed cry out. No qualification is stated.

VOL. XIV.]

AND PRIVY COUNCIL.

351

If this is law the statement may be reasonably believed to be true by him who makes it, but if untrue there is to be a cause of action; and that although he may have refused a warranty. I hope not. There is a duty to tell the truth, or, rather, what is believed to be the truth. At page 452, B., his Lordship says: "Where a man makes a false statement without reasonable ground to suppose it to be true, and without taking care to ascertain if it is true, he is liable civilly as much as a person who commits what is usually called fraud." I say I agree if that means making a statement of which he knows or believes not the truth. His Lordship proceeds to examine whether the defendants had reasonable ground for believing what they said, and comes to the conclusion that they had not, and so holds them liable, not because they were dishonest, but because they were unreasonable. I say they never undertook to be otherwise. He says (461 G.): "It is not that I attribute to them any intention to commit fraud, but they have made a statement without any sufficient reason for believing it to be true."

Sir James Hannen says that he agrees with Cotton L.J.'s statement of the law, and adds: "If a man takes upon himself to assert a thing to be true, which he does not know to be true, and has no reasonable ground to believe to be true," it is sufficient in an action of deceit. I agree, if he knows he has no such reasonable ground and the knowledge is present to his mind; otherwise, with great respect, I differ. He cites Lord Cairns (465 F.), that, "if persons take upon themselves to make assertions as to which they are ignorant whether they are true or untrue, they must in a civil point of view be held as responsible as if they had asserted that which they knew to be untrue." So say I, but this does not support Sir James's proposition. Nor does he deal with what he quotes from Lord Cranworth. But further (466), he speaks of legal fraud as meaning "that degree of moral culpability in the statement of an untruth to induce another to alter his position, to which the law attaches responsibility." But if there is moral culpability, I agree there is responsibility. But to believe without reasonable grounds is not moral culpability, but, (if there is such a thing) mental culpability. He says, "the word 'fraud' is in common parlance reserved for actions of great turpitude, but

H. L. (E.)

1889

DERRY

v.

PEEK.

Lord Bramwell.

H. L. (E.) the law applies it to lesser breaches of moral duty." I agree the law applies it to all breaches of the moral duty to tell the truth in dealing with others; but that duty cannot be honestly broken. To be actionable, a breach of that duty must be dishonest. Nay, it is a man's duty sometimes to tell an untruth. For instance, when asked as to a servant's character, he must say what he believes is the truth, however he may have formed his opinion, and however wrong it may be. His Lordship says he cannot think the directors had any reasonable ground for believing the prospectus to be true. But had they the matter present to their minds? Even if this were the question I should decide in their favour.

1889,
DERRY
v.
PEEK.
Lord Bramwell.

As to the judgment of Lopes L.J., I quite agree with what he says: "I know of no fraud which will support an action of deceit to which some moral delinquency does not belong." I think that shews the meaning of what he says "fourthly," though that is made doubtful by what he says at 472 D.

I think, with all respect, that in all the judgments there is, I must say it, a confusion of unreasonableness of belief as evidence of dishonesty, and unreasonableness of belief as of itself a ground of action.

I have examined these judgments at this length owing to my sense of their importance and the importance of the question they deal with. I think it is most undesirable that actions should be maintainable in respect of statements, made unreasonably perhaps, but honestly. I think it would be disastrous if there was "a right to have true statements only made." This case is an example. I think that in this kind of case, as in some others, Courts of Equity have made the mistake of disregarding a valuable general principle in their desire to effect what is, or is thought to be, justice in a particular instance. It might, perhaps, be well to enact that in prospectuses of public companies there should be a warranty of the truth of all statements except where it was expressly said there was no warranty. The objection is to exceptional legislation, and to the danger of driving respectable and responsible men from being promoters, and of substituting for them those who are neither.

In this particular case I hold that unless fraud in the defendants could be shewn, the action is not maintainable. I am

VOL. XIV.]

AND PRIVY COUNCIL.

353

satisfied there was no fraud. Further, if an unreasonable misstatement were enough, I hold there was none. Still further, I do not believe that the plaintiff was influenced by the misstatement, though I am entirely satisfied that he was an honest witness.

H. L. (E.)

1889

DERRY

v.
PEEK.

LORD FITZGERALD :—

My Lords, the pleadings and the facts have been already referred to by the noble Lords who have addressed the House. The action is for deceit. The writ was sued out in February 1885, and originally claimed rescission of the contract with the company. It was subsequently amended by striking out the company as defendants, and also the prayer for rescission, and it assumed the character of an action for deceit against the present appellants (five of the directors), and claimed “damages for the fraudulent misrepresentations of the defendants.”

The statement of claim, which is sufficient in form to raise the real question, alleged the misrepresentation to exist in the prospectus issued in February 1883, and to consist of the paragraph so often read, that the company had a right to use steam or other mechanical motive power; and it was further alleged “that the defendants intended thereby to represent that the company had an absolute right to use steam and other mechanical power,” and that such representation was made fraudulently, and with the view to induce the plaintiff to take shares in the company.

So far, my Lords, the real issue seems to have been raised fairly and clearly, and to depend on matters of fact. There were circumstances connected with the promotion of the company, and the procuring of four of the defendants to act as directors, which tended to create suspicion as to their statements and their bona fides, and attracted directly the attention of the learned judge before whom the case was tried. The defendants, who were severally produced as witnesses at the trial, were exposed to a very lengthened and searching cross-examination by counsel for the plaintiff, and were also carefully examined by the judge as to these transactions, with the result apparently of freeing them from any imputation therein of moral misconduct.

The question which I am about to examine in the first in-

VOL. XIV.

H. L. (E.) stance, and excluding for the present the element of fraud, is,
1889 whether the impugned statement in the prospectus was a false
DERRY statement in the sense of being untrue. That it was inaccurate
v. so far as it purported to give the legal effect of the special Act I
PEEK. do not doubt, but was it untrue as representing the position of
Lord FitzGerald. the company in a popular and business sense? The General
Tramways Act (33 & 34 Vict. c. 78), which regulates tramways
generally, but subject to the provisions of the special Act, if
any, of each company, places them under the supervision of the
Board of Trade with a view to public safety, and for public
protection generally, and by its 34th section it provides "that all
carriages used on tramways shall be moved by the power pre-
scribed by the special Act."

The special Act of this company became law on the 24th of
July 1882, and by ss. 4 and 5 the company incorporated by the
Act is empowered to make the seven tramways in question in
all respects in accordance with the plans and sections. Sect. 15
provides minutely for their formation, subject to the orders of
the Board of Trade, and by sect. 16 the tramway is not to be
opened for public traffic until it shall have been inspected and
certified by the Board of Trade to be fit for such traffic.

Before referring to the 35th section of the special Act we may
glance at sect. 37 of that Act, which empowers the Board of
Trade to make bye-laws as to any of the tramways on which
steam may be used under the authority of the Act, and sect. 44,
which provides that where the company intends to use steam
they shall give two months' notice.

There are several other sections providing for the use of steam
power if the company should elect to use it as the motor.

In the light of those sections of the special Act, and of sect. 34
of the general Act, let us now look at the particular paragraph
of the prospectus, and sect. 35 of the special Act. By that
section Parliament has done that which Parliament could do,
and which the Board of Trade could not do. It has conferred
on the company authority to use steam as its motive power. It
has not imposed on the company the use of steam power, but it
says that they may use it if they elect to do so. Before dealing
with the consent of the Board of Trade I desire to call attention

VOL. XIV.]

AND PRIVY COUNCIL.

355

to the proviso in the 35th section, "that the exercise of the powers hereby conferred with respect to the use of steam shall be subject to the regulations in Schedule 'A,' and to any regulations which may be added thereto or substituted therefor by the Board of Trade for securing to the public all reasonable protection against danger in the exercise of the powers by this Act conferred with respect to the use of steam."

Schedule A., referred to in sect. 35, contains no less than ten regulations for the direction of the company in the exercise of the right so conferred to use steam power.

Now, turning back to the words "with the consent of the Board of Trade," in sect. 35 of the special Act, that consent could not confer, nor would its absence take away, the right conferred by the legislature to use steam as a motor. Its true character is that of a precaution imposed by the legislature to defer the actual exercise of the right conferred until the supervision of the Board of Trade secures to the public all reasonable protections against danger. To attain these objects the legislature provides that the powers it has conferred should not be actually exercised without the consent of the Board of Trade.

My Lords, I have, though with difficulty, arrived at the conclusion that the statement in the prospectus, that by the special Act the company had the right to use steam power, was not untrue in a popular or business sense.

Let us see for a moment in what way and with what meaning General Hutchinson used similar expressions. In his report of the 12th of July 1884 he says: "The Act of 1882 gives, however, the company authority to use mechanical power over all their system, and I think it would be most objectionable that this power should be exercised on parts of Tramway No. 1 on account of the narrowness of three of the roads."

The remainder of the incriminated paragraph of the prospectus is, "and it is fully expected that by means of this (i.e., the use of steam) a considerable saving will result in the working expenses of the line as compared with other tramways worked by horses." This was not untrue: there had been a division of opinion in the directory on the subject, which was finally and before the issue of the prospectus resolved in favour of steam.

H. L. (E.)

1889

DERRY

v.
PEEK.

Lord FitzGerald.

H. L. E.)

1889

DERRY

v.

PEEK.

Lord FitzGerald.

The conclusion I have arrived at, my Lords, is that this paragraph of the prospectus, though inaccurate in point of law in one particular, seems on the whole to have been morally true.

If this view is correct it is an answer to the action, but assuming that it is not correct, or that your Lordships are not prepared to adopt it, I proceed to express my opinion on the remaining substance of the action. Cotton L.J. describes the action as "an action of deceit, a mere common law action." The description is accurate, and I proceed to deal with it as a mere common law action. It has not been in the least altered in its characteristics by having been instituted in the Chancery Division, or tried by a judge without the aid of a jury, nor are your Lordships necessarily driven to consider on the present appeal some of the subtle and refined distinctions which have been engrafted on the clear and simple principles of the common law. The action for deceit at common law is founded on fraud. It is essential to the action that moral fraud should be established, and since the case of *Collins v. Evans* (1), in the Exchequer Chamber, it has never been doubted that fraud must concur with the false statement to maintain the action. It would not be sufficient to shew that a false representation had been made. It must further be established that the defendant knew at the time of making it that the representation was untrue, or, to adopt the language of the learned editors of the *Leading Cases*, that "the defendant must be shewn to have been actually and fraudulently cognisant of the falsehood of his representation or to have made it fraudulently without belief that it was true." The leading counsel for the respondent met the argument fairly on the allegations of fact. He alleged "that the defendants were not honest; that they stated in the prospectus a definite lie, and knew that it was a lie." That is the very issue, in fact, in the case.

The whole law and all the cases on the subject will be found in the notes to *Chandeler v. Lopus* (2) and *Pasley v. Freeman* (3). There is also a clear and able summary of the decisions, both in law and in equity, brought down to the present time in the recent edition of *Benjamin on Sales*, by Pearson-Gee and Boyd.

(1) 5 Q. B. 804, 820.

(2) 1 Smith's L. C. 9th Ed. p. 186.

(3) 2 Smith's L. C. 9th Ed. p. 74.

I desire to make an observation on *Chandelor v. Lopus* (1). The report in Cro. Jac. 4 would seem to have but little direct bearing on the present case were it not for the opinion attributed to Anderson J.; but there is a valuable note in 1 Dyer by Vaillant (75a) which is as follows: Lopus brought an action upon the case against Chandelor, and shewed that, whereas the defendant was a goldsmith, and skilled in the nature of precious stones, and being possessed of a stone which the defendant asserted and assured the said plaintiff to be a true and perfect stone called a bezoar stone &c., upon which the plaintiff bought it &c. There the opinion of Popham C.J. was "that if I have any commodities which are damaged (whether victuals or otherwise), and I, *knowing them to be so*, sell them for good, and affirm them to be so, an action upon the case lies for the deceit: but although they be damaged, if I, *knowing not that*, affirm them to be good, still no action lies, without I warrant them to be good." The action seems originally to have been on a warranty which failed in fact, as there had been no warranty, and it was then sought to support it as an action for deceit; but it was not alleged in the count that the defendant knew the representation to be untrue. It was in reference to that that the observation of Popham C.J. was made. He had the reputation of being a consummate lawyer.

The note in 1 Dyer (75a) was probably by Mr. Treby, afterwards Chief Justice Treby. He edited an edition of Dyer published in 1688. I have not had an opportunity of referring to it, but it is said that he gave the public some highly authoritative notes in that edition. I have quoted from Mr. Vaillant's edition, published in 1794.

The whole evidence given on this appeal has been laid before your Lordships, and we have to deal with it as a whole. That evidence has been already so fully stated and criticised that it is not necessary for me to do more than to state the conclusions of fact which in my opinion are reasonably to be deduced from it, viz. that the several defendants did not know that the incriminated statement in the prospectus was untrue, and that, on the contrary, they severally and in good faith believed it to be

Lord FitzGerald.

true. The conclusions, in fact, at which I have arrived, render it unnecessary for me to consider the long and rather bewildering list of authorities to which your Lordships were referred, or to criticise the reasons given in the Court of Appeal for their decision in the present case. I desire, however, to make a single observation.

There is one characteristic which, as it seems to me, pervades each of the several judgments in the Court of Appeal, viz. that the bonâ fide belief of the defendants in the truth of the representation was unavailing unless it was a reasonable belief resting on reasonable grounds. If this is correct, it seems to me that in an action for "deceit" it would be necessary to submit to the jury (if tried before that tribunal) not only the existence of that belief bonâ fide, but also the grounds on which it was arrived at, and their reasonableness.

I am by no means satisfied that such is the law, and if now driven to express an opinion on it, I would prefer following the opinion of Lord Cranworth in *Western Bank of Scotland v. Addie* (1), in which he said: "I confess that my opinion was that in what his Lordship (the Lord President) thus stated, he went beyond what principle warrants. If persons in the situation of directors of a bank make statements as to the condition of its affairs, which they bonâ fide believe to be true, I cannot think they can be guilty of fraud, because other persons think, or the Court thinks, or your Lordships think, that there was no sufficient ground to warrant the opinion which they had formed. If a little more care and caution must have led the directors to a conclusion different from that which they put forth, this may afford strong evidence to shew that they did not really believe in the truth of what they stated, and so that they were guilty of fraud. But this would be the consequence, not of their having stated as true what they had not reasonable ground to believe to be true, but of their having stated as true what they did not believe to be true."

A director is bound in all particulars to be careful and circumspect, and not, either in his statements to the public or in the performance of the duties he has undertaken, to be careless

(1) Law Rep. 1 H. L., Sc. 145, 168.

VOL. XIV.]

AND PRIVY COUNCIL.

359

or negligent, or rash. Want of care or circumspection, as well as recklessness, may in such a case as the present be taken into consideration in determining at every stage the question of bona fides.

My Lords, I am of opinion that the decision of the Court of Appeal should be reversed.

H. L. (E.)

1889

DERRY

v.
PEEK.

LORD HERSCHELL:—

My Lords, in the statement of claim in this action the respondent, who is the plaintiff, alleges that the appellants made in a prospectus issued by them certain statements which were untrue, that they well knew that the facts were not as stated in the prospectus, and made the representations fraudulently, and with the view to induce the plaintiff to take shares in the company.

“This action is one which is commonly called an action of deceit, a mere common law action.” This is the description of it given by Cotton L.J. in delivering judgment. I think it important that it should be borne in mind that such an action differs essentially from one brought to obtain rescission of a contract on the ground of misrepresentation of a material fact. The principles which govern the two actions differ widely. Where rescission is claimed it is only necessary to prove that there was misrepresentation; then, however honestly it may have been made, however free from blame the person who made it, the contract, having been obtained by misrepresentation, cannot stand. In an action of deceit, on the contrary, it is not enough to establish misrepresentation alone; it is conceded on all hands that something more must be proved to cast liability upon the defendant, though it has been a matter of controversy what additional elements are requisite. I lay stress upon this because observations made by learned judges in actions for rescission have been cited and much relied upon at the bar by counsel for the respondent. Care must obviously be observed in applying the language used in relation to such actions to an action of deceit. Even if the scope of the language used extend beyond the particular action which was being dealt with, it must be remembered that the learned judges were not engaged in deter-

H. L. (E.) mining what is necessary to support an action of deceit, or in
1889 discriminating with nicety the elements which enter into it.

~~~~~  
DERRY  
v.  
PEEK.

~~~~~  
Lord Herschell
~~~~~

There is another class of actions which I must refer to also for the purpose of putting it aside. I mean those cases where a person within whose special province it lay to know a particular fact, has given an erroneous answer to an inquiry made with regard to it by a person desirous of ascertaining the fact for the purpose of determining his course accordingly, and has been held bound to make good the assurance he has given. *Burrowes v. Lock* (1) may be cited as an example, where a trustee had been asked by an intended lender, upon the security of a trust fund, whether notice of any prior incumbrance upon the fund had been given to him. In cases like this it has been said that the circumstance that the answer was honestly made in the belief that it was true affords no defence to the action. Lord Selborne pointed out in *Brownlie v. Campbell* (2) that these cases were in an altogether different category from actions to recover damages for false representation, such as we are now dealing with.

One other observation I have to make before proceeding to consider the law which has been laid down by the learned judges in the Court of Appeal in the case before your Lordships. "An action of deceit is a common law action, and must be decided on the same principles, whether it be brought in the Chancery Division or any of the Common Law Divisions, there being, in my opinion, no such thing as an equitable action for deceit." This was the language of Cotton L.J. in *Arkwright v. Newbould* (3). It was adopted by Lord Blackburn in *Smith v. Chadwick* (4), and is not, I think, open to dispute.

In the Court below Cotton L.J. said: "What in my opinion is a correct statement of the law is this, that where a man makes a statement to be acted upon by others which is false, and which is known by him to be false, or is made by him recklessly, or without care whether it is true or false, that is, without any reasonable ground for believing it to be true, he is liable in an action of deceit at the suit of anyone to whom it was addressed or anyone of the class to whom it was addressed and who was

AND PRIVY COUNCIL.

361

materially induced by the misstatement to do an act to his prejudice." About much that is here stated there cannot, I think, be two opinions. But when the learned Lord Justice speaks of a statement made recklessly or without care whether it is true or false, *that is* without any reasonable ground for believing it to be true, I find myself, with all respect, unable to agree that these are convertible expressions. To make a statement careless whether it be true or false, and therefore without any real belief in its truth, appears to me to be an essentially different thing from making, through want of care, a false statement, which is nevertheless honestly believed to be true. And it is surely conceivable that a man may believe that what he states is the fact, though he has been so wanting in care that the Court may think that there were no sufficient grounds to warrant his belief. I shall have to consider hereafter whether the want of reasonable ground for believing the statement made is sufficient to support an action of deceit. I am only concerned for the moment to point out that it does not follow that it is so, because there is authority for saying that a statement made recklessly, without caring whether it be true or false, affords sufficient foundation for such an action.

That the learned Lord Justice thought that if a false statement were made without reasonable ground for believing it to be true an action of deceit would lie, is clear from a subsequent passage in his judgment. He says that when statements are made in a prospectus like the present, to be circulated amongst persons in order to induce them to take shares, "there is a duty cast upon the director or other person who makes those statements to take care that there are no expressions in them which in fact are false; to take care that he has reasonable ground for the material statements which are contained in that document which he prepares and circulates for the very purpose of its being acted upon by others."

The learned judge proceeds to say: "Although in my opinion it is not necessary that there should be what I should call fraud, yet in these actions, according to my view of the law, there must be a departure from duty, that is to say, an untrue statement made without any reasonable ground for believing that statement

H. L. (E.)

v.

PEEK.

Lord Herschell.

to be true ; and in my opinion when a man makes an untrue statement with an intention that it shall be acted upon without any reasonable ground for believing that statement to be true he makes a default in a duty which was thrown upon him from the position he has taken upon himself, and he violates the right which those to whom he makes the statement have to have true statements only made to them."

Now I have first to remark on these observations that the alleged "right" must surely be here stated too widely, if it is intended to refer to a legal right, the violation of which may give rise to an action for damages. For if there be a right to have true statements only made, this will render liable to an action those who make untrue statements, however innocently. This cannot have been meant. I think it must have been intended to make the statement of the right correspond with that of the alleged duty, the departure from which is said to be making an untrue statement without any reasonable ground for believing it to be true. I have further to observe that the Lord Justice distinctly says that if there be such a departure from duty an action of deceit can be maintained, though there be not what he should call fraud. I shall have by-and-by to consider the discussions which have arisen as to the difference between the popular understanding of the word "fraud" and the interpretation given to it by lawyers, which have led to the use of such expressions as "legal fraud," or "fraud in law;" but I may state at once that, in my opinion, without proof of fraud no action of deceit is maintainable. When I examine the cases which have been decided upon this branch of the law, I shall endeavour to shew that there is abundant authority to warrant this proposition.

I return now to the judgments delivered in the Court of Appeal. Sir James Hannen says: "I take the law to be that if a man takes upon himself to assert a thing to be true which he does not know to be true, and has no reasonable ground to believe to be true, in order to induce another to act upon the assertion, who does so act and is thereby damnified, the person so damnified is entitled to maintain an action for deceit." Again, Lopes L.J. states what, in his opinion, is the result of the

VOL. XIV.]

AND PRIVY COUNCIL.

363

cases. I will not trouble your Lordships with quoting the first three propositions which he lays down, although I do not feel sure that the third is distinct from, and not rather an instance of, the case dealt with by the second proposition. But he says that a person making a false statement, intended to be and in fact relied on by the person to whom it is made, may be sued by the person damaged thereby: "Fourthly, if it is untrue in fact, but believed to be true, but without any reasonable grounds for such belief."

H. L. (E.)

1889

DERRY

v.  
PEEK.

Lord Herschell.

It will thus be seen that all the learned judges concurred in thinking that it was sufficient to prove that the representations made were not in accordance with fact, and that the person making them had no reasonable ground for believing them. They did not treat the absence of such reasonable ground as evidence merely that the statements were made recklessly, careless whether they were true or false, and without belief that they were true, but they adopted as the test of liability, not the existence of belief in the truth of the assertions made, but whether the belief in them was founded upon any reasonable grounds. It will be seen, further, that the Court did not purport to be establishing any new doctrine. They deemed that they were only following the cases already decided, and that the proposition which they concurred in laying down was established by prior authorities. Indeed, Lopes L.J. expressly states the law in this respect to be well settled. This renders a close and critical examination of the earlier authorities necessary.

I need go no further back than the leading case of *Pasley v. Freeman* (1). If it was not there for the first time held that an action of deceit would lie in respect of fraudulent representations against a person not a party to a contract induced by them, the law was at all events not so well settled but that a distinguished Judge, Grose J., differing from his brethren on the Bench, held that such an action was not maintainable. Buller J., who held that the action lay, adopted in relation to it the language of Croke J., in 3 Bulstrode 95, who said: "Fraud without damage, or damage without fraud, gives no cause of action, but where these two concur an action lies." In reviewing the case

(1) 2 Smith's L. C. 74.

H. L. (E.) of *Crosse v. Gardner* (1) he says: "Knowledge of the falsehood  
1889 of the thing asserted is fraud and deceit;" and further, after  
DERRY pointing out that in *Risney v. Selby* (2) the judgment proceeded  
v. wholly on the ground that the defendant knew what he asserted  
PEEK. to be false, he adds: "The assertion alone will not maintain the  
Lord Herschell, action, but the plaintiff must go on to prove that it was false,  
and that the defendant knew it to be so," the latter words being  
specially emphasised. Kenyon C.J. said: "The plaintiffs applied  
to the defendant, telling him that they were going to deal with  
Falch, and desired to be informed of his credit, when the defen-  
dant fraudulently, and knowing it to be otherwise, and with a  
design to deceive the plaintiffs, made the false affirmation stated  
on the record, by which they sustained damage. Can a doubt be  
entertained for a moment but that this is injurious to the  
plaintiffs?" In this case it was evidently considered that fraud  
was the basis of the action, and that such fraud might consist  
in making a statement known to be false.

*Haycraft v. Creasy* (3) was again an action in respect of a false  
affirmation made by the defendant to the plaintiff about the  
credit of a third party whom the plaintiff was about to trust.  
The words complained of were, "I can assure you of my own know-  
ledge that you may credit Miss R. to any amount with perfect  
safety." All the judges were agreed that fraud was of the essence  
of the action, but they differed in their view of the conclusion to  
be drawn from the facts. Lord Kenyon thought that fraud had  
been proved, because the defendant stated that to be true within  
his own knowledge which he did not know to be true. The other  
judges thinking that the defendant's words vouching his own  
knowledge were no more than a strong expression of opinion,  
inasmuch as a statement concerning the credit of another can be  
no more than a matter of opinion, and that he did believe the  
lady's credit to be what he represented, held that the action  
would not lie. It is beside the present purpose to inquire which  
view of the facts was the more sound. Upon the law there  
was no difference of opinion. It is a distinct decision that know-  
ledge of the falsity of the affirmation made is essential to the

(1) Carth. 90.

(2) 1 Salk. 211.

(3) 2 East, 92.

maintenance of the action, and that belief in its truth affords a defence.

I may pass now to *Foster v. Charles* (1). It was there contended that the defendant was not liable, even though the representation he had made was false to his knowledge, because he had no intention of defrauding or injuring the plaintiff. This contention was not upheld by the Court, Tindal C.J. saying: "It is fraud in law if a party makes representations which he knows to be false, and injury ensues, although the motives from which the representations proceeded may not have been bad." This is the first of the cases in which I have met with the expression "fraud in law." It was manifestly used in relation to the argument that the defendant was not actuated by a desire to defraud or injure the person to whom the representation was made. The popular use of the word "fraud" perhaps involves generally the conception of such a motive as one of its elements. But I do not think the Chief Justice intended to indicate any doubt that the act which he characterised as a fraud in law was in truth fraudulent as a matter of fact also. Wilfully to tell a falsehood, intending that another shall be led to act upon it as if it were the truth, may well be termed fraudulent, whatever the motive which induces it, though it be neither gain to the person making the assertion nor injury to the person to whom it is made.

*Foster v. Charles* (1) was followed in *Corbett v. Brown* (2), and shortly afterwards in *Polhill v. Walter* (3). The learned counsel for the respondent placed great reliance on this case, because although the jury had negatived the existence of fraud in fact the defendant was nevertheless held liable. It is plain, however, that all that was meant by this finding of the jury was, that the defendant was not actuated by any corrupt or improper motive, for Lord Tenterden says, "It was contended that . . . in order to maintain this species of action it is not necessary to prove that the false representation was made from a corrupt motive of gain to the defendant or a wicked motive of injury to the plaintiff; it was said to be enough if a representation is made which the party

H. L. (E.) making it knows to be untrue, and which is intended by him, 1889. or which from the mode in which it is made is calculated, to induce another to act on the faith of it in such a way as that he DERRY may incur damage, and that damage is actually incurred. A v. PEEK. wilful falsehood of such a nature was contended to be in the legal Lord Herschell. sense of the word *a fraud*, and for this position was cited *Foster v. Charles* (1), to which may be added the recent case of *Corbett v. Brown* (2). The principle of these cases appears to us to be well founded, and to apply to the present."

In a later case of *Crawshay v. Thompson* (3) Maule J. explains *Polhill v. Walter* (4) thus: "If a wrong be done by a false representation of a party who knows such representation to be false, the law will infer an intention to injure. That is the effect of *Polhill v. Walter*" (4). In the same case, Cresswell J. defines "fraud in law," in terms which have been often quoted. "The cases," he says, "may be considered to establish the principle that fraud in law consists in knowingly asserting that which is false in fact to the injury of another."

In *Moens v. Heyworth* (5), which was decided in the same year as *Crawshay v. Thompson* (3), Lord Abinger having suggested that an action of fraud might be maintained where no moral blame was to be imputed, Parke B. said: "To support that count (viz., a count for fraudulent representation) it was essential to prove that the defendants *knowingly*" (and I observe that this word is emphasised), "by words or acts, made such a representation as is stated in the third count, relative to the invoice of these goods, as they knew to be untrue."

The next case in the series, *Taylor v. Ashton* (6), is one which strikes me as being of great importance. It was an action brought against directors of a bank for fraudulent representations as to its affairs, whereby the plaintiff was induced to take shares. The jury found the defendants not guilty of fraud, but expressed the opinion that they had been guilty of gross negligence. Exception was taken to the mode in which the case was left to the jury, and it was contended that their verdict was sufficient

AND PRIVY COUNCIL.

367

to render the defendants liable ; Parke B., however, in delivering the opinion of the Court said : “ It is insisted that even that (viz., the gross negligence which the jury had found), accompanied with a damage to the plaintiff in consequence of that gross negligence, would be sufficient to give him a right of action. From this proposition we entirely dissent, because we are of opinion that, independently of any contract between the parties, no one can be made responsible for a representation of this kind unless it be *fraudulently made*. . . . But then it was said that in order to constitute that fraud, it was not necessary to shew that the defendants *knew* the fact they stated to be untrue, that it was enough that the fact *was* untrue if they communicated that fact for a deceitful purpose, and to that proposition the Court is prepared to assent. It is not necessary to shew that the defendants knew the facts to be untrue ; if they stated a fact which was untrue for a fraudulent purpose, they at the same time *not believing* that fact to be true, in that case it would be both a legal and moral fraud.”

Now it is impossible to conceive a more emphatic declaration than this, that to support an action of deceit fraud must be proved, and that nothing less than fraud will do. I can find no trace of the idea that it would suffice if it were shewn that the defendants had not reasonable grounds for believing the statements they made. It is difficult to understand how the defendants could, in the case on which I am commenting, have been guilty of gross negligence in making the statements they did, if they had reasonable grounds for believing them to be true, or if they had taken care that they had reasonable grounds for making them.

All the cases I have hitherto referred to were in courts of first instance. But in *Collins v. Evans* (1) they were reviewed by the Exchequer Chamber. The judgment of the Court was delivered by Tindal C.J. After stating the question at issue to be “ whether a statement or representation which is false in fact, but not known to be so by the party making it, but, on the contrary, made honestly and in the full belief that it is true, affords a ground of action,” he proceeds to say : “ The current of

H. L. (E.)

1889

DEBBY

v.

PEEK.

Lord Herschell.

(1) 5 Q. B. 804, 820.

H. L. (E.) the authorities, from *Pasley v. Freeman* (1) downwards, has laid down the general rule of law to be, that fraud must concur with the false statement in order to give a ground of action." Is it not clear that the Court considered that fraud was absent if the statement was "made honestly, and in the full belief that it was true"? 1889  
DERRY  
v.  
PEEK.  
Lord Herschell.

In *Evans v. Edmonds* (2) Maule J. expressed an important opinion, often quoted, which has been thought to carry the law further than the previous authorities, though I do not think it really does so. He said: "If a man having no knowledge whatever on the subject takes upon himself to represent a certain state of facts to exist he does so at his peril, and if it be done either with a view to secure some benefit to himself or to deceive a third person he is in law guilty of a fraud, for he takes upon himself to warrant his own belief of the truth of that which he so asserts. Although the person making the representation may have no knowledge of its falsehood the representation may still have been fraudulently made." The foundation of this proposition manifestly is, that a person making any statement which he intends another to act upon must be taken to warrant his belief in its truth. Any person making such a statement must always be aware that the person to whom it is made will understand, if not that he who makes it *knows*, yet at least that he *believes* it to be true. And if he has no such belief he is as much guilty of fraud as if he had made any other representation which he knew to be false, or did not believe to be true.

I now arrive at the earliest case in which I find the suggestion that an untrue statement made without reasonable ground for believing it will support an action for deceit. In *Western Bank of Scotland v. Addie* (3) the Lord President told the jury "that if a case should occur of directors taking upon themselves to put forth in their report statements of importance in regard to the affairs of the bank false in themselves and which they did not believe, or had no reasonable ground to believe to be true, that would be a misrepresentation and deceit." Exception having been taken to this direction without avail in the Court of Session, Lord Chelmsford in this House said: "I agree in the propriety of this

(1) 2 Smith's L. C. 74.

(2) 13 C. B. 777.

(3) Law Rep. 1 H. L., Sc. 145, 162.

interlocutor. In the argument upon this exception the case was put of an honest belief being entertained by the directors, of the reasonableness of which it was said the jury, upon this direction, would have to judge. But supposing a person makes an untrue statement which he asserts to be the result of a bonâ fide belief in its truth, how can the bona fides be tested except by considering the grounds of such belief? And if an untrue statement is made founded upon a belief which is destitute of all reasonable grounds, or which the least inquiry would immediately correct, I do not see that it is not fairly and correctly characterised as misrepresentation and deceit."

I think there is here some confusion between that which is evidence of fraud, and that which constitutes it. A consideration of the grounds of belief is no doubt an important aid in ascertaining whether the belief was really entertained. A man's mere assertion that he believed the statement he made to be true is not accepted as conclusive proof that he did so. There may be such an absence of reasonable ground for his belief as, in spite of his assertion, to carry conviction to the mind that he had not really the belief which he alleges. If the learned Lord intended to go further, as apparently he did, and to say that though the belief was really entertained, yet if there were no reasonable grounds for it, the person making the statement was guilty of fraud in the same way as if he had known what he stated to be false, I say, with all respect, that the previous authorities afford no warrant for the view that an action of deceit would lie under such circumstances. A man who forms his belief carelessly, or is unreasonably credulous, may be blameworthy when he makes a representation on which another is to act, but he is not, in my opinion, fraudulent in the sense in which that word was used in all the cases from *Pasley v. Freeman* (1) down to that with which I am now dealing. Even when the expression "fraud in law" has been employed, there has always been present, and regarded as an essential element, that the deception was wilful either because the untrue statement was known to be untrue, or because belief in it was asserted without such belief existing.

H. L. (E.)  
1889  
DERRY  
v.  
PEEK.  
Lord Herschell.

(1) 2 Smith's L. C. 71.

H. L. (E.) I have made these remarks with the more confidence because  
1889 they appear to me to have the high sanction of Lord Cranworth.  
DERRY In delivering his opinion in the same case he said: "I confess  
v. that my opinion was that in what his Lordship (the Lord Presi-  
PEEK. dent) thus stated, he went beyond what principle warrants. If  
Lord Herschell. persons in the situation of directors of a bank make statements as  
to the condition of its affairs which they bonâ fide believe to be  
true, I cannot think they can be guilty of fraud because other  
persons think, or the Court thinks, or your Lordships think, that  
there was no sufficient ground to warrant the opinion which they  
had formed. If a little more care and caution must have led  
the directors to a conclusion different from that which they put  
forth, this may afford strong evidence to shew that they did  
not really believe in the truth of what they stated, and so that  
they were guilty of fraud. But this would be the consequence  
not of their having stated as true what they had not reasonable  
ground to believe to be true, but of their having stated as true  
what they did not believe to be true."

Sir James Hannen, in his judgment below, seeks to limit the application of what Lord Cranworth says to cases where the statement made is a matter of opinion only. With all deference I do not think it was intended to be or can be so limited. The direction which he was considering, and which he thought went beyond what true principle warranted, had relation to making false statements of importance in regard to the affairs of the bank. When this is borne in mind, and the words which follow those quoted by Sir James Hannen are looked at, it becomes to my mind obvious that Lord Cranworth did not use the words "the opinion which they had formed" as meaning anything different from "the belief which they entertained."

The opinions expressed by Lord Cairns in two well-known cases have been cited as though they supported the view that an action of deceit might be maintained without any fraud on the part of the person sued. I do not think they bear any such construction. In the case of *Reese Silver Mining Co. v. Smith* (1) he said: "If persons take upon themselves to make assertions as to which they are ignorant whether they are true or untrue

(1) Law Rep. 4 H. L. 64, 79.

VOL. XIV.]

AND PRIVY COUNCIL.

371

they must, in a civil point of view, be held as responsible as if they had asserted that which they knew to be untrue." This must mean that the persons referred to were conscious when making the assertion that they were ignorant whether it was true or untrue. For if not it might be said of any one who innocently makes a false statement. He must be ignorant that it is untrue, for otherwise he would not make it innocently; he must be ignorant that it is true, for by the hypothesis it is false. Construing the language of Lord Cairns in the sense I have indicated, it is no more than an adoption of the opinion expressed by Maule J. in *Evans v. Edmonds* (1). It is a case of the representation of a person's belief in a fact when he is conscious that he knows not whether it be true or false, and when he has therefore no such belief. When Lord Cairns speaks of it as not being fraud in the more invidious sense, he refers, I think, only to the fact that there was no intention to cheat or injure.

H. L. (E.)

1889

DERRY

v.

PEEK.

Lord Herschell.

In *Peek v. Gurney* (2) the same learned Lord, after alluding to the circumstance that the defendants had been acquitted of fraud upon a criminal charge, and that there was a great deal to shew that they were labouring under the impression that the concern had in it the elements of a profitable commercial undertaking, proceeds to say: "They may be absolved from any charge of a wilful design or motive to mislead or defraud the public. But in a civil proceeding of this kind all that your Lordships have to examine is the question, was there, or was there not, misrepresentation in point of fact? If there was, however innocent the motive may have been, your Lordships will be obliged to arrive at the consequences which properly would result from what was done." In the case then under consideration it was clear that if there had been a false statement of fact it had been knowingly made. Lord Cairns certainly could not have meant that in an action of deceit the only question to be considered was whether or not there was misrepresentation in point of fact. All that he there pointed out was that in such a case motive was immaterial: that it mattered not that there was no design to mislead or defraud the public if a false representation were knowingly made. It was therefore but an affirmation of the law laid down in *Foster*

(1) 13 C. B. 777.

(2) Law Rep. 6 H. L. 377, 409.

H. L. (E.) v. *Charles* (1), *Polhill v. Walter* (2), and other cases I have already referred to.

1889

DERRY

v.

PEEK.

Lord Herschell.

I come now to very recent cases. In *Weir v. Bell* (3) Lord Bramwell vigorously criticised the expression "legal fraud," and indicated a very decided opinion that an action founded on fraud could not be sustained except by the proof of fraud in fact. I have already given my reasons for thinking that, until recent times at all events, the judges who spoke of fraud in law did not mean to exclude the existence of fraud in fact, but only of an intention to defraud or injure.

In the same case Cotton L.J. stated the law in much the same way as he did in the present case, treating "recklessly" as equivalent to "without any reasonable ground for believing" the statements made. But the same learned judge in *Arkwright v. Newbold* (4) laid down the law somewhat differently, for he said: "In an action of deceit the representation to found the action must not be innocent, that is to say, it must be made either with knowledge of its being false, or with a reckless disregard as to whether it is or is not true." And his exposition of the law was substantially the same in *Edgington v. Fitzmaurice* (5). In this latter case Bowen L.J. defined what the plaintiff must prove in addition to the falsity of the statement, as "secondly, that it was false to the knowledge of the defendants, or that they made it not caring whether it was true or false."

It only remains to notice the case of *Smith v. Chadwick* (6). The late Master of the Rolls there said, "A man may issue a prospectus or make any other statement to induce another to enter into a contract, believing that his statement is true, and not intending to deceive; but he may through carelessness have made statements which are not true, and which he ought to have known were not true, and if he does so he is liable in an action for deceit; he cannot be allowed to escape merely because he had good intentions, and did not intend to defraud." This, like everything else that fell from that learned judge, is worthy of respectful consideration. With the last sentence I quite agree,

(1) 7 Bing. 105.

(2) 3 B. & Ad. 114.

(3) 3 Ex. D. 238.

(4) 17 Ch. D. 301.

AND PRIVY COUNCIL.

373

but I cannot assent to the doctrine that a false statement made through carelessness, and which ought to have been known to be untrue, of itself renders the person who makes it liable to an action for deceit. This does not seem to me by any means necessarily to amount to fraud, without which the action will not, in my opinion, lie.

H. L. (E.)

1889

DERRY

v.

PEEK.

Lord Herschell.

It must be remembered that it was not requisite for Sir George Jessel in *Smith v. Chadwick* (1) to form an opinion whether a statement carelessly made, but honestly believed, could be the foundation of an action of deceit. The decision did not turn on any such point. The conclusion at which he arrived is expressed in these terms: "On the whole I have come to the conclusion that this, although in some respects inaccurate, and in some respects not altogether free from imputation of carelessness, was a fair, honest, and bonâ fide statement on the part of the defendants, and by no means exposes them to an action for deceit."

I may further note that in the same case, Lindley L.J. said: "The plaintiff has to prove, first, that the misrepresentation was made to him; secondly, he must prove that it was false; thirdly, that it was false to the knowledge of the defendants, or at all events that they did not believe the truth of it." This appears to be a different statement of the law to that which I have just criticised, and one much more in accord with the prior decisions.

The case of *Smith v. Chadwick* was carried to your Lordships' House (2). Lord Selborne thus laid down the law: "I conceive that in an action of deceit it is the duty of the plaintiff to establish two things: first, actual fraud, which is to be judged of by the nature and character of the representations made, considered with reference to the object for which they were made, the knowledge or means of knowledge of the person making them, and the intention which the law justly imputes to every man to produce those consequences which are the natural result of his acts; and secondly, he must establish that this fraud was an inducing cause to the contract." It will be noticed that the noble and learned Lord regards the proof of actual fraud as essential, all the other matters to which he refers are elements to be considered in determining whether such fraud has been

(1) 20 Ch. D. 27, 44, 67.

(2) 9 App. Cas. 187, 190.

H. L. (E.) established. Lord Blackburn indicated that although he nearly  
1889 agreed with the Master of the Rolls, that learned judge had not  
DERRY; quite stated what he conceived to be the law. He did not point  
v. out precisely how far he differed, but it is impossible to read his  
PEEK. judgment in this case, or in that of *Brownlie v. Campbell* (1) with-  
Lord Herschell. out seeing that in his opinion proof of actual fraud or of a wilful  
deception was requisite.

Having now drawn attention, I believe, to all the cases having a material bearing upon the question under consideration, I proceed to state briefly the conclusions to which I have been led. I think the authorities establish the following propositions: First, in order to sustain an action of deceit, there must be proof of fraud, and nothing short of that will suffice. Secondly, fraud is proved when it is shewn that a false representation has been made (1) knowingly, or (2) without belief in its truth, or (3) recklessly, careless whether it be true or false. Although I have treated the second and third as distinct cases, I think the third is but an instance of the second, for one who makes a statement under such circumstances can have no real belief in the truth of what he states. To prevent a false statement being fraudulent, there must, I think, always be an honest belief in its truth. And this probably covers the whole ground, for one who knowingly alleges that which is false, has obviously no such honest belief. Thirdly, if fraud be proved, the motive of the person guilty of it is immaterial. It matters not that there was no intention to cheat or injure the person to whom the statement was made.

I think these propositions embrace all that can be supported by decided cases from the time of *Pasley v. Freeman* (2) down to *Western Bank of Scotland v. Addie* (3) in 1867, when the first suggestion is to be found that belief in the truth of what he has stated will not suffice to absolve the defendant if his belief be based on no reasonable grounds. I have shewn that this view was at once dissented from by Lord Cranworth, so that there was at the outset as much authority against it as for it. And I have met with no further assertion of Lord Chelmsford's view until

(1) 5 App. Cas. 925.

(2) 2 Smith's L. C. 74.

(3) Law Rep. 1 H. L., Sc. 145.

the case of *Weir v. Bell* (1), where it seems to be involved in Lord Justice Cotton's enunciation of the law of deceit. But no reason is there given in support of the view, it is treated as established law. The dictum of the late Master of the Rolls, that a false statement made through carelessness, which the person making it ought to have known to be untrue, would sustain an action of deceit, carried the matter still further. But that such an action could be maintained notwithstanding an honest belief that the statement made was true, if there were no reasonable grounds for the belief, was, I think, for the first time decided in the case now under appeal.

In my opinion making a false statement through want of care falls far short of, and is a very different thing from, fraud, and the same may be said of a false representation honestly believed though on insufficient grounds. Indeed Cotton L.J. himself indicated, in the words I have already quoted, that he should not call it fraud. But the whole current of authorities, with which I have so long detained your Lordships, shews to my mind conclusively that fraud is essential to found an action of deceit, and that it cannot be maintained where the acts proved cannot properly be so termed. And the case of *Taylor v. Ashton* (2) appears to me to be in direct conflict with the dictum of Sir George Jessel, and inconsistent with the view taken by the learned judges in the Court below. I observe that Sir Frederick Pollock, in his able work on Torts (p. 243, note), referring, I presume, to the dicta of Cotton L.J. and Sir George Jessel M.R., says that the actual decision in *Taylor v. Ashton* (2) is not consistent with the modern cases on the duty of directors of companies. I think he is right. But for the reasons I have given I am unable to hold that anything less than fraud will render directors or any other persons liable to an action of deceit.

At the same time I desire to say distinctly that when a false statement has been made the questions whether there were reasonable grounds for believing it, and what were the means of knowledge in the possession of the person making it, are most weighty matters for consideration. The ground upon which an alleged belief was founded is a most important test of its reality. I can conceive many cases where the fact that an alleged belief was

H. L. (E.)  
1889  
DERRY  
v.  
PEEK.  
Lord Herschell.

(1) 3 Ex. D. 238.

(2) 11 M. & W. 401.

H. L. (E.) 1889  
DERRY  
v.  
PEEK.  
Lord Herschell.  
destitute of all reasonable foundation would suffice of itself to convince the Court that it was not really entertained, and that the representation was a fraudulent one. So, too, although means of knowledge are, as was pointed out by Lord Blackburn in *Brownlie v. Campbell* (1), a very different thing from knowledge, if I thought that a person making a false statement had shut his eyes to the facts, or purposely abstained from inquiring into them, I should hold that honest belief was absent, and that he was just as fraudulent as if he had knowingly stated that which was false.

I have arrived with some reluctance at the conclusion to which I have felt myself compelled, for I think those who put before the public a prospectus to induce them to embark their money in a commercial enterprise ought to be vigilant to see that it contains such representations only as are in strict accordance with fact, and I should be very unwilling to give any countenance to the contrary idea. I think there is much to be said for the view that this moral duty ought to some extent to be converted into a legal obligation, and that the want of reasonable care to see that statements, made under such circumstances, are true, should be made an actionable wrong. But this is not a matter fit for discussion on the present occasion. If it is to be done the legislature must intervene and expressly give a right of action in respect of such a departure from duty. It ought not, I think, to be done by straining the law, and holding that to be fraudulent which the tribunal feels cannot properly be so described. I think mischief is likely to result from blurring the distinction between carelessness and fraud, and equally holding a man fraudulent whether his acts can or cannot be justly so designated.

It now remains for me to apply what I believe to be the law to the facts of the present case. The charge against the defendants is that they fraudulently represented that by the special Act of Parliament which the company had obtained they had a right to use steam or other mechanical power instead of horses. The test which I purpose employing is to inquire whether the defendants knowingly made a false statement in this respect, or whether, on the contrary, they honestly believed what they stated to be a true and fair representation of the facts. Before considering whether the charge of fraud is proved, I may say that I

VOL. XIV.]

AND PRIVY COUNCIL.

377

approach the case of all the defendants, except Wilde, with the inclination to scrutinise their conduct with severity. They most improperly received sums of money from the promoters, and this unquestionably lays them open to the suspicion of being ready to put before the public whatever was desired by those who were promoting the undertaking. But I think this must not be unduly pressed, and when I find that the statement impeached was concurred in by one whose conduct in the respect I have mentioned was free from blame, and who was under no similar pressure, the case assumes, I think, a different complexion.

H. L. (E.)

1889

DERRY

v.

PEEK.

Lord Herschell.

I must further remark that the learned judge who tried the cause, and who tells us that he carefully watched the demeanour of the witnesses and scanned their evidence, came without hesitation to the conclusion that they were witnesses of truth, and that their evidence, whatever may be its effect, might safely be relied on. An opinion so formed ought not to be differed from except on very clear grounds, and after carefully considering the evidence, I see no reason to dissent from Stirling J.'s conclusion. I shall therefore assume the truth of their testimony.

I agree with the Court below that the statement made did not accurately convey to the mind of a person reading it what the rights of the company were, but to judge whether it may nevertheless have been put forward without subjecting the defendants to the imputation of fraud, your Lordships must consider what were the circumstances. By the General Tramways Act of 1870 it is provided that all carriages used on any tramway shall be moved by the power prescribed by the special Act, and where no such power is prescribed, by animal power only (1). In order, therefore, to enable the company to use steam-power, an Act of Parliament had to be obtained empowering its use. This had been done, but the power was clogged with the condition that it was only to be used with the consent of the Board of Trade. It was therefore incorrect to say that the company had the right to use steam; they would only have that right if they obtained the consent of the Board of Trade. But it is impossible not to see that the fact which would impress itself upon the minds of those connected with the company was that they had, after submitting

(1) 33 & 34 Vict. c. 78, s. 34.

H L. (E.) the plans to the Board of Trade, obtained a special Act empowering the use of steam. It might well be that the fact that the consent of the Board of Trade was necessary would not dwell in the same way upon their minds, if they thought that the consent of the Board would be obtained as a matter of course if its requirements were complied with, and that it was therefore a mere question of expenditure and care. The provision might seem to them analogous to that contained in the General Tramways Act, and I believe in the Railways Act also, prohibiting the line being opened until it had been inspected by the Board of Trade and certified fit for traffic, which no one would regard as a condition practically limiting the right to use the line for the purpose of a tramway or railway. I do not say that the two cases are strictly analogous in point of law, but they may well have been thought so by business men.

1889  
DERRY  
v.  
PEEK.  
—  
Lord Herschell.  
—

I turn now to the evidence of the defendants. I will take first that of Mr. Wilde, whose conduct in relation to the promotion of the company is free from suspicion. He is a member of the Bar and a director of one of the London tramway companies. He states that he was aware that the consent of the Board of Trade was necessary, but that he thought that such consent had been practically given, inasmuch as, pursuant to the Standing Orders, the plans had been laid before the Board of Trade with the statement that it was intended to use mechanical as well as horsepower, and no objection having been raised by the Board of Trade, and the Bill obtained, he took it for granted that no objection would be raised afterwards, provided the works were properly carried out. He considered, therefore, that, practically and substantially they had the right to use steam, and that the statement was perfectly true.

Mr. Pethick's evidence is to much the same effect. He thought the Board of Trade had no more right to refuse their consent than they would in the case of a railway; that they might have required additions or alterations, but that on any reasonable requirements being complied with they could not refuse their consent. It never entered his thoughts that after the Board had passed their plans, with the knowledge that it was proposed to use steam, they would refuse their consent.

VOL. XIV.]

AND PRIVY COUNCIL.

379

Mr. Moore states that he was under the impression that the passage in the prospectus represented the effect of sect. 35 of the Act, inasmuch as he understood that the consent was obtained. He so understood from the statements made at the board by the solicitors to the company, to the general effect that everything was in order for the use of steam, that the Act had been obtained subject to the usual restrictions, and that they were starting as a tramway company, with full power to use steam as other companies were doing.

Mr. Wakefield, according to his evidence, believed that the statement in the prospectus was fair; he never had a doubt about it. It never occurred to him to say anything about the consent of the Board of Trade, because as they had got the Act of Parliament for steam he presumed at once that they would get it.

Mr. Derry's evidence is somewhat confused, but I think the fair effect of it is that though he was aware that under the Act the consent of the Board of Trade was necessary, he thought that the company having obtained their Act the Board's consent would follow as a matter of course, and that the question of such consent being necessary never crossed his mind at the time the prospectus was issued. He believed at that time that it was correct to say they had the right to use steam.

As I have said, Stirling J. gave credit to these witnesses, and I see no reason to differ from him. What conclusion ought to be drawn from their evidence? I think they were mistaken in supposing that the consent of the Board of Trade would follow as a matter of course because they had obtained their Act. It was absolutely in the discretion of the Board whether such consent should be given. The prospectus was therefore inaccurate. But that is not the question. If they believed that the consent of the Board of Trade was practically concluded by the passing of the Act, has the plaintiff made out, which it was for him to do, that they have been guilty of a fraudulent misrepresentation? I think not. I cannot hold it proved as to any one of them that he knowingly made a false statement, or one which he did not believe to be true, or was careless whether what he stated was true or false. In short, I think they honestly believed that what they asserted was true, and I am of opinion that the charge of fraud made against them has not been established.

H. L. (E.)

1889

DERRY

v.

PEEK.

Lord Herschell.

H. L. (E.) It is not unworthy of note that in his report to the Board of  
1889 Trade, General Hutchinson, who was obviously aware of the pro-  
DERRY visions of the special Act, falls into the very same inaccuracy of  
v. language as is complained of in the defendants, for he says: "The  
PEEK. Act of 1882 gives the company authority to use mechanical  
Lord Herschell. power over all their system."

I quite admit that the statements of witnesses as to their belief are by no means to be accepted blindfold. The probabilities must be considered. Whenever it is necessary to arrive at a conclusion as to the state of mind of another person, and to determine whether his belief under given circumstances was such as he alleges, we can only do so by applying the standard of conduct which our own experience of the ways of men has enabled us to form; by asking ourselves whether a reasonable man would be likely under the circumstances so to believe. I have applied this test, with the result that I have a strong conviction that a reasonable man situated as the defendants were, with their knowledge and means of knowledge, might well believe what they state they did believe, and consider that the representation made was substantially true.

Adopting the language of Jessel M.R. in *Smith v. Chadwick* (1), I conclude by saying that on the whole I have come to the conclusion that the statement, "though in some respects inaccurate and not altogether free from imputation of carelessness, was a fair, honest and bonâ fide statement on the part of the defendants, and by no means exposes them to an action for deceit."

I think the judgment of the Court of Appeal should be reversed.

# Appeal Cases

BEFORE

## THE HOUSE OF LORDS

(ENGLISH—IRISH—AND SCOTTISH)

AND

## THE JUDICIAL COMMITTEE

OF

HER MAJESTY'S MOST HONOURABLE

PRIVY COUNCIL.

[HOUSE OF LORDS.]

THE DUKE OF BEDFORD . . . . APPELLANT; H. I. (E.)

AND

ELLIS AND OTHERS . . . . RESPONDENTS. 1900  
Dec. 10.

*Practice—Parties—Representative Action—Action on behalf of a Class of the Public—Joinder of Plaintiffs—Joinder of several Causes of Action—Rules of Supreme Court, Order XVI, rr. 1, 9.*

Order XVI, r. 9, which provides for persons suing or being sued as representing a class, is not confined to persons who have or claim some beneficial proprietary right which they are asserting or defending. To justify a person suing in a representative character it is enough that he has a common interest with those whom he claims to represent.

Several plaintiffs sued on behalf of themselves and all others the growers of fruit, flowers, vegetables, roots and herbs within the meaning of the Covent Garden Market Act, 1828, to enforce various preferential rights to stands in the market, which they alleged to have been given to the class of growers by the Act. The defendant was the lord of the market:—

*Held*, that without prejudging the construction of the Act the plaintiffs had an interest in common, and that the defendant was not entitled to have the action stayed either on the ground that the plaintiffs had no beneficial proprietary right, or that the joinder of plaintiffs claiming separate and

H. L. (E.)

1900

BEDFORD  
(DUKE OF)

v.

ELLIS.

different rights under the Act, both personally and as representing a class, would embarrass or delay the trial.

The decision of the Court of Appeal, [1899] 1 Ch. 494, affirmed by Lords Macnaghten, Morris and Killanin, and Shand, the Earl of Halsbury L.C. and Lord Brampton dissenting.

*Temperton v. Russell*, [1893] 1 Q. B. 435, reflected on.

*Quare*, whether it was necessary to join the Attorney-General as a defendant.

THE respondents, Ellis and five other persons, on behalf of themselves and all others the growers of fruit, flowers, vegetables, roots or herbs within the meaning of the 9 Geo. 4, c. cxiii., brought an action against the appellant, the Duke of Bedford.

By the statement of claim they set forth certain provisions of the Covent Garden Market Act, 1828 (9 Geo. 4, c. cxiii., a public Act), which they alleged gave various preferential rights in respect of the use of the market to the class of growers. They alleged that the Duke in his management of the market as owner did not comply with the provisions of the Act in certain particulars, and had (inter alia) exacted excessive tolls from the growers. They claimed declarations that they were entitled to the alleged preferential rights, an injunction to restrain the Duke from doing any acts contrary to declarations so claimed, and an account of the sums charged in excess during the six years preceding the issue of the writ. The material parts of the statement of claim and the Act are fully set out in the report of the decision below (1) and are closely discussed in the judgment of Lord Brampton.

The Duke having taken out a summons to set aside the writ and all other proceedings, Romer J., being of opinion that the plaintiffs were not entitled to sue on behalf of themselves and all others the growers of fruit, &c., within the meaning of the Act, nor to sue together as co-plaintiffs in one action in respect of the alleged causes of action respectively alleged by them personally and otherwise than in their capacity as representing themselves and all other growers, ordered that the action be stayed in respect of all matters and causes alleged in a representative capacity, and that unless the plaintiff should within

(1) [1899] 1 Ch. 494.

A. C.

AND PRIVY COUNCIL.

3

fourteen days elect one of them to proceed as sole plaintiff and only in respect of his individual and personal causes of action, the action should be dismissed with costs.

The Court of Appeal (Lindley M.R. and Rigby L.J., Vaughan Williams L.J. dissenting), upon the plaintiffs undertaking to add the Attorney-General as a defendant, ordered that the plaintiffs be at liberty to amend the writ and statement of claim accordingly, and to amend the statement of claim as they might be advised, and that the order of Romer J. be discharged.

The Duke appealed.

H. L. (E.)

1900

BEDFORD  
(DUKE OF)

v.  
ELLIS.

May 8, 10. *Levett, Q.C.*, and *Danckwerts, Q.C.*, for the appellant. The respondents claim to sue as representatives of the growers, relying upon Order XVI., r. 9, which provides that "where there are numerous persons having the same interest in one cause or matter, one or more of such persons may sue or be sued . . . on behalf or for the benefit of all persons so interested." But this only extends "to persons who have or claim some beneficial proprietary right which they are asserting or defending in the cause or matter": *Temperton v. Russell*. (1) The respondents have no such right, and there is not here "one cause or matter." If any respondent has a personal injury owing to a breach of the statutory obligations he can sue for himself, but he cannot sue for such a vague and indefinite class as all growers: see per Lord Eldon in *Weale v. West Middlesex Waterworks Co.* (2); *Jones v. Garcia del Rio*. (3) There is no precedent in the books for such an action.

The cases relied on by Lindley M.R.—*Beeching v. Lloyd* (4) and *Warrick v. Queen's College, Oxford* (5)—are quite different. Shareholders in a company, tenants of a manor, creditors of a debtor, can all be ascertained. Growers cannot: they number many thousands, and exist all over the country and abroad. Any one may become a grower at any time. If there be any such right as is claimed for growers, it is a right which can

v.

ELLIS.

only be enforced (if at all) by the Attorney-General representing the public. If any one has suffered special damage he can sue, but must sue alone. But in truth he can have no right of action under this statute unless he has a lease. Every one has a right to resort to a public market, and this statute confers no right on growers as such. The clauses relied on by the respondents are simply for regulating the market and appropriating particular spaces to particular things—potatoes, fruit, flowers, &c.—and the necessary stands. No action lies for a public nuisance without proof of special damage: if there be any right of action at all here it is in tort for excluding the plaintiffs, but the procedure in Chancery does not apply to actions in tort. Romer J. decided that the Attorney-General alone could sue for the class of growers, and said that the rest of the public might be represented by the Solicitor-General. This was doubted by Lindley M.R., who said he had never heard of such a proceeding. It was adopted in *Attorney-General v. Dean and Canons of Windsor* (1), where the Attorney-General appeared for the informant and the Solicitor-General for the Crown. Secondly, this is a joinder of several plaintiffs for several distinct causes of action. It is not allowed by Order XVI., r. 1; the rights do not “arise out of the same transaction or series of transactions”: *Stroud v. Lawson*. (2)

*Asquith, Q.C.*, and *J. T. Prior*, for the respondents. The right to sue in a representative capacity is not confined to “a beneficial proprietary right.” That is given as an instance, but it is not exclusive. A body of persons having a common interest in a subject-matter may when that interest is threatened be represented by one or more on behalf of the whole. Here the rights and the common interest are created by statute. It is true that in the case of the yearly pitching stands the letting is permissive, not compulsory; but they can only be let to growers. The yearly cart stands must be exclusively appropriated to the growers’ carts, and must be let to them at the schedule tariff. The Duke refused to obey this requirement, and for that there is a cause of action. The statute, no doubt, appropriates and regulates places and stands, but it also imposes

AND PRIVY COUNCIL.

5

an obligation on the Duke to carry out the requirements for the benefit of the growers. This is, no doubt, a large and fluctuating class, but it is one capable of being ascertained, and it has rights antagonistic to that of the general public, and could not therefore be properly represented by the Attorney-General. Rights are claimed in respect of each of the three classes, casual cart stands, yearly cart stands, and yearly pitching stands, and the plaintiffs may succeed in one or two of these and fail in the other; but that is no reason why the claims should not be joined. It is enough that the plaintiffs have a right or rights as a class and against a common enemy.

Secondly, Order xvi., r. 1, embraces this case. There is no reason why each plaintiff should bring a separate action; the claims all arise out of the same transaction or series of transactions, the management of the market.

*Levett, Q.C.*, in reply. Where a grievance complained of is common to a body of persons too numerous to be all made parties, the Court allows one or more to sue for all, provided all the parties have an interest identical with that of the plaintiffs; if what is asked may by possibility be injurious to any of them, those parties must be made defendants, because each of them may have a case to make adverse to the interest of the parties suing. If indeed they are so numerous that it is impossible to make them all defendants, that is a state of things for which no remedy has yet been provided. The words of Lord Cottenham in *Mozley v. Alston* (1) are applicable here. The growers are too numerous to be made all defendants. The relief claimed in this action might be injurious to some of the class.

BEDFORD  
(DUKE OF)  
v.  
ELLIS.  
—

The House took time for consideration.

Aug. 6. EARL OF HALSBURY L.C. My Lords, in this case I feel some difficulty about the judgment that I ought to pronounce. It is not a judgment upon the merits of the cause, but it is in an interlocutory proceeding claiming that the action is improperly constituted and insisting upon the necessity of

(1) (1847) 1 Phill. 790, 799.

H. L. (E.) selecting some one or more plaintiffs who shall represent the same rights. My Lords, I have read the judgment proposed to be delivered by my noble and learned friend Lord Brampton, and I agree with it, but I have great difficulty in arguing the question upon an interlocutory proceeding, for this reason: it appears to me that one of the questions which undoubtedly will arise in the course of the cause will be the question of what rights, if any, exist among the different members of the class—those persons who are put together here as plaintiffs. I have found myself in this difficulty, that if I gave all the reasons for which I agree with my noble and learned friend, Lord Brampton, it appears to me it would be impossible for me afterwards to take a different view when the question comes to be tried at the hearing of the cause. I think I might find it extremely difficult in saying what I should say to your Lordships now to avoid prejudicing those questions which have not been argued yet. The result is that while I content myself with saying I agree with Lord Brampton in differing from what has been done in the Court below, I do not propose at present to give any reasons for my adherence to his view.

LORD MACNAGHTEN. My Lords, the action in which this application was made relates to the right of accommodation in Covent Garden Market. The market belongs to the Duke of Bedford, but it is regulated by the provisions of an Act of Parliament passed in the year 1828 (9 Geo. 4, c. cxiii.). The Act is concerned with the persons who come to the market to buy or to sell. No toll is payable by those who buy, unless the articles bought are again sold within the market or exposed for sale there. The persons who come to sell have to pay rent and toll. They are divided into two classes—those who sell their own produce and those who are ordinary dealers in the market or middlemen. For some reason or other the Act purports to confer certain advantages and certain preferential rights on the persons who come to sell their own produce. It may be that at the time when the Act was passed market gardeners in the county of Middlesex were not without influence in the electorate. It may be that in those days protection was not such

A. C.

AND PRIVY COUNCIL.

7

an odious thing as it is now in the eyes of some people who worship political economy. Whatever the reason may have been it cannot be denied that the Act apparently does give a preference to those who are described as growers of fruit, flowers, vegetables, roots or herbs. Now several people come forward as plaintiffs. They allege that they are growers within the meaning of the Act. They claim that under the Act they are entitled to certain advantages and preferential rights. They say that the Duke, who is lord of the market, persistently ignores their rights and favours the middlemen from whom he is authorized to exact higher tolls. And they sue on behalf of themselves and all other the growers of fruit, flowers, vegetables, roots or herbs within the meaning of the Act. They seek a declaration as to the true construction of the Act, an injunction to restrain the infringement of their alleged statutory rights, and an account of the moneys by which as they allege they have been severally overcharged.

The Duke has applied by summons to stay the action on two grounds, which were mixed up in the argument, but which ought, I think, to be kept separate and distinct. The principal ground is that the plaintiffs are not entitled to sue in a representative character in defence of their alleged statutory rights. The other ground, which is a matter of very slight moment, is that they cannot join as co-plaintiffs in respect of their several grievances. The whole difficulty in the present case has arisen from confusing these two matters. They have really nothing to do with each other. If the persons named as plaintiffs are members of a class having a common interest, and if the alleged rights of the class are being denied or ignored, it does not matter in the least that the nominal plaintiffs may have been wronged or inconvenienced in their individual capacity. They are none the better for that and none the worse. They would be competent representatives of the class if they had never been near the Duke; they are not incompetent because they may have been turned out of the market. In considering whether a representative action is maintainable, you have to consider what is common to the class, not what differentiates the cases of individual members. Romer J. acceded to the

defendant's application, influenced, or rather I should say compelled, by an expression in the judgment of the Court of Appeal in the case of *Temperton v. Russell* (1), which has found its way into recent books of practice as a compendious and authoritative statement of the law. In *Temperton v. Russell* (1) the Court was composed of Lord Esher M.R. and Lindley and Bowen L.JJ. The judgment of the Court was delivered by Lindley L.J. His Lordship is represented as saying that Order XVI. r. 9, which provides for persons suing or being sued as representing a class, "only extends to persons who have or claim some beneficial proprietary right which they are asserting or defending." Now it cannot be said that the plaintiffs in this case are asserting any beneficial proprietary right. If that be a condition of suing in a representative character the plaintiffs are out of Court. But it seems to me that there is no reason whatever for so restricting the rule, which was only meant to apply the practice of the Court of Chancery to all divisions of the High Court. The old rule in the Court of Chancery was very simple and perfectly well understood. Under the old practice the Court required the presence of all parties interested in the matter in suit, in order that a final end might be made of the controversy. But when the parties were so numerous that you never could "come at justice," to use an expression in one of the older cases, if everybody interested was made a party, the rule was not allowed to stand in the way. It was originally a rule of convenience: for the sake of convenience it was relaxed. Given a common interest and a common grievance, a representative suit was in order if the relief sought was in its nature beneficial to all whom the plaintiff proposed to represent. To limit the rule to persons having a beneficial proprietary interest would be opposed to precedent, and not, I think, in accordance with common sense. Take the case of a creditor's suit, which perhaps was the earliest instance of plaintiffs being allowed to sue in a representative character. It can hardly be suggested that a creditor has a proprietary interest in the real or personal estate of his deceased debtor. Take another case which was common enough in former times.

(1) [1893] 1 Q. B. 435.

A. C.

AND PRIVY COUNCIL.

9

One parishioner would sue on behalf of himself and all the other parishioners to establish a modus in lieu of tithes. There was no beneficial proprietary interest there. The choice lay between two evils; and the plaintiff, suing in a representative character, insisted on choosing the lesser evil of the two: *Chaytor v. Trinity College*. (1) Again, in *Gray v. Chaplin* (2) two shareholders of a navigation were held justified in suing on behalf of themselves and all other the shareholders except the defendants in order to enforce their alleged statutory rights under an Act of Parliament. The equity in that particular case happened to be very shadowy, and the receiver appointed by the Vice-Chancellor was afterwards discharged by Lord Eldon (3); but it was not suggested in the argument before his Lordship that the Vice-Chancellor had been in error in holding the suit as regards the plaintiffs properly constituted. There are plenty of other cases which shew that, in order to justify a person suing in a representative character, it is quite enough that he has a common interest with those whom he claims to represent. In *Warrick v. Queen's College* (4) the question was whether persons with titles diverse in origin and rights in some respects distinct could be combined as plaintiffs in a suit to redress a grievance common to all. No such question can arise here. All growers have the same rights. They all rely on one and the same Act of Parliament as their common charter.

My Lords, I do not think it is necessary to say anything more upon this point. I have only said so much because I find that the learned Lord Justice who dissented from his colleagues still maintains a position which Lindley L.J. abandoned, if indeed he ever took it up. Vaughan Williams L.J. puts the successful argument, or the argument intended to be successful, in the mouth of the defendant. It seems to rest on two main grounds: (1.) that the special rights apparently conferred upon the growers are public rights—a proposition which I confess I do not understand; and (2.) that those special rights confer on the growers no right of property whatever—a proposition

which I suppose everybody would concede. It is rather a pity when a case like *Temperton v. Russell* (1) finds its way into the Reports. The attempt made there to invest the defendants with a representative character was absurd on the face of it. Now, when a judge comes to deal with a case of that sort, and tries to deal with it seriously, as if there was something in it, he is very apt, I think, to express himself unguardedly; and so it happens sometimes, as it happened, I suppose, in *Temperton v. Russell* (1), that what was only meant for an illustration is taken for a definite and exhaustive statement of law.

There is one point—a point of no practical importance—on which I venture respectfully to differ from the Court of Appeal. I doubt whether it is accurate to say that in the case of representative suits we have advanced a long way since the days of Lord Eldon. It is, of course, not necessary nowadays to go to a Court of Law in order to establish legal rights. But in all other respects I think the rule as to representative suits remains very much as it was a hundred years ago. From the time it was first established it has been recognised as a simple rule resting merely upon convenience. It is impossible, I think, to read such judgments as those delivered by Lord Eldon in *Adair v. New River Co.* (2), in 1805, and in *Cockburn v. Thompson* (3) in 1809, without seeing that Lord Eldon took as broad and liberal a view on this subject as anybody could desire. “The strict rule,” he said, “was that all persons materially interested in the subject of the suit, however numerous, ought to be parties . . . but that being a general rule established for the convenient administration of justice must not be adhered to in cases to which consistently with practical convenience it is incapable of application.” “It was better,” he added, “to go as far as possible towards justice than to deny it altogether.” He laid out of consideration the case of persons suing on behalf of themselves and all others, “for in a sense,” he said, “they are before the Court.” As regards defendants, if you cannot make everybody interested a party, you must bring so many that it can be said they will

11

fairly and honestly try the right. I do not think, my Lords, that we have advanced much beyond that in the last hundred years, and I do not think that it is necessary to go further, at any rate for the purposes of this suit.

My Lords, it would be highly improper at this stage of the proceedings to say anything which might prejudice the construction of the Act. That is a matter for the hearing. But out of respect for the arguments of counsel, I will venture to make one or two general observations. It was said that the growers are so fluctuating and indefinite a body that it is impossible to tell who is or who is not a grower, especially in these modern times when there are such improved facilities for carriage of goods. I cannot say that I am much impressed with that difficulty. It seems to me that the description of the persons apparently intended to be favoured by the Act is sufficient for all practical purposes. It may be difficult or impossible to compile a catalogue of growers. But there cannot, I think, be much difficulty in determining whether a particular person who claims a preferential right to a vacant stand in the market is a grower or not.

Then it was urged that, after all, it is for the Duke to regulate his own market. The Act, it was said, is merely an enabling Act; the growers have no rights whatever. Well, that is the very question to be determined at the hearing. And how can it be determined if the growers are not allowed to sue in a body? The learned counsel for the Duke of Bedford asserted that the Duke was master of the situation, and might do what he liked with his own. It may be so. All I would say is that I am not at present convinced by the able and earnest arguments of Mr. Levett and Mr. Danckwerts that the expectations apparently held out to growers by this Act of Parliament are wholly illusory, and that the Duke, who is empowered by the Act to make rules, orders, and by-laws, "not being repugnant," as the Act says, "to the laws of this realm or to the provisions of this Act," is at liberty to disregard and ignore those provisions at his own will and pleasure.

One word as to the Attorney-General, without whose

ELLIS.

Lord  
Macnaghten.

presence the learned judges of the Court of Appeal thought the action ought not to proceed. The Attorney-General has been or will be made a party in obedience to the order of the Court of Appeal. From that part of the order there is no appeal. Speaking, however, for myself, I cannot see what the Attorney-General has to do with the matter. The plaintiffs do not want him; still less does the defendant. The learned counsel on both sides professed to be unable to explain this part of the order of the Court of Appeal. What is the Attorney-General to do when he comes? Is he to support the growers, or is he to take part with the Duke, who is alleged to favour the middlemen, or is he merely to look on and see fair play? And who is to pay his costs? That may be an interesting question some day. No one has suggested that the people who come to buy will be injured by competition between the growers and the middlemen, or that the rights of the public are in any way imperilled by this action. It might have been proper to have had the middlemen represented if the Duke himself had not espoused their cause.

So much for the principal question. The other point put forward is one of very small importance. If the main point goes against the defendant, I do not suppose that he would care to succeed on the other and minor point. He would gain nothing by success. He would only lose to some extent security for his costs. The joinder of the individual plaintiffs in one action cannot embarrass or delay the trial. The language of Order XVI., r. 1, is very wide. It must cover the case of several creditors, joining as co-plaintiffs in a creditor's action. Their debts are separate, and just as much or just as little "a series of transactions" as the separate grievances of which the growers in this action complain. Assuming that the defendant has rejected the claims of the several plaintiffs on the ground that, according to the true construction of the Act, growers have no preferential claims to which he is bound to give effect, it appears to me that you have a series of transactions where, if the plaintiffs sued separately, a common question of law would arise. Whether I am right in this or not, it seems to me that the question, if it be a question, ought not to be

A. C.

AND PRIVY COUNCIL.

13

disposed of adversely to the plaintiffs at this stage of the action. H. L. (E.)

On these grounds I think the appeal ought to be dismissed with costs.

[The proceedings were here interrupted.]

1900  
BEDFORD  
(DUKE OF)  
v.  
ELLIS.

Dec. 10. LORD MORRIS AND KILLANIN. My Lords, I am of opinion that this appeal should be dismissed.

The action is brought by the plaintiffs asserting a common right as growers of fruit, &c., within the meaning of the Act 9 Geo. 4, c. 113. The action is a representative one alleging a common interest, namely, the assertion of a right alleged to be created in the class by Act of Parliament. The appellant succeeded in obtaining an order from Romer J. (now Romer L.J.) that the action should be stayed. Romer J. was unable to come to the conclusion that the growers as a class had any proprietary rights in respect of the market. What they alleged they had was a preferential right over the rest of the public; that should, in my opinion, have been inquired into at a hearing in the ordinary way when, if they cannot establish such preferential right as a class, they would be defeated; if they have such a right some of the class are entitled to sue on behalf of themselves and others. I entirely concur in the judgment of my noble and learned friend Lord Macnaghten, which deals so fully and conclusively with the right to sue in that character.

I do not at all mean to prejudge the question whether the plaintiffs may not fail on the hearing of the cause on a fuller consideration of the Act considered in relation to the evidence that may be adduced. I conceive and foresee considerable difficulty in the plaintiffs being able to define what was the status or class of a "grower" in the year 1828, and in applying such a description to present times, and also whether the preference conferred was not given to sales of the articles specified and not to growers of them; and whether there is anything granted beyond a permission to the Duke of Bedford and his heirs to let. These and other questions will be dealt with on the hearing. I merely decide that, in my opinion,

H. L. (E.) the appellant cannot get rid of the action by the short cut  
1900  
resorted to.

BEDFORD  
(DUKE OF)  
v.  
ELLIS.  
—

LORD SHAND. My Lords, the rule of Court (rule 9 of Order XVI.), the effect of which is the subject of controversy between the parties in this case, is in these terms: "Where there are numerous persons having the same interest in one cause or matter, one or more of such persons may sue or be sued . . . in such cause or matter on behalf or for the benefit of all persons so interested." I am of opinion, with the majority of the Court of Appeal, that the rule applies to this case, and that the appeal should therefore be dismissed.

The rule has been framed and adopted for a useful and important object—the saving of the multiplication of actions, with the attendant costs, in cases where one action would serve to determine the rights of a number of persons in a question with another party called as defendant. A series of different actions one after another by different plaintiffs is to be no longer necessary in cases where numerous persons have "the same interest in one cause or matter," for in such cases "one or more of such persons may sue on behalf or for the benefit of all persons so interested." The rule is obviously one of advantage not only to plaintiffs but to defendants also, in the way of saving multiplication of suits, and it is of much importance to note, as observed by my noble and learned friend Lord Macnaghten, that it only applies the practice of the Court of Chancery, of which he gives many instances, to all divisions of the High Court.

Have not, then, the plaintiffs stated a case in which they have all "the same interest" in the cause or matter or in each of the different matters which are the subject of this action? It seems to me, on examination of the claims and the plaintiffs' statements in support of these claims, that they have stated such a case. In order to shew that this is so I do not think it necessary to go into much detail.

The original right to the market was conferred by letters patent to the Earl of Bedford a great many years ago, and was

A. C.

AND PRIVY COUNCIL.

15

the subject of an Act of the 53rd year of His Majesty King George III. In 1828 the 9 Geo. 4, c. 113, the provisions of which are founded on by the plaintiffs, was passed. That statute recognises and specifies various classes of permanent stands of the market under the different heads of "Casual cart stands," "Yearly cart stands," and "Yearly pitching stands," and by its enactments confers important and valuable privileges to the use of such stands on a class of persons designated as "the growers of fruit, flowers, vegetables, roots or herbs," at certain rates scheduled in the Act. These privileges, which are not said to have been abrogated, appear to entitle such growers to rights of priority in the occupation of the stands for the purposes of their business, and that at the rates there specified.

H. L. (E.)

1900

BEDFORD  
(DUKE OF)v.  
ELLIS.

Lord Shand.

Now, it is alleged in the record by the plaintiffs (1.) that they are the growers of fruit, flowers, vegetables, roots, and herbs within the meaning of the statute; (2.) that the defendant, the present Duke of Bedford, refuses to give them and other "growers" the privileges of the occupation of the various classes of stalls to which they have right under the statute; and (3.) that when they do get such occupation the rates charged exceed those allowed by the statute. For the purpose of the present preliminary point, of procedure only, these statements must be taken to be true, and on this assumption the question raised is, Does the rule of Court apply to the action? In the trial questions may arise as to whether the plaintiffs are, within the meaning of the statute, "growers of fruit, flowers, vegetables, roots, or herbs" as they allege. The statute was passed long before railways were used, and when the carriage of flowers, fruit, and vegetable produce in quantities to market was made by carts and wagons; but the plaintiffs, who allege they are such "growers" as the statute describes, are each, according to their statement, in the occupation of land in the county of Middlesex, who have been frequenters of the market for business purposes, and there is no reason to doubt the title of each to sue on his own account. Then, all of the plaintiffs make the same claims—claims to the exercise of the same rights and privileges which the appellant refuses to recognise—

H. L. (E.) and all of them rest their claims on the same ground, namely,  
1900 the statutory provisions of privileges in their favour as such  
growers as they describe themselves to be.

BEDFORD  
(DUKE OF)  
v.  
ELLIS.  
Lord Sband.  

---

This is, I think, apparent from the plaintiffs' statements 8 and 9, in regard to the "casual cart stands," the "yearly cart stands," and the "yearly pitching stands," and the tolls exacted by the defendant for the use of these. The plaintiffs in their character of "growers" claim statutory preferential rights to the occupation and use of these, and allege that the defendant refuses to give them such preferential use, and "makes it a practice either to refuse to growers the use of such stands, or by filling such stands, with others than growers, to prevent growers having the use of such stands, with the result that growers have to go to other parts of the market or to places outside the market, or to the public streets, where the restrictions contained in the said Act not being applicable the defendant charges higher rates than would have to be paid under the Act, and with the further result of injury to growers in their trade." These statements seem to me to amount clearly to an averment not only of the existence of preferential rights, and of the same or substantially the same preferential rights in all the plaintiffs, but to a charge against the appellant that he violates these rights, or refuses to give effect to them, and it follows that the plaintiffs have the same interest in the cause or matter of the complaint. There is no difference in their claims. They all ask the same remedy, which it is unnecessary to specify further than to say they all claim to have a declaratory decree by the Court which shall give effect to their statutory privileges the same in the case of each of them, as growers of fruit, flowers and vegetables, and an injunction to restrain the appellant from doing any act contrary to such declaratory decree. There is thus one cause or matter only in which all of the plaintiffs have an interest, and in which other "growers" have the same interest, as disclosed in the record, that matter being the disregard by the defendant of their statutory privileges, for which accordingly one and the same remedy in the form of the different heads of claim is asked. To that case the rule in question seems to me in its terms directly to apply, and accord-

A. C.

AND PRIVY COUNCIL.

17

ingly the objection to the competency of the action is, I think, unfounded.

There is one head of the claim (the seventh) as to which there was not much said in the appellant's argument, which is no doubt in a different position ; I mean a claim by each of the plaintiffs for repayment to him of alleged excess charges for six years for market accommodation. This is a subsidiary matter, and it is not a claim made "on behalf of all other the growers of fruit, flowers," &c., to which alone the appellant's objection to the representative character of the action applies. The real cause or matter in dispute and raised by the statement and claims is the nature and extent of the privileges of the plaintiffs to the use of the market stands, and to the effect of determining this the action is competent. This being so, it will be found convenient to both parties to have the subsidiary matter of excessive charges made against each plaintiff determined in the same cause ; and I do not see any ground for holding that it is incompetent to do so.

The judgment of Romer L.J. proceeds on the view that the plaintiffs in any action seeking the benefit of the rule in question must allege and possess some "proprietary" right which it is their joint object to vindicate. This is clear throughout his Lordship's judgment, which is founded on what was said by my noble and learned friend Lord Lindley, as Master of the Rolls, in the case of *Temperton v. Russell*. (1) At the beginning of his judgment Romer L.J. says expressly that, as pointed out in *Temperton v. Russell* (1), the rule "only extends to cases where the class have or claim some beneficial proprietary right which is being asserted or defended. I have therefore to consider whether the growers in question as a class have or claim a beneficial proprietary right under the above Act which is being asserted in this action." He immediately adds: "I am unable to come to the conclusions that the growers as a class have any proprietary rights in respect of the market," and his judgment proceeds on the ground that the absence of "proprietary" rights excludes the application of the rule. In effect it appears to me that the judgment of Vaughan

H. L. (E.)

1900

BEDFORD  
(DUKE OF)  
v.  
ELLIS.

Lord Shand.

(1) [1893] 1 Q. B. 435.

H. L. (E.) Williams L.J. is founded on the same view, for he observes  
1900 that the plaintiffs allege that the Act gives them "certain  
BEDFORD preferential rights constituting some sort of proprietary interest  
(DUKE OF) in them," and holds that this is not given by the statute. But  
v. if his Lordship proceeded on the view of the absence of an  
ELLIS. interest in common in the plaintiffs I cannot agree with him ;  
Lord Stand. and the judgment of Lord Hatherley, in the case of Warrick  
quoted by Lord Lindley, is I think a direct authority on the  
point, contrary to the view of the Lord Justice.

The case of *Temperton v. Russell* (1) was not an action founded on any alleged right claimed by the plaintiff such as the plaintiffs here allege. The action was one of tort, and a number of trades unions or societies called as defendants by one plaintiff were charged with maliciously procuring workmen to break their contracts with the plaintiff, with enticing workmen from his employment, and with intimidating workmen in his service, while the defendants were sued "not only on their own behalf" "but as representing all the members" of their various societies. The Court refused to allow these last words to remain in the complaint, to the effect of making the action a representative one as regards the defence. It is true that in that case Lord Lindley used the expression on which Romer L.J. proceeded in his judgment in this case that the rule in question only extends to cases where the class have or claim some beneficial "proprietary" right which is being asserted or defended. In my judgment this expression unduly limits the application of the rule, and was unnecessary for the decision of the case of tort then under the consideration of the Court ; and Lord Lindley evidently did not contemplate that the rule should not include such a case as the present, for his Lordship has held, in his judgment, that the rule does apply in this case. There is no such word as "proprietary" in the rule, and no good reason in my opinion for holding that word by implication to be a part of the rule. The sole test to be applied is that of "the same interest" in one cause or matter. The order in my opinion applies equally to the case such as occurs here, where the plaintiffs seek to enforce a disputed personal

(1) [1893] 1 Q. B. 435.

A. C.

AND PRIVY COUNCIL.

19

right or rights common to all of them by gaining or vindicating possession of a valuable privilege, as it does when, being in possession of a privilege, the plaintiffs seek to enforce a possessory right in a question with a trespasser or a third party in some way injuring their possession itself by opposition to its exercise.

ELLIS.

LORD BRAMPTON. My Lords, under the Covent Garden Improvement Regulation Act (1828) the area of Covent Garden Market, as described in the preamble of the Act, was rearranged according to a plan therein referred to, and the several portions thereof were appropriated as directed by the Act, and sets of stands were marked out or erected for the accommodation of carts, &c., bringing fruit, flowers, vegetables, roots or herbs to the market, and for the reception, exposure for sale, and sale of such fruit, &c.

For the purposes of the present question it will not be necessary to refer in detail to more than three of such sets of stands, namely, those described in the Act and indicated on the plan respectively by the letters B, C, F and G.

B signifies what are in the Act called "the casual cart stands," C "the yearly cart stands," and F and G "the yearly pitching stands." The uses to which each set of stands was exclusively appropriated are mentioned and described in s. 7 of the Act.

B was exclusively appropriated to the reception of wagons and carts in which fruit, &c., shall be brought to the market for sale, and for the exposing to sale and selling such fruit, &c., on the stand to which it shall be brought; it being further enacted that the growers of fruit, &c., shall be deemed to be the persons having the preferable right to resort to such stands.

C shall be exclusively appropriated to the reception of wagons and carts of or belonging to growers of fruit, &c., and to the exposing for sale and selling the fruit, &c., grown or raised by such growers, and be let by the owners of the market, by the year or for any shorter period at such yearly or other rents, &c., as are mentioned in the schedule, and the person to whom any such stand shall be let shall be deemed to be

H. L. (E.) the holder thereof, and the person having the preferable right to resort thereto.

1900

BEDFORD  
(DUKE OF)  
v.  
ELLIS.

Lord Brampton.

F and G shall be exclusively appropriated to exposing to sell and selling fruit, &c., and may be let by the owners of the market exclusively to growers of fruit, &c., by the year, or for any shorter period, and the person to whom any such stand shall be let shall be deemed to be the holder thereof and the person having the preferable right to resort thereto.

Subject as regards the use of each of these stands to the rents, tolls, or sums of money mentioned in the schedule to the Act.

Each of the respondents, who are the plaintiffs in the action, claims to be a grower of fruit, flowers, vegetables, roots and herbs within the meaning of the Act, and a frequenter of the market for the sale thereof, and as such they sue in this action on behalf of themselves severally and all others the growers of fruit, &c. It is essential to the right understanding of the question before your Lordships, namely, whether, as the record now stands, all the six plaintiffs are according to the practice and procedure of the courts entitled to sue in one action, not only in respect of their own separate and several alleged causes of action, but also on behalf of all other growers of fruit, &c., by reason of the alleged illegal conduct of the defendant in non-compliance with any of the provisions of the Act, that I should state what are the several grievances complained of in the claim. I shall then be in a condition to point out, first, the objections which I think exist to allowing all these six plaintiffs to sue together and join in this action, and then the reasons why I think that the representative right of the six plaintiffs to sue on behalf of other growers not parties to the record ought to be limited, and to what extent.

The first seven clauses of the statement of claim are merely introductory averments. The charging part of the claim commences with paragraph 8, which is nothing more than a general complaint that the defendant does not in his management of the market comply with the provisions of the Act, and in particular with reference to the casual cart stands B, the yearly cart stands C, and the yearly pitching stands F and G, and the

A. C.

AND PRIVY COUNCIL.

21

tolls exacted by the defendant for the use of these stands. Paragraph 9 submits that the defendant has not the right to admit others to the use of the casual cart stands so long as growers present themselves and require the use thereof; but that he makes it a practice either to refuse the use of such stands, or, by filling them with others than growers, prevents growers from having the use of them, with the result that they have to go to other places where they have to pay higher rates.

H. L. (E.)  
1900  
BEDFORD  
(DUE OF)  
v.  
ELLIS.  
Lord Brampton.

In neither of these two paragraphs, 8 and 9, is any cause of action stated to exist in either of the plaintiffs in respect of the casual cart stands, nor is it alleged that the plaintiffs jointly, or either of them individually, ever sustained any damage by such alleged misconduct.

Paragraph 10 complains that each of the four plaintiffs—Ellis, Gray, Miller and Ashby—has applied to the defendant for a tenancy of a yearly cart stand, and in each case a tenancy has been refused, no objection being made to either as a proper tenant. It then alleges habitual misconduct of a similar character towards growers generally, naming none, with similar resulting damages, and avers that the defendant has stated his practice to be not to let such stands. I will assume for the purposes of this case that this paragraph does state a cause of action in each of these four respondents; but, as I read the paragraph, it is in each a separate cause of action, and not a joint cause of action in the four.

Paragraph 11 sets forth a similar character of grievance with reference to applications by the remaining two of the plaintiffs, Pullinger and Peacock, for tenancies of yearly pitching stands, averring that it is the practice of the defendant to refuse such tenancies, and by such refusals, and filling up the stands with others than growers, he interferes with the preferential right of growers with similar prejudicial results. In the case of these last two plaintiffs also the causes of action are several and not joint.

Then follow seven paragraphs (12, 13, 14, 15, 16, 17, 18), the 12th stating generally that unlawful and excessive tolls beyond those in the schedule have been charged—and to each of the

H. L. (E.) plaintiffs—but it is not alleged that such excesses have been  
1900 made in respect of their positions as growers.

BEDFORD  
(DUKE OF)  
v.  
ELLIS.  
Lord Brampton.

Each of the remaining six clauses of the set is devoted to a separate series of alleged illegal overcharges made on each of the six plaintiffs, and claims for repayment; but those are purely separate charges not affecting anybody except the individual overcharged, and with which neither of the other plaintiffs nor the other growers have anything to do.

Paragraph 19, the last, discloses no cause of action in either of the plaintiffs, but alleges general misconduct and mismanagement when the market is full, and traders are compelled to expose their goods on places where charges are not so reasonable.

The claims in the first five paragraphs are for declarations as to what the defendant is not entitled to do in respect of each of the matters above referred to; in the sixth for injunctions, and in the seventh for an account of the sums alleged to have been charged to and paid by each of the plaintiffs for six years past, in excess of, or other than the sums the appellant was entitled to charge, and for repayment thereof to each of the plaintiffs.

I cannot bring my mind to doubt that if the plaintiffs are entitled to prosecute this claim in its entirety, the defence will be fraught with a great deal of undesirable embarrassment. On the other hand I think that to set it aside altogether would be to defeat the well-established procedure of the Court of Chancery, under which plaintiffs suing to uphold a legal right by a suit in equity might sue on behalf not only of themselves, but also of all others having a community of interests in the upholding of that right, and would defeat also the objects contemplated by the rules referred to made since the Judicature Act with a view to harmonise the proceedings and allow of representative actions in both divisions of the High Court of Justice. For this reason it is that I find myself unable altogether to agree in the judgment either of Romer J. or of the Court of Appeal.

Before proceeding to deal with more debatable matters, I will at once express my opinion that the right of the plaintiffs

A. C.

AND PRIVY COUNCIL.

23

to sue on behalf of other growers as well as for themselves does not depend upon the question whether such other growers have proprietary rights in respect of the market, for if they have as a class any beneficial rights or interests in the market, though not strictly of a proprietary character, they may well be represented by those suing to obtain redress in respect of their individual grievances, provided there is community of interest in one right.

H. L. (E.)

1900

BEDFORD  
(DUKE OF)  
v.  
ELLIS.

Lord Brampton.

I would here observe that I fail to see the utility or necessity of making the Attorney-General a party to the proceedings; for the growers, although no doubt they form an important class of traders attending the market, do not represent the public.

I come now to the serious question whether all these plaintiffs are rightly joined in this action. As a fundamental rule of practice, and of pleading, two or more different plaintiffs, each having a separate and different cause of action, cannot be joined in the same action. To cite authority for this proposition seems superfluous. I may, however, mention the case of *Sandes and Another v. Wildsmith and Another* (1) as an illustration. Under this rule no two of the plaintiffs in this case could have been joined in this action; for the grievance of each as claimed is separate and distinct, and no joint cause of action is disclosed.

Another rule of practice and pleading would, before the Judicature Act, have prevented a plaintiff from suing in the Common Law Courts as representing anybody except himself, unless he were already a legal representative of another, e.g., an executor, public officer of a bank, &c., having special authority by law to sue on behalf of another or others. It was otherwise, however, in the Court of Chancery, as stated by the Master of the Rolls in giving judgment in this case in the Court of Appeal. Since the Judicature Act, however, two rules of the Supreme Court, Order XVI., rr. 1, 9, have been made, apparently with a view to assimilate the practice of the Common Law with the rules of Equity. The rules are as follows:—Rule 1: “All persons may be joined in one action

(1) [1893] 1 Q. B. 771.

H. L. (E.) as plaintiffs in whom any right to relief in respect of, or arising  
1900 out of the same transaction or series of transactions is alleged  
BEDFORD to exist, whether jointly, severally, or in the alternative, where,  
(DUKE OF) if such persons brought separate actions, any common question  
v. of law or fact would arise." Rule 9: "Where there are  
ELLIS. numerous persons having the same interest in one cause or  
Lord Brampton. matter one or more of such persons may sue or be sued [or may  
be authorized by the Court or a judge to defend] in such  
cause or matter on behalf or for the benefit of all persons so  
interested."

But it must be observed, according to my view, that neither the rule of equity, nor the rules I have just mentioned, authorize the joinder in the same action of two or more plaintiffs suing in respect of different causes of action, nor the suing by any plaintiff on behalf of another person as well as himself, except in respect of the one and the same interest in the cause or matter for which he is himself suing. Let me now apply what I have said to the several plaintiffs and matters of complaint in the present case.

As regards the first claim for a declaration as to the casual cart stands, though general non-compliance with the Act is alleged, no specific cause of action is stated or suggested in either of the plaintiffs in respect of them.

As regards claim No. 2, relating to the yearly cart stands, the four plaintiffs—Ellis, Gray, Miller, and Ashby—have undoubtedly stated separate causes of action, in respect of which they have jointly claimed a declaration; they have also claimed injunctions and separate accounts, and repayment of excessive charges. They clearly are rightly joined. The same common question would have arisen if they had brought separate actions. They are also entitled to sue on behalf of all other growers having the same interest in one cause or matter, that is to say, the preferential rights they claim to be accepted as tenants of yearly cart stands as described in s. 7 of the Act.

As regards the claim (3.) to a declaration touching the yearly pitching stands, I think the plaintiffs Pullinger and Peacock stand with regard to those stands precisely in the

A. C.

AND PRIVY COUNCIL.

25

same position as the other four plaintiffs stand with regard to the yearly cart stands. Their claims and the cause of action they are suing on are not the same as those of the other four plaintiffs, and had they brought separate actions, the same common questions would not arise, for the two sets of plaintiffs sue not in respect of the same, but of different claims, that is, preferential rights to the occupation of different stands, and the obligations upon the defendant as to the letting of which are not couched in the same language. As to the "yearly cart stands," the words relied on as making it obligatory to let are "shall be let," but there are no words expressive of any obligation to let to a grower, and the preferable right to resort to the stand is given not "to growers," but to "the holder of the stand," while as to the yearly pitching stand the words are "may be let," and it is expressly directed that, if let, it shall be "to growers." As a test whether these several claims are substantially different, I would ask, assume a judgment to be recovered by any of the plaintiffs against the defendant in respect of the "yearly cart stands," and subsequently an action to be brought by the same plaintiffs against the defendant in respect of the "casual cart stands," could the defendant plead judgment recovered? I do not think any one could be found who would answer in the affirmative. This seems to me to prove to demonstration that the rights and causes of action are different. I think, for the reasons I have expressed, that the rights of Ellis, Gray, Miller, and Ashby are different, and relate to other stands than those as to which Pullinger and Peacock claim to be entitled to tenancies, and that they ought not to be joined in one action, and that the claim ought to be amended by striking out all relating to one of these two sets of plaintiffs, and also to the casual cart stands, but the claim ought not to be set aside altogether. I think, moreover, that the interests of the growers would be equally well settled by leaving as plaintiffs only one set as I have suggested, and certainly the embarrassment would be reduced to a minimum.

Unless such an amendment is made, I think the judgment of the Court of Appeal should be reversed.

H. L. (E.)

1900

BEDFORD  
(DUKE OF)

v.  
ELLIS.

Lord Brampton.

H. L. (E.) THE LORD CHANCELLOR. My Lords, I have nothing to add  
1900 to what I said when this case was last before the House,  
BEDFORD and I therefore proceed to ask your Lordships to pronounce  
(DUKE OF) judgment.

v.

1900 AND OTHERS . . . . . }  
Dec. 10. AND  
THE ATTORNEY-GENERAL . . . RESPONDENT.

*Revenue—Income Tax—Deduction of Income Tax from Interest or Annuities—  
Customs and Inland Revenue Act, 1888 (c. 8), s. 24, sub-s. 3.*

In paying the dividends on their consolidated stock out of the Consolidated Loans Fund, the London County Council are bound under s. 24, sub-s. 3, of the Customs and Inland Revenue Act, 1888, to account to the Crown for the income tax which they deduct from the dividends, so far only as the dividends are not paid out of their income which has already been charged with income tax.

Where the dividends are paid partly out of rents and profits from their lands charged with income tax under Sched. A, partly out of interest on loans to local authorities charged with income tax under Sched. D, and (where those receipts are insufficient) partly out of moneys raised by rates, the council are entitled to retain for their own benefit so much of the deduction for income tax which they make on the dividends as is equal to the income tax paid both under Sched. A and Sched. D.

The decision of the Court of Appeal, [1900] 1 Q. B. 192, reversed.

UNDER various statutes the London County Council, as successors to the Metropolitan Board of Works, raise money by loans upon the security of the Consolidated Loans Fund. They also lend money to local authorities, the interest on which and the parts of principal repaid are paid into the Consolidated

## CAMPOS v. KENTUCKY & INDIANA TERMINAL RAILROAD COMPANY

Before Mr. Justice McNAIR

Contract—Bonds—Gold value clause.

Practice—"Res judicata."

Conflict of laws—Class action—Whether plea or "res judicata" open — U.S.C.A., Title 28, Rule 23.

Bonds issued by defendant company in 1911, by which defendants promised to pay bearer £100

Sterling money of the United Kingdom . . . on the 1st day of January, 1961, with interest at 4½ per cent. per annum payable semi-annually in like gold coin . . .

Interest coupons (100) on bonds stating that defendants

WILL PAY TO BEARER TWO POUNDS AND FIVE SHILLINGS STERLING MONEY OF THE UNITED KINGDOM . . .

Claim by plaintiff bearer of 414 bonds against defendants for £8223 19s. 4d. (gold value of interest coupons Nos. 97, 98, 99) and £123,675 8s. 11d. (gold value of principal sums due on Jan. 1, 1961)—Plea by plaintiff that, in view of words "in like gold coin" appearing in provision as to payment of interest, and no gold coin having been referred to earlier in bond, the words "in gold coin" should be written into provision as to payment of capital—Contentions by defendants (a) that only face value of interest coupons and bonds was payable; (b) that, in view of decision of U.S. Ct. of App., on bonds in identical form, doctrine of *res judicata* applied—Proper law of contract conceded by parties to be English law — Evidence that U.S. action was a class action commenced before plaintiff became bondholder; and that person who was not a member of the class when class action was commenced was not bound by ultimate decision — Admissibility of terms of mortgage deed referred to in bond, but not referred to in interest coupon, and of stockholders' resolution.

—*Held*, (1) (i) that, by the proper law of the contract at the time of the making of the contract (1911), a loan of £1000 in sterling money of U.K. could be discharged only by 1000 gold sovereigns

or Bank of England notes convertible into gold sovereigns or partly in one and partly in the other; that the provision in bond that interest should be "payable in like gold coin" did no more than reflect the then existing legal position; that reconciliation of provisions as to payment of capital and interest did not require that words "in gold coin" should be written into contract, since, under law at that time, both obligations were dischargeable in same way, i.e., by gold sovereigns or Bank of England notes convertible into gold sovereigns; (ii) that, by proper law of contract at date of performance, a commercial obligation to pay sterling could not be discharged by tender of gold coins or Bank of England notes convertible into gold without breach of law; and that performance of that obligation could be made only by tender of Bank of England notes not convertible into gold; (2) *further*, in the circumstances, the terms of the mortgage deed and stockholders' resolution were not admissible as aids to construction of bond; (3) (*obiter*) (i) that defendants had failed to prove that U.S. action was a true class action or that, under U.S. law, that judgment was binding on anyone who was not an original party or did not intervene; (ii) that, assuming that U.S. judgment supported plea of *res judicata* in U.S. Courts against an absent member of the class, plaintiff was not a bondholder when U.S. action was commenced; was not a party to that action; and had not been served with process which led to U.S. Court's judgment; and that, therefore, plea of *res judicata* failed; and (4) that plaintiff was entitled to face value of bonds and interest coupons; that, as plaintiff's claim was for payment on a gold value basis, plaintiff's claim failed—Special order as to costs.

*York v. Guaranty Trust Company of New York*, (1944) 143 F. 2d 503.

In these two actions, which were consolidated, Miss Sonia Campos, of Paris, claimed £131,880 19s. 4d., being the gold value, principal and interest, alleged to be due to her in respect of 414 £100 first mortgage  $4\frac{1}{2}$  per cent. coupon gold bonds issued in 1911 by the defendants, Kentucky & Indiana Terminal Railroad Company, of Louisville, Kentucky, U.S.A.

The plaintiff claimed that upon the true construction of the bonds, which fell due for payment on Jan. 1, 1961, payment was to be made in current legal tender of the United Kingdom representing the gold value of the nominal amount of payment.

The defendants contended that the payment should be in current legal tender. The main issue before the Court was whether the bonds imported a gold value clause.

According to the plaintiff's case, by the terms of each of the bonds the defendants promised to pay to the bearer £100 sterling money of the United Kingdom of Great Britain and Ireland, at the office or agency of the defendants in the City of London, England, on Jan. 1, 1961, with interest thereon at the rate of  $4\frac{1}{2}$  per cent. per annum from Jan. 1, 1911, payable semi-annually in like gold coin, at the agency, on July 1 and Jan. 1 in each year,

on presentation and surrender of the annexed coupons as they severally became due. By the terms of the bonds, payment was expressed to be secured by a mortgage or deed of trust dated Jan. 3, 1911, executed by the defendants to the Standard Trust Company of New York, which itself referred to a resolution of the stockholders of the defendants authorizing the issue of the bonds.

The plaintiff alleged that upon the true construction of the bonds:

- (a) the interest payments and/or
- (b) the capital sum payable thereunder on Jan. 1, 1961,

were such sums in current legal tender of the United Kingdom as represented the gold value of the nominal amount of each payment such gold value being determined in accordance with the weight and fineness established by the Coinage Act, 1870, namely, 0.23542 troy ounces of fine gold to the pound sterling; and that the bonds were, upon their true construction, governed by English law.

The plaintiff said that the defendants wrongfully contended that the sums payable in respect of both (a) interest and (b) capital under the bonds were the face amount of the bonds and coupons in current English legal tender of the same face amount.

The plaintiff duly presented the bonds and interest coupons at the agency of the defendants in London, namely, Morgan Grenfell & Co., Ltd., of London, in respect of which the plaintiff alleged that the sums properly payable to her amounted to £123,657 5s. 11d., and £8223 13s. 5d., respectively, but the defendants, in accordance with their contention referred to above, refused payment.

The plaintiff claimed (1) a declaration that upon the true construction of the bonds the amounts payable by the defendants to the plaintiff in respect of (a) interest and/or (b) capital were such sums in current legal tender of the United Kingdom as represented the gold value of the nominal amount of each payment, such gold value being determined in accordance with the weight and fineness established by the Coinage Act, 1870, namely, 0.23542 troy ounces of fine gold to the pound sterling; (2) The sums of £123,657 5s. 11d. and £8223 13s. 5d.; and (3) Interest thereon under the Law Reform (Miscellaneous Provisions) Act, 1934, at such rate and for such period as the Court should think fit.

Q.B. (Com. Ct.)

Q.B. (Com. Ct.)]

## LLOYD'S LIST LAW REPORTS

461

Campos v. Kentucky &amp; Indiana Terminal Railroad Co.

[1962] VOL. 2

By their defence, the defendants did not admit that the plaintiff was the bearer of the bonds. They admitted that the bonds were part of a series of 13510 First Mortgage  $4\frac{1}{2}\%$  Fifty-Year Guaranteed Sterling Bonds which were issued by the defendants under a first mortgage of Jan. 3, 1911, and which were offered to the public (pursuant to a prospectus to which was annexed a letter of Jan. 3, 1911, from the then President of the defendants to J. P. Morgan & Co., of New York) by Morgan Grenfell & Co., Ltd., of London, between Jan. 18 and 20, 1911, pursuant to a resolution of the board of directors of Dec. 30, 1910, acting under powers conferred on the board by a resolution of the stockholders of the defendants of Dec. 30, 1910, and further admitted that the bonds were 414 out of 859 bonds which had not been presented for payment since maturing on Jan. 1, 1961.

The defendants admitted the promise set out in the statement of claim and admitted that the bonds were, upon their true construction, governed by English law.

The defendants denied that, upon the true construction of the bonds, either the interest payments payable thereunder on presentation and surrender of coupons maturing from time to time or the capital sums payable thereunder on presentation and surrender of the bonds on or after Jan. 1, 1961, were such sums in current legal tender of the United Kingdom as represented the gold value of the nominal amount of each payment, such gold values being determined in accordance with the weight and fineness established by the Coinage Act, 1870, namely, 0.23542 troy ounces of fine gold to the pound sterling and denied that, upon that construction, any of the payments of interest or principal were any sums calculated by reference to gold of any weight and fineness or any gold value.

The defendants alleged that, upon the true construction of the bonds, the interest payments and the capital sums payable thereunder on presentation and surrender of the respective coupons and bonds were the face amount of the coupons, namely, £2 5s. each, and the face amount of the bonds, namely, £100 each in current English legal tender.

The defendants denied that their agents in the City of London had refused to pay the proper sum due in respect of any interest coupons against presentation and

surrender of the relevant interest coupons, and contended that if, which was not admitted, the plaintiff presented any interest coupons and was not paid, that was due to her refusal to surrender her coupons unless paid more than the sums properly due.

The defendants alleged further, and in the alternative, that the United States District Court for the Southern District of New York, (1956) 140 F. Supp. 82, in an action brought by Sylvan Lemaire on behalf of himself and all other bondholders of the defendants similarly situated against the defendants and others, by a judgment determined, adjudged and decreed that:

(a) The defendants intended to have the obligation with respect to principal and interest dischargeable by payment in London, England, in sterling in such currency as should be legal tender at the respective times of payment without diminution or enlargement of the obligation by reason of any future fluctuation in the gold content of the English sovereign.

(b) The bonds and interest coupons were dischargeable in the specified number of units of account (pounds sterling) in such currency as was or would be legal tender at the respective times of payment, regardless of any change which might have occurred after 1911 in the gold convertibility or the purchasing power of that currency.

(c) The bond and interest coupons did not contain a gold value clause and did not call for a value in money fixed by a determined quantity of gold.

(d) The defendants' obligation to pay all future interest coupons attached to the bonds, as they should become due and payable and the defendants' obligation to pay the principal of the bonds due on Jan. 1, 1961, would be fully discharged by the defendants paying the specified number of units of account, i.e., pounds sterling, in currency which would be legal tender at the respective times of payment and without regard to gold and gold value.

Sylvan Lemaire's bonds were identical save as to their serial numbers to the bonds in this case. Sylvan Lemaire and the bearers of such bonds were similarly situated as regards their respective bonds.

The judgment referred to above was unanimously affirmed by the United States Court of Appeals for the Second Circuit, on Apr. 2, 1957, (1957) 242 F. 2d 884,

and, by the law of the United States of America, that judgment was a final and conclusive judgment.

The defendants said that, by the laws of the United States of America, they could rely upon that judgment as a complete defence to any action brought in the United States of America whether in a Federal or State Court by any holder of any bond similar to Sylvan Lemaire's bonds or holder of any interest coupon similar to Sylvan Lemaire's coupons in respect of any such bond or in respect of any such interest coupon even if such subsequent proceedings in America were to enforce a judgment of an English Court to the effect that payment of principal and interest against surrender respectively of such bond and coupon should be made with regard to gold value including a judgment of the Queen's Bench Division obtained in this action by the plaintiff giving her all the relief claimed by her in her writ of summons and statement of claim. Accordingly, the defendants relied upon the doctrine of *res judicata*.

By the terms of the mortgage deed pursuant to which the bonds, the subject-matter of this action were issued, the property of the defendants set out in the deed was transferred to the Standard Trust Company of New York, its successor or successors and assigns (hereinafter called the trustee) in trust for the equal *pro rata* benefit and security of all and every holder of the bonds and coupons issued under and secured by the deed and by the terms of the deed no holder of any bond or coupon should have the right to institute any suit, action or proceeding in equity or at law for any remedy, without first giving notice to the trustee of the fact that default had occurred nor unless such holder should have made request to the trustee and afforded the trustee a reasonable opportunity to institute such action, suit or proceeding in the name of the trustee and offered adequate security and indemnity to the trustee against the cost, expenses and liabilities to be incurred and such notification request and offer of indemnity were declared conditions precedent to any action or cause of action for any remedy, it being the express and declared intention that no holder of any bonds or coupons should have any rights other than as set out in the deed and that all proceedings at law, or in equity, should be instituted, had and maintained in the manner provided in the

deed, and for the equal benefit of all holders of the bonds and coupons outstanding.

At the date of the commencement of these proceedings, the trustee was Morgan Guaranty Trust Company of New York of 140 Broadway, New York, the successor of the Standard Trust Company.

The defendants alleged that the plaintiff failed to notify, request, afford opportunity to, offer security to and offer indemnity to the trustee as set out above and that this action was not instituted and was not being maintained in the manner provided in the deed and was not for the equal benefit of all holders of the bonds and coupons which were outstanding.

Mr. John Foster, Q.C., Mr. Mark Littman, Q.C., and Mr. A. L. V. Lincoln (instructed by Messrs. Payne, Hicks Beach & Co.) appeared for the plaintiff; Sir Milner Holland, Q.C., and Mr. Owen Stable (instructed by Messrs. Slaughter & May) represented the defendants.

#### JUDGMENT

**Mr. Justice McNAIR:** The plaintiff in these two consolidated actions is Miss Sonia Campos, an Egyptian national, resident in Paris. She is the bearer of 414 coupon bonds issued by the defendant company, Kentucky & Indiana Terminal Railroad Company, in 1911, entitled "£100 First Mortgage 4½% Coupon Gold Bonds". These bonds were purchased for Miss Campos's account between Dec. 19, 1955, and Feb. 23, 1956. She claims against the defendant company, in the first action, the sum of £8223 13s. 5d., being, as she claims, the gold value of the interest payments due under the coupons of the series denoted by the numbers 97, 98 and 99, and, in the second action, the sum of £123,675 5s. 11d., being the gold value of the principal sums under the bonds which fell due for payment on Jan. 1, 1961. The basis of her claim in each case is that upon the true construction of the bonds the interest payments and the capital sums payable on the due dates were such sums in current legal tender of the United Kingdom as represents the gold value of the nominal amount of each payment, such gold value being determined in accordance with the weight and fineness established by the Coinage Act, 1870, namely, 0.23542 troy ounces of fine gold to the £ sterling.

The defendants, by their defence, deny that the basis contended for by the plaintiff is correct and assert that upon the true

construction of the said bonds the interest payments and the capital sums payable thereunder are for the face amount of the coupons, namely, £2 5s., and the face amount of the bonds, namely, £100 each in current English legal tender. The issue so joined may be stated simply: Do the coupons or the bonds on their true construction import a true "gold value clause", i.e., a clause which prescribes a measure for fixing the amount of the debt to be discharged and not merely the method by which a debt of fixed unvarying amount is to be discharged? See *Feist v. Société Intercommunale Belge d'Electricité*, [1934] A.C. 161. By way of additional defence the defendants rely upon a decision of the United States District Court for the Southern District of New York, in an action brought by one Sylvan Lemaire allegedly on behalf of himself and other bondholders of the defendants similarly situated against the defendants in which the Court in effect upheld the contention now made by the defendants in the present action, namely, that the bonds and interest coupons did not contain a gold value clause. This decision, affirmed by the United States Court of Appeals for the Second Circuit, is relied upon by the defendants as justifying a plea of *res judicata* against the present plaintiff. In the further alternative, the defendants rely upon the plaintiff's failure to notify the trustees of the mortgage securing due payment of the bonds of her intention to take proceedings against the defendants in accordance with a provision in the mortgage deed under which the bonds were secured.

The main issue to which I now turn is the question of the true construction of the bonds. Each of the bonds sued upon except for its serial number is in identical terms and provides as follows:

**KENTUCKY & INDIANA TERMINAL  
RAILROAD COMPANY,**

No. 1831.

**First Mortgage  $4\frac{1}{2}\%$  Coupon Gold Bond.  
Payable January 1, 1961.**

For value received, the Kentucky & Indiana Terminal Railroad Company, a corporation existing under the laws of the State of Kentucky (hereinafter called "the Company"), promises to pay to bearer, or if this bond be registered as hereinafter provided, to the registered owner, ONE HUNDRED POUNDS Sterling money of the United Kingdom of Great Britain and Ireland, at the office or agency of the Company in the City of

London, England, on the 1st day of January, 1961, with interest thereon at the rate of four and a half per cent. per annum from the 1st day of January, 1911, payable semi-annually in like gold coin, at said agency, on the 1st day of July and January in each year, on presentation and surrender of the annexed coupons as they severally become due. Both the principal and the interest of this bond are payable without deduction for any tax or taxes which the Company or the Trustee may be required to pay or to retain therefrom, under any present or future law of the United States, or of any State or County or Municipality therein. This Bond is one of an issue of coupon and registered bonds of the Company to an amount not exceeding in the aggregate the equivalent of Two Million pounds Sterling known as its First Mortgage  $4\frac{1}{2}\%$  Gold Bonds, secured by its mortgage or deed of trust dated the 3rd day of January, 1911, executed by the Company to The Standard Trust Company of New York, Trustee, conveying all the property of the Company upon terms and conditions therein set forth, to which mortgage or deed of trust reference is now made. In case default shall be made in the payment of any instalment of interest on this bond, the principal sum may be declared due and payable in the manner and with the effect provided in said indenture. . . . This bond shall pass by delivery, but the ownership of this bond may at any time, and from time to time, be registered at the office or agency of the Company in the City of London, England, the registration to be certified hereon; and thereafter no transfer shall be valid unless made upon the books of the Company and certified hereon by its transfer agent, until registration has been made to bearer, after which this bond shall pass by delivery until the ownership be again registered. The registry of this bond shall not restrain the negotiability of the coupons by delivery merely. The holder, also, at his option, may surrender for cancellation this bond with the coupons for future interest thereon, in exchange for a registered bond without coupons, as provided in said mortgage. This bond shall not be valid or become obligatory for any purpose until the certificate endorsed hereon shall have been signed by the Trustee under the said mortgage or deed of trust; and such signing shall be

conclusive evidence that the bond so signed has been duly executed in accordance with its terms and the terms of the said mortgage or deed of trust.

IN WITNESS WHEREOF the Kentucky & Indiana Terminal Railroad Company has caused its corporate seal to be hereto affixed and attested by its Secretary or Assistant Secretary, and this bond to be signed by its President or Vice-President, and has hereto attached coupons with the name of its Treasurer engraved thereon, as of the 3rd day of January, 1911.

Kentucky & Indiana Terminal Railroad Company,

By

(sd) . . . Arnold.

SECRETARY.

(sd) J. W. H. Campbell,  
PRESIDENT.

On the face of each of the bonds there was superimposed a decorative device of which the word GOLD forms a prominent feature.

To each bond on issue there were attached 100 detachable coupons serially numbered from 1 to 100 to cover the half-yearly interest payments over the 50 years' life of the bonds.

These coupons were in the following form:

**KENTUCKY & INDIANA TERMINAL RAILROAD COMPANY ON THE 1ST DAY OF JAN. 1961.**

£2. 5s.

WILL PAY TO BEARER TWO POUNDS AND FIVE SHILLINGS, STERLING MONEY OF THE UNITED KINGDOM OF GREAT BRITAIN AND IRELAND, AT THE AGENCY OF THE COMPANY IN THE CITY OF LONDON, ENGLAND, FREE OF ALL TAXES AS MENTIONED IN THE BOND, BEING SIX MONTHS' INTEREST ON ITS FIRST MORTGAGE GOLD BOND NO. 1043.

[Signed]

TREASURER

A perusal of these two documents reveals (1) that as regards the bond the obligation with relation to the payment of the capital moneys contains no express reference to gold or gold coins, but is expressed to be an obligation to pay £100 sterling money of the United Kingdom of Great Britain and Ireland whereas the obligation as to payment of interest as set out in the bond is stated to be to pay

"interest thereon at the rate of four and a half per cent. per annum . . . semi-annually in *like gold coin*" [\*] no gold coin having previously been expressly mentioned, and (2) that the coupon expresses the interest obligation as an obligation "to pay to bearer two pounds and five shillings sterling money of the United Kingdom of Great Britain and Ireland", without any reference to "gold coin".

It is common ground (1) that the bonds and coupons are governed by English law; and (2) that both the bonds and the coupons when detached from the bonds are negotiable instruments passing by delivery.

Before considering the question of construction more closely it is probably convenient to refer briefly to the mortgage deed and the documents therein referred to while postponing for further consideration the question whether any of this material is relevant or admissible on the question of construction.

The mortgage deed dated Jan. 3, 1911, is a complicated document running to 72 pages; but in essence it provides for a mortgage by the defendant company to the Standard Trust Company of New York of property of the defendant company in trust

. . . for the equal *pro rata* benefit and security of all and every holder of the bonds and interest coupons issued under and secured by this indenture . . .

Nowhere in the operative provisions of the deed is any mention made of gold or gold coin; but, throughout the operative provisions, the issue of bonds secured by the mortgage is referred to in terms of sterling money of the United Kingdom of Great Britain and Ireland; the bonds to be issued are not to exceed the equivalent of £2,000,000 sterling money; the coupons are each to be for the principal sum of £100 (see Art. I); provision is also made in Art. II for the contingency that the defendants may wish to issue bonds payable both as to principal and interest in money of other governments (i.e., not in sterling) subject to the limitation that

. . . the aggregate principal sum of all the bonds to be issued under and secured by this indenture . . . shall not exceed £2,000,000 sterling, the bonds payable in money other than sterling money being reckoned at the par of exchange thereof with sterling money. . . .

\* Emphasis supplied by Mr. Justice McNair.

The recitals to the deed set out the resolution of the stockholders of Dec. 30, 1910, which (omitting immaterial words)

... directed and empowered [the directors] to cause to be executed under the corporate seal ... a mortgage or deed of trust of this company ... to secure an issue of bonds for the aggregate principal sum of Two Million pounds sterling, the principal thereof payable in gold coin of the United Kingdom of Great Britain and Ireland ... with interest thereon ... at the rate of 4½ per centum per annum, payable semi-annually in like gold coin ...

By the same resolution the stockholders approved the printed form of mortgage then submitted as sufficient compliance with their resolution.

There follows a recital of a resolution of the board of directors authorizing the execution under the company's corporate seal of the mortgage

... to secure the payment of the bonds of this company to the amount of Two Million pounds sterling ... the principal of such bonds to be payable on the 1st day of January, 1961, with interest from January 1, 1911, payable semi-annually ... at the rate of four and a half per centum per annum; said bonds and coupons to be payable ... in the City of London, England, in Sterling money of the United Kingdom of Great Britain and Ireland, or elsewhere, and in money of any other government as from time to time hereafter may be authorized by the board of directors.

There follows a further resolution of the board of directors that the said bonds payable in sterling money shall be in substantially the following form. There are then set out the forms of bonds and coupons above referred to.

Assuming, for the moment, that these documents are relevant and admissible the comment may at least be made that they are not models of consistent draftsmanship.

I now approach more closely the problem of the true construction of the bonds and the coupons. These particular bonds and coupons have not been considered by the English Courts before and I therefore bear in mind that any decisions of the English Courts upon other bonds are not authoritative upon the construction of these bonds unless (1) the variation between the bonds previously

considered and the present bonds is so slight as to be immaterial, or (2) they contain certain principles of construction which are relevant to the instant bonds notwithstanding the variation.

As it seems to me, the first fundamental rule of construction must be that the Court's task is to determine what intention must be imputed to the parties from the actual words used and that in discharging that task the Court is entitled to look at the surrounding circumstances existing at the time of the execution of the document, but not (except where there is a plea of rectification, as there is not here) at preliminary documents of a negotiating nature. Further, there has been established by a decision of the House of Lords binding upon me that the gold value obligation should not be imposed unless by the terms of the documents it is imposed in clear or precise terms. (See *New Brunswick Railway Company v. British and French Trust Corporation, Ltd.*, [1939] A.C. 1, per Lord Maugham, L.C., at p. 18, and per Lord Wright, at p. 35.)

One other preliminary observation. It being conceded that the proper law of the bonds and coupons is English law, the nature of the obligation imposed by the bonds and coupons must be determined in the light of English law at the date of the contract whereas the nature of the required performance must be determined in the light of English law at the due date of performance.

In 1911, the City of London was the most important market in the world for raising capital. By virtue of the Coinage Act, 1870, sterling money of the United Kingdom consisted (1) of gold coins of a prescribed weight and fineness which were legal tender for any amount; (2) silver coins which were legal tender for amounts not exceeding 40s.; and (3) bronze coins which were legal tender for an amount not exceeding 1s. The Bank of England Charter, 1833, Sect. 6, which was in force in 1911, provided so far as is material that

... a tender of a note or notes of the Bank of England expressed to be payable to bearer on demand, shall be a legal tender, to the amount expressed in such note or notes, and shall be taken to be valid as a tender to such amount, for all sums above five pounds ... so long as the Bank of England shall continue to pay on demand their said notes in legal coin. ...

Accordingly, as at 1911, a loan of £1000 in sterling money of the United Kingdom could be discharged only by the tender of 1000 gold sovereigns or Bank of England notes convertible into gold sovereigns or partly in one and partly in the other. It would seem to me, therefore, unless the matter is concluded to the contrary by authority binding upon me, that the provision in the bond, that the interest shall be "payable in like gold coin" does no more than to reflect the existing legal position that an obligation in sterling money shall be discharged only in the manner required by law, namely, gold coins or sovereigns or Bank of England notes convertible into legal gold coins. To use Sir Milner Holland's words, it was, in 1911, a correct description of the obligation involved in the payment of debt expressed in sterling. On this view, the reconciliation between the obligation as to the payment of the capital in sterling and the obligation as to payment of interest in gold coin does not require that the words "in gold coin" should be written into the provision as to capital since properly construed in the light of existing legislation both obligations are dischargeable in the same way. Subject to the reservation made above as to binding authorities to the contrary, in my judgment neither the bonds nor the coupons imposed in 1911 any obligation other than to pay the amount of the capital and interest expressed in sterling by the means of current legal tender, i.e., gold sovereigns or Bank of England notes convertible into gold sovereigns. So much for the content of the obligation in 1911.

When one turns to the proper law of the contract as at the date of performance one finds of course that material changes have taken place.

In effect, the position at all material times since the plaintiff became the owner of the bonds was that sterling was off the gold standard; Bank of England notes which were substituted for the Treasury notes issued under the Currency and Bank Notes Act, 1914, were legal tender for the payment of a debt of any amount expressed in sterling and were not convertible into gold; gold coins though still legal tender were for all practical purposes no longer in circulation since under the Exchange Control Act, 1947, any holder of gold, which by Sect. 42 includes gold coin, is obliged to offer it for sale to an authorized dealer as defined in Sect. 42. In the result,

a commercial obligation to pay sterling could not be discharged by the tender of gold coins or Bank of England notes convertible into gold without breach of the law. If I am right in my construction of the obligation as it existed in 1911, it follows that the only legal tender for the performance of that obligation which could be made at the date of performance in accordance with the proper law of the contract without breach of the law was by Bank of England notes not convertible into gold. The legislative changes which produced this result are conveniently set out in the judgment of Lord Justice Morris in *Treseder-Griffin and Another v. Co-operative Insurance Society, Ltd.*, [1956] 2 Q.B. 127, at pp. 151 to 152; [1956] 1 Lloyd's Rep. 377, at p. 384.

Performance in accordance with the proper law of the contract as existing at the date of the contract would be due performance of the original obligation.

As stated above, I have reached this preliminary conclusion as to the true effect of the bonds without considering the terms of the mortgage deed or the documents referred to in its recitals. But it is probably convenient that I should express my views as to the admissibility of these documents and, if so admissible, as to the effect. Sir Milner Holland, on behalf of the defendants, submitted that the mortgage deed was relevant and admissible, but not the resolutions recited in the deed. Mr. Foster, for the plaintiff, on the other hand, submitted that the resolutions of the stockholders were admissible, but neither the resolutions of the directors nor the mortgage were relevant. I was referred to Norton on Deeds, 2nd ed., at pp. 86 to 87, for the proposition that

If the transaction between the parties is contained in more than one deed, all the deeds must be construed together, and one may be read to explain the others.

and to the notes at p. 87 to the effect that this rule applies whether the deeds be executed simultaneously or at different times.

Assuming, but not deciding, that this rule applies to instruments such as bonds or interest coupons, it seems to me that the rule can have no application where the parties to the bond or coupons are not the same as the parties to the mortgage deed. Furthermore, it seems to me to be very difficult to accept that the holder of a

negotiable instrument can be affected in his primary rights against the obligee by the terms of a mortgage deed to which he is not a party, even though this mortgage deed is referred to in the bond; *a fortiori* in the case of a holder of an interest coupon which has no reference to the mortgage. Nor do I consider that the terms of the stockholders' resolution is relevant or admissible. If the bonds conformed with the authority, *cadit quaestio*; if they did not, the holder would not be affected by any lack of authority in the directors or be entitled to say against the company that the directors ought to have issued bonds in a different form. I would, accordingly, reject the whole of this material as an aid to the construction: but would also say that if admitted it gives no clear guidance as to the true construction. As I have observed above, the only reasonable comment that can be made is that there was considerable confusion in the draftsman'ship.

Before dealing with the English decisions on gold value clauses I should deal with one further point on construction.

On behalf of the plaintiff it was submitted that by reason of the use of the words "in like gold coin" in the interest provision there must be written into the provision as to payment of principal the words "in gold coin" after the words "Sterling money of the United Kingdom of Great Britain and Ireland". It is not sufficient for the purpose of the argument advanced on the plaintiff's behalf that the words "sterling money" mean gold coin: for as will appear later when I come to examine the authorities it is the express use of the word "gold" which will in the conditions specified in these authorities import the gold value clause. Assuming for the moment that a plea of rectification could be raised by the holder of a negotiable instrument, I would accept that if there had been such a plea and an examination of the preliminary documents showed that the bond did not, without the addition of those words, accurately represent the prior agreement, it would be legitimate to insert the words as indicated. But, in the absence of any such plea, the power of the Court is limited. In this connection I was referred to the cases of *Coles v. Hulme*, (1828) 8 B. & C. 568; and *Mourmand and Others v. Le Clair*, [1903] 2 K.B. 216, in which the word "pounds" without a plea of rectification was written in the first case into the

condition of a bond for the payment of "7700" *simpliciter* and in the second case into a bill of sale for £70 in which there was a stipulation that the principal and interest should be repaid by monthly instalments of "seven" *simpliciter*.

These cases, however, seem to me merely to indicate corrections of drafting slips in conditions which otherwise would be meaningless. I would not as at present advised be disposed to hold that apart from rectification it would be permissible to write in the words "in gold coin" in the provision as to the payment of the principal moneys if the effect would be to give to that provision a meaning other than that which the provision bears without the addition of those words. It is to be observed that in *New Brunswick Railway Company v. British and French Trust Corporation, Ltd.*, [1939] A.C. 1, the House of Lords, while applying the *Feist*\* construction to the provision as to payments of principal expressed in the form of "to pay . . . 'the sum of one hundred pounds sterling gold coin of Great Britain of the present standard of weight'", declined to apply that construction to the interest provision expressed as follows:

" . . . with interest at the rate of five pounds sterling per centum per annum . . . "

I now turn more closely to the English authorities relied upon by the plaintiff. Mr. Foster, on her behalf, submitted that the decision of the House of Lords in *Feist's case, sup.*, was an authority for the broad proposition that whenever the word "gold" or "gold coin" or gold qualifying a unit of currency is used in a bond of this nature it connotes a true "gold value clause". In *Feist's case, sup.*, the bond provided for payment of

" . . . £100 in sterling gold coin of the United Kingdom of or equal to the standard of weight and fineness existing on September 1, 1928.

and to pay interest thereon

" . . . at the rate of 5½ per cent. per annum in sterling in gold coin of the United Kingdom of or equal to the standard of weight and fineness existing on September 1, 1928, by equal half-yearly payments . . . "

\* *Feist v. Société Intercommunale Belge d'Electricité*, [1934] A.C. 161.

Condition 4 of the bond provided that

This Bond is one of an authorized issue of Bonds of the Company of an aggregate principal amount not exceeding £500,000 in sterling in gold coin of the United Kingdom at any one time outstanding.

Lord Russell of Killowen, in whose opinion Lord Atkin, Lord Warrington and Lord Wright concurred, stated (*ibid.*, at p. 168) that the decision of the Courts below that the company were entitled to satisfy the principal moneys and interest secured by the bond by tendering whatever might be at the due date of payment the nominal amount of the bond or coupon

... deprives of all effect the words which occur in clauses 1 and 2 of the bond, viz.: "in gold coin of the United Kingdom of or equal to the standard of weight and fineness existing on September 1, 1928." These words (which merely for convenience I will call the gold clause) need in this view never have been inserted at all.

Lord Russell of Killowen refers to the fact that at the date of issue of the bonds (*ibid.*, at p. 171)

... The country was on the gold standard but the notes were inconvertible and gold coin was substantially no longer in circulation.

... it is not, I think, improper or hazardous to make two surmises, (1.) that the gold clause was inserted in clauses 1 and 2 of the bond in contemplation of the contingency of this country going (as it did in 1931) off the gold standard at some future date; and (2.) that neither party to the bond can have contemplated payment under the bond being actually made in gold coins.

After examining Clauses 1, 2 and 4 and coming to the conclusion that they could not "have been intended by the parties to carry their literal interpretation", Lord Russell of Killowen posed the following question (*ibid.*, at p. 172):

... If the words of the gold clause cannot have been used by the parties in the sense which they literally bear, ought I to ignore them altogether and attribute no meaning to them, or ought I, if I can discover it from the document, to attribute some other meaning to them? Clearly the latter course should be adopted if possible, for the parties must have inserted these special words for

some special purpose, and if that purpose can be discerned by legitimate means, effect should be given to it.

After examining Clauses 4 and 6 in which reference was made to "gold coin", Lord Russell of Killowen stated his conclusion as follows (*ibid.*, at p. 172):

... I would construe clause 1 not as meaning that £100 is to be paid in a certain way, but as meaning that the obligation is to pay a sum which would represent the equivalent of £100 if paid in a particular way, in other words I would construe the clause as though it ran thus (omitting immaterial words) "pay ... in sterling a sum equal to the value of £100 if paid in gold coin of the United Kingdom of or equal to the standard of weight and fineness existing on the 1st day of September, 1928."

In my judgment, the whole tenor of Lord Russell of Killowen's speech up to this stage points to the conclusion that in Lord Russell's view it was the existence of the words "in gold coin ... of ... standard of weight and fineness existing on the 1st day of September, 1928" which was of critical importance as indicating a measure of indebtedness. It is true that at the end of his opinion Lord Russell of Killowen refers to the judgment of the Permanent Court of International Justice in the *Serbian Loans case* (Permanent Court of International Justice Series A, Nos. 13 to 24. Collection of Judgments. Judgment No. 14, p. 32) as stating happily and succinctly the considerations and principles which had influenced him in reaching his conclusion. In that case, the loan issued by the Serbian Government was for "95,000,000 gold francs [\*]". If the judgment is referred to, it becomes quite plain that in the Court's view (at p. 33)

The "gold franc" thus constituted a well-known *standard* [\*] of value to which reference could appropriately be made in loan contracts when it was desired to establish a sound and stable basis for repayment.

The "gold franc" was not used as denoting a particular gold coin circulating in any of the three countries, France, Belgium or Switzerland, in which a payment could be made.

I do not regard this decision as authority for the broad proposition for which it was cited. In my judgment, the critical element in the case was the specification of the

\* Emphasis supplied by Mr. Justice McNair.

weight and fineness of the gold which was held to import a standard or measure of value. In this view, I am fortified, if not strictly bound, by the decision of the Court of Appeal in *Treseder-Griffin v. Co-operative Insurance Society, Ltd.*, [1956] 2 Q.B. 127; [1956] 1 Lloyd's Rep. 377. See per Lord Justice Denning (*ibid.*, at pp. 148 and 379 of the respective reports) and Lord Justice Morris (*ibid.*, at pp. 152 and 383 of the respective reports). Both these learned Lords Justices seem to me to distinguish *Feist's case, sup.*, from the case before them which concerned the payment of rent "in gold sterling" on the ground that in *Feist's case, sup.*, there was a specification of gold of a particular weight and fineness.

I next turn to the case of *The King v. International Trustee for the Protection of Bondholders Aktiengesellschaft*, [1937] A.C. 500; (1937) 57 Ll.L.Rep. 145. The bonds in question in this case obliged the British Government to pay 1000 dols. in gold coin of the United States of the standard weight and fineness existing in February, 1917, or in London in sterling money at the fixed rate of 4.86½ dols. to the pound. The House of Lords, agreeing with the Court of Appeal, applied the *Feist* construction to the bonds, but, differing from the Court of Appeal, held that as the proper law of the bonds was American law and, as by the due date of performance the law had been changed by the Joint Resolution of Congress having the effect of law so as to require the bond to be discharged upon payment of dollar for dollar of the nominal amount, the bondholder could only require payment of that amount. The importance, however, of this decision from the point of view of the plaintiff's case lies in the observation of Lord Maugham, L.C., which was as follows (*ibid.*, at pp. 562 and 166 of the respective reports):

... Ever since the year 1870, or thereabouts, nearly all important obligations of the nature of bonds and mortgages in the United States have contained a gold clause, the result of which, according to the legal tender decisions (so called), was that although paper money, commonly called greenbacks, were legal tender in payment of ordinary debts, that did not apply to obligations containing a gold clause. Such clauses, according to the decision of the Supreme Court of the United States in *Norman v. Baltimore & Ohio Railroad Company*, (1935) 294 U.S. 240, "were intended to afford a definite

standard or measure of value, and thus to protect against a depreciation of the currency and against the discharge of the obligation by a payment of lesser value than that prescribed."

In *Norman v. Baltimore, sup.*, as in the case then before the House the bond provided for the payment in gold coin of the United States of the *standard weight and fineness* as also did the mortgage in *St. Louis Iron Mountain & Southern Railway Company\** which was heard at the same time. As to these clauses, Chief Justice Hughes, in the paragraph from which Lord Maugham (*sup.*, at pp. 562 and 166 of the respective reports) cited, says ((1935) 294 U.S., at p. 302):

We are of the opinion that the gold clauses now before us were not contracts for payment in gold coin as a commodity, or in bullion, but were contracts for the payment of money. . . . We also think that, fairly construed, these clauses were intended to afford a definite standard or measure of value, and thus to protect against a depreciation of the currency and against the discharge of the obligation by payment of lesser value than that prescribed. . . .

For my part, I do not consider that Lord Maugham, L.C., having before him a clause containing a reference to a particular standard of weight and fineness, was intending to lay down any principle relating to gold coin clauses which did not contain any such reference, or that the passage from Chief Justice Hughes's judgment which he cites was on a fair reading intended to refer to clauses without a specification of weight and fineness. See, too, *Perry v. United States*, (1935) 294 U.S. 330, which was argued at the same time, where Chief Justice Hughes in relation to a bond for the payment "in United States gold coin of the present standard of value" says (*ibid.*, at p. 348):

This obligation must be fairly construed. The "*present standard of value*" stood in contradistinction to a *lower standard of value*. The promise obviously was intended to afford protection against loss. That protection was sought to be secured by setting up a standard or measure of the Government's obligation. . . .

See also Lord Russell of Killowen (*sup.*, at pp. 556 and 163 of the respective reports).

\* *United States et al. v. Bankers Trust Company et al.*, (1935) 294 U.S. 240.

I now turn to the case of *New Brunswick Railway Company v. British and French Trust Corporation, Ltd.*, [1939] A.C. 1. The bonds there in question were issued in 1884 and contained a promise

... to pay to the bearer ... "the sum of one hundred pounds sterling gold coin of Great Britain of the present standard of weight and fineness ..."

The bonds having been issued in 1884, the argument which had influenced Lord Russell of Killowen, in the *Feist case*, *sup.*, based upon the recent changes made by the Currency and Bank Notes Act, 1928, was not relevant, nor were there provisions corresponding to Clauses 4 and 6 in that case.

Lord Maugham, L.C., says (*ibid.*, at p. 18):

... It is clear that the gold clause contained in the bonds was intended as a clause to protect those who acquired the bonds against a depreciation of the currency in the Province of New Brunswick, and, since the judgment of this House in *Rex v. International Trustee for the Protection of Bondholders Aktiengesellschaft*, *sup.*, it is not possible to confine the decision in the *Feist case*, *sup.*, to contracts not only containing a gold clause but also possessing indications in the same sense as those which were contained in the *Feist case*, *sup.* ...

Lord Russell of Killowen says (*ibid.*, at p. 26):

... One may well repeat what was said in the *Bondholders' case*, *sup.*, namely, that while the features here pointing to the *Feist* construction, *sup.*, are fewer and less powerful than in the *Feist* bonds, uniformity ought to prevail in regarding gold clauses as clauses framed for the purpose of protecting lenders against depreciation of currency, and construing them accordingly. As Scott L.J. has pointed out in his judgment in the present case, the question depends primarily on the wording of the alleged gold clause itself.

In my judgment, in both these passages "gold clause" is used in the sense in which that clause was used by Lord Russell of Killowen in the *Feist* clause, namely a clause referring to gold of a particular standard of weight and fineness. See the judgment of Lord Justice Scott in *British*

& French Trust Corporation v. New Brunswick Railway Company, [1937] 4 All E.R. 516, at p. 535.

The remaining English case to which I need refer is the case of *Treseder-Griffin and Another v. Co-operative Insurance Society, Ltd.*, [1956] 2 Q.B. 127; [1956] 1 Lloyd's Rep. 377. This is a very special case and there are many grounds of distinction stated in the majority judgments between that case and the decision in *Feist's case*, *sup.* It is sufficient to say that it is the only case in which an obligation to pay "in gold sterling" without any specification of weight and fineness has been before the Courts as a matter for decision and the conclusion reached was that this formula without a specification of weight and fineness did not import a gold value clause. See, too, the judgment of Lord Justice Morris (*ibid.*, at pp. 152 and 383 of the respective reports) as to the uncertainty as to the weight and fineness of gold coins if they came into circulation again in the future.

Before referring to the decisions of the American Courts upon these particular bonds it is right that for completeness I should refer to the decision of the Privy Council in *Syndic in Bankruptcy of Salim Nasrallah Khoury v. Khayat*, [1943] A.C. 507. The document there under consideration was in the following form:

On May 23, 1930, I shall pay at Haifa to the order of Mrs. Mary Khayat of Jezzin [Syria] the sum specified above, i.e., two thousand gold Turkish pounds. ...

Two questions were involved: (1) whether the document was a promissory note within the meaning of the Palestine Bills of Exchange Ordinance, 1929; (2) as to the proper rate of exchange (the latter point is not material for present purposes).

As to (1), the Board held that it was a promissory note as being a promise to pay in currency, i.e., the currency of Turkey and Syria albeit not the currency of Palestine where the note was drawn.

Lord Wright says (*ibid.*, at p. 511):

Nor were the notes any the less negotiable instruments because of the word "gold." That word does not here import an obligation to deliver gold or pay in gold. What it does is to import a special standard or measure of value. ... It is equivalent to a gold clause. ...

It appears, however, from the case of *Ottoman Bank of Nicosia v. Chakarian*, [1938] A.C. 260, at p. 270, to which Lord Wright refers (*sup.*, at p. 512), that by virtue of currency changes in the law of Turkey

... At all material times since the commencement of the war [—i.e., August 1914—] the paper notes have been legal tender and although the gold £ is still legal tender, the paper currency has, in accordance with Gresham's Law driven out from circulation the gold currency, so that in practice gold has ceased to circulate as legal tender. The Turkish gold coins are now, for all practical purposes, only dealt with as a commodity or bullion.

In these circumstances, it is easy to understand that in construing a document coming into existence in 1930, Turkish gold pounds *simpliciter* can be construed as importing "a special standard or measure of value."

I now turn to the decision in the case of *Sylvan Lemaire v. Kentucky and Indiana Terminal Railroad Company*, (1956) 140 F. Supp. 82, decided in the United States District Court for the Southern District of New York upon bonds in the identical form of the bonds now in issue. The judgment was given by District Judge Cashin on Mar. 12, 1956. After a review of the cases referred to above (other than *Khayat's case*, *sup.*), the learned Judge held (*ibid.*, at p. 86):

... that the English cases ... do not support the proposition that whenever the words "gold coin" are used a gold value clause must inevitably be inferred. Rather, it is our view that English law, as evidenced by these cases, requires that a reference to gold in a payment clause be not ignored but be given full effect if it clearly expresses the intention to fix a money value equivalent to a certain quantity of gold.

[3] The plaintiff seeks a construction which would require us not only to imply the standard of weight and fineness of the gold but also the language of equation. The language of equation, we feel, is the essence of a gold value clause unless there exist extrinsic circumstances such as supply the defect. ...

[4] It is our opinion, therefore, that even reading in the words "gold coin" with respect to the principal, that this

bond does not contain a gold clause under the law of England. We think after examining the bond, the interest coupons attached, the mortgage to which the bond refers, the stockholders' resolution contained in the mortgage, the directors' resolution also contained therein, the prospectus and the monetary laws of England as they existed in 1911, that no gold value clause was expressed or intended.

... The plaintiff would have this Court construe from the words "like gold coin" their prior use as to the principal, then that the quality of gold referred to was that contained in the sovereign and, lastly, that the value of the principal and interest to be paid was equated to it. In our opinion neither justice nor English law (we presume they are synonymous) permits such extensive redrafting of a contract by a court.

This judgment was affirmed by the United States Court of Appeals for the Second Circuit, whose judgment is reported in (1957) 242 F. 2d 884. I need not set out here the detailed reasoning which led the Court to the conclusion that the bond in question did not contain a true gold value clause. Though some of the steps in the reasoning of these two Courts might not commend themselves to English lawyers brought up in and applying a different code of procedure, these decisions seem to me to be a clear determination by a competent Court of jurisdiction as to the proper construction of these bonds.

Had my own consideration of the problem led me to a different conclusion I should have hesitated to give effect to it in view of the desirability of uniformity in decisions by the Courts of different countries, especially in the case of bonds whose obligations cross international frontiers. But, as I have myself reached the same ultimate conclusion, I welcome the reinforcement of my judgment which I receive from their judgments.

In view of the conclusion in favour of the defendants which I have reached it is not necessary for me as a matter of decision to state my views on the alternative defence of *res judicata* raised by pars. 7 to 11 of the defences in the two actions. But, as much time was spent in considering the American decisions relevant on this point, it is probably convenient that I should

state my conclusions as to the effect of this evidence and as to its applicability to the plea of *res judicata* raised in these actions.

Mr. Carson, an experienced American lawyer who had acted for the defendants in the *Lemaire* action, was called before me on behalf of the defendants. Mr. Ten Eyck, an experienced lawyer now engaged in the practice of American law in London, was called on behalf of the plaintiff.

Mr. Carson's thesis may be summarized as follows:

(i) The *Lemaire* action was properly brought as a class action under Rule 23 of the Federal Rules of Procedure (U.S.C.A. Title 28),

(ii) Rule 23 provides as follows:

**Rule 23. Class Actions**

(a) **Representation.** If persons constituting a class are so numerous as to make it impracticable to bring them all before the court, such of them, one or more, as will fairly insure the adequate representation of all may, on behalf of all, sue or be sued, when the character of the right sought to be enforced for or against the class is

(1) joint, or common, or secondary in the sense that the owner of a primary right refuses to enforce that right and a member of the class thereby becomes entitled to enforce it;

(2) several, and the object of the action is the adjudication of claims which do or may affect specific property involved in the action; or

(3) several, and there is a common question of law or fact affecting the several rights and a common relief is sought.

(iii) A true class action properly brought under this rule is binding upon and gives rise to a plea of *res judicata* against all members of the class whether or not they took part in the action and whether or not they were served with notice of the action or whether or not they had knowledge of the proceedings.

Subject to the reservation of the question of the position of a person who was not a member of the class at the date of the initiation of the proceedings or at the date of the judgment, Mr. Ten Eyck agreed with this formulation of the law; but in this respect differing from Mr. Carson he maintained that the *Lemaire* action was not a true class action but was, to use the

nomenclature used in many of the American decisions, a "spurious class action" the judgment in which did not give rise to a plea of *res judicata* against absent parties.

I was referred to a number of decisions of Federal Courts in different Districts in which the distinction is drawn between true class actions falling within sub-rule (1) and giving rise to *res judicata* and spurious class actions, namely, actions brought under sub-rule (3) from which no plea of *res judicata* arises. Thus, in the judgment of the Court in *Oppenheimer et al. v. F. J. Young & Co., Inc., et al.*, (1944) 144 F.2d 387, at p. 390, the following passage occurs:

[3, 4] We see no reason for going farther than to hold that on the face of the complaint the plaintiffs have brought themselves within the provisions of Rule 23 (a) (3). Inasmuch as persons who do not become parties cannot be affected by the decision, we need not go further as to the adequacy of plaintiffs' representation of others in the class. A stricter rule as to the adequacy of representation ought to obtain where the judgment is held binding on members of a class who do not intervene. . . .

Citing *Weeks et al. v. Bareco Oil Company et al.*, (1941) 125 F. 2d 84, in *York v. Guaranty Trust Company of New York*, (1944) 143 F. 2d 503, at p. 529, the judgment of the Court uses these words:

. . . Since, in a class suit under clause (3), a judgment will not be *res judicata* for or against those of the class who do not intervene, we suggest that if, after trial, the court finds against the defendant, appropriate steps be taken to notify all such noteholders to intervene (if they have not theretofore done so), judgment to be entered in favor only of those who do so within a reasonable time. . . .

Mr. Carson, while asserting that the material passage was *obiter*, agreed that the general language used had not been dissented from by any Court of co-ordinate or superior jurisdiction. Mr. Carson's main argument against the view of the Court expressed in these two decisions was based (i) upon his reading of the case of *System Federation No. 91 v. Reed et al.*, (1950) 180 F. 2d 991, which Mr. Carson stated to be his only authority for the proposition that a judgment in a class action under sub-rule (3) gave rise to *res judicata*. He also maintained secondly that the *Lemaire* action involved the enforcement of

a "common right" within the meaning of sub-rule (1) inasmuch as the bond was secured by the mortgage and therefore was a true class action within sub-rule (1).

As to (i), it appears on an examination of the *System Federation* case, *sup.*, that the Court in fact held that it was a true class action under sub-rule (1) and accordingly *res judicata* applied. Mr. Carson's view however was that, if the proceedings were properly analysed, the Court should have held it to be a class (3) action but nevertheless that *res judicata* applied.

As to this, it seems to me to be illogical to argue that because the Court held (wrongly in Mr. Carson's view) that it was a class (1) action and therefore the *res judicata* applied, the Court, if it had held, (as Mr. Carson says it should have held) that it was a class (3) action, would have held that *res judicata* applied. I prefer Mr. Ten Eyck's view that the *System Federation* case, *sup.*, is no authority for the proposition that a judgment in a class (3) action involves *res judicata* against absent members and I conclude that I should follow the earlier statements of principle to which I have referred.

As to Mr. Carson's second line of reasoning I find difficulty in following how it can be said that the *Lemaire* action was a true class (1) action because the judgment involved or might involve the enforcement of the mortgage or create preferential rights between different bondholders, since it seems to me that though the equity jurisdiction was involved in order to justify the claim for a declaration the claim was in substance a common-law claim for the enforcement of the several rights of the bondholders involving a common question of law and so within class (3), and involving no question arising under the mortgage. I prefer on this point the evidence of Mr. Ten Eyck that the *Lemaire* action was a class (3) action. But it is sufficient for me to say that the burden of proof of the relevant law being upon the defendants, they have not satisfied me that the *Lemaire* action was a true class action or that in accordance with American law the judgment in that case bound anyone who was not an original party or did not intervene.

But even on the assumption that the effect of the judgment in the *Lemaire* action was to give valid support for a plea of *res judicata* in an American Court

against an absent member of the class, there are still difficulties in the defendants' way.

First, it must be recalled that Miss Campos was not a bondholder at the date of the initiation of the *Lemaire* proceedings.

I refer in this connection to three questions and answers at the end of Mr. Carson's cross-examination:

Mr. Justice McNAIR: Before Sir Milner re-examines, may I just raise this question: Have you any authority which says that a person who was not a member of the class at the time when the suit was initiated is bound by the ultimate decision? A.: No, my Lord; by definition, as I understand it, there could not be such decision.

Q.: That seems to be the crux of this matter, because, according to the evidence I have had, this lady, Miss Campos, was not a holder of the bond when the suit was initiated. A.: I suspect that is primarily for Counsel to observe upon, unless your Lordship wants to ask me that question?

Q.: You have no authority? A.: I have no authority on the proposition as your Lordship put it. There undoubtedly is authority that the taker of a bearer bond is bound by prior transactions in respect thereto, but I cannot put my hand on it. I might address your Lordship's attention to the fact that the Judge in the New York Court thought it important, in paragraph 1 of his order, to terminate—

Mr. Justice McNAIR: I think you are going on to another point.

To be quite certain that there was no misunderstanding I caused the first two questions and answers to be read back by the shorthandwriter. The result of this evidence seems to me to be fatal to the defendants' plea.

Furthermore, I think there is great force in Mr. Foster's contention that in accordance with English private international law a foreign judgment could not give rise to a plea of *res judicata* in the English Courts unless the party alleged to be bound had been served with the process which led to the foreign judgment. I had recently to rule on a somewhat similar point in the case of *Rossano v. Manufacturers Life Insurance Company*, [1962] 1 Lloyd's Rep. 187.

Finally, though the point was not fully argued before me, as at present advised it seems to me to be contrary to the whole conception of negotiability that the holder of a negotiable bond should be prejudicially affected by a judgment on a similar bond in an action in which he was neither plaintiff nor a party who had been duly served.

I can deal shortly with the defences raised in pars. 12 and 13 of the defence (which were not seriously argued before me) by saying that in my judgment the provision as to giving notice to the trustee is not a condition precedent to the enforcement of the bond.

As a result of those conclusions there will be judgment for the defendants.

Sir MILNER HOLLAND: I ought formally to ask, I think, for judgment for the defendants, with costs.

Mr. LITTMAN: My Lord, there are two matters upon which I would address your Lordship and I may have to take a few minutes over it, because they are both directed primarily to the question of costs, which is a pretty substantial issue in this case. The first is the question of the judgment which your Lordship ought to give in this case.

Mr. Justice MCNAIR: That is the form of the judgment?

Mr. LITTMAN: The form, my Lord, yes. In my submission, the plaintiff is entitled to judgment for the sterling amount of the bonds and the certificates, and closely linked up with that, of course, is the question of what would be a proper order for costs. I imagine your Lordship would normally deal with these issues separately, but as they are so closely linked perhaps your Lordship would allow me to address you upon both at the same time.

Mr. Justice MCNAIR: Certainly.

Mr. LITTMAN: May I remind your Lordship of the course this matter has taken. Before the writ was issued in this action the bonds and the coupons were tendered and the payment on the gold basis was refused—I am summarizing the correspondence, but I will refer your Lordship to it if necessary. But before the writ was issued those presenting the bonds on behalf of my client asked that in any event they should be paid the sterling amount of the bonds and the coupons, stating that they were making it quite clear that they were prepared to tender and hand over the

bonds and the coupons although, of course, without prejudice to their right to claim in the Court the balance. The attitude which was taken up on behalf of the defendants was that they would only pay the sterling value if it was accepted in complete satisfaction, a condition which, in my submission, the defendants were not entitled to impose.

The plaintiffs thereupon stated, before issuing the writ, that if this attitude was persisted in it would be necessary to claim the full amount. It was persisted in and the writ was issued, initially the writ for the interest and subsequently the writ for the capital sum, and the two actions were consolidated. The defendants put in a defence, and it was a defence to the whole claim. The claim, of course, was for the whole amount and pleaded that there had been presentation of the bonds and coupons and complained that neither the sum nor any part of it had been paid. The defence did not take the course, as it might have done, of admitting the sterling debt and raising a defence as to the balance. If that had been done, of course, the plaintiffs could have signed judgment for the sterling amount, but the defendants did not take that course, for reasons which no doubt seemed good to them, they put in a defence to the whole claim raising, firstly, a denial that the plaintiff was the bearer of these coupons and bonds, a matter which they had refused to admit right up to the hearing of this case although they were pressed to do so on a number of occasions, and refusing even to allow the plaintiff's evidence to be given by affidavit to prove it, it thus becoming necessary for the plaintiff to come over especially to do that. But, in any event, it was a defence to the whole claim.

The second defence to the whole claim was a denial that the coupons and bonds had been presented. There was raised what, in my submission, was a plea wholly disproved by the correspondence that she had only tendered them upon the basis that she was willing to surrender them if she got the full value. The correspondence shows that she was quite willing to surrender them and to get the lesser sum provided it was without prejudice to her claim to recover the balance.

The third defence to the whole claim was, of course, the defence that the action was brought without the consent of the mortgage trustees, and again it was a defence to the whole action.

There was continued correspondence at an early stage in which requests for payment of the sterling sum were made and it was only a year after the action was started that the defendants said that they would pay to my client the sterling sum less a sum of £10,000 to be paid into a joint account, which they desired to be retained as security for costs. My client protested against that and said that there could not really be any doubt that the sterling sum was due, and that, as regards security for costs, that was a matter which should be left to the decision of the Court as to what would be the appropriate sum, and she asked that the matter should be dealt with in that way. The defendants would not agree to that and said that was the only thing they were prepared to do. We had to submit to that, but we pointed out in a letter of Jan. 15, 1962:

As we pointed out to you in our last telephone conversation, we would have thought that the proper way of dealing with the question of security for costs would have been for you to take out a summons, and leave it to the Court to decide what amount should be paid, rather than to ask for the retention on deposit of the sum of £10,000—which in our view is quite excessive. Since however you refused to consider this proposition and maintained the contention you had adopted throughout, namely that your clients are not under any legal obligation to pay to our client any part of the amounts claimed in the action, we must reserve our client's right to ask the Court in any event that the whole of the costs of the action be paid by your clients.

Then the amounts of the bonds and coupons are set out at the end and I do not think there is any dispute about that.

The answer to that is:

We do not accept the third paragraph of your letter as accurate and reiterate that the contention which the Defendants have adopted is that payment at the sterling face value could only be made against the delivery up for cancellation of the Bonds and Coupons.

Then they go on to refer to the £10,000.

Your Lordship has been referred to the letters in which we have made it clear time and time again that we are quite prepared that the bonds should be surrendered to them. We suggested that they should not be destroyed before the

action was heard, but that was a matter for the defendants. The only thing we did refuse to do was to agree that payment should be accepted in full satisfaction.

That arrangement having been made, there was no amendment to the defence. All these pleas were maintained; indeed, one of them has been maintained right up to the judgment in this action, namely, the defence about the consent of the trustees—

Mr. Justice McNAIR: It was not taken very forcefully.

Mr. LITTMAN: No, but it was there. The reason for it, the advantage which the defendants got by raising this, of course, was that they secured for themselves the advantage that for a year they did not pay any part of the sum, and, equally, they got the advantage that they were able to decide for themselves rather than leaving it to the Court how much should be retained by them as security. That is the position. The defence was not amended and, in my submission, so far as the sterling sum is concerned the defence has not succeeded and my client is entitled to judgment for the total of those two sums, which is £44,194 10s. Of course, I quite accept that, having had part of that, we could not execute for the whole amount although, in my submission, we are entitled to judgment for it, and I would ask that on that sum we should have interest under the Law Reform (Miscellaneous Provisions) Act, 1934, at any rate your Lordship thinks appropriate. Your Lordship might think the rate in the bond was the appropriate rate, 4½ per cent.—

Mr. Justice McNAIR: I had written down a better figure than that.

Mr. LITTMAN: I do not know whether your Lordship thought six per cent?

Mr. Justice McNAIR: No, five per cent.

Mr. LITTMAN: I would ask for interest on the whole of that sum for one year—and I say "one year", because that was the period before we got any money. The whole of that was due at least a year before any part of it was paid; in fact, I am being slightly ungenerous to my client because in fact the interest was due a little earlier, but to simplify it I say one year. On the balance of the £10,000—

Mr. Justice McNAIR: Is your £10,000 included in the £44,194 10s.?

Mr. LITTMAN: Yes, my Lord, it is part of it. As I have had the rest I cannot ask for it after that date, but I ask for interest on the £10,000 at the same rate from Feb. 9, 1962 (which is the time payment was made), until judgment.

Mr. Justice McNAIR: I suppose you have had your deposit interest.

Mr. LITTMAN: In fact it is on a joint account.

Mr. Justice McNAIR: I hope it is on deposit.

Mr. LITTMAN: I suppose that is right, my Lord, assuming we get it. It depends rather what is going to happen to the money.

May I now turn to the question of costs. There are three factors here: In the first place I entirely accept that the defendants have succeeded here upon an important issue; they have succeeded upon the issue as to whether this is a gold value clause—

Mr. Justice McNAIR: They have really succeeded on the main point which you were arguing.

Mr. LITTMAN: That is correct, my Lord, but it is not necessarily the point which has involved all, or substantially all, the costs; that is one matter.

The second point to be taken into account is this: In my submission, my client is the successful plaintiff in this action. She is entitled to the judgment for which I have asked and so she is a successful plaintiff and, *prima facie*, entitled to her costs. I am not disputing that the defendants should have the costs of and occasioned by the issue of the gold clause, but, in my submission, the plaintiff is entitled to the general costs of the action.

The third factor is this: The defendants failed here upon the defence of *res judicata*. Now, I quite agree that where a successful defendant sues upon a number of points one does not necessarily apportion costs between the issues, but different considerations apply, and have been held to apply, where quite a separate issue is raised by the defendants and persisted in and where that has failed.

Mr. Justice McNAIR: Unless I am persuaded to the contrary, I should have thought you were clearly entitled to the costs of and occasioned by the plea of *res judicata*.

Mr. LITTMAN: Your Lordship appreciates that is quite substantial, because it was substantially the whole of the oral evidence.

Mr. Justice McNAIR: It took a long time, yes.

Mr. LITTMAN: We estimate that something like three days of the hearing was devoted to evidence and argument upon this point, and that is something between one-third and one-half of the hearing.

The order which I would submit to your Lordship is the appropriate order in this case is that the plaintiff should have the costs of the action including the costs of and occasioned by the issue of *res judicata*. The defendants to have the costs of and occasioned by the claim for a declaration of a gold value clause apart from the plea of *res judicata*. In my submission that is the fair and proper order to make.

Sir MILNER HOLLAND: Quite plainly I have a certain way to go on the question of the issue as to *res judicata*, but may I set that on one side for one moment. I heard what your Lordship said, and it did not surprise me, but may I just draw your Lordship's attention to the pleadings.

Setting aside the *res judicata* issue for the moment and treating the action as though it was not there, I am asking your Lordship to consider whether, as a matter of common sense, if it had not been for the claim that these bonds were gold value bonds, persisted in throughout and which failed, we would have been here.

It is instructive to see what the claim is for. On the first writ (that is action No. 4370) what is claimed is a declaration that, on the true construction of the bonds, gold value is the right measure and, secondly, £8223 13s. 5d. for interest, of course on that basis. The second writ (action No. 2523) claims principal moneys due on Jan. 1 on the mortgage bonds, interest and a declaration, but the actual claim in the statement of claim is, of course, a sum of money based wholly on the gold value of the bonds, namely, £123,657 5s. 11d.

The defence in the first action—and I think there is no distinction between the two defences—by par. 5, is:

Upon the true construction of the said Bonds the interest payments and the capital sums payable thereunder on presentation and surrender of the respective Coupons and Bonds are the face amount of the coupons namely

£2 5s. 0d. each and the face amount of the Bonds namely £100 each in current English Legal Tender.

There is no issue at all that the amount due on the bonds is the face value of principal and interest.

Mr. Justice McNAIR: And there is no claim for payment of the sterling face value.

Sir MILNER HOLLAND: That is the next point I wanted to make. Where is the claim for payment on the sterling basis? The whole action was on the footing of payment on a gold value basis. What is complained of is the fact that we were not willing to pay the sterling value to someone who was persisting throughout in claiming something quite different, but I submit that, remembering of course that the plaintiff was not in this country, I was right at the time to say: "Your bonds are sterling bonds. If you surrender them, that is the end of the matter and we pay you; but so long as you go on claiming something different we will not". In the end, the line taken was: "Very well, we will pay you, but we say that something ought to be retained and we say £10,000"—and my friend says that is unreasonable, but I do not know—"as security for costs". In our submission there is no foundation for the first part of my friend's submission that this is an action in which he is entitled to succeed in something he never asked for.

On the second question, of course, it is undoubtedly true that one of the defences raised your Lordship has indicated is not a good defence. In that respect the position is somewhat different from the position where the Court has to consider a case in which the plaintiff has lost and the defendants won. It is often said, and I will not say with complete accuracy, that if an action is brought against a defendant and wholly fails, the fact the defendant gave several grounds for resisting the action and only succeeded on one should not alter the *prima facie* position that the plaintiff has brought an action which has wholly failed. The matter is entirely in your Lordship's discretion. Of course I cannot challenge it if your Lordship thought the costs had been quite wrongly increased by taking a particular defence—

Mr. Justice McNAIR: I do not know in what sense you mean "wrongly".

Sir MILNER HOLLAND: Wrongly in law.

Mr. Justice McNAIR: In law you are entitled to raise any defence you like. You may fail or succeed, but it is a defence on

which you have wholly failed and it seems to be quite a separate issue, and I should have thought the ordinary rule must apply that the plaintiff gets those costs.

Sir MILNER HOLLAND: If your Lordship was looking for the proposition that costs are entirely in the discretion of the Judge, my friend has been good enough to assist me to find p. 1839 in the 1962 Annual Practice. There your Lordship will see, half-way down the page (Supreme Court Costs Rules, 1959, Rule 2 (5)):

The powers and discretion of the Court as to costs under section 50 of the Supreme Court of Judicature (Consolidation) Act, 1925 (which provides that the costs of and incidental to proceedings in the Supreme Court shall be in the discretion of the Court and that the Court shall have full power to determine by whom and to what extent the costs are to be paid), and under the enactments relating to the costs of criminal proceedings to which these rules apply, shall be exercised subject to and in accordance with these rules . . .

Then your Lordship will see the heading "Discretion as to Costs", and in the second paragraph:

. . . "the Court or Judge shall have full power to determine by whom and to what extent the costs are to be paid," . . .

Then

**Discretion to be Exercised Judicially.—**

Wide though the discretion is, it is a judicial discretion, and must be exercised on fixed principles, that is according to rules of reason and justice, not according to private opinion (*Sharpe v. Wakefield*, [1891] A.C. 173); or even benevolence (*Kierson v. Joseph L. Thompson & Sons, Ltd.*, [1913] 1 K.B. 587), or sympathy (*Bevington v. Perks*, [1925] 2 K.B., p. 231), and the exercise of discretion even by a Judge sitting alone must be justifiable (*Ritter v. Godfrey*, [1920] 2 K.B. 47); for instance, where a party successfully enforces a legal right, and in no way misconducts himself, then he is entitled to costs as of right (*Cooper v. Whittingham* (1880), 15 Ch. D. 501; *Jones v. Curling* (1884), 13 Q.B.D., p. 265; *Upmann v. Forester* (1883), 24 Ch. D. 231; *Civil Service Co-operative Society v. General Steam Navigation Co.*, [1903] 2 K.B. 756, C.A., explained and distinguished in *Donald Campbell & Co., Ltd. v. Pollak*, [1927] A.C. 732 . . .

Mr. LITTMAN: If it assists my friend, there is a passage which deals with the question on p. 1889, under Rule 9.

Mr. Justice McNAIR: I think this is the principle\*:

. . . This discretion must be exercised judicially, and the Judge ought not to exercise his discretion against a successful party on grounds wholly unconnected with the cause of action. . . . But when the Judge, intending to exercise his discretion, has acted on facts connected with or leading up to the litigation, the Court of Appeal is prohibited by statute from entertaining an appeal from his decision . . .

Sir MILNER HOLLAND: The passage to which my friend referred is at the top of p. 1889:

Where defendant succeeds generally, he is entitled to general costs of the action, even in respect of some defences in which he has failed, but not to the costs of a distinct issue raised by him unsuccessfully . . .

Subject to anything my friend wants to say, what we submit to your Lordship is that this is a case where your Lordship should give the defendant the general costs of the action, but it is a matter for your Lordship's discretion whether your Lordship feels that we should have the costs, following exactly those words, of a separate defence unsuccessfully raised. The plaintiff says we ought to pay the general costs of the action and your Lordship has my submission on that; that, in my submission, is wrong. If your Lordship is with me on that, then my friend may wish to say that he should pay my costs in relation to the issue on which I have succeeded and I should pay his costs in relation to the issue on which we have not succeeded, but in my submission that would be wrong. The wording of the passage I have just read to your Lordship leads to this conclusion, that a wholly successful defendant (which we are) should in no circumstances pay any costs. It may well be that he should not get—and it is a matter which I shall have to leave to your Lordship—the costs occasioned by a defence in respect of which he failed, but to order him to pay the costs of an unsuccessful plaintiff in respect of a defence which was unsuccessful would, in my submission, be wrong.

Mr. Justice McNAIR: Do you say it would be wrong if I were to order that the

defendants should have the general costs of the action, the plaintiff to have the costs of and occasioned by the plea of *res judicata*, such costs to be set off one against the other?

Sir MILNER HOLLAND: I think it would be difficult for me to say it would be wrong in law, but it would be contrary, in our submission, to the general practice that a defendant against whom a plaintiff is wholly unsuccessful should pay any costs in respect of an unsuccessful defence.

Mr. Justice McNAIR: If my judgment is right, I do not see why you should not pay for Mr. Ten Eyck's attendance. I am not saying there was anything wrong in raising the plea of *res judicata* at all, it is a perfectly proper plea to raise, but in point of fact it failed.

Sir MILNER HOLLAND: I would like to carry that particular thought a little further, my Lord, though this may or may not affect your Lordship's mind at all. This is a case into which the plaintiff went with her eyes open, knowing of the American decision; the letter before action says "We are well aware of the *Lemaire* decision." She took the risk that the defendants, who are an American corporation, would rely on the American judgment, as of course they did in two senses—

Mr. Justice McNAIR: I did not require Mr. Carson's attendance to prove the American law as a matter merely of persuasive authority.

Sir MILNER HOLLAND: No, my Lord. There is also this, perhaps from your Lordship's point of view not very important, consideration which moves the defendants: Had there been judgment against them which could only have been enforced in America, then it would have been vital, I should have thought, to plead that the American judgment is *res judicata* in case the American Court, in considering whether to enforce the English judgment, might have said: "Well, you never pleaded that the American judgment is *res judicata*".

Mr. Justice McNAIR: Could not the judgment have been enforced against Morgan Grenfell & Co., Ltd., in London, the paying agent in London?

Sir MILNER HOLLAND: I should have thought not, my Lord: they are not personally bound by the bonds.

Mr. LITTMAN: It depends whether they had any money. If they had money there could have been a garnishee, possibly.

\* 1962 Annual Practice, at p. 1841.

Sir MILNER HOLLAND: Lastly, may I put this approach to your Lordship: Separate costs of separate issues is never a very satisfactory matter from the point of view of taxation. The common practice to-day is to adopt a rough and ready approach and where defendants have raised a defence which involved a lot of costs, to deprive them of some of their costs; in other words, to order the defendants to pay only a proportion of the plaintiff's costs. It saves a great deal of trouble and expense in segregating out the material before the Taxing Master. On p. 1859 in the 1962 Annual Practice, under the heading "Issue", your Lordship will see:

The practice of awarding "costs of issues" is now discouraged . . . Although there is no apportionment of costs in issue cases it is the duty of the Taxing Master to consider whether there should be a division of items common to each issue but which related in part to one issue and in part to another. . . .

showing obviously how difficult it is to do it.

Mr. Justice McNAIR: I know it is always very unsatisfactory.

Sir MILNER HOLLAND:

Instead of awarding costs of issues, the Judge will sometimes make a plaintiff who is only partially successful bear some of his own costs. So where judgment is given for part of a claim the defendant can be ordered to pay half or some other portion of the plaintiff's costs as agreed or taxed.

I merely say that if your Lordship takes the view that a substantial amount of costs was involved in the issue on which the defendants have not been successful, it may well be the right order would be to order the plaintiff to pay a proportion (whatever proportion your Lordship thinks right) of the defendants' costs. Then all that happens is that the costs are taxed and the defendants will not get them all, they will only get a proportion.

Mr. Justice McNAIR: Just following that line of thought, with regard to the time occupied by the Court, I should have thought the time actually occupied both in hearing the evidence of the American law and the submissions on American law might easily be two-thirds of the time the case has taken.

Sir MILNER HOLLAND: It is very difficult to be sure about that. As I recall, my friend Mr. Foster opened the case for two and a half days and my argument to your Lordship on the substantial issue was one and a half days; that is four days, and the rest of the case took four days, so one can see there might be an argument for saying that the plaintiff should pay half the defendants' costs. Of course a great deal of the rest of the matter in the presentation of the case, the pleadings and so forth, would be the same whether the defendants raised this issue or not. It is never easy to make submissions where a matter is something entirely in your Lordship's discretion, but we do press your Lordship, if you are minded not to give the defendants the whole of their costs, to make an order giving them a proportion of their costs rather than having segregated issues with the very complicated business that involves.

Mr. LITTMAN: My Lord, the first question I apprehend is whether the plaintiff is entitled to judgment in this action. On that I understand the point troubling your Lordship is that there is no claim for the sterling sum. In my submission, there is a claim. I entirely accept there is not a separate claim, but there is a claim for the total amount and, in my submission, the greater sum includes the lesser. Your Lordship sees, if you look at the claim for principal, there is a plea that the defendants have not paid the sum of £123,000 or any part thereof. Then when we come to the defence, the claim is treated as a claim for the whole sum and there is a defence to the whole sum. Any doubt there may have been about that, in my submission, must have been removed by the correspondence, in which we made it clear beyond all possible doubt that if we did not succeed on the gold clause point we would ask for judgment for the sterling amount, and in my submission it was not essential to put in the words "Alternatively we claim the sterling sum". We claim for a certain sum of money and if some lesser sum is due, then in my submission the plaintiff's claim covers that. I would submit to your Lordship that this claim does raise a claim for the whole of the moneys and that the plaintiff is, therefore, entitled to judgment for that sum; and if that is right then the order for costs which I suggested to your Lordship would, in my submission, follow subject to this, that the defendants should have the costs of the issue relating to the gold clause.

If your Lordship is against me on that, then the assumption is that there will be judgment for the defendants in the action.

Mr. Justice McNAIR: Yes.

Mr. LITTMAN: I think my friend was inclined to concede, subject to your Lordship's discretion in the matter, that it might be right that I should not be ordered to pay the costs occasioned by the issue of *res judicata*.

With regard to the suggestion that there should be a proportion taken: There cannot in principle be an objection to this, but of course the difficult thing to know is what the proper and just proportion should be.

Mr. Justice McNAIR: I am not sure it would be more difficult for me than for the Taxing Master. The Taxing Master is quite at sea, experienced as he is, in determining how much time has been spent on a particular issue.

Mr. LITTMAN: I apprehend the way the Taxing Master would proceed would be this: He would say: The defendants do not get the costs of Mr. Carson, but the plaintiff gets her costs of Mr. Ten Eyck. Then I think the practice is for the trial Judge to give him some indication of the rough proportion of the general costs which are attributable to that issue, and the Taxing Master would then have to form a view as to what might be the common costs and relate those to that issue. That is one way to proceed. The other way to proceed is to follow my learned friend's suggestion and direct an overall proportion. The difficulty there is that one does not know to what extent the equation is going to be weighted by the costs of Mr. Carson, because if an overall proportion of costs is to be taken, of course, Mr. Carson's fees would be much greater—

Mr. Justice McNAIR: I should have thought it highly likely that Mr. Carson would be here anyhow.

Mr. LITTMAN: The defendants may say that Mr. Carson came from America and Mr. Ten Eyck did not, and they might seek to say that Mr. Carson's presence put them to great expense for this case and that might weigh the equation against my client.

My learned friend suggested that perhaps it could be dealt with upon the basis that, say, 50 per cent. of the time was spent on this issue, but that does not mean that justice would be done by directing that we should pay 50 per cent. of the defendants' costs, because if 50 per cent. of the

costs have been incurred on that issue, not only ought the defendants not to have them, but they ought to pay our costs. So the right order as to costs, if one was dealing with it by proportions, would be that there should be no order as to costs, because if 50 per cent. of the costs were incurred on an issue on which the defendants have failed, it means that 50 per cent. of the costs are due to them and 50 per cent. to us. Therefore, I would submit that if that is the appropriate way the right order is perfectly simply "No order as to costs". Failing that, I would ask your Lordship to say that if the defendants are to have judgment they should have the costs subject to this, that the costs of the issue of *res judicata* should be paid by the defendants to the plaintiff and set off, and that your Lordship should give some direction or some indication of approximately what, in your Lordship's view, was the proportion of the general costs as distinct from those specifically allocatable to that issue which were to be treated as going to that issue. That is a matter entirely for your Lordship.

Mr. Justice McNAIR: Having heard this discussion on the form of the judgment and costs, I have come to the conclusion that inasmuch as in the action itself the only claim by the plaintiff is a claim for payment on a gold value basis and as she has failed, according to my judgment, on that issue, there should be judgment for the defendants in the action.

As regards costs, here again the main issue litigated between the parties has been the gold value clause. There has been a secondary issue raised by the defendants on the plea of *res judicata* which occupied a great deal of time and certainly, no doubt, involved the employment of expensive witnesses, and on that issue the defendants have failed. I am rather tempted by the suggestion that, while giving the defendants the general costs of the action, I should limit their recovery to a certain proportion, but I am afraid I have not got the material before me on which I could base the proper proportion. Accordingly, my judgment will be that the plaintiff is to receive the costs of and occasioned by the plea of *res judicata*. These two sets of costs to be set off one against the other and the balance paid in whoever's favour the ultimate figure works out.

(5) Notwithstanding that a judgment or order to which

H

On March 27, 1968, D., Member of Parliament for Pembroke-shire, was expelled from the Labour Party. On April 6, about 100 people, mostly delegates from local Labour Parties within the constituency, were present at the annual meeting of the Pembroke-shire Divisional Labour Party (P.D.L.P.), at which J., president of P.D.L.P., took the chair. The assistant national agent of the Labour Party addressed the meeting, reminding members of their obligations, referring to D.'s expulsion, and suggesting that a resolution be passed to the effect that P.D.L.P. should continue to act in strict conformity with its constitution, and with the rules and constitution of the Labour Party. Although no such resolution was on the agenda, J. attempted to put to the vote a resolution to that effect, which had been moved and seconded by delegates from the floor, but disturbances broke out because the majority of those present were supporters of D., and favoured disaffiliation from the Labour Party. There was noise, disorder and, in a few cases, bodily contact, but no real violence, and no one appeared to have been put in fear. After some attempt to restore order, J. purported to adjourn the meeting sine die, and then left the hall with other delegates. Those who remained carried on with the business of the meeting, which included the election of officers. C. was elected president in place of J., L. was elected treasurer, while R., the secretary, remained secretary, since his office was not amongst those to be filled. The meeting also passed, by 69 votes to one, a resolution to disaffiliate from the Labour Party and a resolution to support D.

On May 6, J., claiming to represent all members of P.D.L.P. other than R., C. and L. (the first, second and third defendants, respectively), issued a writ challenging the validity of the continuation of the meeting and, by notice of motion, sought an injunction to restrain R., C. and L. from dealing in any way with the moneys or other property of P.D.L.P. By counter-notice of motion the defendants sought to have the writ struck out or, alternatively, so much of it as claimed relief in a representative capacity. Meanwhile, on April 24 the National Executive Committee of the Labour Party (N.E.C.) passed two resolutions, one suspending the activities of P.D.L.P. and the right of its officers to handle the party funds; the other authorising the national agent "to take such steps as are necessary to complete the re-organisation of P.D.L.P."

Pursuant to those resolutions, the national agent resolved, inter alia, to convene a meeting of the Haverfordwest Local Labour Party, but before doing so he wrote to leading members of the dissident faction who supported D., informing them of the proposed re-organisation and requesting from them an undertaking to accept and conform to the constitution, programme, principles and policy of the Labour Party, that they neither belonged to nor were actively associated with any proscribed organisation and that they would co-operate in re-establishing P.D.L.P. in accordance with the rules and constitution of the Labour Party. Four members, including M. and B.L.D., did not reply and four others, including R., sent replies

any such application relates is binding on the person against whom the application is made, that person may dispute liability to have the judgment or order enforced against him on the ground that by reason of facts and matters particular to his case he is entitled to be exempted from such liability. (6) The court hearing an application for the grant of leave under paragraph (3) may order the question whether the judgment or order is enforceable against the person against whom the application is made to be tried and determined in any manner in which any issue or question in an action may be tried and determined."

1 Ch.

John v. Rees

A which the national agent regarded as unsatisfactory. By reason of their failure to give the required undertakings the eight members were deemed to be disqualified from membership of the Haverfordwest Local Labour Party, and were neither informed of the re-organisation meeting nor permitted to attend it. The meeting was held on May 20. Officers were elected and delegates were chosen to represent the Haverfordwest Local Labour Party at a proposed re-organisation meeting of P.D.L.P.

B M. and B.L.D. challenged the validity of the whole of that meeting in a writ issued on June 12, and, by notice of motion of the same date, sought to restrain the officers and delegates elected at the meeting of May 20, from dealing in any way with the moneys and other property of the Haverfordwest Local Labour Party, and from acting as delegates for it. Despite the issue of the second writ, the proposed re-organisation meeting of P.D.L.P. was held on June 22, and was attended by delegates purported to have been elected at the re-organisation meeting of May 20, and by delegates from other local Labour Parties elected in a similar manner at similar meetings convened by N.E.C. At the meeting of June 22, those attending purported to re-elect J. as president of P.D.L.P. The validity of the whole of the third meeting was challenged in a writ issued on July 5 by R. and C., and on the same day, by notice of motion R. and C. sought to restrain J. from dealing in any way with the moneys or other property of P.D.L.P.

D On the hearing of the four motions in the three actions:—

E *Held* (1) That the rule as to representative actions laid down in R.S.C., Ord. 15, r. 12 (1), was not a rigid one, but was a rule of convenience; that what was important was to have before the court, either in person or by representation, all those who would be affected, so that all should be bound by the result; that all members of P.D.L.P. had a common interest, and that since the only objection suggested to J.'s being allowed to represent all the members (other than the three defendants), namely, that J. would then be representing some who in fact supported the defendants and who did not wish J. to represent them, could be cured by adding such persons as defendants (either individually or by securing their representation by other defendants), there was no reason why the writ should be struck out wholly or in so far as it claimed relief in a representative capacity (post, pp. 369G—370B, E—371A, C, G, 373E—F, H—374C, E—F).

F Dicta of Lord Macnaghten in *Bedford (Duke of) v. Ellis* [1901] A.C. 1, 8, 10, H.L.(E.) applied.

G (2) That when, in contravention both of the decision of the standing orders committee at a meeting immediately preceding the main meeting and of the standing orders of P.D.L.P., J. attempted to put to the vote a resolution not on the agreed agenda, he was guilty of a deliberate and substantial breach of duty, which caused the disturbances to occur; that J. possessed no inherent power as chairman to put such a resolution to the meeting, and that while he did possess an inherent power to adjourn for disorder for such a period as might be reasonably necessary in order to restore order, his action in purporting to adjourn sine die was invalid and ineffective to produce a valid adjournment of the meeting; and that accordingly C. and L. were validly elected, and since R. remained secretary all three defendants were validly elected officers of P.D.L.P., and J.'s motion in the first action must be dismissed (post, pp. 374F—H, 377E—G, 378A, 379C, 381G—382D, 384E—G).

H *Stoughton v. Reynolds* (1736) 2 Stra. 1045; Fort. 168; *Reg.*

v. *D'Oyly* (1840) 12 Ad. & El. 139; *National Dwellings Society v. Sykes* [1894] 3 Ch. 159 and *Rex v. Churchwardens of St. Mary, Lambeth* (1832) 1 Ad. & El. 346n. considered.

(3) That the maxim "Omnia praesumuntur rite esse acta" was not limited in operation to cases where it was sought to apply it in favour of outsiders or non-members of a club or association, and since there was some evidence that certain rules of the Labour Party had for many years been treated as the rules of P.D.L.P. the maxim could, in the absence of any direct evidence of formal adoption, be applied in favour of the adoption of the rules; that in any event there was no reason why a person joining a club or association should not be bound by whatever rules had become established by usage even if never formally adopted and not brought to his attention on joining; that while P.D.L.P. was not a mere branch of the Labour Party but remained a separate entity, nevertheless, on the true construction of the rules set B, P.D.L.P. was bound to accept the constitution, programme, principles and policy of the Labour Party, and that therefore the resolution to disaffiliate (in any event procedurally invalid because not upon the agenda) was also invalid because P.D.L.P. could not lawfully disaffiliate itself from the Labour Party, unless the rules had first been altered (post, pp. 386A-B, F-G, 387G-388C, D-E, G-389B, F, G, 390B-D, F-391B).

Dictum of Lord Simonds in *Morris v. Kanssen* [1946] A.C. 459; 475; [1946] 1 All E.R. 586, H.L.(E.); *Royal British Bank v. Turquand* (1856) 6 E. & B. 327 and *Finch v. Oake* [1896] 1 Ch. 409, C.A. distinguished.

(4) That despite the passing of the resolution to disaffiliate and in support of D., it would not be right to grant the injunction sought to restrain the defendants, who were the lawfully elected officers of P.D.L.P., since there was no evidence of any improper use of the funds or of any threat to flout the law once the law was known, and J.'s motion must, therefore, be dismissed (post, pp. 391G-392c).

*General Billposting Co. Ltd. v. Atkinson* [1909] A.C. 118, 122, H.L.(E.) distinguished.

(5) That although clause 8 (2) of the constitution of the Labour Party empowered the N.E.C. to take "any action it deems necessary . . . whether by . . . disaffiliation of an organisation or expulsion of an individual or otherwise," there was nothing in the rules or constitution of the Labour Party which excluded the application of the principles of natural justice, even though what was here in issue was suspension and not expulsion, and that, accordingly, the resolution suspending the activities of P.D.L.P. and the rights of its officers to handle its funds and the resolution authorising the national agent to re-organise it were nullities, since in both cases those who were suspended were given no opportunity to be heard in answer to charges, and in the case of the second resolution, no notice was given to certain members of the Haverfordwest Local Labour Party of the proposed re-organisation meeting of May 20; that, it being conceded that the validity of the subsequent meeting of P.D.L.P. on June 22 stood or fell with that of May 20, both were wholly invalid and that, accordingly, the plaintiffs in the second and third actions were entitled to the injunctions claimed and such injunctions would be granted unless undertakings were given by the defendants to those actions in lieu of the injunctions (post, pp. 395E-F, 396E, 397D-F, 401E-F, H-402A, E-G, 403H-404C).

- B *Per* Megarry J. A chairman's first duty is to keep order if he can. If disorder ensues, his duty is to make earnest and sustained efforts to restore order. If his efforts fail, he should try to operate whatever provisions the rules contain as to adjournment of the meeting. If that proves impossible he should exercise his inherent power to adjourn for a short while, taking due steps to ensure so far as possible that all present know of the adjournment. If violence, not mere disorder, occurs he should take similar steps, save that the greater the violence the less prolonged should be his efforts to restore order before adjourning. He has a duty, not merely a power, to adjourn in this way, when people are put in fear for their safety. The power and the duty must be exercised bona fide, to forward and facilitate the meeting, not merely to interrupt or procrastinate, and the adjournment must be for no longer than necessary. There may well be other limitations on the chairman's inherent power of adjournment (post, p. 382D—383B).

## MOTIONS.

- C On March 27, 1968, the Member of Parliament for Pembrokeshire, Mr. Desmond Donnelly, was expelled from the Labour Party. Ten days later, on April 6, the annual meeting of the Pembrokeshire Divisional Labour Party (hereinafter referred to as P.D.L.P.), took place. At the start of the meeting, Mr. James Cecil Gough John, as president of P.D.L.P., took the chair. The meeting was attended by about 100 people, mostly delegates from various local Labour Parties within the constituency. After Mr. John had welcomed the delegates, the assistant national agent of the Labour Party addressed the meeting on loyalty to the party. He reminded members of their obligations, referred to Mr. Donnelly's expulsion, and ended by suggesting that a resolution be passed to the effect that P.D.L.P. should continue to act in strict conformity with its constitution, and the rules and constitution of the Labour Party. No such resolution appeared on the agenda and when Mr. John sought to put such a resolution, which had been moved and seconded by delegates from the floor, to the vote, disturbances broke out, since the majority of those present were supporters of Mr. Donnelly, and favoured disaffiliation from the Labour Party. There was a certain amount of noise, disorder and, in a few cases, bodily contact, but nothing that could really be called violence, and no one appeared to have been put in fear. After some attempt to restore order, Mr. John purported, as chairman, to adjourn the meeting sine die, and left the meeting accompanied by a number of other delegates. Those who remained proceeded with the business of the meeting, which included the election of officers. Mr. Bartholomew Cleare was elected president, in place of Mr. John, and Mr. Haydn J. Lewis was elected treasurer. Mr. Glyn Rees, the secretary, remained secretary since his office was not amongst those to be filled. In addition to other business, the meeting then passed, by 69 votes to 1, a resolution to disaffiliate from the Labour Party. The validity of the continuation of the meeting, after the purported adjournment, was challenged by Mr. John, as plaintiff, in a writ issued on May 6, 1968 [1968 J. No. 2692], and a notice of motion was issued on the same date, claiming an injunction to restrain Mr. Rees, Mr. Cleare and Mr. Lewis (the first, second and third defendants, respectively), from dealing in any way with the moneys or other property of the P.D.L.P.
- H Mr. John, the plaintiff, claimed to represent all members of the P.D.L.P. other than the three defendants and also, to be acting personally.

On May 14, the defendants issued a counter-notice of motion seeking

to have the whole writ struck out, or alternatively, so much thereof as claimed relief in a representative capacity.

A

Meanwhile, on April 24, 1968, the National Executive Committee of the Labour Party, hereinafter referred to as N.E.C., passed two resolutions, one suspending the activities of the P.D.L.P., and the right of its officers to handle the funds of the party, and the other authorising the national agent "to take such steps as are necessary to complete the reorganisation" of the P.D.L.P. In pursuance of these resolutions the national agent resolved, inter alia, to convene a meeting of the Haverfordwest Local Labour Party, but before doing so he sent a letter by registered post to leading members of the dissident faction who supported Mr. Donnelly, informing them of the proposed reorganisation and requesting from them an undertaking that they accepted, and would conform to, the constitution, programme, principles and policy of the Labour Party, that they neither belonged to nor were actively associated with any proscribed organisation and that they would co-operate in re-establishing the P.D.L.P. in accordance with the rules and constitution of the Labour Party.

B

C

Four members, including Mr. Thomas Henry Martin, the treasurer of the Haverfordwest Local Labour Party, and Mr. Brian Lloyd Davies, did not reply, and four more, including Mr. Rees (the first defendant to the first action), sent replies which the national agent regarded as unsatisfactory. By reason of their failure to give the required undertakings these eight people were deemed to be disqualified from membership of the Haverfordwest Local Labour Party, and were not informed of, or permitted to attend, the reorganisation meeting, which was held on May 20.

D

The business transacted at that meeting included the purported election of officers and of delegates to represent the Haverfordwest Local Labour Party at a proposed reorganisation meeting of the P.D.L.P. The validity of the whole of the meeting on May 20 was challenged in a writ [1968 M. No. 2390], issued on June 12 by Mr. Martin and Mr. Brian Lloyd Davies, as plaintiffs, and by notice of motion of the same date, they sought to restrain Mr. Leonard Davis, Mr. W. Webb, Mr. R. C. Davies, Mr. J. B. W. James and Mrs. A. James (the officers and delegates elected or confirmed in office at the meeting of May 20) from dealing in any way with the moneys and other property of the Haverfordwest Local Labour Party, and from acting as delegates for it.

E

F

Despite the issue of that second writ the proposed reorganisation meeting of the P.D.L.P. was held on June 22, and was attended by the delegates purported to have been elected at the reorganisation meeting on May 20, of the Haverfordwest Local Labour Party, and by delegates from other local Labour Parties in the constituency elected in a similar manner at meetings convened by N.E.C. At this meeting those attending purported to re-elect Mr. John as president. The validity of the whole of that meeting was challenged in a writ [1968 R. No. 2276], issued on July 5, by Mr. Rees and by Mr. Cleare (the first two defendants in the first action) against Mr. John (the plaintiff in the first action), and on the same day, by a notice of motion, they sought to restrain Mr. John from dealing in any way with the moneys or other property of the P.D.L.P.

G

H

The two motions in the first action and the motions in the second and third actions were all heard together.

1 Ch.

John v. Rees

A The facts are more fully stated in the judgment.

*A. C. Sparrow Q.C.* and *Gavin Lightman* for the plaintiff in the first action, and the defendants in the second and third actions.

B The plaintiff claims to represent all members of the Pembrokeshire Divisional Labour Party (P.D.L.P.), except the defendants. The defendants wish to have the plaintiff's motion struck out, either totally or in so far as it is brought in a representative capacity, and wish the defendants' motion to be tried first as a preliminary point of law. Whether or not a number of members of P.D.L.P. do not support the plaintiff, is irrelevant: see *Daniell's Chancery Practice*, 8th ed. (1914), pp. 177, 179, where it is stated that a representative action can be brought on behalf of others of a body although the majority disapprove of it. It would in any event be impossible to try it as a preliminary point without going into all the facts. The plaintiff's motion should therefore be heard first.

C *David Hirst Q.C.* and *Charles Drake* for the defendants in the first action and the plaintiffs in the second and third actions.

Notice of motion was duly served under R.S.C., Ord. 12, r. 8 and it is obvious that the matters raised were to be heard as a preliminary point. The plaintiff certainly does not represent all members of P.D.L.P. except the defendants, as the evidence will show. In *Markt & Co. Ltd. v. Knight Steamship Co. Ltd.* [1910] 2 K.B. 1021, where a shipper sued on behalf of himself and other owners of cargo, it was held that a representative action would not lie, and the writ was struck out altogether. In *Smith v. Cardiff Corporation (No. 1)* [1954] 1 Q.B. 210, the Court of Appeal held that to bring a representative action it must be shown that all members of the alleged class have a common interest, a common grievance and that the relief claimed is beneficial to them all. That cannot be said here. If a person purports to sue in a representative capacity for some only of the class, he must say who it is that he does represent. This is not a mere technicality, but fundamental. The defendant's motion seeks to show that the plaintiff's writ is basically faulty and the defendants must therefore be entitled to have their motion heard first.

F *A. C. Sparrow Q.C.* in reply. To strike out the representative capacity would not alter the action one iota, the plaintiff would still be entitled to sue on his own behalf and that would necessitate the same facts being opened, the same submissions made and the same evidence given. The judge would require to know the background, even to decide a preliminary point. The rule as to joinder of parties is merely one of convenience. It is necessary to join all who may be affected, and clearly a declaration in this case would affect all the members. The device of a representative action is to avoid the necessity of joining every person who may be interested. Anyone who objects to the plaintiff representing him can apply to be made a defendant to the action, but unless he does so the writ is not to be overturned.

G  
H [Megarry J. ruled that there would be no convenience or saving of time in hearing the preliminary point first, and stated that he would hear all the evidence on all four motions in the three actions before ruling on the preliminary point.]

*A. C. Sparrow Q.C.* and *Gavin Lightman* on the first action on the plaintiff's motion. A

The plaintiff, who is president of the Pembroke Divisional Labour Party ("P.D.L.P.") is often known as "Counsellor John." He is well qualified for the role of "keeper of the party conscience" since he has been an active member for 40 years, a member of the executive committee for 24 years, and is a bank guarantor of the Haverfordwest Local Labour Party for £1,000. His motion is designed to prevent a "takeover" or "putsch" by a minority or faction who seek to disaffiliate from the Labour Party. As a member of P.D.L.P., he is bound by contract with the other members and is entitled to sue to secure a proper observance of that contract as contained in the party's constitution. Those who claim to have been elected as its officers at the meeting held on April 6, 1968, were never lawfully elected. But even had they been lawfully elected, they would not be entitled to launch out on policies in conflict with the Party's constitution, and with the programme principles and policy of the Labour Party. They should be restrained from expending the Party's funds in the way they seek to do. Furthermore, in any event, the constitution of P.D.L.P. is so bound up with that of the Labour Party itself, that it is inseparable from it. The activities of P.D.L.P. are subject to control by the National Executive of the Labour Party, which has in fact passed resolutions suspending the activities of P.D.L.P. and suspending from office those who purport to act as its officers. B C D

Mr. Donnelly aims to set up a new party in opposition to the official Labour Party and has stated that he will stand as an independant candidate at the next election at the head of such new party. He is therefore a self-proclaimed rebel and he has evidently decided to attempt to use P.D.L.P. for his own purposes, to harness the funds to the cause he has espoused. However, his aim is legally impossible, and is bound to fail since the constituency Labour parties are not local autonomous bodies lending support to a central body. The Labour Party and P.D.L.P. are so clamped together by their interlocking constitutions that they cannot be separated without first altering their rules. E

At the meeting on April 6, 1968, the plaintiff's action in adjourning the meeting sine die, constituted a valid adjournment of the meeting. The resolution suggested by Mr. Underhill at the conclusion of his address on loyalty to the Labour Party, namely that P.D.L.P. should continue to act in conformity with its constitution, was a harmless resolution and was clearly admissible although it was not upon the agenda, but since it did not accord with the wishes of Mr. Donnelly's supporters disorder broke out. The plaintiff had an inherent right, as chairman, to put the resolution to the meeting, and when disorder resulted, it was both his right and his duty to adjourn the meeting. The purported continuation of the meeting by Mr. Donnelly's supporters was invalid, with the consequence that all business transacted thereafter at the meeting including the election of officers and the resolution to disaffiliate was equally invalid. Furthermore the resolution to disaffiliate was not upon the agenda, and the standing orders required ten days notice to be given of any resolution to be put to the meeting. Thus, quite apart from the impossibility of any resolution to disaffiliate owing to the nature of the party's constitution, the F G H

1 Ch.

John v. Rees

A resolution which was passed at the meeting was procedurally defective, both because it was not on the agenda and because it was passed after a valid adjournment of the meeting.

Moreover, the action taken by the National Executive Committee of the Labour Party ("N.E.C.") has effectively suspended the activities of P.D.L.P. and has suspended from office those who purported to have been elected, and has replaced them by others under the re-organisation which has been carried out in accordance with the resolutions of the N.E.C.

B The rules of P.D.L.P. upon which the plaintiff relies are those contained in Set B (for constituency Labour parties). There is no evidence of an actual resolution for their adoption having been passed by P.D.L.P. but they have been long acted upon, and the maxim "omnia presumuntur rite esse acta" applies in their favour: see *Phipson on Evidence*, 10th ed. (1963), p. 842, para. 2027, and *Morris v. Kanssen* [1946] A.C. 459; *Reg. v. Langton* (1876) 2 Q.B.D. 296, *Attorney-General v. Smith* [1947] Ir. 332 and *In re Webb, decd.* [1964] 1 W.L.R. 509. The court is therefore asked to hold that the rules Set B can be presumed on the evidence to have been adopted in 1947. The plaintiff has therefore established his right to the relief claimed. Reference was also made to *Halsbury's Laws of England*, 3rd ed. vol. 5 (1953) pp. 252, 586, 589, 590, 604, 605, 608, 610; *Kerr on Injunctions* 6th ed. (1927) 583; *Lloyd on the Law of Unincorporated Associations* 99; *Harington v. Sendall* [1903] 1 Ch. 921, and *Thellusson v. Valentia (Viscount)* [1907] 2 Ch. 1.

*David Hirst Q.C.* and *Charles Drake* on the first action on both motions. The plaintiff has claimed the right to bring a representative action on behalf of all the members of P.D.L.P. other than the three defendants, but no duty rests upon him to bring such an action. If he chooses to exercise his right to bring a representative action he must show that his action falls within the rule, i.e., within R.S.C., Ord. 15, r. 12. He must show that all the people whom he claims to represent have the same interest. If he is wrong, and the onus is on him to get it right, then his writ is bad and should be struck out. Here there are over 20 affidavits from people who state that they do not wish the plaintiff to represent them, and the conclusion is obvious, that the plaintiff must have known, when he issued his writ, that there was a sizeable proportion of members who in fact were on the other side, and supported Mr. Donnelly. His writ is therefore bad and should be struck out. Reliance is placed upon *Barker v. Allanson* [1937] 1 K.B. 463, *per Greer L.J.* at 473, and *per Scott L.J.* at 475; *Smith v. Cardiff Corporation (No. 1)* [1954] 11 Q.B. 210, 213, 218, 220; and *Market & Co. Ltd. v. Knight Steamship Co. Ltd.* [1910] 1 K.B. 1021.

G Alternatively the words of representation should be struck out. It is impossible to show that Mr. Donnelly's supporters have the same interests and grievances as the supporters of the official Labour Party.

H As to the effectiveness or otherwise of the continuation of the meeting of April 6, after the plaintiff's purported adjournment sine die; (1) The order of business of a meeting is basically as laid down in the standing orders. (2) The standing orders committee has power to vary the order of business, subject at least to the wishes of the majority of the meeting. (3) Rule 5 of the standing orders laying down the order of business is

sacrosanct, unless it is suspended under rule 22, which however requires a vote of the meeting with a two-thirds majority to be put into operation. (4) On any view the chairman has no power to vary the order of business, of his own motion. (5) By rules 11 or 19 the power to adjourn is vested only in the majority of the meeting. (6) The chairman's duty is to conduct the meeting in accordance with the wishes of the majority. (7) The chairman of a meeting has no inherent power to adjourn the meeting under the general principles of law. (8) If, contrary to the last submission, there is some residual power to adjourn for disorder, (i) the chairman may not exercise it if he himself has provoked the disorder by his own improper conduct of the meeting, unless he has first tried to remedy his improper conduct, as by returning to the correct order of business or by availing himself of any provision for suspension of the standing orders which may be contained in the rules; (ii) the chairman cannot in any event use such residual power to frustrate the wishes of the majority of the meeting; (iii) the chairman cannot use any such power without first seeking to comply with the standing orders, by, in this case, seeking a vote for adjournment under rules 11 or 19 of the standing orders. (9) Any such residual power to adjourn for disorder could only be used for the minimum period reasonably necessary for the purpose of restoring order. An adjournment sine die could never be a proper exercise of any such power: see *Stoughton v. Reynolds* (1736) 2 Stra. 1045, Fort. 168; *Wandsworth & Putney Gaslight & Coke Co. v. Wright* (1870) 22 L.T. 404; *Wall v. London & Northern Assets Corporation* [1898] 2 Ch. 469; *Salisbury Goldmining Co. Ltd. v. Hathorn* [1897] A.C. 268; *National Dwellings Society v. Sykes* [1894] 3 Ch. 159.

The chairman's duty is to ascertain the wishes of the majority. Obviously he must preserve order, but that does not entitle him to adjourn altogether and never recall the meeting. [Reference was also made to *Henderson v. Bank of Australasia* (1890) 45 Ch.D. 330; *Reg. v. D'Oyly* (1840) 12 Ad. & El. 139; *Rex v. Chester (Archdeacon of)* (1834) 1 Ad. & El. 342; *Shaw v. Thompson* (1876) 3 Ch.D. 233; *Catesby v. Burnett* [1916] 2 Ch. 325; *MacDougall v. Gardiner* (1875) 1 Ch.D. 13; *Second Consolidated Trust Ltd. v. Ceylon Amalgamated Tea and Rubber Estates Ltd.* [1943] 2 All E.R. 567.]

The order of business is laid down in mandatory terms in the standing orders. There is a power to suspend the standing orders by a vote of a two-thirds majority under standing order 22, but no one suggests that that power was ever exercised here. The standing orders committee is not explicitly given power to vary the order of business, but the plaintiff in fact sought to get the committee to authorise such a variation. Either the committee has such a power impliedly, or, by custom or authority it must be obtained from the meeting itself. Alternatively if the standing orders committee has this power, then standing order 5, which lays down the order of business in mandatory terms, is sacrosanct and must be adhered to. Here the plaintiff strayed from his duty as chairman, by attempting to put the proposed resolution of loyalty to the Labour Party to the vote at that stage of the agenda; by so doing he was departing from the order of business agreed to by the committee. Standing orders 11 and 19 are

1 Ch.

John v. Rees

A only consistent with the power to adjourn being vested in the meeting itself.

As to the power to put resolutions to the meeting it is clear that in the agenda the proper place to consider items was after the conclusion of other business including the election of officers. The standing orders required ten days' notice of motion for the inclusion of a resolution on the agenda "unless on matters of urgency accepted by the majority as such."

B In fact however the practice seems to have been, to give carte blanche to bring resolutions without notice. This is what the plaintiff attempted to get the standing orders committee to agree to. The standing orders committee accepted in principle, but only on condition that the proposed resolution took its rightful place after the resolutions already on the agenda. According to an affidavit sworn by Mr. Underhill, the Assistant National Agent of the Labour Party, all sorts of resolutions which had not been notified were in fact accepted at the purported reorganisation meeting of June 22, 1968.

C It has been suggested that the defendants' state of mind and their actions showed a basic disloyalty to the Labour Party and its principles. But far from doing this the defendants have made it plain that they are loyal to what they regard as Labour Party principles. In their view it is others; not least the Government and the Prime Minister, who have departed from the true principles of the Labour Party. What the resolution to disaffiliate does not show is disloyalty to Labour Party principles.

D When the noise and disorder broke out at the meeting the plaintiff as chairman had three possible alternatives open to him: (1) to remedy his own improper conduct by reverting to the correct order of business; (2) if he wanted to change that order to seek to get a motion passed for that purpose under standing order 22, for the suspension of standing order 5 which regulated the order of business; or (3) if he wished to adjourn, to attempt to get a vote for an adjournment under standing orders 11 and 19. What he was not entitled to do was to adjourn the meeting on his own motion, particularly when it was his own conduct which had created the disorder. Certainly there was no power to adjourn sine die: see *National Dwellings Society v. Sykes* [1894] 3 Ch. 159, per Chitty J. at p. 162.

E If, however, the plaintiff did have a power to adjourn, did he in fact do so? There is evidence from respectable people, so near that they must have heard, who say they did not hear the plaintiff adjourn the meeting and it is for the plaintiff to establish a strong prima facie case that he did. Here there is evidence in opposing directions, and no strong prima facie case can be made out. If the meeting was adjourned for the proper purpose of disorder it should only have been for so long as was necessary to allow tempers to cool. The plaintiff had three weeks to reconstitute the meeting before the Labour Party took steps to suspend P.D.L.P., but if the plaintiff's real motive for adjourning was that he knew he was on a "losing wicket" there was every motive for adjourning sine die. If there was no adjournment then the continuation was valid in any event, and consequently the election of officers was valid.

H Where a meeting is adjourned in circumstances in which a minority is misled, the adjournment is a fraud upon the minority and invalid, and the continuation of a meeting would be valid: [see *Palmer on Company*

*Law*, 20th ed. (1968), pp. 479, 486 and *Salisbury Gold Mining Co. Ltd. v. Hathorn* [1897] A.C. 268; *Stoughton v. Reynolds* (1736) 2 Stra. 1045, Fort. 168; *National Dwellings Society v. Sykes* [1894] 3 Ch. 159; *Shaw v. Thompson* (1876) 3 Ch.D. 233; and *Catesby v. Burnett* [1916] 2 Ch. 325.] Where however the adjournment comes when the business of the meeting is over, or if it is validly adjourned before that point is reached, then naturally the meeting cannot be continued by a "rump": see *Rex v. Gaborian* (1809) 11 East 77.

Mr. Donnelly's right to attend the meeting which the plaintiff challenges is based on the following facts: (1) the agenda provided for an address by the Member of Parliament, and therefore Mr. Donnelly was the only person who could give it; (2) the model rules Set B do not apply and therefore he was entitled to be there even though expelled from the Labour Party; and (3) he was still a member of P.D.L.P. even if not of the Labour Party.

The resolution to disaffiliate was perfectly in order since the items on the agenda as provided for by the standing orders include as an item "To consider resolutions" and standing order 7 gives the meeting carte blanche to consider matters in an emergency of which due notice had not been given. No one suggests that the emergency in the present case was known beforehand. The resolution was passed by a majority of 69 to 1, and was clearly urgent business. If the majority at a meeting accepts a resolution the court is not going to ascertain internally whether the business was properly on the agenda: see *MacDougall v. Gardiner* (1875) 1 Ch.D. 13.

It is said that even if the defendants were validly elected, they should be restrained from acting because they are departing from or are in conflict with the policy of the Labour Party, but it is vital to distinguish between disaffiliation and a conflict of policy. A person may adhere to a political policy while still wishing to disaffiliate and pursue the policy separately. Compare *General Assembly of Free Church of Scotland v. Overtoun* [1904] A.C. 515, where the "Wee Free" withdrew from the Church of Scotland in 1843 because they wanted to stand on their own, and the elders were held in breach of trust in joining with the Presbyterians who were a disestablished church. That case shows that separation is possible without disloyalty to principle. It is however questionable how far the court can test loyalty or disloyalty to "the policy of the Labour Party", which is *not* the Prime Minister's policy or the Government's policy. It is virtually impossible for the court to determine with certainty what the policy of the Labour Party is. In any event there is no evidence that the defendants have been disloyal to it, whatever it may be. No sufficient *prima facie* case has been made out to show that P.D.L.P. ever adopted the rules Set B, but even if those rules were adopted P.D.L.P. would be free to disaffiliate as they did by the resolution at the meeting on April 6, 1968. Thereafter any power of the Labour Party to discipline P.D.L.P. ceased. To establish that the rules of Set B were binding, the plaintiff would have to prove *actual adoption*, and that members who joined subsequently agreed expressly or impliedly to be bound by them. But in fact there is no direct evidence of any such adoption and it would be wrong to apply the presumption, in the maxim *omnia praesumuntur*

1 Ch.

Page ID #:2539

John V. Rees

- A rite esse acta. This maxim is only available to “outsiders.” People on the inside, who have or ought to have knowledge, cannot claim to apply it. It is intended for the benefit of persons who are entitled to assume just because they cannot, from the circumstances, themselves know: see *Morris v. Kanssen* [1946] A.C. 459; *Reg. v. Langton* (1876) 2 Q.B.D. 296; *Attorney-General v. Smith* [1947] I.R. 332; *In re Webb, decd.* [1964] 1 W.L.R. 509; *Sneyd v. Stewart* (1857) 10 Ir. Jur. 105 and *Brogden v. Metropolitan Railway Co.* (1877) 2 App.Cas. 666.
- B

In cases connected with clubs it is necessary to show some knowledge or acceptance by the member: see *Raggett v. Musgrave* (1827) 2 C. & P. 556 and *The Satanita* [1895] P. 248; *Clarke v. Dunraven* [1897] A.C. 59. Members who joined the club before the alleged adoption cannot be bound by the rules: see *Hughes v. Architects' Registration Council of the United Kingdom* [1957] 2 Q.B. 550. Here there is no evidence of actual adoption and, the plaintiff being an “insider” he cannot rely upon the presumption of adoption. There is no evidence of acceptance or knowledge, and therefore the rules Set B cannot apply.

C

- Unless the rules expressly provide to the contrary a member of an unincorporated association is entitled to resign. Similarly a section of a voluntary association is always entitled to disaffiliate or secede from the association, and having seceded they are no longer bound by the club rules: see *Finch v. Oake* [1896] 1 Ch. 409; *Sheriff v. McMullen* [1952] I.R. 236 and *General Assembly of Free Church of Scotland v. Overtoun* [1904] A.C. 515. No one would dare to suggest that an individual member of the Labour Party cannot resign, if disenchanted with Labour, or from mere caprice.
- D

- Furthermore the rules of the Labour Party give the N.E.C. a power to “disaffiliate” a constituency party. If therefore such a party can be expelled by the Labour Party it must surely be entitled to resign. It would be intolerable if membership subscriptions could be forced out of persons who were unwilling to pay them. Neither the rules of the Labour Party itself nor those in Set B contain any provision which says “Thou shalt not disaffiliate.”
- E

- The provisions of clause 8 (2) (b) of the Labour Party constitution whereby the N.E.C. is given the power and duty to enforce the constitution and “to take any action it deems necessary for such purpose, whether by way of disaffiliation of an organisation, expulsion of an individual or otherwise,” must be construed contra proferentem because they are restrictions on liberty.
- F

- The purported suspension of P.D.L.P. was of no effect, because P.D.L.P. had already disaffiliated from the Labour Party when the resolution of the N.E.C. was passed and because the rules contain no power to suspend. A purported exercise of any such power would be subject to the rules of natural justice; the words “or otherwise” would not cover what was done here or justify the exclusion of the principles of natural justice. Those who are to be suspended must be informed of the charges against them and be given a hearing by an unbiased tribunal: see *Ridge v. Baldwin* [1964] A.C. 40; *Russell v. Norfolk (Duke of)* [1949] 1 All E.R. 109. There has been no threat by the defendants to divert the funds of P.D.L.P. and in all the circumstances the injunction sought by the
- G
- H

plaintiff should be refused. [Reference was made to *Second Consolidated Trust Fund Ltd. v. Ceylon Amalgamated Tea and Rubber Estates Ltd.* A [1943] 2 All E.R. 567.]

*A. C. Sparrow Q.C.* in reply on the plaintiff's motion in the first action.

Much of the argument for the defendants is based on the principle that the will of the majority must prevail, and that P.D.L.P. cannot be manacled to the Labour Party—but the will of the majority is not absolute. The constitutional principle which applies here is that of the sanctity of contracts. When a person joins an unincorporated association he enters into a contract with other members on the basis that the rules of the association shall be binding; those rules cannot be altered by the will of the majority. B

As to representative actions the arguments advanced for the defendants are wholly misconceived. One suing on behalf of others in a representative capacity represents their interests, not their opinions. [Reference was made to *Daniell's Chancery Practice*, 8th ed. (1914), vol. 1, pp. 151, 175; *Bedford (Duke of) v. Ellis* [1901] A.C. 1; *Watson v. Cave (No. 1)* (1881) 17 Ch.D. 19 and *Smith v. Cardiff Corporation (No. 1)* [1954] 1 Q.B. 210. The rule is one of convenience. Here there is nothing intrinsically wrong with the writ; if there is anyone who does not wish to be represented by the plaintiff he can be joined as an individual defendant: see *Fraser v. Cooper Hall & Co.* (1882) 21 Ch.D. 718; *Bromley v. Smith* (1826) 1 Sim. 8; *Wyld v. Silver* [1963] Ch. 243. [Reference was also made to *Markt & Co. Ltd. v. Knight Steamship Co. Ltd.* [1910] 2 K.B. 1021.] C D

As to the chairman's power to adjourn a meeting, such a power is consistent with the right of a majority to challenge it in appropriate circumstances, but a chairman certainly has a power to adjourn: see *Shaw v. Thompson* (1876) 3 Ch.D. 233. The power must be used bona fide. It is conceded that if he simply interferes mala fide, for his own purposes, that would not be within his powers. If the meeting considers that the chairman has exceeded his powers a challenge should be made on the spot: see *Rex v. Gaborian* (1809) 11 East 77. *Stoughton v. Reynolds* (1736) 2 Stra. 1045; Fort. 168, is explained in *Reg. v. D'Oyly* (1840) 12 Ad. & El. 139, 159. While a chairman may not disrupt a meeting which is proceeding in an orderly manner that does not mean that he cannot adjourn for disorder, on which the chairman has an inherent power since it is his duty to keep order: see *National Dwellings Society v. Sykes* [1894] 3 Ch. 159. [Reference was also made to *In re Indian Zoedone Co.* (1884) 26 Ch.D. 70; *Rex v. Chester (Archdeacon of)* (1834) 1 Ad. & El. 342; *Salisbury Gold Mining Co. Ltd. v. Hathorn* [1897] A.C. 268, and *Wall v. London & Northern Assets Corporation* [1898] 2 Ch. 469.] The plaintiff's exercise of the power in this case was reasonable in view of threatened breaches of the peace. If the chairman's action is not challenged on the spot, those who challenge the exercise of his power may be estopped if the purported exercise is not plainly a nullity: see *Henderson v. Bank of Australasia* (1890) 45 Ch.D. 330. There is no rule that a chairman cannot adjourn sine die. The proper conclusion to be drawn from the evidence is that the plaintiff did in fact adjourn the meeting. E F G H

But even if the defendants were duly elected as officers they should be restrained from dealing with the funds in any way whether constitutionally

1 Ch.

John V. Rees

A or otherwise. An injunction merely restraining them from acting unconstitutionally would be inadequate since their conception as to what the constitution is differs from the true view adopted by the plaintiff.

In determining what is the constitution the significant question is not "Was set B ever adopted?" but "What does the conduct of the parties indicate to have been the contract between them?" The rule must be that a member of a club or association agrees to be bound by whatever rules are operating in the club or association at the time when he joins. The overwhelming conclusion from the evidence is that it is a case where the maxim omnia presumuntur rite esse acta should be applied. P.D.L.P. has operated for years in accordance with the rules of set B which, as a constituency Labour Party, they were under an obligation to adopt, and accordingly it may be presumed that they were duly adopted at some stage. The contention that the maxim does not apply to contract cases is erroneous. The contention that it is available only to outsiders is equally erroneous and would unduly restrict the operation of the maxim in any case, since all parties here are members of P.D.L.P. It is fanciful to suggest that some are "insiders" and others outsiders. [Reference was made to *Royal British Bank v. Turquand* (1856) 6 E. & B. 327 and to *Morris v. Kanssen* [1946] A.C. 459.]

D The real question in this case is: can P.D.L.P. sever itself from the Labour Party? The members of P.D.L.P. have so bound themselves together by contract and it is a fundamental term of that contract that P.D.L.P. shall remain a part of the Labour Party. P.D.L.P. cannot disaffiliate; it is an integral part of the Labour Party hierarchy which has duties of overseeing local Labour parties and is charged by the Labour Party constitution with the collection and transmission of membership fees. The passing of the resolution of disaffiliation and the support for Mr. Donnelly, who has been expelled from the Labour Party, are sufficient to show that those elected at the continuation of the meeting have acted unconstitutionally. The will of the majority at the meeting does not suffice to render it constitutional. It is impossible to assume that the defendants will not spend the Labour Party's money for purposes of their own.

F [Reference was also made to *Dale v. Inland Revenue Commissioners* [1954] A.C. 11; *Cooper v. Wandsworth Board of Works* (1863) 14 C.B.N.S. 180; *Ridge v. Baldwin* [1964] A.C. 40; and *Osgood v. Nelson* (1872) L.R. 5 H.L. 636.]

*David Hirst, Q.C.* in reply on the defendants' motion in the first action.

G The passages in *Daniell's Chancery Practice* 8th ed. (1914) at pp. 151 and 175 relied upon by Mr. Sparrow do not provide authority for the contentions advanced. The only case in which it is necessary to join all parties is where there is a joint contract: see R.S.C., Ord. 15, r. 4 (2). *Watson v. Cave* (No. 1), 17 Ch.D. 19, and *Fraser v. Cooper Hall & Co.* 21 Ch.D. 718, were cases of joint contract and do not assist as to representative actions. The language of R.S.C., Ord. 15, r. 12 (1) is permissive and not mandatory. Mr. Sparrow concedes that the relief sought must be beneficial to all. This could not be so here, since it would be no benefit to those who share the defendants' views to have the continuation of the meeting of April 6 declared a nullity. They have different grievances. The authorities all treat *Royal British Bank v. Turquand*, 6 E. & B. 327

H

as a branch of the maxim omnia praesumuntur rite esse acta and when Lord Simonds said in *Morris v. Kanssen* [1946] A.C. 459, 475 that the presumption was a rule designed for the protection of outsiders "who are entitled to assume just because they cannot know" his remarks were not obiter. While it may be true that there are many links between P.D.L.P. and the Labour Party, that does not destroy the basic principle of law, applicable to associations as well as to clubs, that a member has a right to resign: see *Finch v. Oake* [1896] 1 Ch. 409. Since nothing has been done to prevent individual members of P.D.L.P. from paying their membership subscriptions direct to the Labour Party there has been no breach of Labour Party rules.

*David Hirst, Q.C.* and *Charles Drake* in the second and third actions. There is no evidence whatever that the Labour Party's rules Set C were ever adopted by the Haverfordwest Local Labour Party, but whether or not those rules applied it is clear that the purported meeting of May 20 was not properly convened since it was a members' meeting and eight members were excluded from notifications, and others who attempted to attend were turned away at the door. Out of 179 members, only 16 in fact attended.

The earlier meeting of March 6, 1968, was a perfectly valid meeting of the Haverfordwest Local Labour Party at which officers were elected for the ensuing year, and is unchallenged. Whatever rules applied there was never any warrant for the purported reconstitution of the local Labour Party. There was no justification for calling the meeting of May 20 to elect fresh officers and delegates. The purported disqualification of the eight members who failed to reply to the circular sent out before the meeting of May 20, or who in the view of Mr. Underhill made unsatisfactory replies, was contrary to the principles of natural justice because, inter alia, they were neither notified of the charges against them nor invited to defend themselves. In any event the purportedly reconstituted organisation would have no power to touch the funds of the existing organisation. Any power to reorganise which the N.E.C. may possess cannot be delegated to others or to Mr. Underhill, in particular, and in any event it cannot reorganise a local Labour Party which was not a member of the Labour Party. The rules of natural justice apply equally to dismissal or to suspension from office, and they apply in a club or association whether or not the office affords the holder a proprietary interest: see *Bagg's* case (1615) 11 Co.Rep. 93b; *Ridge v. Baldwin* [1964] A.C. 40, 66, *Fisher v. Keane* (1878) 11 Ch.D. 353; *Burn v. National Amalgamated Labourers' Union* [1920] 2 Ch. 364. Membership of a club or association in one sense is of a quasi-proprietary nature, since if the organisation were wound up its assets would belong equally to the members.

The third action is really the first action in reverse. The validity of the third meeting of June 22 stands or falls according to the ruling upon the meeting of May 20. Those attending the meeting of June 22 were delegates elected to local Labour Party meetings held on a similar pattern to the meeting of May 20. Both meetings of May 20 and June 22 were complete nullities. In relation to the latter it would be a complete nullity even if only one delegate who was improperly chosen attended.

*A. C. Sparrow Q.C.* in the second and third actions.

1 Ch.

John v. Rees

- A The injunction sought in the second action is to restrain the defendants to that action "in their capacities as officers of an incorporated association" purporting to be the Haverfordwest Local Labour Party from dealing with the assets of the Haverfordwest Local Labour Party, but no attempt has been made to join the "purported local Labour Party," as officers of which the defendants are said to be acting. The action is therefore improperly constituted. The contract between the members is a joint contract, the rules of a club forming part of the contract between them: see *Harrington v. Sendall* [1903] 1 Ch. 921; *Halsbury's Laws of England*, 3rd ed., Vol. 5 (1953), p. 258.
- B

- C Furthermore, Mr. Hirst having rejected the contention that the rules Set C were adopted, there is no constitution advanced upon which the court can rule, and therefore the association should be wound up and a receiver appointed. The rules show that a local Labour Party is merely a part of the constituency party, and the rules Set B therefore became applicable. It is an inherent and mandatory rule of practice that all interested parties must be joined. They may be joined in a representative capacity and any error can be corrected later. [Reference was made to *Bedford (Duke of) v. Ellis* [1901] A.C. 1; *Wyld v. Silver* [1963] Ch. 243; *Bromley v. Williams* (1863) 32 Beav. 177; *Wood v. McCarthy* [1893] 1 Q.B. 775; *Foss v. Harbottle* (1843) 2 Hare 461; *Blythe v. Birtley* [1910] 1 Ch. 228 and *Harrison v. Abergavenny (Marquis of)* (1887) 3 T.L.R. 324.]
- D

The second and third actions are therefore defective for non-joinder of the proper parties and cannot go forward.

- E A local Labour Party has no existence as a separate body from the constituency party. It is just an organisational conception. Its membership and that of the constituency party is the same, and the subscriptions are shared between the constituency party and the local party. The rules of Set C apply to the local party because the operation of those rules is one of the rules of Set B. It is therefore unnecessary to consider whether the Set C rules were ever adopted by the local party. It is nonsense to say that the N.E.C. had authority to intervene in the P.D.L.P. but not in the Haverfordwest Local Labour Party. [Reference was made to *Carltona Ltd. v. Commissioners of Works* [1943] 2 All E.R. 560 and *Lewisham Borough Council v. Roberts* [1949] 2 K.B. 608.] The N.E.C. must have power to delegate its functions to the national agent. It is unthinkable that the rules require the N.E.C. itself to go down to a constituency to reorganise it.
- F

- G The N.E.C. acted reasonably in asking for an affirmation of loyalty from those suspected of disloyalty, since, by clause 2 (2) of the rules, one object of the Labour Party was "to unite the forces of Labour." By clause 3 (3) members bind themselves to be loyal, and in failing to give such an affirmation those who neglected to do so or refused to do so were in breach of the party's constitution. By their neglect or refusal the dissidents destroyed their membership qualification, and must be treated as if they had resigned. The notices of the proposed meeting of May 20 were therefore correctly withheld from them. The letters sent out to them on May 1 gave them the opportunity, which they failed to take, of re-affirming their adherence to the programme, principles and policy of the Labour Party. But whether or not they had ceased to be members, they
- H

were in rebellion against the Labour Party, and it was therefore reasonable to exclude them from the meeting of May 20. The powers of the N.E.C. include both disaffiliation and expulsion or suspension. The rules of natural justice either do not apply, or they have been observed, because the letters of May 1 gave members an opportunity of being heard. The dissidents have therefore ceased, ipso facto, to be members, or have been expelled after a proper opportunity of being heard.

The dissidents having, to use common law terms, repudiated their contract of association by a fundamental breach, the other side are free not to abide by it; or, in the language of equity, the dissidents cannot ask the court to grant them the injunctions sought because they do not come to court with clean hands: see *Snell on Equity*, 26th ed. (1966), p. 704, and *General Billposting Co. Ltd. v. Atkinson* [1909] A.C. 118.

To summarise the above arguments: (1) The action is incompetent for want of parties. (2) It is immaterial whether the rules Set C were formally adopted or not, since in any event they operate as part of Set B. (3) The argument as to the immunity of the Haverfordwest Local Labour Party from the intervention of the N.E.C. is a non-starter, because the local party is simply a group of the constituency party, which was clearly subject to the intervention of the N.E.C. (4) The plaintiffs in the second action have been deliberately in breach of the constitution, throughout. (5) Their conduct therefore either destroyed their membership by operation of the rules or it provided a justification for the N.E.C. to exclude them from the meeting of May 20. (6) It is not material to consider rules of natural justice, since the dissident members were given the opportunity of making a relevant statement, and their unconstitutional position was made clear either expressly or by their refusal to give the required undertakings. (7) The court would not in any event give them the relief sought because their hands are not clean.

As to the third action, it is similarly incompetent for want of parties. Since it concerns P.D.L.P. all the members of P.D.L.P. should be made parties in person or by representation, and if the validity of local meetings other than that of May 20 in Haverfordwest, are challenged, those affected thereby should also be parties. It must, however, be conceded that if any one person was present at the meeting of June 22 who had no right to be there then the meeting was invalid. If the arguments advanced for Mr. John in the first action are right then he is still chairman of P.D.L.P., and as such cannot be restrained from acting. In any other event reliance is placed on the powers of N.E.C. to intervene and hold fresh meetings, and in this regard the N.E.C. was justified in doing what it did.

[Reference was also made, on the question of the judge's jurisdiction to deliver judgment during the long vacation, to *In re N. (Infants)* [1967] Ch. 512.]

*David Hirst Q.C.* in reply on the second and third actions.

*Daniell's Chancery Practice*, 8th ed. (1914), p. 151, does not support the contention that it is necessary to make all members parties to an action in one way or another. Membership of an association does not involve a joint contract; that would be impossible since here the members joined at different times, when the rules were different. The true rule is that all members *may be joined*: see *Bedford (Duke of) v. Ellis* [1901] A.C. 1,

1 Ch.

John v. Rees

A *Wyld v. Silver* [1963] Ch. 243, *Bromley v. Williams* (1863) 32 Beav. 177, *Blythe v. Birtley* [1910] 1 Ch. 228, *Harrison v. Abergavenny (Marquis of)* 3 T.L.R. 324. See also the club cases of *Harington v. Sendall* [1903] 1 Ch. 921, *Fisher v. Keane* (1878) 11 Ch.D. 353, *Labouchere v. Wharncliffe (Earl of)* (1879) 13 Ch.D. 346 and *Dawkins v. Antrobus* (1881) 17 Ch.D. 615.

The rule in *Foss v. Harbottle*, 2 Hare 461 can have no application to club cases such as the present: see *Gower on Modern Company Law*, 2nd ed. (1957), p. 534 et seq. The only reason for joining all the shareholders is that they are treated as a substitute for the company itself. [Reference was made to *Mozley v. Alston* (1847) 1 Ph. 790.] If Mr. Sparrow's contention were correct it would be necessary, if a club secretary wished to sue an individual member for arrears of subscription, to join all the members of the club as parties. The fact that the Haverfordwest Local Labour Party possesses a separate set of rules and has members and delegates from affiliated organisations is a strong indication that it is an entirely separate entity from P.D.L.P. It has its own accounts and financial year, and subscriptions are paid to it, although it is true that part of such subscriptions are forwarded to P.D.L.P. While admittedly established by P.D.L.P., it stands on its own feet, just as does a subsidiary company in company law. This conclusion is supported by Set C, rules 6 (2), (3) and 13 (3), although there is no proof that such rules were ever adopted. The N.E.C.'s alleged right to intervene depends on whether or not the Haverfordwest Local Labour Party is a separate organisation.

E No resolution was ever passed by the N.E.C. authorising intervention in the affairs of the Haverfordwest Local Labour Party, nor was there any delegation in fact of the N.E.C.'s powers or discretion. The Labour Party rules would not permit such delegation. If part of a resolution is bad, so is the whole by a sort of "infectious invalidity." It cannot be like a curate's egg.

F No rule of the Labour Party lays down that a member must give an undertaking of loyalty whenever and wherever called upon to do so. Nor are any particular organisations proscribed. The request in the letters of May 1 to "co-operate in reconstructing" P.D.L.P. means that members are being asked to accept that the meeting of April 6 was bad, and that the N.E.C. had power to intervene, yet these questions have occupied the court over many days. The suggestion that a member can ipso facto lose his membership because in his acts, words, or even in his thoughts he is disloyal is fantastic. On such a basis every member of the Government or even of the Labour Party might well be "out," and the party's property would then become bona vacantia. Loss of membership can only come about as the result of exclusion or of resignation.

H So far as the rules of natural justice are concerned, the letters of May 1 cannot be inviting an answer to a charge, because if the undertakings required had been given there would have been no offences. Nor can those letters have been themselves the "charges." They cannot have provided any opportunity to answer such charges.

October 17, 1968. MEGARRY J. read the following judgment: I have before me four motions in three actions, all arising out of the same series of events. All, by consent, have been brought on together, and all have been argued by the same counsel. The principal bone of contention is the control of an unincorporated body and its substantial assets. That body is described sometimes as "The Pembrokeshire Constituency Labour Party" (occasionally, and I think inaccurately, with "local" inserted before Labour), and sometimes as the "Pembrokeshire Divisional Labour Party." For brevity I shall throughout refer to it as "P.D.L.P."

The argument before me concluded on July 29 last. I was confronted with some 60 or 70 authorities, about 75 affidavits, with many exhibits, and the fruits of much closely reasoned argument spread over 12 days; I therefore reserved my judgment. In order to avoid delay I had hoped to deliver judgment during the long vacation, the parties consenting. But I was vacation judge in August, and such was the daily press of work, sometimes taking me into court at 9.30 a.m. and sometimes keeping me there until after 6 o'clock, that I was able to give virtually no time to the consideration of the wealth of material in this case; and so I deliver judgment today.

This is a tale of three meetings. The first was the annual meeting of P.D.L.P., or, as it is more properly called, of the general committee of P.D.L.P.: for it was primarily a delegate meeting. It was held on April 6 last, and was attended by about 100 people. I shall call this "the first meeting." It is common ground that it began as a properly constituted meeting; what is challenged is whether, after a purported adjournment, it continued thereafter as a valid meeting. It is this meeting which is put in issue in action No. 1, *John v. Rees* [1968 J. No. 2692], in which the writ was issued on May 6 last.

Out of this meeting a profound conflict of views emerged. On one side lie those who say that as a result of the meeting P.D.L.P. has disaffiliated itself from the Labour Party, and that a new set of officers, who supported the disaffiliation, were validly elected to office in P.D.L.P. This is the side that espouses the cause of Mr. Desmond Donnelly, the Member of Parliament for Pembrokeshire; and it was his expulsion from the Labour Party on March 27, a mere ten days before the first meeting, which formed an important part of the background to that meeting. For brevity, I shall call those who supported disaffiliation and Mr. Donnelly the "disaffiliates." On the other side, there are those who opposed Mr. Donnelly's views, and contend that the disaffiliation and the elections at the first meeting were nullities. These I shall call the "affiliates": "unionists," though apposite in one sense, would not be in another. All three actions are between affiliates and disaffiliates; an affiliate as plaintiff attacks the first meeting in the first action, and disaffiliates as plaintiffs attack the second and third meetings in the second and third actions respectively.

The second meeting (which I shall refer to as such) was held on May 20, 1968. It purported to be a meeting of the Haverfordwest Local Labour Party, and was convened by the National Executive Committee of the Labour Party (which I shall call the "N.E.C.") as a result of what occurred at the first meeting. The validity of the whole of this meeting is in issue. It may be conducive to clarity if I say at once that, without in

1 Ch.

John v. Rees

Megarry J.

A any way defining their functions or their relation to each other, the bodies with which I am concerned in this case are at three levels. First, at the top, there is the Labour Party, which, of course, is a national body. Second, there are the constituency Labour Parties, of which P.D.L.P. is one. Third, there are a number of local Labour Parties in the area of each constituency Labour Party. There are some other bodies in the organisation, but I do not need to refer to them here. The first meeting was thus a meeting of one of the bodies at the intermediate level, and the second meeting was a meeting of one of the bodies at the lowest level. It is the second meeting which is in issue in the second action, *Martin & Davies v. Davis* [1968 M. No. 2390], in which the writ was issued on June 12, 1968.

C The third meeting (which I shall refer to as such) was held on June 22, 1968. This, like the first meeting, was a meeting of P.D.L.P.; and the validity of the whole of the meeting is in issue. The meeting is the subject of the third action, *Rees & Cleare v. John* [1968 R. No. 2276], in which the writ was issued on July 5, 1968. The two plaintiffs in this action are defendants in the first action, and the defendant in this action is the plaintiff in the first action. There is thus a certain symmetry in the actions: for each meeting was unfailingly followed by a writ within the month, and in substance the parties to the first and third actions are the reverse of each other. Procedurally, what is before me is not the three substantive actions themselves, but, as I have indicated, four motions in the three actions. Action No. 1 has engendered two motions, one by the plaintiff and one by the defendants. In action No. 2 there is a motion by the plaintiffs, and similarly in action No. 3 there is a motion by the plaintiffs.

E I pause at this point for three reasons. First, it may be convenient if I indicate, in the broadest of outlines, how the three meetings are related to each other. The constitution of the Labour Party confers upon the N.E.C. power to enforce the constitution, standing orders and rules of the party, and to take any action it deems necessary for that purpose. After the first meeting, the N.E.C. passed a resolution that action be taken to suspend the activities of P.D.L.P. and the right of its officers to handle its funds, that P.D.L.P. be reorganised, and that the national agent of the Labour Party be given authority to take such steps as were necessary to complete the reorganisation. Pursuant to this resolution, the national agent convened the second meeting; and this meeting elected officers, and also delegates to attend the general committee of P.D.L.P. The national agent also convened similar meetings of other local Labour Parties in the constituency; and there were similar results. The national agent then convened the third meeting, a general committee of P.D.L.P., composed in the main of delegates elected by the local Labour Parties under the reorganisation. Those who refused or failed to sign declarations of loyalty to the Labour Party were excluded from the second and third meetings; and the disaffiliates attack these meetings on this score.

H Second, I must make explicit what all lawyers will recognise as implicit, but which those who are not lawyers may not fully appreciate. I am not in the least concerned in this case with the rightness or the wrongness or the desirability or undesirability of any political views or policies that there may be. This is so whether the views or policies are political in the

Megarry J.

John V. Rees

[1970]

ordinary external sense, in relation to other political parties or otherwise, or whether they are internal policies within the confines of any political or other unit. My concern is merely to see that those concerned in these proceedings obtain justice according to law, irrespective of politics.

Third, all the proceedings before me are on motion, and all the evidence is in the form of affidavits and exhibits. The affidavits are not only numerous (there are over 60 in action No. 1), but also far from harmonious; and without any oral evidence, and in particular without the aid of cross-examination, it is impossible to resolve such conflicts. On the main issues I am merely called upon to grant (or refuse) injunctions which will continue until the trial of the action, unless sooner determined. I have thus to do the best I can until the actions are tried. This, too, I say for the benefit of those who are more interested in politics than law; this is not the final determination of the case, but merely an interim decision.

I return, then, to the first meeting. Immediately prior to that meeting the plaintiff in the first action [Mr. John] was president of P.D.L.P.: and he accordingly took the chair at that meeting, at all events at the outset. He claims that he is still president of P.D.L.P.: the defendants dispute this. The second defendant [Mr. Cleare] claims that he and not the plaintiff is now president of P.D.L.P. It is common ground that prior to the meeting he was the senior vice-president; and on the agenda for the meeting he was the sole nominee for election as president. What is in dispute is whether he was ever validly elected president as a result of the later and disputed stages of the meeting, after the plaintiff had purported to adjourn it. The third defendant [Mr. Lewis] had for some years been treasurer of P.D.L.P., and on the agenda for the first meeting he was the sole nominee for that office. On any footing he was thus still treasurer at the end of the meeting. Similarly the first defendant [Mr. Rees] was secretary of P.D.L.P. before the meeting and remained so at the end of it.

By the writ, the plaintiff claims

"as representing all members of the Pembrokeshire Divisional Labour Party except the defendants, and personally, the following relief namely:—

"1. A declaration that all purported proceedings of the meeting on April 6, 1968, of the general committee of the Pembrokeshire Divisional Labour Party subsequent to the adjournment of such meeting by the chairman were invalid and of no effect.

"2. A declaration that the purported appointment on April 6, 1968, of the defendants as officers of the said party was invalid and of no effect.

"3. An injunction to restrain the defendants and each of them from collecting expending remitting transferring or otherwise dealing with any moneys or other property belonging to or held for the purposes of the Pembrokeshire Divisional Labour Party."

In this action the plaintiff moves under a notice of motion dated May 6, 1968, for

"An injunction to restrain the defendants and each of them until judgment in this action or further order from doing or purporting to

1 Ch.

John v. Rees

Megarry J.

A do or being a party to (whether by themselves their servants or agents or otherwise howsoever) any of the following things namely collecting expending remitting transferring or otherwise dealing with any moneys or other property belonging to or held for the purpose of the Pembrokeshire Divisional Labour Party.”

This notice of motion also seeks the appointment of a receiver; but Mr. Sparrow, who appeared for the plaintiff, has left this claim in abeyance. B The other motion in this action is by the defendants, for whom Mr. Hirst appears. This notice of motion, dated May 14, 1968, claims

- “ 1. That the writ in this action be set aside or, in the alternative,
2. That so much of the claim endorsed on the writ in this action as seeks relief for parties other than the plaintiff named in the writ should be struck out. . . .”

C Putting matters broadly, the disaffiliates say that they are in the saddle of P.D.L.P. and that that body has disaffiliated itself from the Labour Party. The affiliates deny this, and seek to enjoin the disaffiliates from dealing with the property of P.D.L.P. Instead, they say that the disaffiliates never got into the saddle, or, if they did, that the N.E.C. has duly exercised the wide powers that it has to suspend their activities. D The disaffiliates deny this, and seek to enjoin the affiliates from dealing with the property of P.D.L.P. There is also the procedural point of some technicality raised by the disaffiliates in the defendants’ motion. This concerns the plaintiff’s claim in writ No. 1 to sue on behalf of himself and all members of P.D.L.P. except the defendants; and I think that I should deal with this last point first.

E Over 20 affidavits by disaffiliates have been filed in support of the defendants’ motion in action No. 1. These are all by members of P.D.L.P., stating, in common form, that the affiant does not wish to be represented by the plaintiff in the action. On this foundation Mr. Hirst has erected an argument in support of his motion in action No. 1 that as the plaintiff purports to sue “as representing all members of the Pembrokeshire Divisional Labour Party except the defendants,” as well as personally, either F the writ should be set aside, or, alternatively, the words of representation on the writ should be struck out. For, he says, the words of representation simply are not true: the plaintiff may represent some members of P.D.L.P. (a minority, Mr. Hirst says), but he assuredly does not represent all members except the three defendants.

G Such a contention indeed wears an engaging air of simplicity and reason: but having listened to much argument and many authorities, spread over a number of days, I cannot at the end say that this simplicity is more than skin deep. The rule as to representative actions is an old Chancery rule which the Rules of the Supreme Court later made statutory. The present provision is Ord. 15, r. 12. The classic statement is that made by Lord Macnaghten in *Bedford (Duke of) v. Ellis* [1901] A.C. 1. He said there, at p. 8:

H “The old rule in the Court of Chancery was very simple and perfectly well understood. Under the old practice the court required the presence of all parties interested in the matter in suit, in order

that a final end might be made of the controversy. But when the parties were so numerous that you never could 'come at justice,' to use an expression in one of the older cases, if everybody interested was made a party, the rule was not allowed to stand in the way. It was originally a rule of convenience: for the sake of convenience it was relaxed. Given a common interest and a common grievance, a representative suit was in order if the relief sought was in its nature beneficial to all whom the plaintiff proposed to represent." From the time the rule as to representative suits was first established, he said, at p. 10, "... it has been recognised as a simple rule resting merely upon convenience. It is impossible, I think, to read such judgments as those delivered by Lord Eldon in *Adair v. New River Co.*, 11 Ves. 429, in 1805, and in *Cockburn v. Thompson*, 16 Ves. Jun. 321, in 1809, without seeing that Lord Eldon took as broad and liberal a view on this subject as anybody could desire. 'The strict rule,' he said [*ibid.* 325], 'was that all persons materially interested in the subject of the suit, however numerous, ought to be parties . . . but that being a general rule established for the convenient administration of justice must not be adhered to in cases to which consistently with practical convenience it is incapable of application.' 'It was better,' he added [*ibid.* 329], to go as far as possible towards justice than to deny it altogether. He laid out of consideration the case of persons suing on behalf of themselves and all others, 'for in a sense,' he said, 'they are before the court.' As regards defendants, if you cannot make everybody interested a party, you must bring so many that it can be said they will fairly and honestly try the right. I do not think, my Lords, that we have advanced much beyond that in the last hundred years, and I do not think that it is necessary to go further, at any rate for the purposes of this suit."

This seems to me to make it plain that the rule is to be treated as being not a rigid matter of principle but a flexible tool of convenience in the administration of justice. Such an approach is, I think, at least consistent with cases such as *Bromley v. Smith* (1826) 1 Sim. 8, *Wood v. McCarthy* [1893] 1 Q.B. 775 and *Wyld v. Silver* [1963] Ch. 243; and in *Harrison v. Abergavenny (Marquis of)* (1887) 3 T.L.R. 324, 325, Kay J. described the rule as being "a rule of convenience only." The approach also seems to be consistent with the language of R.S.C., Ord. 15, r. 12 (1). This provides that

"Where numerous persons have the same interest in any proceedings, . . . the proceedings may be begun, and, unless the court otherwise orders, continued, by or against any one or more of them as representing all or as representing all except one or more of them."

By r. 12 (3)–(6), ample provision is made for protecting those who, being bound by a judgment against a person sued on their behalf, nevertheless wish to dispute personal liability. The language is thus wide and permissive in its scope; yet it provides adequate safeguards for the substance. I would therefore be slow to apply the rule in any strict or rigorous sense: and I find nothing in the various passages cited to me from *Daniell's Chancery Practice*, 8th ed. (1914), which makes me modify this view.

1 Ch.

John V. Rees

Megarry J.

A What I am concerned with in action No. 1 is the validity of proceedings at a meeting which had as part of its business the election of the officers of P.D.L.P. All members of P.D.L.P. have a common interest in P.D.L.P., its officers and its assets: and it is plainly desirable that all should know and recognise who its officers are and are not. If there were to be two different actions brought, one between A and B and the other between X and Y, it might be that, on the different evidence adduced in the two actions, the court would reach a different conclusion in each action, holding in *A v. B* that the officers were one set of persons, and in *X v. Y* that another set were the officers. Other members might then institute other proceedings and, not being bound by the two actions already brought, contend for yet other persons as officers. Accordingly, it seems at least desirable that any proceedings should be so constituted that they will bind all members. This can be achieved only if all are parties to the proceedings, either directly or as being represented by one of the parties.

C Although there is thus a clear common interest between all the members in having the issue determined, they may be far from united in the way in which they wish it to be resolved. Some may support one faction, some another. But if the named parties to the action together put forward every view that is seriously advanced, I cannot see that any real harm is done to a person whose part in the action is merely that he is represented by the plaintiff, even if the plaintiff is supporting a different cause, provided that there is a defendant who does stand for the cause espoused by the person being represented: actions are decided by reference to justice according to law, and not by counting heads. The remedy for someone who is not consoled by this thought is, as Sir George Jessel M.R. held in *Wilson v. Church* (1878) 9 Ch.D. 552, 559, and as James L.J. pointed out in *Watson v. Cave (No. 1)* (1881) 17 Ch.D. 19, 21, for him to apply to be joined as a defendant. Alternatively, he may be able to procure an order, made under Ord. 15, r. 12, whereby he will be represented by a defendant: see *Fraser v. Cooper Hall & Co.* (1882) 21 Ch.D. 718. In *Wilson v. Church*, the dissident not only sought to be made a defendant but also applied to represent all other dissidents. The latter part of his application failed because there was no evidence that there were any other dissidents; and, said Jessel M.R., at p. 559, "he cannot be a representative without a constituency." If there had been constituents a-plenty, the judgment suggests that he would have succeeded on this too.

F It seems to me that the important thing is to have before the court, either in person or by representation, all who will be affected: and provided that the issue will be fairly argued out, a mathematical precision in securing that each side is shown as representing the right number of supporters is of little moment. As Cotton L.J. said in *Watson v. Cave (No. 1)* (1881) 17 Ch.D. 19 22:

H "... the plaintiff sues on behalf of himself and all others who have the same interest as himself, that is, not all those who take the same view of what is for their benefit, but all those who, being interested jointly with him in some property, have not taken any steps to assert their rights adversely to those which the plaintiff chooses to assert."

The artificial nature of the process is shown by the fact that, as Fletcher

Moulton L.J. pointed out in *Markt & Co. Ltd. v. Knight Steamship Co. Ltd.* [1910] 2 K.B. 1021, 1039, a plaintiff suing in a representative capacity does not have to obtain the consent of those whom he purports to represent, and they are not liable for costs, though by estoppel or res judicata they will be bound by the result of the case.

Mr. Hirst relied strongly on the *Markt* case [1910] 2 K.B. 1021, and on *Smith v. Cardiff Corporation* (No. 1) [1954] 1 Q.B. 210. In the *Markt* case, a ship owned by the defendants had been sunk by a Russian cruiser during the Russo-Japanese war on the ground that it was carrying contraband of war. Goods had been shipped on the vessel as a general ship. One of the shippers sued the defendants for damages for breach of contract and duty, suing on behalf of himself and other owners of cargo on the ship. A letter written by the plaintiff's solicitors when the writ was issued identified 44 other shippers as being thus represented. The Court of Appeal unanimously held that the representative action would not lie, as the plaintiff and other shippers lacked the "same interest in one cause or matter" within Ord. 16, r. 9: the corresponding provision in the present Rules of the Supreme Court is Ord. 15, r. 12, sub-rule 1, which uses the phrase "the same interest in any proceedings."

Buckley L.J. took the view that the writ should be amended by limiting the representation to those who had not shipped contraband, and by praying a declaration of liability, leaving the individual claims for damages to subsequent proceedings: [1910] 2 K.B. 1021, 1048. But Vaughan Williams and Fletcher Moulton L.J.J., at pp. 1032, 1042, held that the writs were incapable of amendment so as to maintain any representative action: and Fletcher Moulton L.J., held that no representative action could be brought where the sole relief sought was damages. As Vaughan Williams L.J. observed, at p. 1030, "All sorts of facts and all sorts of exceptions may defeat the right of individual shippers." Fletcher Moulton L.J., said, at p. 1040,

"... I can conceive no excuse for allowing any one shipper to conduct litigation on behalf of another without his leave, and yet so as to bind him. The proper domain of a representative action is where there are like rights against a common fund, or where a class of people have a community of interest in some subject-matter. Here there is nothing of the kind. The defendants have made separate contracts which may or may not be identical in form with different persons. And that is all."

It has been contended that the actual result of the case was that the writ was set aside: but I think that it is reasonably plain from pp. 1032 and 1042 that the plaintiff was held to be entitled to continue with the action as a personal action, and that all that was struck out was the representative capacity.

A similar result was reached in *Smith v. Cardiff Corporation* (No. 1) [1954] 1 Q.B. 210. This is a case which has, I think, the odd distinction of being a Chancery action reposing uneasily in the Queen's Bench reports: the confusion seems to have arisen from the case having been heard originally in the vacation court, as may be perceived from the report of a later stage of the same case, *Smith v. Cardiff Corporation* (No. 2)

1 Ch;

John V. Rees

Megarry J.

A [1955] Ch. 159, 160. Four plaintiffs sued Cardiff Corporation on behalf of themselves and all other tenants of corporation houses provided under Part V of the Housing Act, 1936, seeking a declaration that the corporation's scheme for increasing rents was ultra vires, and claiming an injunction to restrain the corporation from putting the scheme into operation. The scheme was one of the type commonly described as providing for differential rents, thus taking into consideration the financial circumstances of each tenant. Of some 13,000 tenants, some 8,000 would have their rents increased, and the other 5,000 would not. The Court of Appeal reversed the order of Glyn-Jones J. striking out the writ, and held that the action should proceed as a personal action by the four plaintiffs and not as a representative action. Sir Raymond Evershed M.R. stated the established requirements for a representative action succinctly: [1954] 1 Q.B. 210, 220-221:

C "It must be shown . . . that all the members of the alleged class have a common interest, that all have a common grievance, and that the relief is in its nature beneficial to them all."

D Even if there were a common interest, there was no common grievance and the relief was not in its nature beneficial to them all. Those whose rents were to be increased would in effect subsidise those whose rents remained unchanged, so that there were two classes of tenants whose interests were in conflict.

E Mr. Hirst's primary contention is that the writ should be struck out. The plaintiff, he said, knew from the outset that he did not represent all save three members of P.D.L.P., and in this respect the writ was "utterly bogus." I can say at once that I see no justification whatever for taking so drastic a step. The plaintiff sues on behalf of himself, and I can see no reason why, even if the words of representation are bad, they should infect the claim by the plaintiff himself. In a sphere dominated by convenience in the administration of justice, I reject the concept of contagious invalidity upon which such a claim appears to rest. I know of no authority to support it, except in so far as the decision at first instance in the *Cardiff* case (1953) 162 E.G. 182 may be relied on: but there is no full report of the reasons for that decision, and in any case it was reversed by the Court of Appeal. Accordingly, I refuse to set aside the writ as prayed in paragraph 1 of the defendants' notice of motion.

F Mr. Hirst's alternative contention is that the words of representation should be struck out. He stresses the divided state of the views of the members of P.D.L.P., and urges that this division resembles the division between the two categories of tenants in the *Cardiff* case [1954] 1 Q.B. 210. Just as a representative action was bad both there and in the *Markt* case [1910] 2 K.B. 1021, so it must be bad here: there was no common interest and no common grievance, and the relief was not beneficial to all. It seems to me, however, that there is an essential distinction between those cases and this. In the case before me, I have a simple division of opinion between numerous members of a single body. The plaintiff is on one side, the defendants on the other, and in essence the only vice suggested in the plaintiff's claim to represent all members of P.D.L.P. except the defendants is that some of these members in fact support the defendants and do not

wish to be represented by the plaintiff. Any misrepresentation may thus be cured with comparative simplicity. Those who do not support the plaintiff and wish to appear on the other side, either individually or by representation, may, if they wish, take the appropriate steps to achieve this; and Mr. Sparrow has made it plain that the plaintiff will co-operate in achieving this result. Subject to that, the plaintiff and those he represents all have a common interest and a common grievance, and seek relief beneficial to all. All members of P.D.L.P. are bound to each other by contract, linked by a common membership and a common interest in the assets. In such a case I would respectfully echo the words of Lord Eldon which Lord Macnaghten quoted in a passage that I have already read: "all persons materially interested in the subject of the suit, however numerous, ought to be parties" (see [1901] A.C. 1, 10). I would add only that "ought" does not by any means necessarily mean "must, on peril of the action being struck out." What is desirable is by no means always essential: and I was referred to a number of examples of cases where there might have been, but apparently were not, representative actions.

In the *Cardiff* case [1954] 1 Q.B. 210, no solution by transferring those represented from one side of the action to another was possible. The action was constituted as an action by 13,000 tenants against the corporation, their landlord: 5,000 of those had interests in conflict with the other 8,000. The transfer of the 5,000 from the plaintiffs' side to the corporation side was a question which neither arose nor could very well arise: for the declaration and injunction sought against the corporation were patently inappropriate remedies to seek against the 5,000 tenants. The case was one where the issue lay between some of those linked together by a common interest and an extraneous body, the corporation. In the case before me there is no extraneous body as a party to the *lis*: the issue lies solely between persons linked by the common interest of membership.

From what I have said, it will be seen that the second motion fails. The first prayer is to set the writ aside, and the second is to strike out the indorsement so far as it relates to relief for parties other than the plaintiff. I dismiss both claims.

I turn, then, to the plaintiff's motion in the first action. If the second defendant [Mr. Cleare] is not president of P.D.L.P., he lacks authority to take part as such in any dealing with the property of P.D.L.P. Whether or not he was elected depends upon whether the meeting of the general committee of P.D.L.P., on April 6, 1968, was still in existence when his election took place. That in turn depends upon whether the plaintiff's [Mr. John's] purported adjournment of that meeting a short while earlier was valid; and that in turn depends upon a complex of issues of law and fact as to the powers of adjournment of the chairman of a meeting, and whether in fact the plaintiff exercised any power of adjournment that he had. If the defendants succeed on these issues, there still remains a claim by the plaintiff that subsequent action taken by the N.E.C. has deprived the defendants of their authority. In order to resolve these and other issues, I must summarise the facts.

The plaintiff has exhibited a 20-page document containing a notice of the meeting of April 6, together with the agenda and proposed resolutions. In fact, it contains rather more than that. The date on the agenda is

1 Ch.

John v. Rees

Megarry J.

- A March 29, 1968, two days after Mr. Donnelly's expulsion from the Labour Party; and at the head of the agenda the first defendant [Mr. Rees] gave notice of the annual meeting of P.D.L.P. on April 6. In addition to the agenda, the document contains the minutes of a previous meeting of the general management committee of P.D.L.P., and a report by the first defendant (who was of course the secretary and agent) dated April 1. In this he strongly supported Mr. Donnelly and urged temporary disaffiliation
- B from the Labour Party.

"Why," he said, "*cannot we as a constituency Labour Party disaffiliate from the Party nationally temporarily until such time that matters can be put right again*, which could well be by the time the next election takes place. It is nothing new for a member to be expelled and eventually end up as a Cabinet Minister."

- C His view was that to face an election in Pembrokeshire without Mr. Donnelly "would be disastrous—like giving the seat to the Tories on a silver plate." His [Mr. Rees'] loyalties, he said, were "with the basic aims of socialism"; and, he added, "today, the Labour Party is its own worst enemy." He referred to Mr. Donnelly's memorandum to the N.E.C. dated March 20, which appeared as the next three pages in the document, and
- D said that his [Mr. Donnelly's] criticisms "are about the Party's policies of today and not against the Labour Party's principles."

Mr. Donnelly's memorandum asserted that his criticisms "have been of the Prime Minister and Government, never of the basic aims of the Party." He [Mr. Donnelly] set out four promises in the 1964 Labour manifesto and said that "not one of these 1964 promises has been kept. . . . The aggregate is a deplorable national story. It is a disgrace to

E the Labour Party." He ended by saying:

"I am not prepared to re-apply for the Labour whip so long as the present Prime Minister is leader of the Party and his policy prevails. I have not resigned the whip in protest against the Party, but in protest against the leadership."

- F The document containing the agenda for the meeting then set out certain financial statements and nominations for offices and committees, and ended with nine resolutions to be submitted to the meeting. Four of these were direct resolutions in support of Mr. Donnelly, submitted by three local Labour Parties and a trade union branch, while two trade union branches submitted resolutions which, by proposing to find a suitable candidate for the next election, seem to have been anti-Donnelly.

- G I have referred to this document at some length for two reasons. First, nobody who read the document could be in any doubt that fundamental cleavages of opinion on important issues would be canvassed at the meeting. Second, the document illustrates the view that Mr. Hirst so forcefully urged upon me for the disaffiliates, namely, that whatever anyone else may think, they regard themselves as being faithful to Labour policy: it is the others, and not least the Government in general and the Prime Minister
- H [Mr. Harold Wilson] in particular, who have, they say, departed from the pure light of true Labour principles. In the eyes of the disaffiliates, they are the faithful; it is the affiliates who are the deviants. Nothing in this

Megarry J.

John v. Rees

[1970]

case requires me to resolve this issue, and I say no more about it. I mention it only to make intelligible some of the things said and done, and also, as any lawyer would expect, because I was referred more than once to the great "*Wee Free*" case (*General Assembly of Free Church of Scotland v. Overtoun* [1904] A.C. 515), which can be said to provide something of an ecclesiastical analogue on this point. I hasten to add that any analogy must be contained within due limits: for the practical result of the "*Wee Free*" case was promptly reversed by statute (the Churches (Scotland) Act, 1905), whereas I intend no prophecies about this case.

Nobody has suggested that the meeting was not duly convened, or that there were material defects in the agenda: and I can come forward to Saturday, April 6. From this point onwards there is much conflicting evidence. At about 1.30 p.m. or 1.45 p.m. certain officers of P.D.L.P. arrived in order to meet two officials of the Labour Party, Mr. Underhill (assistant national agent of the Labour Party) and Mr. Jones, who were going to present themselves at the annual meeting. It is not clear whether the two officials had wanted to meet the officers or merely the plaintiff. The standing orders of P.D.L.P. provide by standing order 1 (a) (ii) for the election of a standing orders committee of six members, without particularising the functions of the committee: but the committee seems to be treated as having duties to perform in relation, inter alia, to the conduct of meetings. Standing order 5 (a) provides that the business transacted at the annual meeting is to "consist of the following items in order: (1) President's welcome to delegates and apologies for absence. (2) Report of standing orders committee." There then follow other items, including the election of officers and members of committees, among them the standing orders committee which, this time, is to have seven members. The last item is "To consider resolutions." In its essentials, this order was followed in the agenda for this particular meeting. In neither is any place given to "Any other business." As matters stood, the report of the standing orders committee would come immediately after the president's welcome and apologies for absence, and the controversial pro-Donnelly and anti-Donnelly resolutions would be left until the end. The first defendant's suggestion of disaffiliation does not appear anywhere among the list of resolutions for consideration by the meeting.

A Mr. Moores took the chair at the standing orders committee meeting, with the plaintiff present. The plaintiff said that he wanted the visiting officials to address the meeting before starting with the agenda. After discussion, it was in the end unanimously agreed that this address should be made after the report of the standing orders committee. The plaintiff also wanted a resolution to be put to the meeting after the address, but, either unanimously or by a majority, it was decided that this could not be done then, though it could be done after the resolutions on the agenda had been considered. The discussion did not run smoothly, and once or twice the plaintiff left the meeting and returned. He says that he did not know of the decision of the standing orders committee when he went into the main meeting: but the inevitable comment is that if that was so, he, as chairman, ought to have found out what that decision was before he presided over the meeting to which it related.

1 Ch.

John v. Rees

Megarry J.

A At the main meeting the plaintiff welcomed the delegates. He then explained that Mr. Underhill was present, and called upon him to address the meeting. Mr. Underhill did so, reminding members of their obligations and referring to Mr. Donnelly's expulsion. He ended by suggesting that the meeting should pass a resolution whereby P.D.L.P. undertook to continue to act in strict conformity with its constitution and rules and the constitution of the Labour Party. A delegate then attempted to move such a resolution, and at that point the meeting became less than sedate. B There had been some noise during Mr. Underhill's address, and now there were many attempts to raise points of order, including attempts by Mr. Moores, the chairman of the standing orders committee. The resolution was seconded, said the plaintiff, and "I tried to put this resolution to the vote."

C Much has been said about the duties of a chairman of a meeting, a subject to which I must return later. What the plaintiff did at this meeting was to insert into the proceedings, as the second item, an item which did not appear on the agenda at all, namely, Mr. Underhill's address. He then accepted and tried to put to the vote a resolution to the effect suggested by Mr. Underhill; and this in effect was the third item in the proceedings. In taking these steps the plaintiff was, in my judgment, D acting in contravention of the standing orders of P.D.L.P., in contravention of the agenda for the meeting, and in contravention of the decision of the standing orders committee. I have heard no suggestion that he ever sought or obtained the sanction of the meeting to his actions. However worthy his motives, and however politically desirable it was, I can see no justification for what he did.

E It is one of the main duties of the chairman of a meeting of a club or association to secure its orderly conduct according to its rules. He has wide powers, but he has also the duty of using those powers for proper and not improper purposes. Above all, his duty is to act not as a dictator but as a servant of the members of the body, according to law. On the uncontradicted evidence it seems clear to me that the plaintiff was guilty of a determined and substantial breach of his duty, and that F the responsibility for much of the disturbance that took place must be laid to his charge. It is not without a touch of irony that those attending the meeting should have been required to listen to an address reminding them of the rules and obligations that bound them, and to consider a resolution to act in strict conformity with those rules, when the chairman himself was, by so doing, in open breach of the rules himself. Indeed, according to the plaintiff, Mr. Underhill "asked the meeting to declare G that they still observed their own standing orders and this seemed to me to be a wholesome and unobjectionable thing to do." In these circumstances, I am not in the least surprised that the plaintiff's actions caused disturbances. Quis custodiet ipsos custodes?

H Mr. Sparrow has vigorously contended that the plaintiff had an inherent right as chairman to put to the meeting a "loyalty resolution" (to use Mr. Sparrow's convenient and compendious term) at any stage he thought fit. Not surprisingly, no authority was adduced in support of this contention; and this judgment will not provide one. Depending on the circumstances, to put such a resolution may be regarded by some or all

378

Page ID #:2558

Megarry J.

John v. Rees

[1970]

present as an insult, an incitement, a time-waster, an irritant, or many other things. It may be a nuisance, or worse; but in any case I think that those who attend a meeting are entitled (subject to the rules) to have the business taken in the order prescribed by the agenda, unless a majority at the meeting otherwise resolves. Despite Mr. Sparrow's persuasions I can see no basis of need or common sense, or, for that matter, law or equity, upon which such a right could be implied: and I reject it.

I do not propose to attempt any analysis of the disturbances at the meeting: the evidence is in a state of marked conflict. On any footing there was a good deal of noise. There was also some degree of minor violence. There was a delegate who was, perhaps, pulled back into his chair when he tried to speak. The plaintiff perhaps prodded Mr. Donnelly in the back with his gavel. Mr. Donnelly pushed the plaintiff, perhaps mightily, so that he fell back against the wall, perhaps merely firmly, so that he sat down in his chair. Mrs. Donnelly pulled out a chair for Mr. Moores to stand on and address the meeting; but he fell off it. During the argument I ventured to describe it as a good robust Welsh political meeting; but out of these four adjectives it was to the word "political" that Mr. Sparrow demurred. It was, he said, a domestic meeting; and I abstained from pursuing the point further. Unto each his own form of domesticity. At all events, there is evidence that the plaintiff uttered warnings (which some did not hear) that it would be impossible to continue the meeting; and when the disorder still continued he says that he "announced in a loud voice, 'I now adjourn this meeting sine die,'" and then walked out.

This is perhaps the most controversial incident of all. It features in some 20 affidavits filed by the plaintiff, half of these sworn by those who were sitting at the back of the hall. The plaintiff's voice is variously described as being "loud, penetrating and clear," "loud and booming," "stentorian and loud," "loud and firm," "loud and strong" and "the voice of a good schoolmaster." All save one of those seated at the back heard the words of adjournment. On the other hand, the defendants have filed some ten affidavits by those who were close to the plaintiff but say that they heard no such words. Any suspicion that the hall may have peculiar acoustic properties which make inaudible at the front what is loud and clear at the back cannot survive the evidence of those of the plaintiff's witnesses who sat at the front and heard the words; and this includes a man of 73 who says that he is "a little hard of hearing." There is also evidence that some of those present heard Mr. Underhill say that the plaintiff had adjourned the meeting, and there is other evidence that no such statement was heard by those close to Mr. Underhill.

This issue of fact is accordingly one that it is impossible to resolve on motion: and not surprisingly a number of submissions have been advanced by Mr. Hirst to support his contention that even if the words were uttered, they were ineffective to adjourn the meeting. The point of this is that after the plaintiff and a number of others had left the meeting, those who remained continued with the agenda; and it is the decisions thus made which are in issue.

Although there can plainly be no final resolution of the question of fact on this motion, I think it right to say that for the purposes of the

1 Ch.

John v. Rees

Megarry J.

A motion the probability seems to me to lie with the words of adjournment having been uttered by the plaintiff. The positive evidence of those who say that they heard seems to me to outweigh the negative evidence of those who say that they did not hear, and therefore that the words were not uttered. There may, of course, be positive evidence of a negative which is as cogent as any positive evidence of an affirmative. But in a noisy meeting, with the attention of many of those present being given to what other people were doing and saying, it may well be that even those close to the plaintiff may have failed to notice or remember the few words of adjournment; they can have taken only a second or two to utter, and they were spoken by a chairman who had for some while been calling in vain for order.

B

C On the footing that the plaintiff did purport to adjourn the meeting for disorder, I have to consider the question of law whether the chairman of a meeting has an inherent power to adjourn it for disorder. Mr. Sparrow contends that there is such a power, though he accepts that if it is improperly exercised, the adjournment is ineffective. Mr. Hirst primarily contends that the chairman has no such inherent power. However, if that submission is wrong, he has a battery of alternative submissions. First, the chairman cannot use this power if, by his own improper conduct of the meeting, he has provoked the disorder. He may, however, restore his power if he first purges his impropriety (in the present case by returning to the correct order of business), and he may avail himself of any provision for the suspension of standing orders, here by a two-thirds majority under standing order 22. Second, the chairman cannot use his power to frustrate the will of the majority at the meeting. Third, the chairman cannot use his power without first trying to comply with standing orders, in this case by securing or attempting to secure a vote on the motion for adjournment under standing orders 11 or 19. Fourth, such a power is exercisable only for the minimum period reasonably necessary for the restoration of order, so as to enable the business of the meeting to be carried on: an adjournment sine die would not be a proper exercise of this power, and would be void. Those are the contentions.

D

E

F

G The cases put before me on this branch of the case begin with *Stoughton v. Reynolds* (1736) 2 Stra. 1045, more fully reported in Fort. 168. They include *Rex v. Gaborian* (1809) 11 East 77; *Rex v. Chester (Archdeacon of)* (1834) 1 Ad. & El. 342; *Reg. v. D'Oyly* (1840) 12 Ad. & El. 139; *Wandsworth & Putney Gas-light and Coke Co. v. Wright* (1870) 22 L.T. 404; *MacDougall v. Gardiner* (1875) 1 Ch.D. 13; *Shaw v. Thompson* (1876) 3 Ch.D. 233; *In re Indian Zoedone Co.* (1884) 26 Ch.D. 70; *Henderson v. Bank of Australasia* (1890) 45 Ch.D. 330; *National Dwellings Society v. Sykes* [1894] 3 Ch. 159; *Salisbury Gold Mining Co. Ltd. v. Hathorn* [1897] A.C. 268; *Wall v. London & Northern Assets Corporation* [1898] 2 Ch. 469; *Catesby v. Burnett* [1916] 2 Ch. 325; *Second Consolidated Trust Ltd. v. Ceylon Amalgamated Tea & Rubber Estates Ltd.* [1943] 2 All E.R. 567; and *Ridge v. Baldwin* [1964] A.C. 40. I was also referred to certain textbooks. Neither individually nor collectively are the cases decisive of the points before me. The power of a meeting to adjourn, by passing a resolution

H

to that effect, is not in issue. The existence of such a power neither supports nor precludes the existence of a further power in the chairman. Nor, I think, does the denial of any power for the chairman to disrupt a meeting while it is in orderly progress (as in *Stoughton v. Reynolds*, 2 Stra. 1045) preclude the existence of a power for the chairman to adjourn for disorder.

A

Mr. Sparrow placed much weight on *Reg. v. D'Oyly* (1840) 12 Ad. & El. 139, at p. 159, where Lord Denman C.J., in considering the power of a rector to adjourn a parish meeting, said:

B

“Setting aside the inconvenience that might arise if a majority of the parishioners could determine the point of adjournment, we think that the person who presides at the meeting is the proper individual to decide this. It is on him that it devolves, both to preserve order in the meeting, and to regulate the proceedings so as to give all persons entitled a reasonable opportunity of voting. He is to do the acts necessary for these purposes on his own responsibility, and subject to the being called upon to answer for his conduct if he has done anything improperly.”

C

However, as Mr. Hirst pointed out, that was a case not of adjournment for disorder, but an adjournment for the purpose of taking a poll; and Lord Denman's words must be read in that context.

D

*National Dwellings Society v. Sykes* [1894] 3 Ch. 159, 162, is valuable in that it contains a concise summary by Chitty J. He there says

“Unquestionably it is the duty of the chairman, and his function, to preserve order, and to take care that the proceedings are conducted in a proper manner, and that the sense of the meeting is properly ascertained with regard to any question which is properly before the meeting. But, in my opinion, the power which has been contended for is not within the scope of the authority of the chairman—namely, to stop the meeting at his own will and pleasure.”

E

But there again the question was not one of a disorderly meeting.

There are, however, two cases of disorderly meetings that I should refer to: both are disappointing. One is *Shaw v. Thompson* (1876) 3 Ch.D. 233, where at p. 236 it is said that “a great disturbance and uproar arose” at a parish meeting when the chairman had announced the arrangements for taking a poll. A parishioner came forward to move an amendment, but “the chairman, without hearing him, rose and quitted the chair, declaring the meeting to be at an end.” However, in considering this event Bacon V.-C. refers (at p. 249) to the chairman's evidence that he rose from the chair because he thought the parishioner “was out of order”; not, it will be observed, because of the disorder in the meeting. Bacon V.-C. then says (on the same page):

F

G

“What right had the chairman, by leaving the chair, to put an end to a meeting duly convened? Leaving the chair did not put an end to the meeting. It is said that there was a vote of thanks then moved and seconded, but whether anybody, in the uproar that took place, heard the motion made and seconded, is a matter which is left in considerable doubt. The minute announces that ‘a vote of thanks

H

1 Ch.

John v. Rees

Megarry J.

A having been passed to Mr. Culver for his services in the chair, the meeting adjourned.' How could the meeting adjourn except upon a resolution? Who moved that the meeting should be adjourned? The meeting did not adjourn, and the entry in the minute book is wholly erroneous."

B Various interpretations can be put upon that case, but what does seem plain is that Bacon V.-C. is not deciding anything about a chairman's power to adjourn for disorder.

C The other case is one that I mentioned to counsel, *Rex v. St. Mary, Lambeth (Churchwardens of)* (1832) 1 Ad. & El. 346n. There, the rector was presiding over a meeting to elect churchwardens. On his own authority and without notice, he adjourned the meeting from the school-house to the church so that a poll could be held on the same day; and there was evidence that the poll could not have been "properly, if at all, taken in the school-house, from the nature of the place, and the numbers and tumultuous state of the meeting." After the churchwardens had been elected, a mandamus to elect churchwardens was sought on the ground that the election held after the adjournment was invalid: and this was opposed "on other grounds, independent of the discretionary power of the chairman to adjourn." *Stoughton v. Reynolds*, 2 Stra. 1045; Fort. 168, was duly cited, but the Court of King's Bench, consisting of Lord Tenterden C.J. and Little-  
D dale, Parke and Taunton JJ., refused to grant mandamus. Unfortunately they seem to have given no reasons, and in any case the report is no more than a note to *Rex v. Chester (Archdeacon of)*, 1 Ad. & El. 342, in which the court adverted to it during argument. So far as it goes, the case is not inconsistent with a chairman having an inherent power to adjourn a meeting  
E for disorder: but counsel attached little importance to the case, and I think that in this they are right. I may add that I do not think that there is any importance in the fact that many of the cases are decisions on parish meetings, whereas I am concerned with a meeting of a different type; certainly counsel took no such point. If today much of the excitement to be found in the last century at parish meetings has now transferred itself to political meetings (using "political" in the widest sense), I see no reason why the  
F law governing each type of meeting should not in its essentials be the same; a meeting is a meeting.

Although *Rex v. St. Mary, Lambeth (Churchwardens of)*, 1 Ad. & El. 346n., is of no great assistance in this case, it did, by devious means, ultimately lead me to what I think is a useful passage in a book published in 1840, *A Practical Arrangement of Ecclesiastical Law*, by F. N. Rogers  
G Q.C. In discussing vestry meetings at p. 874, the author considers *Stoughton v. Reynolds*, 2 Stra. 1045; Fort. 168, and then says that this decision

H "by no means interferes with the right which every chairman has to make a bona fide adjournment, whilst a poll or other business is proceeding, if circumstances of violent interruption make it unsafe, or seriously difficult for the voters to tender their votes; nor of adjourning the place of polling, if the ordinary place used for that purpose be insufficient, or greatly inconvenient. In most of such cases, the question will turn upon the intention and effect of the

adjournment, if the intention and effect were to interrupt and procrastinate the business, such an adjournment would be illegal; if, on the contrary, the intention and effect were to forward or facilitate it, and no injurious effect were produced, such an adjournment would, it is conceived, be generally supported."

A

This seems to me sound sense. It does not appear to be inconsistent with any of the authorities, and in its essentials I adopt it for the purposes of this judgment. I do not think it can be right to say that the chairman of a meeting has no inherent power to adjourn the meeting for disorder. It seems generally accepted that one of his functions is to preserve order: if despite his efforts serious disorder persists, and he is denied any power of adjournment, what is he to do? The disorder will almost by necessity make it impossible for the meeting to pass a resolution for adjournment. One must remember that serious disorder may put in a dilemma many of those who are peacefully attending the meeting. If they retire from it, they may afterwards find that the disorder soon subsided, and that the meeting then transacted its business without their voice and vote, and in a sense contrary to their wishes. If they remain, their personal safety may be in peril. The frail and timorous are as much entitled as the robust and bold to a meeting to which they can give their attention, and at which they may make their voices heard without fear of violence; and they need it more.

B

C

D

The first duty of the chairman of a meeting is to keep order if he can. If there is disorder, his duty, I think, is to make earnest and sustained efforts to restore order, and for this purpose to summon to his aid any officers or others whose assistance is available. If all his efforts are in vain, he should endeavour to put into operation whatever provisions for adjournment there are in the rules, as by obtaining a resolution to adjourn. If this proves impossible, he should exercise his inherent power to adjourn the meeting for a short while, such as 15 minutes, taking due steps to ensure so far as possible that all present know of this adjournment. If instead of mere disorder there is violence, I think that he should take similar steps, save that the greater the violence the less prolonged should be his efforts to restore order before adjourning. In my judgment, he has not merely a power but a duty to adjourn in this way, in the interests of those who fear for their safety. I am not suggesting that there is a power and a duty to adjourn if the violence consists of no more than a few technical assaults and batteries. Mere pushing and jostling is one thing; it is another when people are put in fear, where there is heavy punching, or the knives are out, so that blood may flow, and there are prospects, or more, of grievous bodily harm. In the latter case, the sooner the chairman adjourns the meeting the better. At meetings, as elsewhere, the Queen's Peace must be kept.

E

F

G

If, then, the chairman has this inherent power and duty, what limitations, if any, are there upon its exercise? First, I think that the power and duty must be exercised bona fide for the purpose of forwarding and facilitating the meeting, and not for the purpose of interruption or procrastination. Second, I think that the adjournment must be for no longer than the necessities appear to dictate. If the adjournment is merely for such

H

1 Ch.

John V. Rees

Megarry J.

- A period as the chairman considers to be reasonably necessary for the restoration of order, it would be within his power and his duty; a longer adjournment would not. One must remember that to attend a meeting may for some mean travelling far and giving up much leisure. An adjournment to another day when a mere 15 minutes might suffice to restore order may well impose an unjustifiable burden on many; for they must either once more travel far and give up their leisure, or else remain away and lose their chance to speak and vote at the meeting.

- As I have already mentioned, Mr. Hirst has contended that if the chairman's own improper conduct of the meeting has provoked the disorder, he loses his inherent power of adjournment and can recover it only by returning to the paths of propriety. I very much doubt this. The mischief to the innocent members of the meeting is as great whether it is the chairman or anyone else who provoked the disorder: unless the adjournment is valid their departure may disfranchise them for that meeting. Disorder is disorder, and if the adjournment is made bona fide for the purpose of restoring order and for a reasonable period only, I think there would be less injustice in holding that the adjournment is valid than in making its validity depend upon the outcome of the often difficult question whether the disorder was due to the chairman's misconduct. Causation is seldom pure.

- I am conscious that for much of what I have said there is little or no authority. Furthermore, not all of what I have said arises for decision in this case, at any rate directly. But the matter has been debated before me, and it has seemed better to attempt a reasonably comprehensive and intelligible statement of this corner of a chairman's powers and duty than to confine myself to those segments of it which directly arise for decision.
- On the other hand, let me add that I have not attempted to be exhaustive. In particular, there may well be limitations upon the chairman's inherent power of adjournment other than those that I have mentioned. I should also add that I do not think that in this case the chairman's inherent power of adjournment for disorder is affected by the standing orders of P.D.L.P. Standing order 11 (c) provides for the adjournment to be moved without notice, and standing order 19 provides for such a motion to be put to the vote without discussion. But if there is serious disorder it is improbable that it would be practicable to follow this procedure: and I cannot perceive any intention to oust or curtail the chairman's inherent power of adjournment for disorder.

- I turn, then, to the adjournment in the present case. In my judgment the grounds for the adjournment fell far short of what the law required.
- Even if one accepts to the full the most pungent portions of the evidence, I do not think that this was a meeting where people were put in fear. Certainly there was noise, disorder, and, in a few cases, bodily contact; but whatever affronts to dignity there may have been, there was nothing that could really be called violence. The plaintiff made no attempt to apply the provisions of the standing orders relating to adjournment.
- There is nothing to suggest that he attempted to restore order by any means other than calling out to the meeting. He purported to adjourn the meeting not for a reasonable period so that order might be restored, but sine die; and he then left the place of meeting.

Now the plaintiff did not, of course, have the advantage of hearing in peace, and at length, either the arguments on his powers that have been addressed to me or this judgment. He was subject to all the disadvantages of having to decide at short notice what to do when presiding over a disorderly meeting. In other spheres, due credit is given to a man who is put into a dilemma and has to make a decision in what is called "the agony of the moment." Here I think it right to make full allowance for that, subject to one point. I have already rejected Mr. Hirst's contention that a chairman's improper conduct of a meeting deprives him of his inherent power of adjournment. But where there is such impropriety, I think that it may have a different effect. For if in any real degree that impropriety has caused or contributed to the disorder of the meeting, and has thus played a real part in creating the dilemma, I do not think that it then lies in the mouth of the chairman to excuse his conduct by relying upon that dilemma. A self-imposed dilemma offers but a slender claim to justification. In this case the fact remains that the chairman did go wrong, and that those who complain of his conduct are entitled to do so. Whether or not his sole motive for adjourning was the disorder is a matter which must be left until the trial. He will then, as now, start with the disadvantage of being a chairman who, in my judgment, had been conducting the meeting in disregard of the standing orders, the agenda, and the resolution of the standing orders committee. On this motion I need do no more than say that, in my judgment, on the undisputed evidence, the purported adjournment was bad, and failed to produce any effective adjournment of the meeting. Those who departed from the meeting with the plaintiff, said to be some 20 in number, may wish to complain that they thereby lost their opportunity of opposing what happened later in the meeting; if so, they must lay their complaints to the charge of the plaintiff.

On the footing that there was no valid adjournment, it follows that, as the cases establish (see, for example, *National Dwellings Society v. Sykes* [1894] 3 Ch. 159), and as Mr. Sparrow concedes, the meeting remained in being and competent to transact business. The elections conducted after the departure of the plaintiff were accordingly valid; for no other contention that they were bad has been put forward. It has not been suggested that the minutes of the meeting prepared by the first defendant [Mr. Rees], exhibit A.G.R. 1A, do not correctly record what happened at the meeting after the plaintiff's departure. Accordingly, as a result of the meeting the second defendant [Mr. Cleare] was elected President of P.D.L.P. in place of the plaintiff, and the third defendant [Mr. Lewis] was elected treasurer. The first defendant remained the secretary; he was not up for election.

In addition to the election of officers and delegates, the business transacted at the meeting after the plaintiff had departed included a resolution to disaffiliate from the Labour Party; and I must now consider the validity of this. In order to do so, it is necessary to resolve what rules governed P.D.L.P.: and on this point there has been strenuous debate over the rules known as "Set B." For the affiliates, Mr. Sparrow has contended that these apply and govern P.D.L.P., whereas Mr. Hirst has argued the contrary. I must therefore first consider Set B.

1 Ch.

John v. Rees

Megarry J.

A The Labour Party publishes a booklet (which I shall call "The White Booklet") which contains a memorandum, and two sets of model rules, "Set B" and "Set C." The copies of the White Booklet before me appear to have been printed in January, 1968, but no point has been taken on that, and probably the booklet is merely a reprint of rules that have been in existence for some while. Set B is stated to be "For Constituency Labour Parties in county constituencies," whereas Set C is "For Local Labour Parties in county constituencies." Clause 3 (2) of the Labour Party constitution (the format of which leads me to call it "The Yellow Booklet") provides that "Each Constituency Labour Party . . . must . . . adopt the rules laid down by the Party Conference"; and the memorandum in the White Booklet states, inter alia, that Sets B and C are the appropriate rules for this purpose. The question is whether Set B was ever adopted by P.D.L.P.

C The plaintiff says that they were. He exhibits a sheet of paper setting out certain adjustments and insertions which he says were made to Set B, inserting the name "Pembrokeshire" in the blanks and so on. He also exhibits a five-page document setting out the standing orders of P.D.L.P., to which I have already referred. These state in order 1 (a) (i) that the general management committee is at its annual meeting to elect "An executive committee in accordance with constitution and rules Set B"; and clause 9 (3) of Set B, when read with the adjustments and insertions that I have just mentioned, duly provides for the constitution of an executive committee. The first defendant [Mr. Rees], who has been secretary of P.D.L.P. since 1955, points out that it is not said when Set B was adopted, and that the minutes contain no record of the adoption of Set B, although he has not been able to trace any minute books prior to 1955. The plaintiff [Mr. John], who has been a member of P.D.L.P. for 24 years, replies by saying that he has been present at meetings of P.D.L.P. when the adoption of Set B was discussed, and that he has always believed and understood that Set B was duly adopted. Mr. Lewis (the third defendant) on the other hand, who was a member of the executive committee of P.D.L.P. in 1947, and attended regularly, had no recollection of any discussion or adoption of Set B. The plaintiff and Mr. Underhill also exhibit correspondence in 1947 and 1954 which refers to the rules and constitution of P.D.L.P., and to the approval of the rules by the N.E.C. on December 3, 1947. The 1947 correspondence was between the Welsh regional office of the Labour Party and the national agent's department, while in the 1954 correspondence the then secretary of P.D.L.P. joined in as well.

G The correspondence certainly suggests that the rules were Set B, as amended; and Mr. Prothero, who was Welsh regional officer in 1947 and 1954, confirms this. In addition, Mr. Sparrow relies strongly on the presumption of regularity, or *omnia praesumuntur rite esse acta*, to carry him over the undoubted absence of any cogent direct evidence of the adoption of the rules by P.D.L.P.: and for this he cited a number of authorities where the facts were rather different. He further contends that, irrespective of any evidence of formal adoption of Set B, those who join a club or association bind themselves by whatever the rules are, even if they have become established merely by usage among the members.

To these contentions, Mr. Hirst replied by emphasising that the issue was whether or not the members of P.D.L.P. were bound to each other by a contract which incorporated Set B. He said that there was no evidence of the adoption of Set B, or of the members knowing of Set B or agreeing to accept Set B. Furthermore, he said, the presumption of regularity cannot apply to establish the terms of a contract. In any case, he added, *Morris v. Kanssen* [1946] A.C. 459 established that the maxim omnia praesumuntur rite esse acta cannot apply in favour of someone who, like the plaintiff, is a member of P.D.L.P., for it can apply only in favour of outsiders, or non-members.

This last point was vigorously debated: and I will deal with it first. The point came up in *Morris v. Kanssen* as something of an after-thought, and was argued only by the indulgence of the House of Lords: for the appellant had not raised the point in his formal case. What was in issue was the validity of an allotment of shares made at a meeting of the directors of a company at which one director, M., had been appointed immediately before the allotment. In fact, both the appointment and the allotment were ineffective because the other two persons present, although formerly directors of the company, had by virtue of the articles of the company ceased to be directors some while before the meeting; for the company had held no general meeting for a year. In those circumstances, M. claimed that despite the defects in the allotment produced by the operation of the articles, the rule in *Royal British Bank v. Turquand* (1856) 6 E. & B. 327 made good his title to the shares allotted: acting in good faith, he was not concerned to inquire into the regularity of acts of internal management.

This contention failed. Only Lord Simonds delivered a reasoned speech: the other members of the House merely concurred. Lord Simonds discussed the rule in *Turquand's* case, and in doing this he referred to the maxim omnia praesumuntur rite esse acta as "one of the fundamental maxims of the law: " [1946] A.C. 459, 475. He gave some illustrations of it, and then uttered a sentence upon which Mr. Hirst placed great emphasis, at p. 475:

"It is a rule designed for the protection of those who are entitled to assume, just because they cannot know, that the person with whom they deal has the authority which he claims."

This, said Mr. Hirst, referred to the maxim omnia praesumuntur rite esse acta, and not the rule in *Turquand's* case. Therefore in the present case the plaintiff could not rely on the maxim: for he is a member of P.D.L.P., and so cannot claim to be one of those "who are entitled to assume, just because they cannot know," whether Set B was ever formally adopted.

As a mere matter of grammar, it certainly seems that on p. 475 Lord Simonds was speaking of the maxim rather than the rule. He sets out the maxim (on p. 474), says that it has many applications, and gives illustrations. He then says (p. 475) "But the maxim has its proper limits": and still he is speaking of the maxim. He then gives two illustrations, and says "Nor is this the only limit to its application": and grammatically the word "its" must refer back to the maxim. He then proceeds with the

1 Ch.

John v. Rees

Megarry J.

A sentence to which Mr. Hirst has attached so much importance, beginning "It is a rule . . .": and still the "It" grammatically refers back to the maxim. Accordingly, if grammar were the only criterion, there would here be a declaration by a unanimous House of Lords that the maxim "omnia praesumuntur rite esse acta" is confined in its operation to protecting those who are entitled to assume, because they cannot know, that the person they deal with has the authority which he claims. On this foundation Mr. Hirst has built his elaborate claim that the maxim applies only for the protection of outsiders, or non-members of P.D.L.P., and so cannot avail a member.

In ascertaining what a case decided, grammar is, no doubt, a good servant. But it may be a bad master; and if it is treated as the sole master, it may become a tyrant. As Lord Reid once said of a famous passage in a famous judgment of Willes J. [in *Indermaur v. Dames* (1866) L.R. 1 C.P. 274, 288]:

"In dealing with a situation different from anything contemplated in that judgment I do not think that it is very helpful to analyse that passage as if it were a section in an Act of Parliament" (*London Graving Dock Co. Ltd. v. Horton* [1951] A.C. 737, 779);

and the other members of their Lordships' House evidently shared that view: see at pp. 745, 751, 761. I remember, too, the classic warning of Learned Hand J. in *Cabell v. Markham* (1945) 148 F. (2d) 737, 739: one ought "not to make a fortress out of the dictionary," or, I may add, out of a textbook of grammar either. In applying even the most authoritative language in a decided case, it is, in my judgment, essential to bring to the task a lively sense of the subject-matter arising for decision. The facts of *Morris v. Kanssen* [1946] A.C. 459 were far removed from those in this case. There, the question was whether a person who was not a director of a company but was acting as such could pray in aid the rule in *Turquand's* case (6 E. & B. 327) so as to validate an allotment of shares to himself which he and two others of like status had made. No authority for the invocation of that rule by actual or de facto directors could be produced, and their Lordships refused to hold that an invalid allotment of a company's shares could be validated by the application of the rule. What was argued (see [1946] A.C. 459, 466) and what was decided was the scope of that rule. In the process of decision, the maxim was considered as part of the process. So far as the maxim relates to companies, it deals with the acts which bind or do not bind the company.

The case I am concerned with, on the other hand, concerns not a company but an unincorporated club or association. No question arises whether or not any artificial or juristic person is bound, for there is no such person. Instead, the question is that of the terms of the rules of that association, as constituting the contract which bind the members to each other. There is no direct evidence that any meeting of P.D.L.P. ever adopted Set B, but on the other hand there is some evidence that for many years at least some of the officers have treated Set B as being the rules of P.D.L.P. Where those concerned have acted for many years on the assumption of a particular state of affairs, the court is slow to hold that a different state of affairs exists: see, for example, *Sneyd v. Stewart* (1857) 10 Irish Jur. 105, 107, per Cusack Smith M.R., in a case concerning

the size of various beneficiaries' shares in a fund. Further, in the standing orders of P.D.L.P. (which nobody challenges) there are significant words in clause 1 (a) (i), providing for the election of "An executive committee in accordance with constitution and rules Set B."

On the facts of this case, therefore, I have to consider whether in those circumstances there is anything in *Morris v. Kanssen* [1946] A.C. 459 which prevents me from applying the maxim *omnia praesumuntur rite esse acta* and holding that Set B was, at some time unknown, adopted by P.D.L.P. as the rules of the party. I do not think that there is. The House of Lords was dealing with an entirely different situation, and I cannot believe that, in referring to the maxim when considering the ambit of the rule in *Turquand's* case (6 E. & B. 327) (which doubtless is or contains one manifestation of the operation of the maxim), there was any intention to limit the operation of the maxim in other spheres. As is shown by even a cursory examination of *Broom's Legal Maxims*, 10th ed., (1939), pp. 640-648, the maxim operates in a wide diversity of circumstances; and if it were confined in its operation, as Mr. Hirst contends, to cases where it is invoked by outsiders, I can foresee much difficulty in applying some of the long-established authorities. Lastly, of course, this is merely a motion: the final elucidation of this point must await the trial, and such further evidence as may be adduced.

That is not all. For I do not think that I am required to apply the presumption of regularity in a vacuum, ignoring the evidence which supports the view that Set B was adopted. Certainly I do not think it is necessary to bring home to every member when he joins exactly what the rules of the association are. I do not see why someone who joins a club should not do so on the basis that he will be bound by the rules of the club, whatever they may be: see, for example, *Raggett v. Musgrave* (1827) 2 C. & P. 556, where the rules, though accessible, were neither posted up nor sent to members. *The Satanita* [1895] P. 248 C.A.; [1897] A.C. 59, H.L.(E.) does not seem to me to bear upon the point, as it concerned not membership of a club but the terms of a contract between those who entered for a race. In the case of a club, if nobody can produce any evidence of a formal resolution to adopt a particular set of rules, but on inquiry the officers would produce that set as being the rules upon which it is habitual for the club to act, then I do not think the member would be free to reject those rules merely because no resolution could be proved.

Accordingly, in my judgment I must deal with the motion on the footing that P.D.L.P. has at all material times been governed by Set B, subject to the provisions of the document which sets out the minor adjustments and insertions to be made, and subject also to the deletion of the office of financial secretary from clause 9 (2) which some correspondence of 1954 records. In addition, there is no dispute that P.D.L.P. has at all material times been subject to the standing orders which have been put in evidence:

On the footing that Set B applies, Mr. Sparrow says that the result is to show that P.D.L.P. is a mere branch of the national Labour Party, and that the members of it are bound by contract to be loyal to the Labour Party. This he deduces from, in the main, clauses 4 (1), (2) (a), 6 (2), 7 (1), 8 (2) (d), and (3), of Set B. So far as the "mere branch" argument

1 Ch.

John v. Rees

Megarry J.

A is concerned, I feel some doubts. By clause 2 (1) of the Labour Party constitution, there are two classes of members, namely, affiliated members (or organisations: see clause 3 (1)), and individual members: and I do not consider that an organisation which affiliates itself to the Labour Party thereby becomes a "mere branch" of that party, whatever that may mean, any more than an individual member does. Such an organisation remains, I think, a separate entity, though bound by certain obligations. On the other hand, the rules do seem to me to require acceptance of the constitution, programme, principles and policy of the Labour Party both by P.D.L.P. and by its members; see clause 4 (1) (a), (2) (a). On this foundation, Mr. Sparrow has sought to erect a structure which would support the plaintiff's act in inserting into the meeting Mr. Underhill's address and the loyalty resolution. He fortified his position by reference to standing orders 6, 7 and 20. Standing order 6 provides that "Party business shall have precedence on the agenda." Standing order 7 deals with notice of motions, and standing order 20 provides that "The chairman's ruling to any point of order arising from these standing orders or any point arising not provided for by these standing orders shall be final," with a provision for a challenge and a vote. I do not think that these provisions, either individually or collectively, suffice to support the plaintiff's actions.

D I can now turn to the question of disaffiliation. The motion before me does not in terms seek a decision on the validity of the resolution to disaffiliate; but I do not think I can avoid considering it, and it is at least relevant to the claim to an injunction against the disaffiliate defendants. The injunction cannot be granted on the basis that the defendants were not officers of P.D.L.P. after the first meeting; for they all were. But that does not dispose of the matter. Even if all were still officers of P.D.L.P., Mr. Sparrow contends that they should all be enjoined in terms of the notice of motion because they have manifested an intention to deal with the property of P.D.L.P. otherwise than in accordance with its constitution and rules. In particular, there was the resolution to disaffiliate. This was moved by the third defendant and passed by 69 votes to 1 at the meeting after the plaintiff had left. The motion was that P.D.L.P. should

F "disaffiliate from the national Labour Party in order that Mr. Desmond Donnelly could continue as a Labour Member for Pembrokeshire."

The validity of this resolution is impugned under two heads.

G First, no notice of any intention to propose such a resolution appeared in the formal agenda for the meeting. True, in the first defendant's duplicated report for the meeting which accompanied the agenda he asked why P.D.L.P. could not disaffiliate temporarily: but nothing on this point appeared in the agenda proper. On this ground alone it seems to me clear that the resolution was invalid. The standing orders (which nobody challenges) require ten days' written notice of motion "unless on matters of urgency accepted by the majority as such" (standing order 7): and the minutes record no such acceptance of urgency. In any case, standing order 7 continues by saying that

H "where such urgency is known or anticipated before the meeting,

notice in writing of the urgent business or motion shall be transmitted to the secretary as early as may be practicable before the meeting":

A

and there is no suggestion that this was done. Further, a motion to disaffiliate is not amongst those motions for which, by standing order 11, no notice is required. Where a motion deals with such important and fundamental matters as this, it seems to me particularly necessary that there should be a full and substantial compliance with all the requirements as to notice and otherwise.

B

Second, quite apart from procedural defects (which might be cured if another meeting were held), there is the substantial question whether, as matters stand, P.D.L.P. is able to disaffiliate or sever itself from the Labour Party, whatever the procedure adopted. Mr. Hirst very properly accepts that P.D.L.P. cannot do so in breach of its own rules, and so if, as I have held, P.D.L.P. is governed by Set B, the question is whether Set B (or any other relevant rules) prevents severance or disaffiliation. It seems to me clear that P.D.L.P. is bound to the Labour Party by Set B and, through Set B, by the constitution of the Labour Party. In Mr. Sparrow's phrase, P.D.L.P. and the Labour Party are so clamped together by these provisions that they cannot be separated without first altering those provisions. Not surprisingly, Set B, Set C and the Labour Party constitution all dovetail in with each other.

C

D

In one sense Mr. Hirst was right when he said that there is nothing in Set B to say that P.D.L.P. cannot disaffiliate from the Labour Party: there is indeed nothing which says this in terms. But it seems to me that when the provisions of Set B are read as a whole, the inescapable conclusion is that while they stand unaltered P.D.L.P. cannot separate itself from the Labour Party: and I do not think it matters much whether the process is called disaffiliation or severance. In my view, it is unnecessary to refer in detail to the rules in Set B which produce this result. It seems sufficient to say that, on making the assumption that P.D.L.P. has severed itself from the Labour Party, I find it impossible to read through the rules of Set B and make them work sensibly. Thus if there were a severance, clause 8 (as to affiliation fees payable to the Labour Party) and clause 13 (applying the general provisions of the constitution and standing orders of the Labour Party) would both require substantial revision. By clause 4 the two classes of members of P.D.L.P., namely, affiliated organisations and individual members, would have to accept and conform, or agree to conform, to the constitution, programme, principles and policy of the Labour Party, while (on this hypothesis) P.D.L.P. would have separated itself from the Labour Party. By clause 6 (2), the rules of Set B may, subject to important limitations, be altered, amended or deleted, but only with the approval in writing of the N.E.C.; and in such circumstances no such approval is likely to be given, even if it were to be sought. In any case, a proviso precludes any changes of the rules which "effect a change in the relationship of . . . Constituency Labour Parties with the Labour Party": and although I agree that this does not eo nomine preclude disaffiliation, I think it is plain that in substance and effect it does so.

E

F

G

H

If a severance between P.D.L.P. and the Labour Party cannot be

1 Ch.

John v. Rees

Megarry J.

A effected without a change of rules (as I hold to be the case), and if no change of rules is permitted which will effect a change in the relationship of P.D.L.P. with the Labour Party, then I do not see how any severance can lawfully be made. I need hardly say that I am not for one moment asserting that any members of P.D.L.P. are unable to form some new political organisation or group: what I do say is that the existing P.D.L.P., with its property, has not effectually been severed or disaffiliated from the Labour Party.

B Mr. Hirst pressed me with authorities such as *Finch v. Oake* [1896] 1 Ch. 409, on the right of a member of a club or society to resign or retire at any time, without any concurrence or acceptance by the club or society. I do not find the analogy persuasive. An individual who resigns severs the link between himself and his fellow members: he does not affect their rights in other ways. They remain bound inter se by the existing rules. The majority of a club which resolves upon disaffiliation, however, would alter the rights not only of themselves but also of all other members, effecting a change of the rules which would continue to bind all members. Such a change must, I think, be made in accordance with whatever procedure there is for changing the rules: and if none is applicable, the change cannot be made. Those who do not like the situation may, as individuals, resign: but I do not think they can collectively secure a disaffiliation except in accordance with the rules which bind them all.

E The matter may be put in this way. If an individual resigns from a club, no question arises of the validity of his own act quoad himself. He can make up his own mind, and act for himself. On the other hand, where the question is one of a club disaffiliating itself from some other organisation, there is a preliminary question to be resolved, namely, whether the act of disaffiliation was validly done according to the rules of the club and the general law so as to be the act of the members of the club as a body. The question "Has there been a valid decision to resign or disaffiliate?" arises in the case of the club but not in the case of the individual. The analogy between the two categories thus breaks down.

F In the present case, the principal question is that of the effectiveness of the resolution to disaffiliate, and this is just the question which does not arise when an individual resigns from a club. Accordingly, I derive little help from the analogy.

G The position is thus that the three defendants were, immediately after the meeting, officers of P.D.L.P. who were wrongly asserting that P.D.L.P. had disaffiliated itself from the Labour Party. They also supported the candidature of Mr. Donnelly, who had been expelled from the Labour Party. Indeed, after the plaintiff had left the meeting, a resolution of support for Mr. Donnelly was passed unanimously. If, despite subsequent events, they are still in office, there is the question whether they should be enjoined from dealing with the property of P.D.L.P. There is no evidence before me of any improper use of the funds, nor of any threat to flout the law. There has been a strenuous disagreement whether or not there has been an effective disaffiliation; but there is nothing to suggest that the defendants are lawless men who will act in breach of the law once they know it. Accordingly, I do not think it would be right to grant an injunc-

H

tion in the terms of the notice of motion which would restrain the lawfully elected officers of P.D.L.P. from any dealing with the property entrusted to them when there is no subsisting threat that they will deal with it otherwise than lawfully. If there should hereafter be any such threat, then no doubt such an injunction may be sought anew: but I do not think that there is any sufficient reason for granting an injunction now.

When I put to Mr. Sparrow the possibility of an injunction being granted in more limited terms, restraining not all dealings with the property but any dealings contrary to the rules of P.D.L.P., he said that the injunction must be all or nothing, and not merely an injunction against the unconstitutional use of the funds. In those circumstances, and as in any event I feel some doubt whether it would be right to grant a limited injunction, I do not think that I need consider the point further; and I am clear that the injunction sought by the notice of motion must be refused. I accordingly dismiss the first motion.

I now turn to action No. 2. As I have said, this action relates to the second meeting, and this was part of the process whereby the N.E.C. sought to reorganise P.D.L.P. The writ claims a declaration and two injunctions, which I do not think I need read. On the day the writ was issued, June 12, 1968, the plaintiffs [Mr. Thomas Henry Martin and Mr. Brian Lloyd Davies] gave notice of motion claiming two injunctions in the following terms:

"1. An injunction to restrain the defendants and each of them in their capacities as officers of the unincorporated association which purports to call itself the Haverfordwest Local Labour Party being an association purported to have been constituted at a meeting convened and held by order of the National Executive of The Labour Party at The Gold Room, Market Hall, Haverfordwest, on Monday, May 20, 1968, until judgment in this action or further order (whether by themselves their servants or agents or otherwise howsoever) from doing or purporting to do or being party to any of the following things namely collecting expending remitting transferring or otherwise dealing with any moneys or other property belonging to or held for the purpose of the Haverfordwest Local Labour Party as constituted prior to the said meeting. 2. An injunction to restrain the defendants and each of them until judgment in this action or further order from purporting to act as general committee delegates on behalf of the Haverfordwest Local Labour Party as constituted prior to May 20, 1968, at any meetings whatsoever whether at constituency level or otherwise."

The main issue is the efficacy of the steps taken by the N.E.C. to re-organise P.D.L.P.

The starting point, I think, is in the Labour Party constitution, as set out in the Yellow Booklet. By clause 8 (2), it is provided that

"The duties and powers of the National Executive Committee shall include the following: — . . . (b) To enforce the constitution, standing orders, and rules of the party and to take any action it deems necessary for such purpose, whether by way of disaffiliation of an

1 Ch.

John V. Rees

Megarry J.

**A** organisation or expulsion of an individual, or otherwise. Any such action shall be reported to the next annual conference of the party."

By clause 13 (1) of Set B, "the general provisions of the constitution and standing orders of the Labour Party shall apply to the organisation." On April 24, 1968, after the first meeting, the N.E.C. passed two resolutions. They read as follows:

**B** "(i) That action be taken under clause VIII section 2 (b) of the party constitution to suspend the activities of the Pembroke Constituency Labour Party and that the officers should have no rights for the time being to handle the funds of the party; (ii) that the Pembroke Constituency Labour Party be re-organised and that the national agent be given authority to take such steps as are necessary to complete the re-organisation."

**C** What followed may be described in the language of Mr. Underhill, assistant national agent of the Labour Party, in his affidavit sworn July 9, 1968. In this, I think "prescribed" is a slip for "proscribed," and "prescribed re-organisation" should be "proscribed organisation." He says that

**D** "In pursuance of these resolutions the national agent for the Labour Party resolved to convene a meeting of the Haverfordwest Local Labour Party. However, before doing so, in accordance with the usual procedure followed by the National Executive Committee of the Labour Party in the case of the re-organisation of constituency parties, the national agent first sent a letter by registered post to the leading members of the dissident faction who supported Mr. Donnelly informing them of the proposed re-organisation and requesting from them an undertaking that they accepted and would conform to the constitution programme principles and policy of the Labour Party and that they did not belong to nor were actively associated with any prescribed organisation and that they would co-operate with the National Executive Committee in re-establishing the Constituency Labour Party in accordance with the provisions of the party constitution and rules. A true copy of the letter sent to the first plaintiff is now produced and shown to be marked 'U.1.' A letter in the same terms was sent to each of the other leaders."

The letter exhibited in U.1. is addressed to the person concerned, and reads as follows:

**G** "I have been charged by the National Executive Committee with the responsibility of re-organising the Pembrokeshire Constituency Labour Party. Before making any recommendation to the National Executive Committee about your continued membership of the party, I shall be grateful if you will let me have, in writing, an undertaking that you accept and conform to, the constitution, programme, principles and policy of the Labour Party, that you do not belong to, or are actively associated with, any prescribed organisation, and that you will co-operate with the National Executive Committee in re-establishing the Constituency Labour Party in accordance with the provisions of

**H**

Megarry J.

John v. Rees

[1970]

the party constitution and rules. I am enclosing a stamped addressed envelope for your reply.”

A

It is then signed in the name of the “National agent and acting general secretary.”

Mr. Underhill, in his affidavit, continues as follows:

“Four persons to whom such a letter was sent namely, the first and second plaintiffs [Mr. Martin and Mr. Davies], Mr. Fulton and Mr. McEntee did not reply to this letter. Four others namely, Mr. T. R. Merriman, Mr. J. Phillips, Mr. A. Glyn Rees and Miss M. L. Jones all replied in similar terms to the effect that they were members of the Pembroke Labour Party, that they did not understand the national agent’s reference to the prescribed re-organisation and that they did not accept the right of the National Executive Committee to interfere in any way. The national agent replied to all these letters (except for the letter of Mr. A. Glyn Rees) pointing out that every member of the Labour Party was bound by its constitution and rules and that it was not open to any member to break this contract and remain a member of the Labour Party. The national agent in the last paragraph of her letter asked the persons to whom she was writing to give the undertaking which she had requested in her first letter. No replies were received from any of them. The national agent did not reply to the letter of Mr. Glyn Rees because he is a defendant in a separate action . . .”;

B

C

D

and then there is a reference to action No. 1. Mr. Underhill continues:

“Clause 4 (2) (a) of model rules Set C, the model constitution for local labour parties in county constituencies provides that each individual member must accept and conform to the constitution programme principles and policy of the Labour Party and the rules of the local parties. By reason of the refusal of the eight dissident members to give the undertakings requested by the national agent, the national agent considered that they were disqualified from membership of the Haverfordwest Local Labour Party.”

E

F

These last words point to the view that the failure to give the undertakings had in some way automatically terminated the membership of those concerned. On day 2, Mr. Sparrow told me that the dissidents were still members of the local Labour Party until they were expelled; but on day 12 he expressly withdrew this statement, and replaced it with some far-reaching propositions. He said that the dissidents were now no longer members of the local Labour Party. They had, he said, destroyed their own membership either by stating that they would not give the undertaking, or by failing to reply to the letter within a reasonable time. It might be, he added, that they ceased to be members when they inwardly harboured disloyal notions in their bosoms, a concept which seems to me to give rise to many interesting speculations. He also contended that by their acts they had resigned their membership; and this, he added significantly, “got round all problems relating to expulsion.” An alternative formulation of his point was that by their unconstitutional action and demonstration of disloyalty they had repudiated their membership. It might even be, he

G

H

1 Ch.

John V. Rees

Megarry J.

A said, that a deliberate breach of any rule would bring about an ipso facto determination of their membership. Apart from some reference to authorities on the general law of contract as to discharge by repudiation, these submissions were put forward without the support of authority.

Before I turn to consider these submissions, I must conclude the statement of facts. In his affidavit Mr. Underhill continues as follows:

B “By letters dated May 11, 1968, the national agent gave notice of a meeting of the Haverfordwest Local Labour Party on May 20, 1968, to all members whose names appeared on the list of members supplied by Mr. Ronald Clifford Davis the secretary of the Haverfordwest Local Labour Party and compiled by him from the records of the party or of a list of members supplied by Mr. Glyn Rees secretary/agent of the Pembroke Constituency Labour Party except for the eight dissident members above referred to. The letters were in the terms of the letters exhibited to the affidavits herein of Alice Damant and Marjory Phillips.

C “The meeting was duly held on May 20, 1968. All members attending the meeting were asked to complete a declaration which was attached to the notice convening the meeting. Everyone who attended the meeting did in fact produce and sign a declaration.”

D He then exhibits a copy of the minutes of the meeting which he prepared two days after the meeting from notes that he took. These minutes record the proceedings, the persons elected to various offices and positions, and so on.

E On behalf of the plaintiffs there is evidence that no notice of the meeting was received by the two plaintiffs, who at all events before these disputes arose were respectively the treasurer and a member of the local Labour Party. The annual general meeting of the local Labour Party (about which there is no dispute) had been held on March 6, 1968, less than three months before the meeting convened by the national agent on May 20. At that meeting the first plaintiff had been elected treasurer (an office which he had held for some while), and the second plaintiff was elected a delegate.

F Other members of the local Labour Party received a notice of the meeting. The notice began with the words:

G “Arising from unconstitutional actions which have taken place in the Pembrokeshire Constituency Labour Party, the National Executive Committee of the Labour Party at its meeting on April 24, 1968, decided to suspend the activities of the Pembrokeshire Constituency Labour Party and to re-organise it.”

H It then referred to the business to be done at the meeting, and gave the time and the place of the meeting. It ended with the words “If you are able to attend, please complete the attached declaration and hand it to the steward at the meeting.” There is then a provision at the bottom of the sheet for a tear-off slip in which the person signing it declares that he accepts and conforms to the constitution, programme, principles, and policy of the Labour Party, says that he is not a member of various other organisations, and then says,

"I accept the decision of the National Executive Committee to re-organise the Pembrokeshire Constituency Labour Party and I am willing to co-operate by re-establishing the local Labour Party."

A

Two of the members who received these notices say that they attempted to attend the meeting but were refused admittance; but this is denied by the defendants, and I shall not attempt to resolve this point on motion. What is common ground is that notice of the meeting was not sent to all of those who, immediately before the dispute, were members of the local Labour Party (as mentioned in the affidavit, there were eight in this expected category), and that this was no accident, but was based upon the contention that those concerned had ceased to be members. The question is the effect of this.

B

There are, I may say, many other questions, some of which I must mention. One is whether or not Set C of the Labour Party's model rules, intended for local Labour Parties in county constituencies, in fact applies to this local Labour Party. Another is the application of the maxim *delegatus non potest delegare* to the acts of the representative of the national agent. Another is whether a local Labour Party is a separate body or is merely a group within the Constituency Labour Party. I do not think it right to examine in any detail more than is necessary to decide what is, after all, merely a motion. Needless to say, these other points remain open to either side in any further proceedings: and I return to the main question.

C

D

Clause 8 (2) of the Labour Party constitution empowers the N.E.C. to do certain acts. Let me assume that either because Set C applies or otherwise this clause applies to the Haverfordwest Local Labour Party. What it does is to put into the hands of the N.E.C. power for it to take "any action it deems necessary" for the purpose of enforcing the constitution, standing orders and rules of the Labour Party: and the "disaffiliation of an organisation" and "the expulsion of an individual" are expressly stated as being within the competence of the N.E.C. The two resolutions of the N.E.C. on April 24 deal respectively with suspension and reorganisation. The suspension resolution falls into two parts: first, that action be taken under clause 8 (2) "to suspend the activities of the Pembrokeshire Constituency Labour Party," and second, "that the officers should have no rights for the time being to handle the funds of the party." The reorganisation resolution also, in a sense, falls into two parts. First, there is the resolution in principle that "the Pembrokeshire Constituency Labour Party be reorganised," and, second, there is the machinery, namely, that "the national agent be given authority to take such steps as are necessary to complete the reorganisation."

E

F

G

Assuming that clause 8 (2) and the resolution apply to the local Labour Party, do they authorise what was done? Mr. Hirst answers "No," for a variety of reasons: but in the forefront of his argument was the concept of natural justice. The rules of natural justice, he said, apply not only to expulsion or dismissal, but also to suspension from office: and he cited a number of authorities including *Fisher v. Keane* (1878) 11 Ch.D. 353, *Labouchere v. Wharnccliffe (Earl of)* (1879) 13 Ch.D. 346, *Burn v. National*

H

1 Ch.

John v. Rees

Megarry J.

A *Amalgamated Labourers' Union* [1920] 2 Ch. 364, and *Ridge v. Baldwin* [1964] A.C. 40.

B *Burn's* case concerned a trade union. A rule required the executive committee of the union to "take every means to secure the observance of the union's rules," and authorised it to "suspend, expel and prosecute" members, and to "remove any incompetent or insubordinate officer." The committee passed a resolution removing the plaintiff from any office held by him, and preventing him from holding any delegation on behalf of the union for five years. The plaintiff had been treasurer of his branch, and was chairman of it at the date of the resolution. The complaint against him related solely to his conduct as treasurer; and the resolution was passed without hearing the plaintiff or giving him any opportunity of explaining. P. O. Lawrence J. construed the rules strictly, and held that the language of the rule did not authorise the resolution that was passed. C He went on to consider the position if he were wrong in thus construing the rules, and said at p. 374,: "I have no hesitation in holding that the power to suspend or expel a member for acting contrary to the rules is one of a quasi-judicial nature"; and he accordingly held the resolution bad because the plaintiff had not been given an opportunity of being heard in his defence. In relation to the rules of natural justice Lawrence J. D thus made no distinction between suspension and expulsion. I would respectfully concur: in essence, suspension is merely expulsion pro tanto. Each is penal, and each deprives the member concerned of the enjoyment of his rights of membership or office. Accordingly, in my judgment the rules of mutual justice prima facie apply to any such process of suspension in the same way that they apply to expulsion.

E In the present case, there has not in terms been any process of expulsion. Instead, there has been the process which, on Mr. Sparrow's argument, resulted in what for brevity may be described as an ipso facto cessation of membership which, he contended, "got round all problems relating to expulsion." Considered from the point of view of the members, however, the practical result is indistinguishable from expulsion. Before, they were members; after, they had been deprived of their membership F against their will. The precise legal description of the process by which this occurred, whether by destruction of their own membership, or acts constituting resignation, or repudiation of membership, may well be a matter of indifference to them: they have been unwillingly evicted.

G I cannot believe that the principles of natural justice can be ousted by the simple process of describing expulsion by another name, or resting it upon an alternative theoretical basis. Membership of a club or association is doubtless founded upon a basis of contract; but in many cases it is not merely a contract. Membership often gives the member valuable proprietary and social rights, and these, as well as the contract, would be terminated by expulsion. There is thus involved in expulsion not merely the termination of the contract but also the forfeiture of these other rights; and however ready the law may be to recognise the discharge H of a contract by repudiation, it is far less ready to accept that there has been a forfeiture of these other rights, whether the process is described as "ipso facto determination" or otherwise.

At one stage Mr. Hirst submitted that if there were a doctrine of ipso

facto determination, every member of the Government and the Labour Party would have ceased to be members of that party, and all its assets would pass to the Crown as bona vacantia. I am happy to think that it is unnecessary for me to decide that; and I abstain from any comment on his interesting submission. I may, however, observe that if there were a doctrine of ipso facto determination the terms of the letter sent by the national agent to the dissident members would be singularly misleading in its reference to

“making any recommendation to the National Executive Committee about your continued membership of the party”:

for that plainly suggests that the membership was still continuing but that the N.E.C. would, at some unspecified stage, make a decision about it.

However that may be, what matters here is, in my judgment, not the terminology but the substance and the reality: and looking at that, it seems plain that the principles of natural justice prima facie apply. Mr. Sparrow sought to avoid this conclusion by urging that what was done bore generally on P.D.L.P. and was not directed against individuals. He further contended that the principles of natural justice did not apply because the acts were administrative, because there had been no dismissal of any disaffiliates, and because these principles did not apply to unpaid offices.

I do not find any of these contentions persuasive. A “party” or a “club,” if unincorporated, is not an entity separate from its members; and action against the collective unit takes direct effect against the individuals comprising that unit. This seems to me to be quite different from the indirect effect that a proposal for a new road may have on the individual landowners, to which Lord Reid referred in *Ridge v. Baldwin* [1964] A.C. 40, at p. 72. On these submissions, as throughout, I look to the realities and not to the labels. Further, without authority to support it, I can see no warrant for the view that the application of the principles of natural justice to dismissal or suspension should be withheld from honorary office and yet accorded to ordinary membership. My reference to the office of Treasurer of an Inn of Court was later to move Mr. Sparrow to protest on the ground that the Inns were peculiar bodies. Indeed, they may be; but there are many other offices, both honourable and honorary, in other bodies, and unless constrained by authority (and none has been cited) I refuse to hold that the right to natural justice depends upon the right to a few pieces of silver.

Accordingly, I must consider what are the principles of natural justice which prima facie are applicable, and whether or not there is anything to oust their application. In doing this, it is convenient to refer to a case concerning an avowed expulsion from a political party which came before me some three weeks after the conclusion of the argument in this case, namely, *Fountain v. Chesterton*. It may be that there is other authority on the point that I have in mind: but none was cited to me in that case or in this. The decision was briefly reported in “The Times” on August 20, 1968, and 112 S.J. 690: but I gather from the asterisk attached to the latter report that no full report is likely to appear, at any rate in the Weekly Law

1 Ch.

John V. Rees

Megarry J.

A Reports. Accordingly, it may be convenient if I set out as best I can from my notes the passage in that judgment which I have in mind.

In that case I said:

B “The expression ‘the principles of natural justice’ is, I think, now a technical term. As Maugham J. pointed out in *Maclean v. Workers’ Union* [1929] 1 Ch. 602, 624, among most savages there is no such thing as justice in the modern sense. In a state of nature, self-interest prevails over any type of justice known to civilisation; the law of the jungle is power, not justice. Nor am I clear what the word ‘natural’ adds to the word ‘justice.’ It cannot be intended to indicate the antithesis of ‘unnatural justice,’ which would indeed be an odd concept; I imagine that it is intended to suggest justice that is simple or elementary, as distinct from justice that is complex, sophisticated and technical.

C “The term ‘natural justice’ has often been used by eminent judges, and although Maugham J. said (at p. 624) that it ‘is, of course, used only in a popular sense,’ I would prefer to regard it as having become something of a term of art. To extract the quintessence of the process of justice is, indeed, notoriously difficult. ‘The ideas of natural justice,’ said Iredell J., ‘are regulated by no fixed standard; the ablest and the purest men have differed on the subject’: *Calder v. Bull* (1798) 3 U.S. 386, 399. In *Ridge v. Baldwin* [1964] A.C. 40, 132, Lord Hodson referred to a ‘certain vagueness’ in the term, but rejected the view that because the requirements of natural justice depended upon the circumstances of the case, this made natural justice so vague as to be inapplicable. He added: ‘No one, I think, disputes that three features of natural justice stand out—(1) the right to be heard by an unbiased tribunal; (2) the right to have notice of charges of misconduct; (3) the right to be heard in answer to those charges.’ I do not think that I shall go far wrong if I regard these three features as constituting in all ordinary circumstances an irreducible minimum of the requirements of natural justice. I need only add that all these requirements are essentially procedural in nature; I regard natural justice as a distillate of due process of law.”

G I then turned to consider a submission based on the judgment of Denning L.J. in *Lee v. Showmen’s Guild of Great Britain* [1952] 2 Q.B. 329, 342 to the effect that public policy would invalidate any stipulation excluding the application of the rules of natural justice to a domestic tribunal, and said that although I respectfully inclined to the same view, it seemed to have been expressed obiter and was not mentioned by the other members of the court, so that I would hesitate to decide the case on that ground. I went on to refer to the rule which was said to justify the expulsion, and then said:

H “It is trite law that the rules of an unincorporated association form a contract between all the members of that association. It is, indeed, a somewhat special form of contract; but subject to that, what I am required to do is to construe the terms of a contract. Where the terms in issue deal with the exercise of a power of peremptory suspension or termination of the rights of one of the parties to such a

contract, then I think that the common expectation of mankind would be that the power would be exercised only in accordance with the principles of natural justice unless the contrary is made plain. This expectation rests upon high and ancient authority. When a member of a university was deprived of his degrees without being given an opportunity to defend himself, Fortescue J. said: 'The laws of God and man both give the party an opportunity to make his defence, if he has any. I remember to have heard it observed by a very learned man upon such an occasion, that even God himself did not pass sentence upon Adam, before he was called upon to make his defence. Adam (says God) where art thou? Hast thou not eaten of the tree, whereof I commanded thee that thou shouldst not eat? And the same question was put to Eve also': *Rex v. Cambridge University* (1723) 1 Stra. 557, 567. Even if the law permits the principles of natural justice to be effectually excluded by suitable drafting, I would not readily construe the rules as having achieved this result unless they left me in no doubt that this was the plain and manifest intention. Put a little differently, I would say that if there is any doubt, the applicability of the principles of natural justice will be given the benefit of that doubt. The cry 'That isn't fair' is to be found from earliest days, in nursery, street and school alike; and those who wish to confer upon the committee or other governing body of a club or association a power to act unfairly or arbitrarily in derogation of common and universal expectation must make it plain beyond a peradventure that this has been done. This view is, I think, at least consistent with the approach of Romer L.J. in *Lee v. Showmen's Guild of Great Britain* [1952] 2 Q.B. 329, 349, C.A. on a not dissimilar point, where he said that it would require 'the use of clear language' before he was satisfied that the members of any body such as the trade union in question had agreed to leave the construction of the trade union's rules to the committee, to the exclusion of the courts."

Having now had the opportunity of reconsidering the language that I used in that case, I must say that I can see no reason for resiling from it. Before resorting to public policy, let the rules of the club or other body be construed; and in the process of construction, the court will be slow to conclude that natural justice has been excluded. Only if the rules make it plain that natural justice was intended to be disregarded will it be necessary for the courts to resolve the issue of public policy. In this case, accordingly, I approach both clause 8 (2) of the Labour Party constitution and the resolution of the N.E.C. dated April 24, 1968, as provisions requiring to be construed strictly, and as not excluding the processes of natural justice except in so far as this is made plain. Nothing that I can see in clause 8 (2) even begins to exclude the process of natural justice. The phrase "to take any action it deems necessary" cannot, in my judgment, be read as if it continued "however contrary to natural justice it may be"; nor, in my judgment, are the words "disaffiliation," "expulsion" or even "or otherwise" to be qualified in any such way. These things may be done; but they must be done fairly and justly, and

1 Ch.

John v. Rees

Megarry J.

- A not unfairly or unjustly. Accordingly, the first resolution, suspending the activities of the Pembroke Constituency Labour Party and depriving the officers of the right for the time being to handle the funds of the party, falls to be tested by the standard of whether it was made in accordance with the rules of natural justice. Whatever may be said about the right to an unbiased tribunal, the process of giving notice of the charges and giving those concerned the right to be heard in answer to the charges was plainly not followed. Accordingly, in my judgment the resolution was a nullity. It was effective neither to suspend the activities of the Pembroke Constituency Labour Party nor to deprive the officers of that party of their right to handle the funds.

- C The two limbs of the second resolution, though directed to the same end, are markedly different in function. The first is an operative decision that the Pembroke Constituency Labour Party be "re-organised." The second provides that the national agent be "given authority" to take such steps as are necessary to "complete the re-organisation," and so confers authority on another to take certain steps. Both are very wide and indefinite in their terms, depending on the protean word "re-organise." Plainly there is considerable scope for argument about what that word means. But whatever it means, I do not think it can be said to include a process which excludes from the benefits of membership, without making a charge and without affording a hearing, anyone who fails to sign and return within a reasonable time the form put forward in this case.

- E Mr. Sparrow did contend that sending out the form amounted to affording the members an opportunity of being heard: but not even his considerable powers of advocacy sufficed to give any life to as barren a contention as I have heard. I cannot believe that the concept of "Write a letter in the form I dictate, or you are out" would seriously be regarded by any of the great judges who have spoken on the subject as making even an approach to conformity with the requirements of natural justice: and the prospects of this are not increased by the words "or you are out" not being there but being represented only by the hint to be derived from the reference to "making any recommendation to the National Executive Committee about your continued membership of the party."

- F These are not days of linguistic accuracy. Euphemisms abound; and as I said on a completely different subject in *Pet Library (London) Ltd. v. Walter Ellson & Son Ltd.* [1968] F.S.R. 359, 361, today

- G "many words of precision are being weakened by misapplication, sometimes for convenience but more often by ignorance: words such as 'alibi' and 'disinterested' spring readily to mind. There are also words which are persistently misused; thus even in circles of high respectability (and I look with sorrow at Vol. 29 of *Halsbury's Laws of England* (3rd ed.) (1960), p. 646), the word 'escapees' is sometimes applied to the fugitive prisoners rather than the governor and prison officers that they left behind them."

- H Nevertheless, after making all due allowance for an age of semantic laxity I do not think the word "re-organise" can be held to comprehend a process which in substance amounts to expulsion without a charge and without an opportunity to meet it. The more indefinite the language, the less apt it is

to exclude the members' reasonable expectation of being accorded natural justice. A

I also bear in mind the rule that, in general, a failure to give due notice of a meeting to even one member of a body who is entitled to attend invalidates the decisions of that body: see, for example, *Smyth v. Darley* (1849) 2 H.L.Cas. 789, concerning the election of an officer, and *Young v. Ladies' Imperial Club Ltd.* [1920] 2 K.B. 523 where an expulsion was in issue. Here, no notice of the second meeting was given to a number of the members of the local Labour Party; and it is clear that this was due not to inadvertence or accident but to deliberation. It follows that the meeting was not validly constituted, and so its proceedings were void. In the words of Lord Campbell L.C. in *Smyth v. Darley*, at p. 803, "even a unanimous election by those who did attend would be void." B

It may be that there are some who would decry the importance which the courts attach to the observance of the rules of natural justice. "When something is obvious," they may say, "why force everybody to go through the tiresome waste of time involved in framing charges and giving an opportunity to be heard? The result is obvious from the start." Those who take this view do not, I think, do themselves justice. As everybody who has anything to do with the law well knows, the path of the law is strewn with examples of open and shut cases which, somehow, were not; of unanswerable charges which, in the event, were completely answered; of inexplicable conduct which was fully explained; of fixed and unalterable determinations that, by discussion, suffered a change. Nor are those with any knowledge of human nature who pause to think for a moment likely to underestimate the feelings of resentment of those who find that a decision against them has been made without their being afforded any opportunity to influence the course of events. C D E

Let me add this. What was done was, in my judgment, wrong; but there is nothing before me to suggest that it was consciously wrong. I do not for one moment say that the N.E.C. deliberately or knowingly resolved to ignore the rules of natural justice. There is no evidence before me on the point, but it may very well be that the thought never entered the minds of the members of that committee. I am content to assume that the process of "getting round all problems relating to expulsion" was not the object of the committee, but merely the contention of the advocate seeking, quite properly, to make the best that he could of what had been done. Nevertheless, however innocent the committee, what was done was wrong. It follows that, subject to any argument that there may be about the precise terms of the order, the plaintiffs are entitled to the injunctions sought by the notice of motion. F G

Before I turn to action No. 3, I ought to mention certain technical objections taken by Mr. Sparrow in action No. 2. He contended that on the writ and notice of motion as drafted it was not competent for the plaintiffs, being merely two of the members of the local Labour Party, to sue or move by themselves without joining all the members of the party on one side or the other. In view of what I have said earlier in this judgment, I do not think that is right: and Mr. Sparrow cited no authority to carry the point. No doubt, as in *Harrison v. Abergavenny (Marquis of)* (1887) 3 T.L.R. 324, it is possible for such an action to be brought in this way: and there H

1 Ch.

John V. Rees

Megarry J.

A are manifest advantages in proceedings which are so constituted that they will bind all concerned. But that does not mean that an action cannot be brought in the other way. Mr. Sparrow said that *Harington v. Sendall* [1903] 1 Ch. 921 ought to have been a representative action, and that it was not clear whether or not it had been. I have now looked at the reports of the case in the other series of reports (72 L.J.Ch. 396; 88 L.T. 323; 51 W.R. 463; and 19 T.L.R. 302), and I have found nothing to suggest that it was a representative action. Indeed, such indications as there are point to it not being such an action. What sufficed for Joyce J. and the distinguished counsel engaged in that case suffices for me. I hold the action and the motion to be perfectly competent.

C Mr. Sparrow also contended that as the plaintiffs had set up no constitution of the local Labour Party, and the proceedings concerned the constitution, the action failed; and if the local Labour Party lacked any known rules, the local Labour Party should be wound up, a receiver appointed, and the funds distributed as bona vacantia. I will say no more than that I reject these contentions, so far as they arise for decision on this motion. Furthermore, basing himself on *General Billposting Co. Ltd. v. Atkinson* [1909] A.C. 118, 122, Mr. Sparrow also contended that the plaintiffs had disentitled themselves to an injunction by acting in breach of their contract and seeking to defy the Labour Party. If this principle were to apply to cases of expulsion and suspension, it would mean that the very breach which gave rise to the expulsion or suspension might disable the member concerned from complaining of any lack of natural justice in the process: and that cannot be right. In any case, I do not think the mere failure to answer the national agent's letter can invoke the principle.

E Finally, there is action No. 3. This may briefly be described, in broad terms, as action No. 1 in reverse, and up-to-date. As I have already mentioned, the writ was issued on July 5, 1968, by which time all three meetings had taken place. The third meeting purported to be a meeting of P.D.L.P., attended by delegates from the Haverfordwest Local Labour Party elected at the second meeting, and by delegates from other local Labour Parties elected at meetings convened by the N.E.C. and elected in a similar manner. F The plaintiffs [Mr. Rees and Mr. Cleare] are two of the three defendants in action No. 1: and the defendant, Mr. John, is the plaintiff in action No. 1. The writ claims a declaration and an injunction which I need not read; and the notice of motion, given on the day the writ was issued, claims an injunction

G "to restrain the defendant in his purported capacity as an officer of the Pembrokeshire Constituency, until judgment in this action or further order (whether by himself his servants or agents or otherwise howsoever) from doing or purporting to do or being party to any of the following things namely collecting expending remitting transferring or otherwise dealing with any moneys or other property belonging to or held for the purpose of the Pembrokeshire Constituency Local Labour Party."

H The omission of "Labour Party" after the first mention of "Constituency," and the use of the word "Local" are, I think, mere slips.

Mr. Sparrow frankly accepted that the third meeting was bad if (as I

have already held) the second meeting was bad: and it follows that the acts of the third meeting were ineffective to elect officers of P.D.L.P. Those attending the third meeting purported to elect Mr. John president of P.D.L.P.; and it follows from the invalidity of that meeting that the election was void. I have already held that as a result of the first meeting, Mr. Cleare, who is the second defendant in the first action and the second plaintiff in the third, had become president of P.D.L.P. in place of Mr. John; and as it is not alleged that Mr. John holds any other office in P.D.L.P., it seems plain that Mr. John holds no office which would entitle him to deal with the property of P.D.L.P. Accordingly, subject to what I am about to say, the injunctions sought by the notice of motion in the third action, restraining him "in his purported capacity as an officer" of P.D.L.P. from dealing with that property, ought to be granted. I should add that Mr. Sparrow's contentions on procedural and other points meet the same fate here as in action No. 2.

Whether an injunction should in fact be granted is a matter for consideration. There is no suggestion of any wilful wrongdoing by the defendant. I am in the sphere of honest disagreement on matters which I readily confess I have not found altogether easy. I think, however, that there is an important difference between this case and the plaintiff's motion in action No. 1, where, it may be remembered, I refused to grant an injunction. There, I held that the defendants were validly in office, and I refused the injunction because I would not assume that in exercising their offices they would act in disregard of this judgment. Here, the defendant is not in office at all, and so has no title to the property of P.D.L.P. But if the defendant, who is a man of some standing in his community, offered an undertaking to the court in the terms of paragraph 1 of the notice of motion, then subject to anything that counsel have to say and to details of drafting, I would be disposed to accept it in lieu of any injunction.

That, I think, disposes of the motions, subject to the point that I have just mentioned. But I cannot part from the case without expressing my indebtedness to counsel for their careful and thorough submissions, and particularly for the way in which they performed the feat of segregating the issues and their submissions in what for all has been a prolonged *embarras de richesse*. Any clarity in this judgment is largely due to their efforts; and, let me add, if it is found to be prolix or obscure, most assuredly the fault is not theirs.

October 18, 1968.

*A. C. Sparrow Q.C.* The relief to be granted as the result of a judgment is always a matter for consideration; here it would be wrong to deny to the plaintiff in the first action the injunction which he seeks. The action was brought to restrain unconstitutional conduct by the defendants, who right up until judgment continued to maintain that their conduct was not unconstitutional.

*David Hirst Q.C.* This must be a matter for the Court of Appeal. Judgment has been given and the matter fully dealt with.

[MEGARRY J. *In re Harrison's Share Under a Settlement* [1955] Ch.

1 Ch.

John v. Rees

Megarry J.

A 260 shows that a judgment can be re-considered at any time before it has been entered.]

A. C. Sparrow Q.C. The defendants alleged that they were fully entitled to disaffiliate. There was no agreement between the parties to come to court to have an issue determined on the basis that there was a reasonable doubt about the issue. The defendants sought to have the plaintiff's writ struck out, and contended that it was a "bogus" proceeding. They were clearly wrongdoers, who were threatening to continue their wrongdoing. Their plan was to disaffiliate so that P.D.L.P. could continue to support Mr. Donnelly—a man who had been expelled from the Labour Party—as their candidate at the next election, in contravention of the Labour Party's rules. They knew that such a purpose was unlawful, as the court has held. They have issued new membership cards and reduced the subscription from 2s. 6d. to 1s. a year, and that affects the Labour Party's funds. The plaintiff in the first action is therefore entitled to the injunction he seeks in its full terms. See *Snell on Equity*, 26th ed. (1966), pp. 702, 703, and *Kerr on Injunctions*, 6th ed. (1927), pp. 16, 31 and 665. There is no reason why the defendants should be treated differently from ordinary litigants. There is nothing to show that they are more law abiding than the average litigant. The fact that they are officers of P.D.L.P. is nihil ad rem. See *Wolfe v. Mathews* (1882) 21 Ch.D. 194. If the defendants wish to offer undertakings in lieu of injunction, that is a matter for them. It would be contrary to precedent to refuse the plaintiff the injunction sought.

E A possible alternative would be to grant an interim declaration for which there is a precedent. [See *International General Electric Co. of New York Ltd. v. Commissioners of Customs and Excise* [1962] Ch. 784.]

F In the second and third actions the defendants did not, as the defendants to the first have done, set out on a course which they knew to be wrong, and their conduct is therefore more excusable. That is the only distinction. It is irrelevant that in the first action the defendants have been held to be "officers," whereas in the second they have not. The relevant question in each case is whether their conduct was unlawful.

G It has been overlooked that two of the defendants in the second action are in fact lawfully appointed officers, having been properly appointed at a previous lawful meeting of the Haverfordwest Local Labour Party in March 1968. If it be right to refuse an injunction in the first action, which is disputed, it would be equally right to refuse injunctions in the other two actions. In any case if an injunction is granted in the second action it should not operate against the two lawfully appointed officers.

H *David Hirst Q.C.* The defendants in the first action are not prepared to offer any undertakings. Yesterday a long reserved judgment was delivered, after much argument over many days, in the course of which every conceivable point had been canvassed. Of course the court has the power to review its decision at any time before the judgment is finally entered up, but *Harrison's case* [1955] Ch. 260 was the quite exceptional case where a House of Lords decision to a contrary effect had not been cited to the court. Here no new facts have been produced, but the court is asked to reconsider its considered judgment. The plaintiff in the first action could

406

Page ID #:2586

Megarry J.

John v. Rees

[1970]

only be entitled to an injunction if he established that the defendants mean to act unlawfully or unconstitutionally, with the party's funds. The question is not whether they are politically disloyal, but whether they intend to act unlawfully in regard to the Party's funds, and of that there is no evidence that they do so intend. The result of granting an injunction as sought would be to prevent lawfully elected officers from dealing lawfully with the Party's funds, and that just cannot be right.

In both the second and the third actions injunctions are necessary to restrain persons who are not officers of the respective parties, but who purport so to be, from dealing with the funds. It must be conceded that the first and fifth defendants in the second action (Mr. Davis and Mrs. James) were lawfully appointed at the meeting in March 1968, and therefore that the injunction should not operate against them. In the third action, however, it has been held that Mr. John was not validly in office and therefore the injunction against him should be granted.

*A. C. Sparrow Q.C.* in reply. The substantive and adjectival parts of a judgment are frequently dealt with separately. It is only the latter part, relating to questions of relief, which the court is asked to reconsider. If an appeal were contemplated the Court of Appeal would want to know whether the matters complained of had been raised before the judge of first instance. The defendants to the first action have acted unconstitutionally with regard to subscriptions to the Labour Party. They plan to divert P.D.L.P. onto a course of unconstitutional action in support of Mr. Donnelly, in his unconstitutional action. There is, therefore, a clear threat to the Labour Party's funds, and a total injunction should be granted because there is no practical method of drawing a line of distinction between conduct which is constitutional and that which is not.

MEGARRY J.: Mr. Sparrow has addressed me at some length this morning, mainly on action No. 1, but also on Nos. 2 and 3. His principal contention is that in action No. 1 I ought to grant an injunction in the terms of the notice of motion unless the defendants offer an undertaking either in the terms of the notice of motion, or else in a more limited form, restraining what, for brevity, may be termed unconstitutional dealings with the assets of P.D.L.P. He made it perfectly plain, however, that he was not seeking any injunction in a limited form: indeed, he proclaimed his inability to frame such an injunction. The only injunction he sought was in the form of the notice of motion.

Mr. Hirst declined to proffer any undertaking, and so the only question is whether or not an injunction in the terms of the notice of motion should be granted. Such an injunction would restrain the lawfully elected officers of P.D.L.P. from dealing in any way, lawful or unlawful, with the assets of P.D.L.P. The choice therefore lies between leaving them unrestrained, but liable to account in due course for any unlawful action, or else totally restraining them from even entirely lawful and proper dealings. Mr. Sparrow referred at length both to the evidence and to authorities, but he said nothing which makes me resile from what I said in my judgment; and in deciding whether to grant or refuse an interim injunction in these terms, the balance of advantage and convenience still seems to me to lie with refusing it. I do not think that it would be right to make it impossible

1 Ch.

John v. Rees

Megarry J.

A for the proper officers of P.D.L.P. to deal properly and lawfully with the assets of P.D.L.P. Accordingly, the injunction prayed must be refused. I should mention that at the end of his contentions today Mr. Sparrow did add a somewhat muted submission that under the prayer for further or other relief I could instead grant a limited injunction: but as he again made no suggestion as to the terms of such an injunction, and again asserted his inability to frame it, I do not think that it is for me to do what he cannot.

B As regards actions Nos. 2 and 3, Mr. Sparrow says that these should march with No. 1: there should either be injunctions in all three cases, or undertakings in all three, or nothing in all three. He contended that the distinction made in my judgment between those who were and those who were not officers of the party had no validity: but I disagree. In action No. 1, where no undertakings were offered, I have held that no  
C injunction should be granted in the terms sought. In actions Nos. 2 and 3, Mr. Sparrow offers undertakings in lieu of injunctions, and Mr. Hirst is content to accept these. It seems to me to be entirely proper that undertakings should be given, and on the footing that the undertakings will be substantially in terms of the notices of motion, no injunction will be granted. However, as Mr. Sparrow helpfully pointed out (and Mr.  
D Hirst accepted) the first and the fifth defendants in action No. 2 should be excluded from these undertakings, as on any footing they are still officers and delegates of the Haverfordwest Local Labour Party.

E *Both motions in the first action dismissed; undertakings by the second, third and fourth defendants in the second action and by the defendant in the third action in the terms of the injunctions sought by the notices of motion in those actions having been offered and accepted, no orders for injunctions in those actions.*

[COURT OF APPEAL]

REGINA v. GHOSH

1982 March 15;  
April 5

Lord Lane C.J., Lloyd and  
Eastham JJ.

*Crime—Theft—Obtaining property by deception—Surgeon falsely claiming fees for surgical operations—Belief that consultancy fees due—Whether acting "dishonestly"—Whether test subjective—Theft Act 1968 (c. 60), ss. 1 (1), 15 (1), 22 (2)*

The appellant, while a surgeon acting as a locum tenens consultant at a hospital, claimed fees for carrying out operations or fees payable for an anaesthetist in circumstances where either another surgeon had performed the operation or the operation had been carried out under the National Health Service. He was tried on an indictment containing one count alleging that he had attempted to procure the execution of a

valuable security by deception, contrary to section 20 (2) of the Theft Act 1968, and three counts alleging that he had obtained or attempted to obtain money by deception, contrary to section 15 (1) of the Act. The appellant denied that he had been dishonest and stated that the sums were legitimately payable to him for consultation fees. The judge directed the jury that it was for them to decide whether the appellant had been dishonest by applying contemporary standards of honesty and dishonesty in the context of all that they had heard in the case. The jury found the appellant guilty on all four counts.

On appeal against conviction: —

*Held*, dismissing the appeal, that “dishonestly” in section 1 of the Theft Act 1968 described the state of mind and not the conduct of the person accused and, therefore, the test of dishonesty was subjective but the standard of honesty to be applied was the standard of reasonable and honest men and not that of the accused; that, accordingly, the jury, in determining whether the appellant had acted dishonestly for the purposes of sections 15 (1) and 20 (2) of the Act, should have first considered whether the appellant had acted dishonestly by the standards of ordinary and honest people and, if they found that he had, then they had to consider whether the appellant himself must have realised that what he was doing was by those standards dishonest; and that, since on the jury’s finding they would have convicted the appellant on such a direction, it was a proper case for applying the proviso to section 2 (1) of the Criminal Appeal Act 1968 (post, pp. 1063E–F, H—1064B, D–E, H—1065B).

Dictum in *Reg. v. McIvor* [1982] 1 W.L.R. 409, 415, C.A. disapproved.

*Reg. v. Scott* [1975] A.C. 819, H.L.(E.) and *Reg. v. Landy* [1981] 1 W.L.R. 355, C.A. considered.

*Reg. v. Feely* [1973] Q.B. 530, C.A. explained.

The following cases are referred to in the judgment:

*Reg. v. Waterfall* [1970] 1 Q.B. 148; [1969] 3 W.L.R. 947; [1969] 3 All E.R. 1048, C.A.

No additional cases were cited in argument.

APPEAL against conviction.

The appellant, Deb Baran Ghosh, was at all material times a surgeon acting as a locum tenens consultant at a hospital. On April 29, 1981, the appellant was convicted at St. Albans Crown Court (Judge Anwyl-Davies Q.C.) of attempting to procure the execution of a valuable security by

1 Q.B.

Reg. v. Ghosh (C.A.)

A deception contrary to section 20 (2) of the Theft Act 1968, attempting to obtain property by deception, and two counts of obtaining property by deception contrary to section 15 (1) of the Theft Act 1968. The appellant was fined a total of £1,000, with three months' imprisonment in default of payment. He appealed against conviction on the ground, inter alia, that the judge erred in directing the jury as to the test of dishonesty.

The facts are stated in the judgment of the court.

B

*Robert Francis* for the appellant. The judge in the court below had failed to direct the jury that under section 15 (4) of the Theft Act 1968 deception should be intentional or reckless. If there is an implied representation the jury must be directed as to the need for intention. On the facts of count one of the present case, the appellant had simply said that there had been complications and that was a possible unintentional misrepresentation.

C

The issue of whether he had intended to misrepresent the position was one for the jury. The jury must decide the defendant's state of mind as to intent. The judge had not asked the jury to see whether the misrepresentation was an intentional one. The judge gave dangerous examples of what the jury might consider dishonesty to be. He failed to direct that dishonesty was a matter of the mind of the defendant.

D

Juries ought to be directed that they should only convict of an offence of dishonesty if they are convinced the defendant believed he was acting dishonestly, or that they must look at the defendant's state of mind, and apply their own standards to the situation. One of these directions ought to have been given. The totally subjective approach has been criticised. But if the test is whether the defendant knew society at large would believe he was acting dishonestly then difficulties can be overcome.

E

The objective test means that if the defendant has a state of mind which would be seen by society as dishonest then dishonesty is made out, regardless of the defendant's state of mind. *Reg. v. Landy* [1981] 1 W.L.R. 355, illustrates the subjective approach. That case was distinguished in *Reg. v. McIvor* [1982] 1 W.L.R. 409. *Boggeln v. Williams* [1978] 1 W.L.R. 873 sets out the subjective test of dishonesty at p. 740. *Reg. v. Landy* [1981] 1 W.L.R. 355 illustrates that dishonesty

F

is an element of conspiracy to defraud.

*Reg. v. Landy* cannot be distinguished simply because it does not deal with the substantive offence. *Reg. v. McIvor* [1982] 1 W.L.R. 409 must be distinguished, because it deals with section 1 of the Theft Act 1968, or it must be overruled as wrong. The term "dishonestly" is one which relates to the mind of the defendant, and judges ought not to define the term for jurors: see *Reg. v. Feely* [1973] Q.B. 530, which does not deal with whether the jury must simply look at the defendant and decide whether he was dishonest. *Reg. v. Feely* is not inconsistent with the submission that the prosecution must prove that the defendant believed he was acting dishonestly. One point of having a reference to dishonesty in section 15 is that there may be obtainings which are honest. It is proper

G

to direct a jury that the test of dishonesty is subjective: see *Reg. v. Waterfall* [1970] 1 Q.B. 148. This case deals with the honesty of the representation, not the obtaining. A jury should be told that in determining whether there had been dishonesty, they should determine whether the

H

1056

Reg. v. Ghosh (C.A.)

[1982]

defendant had an honest belief: see *Reg. v. Royle* [1971] 1 W.L.R. 1764. *Reg. v. Landy* [1981] 1 W.L.R. 355 should be applied.

A

*John Drinkwater Q.C.* and *Anthony Glass* for the Crown. *Reg. v. Greenstein* [1975] 1 W.L.R. 1353 relates to an offence of obtaining by deception. Two tests of dishonesty were set out in that case, first, that of dishonesty as a yardstick (the objective test); and secondly the test of belief in the truth of the representation, namely the subjective test. The objective approach must be applied as a first step. All the circumstances must be looked at and it must be asked whether there is the smack of dishonesty. If the answer is yes, one must go on to see what the defendant's state of mind really was. One must look at the general and then go on to the particular. The state of the defendant's mind is a factor to be weighed. *Reg. v. Feely* [1973] Q.B. 530 and *Reg. v. Landy* [1981] 1 W.L.R. 355 both applied the yardstick test.

B

In cases of conspiracy to defraud, the test of dishonesty must be subjective, but there can be an objective element, namely, the jury looking at general standards of honesty.

C

*Francis* in reply. A subjective element is imported into the test of dishonesty: see *Reg. v. Gilks* [1972] 1 W.L.R. 1341. One can use objective indicators to discover a subjective state of mind. The defendant must be judged by what he understands the public's mores to be.

D

*Cur. adv. vult.*

April 5. LORD LANE C.J. read the following judgment of the court. On April 29, 1981, before the Crown Court at St. Albans, this appellant was convicted on four counts of an indictment laid under the Theft Act 1968: on count 1, attempting to procure the execution of a cheque by deception; on count 2, attempting to obtain money by deception; on counts 3 and 4, obtaining money by deception. Count 1 was laid under section 20 (2) and the remainder under section 15 (1). He was fined the sum of £250 on each count with a term of imprisonment to be served in default of payment.

E

At all material times the appellant was a surgeon acting as a locum tenens consultant at a hospital. The charges alleged that he had falsely represented that he had himself carried out a surgical operation to terminate pregnancy or that money was due to himself or an anaesthetist for such an operation, when in fact the operation had been carried out by someone else, and/or under the National Health Service provisions.

F

His defence was that there was no deception; that the sums paid to him were due for consultation fees which were legitimately payable under the regulations, or else were the balance of fees properly payable; in other words that there was nothing dishonest about his behaviour on any of the counts.

G

The effect of the jury's verdict was as follows: as to count 1, that the appellant had falsely represented that he had carried out a surgical operation and had intended dishonestly to obtain money thereby; that as to count 2 he had falsely pretended that an operation had been carried out under the National Health Service; that as to count 3 he had falsely

H

1 Q.B.

Reg. v. Ghosh (C.A.)

A pretended that money was due to an anaesthetist; and as to count 4 that he had obtained money by falsely pretending that an operation had been carried out on a fee-paying basis when in fact it had been conducted under the terms of the National Health Service.

The grounds of appeal are simply that the judge misdirected the jury as to the meaning of dishonesty. What the judge had to say on that topic was as follows:

B "Now, finally dishonesty. There are, sad to say, infinite categories of dishonesty. It is for you. Jurors in the past and, whilst we have criminal law in the future, jurors in the future have to set the standards of honesty. Now it is your turn today, having heard what you have, to consider contemporary standards of honesty and dishonesty in the context of all that you have heard. I cannot really expand on this too much, but probably it is something rather like getting something for nothing, sharp practice, manipulating systems and many other matters which come to your mind."

C

The law on this branch of the Theft Act 1968 is in a complicated state and we embark upon an examination of the authorities with great diffidence. When *Reg. v. McIvor* [1982] 1 W.L.R. 409 came before the Court of Appeal, there were two conflicting lines of authority. On the one hand there were cases which decided that the test of dishonesty for the purposes of the Theft Act 1968 is, what we venture to call, subjective—that is to say the jury should be directed to look into the mind of the defendant and determine whether he knew he was acting dishonestly: see *Reg. v. Landy* [1981] 1 W.L.R. 355, where Lawton L.J. giving the reserved judgment of the Court of Appeal said, at p. 365:

D

E

"An assertion by a defendant that throughout a transaction he acted honestly does not have to be accepted but has to be weighed like any other piece of evidence. If that was the defendant's state of mind, or may have been, he is entitled to be acquitted. But if the jury, applying their own notions of what is honest and what is not, conclude that he could not have believed that he was acting honestly, then the element of dishonesty will have been established. What a jury must not do is to say to themselves: 'If we had been in his place we would have known we were acting dishonestly so he must have known he was'."

F

On the other hand there were cases which decided that the test of dishonesty is objective. Thus in *Reg. v. Greenstein* [1975] 1 W.L.R. 1353, the judge had directed the jury, see p. 1359:

G

"... there is nothing illegal in tagging. The question you have to decide and what this case is all about is whether these defendants, or either of them, carried out their tagging operations in a dishonest way. To that question you apply your own standards of dishonesty. It is no good, you see, applying the standards of anyone accused of dishonesty otherwise everybody accused of dishonesty, if he were to be tested by his own standards, would be acquitted automatically, you may think. The question is essentially the one for a jury to decide

H

and it is essentially one which the jury must decide by applying its own standards.” A

The Court of Appeal, in a reserved judgment, approved that direction.

In *Reg. v. McIvor* [1982] 1 W.L.R. 409 the Court of Appeal sought to reconcile these conflicting lines of authority. They did so on the basis that the subjective test is appropriate where the charge is conspiracy to defraud, but in the case of theft the test should be objective. We quote the relevant passage in full, at p. 417: B

“It seems elementary, first, that where the charge is conspiracy to defraud the prosecution must prove actual dishonesty in the minds of the defendants in relation to the agreement concerned, and, secondly, that where the charge is an offence contrary to section 15 of the Theft Act 1968 the prosecution must prove that the defendant knew or was reckless regarding the representation concerned. The passage in my judgment in *Reg. v. Landy* [1981] 1 W.L.R. 355 to which we have referred should be read in relation to charges of conspiracy to defraud, and not in relation to charges of theft contrary to section 1 of the Theft Act 1968. Theft is in a different category from conspiracy to defraud, so that dishonesty can be established independently of the knowledge or belief of the defendant, subject to the special cases provided for in section 2 of the Act. Nevertheless, where a defendant has given evidence of his state of mind at the time of the alleged offence, the jury should be told to give that evidence such weight as they consider right, and they may also be directed that they should apply their own standards to the meaning of dishonesty.” C D

The question we have to decide in the present case is, first, whether the distinction suggested in *Reg. v. McIvor* is justifiable in theory, and secondly, whether it is workable in practice. E

In *Reg. v. Scott* [1975] A.C. 819, the House of Lords had to consider whether deceit is a necessary element in the common law crime of conspiracy to defraud. They held that it is not. It is sufficient for the Crown to prove dishonesty. In the course of his speech Viscount Dilhorne traced the meaning of the words “fraud,” “fraudulently” and “defraud” in relation to simple larceny, as well as the common law offence of conspiracy to defraud. After referring to *Stephen, History of the Criminal Law of England* and *East’s Pleas of the Crown*, he continued, at pp. 836–837: F

“The Criminal Law Revision Committee in their Eighth Report on ‘Theft and Related Offences’ (1966) (Cmd. 2977) in paragraph 33 expressed the view that the important element of larceny, embezzlement and fraudulent conversion was ‘undoubtedly the dishonest appropriation of another person’s property’; in paragraph 35 that the words ‘dishonestly appropriates’ meant the same as ‘fraudulently converts to his own use or benefit, or the use or benefit of any other person,’ and in paragraph 39 that ‘dishonestly’ seemed to them a better word than ‘fraudulently.’” G

“Parliament endorsed these views in the Theft Act 1968, which by section 1 (1) defined theft as the dishonest appropriation of property belonging to another with the intention of permanently depriving H

1 Q.B.

Reg. v. Ghosh (C.A.)

A the other of it. Section 17 of that Act replaces sections 82 and 83 of the Larceny Act 1861 and the Falsification of Accounts Act 1875. The offences created by those sections and by that Act made it necessary to prove that there had been an 'intent to defraud.' Section 17 of the Theft Act 1968 substitutes the words 'dishonestly with a view to gain for himself or another or with intent to cause loss to another' for the words 'intent to defraud.'

B "If 'fraudulently' in relation to larceny meant 'dishonestly' and 'intent to defraud' in relation to falsification of accounts is equivalent to the words now contained in section 17 of the Theft Act 1968 which I have quoted, it would indeed be odd if 'defraud' in the phrase 'conspiracy to defraud' has a different meaning and means only a conspiracy which is to be carried out by deceit."

C Later on in the same speech Viscount Dilhorne continued, at p. 839:

"As I have said, words take colour from the context in which they are used, but the words 'fraudulently' and 'defraud' must ordinarily have a very similar meaning. If, as I think, and as the Criminal Law Revision Committee appears to have thought, 'fraudulently' means 'dishonestly,' then 'to defraud' ordinarily means, in my opinion, to deprive a person dishonestly of something which is his or of something to which he is or would or might but for the perpetration of the fraud be entitled."

E In *Reg. v. Scott* the House of Lords were only concerned with the question whether deceit is an essential ingredient in cases of conspiracy to defraud; and they held not. As Lord Diplock said, at p. 841B, "Dishonesty of any kind is enough." But there is nothing in *Reg. v. Scott* which supports the view that, so far as the element of dishonesty is concerned, "theft is in a different category from conspiracy to defraud." On the contrary the analogy drawn by Viscount Dilhorne between the two offences, and indeed the whole tenor of his speech, suggests the precise opposite.

F Nor is there anything in *Reg. v. Landy* [1981] 1 W.L.R. 355 itself which justifies putting theft and conspiracy to defraud into different categories. Indeed the court went out of its way to stress that the test for dishonesty, whatever it might be, should be the same whether the offence charged be theft or conspiracy to defraud. This is clear from the reference to *Reg. v. Feely* [1973] Q.B. 530, which was a case under section 1 of the Theft Act 1968. Having set out what we have for convenience called the subjective test, the court in *Reg. v. Landy* [1981] 1 W.L.R. 355, 365, continue:

"In our judgment this is the way *Reg. v. Feely* [1973] Q.B. 530 should be applied in cases where the issue of dishonesty arises. It is also the way in which the jury should have been directed in this case . . ."

H In support of the distinction it is said that in conspiracy to defraud the question arises in relation to an agreement. But we cannot see that this makes any difference. If A and B agree to deprive a person

dishonestly of his goods, they are guilty of conspiracy to defraud: see *Reg. v. Scott* [1975] A.C. 819. If they dishonestly and with the necessary intent deprive him of his goods, they are presumably guilty of theft. Why, one asks respectfully, should the test be objective in the case of simple theft, but subjective where they have agreed to commit a theft?

The difficulties do not stop there. The court in *Reg. v. McIvor* [1982] 1 W.L.R. 409 evidently regarded cases under section 15 of the Theft Act 1968 as being on the subjective side of the line, at any rate so far as proof of deception is concerned. This was the way they sought to explain *Reg. v. Greenstein* [1975] 1 W.L.R. 1353. In that case, after directing the jury in the passage which we have already quoted, the judge continued, at p. 1360:

“Now, in considering whether [the defendants] Green or Greenstein had or may have had an honest belief in the truth of their representations . . . the test is a subjective one. That is to say, it is not what you would have believed in similar circumstances. It is what you think they believed and if you think that they, or either of them, had an honest belief to that effect, well then, of course, there would not be any dishonesty. On the other hand, if there is an absence of reasonable grounds for so believing, you might think that that points to the conclusion that they or either of them, as the case may be, had no genuine belief in the truth of their representations. In which case, applying your own standards, you may think that they acted dishonestly and it would be for you to say whether it has been established by the prosecution that they had no such honest belief . . .”

The Court of Appeal in *Reg. v. Greenstein* appear to have approved that passage. At any rate they expressed no disapproval. In *Reg. v. McIvor* [1982] 1 W.L.R. 409 the court reconciled the two passages quoted from the judge's summing up as follows, at p. 415:

“It seems clear that those two passages are concerned with different points. The first, which follows and adopts the standards laid down in *Reg. v. Feely* [1973] Q.B. 530, is concerned with the element of dishonesty in section 15 offences. While the second is specifically concerned with the mental element in relation to the false representation the subject matter of the charge. Clearly, if a defendant honestly believes that the representation made was true the prosecution cannot prove that he knew of, or was reckless as to, its falsity.”

The difficulty with section 15 of the Theft Act 1968 is that dishonesty comes in twice. If a person knows that he is not telling the truth he is guilty of dishonesty. Indeed deliberate deception is one of the two most obvious forms of dishonesty. One wonders therefore whether “dishonestly” in section 15 (1) adds anything, except in the case of reckless deception. But assuming it does, there are two consequences of the distinction drawn in *Reg. v. McIvor*. In the first place it would mean that the legislation has gone further than its framers intended. For it is clear from paragraphs 87–88 of the Criminal Law Revision Committee's Eighth Report that “deception” was to replace “false pretence” in the old section 32 (1) of the Larceny Act 1916, and “dishonestly” was to replace “with intent to defraud.” If the test of dishonesty in conspiracy to defraud

1 Q.B.

Reg. v. Ghosh (C.A.)

A cases is subjective, it is difficult to see how it could have been anything other than subjective in considering “intent to defraud.” It follows that, if the distinction drawn in *Reg. v. McIvor* is correct, the Criminal Law Revision Committee were recommending an important change in the law by substituting “dishonestly” for “with intent to defraud”; for they were implicitly substituting an objective for a subjective test.

B The second consequence is that in cases of deliberate deception the jury will have to be given two different tests of dishonesty to apply: the subjective test in relation to deception and the objective test in relation to obtaining. This is indeed what seems to have happened in *Reg. v. Greenstein* [1975] 1 W.L.R. 1353. We cannot regard this as satisfactory from a practical point of view. If it be sought to obviate the difficulty by making the test subjective in relation to both aspects of section 15, but  
C objective in relation to section 1, then that would certainly be contrary to what was intended by the Criminal Law Revision Committee. For in paragraph 88 they say:

D “The provision in clause 12 (1) making a person guilty of criminal deception if he ‘dishonestly obtains’ the property replaces the provision in 1916, section 32 (1) making a person guilty of obtaining by false pretences if he ‘with intent to defraud, obtains’ the things there mentioned. The change will correspond to the change from ‘fraudulently’ to ‘dishonestly’ in the definition of stealing [contained in section 1].”

E We feel, with the greatest respect, that in seeking to reconcile the two lines of authority in the way we have mentioned, the Court of Appeal in *Reg. v. McIvor* was seeking to reconcile the irreconcilable. It therefore falls to us now either to choose between the two lines of authority or to propose some other solution.

F In the current supplement to *Archbold Criminal Pleading Evidence & Practice*, 40th ed. (1979), paragraph 1460, the editors suggest that the observations on dishonesty by the Court of Appeal in *Reg. v. Landy* can be disregarded “in view of the wealth of authority to the contrary.” The matter, we feel, is not as simple as that.

In *Reg. v. Waterfall* [1970] 1 Q.B. 148, the defendant was charged under section 16 of the Theft Act 1968 with dishonestly obtaining a pecuniary advantage from a taxi driver. Lord Parker C.J., giving the judgment of the Court of Appeal, said, at pp. 150–151:

G “The sole question as it seems to me in this case revolves round the third ingredient, namely, whether what was done was done dishonestly. In regard to that the deputy recorder directed the jury in this way: ‘If on reflection and deliberation you came to the conclusion that this defendant never did have any genuine belief that Mr. Tropp [the accountant] would pay the taxi fare, then you would be entitled to convict him. . . .’ In other words, in that passage the deputy recorder is telling the jury they had to consider what was in this  
H particular defendant’s mind: had he a genuine belief that the accountant would provide the money? That, as it seems to this court, is a perfectly proper direction subject to this, that it would be right to

tell the jury that they can use as a test, though not a conclusive test, whether there were any reasonable grounds for that belief. Unfortunately, however, just before the jury retired, in two passages the deputy recorder, as it seems to this court, was saying: you cannot hold that this man had a genuine belief unless he had reasonable grounds for that belief.” A

Lord Parker then sets out the passages in question and continues, at p. 151 : B

“ the court is quite satisfied that those directions cannot be justified. The test here is a subjective test, whether the particular man had an honest belief, and of course whereas the absence of reasonable ground may point strongly to the fact that that belief is not genuine, it is at the end of the day for the jury to say whether or not in the case of this particular man he did have that genuine belief.” C

That decision was criticised by academic writers. But it was followed shortly afterwards in *Reg. v. Royle* [1971] 1 W.L.R. 1764, another case under section 16 of the Theft Act 1968. Edmund Davies L.J., giving the judgment of the court, said, at p. 1769 : D

“ The charges being that debts had been dishonestly ‘ evaded ’ by deception, contrary to section 16 (2) (a), it was incumbent on the commissioner to direct the jury on the fundamental ingredient of dishonesty. In accordance with *Reg. v. Waterfall* [1970] 1 Q.B. 148, they should have been told that the test is whether the accused had an honest belief and that, whereas the absence of reasonable ground might point strongly to the conclusion that he entertained no genuine belief in the truth of his representation, it was for them to say whether or not it had been established that the appellant had no such genuine belief.” E

It is to be noted that the court in that case treated the “ fundamental ingredient of dishonesty ” as being the same as whether the defendant had a genuine belief in the truth of the representation.

In *Reg. v. Gilks* [1972] 1 W.L.R. 1341, which was decided by the Court of Appeal the following year, the appellant had been convicted of theft contrary to section 1 of the Theft Act 1968. The facts were that he had been overpaid by a bookmaker. He knew that the bookmaker had made a mistake, and that he was not entitled to the money. But he kept it. The case for the defence was that “ bookmakers are a race apart.” It would be dishonest if your grocer gave you too much change and you kept it, knowing that he had made a mistake. But it was not dishonest in the case of a bookmaker. The judge directed the jury, at p. 1345 : F G

“ Well, it is a matter for you to consider, members of the jury, but try and place yourselves in that man’s position at that time and answer the question whether in your view he thought he was acting honestly or dishonestly.” H

Cairns L.J. giving the judgment of the Court of Appeal held that that was, in the circumstances of the case, a proper and sufficient direction on the matter of dishonesty. He continued, at p. 1345:

1 Q.B.

Reg. v. Ghosh (C.A.)

A “On the face of it the defendant’s conduct was dishonest: the only possible basis on which the jury could find that the prosecution had not established dishonesty would be if they thought it possible that the defendant did have the belief which he claimed to have.”

B A little later *Reg. v. Feely* [1973] Q.B. 530 came before a court of five judges. The case is often treated as having laid down an objective test of dishonesty for the purpose of section 1 of the Theft Act 1968. But what it actually decided was (i) that it is for the jury to determine whether the defendant acted dishonestly and not for the judge, (ii) that the word “dishonestly” can only relate to the defendant’s own state of mind, and (iii) that it is unnecessary and undesirable for judges to define what is meant by “dishonestly.”

C It is true that the court said, at pp. 537–538:

“Jurors, when deciding whether an appropriation was dishonest, can be reasonably expected to, and should, apply the current standards of ordinary decent people.”

It is that sentence which is usually taken as laying down the objective test. But the passage goes on:

D “In their own lives they have to decide what is and what is not dishonest. We can see no reason why, when in a jury box, they should require the help of a judge to tell them what amounts to dishonesty.”

E The sentence requiring the jury to apply current standards leads up to the prohibition on judges from applying *their* standards. That is the context in which the sentence appears. It seems to be reading too much into that sentence to treat it as authority for the view that “dishonesty can be established independently of the knowledge or belief of the defendant.” If it could, then any reference to the state of mind of the defendant would be beside the point.

F This brings us to the heart of the problem. Is “dishonestly” in section 1 of the Theft Act 1968 intended to characterise a course of conduct? Or is it intended to describe a state of mind? If the former, then we can well understand that it could be established independently of the knowledge or belief of the accused. But if, as we think, it is the latter, then the knowledge and belief of the accused are at the root of the problem.

G Take for example a man who comes from a country where public transport is free. On his first day here he travels on a bus. He gets off without paying. He never had any intention of paying. His mind is clearly honest; but his conduct, judged objectively by what he has done, is dishonest. It seems to us that in using the word “dishonestly” in the Theft Act 1968, Parliament cannot have intended to catch dishonest conduct in that sense, that is to say conduct to which no moral obloquy could possibly attach. This is sufficiently established by the partial definition in section 2 of the Theft Act itself. All the matters covered by section 2 (1) relate to the belief of the accused. Section 2 (2) relates to his willingness to pay. A man’s belief and his willingness to pay are things which can only be established subjectively. It is difficult to see how a partially subjective definition can

H

1064

Reg. v. Ghosh (C.A.)

[1982]

be made to work in harness with the test which in all other respects is wholly objective. A

If we are right that dishonesty is something in the mind of the accused (what Professor Glanville Williams calls "a special mental state"), then if the mind of the accused is honest, it cannot be deemed dishonest merely because members of the jury would have regarded it as dishonest to embark on that course of conduct.

So we would reject the simple uncomplicated approach that the test is purely objective, however attractive from the practical point of view that solution may be. B

There remains the objection that to adopt a subjective test is to abandon all standards but that of the accused himself, and to bring about a state of affairs in which "Robin Hood would be no robber": *Reg. v. Greenstein* [1975] 1 W.L.R. 1353. This objection misunderstands the nature of the subjective test. It is no defence for a man to say "I knew that what I was doing is generally regarded as dishonest; but I do not regard it as dishonest myself. Therefore I am not guilty." What he is however entitled to say is "I did not know that anybody would regard what I was doing as dishonest." He may not be believed; just as he may not be believed if he sets up "a claim of right" under section 2 (1) of the Theft Act 1968, or asserts that he believed in the truth of a misrepresentation under section 15 of the Act of 1968. But if he is believed, or raises a real doubt about the matter, the jury cannot be sure that he was dishonest. C D

In determining whether the prosecution has proved that the defendant was acting dishonestly, a jury must first of all decide whether according to the ordinary standards of reasonable and honest people what was done was dishonest. If it was not dishonest by those standards, that is the end of the matter and the prosecution fails. E

If it was dishonest by those standards, then the jury must consider whether the defendant himself must have realised that what he was doing was by those standards dishonest. In most cases, where the actions are obviously dishonest by ordinary standards, there will be no doubt about it. It will be obvious that the defendant himself knew that he was acting dishonestly. It is dishonest for a defendant to act in a way which he knows ordinary people consider to be dishonest, even if he asserts or genuinely believes that he is morally justified in acting as he did. For example, Robin Hood or those ardent anti-vivisectionists who remove animals from vivisection laboratories are acting dishonestly, even though they may consider themselves to be morally justified in doing what they do, because they know that ordinary people would consider these actions to be dishonest. F G

Cases which might be described as borderline, such as *Boggeln v. Williams* [1978] 1 W.L.R. 873, will depend upon the view taken by the jury as to whether the defendant may have believed what he was doing was in accordance with the ordinary man's idea of honesty. A jury might have come to the conclusion that the defendant in that case was disobedient or impudent, but not dishonest in what he did. H

So far as the present case is concerned, it seems to us that once the jury had rejected the defendant's account in respect of each count in the

1 Q.B.

Reg. v. Ghosh (C.A.)

A indictment (as they plainly did), the finding of dishonesty was inevitable, whichever of the tests of dishonesty was applied. If the judge had asked the jury to determine whether the defendant might have believed that what he did was in accordance with the ordinary man's idea of honesty, there could have only been one answer—and that is no, once the jury had rejected the defendant's explanation of what happened.

B In so far as there was a misdirection on the meaning of dishonesty, it is plainly a case for the application of the proviso to section 2 (1) of the Criminal Appeal Act 1968.

this Judgment and that copies of this version as handed down may be treated as authentic.

.....

MR JUSTICE LINDSAY

**Mr Justice Lindsay :**

**A. Introduction**

1. The infrastructure of our railways is now owned by Network Rail Ltd., a company limited by guarantee (a "CLG"), formed, after a good deal of thought, in a shape and with a membership determined by the government. It was not always so; the infrastructure had immediately previously been owned by Railtrack plc ("Railtrack") a wholly owned subsidiary of Railtrack Group plc ("Group"), a company at the relevant time listed on the London Stock Exchange. In this action some 48,105 individuals, all shareholders in or representatives of shareholders in Group as at 7<sup>th</sup> October 2001, raise two types of claims broadly connected with that movement of assets and business away from Railtrack.
2. The first of the claims is in tort. The tort alleged is that of misfeasance in public office. The claim is that the Secretary of State for Transport, Local Government and the Regions at the time, the Rt. Hon. Mr Stephen Byers M.P., acted with what is called "targeted malice" against the shareholders in Group, including the Claimants. I shall return to the subject of "targeted malice". It is a serious form of dishonesty for a public officer, such as Mr Byers then was, to act with such malice. It is a form of abuse of office. If Mr Byers did so act (and he denies that he did) then it is accepted by the Defendants, the present Secretary of State for Transport and the Department of Transport, that they will be accountable on his behalf. I shall use the term "the Department" to cover whichever of the earlier DTLR or the later DoT is appropriate.

No one but Mr Byers is accused of the misfeasance alleged. This claim in tort thus needs to be chiefly concerned with *why* Mr Byers acted as he did, with particular regard to his state of mind in that regard between July 2001 and 7<sup>th</sup> October 2001 when Railtrack was, by Order of the Court, put into administration.

3. The second head of claim is very different. It derives from the Human Rights Act 1998. Under that Act (the "HRA"), in conjunction with the European Convention on Human Rights, persons are entitled to peaceful enjoyment of their possessions. Under this head of claim the Claimants say that peaceful enjoyment of their shares in Group was, without due compensation, denied them by the government. The chief concern here has been whether the Claimants have the proper status to mount this type of claim.

**B. The Scheme of this Judgment**

4. I shall begin with a general section, which will include a setting of the scene for both the tort and HRA claims. I shall, within that heading, comment on such witnesses as I can without having to descend into detail, leaving others to later.

5. I shall then turn to the claim in tort, first going to the law on misfeasance in public office and I shall follow that with what I fear will be a very lengthy section representing a detailed chronology from even before the Hatfield rail-crash in October 2001 down to the launch of these proceedings in 2003. It is the Claimants' case, ably presented by Mr Rowley Q.C. and Mr West, that one can *infer* from the events in the chronology, properly examined, that Mr Byers did act with targeted malice against the shareholders in Group.

Mr Sumption Q.C. and Mr Saini, who appear for the Defendants, say that Mr Rowley's careful analysis of the unfolding chronology (with which, in any event, they disagree) all goes to the irrelevant question (they say) of *when* Mr Byers acted as he did rather than *why*. There is a good deal of force in that objection but Mr Rowley says in answer that a detailed look at the chronology will disclose firstly, as he puts it, that Mr Byers had something to hide and, secondly, that what it was that he was hiding can be inferred to be the very targeted malice which Mr Rowley accepts he has to prove. Out of respect for Mr Rowley's and Mr West's argument, based on an exemplary command of the massive paperwork (a command all the more praiseworthy given that they were not the original pleaders of the Claimants' case but came in to the matter relatively late) and out of respect also for the huge number of individual Claimants wanting to see how their claim has fared, I see no alternative but to go through the chronology at length, though I fear it will prove a wearisome read for many. Even at such length I shall leave out many meetings and papers but will attempt to cover the more relevant or disputed ones.

6. After the chronology I shall comment on the evidence of such witnesses a review of whose evidence I had earlier deferred and then I shall come to a conclusion on the claim in tort.
7. That done I shall set out the law on the HRA claim. It requires no separate chronology. I shall then conclude the HRA claim.
8. Finally, having by then dealt with both heads of claim, I shall come to a conclusion on the question of the Defendants' liability to the Claimants. The case so far has been limited by agreement between the parties to the question of liability. If either the tortious or the HRA claim succeeds then, in the absence of agreement between the parties as to quantum, there would need to be a separate hearing to deal with the amount for which the Defendants would in that event be liable.

## C. General

### Group and Railtrack

9. The privatised railway system in the 1990's included that there should be a network operator which would own and manage the infrastructure and also that there should be "Train Operating Companies" ("TOCs"). The TOCs would pay for access to the network operator's infrastructure. The operator, owning such assets as lines, signalling provisions and stations, came to be Railtrack, a company at all material times until June 2002 wholly owned by Group. At material times to June 2002 its holding in Railtrack was outstandingly the chief asset of Group. In May 1996 Group was floated on the London Stock Exchange; its shares were offered to the public at £3.80 per share. The prospectus had indicated that Group:—

"×.. does not receive direct revenue subsidy from H.M. Government but is indirectly dependent on the significant amounts of public sector financial support received by its principal customers, the TOCs."

The prospectus added that the Labour Party and the Liberal Democrat Party had each expressed both opposition to the privatisation of Railtrack and a commitment to a railway which was owned by and accountable to the public. The party political risk that lay behind the flotation was described in the prospectus by reference to the then Conservative Government's narrow overall majority of 1 in what was then the next preceding General Election and to the fact that the next General Election would have to be held not later than May 1997. The prospectus included passages as to the then-published policies of both the Labour Party and the Liberal Democrat Party. The Labour Party's approach had included that:—

"Dependent upon the availability of resources, and as priorities allow, [a Labour Government] would seek, by appropriate means, to extend public ownership and control over Railtrack."

In May 1997 the General Election returned a Labour Government.

**Ministers, Civil Servants and Special Advisers**

10. Until a policy decision is made, at which point the government can be expected to present a united front in support of that policy, there are likely to be very different and often conflicting arguments within the several ministries or departments likely to be affected by the decision. Traditionally, the Treasury might be expected to argue against unbudgeted expenditure or against excesses over budgeted provisions. Where, as here, the Department was the body charged with development and implementation of policy, it could be expected, possibly in conflict with the Treasury, to have in mind improvement in transport generally, including, of course, in the railways. No. 10, no doubt responding to the particular concerns of the incumbent of the day, possibly in conflict with one or both of the Treasury and the Department, might be chiefly concerned with the way in which the given policy would be likely to be perceived by the electorate generally. One can thus expect, before a policy issue becomes a decision of government, that Ministers will be found to be expressing very different views as the prospective policy is thrashed out. At that stage such views will not be the views of the government. Still less, at that or any stage, will views expressed by Ministers' respective Special Advisers be the views of government rather than their commonly being their individual attempts to argue their corner in support of what they know to be or what they hope to be their Minister's inclinations or with a view to leading the Minister to the inclination which the Special Adviser prefers.
11. Nor, either, do comments made in internal discussions by Senior Civil Servants prior to a decision or policy represent the views of government. Senior Civil Servants are careful to leave policy decisions to the elected Ministers although, of course, they will feed to them the fruits of their researches, for example, as to the lawfulness of the prospective policy, its practicability, the alternatives to it, its likely cost and its ability to attain whatever goal is hoped for. Just as Ministers in different departments or ministries will approach a prospective policy issue from different starting points and with different aims, so also will the Civil Servants in the respective ministries. Mr Sumption was thus right to urge caution upon me when I am asked, as Mr Rowley asks me, to interpret or give weight to the many hand-written and other notes of meetings and contemporary e-mails to which I have been referred as parts of the unfolding chronology. The fact that, for example, one contemporary note made by a Civil Servant or Special Adviser to one department seems to put a quite different slant on what was said at a meeting or on what was decided at the meeting to have to be done does not necessarily reflect anything other than the very different concerns of the various departments or that different departments, in consequence, needed to do different things. The weight to be given to contemporary e-mails, of course, varies from one to another but it would be quite wrong generally, before a Ministerial policy decision has emerged, to regard them, especially those of unrelated Special Advisers, as reflective of government policy as opposed to being the views of someone successfully or otherwise arguing a case. For example, Mr Rowlands, a senior career Civil Servant, then Director General of Railways, Aviation, Logistics and Maritime and now Permanent Secretary of the Department of Transport, in his oral evidence to me, commenting on e-mails from Miss Vadera, an adviser at the Treasury, said, with an asperity he otherwise kept at bay, that she constantly bombarded people with

e-mails, many of which were blithely ignored by the recipients; he added "I was used to being bombarded by this woman with e-mails".

12. Finally under this heading I caution against analogies with the private sector. Firstly, a financier such as a bank, determining that it has lent enough to a client and should lend no more but instead should call in what is owing, whilst, no doubt, concerned at the effect on the client, generally has no greater duty than to its own shareholders. A government, however, which withdraws support has to look far more widely. A recurring theme in the government's evidence was that it could not leave the railways in a shambles; if support was to be withdrawn the consequences would need to be foreseen and, where deleterious, would need to be striven to be avoided. Moreover, a government, unlike a banker, would need to consider its policy in the light of the Human Rights Act, of the probability of Judicial Review and of the likelihood of attack in Parliament or at the hustings. In consequence, a government can be expected to look far more widely and in greater detail at consequences and alternatives than would even the most thoughtful of financiers. In consequence, too, Civil Servants, charged with the task of ensuring that all alternatives are considered so that, should there be attack, all can be seen to have been considered, are likely to include even improbable options amongst their considerations.
13. Secondly, there is no real analogy between the Minister and his senior Civil Servants and a board of directors in relation to decision-making on matters of government policy. A board of directors, whilst no doubt containing persons of different seniority and persuasiveness in the company, are likely to vote, one vote each, as to the adoption of this or that policy. By contrast, no corresponding collective decision is taken by a Minister and his senior Civil Servants. The latter, of course, advise and will wish to ensure, whatever policy is decided upon, that it and alternatives will have been fully considered and that it is rationally arrived at but will be scrupulously careful to leave the policy decision itself to the Minister, who, alone amongst them, will be answerable for it to Parliament and to the electorate. It is thus not to be wondered at that the point of arriving at a policy decision in government is likely to be later than it would be in a corresponding case, if one could be found, in the private sector; much more is likely to be at stake, the vulnerability to attack is far greater and the mechanisms for the advising of the decision-maker are so well-developed that, even where a particular policy outcome is hoped for and even strongly preferred, the point of actual decision is likely to be later rather than early.

#### **The Witnesses**

14. There are a number of witness statements from Claimants dealing, for example, with when and for how much they acquired their respective holdings in Group, on what material they relied in doing so and how much they lost in the venture. None of such material, going chiefly to the individual's status as a Claimant, was put in issue but none, either, does more than establish that status, the sense of grievance and the fact of loss common to the Claimants. It does not, of itself, advance the Claimants' case in tort with which I shall need to deal. Such evidence apart, the Claimants relied on 4 further witnesses. Mr Tom Winsor, the erstwhile Rail Regulator, first completed a Witness Summary responding, question by question, to questions put to him in

writing on behalf of the Claimants but then, on 21<sup>st</sup> June 2005, put in a much fuller Witness Statement which he, a Solicitor, himself prepared. The Defendants elected not to cross-examine Mr Winsor, whose veracity was thus not put in issue. Two witnesses, Martin Minns and Pamela Warren, put in witness statements as to a meeting of the Paddington Survivors Group on the 12<sup>th</sup> September 2001. Of the two, only Mr Minns was called to give oral evidence, that of Pamela Warren's witness statement being accepted as it was. I will deal with their evidence when I come to 12<sup>th</sup> September 2001 in the chronology. The only other individual's evidence relied on by the Claimants was a witness statement from Mr John Harris Robinson who on 12<sup>th</sup> June 2001 joined the boards of both Group and Railtrack and who took over as Chairman of both on 18<sup>th</sup> June 2001. Mr Robinson was cross-examined at some length by Mr Sumption and an assessment of his evidence is best left to after I have dealt with the chronology.

15. There were 2 minor flurries as to evidence on the Claimants' side. They had considered calling Mr Daniel Corry, a Special Adviser to Mr Byers at relevant times, by way of a witness summons but at a late stage Mr Corry supplied a proposed witness statement to them and the Claimants then chose not to call him. There was thus nothing in evidence from him. The other flurry concerned the Office of National Statistics, "the ONS", which, as will appear, played an important rôle in classifying whether certain proposed ventures would be classified, for government borrowing purposes, to the public or to the private sector. The Claimants obtained a witness summons requiring attendance at trial of an officer of the ONS. The ONS moved to have the witness summons set aside and I was expecting to have to rule on arguments on the question. In the event there was no argument but a consent order by which the witness summons was set aside and a sum in respect of costs paid by the Claimants to the ONS. There was thus no evidence from the ONS.
16. The Defendants relied on 4 witnesses, each of whom was cross-examined. Sir Richard Mottram, a career Civil Servant, was Permanent Secretary of the Department throughout the period, June to October 2001, on which the Claimants concentrate. At the time of the hearing before me he was Permanent Secretary of the Department of Works and Pensions. Judith-Anne MacKenzie, a barrister in the Legal Services Directorate, was Divisional Manager of its Railways Division from September 1998 to November 2001. She is now Head of the Road Vehicles & Devolution Co-Ordination Division of that Directorate. Neither Sir Richard's nor Miss Mackenzie's evidence is criticised by the Claimants.
17. Another career Civil Servant, Mr David Rowlands, was, as I have mentioned, at the material times Director General of Railways, Aviation, Logistics and Maritime in the Department and at present is Permanent Secretary of the Department for Transport. He was first of the Defendants' witnesses to give evidence, followed by Mr Stephen Byers, Secretary of State for Transport, Local Government and the Regions from 8<sup>th</sup> June 2001 to 28<sup>th</sup> May 2002. He is now Member of Parliament, in the Labour interest, for North Tyneside.

18. No one but Mr Byers is said by the Claimants to have harboured the necessary "targeted malice" against the Claimants and so it is Mr Byers who alone is cast by the Claimants as the villain of the piece; his veracity is put heavily in issue but Mr Rowlands, too, has had his candour criticised to some degree so I shall leave the assessment of their evidence until later. As for Sir Richard and Miss Mackenzie, I found them to be direct, accurate and truthful witnesses.
19. There has been an immense disclosure on the Defendants' part and I have heard no objections that it has been inadequate. The disclosure has included that of legal advice given to the Defendants, as to which legal professional privilege was waived.

**D. The alleged tort; misfeasance in public office**

**The law**

20. As there is very little difference between the parties as to the nature of this tort it is unnecessary for me to delve into its earlier history and into older cases. The person accused of it has to be a public officer. He must have exercised whatever power is in issue as a public officer. The tort has two forms but the only form with which I am concerned is what is called the first limb of the tort, which arises where the accused person's conduct is on its face lawful in the sense that, objectively regarded, there is a power for him or her to act or to fail to act as he or she has done. There is no dispute but that, so regarded, Mr Byers had in 2001 the power both to choose that the Department should not further finance Railtrack other than as it was then contractually or otherwise legally bound to do and had power also to present and pursue a petition for Railtrack to be put into Railway Administration. Given, then, that Mr Byers' acts or omissions were on their face lawful, the case alleged, being in the first limb of the tort, is such that there will be liability under the tort only if his acts or omissions in the exercise of his relevant powers were such that he had *specifically intended* them to injure the Claimants or a class of persons to which the Claimants belong. This important requirement is commonly described as being that proof is necessary of "targeted malice". Although, on appropriate facts, targeted malice can be inferred, save where the facts speak for themselves "targeted malice", it hardly needs to be said, is likely not to be easy of proof especially where motives other than such malice may be credible. Mr Rowley has at several points himself referred to the difficulties the Claimants thus face but a particular difficulty arises out of the consideration that one of the ways in which intent is commonly proved is not open in this tort. In much of the law a person will be taken to have intended the ordinary and natural consequences of his acts or omissions. In such cases it suffices, to prove the necessary intent, to prove the knowledge or obviousness, the foreseeability, of the consequences. Proof of the foreseeability of the consequences thus suffices. Were such a mode of proof to be here open to the Claimants they would be faced only with the task of proving that Mr Byers knew or must be taken to have known that amongst the consequences of decisions not further to support Railtrack or to have sought its administration would be an inability to trade, or reduction in the trading price of, their shares in its parent, Group. But it is central to this case to have in mind that that form of proof is not open to the Claimants in their claim under this tort. The required "targeted malice" cannot be proved by reference

only to the knowledge or obviousness of consequences; a *specific intent* to harm the Claimants or the class to which they belong has to be proved.

21. In point of pleading, the specific intent alleged and the specific intent which therefore has to be proved is that in implementing an alleged "Administration Plan" (which I shall return to), including his petitioning for an administration, Mr Byers acted for the purpose of expropriating the assets of Group without either paying compensation to its shareholders or obtaining the approval of Parliament and with the specific intention of injuring the Claimants as shareholders in Group by impairing the value of their financial interests in that company - see the re-re-re-amended Particulars of Claim paragraph 81. That is the form of "targeted malice" which is pleaded and it is proof of that and only that form of "targeted malice" which will enable the Claimants to succeed under the heading of this tort.
22. It will have been seen from this that purpose or motive is of real importance; it is an area of the law where, unusually, a bad motive can make unlawful that which otherwise would have been lawful; as to the tort and generally see *Three Rivers DC -v- Governor and Company of the Bank of England (No. 3)* [2003] 2 A.C. 1 (C.A.) and 176 H.L. per Lord Steyn at p. 188 f-g, 190 g to the foot, 191 e-f, 195 g-h; Lord Hope 197 c-d; Lord Hutton 219-220 a; Lord Hobhouse 228 g, 230 g-h, 231 d-e; Lord Millett 235 a, 235 e and g and see reflections on the tort in *Douglas -v- Hello!* [2005] EWCA Civ 595, 18<sup>th</sup> May 2005 at paragraphs 159 and 210, now reported at [2005] 4 All ER 128 CA.
23. So far there is no difference on the law between the parties; the only difference is as to whether it suffices to establish the tort if the specific intent to injure the Claimants is *a* purpose of the defendant or whether it has to be at least the predominant purpose of the defendant. I see force in Mr Rowley's analogy with the position as to reliance in misrepresentation - see *Redgrave -v Hurd (1881)* 20 Ch D 1 C.A. - and shall assume, without deciding, that it suffices that the specific intent to injure is *a* purpose of the Defendant, so long as it is above the level of being de minimis.

#### **The Administration Plan - the alleged facts**

24. It is the Claimants' case in tort that "in or about July 2001" and "in or about September 2001" Mr Byers devised "the Administration Plan". It is alleged that by that Plan he intended to bring about a situation in which he could present to the relevant Court evidence that Railtrack was insolvent for the purposes of the appropriate test, that he would then present a petition for the administration of Railtrack, that following the making of the order for administration the assets of Group and/or Railtrack would be "removed" without either approval of Parliament and without the Government paying a purchase price for or compensation in respect of the shares in Group to Group's shareholders and that ownership and control of the railway infrastructure would thus be transferred away from Group to another company, one without shareholders, which came to be known as Network Rail Ltd - see re-re-re-amended Particulars of Claim paragraph 50.

25. There are some aspects of the alleged Plan which have received little attention. There has been nothing said as to the assets of *Group* being "removed"; even its important asset, its shareholding in Railtrack, remained in its ownership until Group chose (and, as it seems, freely chose) to sell it in what has not been shown to be other than an arms' length sale. Nor does the description of the "Plan" take account of the fact that, as I shall come on to, Group received a substantial purchase price for its holding in Railtrack that has not been shown to be other than a price as between a willing vendor and a willing purchaser. It has, rather, been the alleged "engineering" by Mr Byers (and, at his direction, by the Department) of a situation in which it is alleged Railtrack could not usefully resist an administration petition that has attracted most of the Claimants' complaints.

### **E. The Chronology**

#### **The Government's 10 year plan**

26. In July 2000 the Department published its 10-year plan, called "Transport 2010". So far as concerned railways, it contemplated, inter alia, modernisation of the West Coast and East Coast Main Lines and completion of the Channel Tunnel Rail Link. There were to be new train safety systems. The private sector - usually Railtrack or TOCs - was to carry out the investment in the new infrastructure but the plan recognised that substantial government financial support would be needed. Total government funding to 2010 on the railways was put as £29 billion, which included £4 billion chiefly to cover the West Coast Main Line ("WCML") and £5 billion related to the Channel Tunnel Rail Link. But there was also to be some £34 billion of private capital to be raised and spent; plainly the ability of Railtrack or Group to raise money in the market as the 10 years proceeded was to be a key factor in implementation of the 10 year plan, as was also the ability to contain expenditure on the WCML and on the Channel Tunnel Rail Link within the figures contemplated.

#### **The System of the Public Financing of the Railways in 2000 and 2001**

27. Leaving aside the ordinary routes by which a listed company such as Group or a subsidiary such as Railtrack might earn income or raise or borrow money, Railtrack had open to it special routes by which it could call, directly or indirectly, on the public purse. These consisted of "Access Charges" and "Network Grants". Each requires some explanation.
28. Access Charges were the sums paid by TOCs under Access Agreements, to which they were party, for access to and use of Railtrack's infrastructure. They were crucially important to Railtrack; in the year 2000/2001 they amounted to some 84.4% of Railtrack's total income. But they were not fixed by ordinary negotiation between payor and payee; they were, in substance, fixed by the Rail Regulator. His was an office that had been created by the Railways Act 1993. His statutory duties included the development to the greatest extent that he considered practicable of the railway network and the promotion of efficiency and economy in the provision of

railway services. Whilst he was independent of Government, he was, from the taking effect of the Transport Act 2000, to have regard to any *general* guidance given to him about railway services by the Secretary of State.

29. The legislative and other structures surrounding the Rail Regulator included a labyrinthine system by which Access Charges were periodically arrived at so as to cover 5 year "Control Periods" and by which they might be changed even during the currency of whatever Access Agreements contained them. As for such Control Periods ("CPs") , CP1 expired on the 31<sup>st</sup> March 2001. CP2, with which I shall principally be concerned, ran from the 1<sup>st</sup> April 2001 to the 31<sup>st</sup> March 2006 and CP3 was intended to run immediately thereafter. In the computation and payment of Access Charges the Rail Regulator, as his statutory duties might suggest, was entitled to expect and require improvements to be made to the efficiency of operations. The Access Charges for CP2 were published by the Rail Regulator on the 23<sup>rd</sup> October 2000. They had been fixed at a lower level than Railtrack had pressed for, although about 50% up on the corresponding figures for CP1. Although, on the face of things, Access Charges (so far as here relevant) were payable only by TOCs, they represented an indirect call on the public purse by reason of the great extent to which TOCs had to be subsidised by the Government.
30. As for Network Grants, they came to Railtrack by way of the Strategic Rail Authority ("the SRA"), a body called into existence by the Transport Act 2000 and funded by the Treasury. It was not a servant or agent of the Crown. Its Chairman throughout the time with which I shall be concerned was the late Sir Alistair Morton. Amongst its statutory purposes was the promotion of the use of the railway network for the carriage of passengers and goods and the securing of development of the railway network. The SRA, broadly subject to direction by the Secretary of State, was enabled at its discretion to make Network Grants to Railtrack under the provisions of Section 211 of the 2000 Act. The overall position is well summarised by the witness statement of Mr Tom Winsor, the Rail Regulator throughout the periods with which I am concerned, where he says:—
- "××. The Rail Regulator determines what is the net overall income required of Railtrack, i.e. how much money it needs for the competent and efficient operation, maintenance and renewal of the network. The income the company receives from Access Charges and Network Grants has to add up to that figure. If Network Grants paid direct by the SRA are higher, Access Charges can be lower and vice versa. The important thing is that the company is certain of receiving that total amount as long as it meets its legal obligations to its customers (the Train Operators) and under its Network Licence (enforceable by the Rail Regulator)."
31. Any periodic 5–year review by the Rail Regulator, intended, as it was, to anticipate and provide for such things as railway performance and demand and supply in a very complicated industry over a prospective 5–year period, was inevitably such as to require much negotiation and study and a good deal of time. The periodic review

completed on the 23<sup>rd</sup> October 2000 had, for example, begun in July 1999. The draft conclusions of the Rail Regulator had been published in July 2000. They had led to further negotiations between Railtrack and the Regulator and changes were made. Then the final conclusions were published. But Railtrack, even then, was not obliged to accept them; it was open to it within a prescribed period to ask for a reference to the Competition Commission. It did not do that but on the 15<sup>th</sup> January 2001 it accepted the provisions which the Rail Regulator had made for it. It did so, however, on the basis that the Rail Regulator had indicated the possibility of *interim* reviews, that is to say reviews during the currency of the CP, should there be a material change of circumstances. The Regulator expected this general kind of interim review to be utilised only in exceptional circumstances.

32. But, beyond that general kind of interim review, the possibility had been held out to Railtrack of what became known as "Hatfield Re-openers". The rail disaster at Hatfield had occurred on the 17<sup>th</sup> October 2000, namely between the Regulator's draft and his final conclusions. 4 persons had been killed, 34 injured. Derailment had been caused by "gauge corner cracking". Immediate measures were required to be taken all over the network to identify and repair the cracking and very many temporary speed restrictions were introduced. The immediate cost to Railtrack, down to 31<sup>st</sup> March 2001, was £644m but because of the timing of the disaster its effects could not be taken into account in the Regulator's final conclusion. Whilst the Regulator saw it to be right that costs directly attributable to the Hatfield derailment should be borne by Railtrack and not by the taxpayer, he did see that it might be appropriate for the conclusions of his 5-year periodic review to be reviewed and adjusted by way of the "Hatfield re-openers", which were to be interim reviews of a particular kind. The first, if requested by Railtrack, was intended to be directed to the *timing* of Railtrack receipts, so as to bring forward receipts which would otherwise have been received later and also to review the mix between access charges and network grants. The first Hatfield re-opener, if applied for by Railtrack and if successful, would thus not have yielded more money than, overall, it was to receive but would have accelerated the receipt of some of what it would otherwise have received later. The second type of Hatfield re-opener, if sought by Railtrack, was to look at any longer term financial implications of the Hatfield disaster for Railtrack's expenditure and revenue requirements.
33. Even the processes needed to be completed for the relatively simple first Hatfield re-opener, let alone for any more general interim review, would inevitably require effort likely to be spread, at least, over several days or weeks.
34. As for Network Grants, Schedule D to the conclusions of 23<sup>rd</sup> October 2000 made provision for grants of £5.67 billion, conditional on Railtrack's acceptance of those conclusions, to be made throughout CP2. They were to begin with a payment of £162m on 1<sup>st</sup> October 2001.
35. Thus it was that by the 15<sup>th</sup> January 2001, subject only to any interim reviews either of the Hatfield re-opener or of the more general kind, the extent to which Railtrack was intended to be financed by the taxpayer until March 2006 had been prescribed as

some £14.5 billion made up of £5.67 billion in Network Grants and £8.83 billion in Access Charges. Such provision represented some £2.3 billion more than had been contemplated in the government's 10-year plan; that plan had an unallocated provision which, with Treasury permission, had been allocated to cover what would otherwise have been a funding gap. The provision also contemplated that Railtrack or Group would itself fund expenditure by their own borrowings and part of the government's funding was put back to the end of CP 2 on that basis.

#### **Consideration of radical changes - February 2001**

36. Lest it be thought that consideration of radical change in the structure of the railways and of Railtrack's and Group's places in that structure was not seen to be appropriate until Mr Byers became the responsible minister, it is worth recording others' views. Post-Hatfield, said Mr Rowlands, the railways were a shambles and both the Prime Minister and the Deputy Prime Minister had expressed dissatisfaction with Railtrack. As early as February 2001, the Department, responding to a view, which the Hatfield crash had only served to underline, that Railtrack was performing poorly and that Group's monopoly of the railway infrastructure might, in turn, need to be re-thought through, had a paper prepared by Mr Phil Carey in the Railway Sponsorship Division and then sent on to Mr Gareth Evans in the legal department. The paper set out 6 options for the future of Group and its wholly-owned subsidiary, Railtrack, giving the benefits and drawbacks for each. Re-nationalisation was one of the six, as was converting Group into a not-for-profit trust. Both had the drawback that, as there could be no expropriation without adequate compensation, a price (at the then share-price of Group shares) of some £4.7 billion would be involved. The background paper emphasised that, for HRA reasons, it would need to be demonstrated that *all* other avenues had been addressed. That becomes a recurring theme. It is not, though, to be thought that because a particular course appears amongst the options that it was therefore one that had a real prospect of being adopted. The Civil Servant's job, said Sir Richard Mottram, was to identify *every* possibility "and to analyse the pros and cons of them. That is what we do". Hence re-nationalisation was included amongst the six options even though, in Sir Richard's view, it was completely against the underlying philosophy of the Government and was, in his view, never going to be "a runner". Miss MacKenzie, too, spoke of neither her Ministers nor her policy colleagues thinking that acquisition of Railtrack or its re-nationalisation was a serious consideration at that time. At this stage the Government, whilst seeing it to be appropriate to consider what the options for radical structural change might be, was content to adopt the structure as it was for the time being and to work, as Miss MacKenzie put it, "with the grain they had inherited, rather than against it".
37. The 6 options do not include any relating to Railtrack's insolvency if only because the belief in the Department was then that over the immediate term in CP 2 the company's financial position had been stabilised. However, soon after there was some reason to fear for Railtrack's finances, as the next sub-heading suggests.

**Concern in March 2001 in the Department at Railtrack's finances**

38. Amongst Railtrack or Group's officers was one given the particular task of liaison with government. On 16<sup>th</sup> March 2001 he, Mr J.W. Smith, wrote to the Department, stressing Group's need to maintain an "A" credit rating, which, in his view, required the announcement of a package confirming government support for Group. "It is this", he wrote, "which will enable us to raise £5bn by 2003". That would be bound to cause concern at the Department as it would imply support, unascertainable in amount, for an individual company, a very thing which, as will appear from the April Agreement agreed only a little later, as I shall come on to, was a thing which the Government wished expressly to be seen not to undertake. At least as concerning to the Government was a table that Mr Smith included. It did two things; firstly, whilst emphasising the market sensitivity of this analysis, it valued Group's shares, then trading at about 800p, at only 60p and, secondly, implicit in it, in Mr Rowland's view, was an accounting problem such as, in his view, whilst "they [Railtrack] would be able to get through CP 2 ×.. they were going to be bust in spades as soon as they got into CP 3". A false amortisation approach as to signalling expenditure inflated apparent profit in the initial year of account whereas the ongoing expense of the works would be spread beyond CP 2 and into CP 3. There was, as Mr Rowlands put it, "a looming problem in CP 3 you would need to fix in CP 2 but it was not a problem in CP 2". Yet further concern in the Department was because the Rail Regulator's assessment of Railtrack's needs had been based on its achieving efficiency improvements at 3.1% per annum over the 5 years of CP 2. The Department regarded that as "challenging"; it was not thought that Railtrack would achieve the 15% or 16% the Regulator had had in mind.

**Railtrack's business plan**

39. On 31<sup>st</sup> March 2001 Railtrack's business plan for the 5 years to March 2006 was finalised. It is a remarkable document both as it looks over the past and as it contemplates the future. It accepts that processes for maintaining and renewing the railway to an acceptable standard had clearly been broken and that there had not been robust plans in place to live within the Rail Regulator's targets even before the lessons of Hatfield. There was a significant *higher* unwillingness by managers to live within budgets and plans and the business plan could not "be regarded as an acceptable plan in financial terms". Even such planning as it aspired to involved key assumptions which included £3bn of bond finance being raised in Summer 2001 with a further £4.1bn being raised by March 2006. The key assumptions also included the creation of a Special Purpose Vehicle, "Renewco" as it came to be described, to be used to bring forward funding otherwise not to be received until the latter part of CP 2. Moreover, the business plan, requiring expenditure of £19.7bn, was already contemplating some 23% more expenditure than had been budgeted for, only 6 months earlier, at £16bn. It is difficult fairly to describe as a business plan a document which itself said it could not be regarded as acceptable in financial terms but even so, as Mr Robinson (not, of course, yet in office at Railtrack at the time of the plan) accepted, it stated as an assumption which he regarded as critical to Railtrack's financial fortunes that it would be able to raise the £7.1bn bond issues I have described. Probably critical to the making of such bond issues, as Mr Robinson agreed, was the need for Railtrack to maintain an "A" rating for its (or Group's) bonds. Another key assumption was that a Hatfield re-opener would yield Railtrack at least £2bn of extra revenue at £667m per annum from 2003 to 2006. These key assumptions were, at lowest, close to speculative.
40. Plainly Railtrack was heading into difficult times, being both unable accurately to establish its financial needs and dependent upon somewhat speculative consequences to satisfy them, whatever they transpired to be.

### The "April Agreement" and "Renewco"

41. Although the Rail Regulator's final proposals had been accepted only a few months before, Railtrack and Group, seeking further public funding, opened negotiations not with the Regulator by way of a Hatfield Re-opener but directly with the SRA. The Department, which stood behind the SRA, was aware of the course of the negotiations, which led to a comprehensive agreement called either "the April Agreement" or "Project Endeavour". It provided for the possible bringing-forward of £1.5bn of network grants and also for the possible related creation of a company given the convenient name, during the negotiations, of "Renewco". Renewco was to be carefully constructed as a company with access to a large revolving credit facility but control of which was to be deadlocked between its equal shareholders, the SRA and Railtrack. Renewco, if called into existence, was intended to be able to borrow, in particular against the prospective streams of public funding to Railtrack, but in such a way that its borrowings would be off-balance sheet so far as concerned Railtrack and yet also would not be classified as public sector borrowing. In such a way, if Renewco was eventually used, Railtrack would, in effect, receive, ahead of what would otherwise have been the due dates, public funding otherwise intended to be spread under Schedule D over the latter parts of CP 2 or into CP 3. But Renewco was not certain to be created. If it were not created by 30<sup>th</sup> June 2001, Group was to be given a further 21 days to consult on an acceptable alternative but if none emerged then Railtrack would then (but not before) be able to apply to the Rail Regulator for the first Hatfield Re-opener.
42. It was foreseen that there were many loose-ends that would need to be tied down if an acceptable Renewco were to emerge, a crucial one of which, on the Department's side, as I have mentioned, being that Renewco's borrowings would not be treated as public sector borrowing. As the ONS, as arbitrator of such matters, would not be likely finally to classify such borrowings until Renewco's corporate structure and its proposals were ascertained in some detail, the possibility was always present that even if the SRA and Railtrack had successfully negotiated a Renewco format that suited them respectively (a thing which itself, despite mutual best endeavours, was not necessarily achievable) even so Renewco might transpire to be unusable for want of its being classified by the ONS to outside the public sector. Some provisions of the April Agreement were framed as legally binding, others as deliberately not. Thus, whilst both Group and the SRA were to use their best endeavours to set up an acceptable Renewco, Group agreed that its only remedy for a breach as to that on the SRA side would be that it would be freed to apply for a Hatfield Re-opener ahead of the expiry of 21 days after 30<sup>th</sup> June 2001. It never did so.
43. It is not necessary to go in detail into the April Agreement but amongst its important provisions were what were called the "Statement of Principles" agreed between the Government and Group. These principles were expressly excepted from the confidentiality agreed to affect other parts of the April Agreement. The first 3 principles provided as follows, with my emphasis:—

"1. The Government stands behind the rail system *but not behind individual rail companies and their*

*shareholders, who need to be full aware of the projected liabilities of the companies in which they invest and the performance risks they face.*

2. [Group] recognises that it *must intensify its efforts* and raise the performance of its core business in the safer operation, maintenance and renewal of the existing railway.
3. [Group] needs to raise funds from the financial markets in order to meet its obligations to customers and stakeholders. The company *also needs to receive sufficient government funding as determined by the Regulator.* "

The principles reiterated that Group had accepted that the immediate consequence of Hatfield must fall to Group's shareholders.

44. These principles thus made very clear that there was to be no bottomless government support for Railtrack, that Railtrack needed to improve its performance, that Group's shareholders should be alive to the liabilities of and the risk inherent in their involvement in rail companies and that government funding would be limited to what the Rail Regulator determined to be sufficient.
45. Although, no doubt, concern remained in the Department as to Railtrack's financial future, the view in the Department was that Railtrack, once the April Agreement had been made offering it, inter alia, the alternatives of a Hatfield Re-opener or assistance by way of Renewco, itself considered its financial position over the next one or two years to be adequate.

**Mr Robinson is appointed**

46. On 10<sup>th</sup> May 2001 Mr John Robinson became chairman-designate of Group and he joined the boards of both Group and Railtrack and a little later became Chairman of both on 18<sup>th</sup> June 2001. He met several Board Members during May. He saw Railtrack to be in the middle of a public slanging match, as he put it, involving itself, the Rail Regulator and the SRA, each accusing either or both of the others of being responsible for the then-perceived poor state of the railway industry and for passenger dissatisfaction. The Rail Regulator had declined to meet him until his formal appointment but he had met Sir Alastair Morton, when both acknowledged that Railtrack was facing some serious financial issues. He had been unable to meet the then-responsible Minister, Lord Macdonald, or the Prime Minister because by then the General Election campaign was under way but he did meet senior officials and felt that he had been given positive signals that the Government was prepared to support the rail network and Railtrack's management (which included, as new recruits, not only him as new Chairman but a recently appointed Chief Executive Officer and a new Finance Director).

**Railtrack's audited results for the year end 31<sup>st</sup> March 2001**

47. These were published on 24<sup>th</sup> May 2001. The Group had made a loss after taxation of £559 million, down from the previous year's profit of £295 million. It was the first time that the Group had reported a post-taxation loss. A gap of £3.6 bn was disclosed between budgeted income and expenditure during CP 2. The projected cost of the WCML had increased to £6.3 bn. As at 24<sup>th</sup> May 2001 the companies' boards expected, said Mr Robinson, to be able to fill that gap by obtaining additional funds from the Rail Regulator, by cost-cutting, by efficiency gains and by expected adjustments to the "Regulated Assets Base", a key figure in the Regulator's computation of what provision should be available to Railtrack. The accounts had been prepared on a "going concern" basis but they recognised that Group's financial position could be seriously prejudiced if contingent liabilities matured into present or prospective ones and the Boards recognised that much work needed to be done to resolve uncertainties. "The Hatfield Re-opener", said Mr Robinson, "in particular, was crucial to our future" although he always regarded Renewco, the alternative to the first Hatfield Re-opener, as a "given". The Boards had concluded that Group's and Railtrack's accounts could be prepared on the going concern basis. It would not, in my view, be unfair to comment that a company which needed, as did Railtrack, to give very careful attention to whether its accounts could properly be prepared on a going concern basis was a company which was likely to be in or heading towards seriously difficult times.

**ABN-Amro**

48. On 4<sup>th</sup> June 2001 the brokers ABN-Amro circularised a "sell" recommendation in relation to Group's shares. Group's position was analysed in some detail. There were dire warnings; investors should be in no doubt that their equity was in danger of being wiped out; the rising levels of debt threatened to engulf the value of its regulated assets, rendering the equity worthless. The then-current share price, 438p, implied wildly optimistic outcomes. The then-recent balance sheet under-estimated Group's debt position which ABN-Amro took to have increased by a massive £1.2bn to £2.5bn so far as concerned creditors due within one year. In their initial summary of the 16 page report ABN-Amro wrote:-

"We believe there is a realistic possibility that the equity could be wiped out. Based on our expectations of performance, we value the shares at only 58p."

That figure, of course, was barely different from the 60p which Group itself, by its Mr J.W. Smith, had indicated to the Department in March 2001.

49. It is not to be thought that other advisers took the same view as ABN-Amro; several still regarded Group shares as being of far greater value than 58p but the detailed ABN-Amro survey caught the eye of the financial press and, hardly surprisingly, depressed the trading price of Group shares.

**The 6<sup>th</sup> June 2001**

50. The ABN–Amro report came, as one might expect, to the Treasury's notice and to the notice of Miss Shriti Vadera, an erstwhile investment banker who was a member of the Council of Economic Advisers at the Treasury. She was not a career Civil Servant nor either only a conventional Special Adviser to the Chancellor but her office had more the characteristics of the latter than the former. The fact that ABN–Amro had valued the shares as low as 58p had led her, mindful also of the Railtrack earlier valuation by Mr Smith at 60p, to reflect on the possibilities of a takeover by a third party (a "raider" or "a sensible company") should such values come to be the trading price of Group shares. On 6<sup>th</sup> June 2001, Miss Vadera, Mr Kemsley of Public Transport Policy at the Treasury and Mr Martin Wheatley, Head of Housing and Urban Transport at the Treasury, met Mr Rowlands, and Mr Linnard, Director of Railways at the Department. Mr Kemsley's note of the meeting includes the phrase "So why not "engineer" a takeover?" and "Doing Renewco loses us two options", both remarks, certainly the latter, being likely to have come from Miss Vadera. In context "takeover" referred to the possibility of someone, *not* government, making a bid should the share price of Group shares fall to the very low level contemplated by Mr Smith and by ABN–Amro. The takeover to be "engineered", if the shares ever did fall so low, would have been one by a "sensible company", encouraged to bid in order to keep "raiders" out. The remark cannot suggest even an inkling of the conception of some policy as to acquisition of Railtrack or Group by some government body. Nor, either, was there then the first dawning of a notion that, despite the unbinding obligation to use "best endeavours" in that behalf, Renewco would not be implemented. I accept Mr Rowlands' evidence that the meeting did not consider not doing Renewco. It is to be remembered, too, that no Minister was present at the meeting. Had there been a decision to *advise* the incoming Minister that it could be advantageous that Renewco should or might not be implemented one would expect a minute to have been promptly prepared to such effect. None was shown to me.

**Mr Byers becomes Secretary of State**

51. The General Election of 7<sup>th</sup> June 2001 returned Labour to power. Renationalisation of the railways had not been raised as an issue on which a mandate was invited. Mr Byers became Secretary of State in the Department of Transport, Local Government and the Regions replacing Mr John Prescott M.P.. Mr Byers held this office until 28<sup>th</sup> May 2002. The message given to him by the Prime Minister, said Mr Byers, was that "*delivery* was the issue. We wanted to raise performance but really the issue then is how do we achieve improved performance".
52. On the same day Mr Robinson attended his first Board meetings in Group and Railtrack. He felt, and the Board shared his view, that more time needed to be devoted to finding a new strategic way forward. He had in mind consulting a single financial adviser. The names of Credit Suisse First Boston ("CSFB") and Mr John Nelson of that group (with whom he had worked previously) were in his mind.

### **Railway Administration**

53. Because the first view of the possible relevance of a Railway Administration Order to Railtrack's condition has been attributed to Mr Byers, an attribution for which he is in part to blame, it is worth mentioning that on the 8<sup>th</sup> June, only the day after his appointment and plainly commissioned before then, there was circulated in the Department a paper on the subject of Railway Administration. Its kinship with ordinary Administration was explained. A Court Order would be required. The Court would have to be satisfied, as one alternative, that the subject-company was or was likely to be unable to pay its debts, using the definition of that condition provided by *section 123 of the Insolvency Act 1986*. During the administration - see the *Railways Act 1993 section 59* - its business was to be managed by the Administrator appointed by the Court "in a manner which protects the respective interests of the members and creditors of the company" and with a view to achieving the statutory purpose of transfers as a going concern. *The Railways Act 1993*, which created this form of relief, contemplated there being "Railway Administration Order Rules" which had to be made by the Lord Chancellor with the concurrence of a Department Minister. They were ready in draft but had not formally been made. Nothing barred a Railway Administration Order being made against Railtrack in point of jurisdiction and, if one were made, the Secretary of State was empowered, at his discretion but with Treasury consent, on terms to make grants and loans and give guarantees in order that the Railway Administrator could manage the assets until there could be transfer to another or others such that its relevant activities could continue to be carried on - *section 63 of the 1993*. In effect, unless funding came from ordinary commercial sources, it would thus be the government, and hence the taxpayer, that would fund the continuing operation of the railway infrastructure if such an Order came to be made against Railtrack.

### **Mr Byers is briefed**

54. Mr Rowlands wrote a submission to his incoming Secretary of State on 8<sup>th</sup> June 2001. He wrote of a sizeable funding gap appearing from Railtrack's 2000/2001 financial results and of its hopes of persuading the Regulator to assist. He warned that:-

"Even if he does agree, the full cost will pass through to increased SRA support payments, for which there is at present no budget cover."

Renewco, said Mr Rowlands, (though not calling it that) would require both Treasury and ONS approval; "the omens at present are not good". Without Renewco, Railtrack's new debts would rise "to a probably insurmountable £5.4bn". The efficiency savings required of Railtrack would be a major challenge. There was a risk that the Department could have to find an additional £1.4bn over the next 2 years.

55. No less worrying was a paper of the 11<sup>th</sup> June prepared by Mr Linnard. Railtrack, he wrote, was "frankly, in a mess". It did "not have a grip on its core assets. Its

management was weak, with deep-seated problems which the new Chief Executive and Chairman will struggle to overcome". Its share price was shrinking. Mr Linnard also prepared a comprehensive brief headed "Railways: background and issues". Railtrack's medium-term financial projects were shaky. Even if they could get from the Regulator all they hoped for (which could not be guaranteed) Railtrack's debt burden may even so be unsustainable in the longer term. "Some form of financial restructuring", wrote Mr Linnard, "within the next 5 years looks inevitable if the company is to survive and we are to avoid further substantial increases in support requirements". He made the point, too, that if the Regulator did give Railtrack all it sought, the full cost would be passed to the SRA for extra support "for which there is at present no public expenditure cover".

56. Mr Byers was seriously concerned and asked for an option paper to be prepared on the future of Railtrack covering all options short of re-nationalisation, although even its "pros and cons" might as well be included. That, though, did not of itself suggest that there would be some ministerial decision as to some fundamental change; it was, said Mr Rowlands, as I accept, merely a newly-arrived Minister not unreasonably asking, given the concerns about Railtrack's performance both before and after Hatfield, what the options were. "That", said Mr Rowlands, "is a standard piece of the internal workings of government". Mr Byers wanted there to be a meeting to take matters further once the options paper was to hand.

#### **Mr Coulshed's Options paper**

57. On 12<sup>th</sup> June Mr Mark Coulshed, Divisional Manager of Railways Sponsorship at the Department, produced a paper called "Railtrack: Options for Action by Government". It recommended that Mr Byers should meet key railway industry figures, in particular Mr Robinson, before forming a view, though the paper commented on Railtrack's bad reputation, its being pilloried for bad management and its balance sheet being so weak that it was completely unable to contribute to the development of the network and even had difficulty in funding the regular maintenance programme. The paper recited that the Prime Minister had only recently re-iterated the arguments against full re-nationalisation, the cost of which, in any event, was "an immense hurdle". The other options raised, as they had been before in February, included conversion into a not-for-profit trust. Another option, indicating a governmental lack of confidence in Railtrack and one which was speculative as to its consequences, was the prompting of a third-party acquisition of Railtrack, although such was the scale of Railtrack's problems that the "Government might have to provide further funding than currently envisaged to get a suitable new owner on board". Administration was not specified as an option.

**The Regulator's "begging bowl" speech**

58. On the evening of the 12<sup>th</sup> June Mr Winsor made a speech to the Institute of Electrical Engineers. It painted a bleak picture of Railtrack. The WCML project had not been properly worked out; things had got steadily worse even after the Ladbroke Grove crash and the Hatfield derailment; it was not trusted to deliver, its share price had fallen beneath the 1996 offer price, it had published its first loss, its essential skills base of engineers had been diminished and so on. The company, said Mr Winsor in a phrase that gave the speech its name, "should put away the begging bowl and stop spending valuable management time hawking themselves unwanted round Whitehall and knuckle down to getting train services back to a sustainable level of reliability and quality of service". But all was not lost; Railtrack could apply to him for an interim review but a compelling case had to be made if there was to be one. "However", added Mr Winsor, "I have told Railtrack not to bother making any such application until they have sorted out the recovery".
59. The market reacted badly to the speech. The share price fell further. Mr Robinson believed the speech had made it more difficult for Group to obtain further funding from the bond market.

**15<sup>th</sup> June Meeting**

60. The Departmental meeting Mr Byers had called for took place on 15<sup>th</sup> June. There was a wide-ranging discussion which included Mr Linnard's views that the Rail Regulator had a vendetta against Railtrack and that there was Treasury unhappiness at public expenditure being in effect controlled by the Rail Regulator but the phrase to which Mr Rowley most drew attention was one attributed to Mr Byers, namely that he had said that Railtrack "looks a basket case". Mr Byers was content to be taken to have said that but he resisted that it had meant that as early as 15<sup>th</sup> June he had determined that Railtrack had no future. I accept his evidence; a view that Railtrack had no future would have been inconsistent with his view, expressed at the same meeting, that the *existing* structure should be made to work better, including ways of getting those involved working to a common agenda and with the Rail Regulator "on board and working [in a] collegiate fashion". Sir Richard Mottram also resisted the interpretation sought to be put on the reference to a "basket case" and Mr Rowlands, also at the meeting, gave evidence that Mr Byers did not then convey to him the message that Railtrack was a lost cause.

**Mr Byers meets the Rail Regulator**

61. On 19<sup>th</sup> June Mr Byers had what he called a "getting to know you" meeting with Mr Winsor, who was asked to explain his view of the industry and its problems. Mr Byers had begun by saying it was not the time for some huge restructuring, which, he said, would have led to a period of stagnation and paralysis. Rather "delivery" was to be Mr Byers' primary task. Perhaps reverting to the theme of his "begging bowl" speech, Mr Winsor said it was important that Railtrack did not get the message that they would always be bailed out.

**19<sup>th</sup> June 2001**

62. CSFB made a "pitch" to become key investment banking advisers to Railtrack on 19<sup>th</sup> June and were successful. They were given open access to the whole of Railtrack. Amongst matters requiring attention were Railtrack's relations with the Regulator. Only two days later it was reported back to Mr Robinson that when senior Railtrack management had met Mr Winsor he had said "Insolvent liquidation could be the best thing for the rail industry". Mr Robinson keenly saw that relations had to be improved.
63. On the same day Lord Cullen's first report on the Ladbroke Grove rail disaster was published. It seemed to draw fresh attention to Railtrack's shortcomings and spoke of its "institutional paralysis".
64. At about this time Mr John Smith of Railtrack prepared a note to arm Mr Robinson for his first meeting with Mr Byers in their respective new offices. It throws light on a Railtrack management view as to its predicament; the situation was worse than expected, neither the Regulator nor Railtrack could estimate the costs of running and maintaining the infrastructure with any certainty, the assumptions on which the settlement with the Regulator for CP 2 had been based were completely unworkable, major cost over-runs on the WCML and the Channel Tunnel Rail Link were still not under control, Railtrack's "bloating" operating costs were not being addressed. If the subsidy and pricing regime was left unchanged, the company was heading for liquidation. Railtrack needed Government support in order to maximise its private sector funding. As it turned out, Mr Robinson, although he considered Mr Smith's note prior to his meeting with Mr Byers, did not work his way through it at the meeting, as I shall come on to. But he did not in his evidence to me distance himself from Mr Smith's views. On the contrary, when aspects of it were put to him he agreed with Mr Smith's views. For example, whilst Railtrack had an assets register, it did not have an adequate knowledge of *the state* of its assets, something he regarded as fundamental. True also was it, he said, that there was a huge gap of £3.7bn between Railtrack's current projections and the amount allowed to it by the Regulator, a gap which if unplugged would lead the company towards liquidation. True also that Railtrack had made commitments as to the WCML that were probably undeliverable and had incurred considerable cost over-runs. No attempt had been made, either, to address the bloating operating costs. An "extra chunk" of £1-2bn would have to be found in CP 2, even if all other issues were properly managed. It is

a notable comment on Railtrack's financial uncertainties that the range – £1–2bn - should be so wide.

**A second Departmental meeting: 20<sup>th</sup> June 2001**

65. At this meeting Mr Byers suggested that the Treasury should be brought into discussions about Railtrack. They would be better equipped in knowing how to restore City confidence in it. Mr Rowlands said he would get in touch with Miss Vadera about joint work being done. Mr Byers said he wanted work on Renewco to be done quickly, with a view to his then putting options to the Prime Minister at some stage but Mr Rowlands did not understand that work was required urgently with a view to being capable of early implementation. Such views were inconsistent with a judgment that Railtrack had no future or that Renewco was to be dropped, although it was recognised that, in effect, the Treasury had a veto over Renewco. It had not to "score" as public spending but if the SRA was perceived as standing behind Railtrack then Renewco would so "score". Renewco plainly had its problems. A workable model had to be found for it but, if immitigable objections to it were encountered, Railtrack would have immediately to be told. But at this date it was nothing beyond *options* that were being intended to be looked at; Mr Byers, said Mr Rowlands, was asking for what Ministers frequently ask for, which is a piece of interdepartmental work looking at what the options might be. He added:–

"We were looking at what might be the options should the Government ever want to do something different in relation to the industry. It is what governments do. It is what departments do."

**Miss Vadera's E-mail**

66. Either on 20<sup>th</sup> or 21<sup>st</sup> June Miss Vadera met Mr Byers and on 21<sup>st</sup> June she sent an e-mail to a Treasury colleague that spoke of Mr Byers having asked for work to be done "on options for Railtrack involving alternative owners and management". On the basis of that Mr Rowley put to Mr Byers that his version of the Departmental meeting of 20<sup>th</sup> June, with its references to restoring City confidence and going forward to find an acceptable model for Renewco, was plainly wrong and that what he had truly wanted was, and, in effect, was *only*, work as to "alternative owners and management". Mr Byers denied that was the case and I accept that denial; the note of the meeting of the 20<sup>th</sup> shews Mr Byers having concerns beyond those referred to in Miss Vadera's e-mail. If he had been minded to conceal his true wishes from his Departmental colleagues he would hardly have then immediately disclosed them to the Treasury when at the same time arranging for both Ministries to work together. It may be that Miss Vadera's e-mail reflected what *she* thought would prove to be the most practical solutions to Railtrack's problems but I accept that her e-mail did not reflect Mr Byers' state of mind at the time.

**22<sup>nd</sup> June 2001**

67. On this day the Prime Minister wrote to Mr Byers. Transport must, he said, be a top priority. "We clearly need", he wrote, "to review the architecture of the rail industry". Was the framework right? What were the likely costs and benefits of further structural change? The Prime Minister noted, too, that both TOCs and others had called for a more radical restructuring of the industry. That options were already being widely considered in the Department was plainly not because of some initiative supported only by Mr Byers; it was in line with governmental thinking at the highest level. There is no hint in the Prime Minister's letter that options should be confined to alternative owners and management.

**Barclays Capital**

68. Mr Robinson's evidence included that on or about 26<sup>th</sup> June Railtrack had it confirmed to it by Barclays Capital, the likely lead banker in any prospective Railtrack bond issue, that access to the bond markets was still possible. He did not himself identify the particular letter and it would seem, from another part of his written evidence, that the advice as to access to the bond market was "absent other bad news". I could not take that to be a reliable or uncontingent assurance as Barclays Capital would be unlikely to say that the bond market, in respect of an issue still then several months away, would not be accessible unless that had become categorically and irrevocably already obvious. There is a letter, which Mr Robinson may have had in mind, from Barclays Capital to Mr Harding of Railtrack on 22<sup>nd</sup> June 2001 which emphasises the need for Railtrack to maintain the "A" credit rating and which said "Put simply, the markets are unlikely to provide funds if it believes the Government will not". The letter cannot be regarded as any form of assurance that access to the bond market would be open in the Autumn although neither does it say that it would not be.

**Mr Byers and Mr Robinson meet: 27<sup>th</sup> June 2001**

69. The meeting was friendly but there are disputes as to what was said. Having decided not to speak from the note which Mr Smith had prepared for him, Mr Robinson intended to speak from his own brief note. He considered the meeting to have gone very well. He undoubtedly drew (literally) a picture of Railtrack as a "Gulliver" restricted by ties including those of the Regulator, the Health & Safety executive and the Government but the contemporary note made by Mr David Hill, Mr Byers' Private Secretary, records Mr Robinson saying "Situation worse than expected". In cross-examination Mr Robinson, without, I think, meaning to be, was a little equivocal; he did not clearly deny that he had said as he was so recorded as saying. Mr Rowlands' evidence was that Mr Robinson had indicated that the *financial* position was rather worse than he had thought when he had taken up his position. Mr Robinson's memory of the meeting was not sharp; he confessed to have tried to put Railtrack affairs out of mind over the intervening years. I hold that Mr Robinson did say that the situation was worse than he had expected, though without his necessarily intending thereby to limit himself to the *financial* situation.

70. He accepted that he probably did say that the Regulator was Railtrack's biggest problem and that relations with him were appalling. He accepted that he was by then well aware that the Regulator had said that Railtrack need not bother to apply for the second Hatfield Re-opener until it had sorted out the recovery. He did not seek to challenge the note's record of his saying (as was his belief) that the subsidy pricing regime was unworkable and that without an interim review Railtrack was likely to run out of money in 18 month's time. He believed an additional funding stream was required in CP 2. He accepted, too, that he probably had said that lots of routine maintenance had not been done and that the company had a huge training need. He told the Department that CSFB had been approached by Railtrack but that further work was needed before Railtrack could take advantage of their advice.
71. Mr Robinson also spoke, as both the note and Sir Richard Mottram's oral evidence touched on, about the company's need to raise money in the Autumn, that that would be impossible if people were scared off and about his concern that both the Regulator and the Chairman of SRA were creating a climate which made it impossible for it to access its agreed financing, a reference, as I understood it, to Railtrack's undrawn existing borrowing resources. For his part, Mr Byers said relatively little at the meeting but he did not speak of structural change but of working with the very structure which, for better or for worse, was the one that existed and of the need to avoid a "blame culture" between Railtrack and the Regulator. Mr Byers and Mr Robinson were, it was agreed, to meet on a monthly basis or reasonably frequently. It had not yet become clear that Railtrack's proposals, when they emerged, would leave the Regulator on the sidelines in the sense that Railtrack would be proposing directly to the Department rather than to the Regulator in connection with its financial needs.

#### Mr Adonis

72. Also on 27<sup>th</sup> June Mr Adonis, as he then was, then head of No. 10's Policy Unit, wrote a note to Mr Jeremy Heywood, Principal Private Secretary to the Prime Minister, favouring a fundamental internal review looking at all viable options (including a possible return to the public sector) for Railtrack, which he took to be at its nadir, leading to an opportunity that required consideration. The note illustrates the dangers of treating internal notes or memoranda of the Civil Servants or Advisers of any one department as being the government's view. Neither Mr Byers nor the Department would at the time have known of this note. Mr Rowlands' evidence was that the Department still believed that the April Agreement had stabilised Railtrack's position at least for the short term and Mr Byers' was that he was not thinking on the same lines as Mr Adonis; he was, rather, seeking stability for Railtrack and to find if the Department could work with the *existing* structure.
73. Sir Richard Mottram further diminished the relevance of the Adonis note by saying, of the people in the Policy Unit, that they were scanning the horizon all the time looking at things they should be thinking about to put to the Prime Minister "but they do not necessarily consult the Departments and their views are not necessarily that well informed", a comment he neatly underlined by referring to Mr Adonis' having twice called the SRA the "SRB", which Sir Richard thought "probably instructive".

There was, in my judgment, at this time, no view of Mr Byers or in the Department that Railtrack was at some such nadir that amounted to an opportunity, not to be missed, to take it back into public ownership. Their view, to revert to Miss MacKenzie's earlier phrase, was still to work with the grain rather than against it.

#### **CSFB report to members of the Railtrack board**

74. CSFB had assembled an impressive team under Mr Nelson to look into and report on Railtrack's position, which they did on 28<sup>th</sup> June. Mr Robinson recollected that the "headlines", so to speak, of CSFB's report were that Railtrack's solvency was a real issue without government support, that the financial markets were closed to Railtrack (a view on which the Board members were at odds with CSFB), that application to the Rail Regulator for an interim review would be unsatisfactory (it would involve much work, would take 12–18 months and would create uncertainty) and that instead application should be made direct to government, a strategy given the name "Project Rainbow". Rainbow was to be worked up to become a form to attract or at least to be acceptable to government and was to be presented as a "one option" strategy rather than allowing various options to be presented, which would be likely to lead to no consensus being reached. Mr Harding, Railtrack's recently appointed Finance Director, felt that Railtrack could "muddle on" as it was for at least 18 months, perhaps the first mention of that possibility as a strategy, but it was plainly not a long-term solution and CSFB's view was that it was not a viable option and would not be acceptable to government.

#### **Mr Harding's concerns**

75. By 29<sup>th</sup> June Mr Harding was concerned at the risk of Railtrack losing its "A" rating. It was increasingly at risk. Indeed, its existing deals were trading at the lower level of "triple B" despite the theoretical "A" which Railtrack had achieved from 2 key credit rating agencies. À propos solvency, Mr Harding told the Rail Regulator that "The cliff's edge is closer than you may realise" and that the Board was obliged to take a view of the Company's solvency on an on-going basis and explicitly as to a "going concern" basis in each half-year result's announcement. He sent a copy of his letter to Mr Rowlands and to the SRA. I do not see it as possible to discount the letter as being just alarmist as if, for example, for the merely tactical reason of more thoroughly encouraging the Regulator's cooperation; the phrasing of the letter suggests that legal or accounting advice had been already taken such that solvency and the going concern basis had to be focussed on as the letter describes. These concerns of Mr Harding do suggest, though, that if "muddle on" was a strategy he could espouse, it was at best precarious.

**The first Renewco deadline is passed**

76. It will be remembered that if Renewco had not been set up by 30<sup>th</sup> June then Group was to have a further 21 days to consult on an acceptable alternative, failing which it would be able to apply to the Regulator for a Hatfield Re-opener. 30<sup>th</sup> June came and went with no Renewco but also with no application to the Regulator. Railtrack's board considered an interim review a waste of time at that point. Mr Robinson thought not only that application to the Regulator would very probably not have produced enough cash quickly enough but also that Renewco would eventually be set up.

**The Transport "stocktake" of 5<sup>th</sup> July 2001**

77. On 5<sup>th</sup> July the Prime Minister met, inter alios, Mr Byers, Mr John Spellar, Minister of State at the Department, Mr Andrew Smith, Chief Secretary at the Treasury and Lord Macdonald for a "stocktake" on transport issues. Miss Vadera attended. The meeting provides a good example of a special adviser expressing views which are neither those of her own department nor that of the responsible department as Miss Vadera's view, that Railtrack could not be stabilised in the short term and required radical change to its structure, was not adopted by either the Treasury Minister present nor by anyone else. Sir Richard Mottram, also present, in his oral evidence summarised the gist of the meeting being that both the Prime Minister's and Mr Byers' emphasis was that the priority was to get punctuality and reliability back to normal, that Mr Byers went on to regard structural options as needing to be looked into but that a careful balance had to be struck as embarkation on structural change could itself dilute the necessary concentration on improvement in performance. I do not accept that Miss Vadera's views at the stocktake represented the government's policy or even its wish at the time.
78. Mr Byers had on 29<sup>th</sup> June written a brief to the Prime Minister in connection with this stocktake (then thought to be for 3<sup>rd</sup> July) in which, after describing the SRA as unfocused and unrealistic in its ambitions and whilst describing the Regulator as uncompromising and legalistic, he wrote of Railtrack being "a mess". At that stage he saw the problems not as structural but as of management, not as to Mr Robinson and the senior colleagues who had recently joined with him but, he explained in his oral evidence, as to Railtrack's zonal directors and as to Railtrack's quasi-federal and geographically divided management structure, which made its problems both complex and such as required urgent attention. As Mr Rowlands put it, "There is a real need to do something about the management rather than the company. This, after all, is a company that allowed Britain's railways to become a complete shambles". He added "× even at this stage, 5 years after privatisation, we still had no asset register, it still had no knowledge of the state of its assets, it did not know what its unit costs were, it did not understand its costs base. Those were essentially management problems". What Mr Rowlands was then and thereafter expecting was that the Department would produce an options paper by the end of July, as the Prime Minister had requested, the sort of thing that Ministers take away to read on their holidays in August with a view to saying, in September, which plans were to be developed. I do not detect any significant differences between what Mr Byers was

saying relatively privately to the Prime Minister in his briefing and what he said to the wider audience at the stocktake itself. It had become clear, though, by the time the briefing was written, that Mr Robinson wished to deal direct with the Department rather than with the SRA or the Regulator and that if CSFB as Railtrack's new advisers were to make proposals it could be that the Department would need to bring in corresponding City advisers for itself.

### **The Scoping Group**

79. In early July occasional meetings began between Civil Servants and Special Advisers from the Department, No. 10 and the Treasury to consider Railtrack's position, both in finance and performance terms, and possible options to deal with that position, which was regarded as unsatisfactory on both accounts. Membership of the Group (perhaps attendance at its meetings would be a better description) varied; it had no formal membership or constitution and minutes were generally not kept although papers were distributed. I shall not find it necessary to make findings as to each of the Scoping Group meetings.

### **Railtrack's board meeting: 12<sup>th</sup> July**

80. CSFB attended to explain that they had been instructed to analyse and advise upon the whole corporate finance strategy for Railtrack and Group. Advice had been taken from leading Counsel and the Auditors that a dividend could be paid to shareholders. It was expected that *existing* credit lines could last until early to mid-2002 and that "absent other bad news" Group would still be able to launch its proposed bond issue. It was resolved that a dividend should be paid. It is difficult to square Mr Robinson's evidence of the relative lack of concern at the meeting with Mr Harding's concerns of only a fortnight or so before.

### **Mid-July e-mails**

81. On 12<sup>th</sup> July David Hill, Mr Byers' Private Secretary, e-mailed Mr Rowlands on the subject of joint work (that is, between No. 10, the Treasury and the Department) on options for Railtrack, adding, of Mr Byers, "He is keen to make quick progress on this. He thinks Cullen II may provide the opportunity for quick action". The message seems to have bemused Mr Rowlands. He took 8 days to reply and said he was not sure what Mr Byers had in mind by way of an "opportunity for quick action", adding that he was still aiming to put an options paper to Mr Byers by the end of the month for it to go on to the Prime Minister and the Chancellor "and from which Ministers can decide what they would like further worked up".
82. "Cullen II" is a reference to the publication of the second part of Lord Cullen's report into the Ladbroke Grove Rail disaster, expected in September 2001. In cross-examination Mr Byers accepted he had always seen Cullen II as a peg on which could be hung changes to the rail industry but I understand him to resist that amongst the changes then specifically in mind as to which "quick progress" was to be

made was a change in the status of Group or Railtrack as a listed company (Railtrack never was one) but rather referred to changes such as to punctuality, safety, comfort and railway performance generally. I accept his answer; such subjects would seem more naturally capable of being hung on the peg of Cullen II than would structural corporate change and Mr Rowlands' reaction to the e-mail showed no awareness that anything but work on options was being required, though it was then the case that Mr Byers then and thereabouts wanted to receive the work on options so as to be able to have decided the way forward by the first week in September. The way forward, he pointed out, in relation to this and to a later e-mail, could have been *any* of the options to emerge from the work on options, or none. I cannot take the Hill e-mail as an indication of a mind already made up on the subject of structural reform, still less on an indication that already an administration of Railtrack was being "engineered".

#### **Group's AGM: 24<sup>th</sup> July 2001**

83. Mr Robinson's first AGM as Chairman took place on 24<sup>th</sup> July. He spoke of railway's poor performance and heavy bureaucracy, of low staff morale and of poor performance on many of its investment projects. The industry squabbled too much; it had to work together. As for short-term finance, it would have to be raised in the market. Major projects would have to be financed directly or indirectly or be underwritten by the Government.
84. The AGM was followed by a Group board meeting. CSFB reported that without *additional* government support, the equity was unlikely, on certain assumptions, to have any significant value. Differing from Mr Robinson's view of what Barclays Capital had said or written, CSFB's view was that the debt markets were closed or limited and that there was limited, if any, availability of new bank finance. A government "comfort letter" was likely to be required in the short term, but, said Mr Nelson, the board was not in a position in which it needed to seek legal advice about adoption of the going concern approach. Mr Robinson's view (though not, I think, expressed at the time) was that the bond market would always remain open to Railtrack *provided* that the market believed that the Government was supporting Railtrack.

#### **Mr Byers meets the SRA Chairman**

85. On 24<sup>th</sup> July Mr Byers met Sir Alastair Morton, their first meeting since Mr Byers had taken office. Sir Alastair said "Railtrack can't hack it" and expressed doubt as to where the finance it needed could come from. Mr Byers said he was looking for a period of stability rather than coming to some immediate view of how to deal with Railtrack.
86. On the following day Mr Byers' Private Secretary, Mr Hill, e-mailed, inter alios, Mr Rowlands saying that "the Secretary of State wants to have decided the way forward by the first week in September". That sentence was under the heading "Options for

Railtrack". It was consistent (said Mr Rowlands, as I accept) with a paper being needed in order that it should go to the Prime Minister at the end of July for it to be taken away as summer reading with a view to some decision in September. The "way forward", as Mr Byers said in cross-examination, as I have already noted, could have been any of the options put forward or none; the e-mail cannot be taken as an indication that Mr Byers had already espoused any particular course of action relating to Railtrack.

**Mr Byers again meets Mr Robinson: 25<sup>th</sup> July**

87. Mr Robinson and Mr Byers met a second time on Railtrack affairs on 25<sup>th</sup> July. There is unresolved uncertainty as to how the meeting came to be arranged. At the Department it was thought Railtrack had sought the meeting but it may be it was part of the intended pattern of monthly or regular meetings. There are some debated issues as to what was said by Mr Robinson at this meeting concerning the accessibility of the bond markets to Railtrack, the terms in which a "soft" letter of comfort was spoken of and whether there was mention of a possible inability of Railtrack to make a "going concern" statement come its interim results in November. Another issue was whether Mr Robinson spoke of things being worse than had been expected.
88. There is no doubt that the subject of the bond markets came up and that access to them was more difficult (so said Mr Robinson to me) than it would earlier have been. Further, although Mr Robinson regarded the "outline speaking brief" (which he had been provided with by CSFB for the meeting) as over-pessimistic, that brief did warn that without a definable basis for Government support and without a cap on WCML exposure, CSFB's concern "is that accessing international public debt markets [in full] is not currently a viable option". For Mr Robinson to have spoken of possible difficulties in the debt market would thus have not only been consistent with what Railtrack's own advisers were telling him but also a tactically likely subject to mention to strengthen his case for a letter of comfort. I hold that Mr Robinson did speak of such access being difficult.
89. The need for a "soft" comfort letter from the Government was also brought up by Mr Robinson but it is said by the Claimants (as their case was put orally to witnesses) that it was said only to be required if the "climate" did not improve. Mr Byers' evidence was that that condition was not added (nor any other) and that he expressed concern about the idea. I prefer Mr Byers' evidence; if the letter was to be required only if the "climate" did not improve one could expect some inquiry into what that vague condition was intended to mean, yet there seems to have been none. Moreover, nothing would have been more natural to a Government which had agreed the principle that, whilst it would stand behind the railway industry, it would not stand behind any particular company in the industry, than that it would express concern at the notion of being required to give some seemingly bottomless and general letter of comfort, however "soft". The contemporary note, moreover, attributes to Mr Byers, à propos a comfort letter, the remark "concept does not please him". Mr Rowlands' evidence was also that the condition about the "climate" was not added.

90. As for the "going concern" statement, Mr Byers recollects Railtrack's possible inability to make one being mentioned by Mr Robinson although the contemporary note contains no supporting mention. The note does not aspire to be verbatim but I would have expected the "going concern" point to have appeared in it if it had been expressly raised and I might have had difficulty in accepting Mr Byers' evidence that Mr Robinson had asked for no minute to be made of disclosures on the financial aspects then raised. I cannot think that Mr Robinson would have so presumed on a subject as to which the Government would plainly wish to have some record. However, it may well be that Mr Byers was right and that there *was* talk about the going concern basis in relation to the November interim results. Mr Robinson accepted in cross-examination that the notion of a comfort letter was raised both as to drawdown of existing facilities *and* "for the interim results". It is difficult to see the relevance of a comfort letter to the interim results if it was not in order to avoid "going concern" difficulties.
91. However, in a sense it matters little whether the subject was *expressly* referred to or not or agreed or not agreed to be minuted because it would have been plain from the admittedly more difficult position as to the bond markets and the admitted request for a letter of comfort, conditional or not, that the "going concern" basis was heading towards being a real difficulty for the company by November. The Government side, told by Mr Robinson, as the contemporary note records, that the company would run out of money in September or October, could fairly have *inferred* that there would be a going concern problem, whether or not it was expressly said that there would be and on that basis the difference in the evidence is not so much between one version and another but an understandable confusion between what was said and what was reasonably inferred at the time from what was said. I hold that the Government side did, at the conclusion of the meeting, believe, and had reasonable grounds to believe, that the company was likely to have difficulty in making a "going concern" statement on publication of its interim accounts in November. Indeed, it was Mr Robinson's own belief (though I do not say it was mentioned at the time) that without a soft comfort letter Railtrack itself would have had to announce that it could not draw even on its *existing* facilities and could not be regarded as a going concern.
92. As for things being worse than Mr Robinson had expected, Mr Robinson's own evidence suggests that that was so. He accepted that the "climate" had changed for the worse since April and, as I have mentioned, that that made access to the bond market more difficult. Mr Rowlands' evidence was that Mr Robinson had said things had got worse, beyond the "climate", and that he had said that the financial position was far worse than he had first thought. Mr Byers' evidence was to the same effect. I prefer the Defendants' and Mr Byers' evidence; not only is their evidence clear, it would have been a natural approach on Mr Robinson's part, pressing for help, opening negotiations in which new and further provision - be it a comfort letter, accelerated payment or direct negotiations not involving either the Regulator or the SRA - was being sought, to make a case for it by saying that his task was difficult and that things were worse than he had earlier expected or, more generally, worse than anyone had earlier expected.

93. In practical terms a main object of the 25<sup>th</sup> July meeting, so far as concerned Railtrack, was to arrange that its advisers, CSFB, would meet directly with the Department (and its advisers, if it brought any in) to develop a strategy to remedy Railtrack's difficulties, a strategy, still then only in embryo, which would, as I have mentioned, be called "Rainbow" and that this form of meeting would be acceptable to the Department. For its part the Department was willing to meet with CSFB but, because Mr Robinson had spoken only generally so far, it had not realised that what was going to be proposed was a strategy that was hoped by Railtrack entirely to by-pass the Regulator and the SRA. I do not say it would have vetoed such a strategy; it simply had not yet realised that that was what was going to emerge. Because of that this meeting on 25<sup>th</sup> July was not, I think, a watershed in the Department's view of Railtrack; that came only later, after meetings with CSFB further spelled out Railtrack's condition and what Railtrack had in mind.
94. Mr Rowley emphasised Mr Robinson's evidence that he had left the meeting of the 25<sup>th</sup> July feeling that the Government was supportive of Railtrack, as if it was wrong for the Department to have allowed that to occur. The Government was supportive of Railtrack; what was more significant was the level to which it could be taken that it would be so supportive. Mr Rowlands' evidence was that Mr Robinson had no reason to believe that the Department was not ready to engage with CSFB. That was a limited form of potential support. I do not hold the Department to have indicated at the meeting that any particular form of support, still less any particular form which infringed Principle I of the April Agreement, would necessarily be extended to Railtrack. If Mr Robinson left feeling that some support necessarily going beyond a willingness to engage with CSFB and to entertain their proposals had been indicated I would regard that more as a fault in Mr Robinson than a fault in the Department.

**Mr Robinson's assessment of Railtrack's position**

95. Mr Robinson, though he did not say so at the meeting of the 25<sup>th</sup> July, knew that the proposals, when they emerged, could involve additional subsidy of Railtrack in order for it to sustain an "A" rating. He was looking to *additional* funding of between £1–2bn (he had no precise figures) but not in the immediate term. Moreover, some form of government support such as a comfort letter would be needed even in the short term if by, say, September or October, Railtrack wished to draw down on its existing facilities and if the "climate" was such that it was felt that the Government might not support the company. At worst the company could "bumble on" for another 18 months but then it would, absent Renewco and absent interim provision from the Regulator, have such problems as could well lead to administration. But that, he thought, no sensible person would allow. "It never entered my head", he said, "that, as a result of sensible discussions with sensible people, Government would do anything other than support Railtrack ×.". Without *additional* Government support (meaning, in context, other than was already in place and other than the high percentage of the companies' income that in the ordinary way came directly or indirectly from government) Railtrack, he acknowledged, would at some stage cease to be a going concern. The government support needed would have to go beyond Hatfield Re-opener relief and address what, by then, he regarded as deficiencies in the original settlement with the Regulator in January, the settlement the company had elected not to challenge. It was unlikely that the Regulator would give the company what it wanted - the begging bowl speech had set an unhelpful tone - so there had either to be a Rainbow strategy negotiated direct with the Department or some other visible government support such as by the comfort letter that had been spoken of, something sufficient to re-assure the companies' bankers. The comfort letter would be needed to give some re-assurance to the bond market that the Government was standing behind Railtrack. It would thus need to be, I interpose, a letter that required the Government to depart from principle 1 of the April Agreement. It was to be left to CSFB to work up a Rainbow strategy and, so to say, to "sell" it to the Government.

**Mr Rowlands meets CSFB**

96. As had been contemplated at the end of the meeting of 25<sup>th</sup> July, Mr Rowlands met CSFB, on 27<sup>th</sup> July. He reported on his meeting to Sir Richard Mottram on 30<sup>th</sup> July. CSFB had made a presentation using "flip" charts of which no copies were given out and which CSFB retained. They painted a very worrying picture. There was an impending financial crisis; the next major drawdown on Railtrack's *existing* lines of credit was "problematic". Access to the bond market was "doubtful". There would be an issue as to the Board's ability to sign-off on a prospectus for a bond issue. The options were "the Three Rs" - renationalisation, receivership or re-structuring. A manuscript note was made of Mr Rowlands' meeting with Sir Richard Mottram. It makes plain that CSFB had told him that Railtrack's auditors had already considered qualifying its accounts on the "going concern" basis, that Railtrack's ability to draw down on its existing facilities in October was dubious and that a bond issue prospectus might not be capable of being signed-up to. Mr Rowlands raised with Sir Richard the question of whether Railtrack was trading whilst insolvent and whether Railway Administration might not require examination.
97. Mr Robinson had approved the CSFB presentation. He accepted it indicated a projected net debt, absent additional government funding, of £12.2bn, £2.5bn more than the business plan had projected less than 4 months earlier. He accepted, too, that it proposed that £1.8bn of that projected net debt should be replaced by some direct and additional grant from the Government. Indeed, over CP 2, he accepted, an additional £2.2bn would be needed. Even with that support, the value of the company's equity would have been entirely consumed by debt. These projections, he acknowledged, were not known to the market. Had they been known, he said, as is obvious, that the effect on the market would have been very damaging to Group shareholders.
98. CSFB's proposals to deal with this exceptionally grave position were not yet formulated beyond an outline; there were to be other meetings with them. But their objective was to devise a plan which was "fair to Government (e.g. value for money) and "fair" to our stakeholders (but no unjust enrichment)" and which allowed Railtrack a period in order to recover before being restored to the normal regulatory regime.
99. In effect the Department, although no detail was put in front of it, was going to be asked to override or suspend both Principle 1 and (in the sense that ordinary regulation was to be postponed) Principle 3 of the April Agreement. But Mr Rowlands had not expected this first meeting to disclose what CSFB's and Railtrack's "bottom line" would be.
100. A recurring line in Mr Rowley's cross-examinations was that if, in fairly conducted negotiations, one party found the other's proposals totally unacceptable in some part, then commercial fairness demanded that the proposing party should forthwith be so told so that it could have the opportunity to amend its proposals accordingly. I did

not take Sir Richard Mottram, Mr Rowlands or Mr Byers to dissent from that general view of fair negotiations but there were, in effect and to summarise, 3 qualifications. Firstly, it would sometimes be necessary, said Mr Byers and Mr Rowlands, to find if the potentially unacceptable provision was, indeed, an inescapable part of the proposer's (CSFB's or Railtrack's) "bottom line" or final unchangeable position. Secondly, on some key issues the Defendants did in any event indicate, as will appear, that some proposals were unacceptable. Thirdly, I am by no means certain, in the grim financial situation which the continuing talks on and from 27<sup>th</sup> July disclosed and in the course of discussions which the Treasury had to be brought into, that anyone could be sure, until the final decision was made on 5<sup>th</sup> October, that a breach of the April Principles might not have to be swallowed, however indigestible and unwelcome in principle, as the least unattractive of the achievable solutions. What it was that was "totally unacceptable" was thus not immutably fixed or might prove not to have been. I do not hold the Defendants or Mr Byers to have conducted themselves unfairly on this account or with a view to making an administration harder for Railtrack to avoid, nor can I take their conduct relative to this issue as any ground for an inference that there was targeted malice against Railtrack shareholders in Mr Byers.

#### **Renewco**

101. One of the forms of unfairness in its negotiations which is alleged against Mr Byers and the Department is that it failed to indicate that it would not sign up to Renewco. Had only it done so, the Claimants' argument runs, Railtrack could and would have gone back to the Regulator for an interim review that might have saved it. But the argument depends upon there having been some early decision by Mr Byers that Renewco was immutably unacceptable, whatever other options might or might not be chosen by or be forced on the government. There is no hint that that was so and pointing against it is that on 29<sup>th</sup> July Mr Byers himself wrote to the Chief Secretary at the Treasury explaining what Renewco was to be and asking for Treasury consent to its adoption so that the whole April Agreement should not collapse. It was put to Mr Byers that, in writing the letter he was dissimulating, pretending that he wanted Treasury consent whilst secretly intending and hoping that he would not get it. He denied that. He would have needed to warn the Chief Secretary that the letter did not mean what it said and the Chief Secretary would have needed to be willing to join in the ruse. There is no evidence whatsoever of either being the case and no reason in evidence, either, why the Chief Secretary should not have taken the letter at face value or why I also should not do so. Again, there is no material basis for any relevant inference against Mr Byers.

**Miss Vadera's Scoping Group paper**

102. On 31<sup>st</sup> July Miss Vadera circulated officials at No. 10, the Treasury and the Department with a comprehensive paper headed "Project Ariel: whether and how to restructure the industry, Questions to be addressed by advisers with evidence and analysis". "Ariel" was the code-name she gave to Group and Railtrack and "Project Ariel" was her name for a government strategy to cope with what she perceived to be the problems inherent in the railway industry and Railtrack, which included that in financial terms it seemed to be a bottomless pit. Should there be a takeover? Could there be vertical integration? Could renationalisation or a not-for-profit trust model be engineered through insolvency? Should Renewco be approved (which might enable Railtrack to avoid the very insolvency which could provide a convenient path to renationalisation or a not-for-profit trust)? These were serious questions but they were only that; questions in which Miss Vadera, as Mr Rowlands said and as I accept, was merely putting forward her thoughts. At the time there was no Government, No. 10, Treasury or Department policy formulated as answer to any of her questions. Only two days before, for example, Mr Byers, as I have just described, had written asking for Treasury consent to Renewco.

**Mr Rowlands reports to Mr Byers**

103. On 30<sup>th</sup> July Mr Rowlands reported to Mr Byers that he and his officials were working with both the Treasury and No. 10 on an analysis of the options for Railtrack. He sent a note of work already done. There was no mention in it of administration followed by a CLG. On the following day Mr Rowlands reported to Mr Byers on his meeting with CSFB. It was put to Mr Byers that thereafter he was engaging (or authorising or permitting his officials to engage) in what he knew would be pointless negotiations or discussions as to Rainbow, a strategy which would have put Railtrack's financing, unacceptably, outside the range of the Regulator's decisions. He answered, as I accept, that there was no way he could have known on 31<sup>st</sup> July that the proposals which Railtrack would ultimately put forward would be unacceptable and, in particular, the Prime Minister having been personally very concerned about the regulatory system, he added that it *could* have been that a proposal to by-pass the Regulator could have proved acceptable.
104. In the course of the meeting a Railway Administration was discussed as an option, Mr Rowlands pointing out that the Administrator would have a duty to keep the railways running and that it would be for the Administrator to look to the creditors' interests. Mr Byers spoke of administration as being a thing which could be "left" to happen and, in that context, I take the later reference by Mr Byers to "Should bring to a crunch in Sept/Oct" as not meaning anything such as that the Department should procure that the company would go into administration in those months but rather that the financial pressure already on Railtrack would bring its affairs to a crisis about then and that the Department would then need to be in a position to manage the situation. His final conclusion on 31<sup>st</sup> July was that he wanted all options, including administration, "worked up a.s.a.p."

**1<sup>st</sup> August 2001**

105. On this day Mr Nelson of CSFB made a presentation to the Department in the presence of both No. 10 and Treasury representatives. Mr Byers was not there. He said Railtrack had virtually no management control, it was the worst case he had seen for a period and that there was management paralysis. It had major projects without the skills to manage them. The Regulator's approach was to grind it down, which made matters worse.

**Mr Byers' submission to the Prime Minister**

106. On his last day before his August holiday Mr Byers on 3<sup>rd</sup> August sent a submission to the Prime Minister (with a copy to the Chancellor). Options for Railtrack were still being looked at but with added urgency because of its deteriorating financial position. Mr Byers' view was that there may be only 3 options which were realistic; a restructuring of the company, a takeover or a conversion into a not-for-profit trust. Help from outside advisers could be used over August. "It may be advisable to take Railtrack into protective special railway administration and events could even mean it is inevitable, as a prelude to moving to the chosen option. This needs to be looked at in more detail".
107. Mr Byers summarised the stark message which CSFB had given; the financial problems were perhaps overwhelming and the company was bereft of effective management but the Department was not yet in a position to decide fully between the available options. He summarised CSFB's Rainbow proposal as then understood; the share price was to be reduced to a nominal level and dividends would not be paid in return for some kind of yearly interest payment to shareholders and the regulatory regime would be suspended and be replaced by performance targets set by government. The submission does not suggest that a suspension of the regulatory regime was immutably unacceptable; indeed it figures as an express possibility in relation to the takeover option. If targets were not met the government would receive equity in exchange for continuing financial support. Mr Byers wrote, correctly as I would see it, that it was for Railtrack and CSFB to lead on this restructuring proposal. Plainly that is what he expected. He stated that he did not rule out the Rainbow proposal although he was not convinced it would either be acceptable politically or would address the company's fundamental problems.
108. He specifically addressed railway administration as a subject on which work was in hand, adding:—
- "It is clear that we ought not to contemplate taking Railtrack into administration, which we could achieve by withdrawing government support, without being equally clear about how we would like it to come out of administration and therefore which option we want to pursue."

Mr Byers was cross-examined on the basis that the objection to renationalisation or the use of a not-for-profit trust was one of cost; shareholders would, at great expense, have to be bought out but that, by contrast, administration then followed by a not-for-profit trust offered a cheap route to the same end. I accept Mr Rowlands' evidence that there had been no discussion on the lines that administration should be used because it represented a cheaper way. Indeed, there was no basis in fact for the suggestion, put to Mr Byers, that he had realised that he could arrive at a not-for-profit trust solution "at no cost" via administration. Not only would the administration need to be funded whilst the administrator considered the commercial alternatives open to him but the government, were it to try to purchase Railtrack assets so as to emerge with a not-for-profit trust solution, would have to ensure it was, in effect, the highest bidder so that the Administrator could properly accept its offer. That this would all be "at no cost" would have been grossly improbable.

109. It was not put to Mr Byers that he was dissembling in the terms in which he made his submission of 3<sup>rd</sup> August to the Prime Minister and I am entitled, I think, to take the submission as representing what was then his view. In any event there is no good reason not to. On that basis, the Department was going to continue to entertain such restructuring proposals as Railtrack and CSFB put before it whilst working up the alternatives. Railway Administration was not an end in itself but, even if adopted, would be but a step on the road to one. There was no decision directly or indirectly to procure an administration although it was sensibly recognised, in the light of what Railtrack and CSFB had been saying, that for the government merely to withdraw its support could achieve an administration. Leaving aside takeover (the viability of which was to be explored) and the equity restructuring (which awaited CSFB's more detailed proposals) what needed work on the remaining possibility, in case neither takeover or CSFB's proposals proved viable or acceptable, was what was the best attainable model for the next owner and manager of the infrastructure should there be no additional funding for Railtrack and how, if at all, could the government achieve that model. That needed working up, but none of Mr Byers' three options was yet abandoned nor any yet settled on.

**CSFB's further Rainbow proposals**

110. CSFB had met Department officials, as I have noted, on 1<sup>st</sup> August and on 7<sup>th</sup> made a further presentation by way of "flip" charts. A transitional period of 3–5 years was proposed. Government support would be given so as to maintain an "A" rating. There would be a fixed return to shareholders by way of dividend or some equivalent and at the end of the transitional period the equity would be owned between the shareholders and the government in a proportion which depended on the company's achievement of certain as–yet–to–be–specified performance targets. There would be a guaranteed minimum value ("the floor price") to current equity holders at the end of that period. When Mr Rowley described the proposals of 7<sup>th</sup> August as putting some flesh on the bones on the proposal of 27<sup>th</sup> July Mr Rowlands fairly replied "perilously little skin here". I agree. There were still no numbers given, for example, as to the intended guaranteed share price at the end or the return to shareholders in the meantime. As then framed the proposals were unacceptable as totally lacking in detail but it was contemplated that detail would later be provided and whilst they were unattractive as then put, there was no Department view that, in principle, no equity solution could be acceptable in principle.
111. I accept Mr Rowlands' evidence that there had been no decision that suspension of the regulatory regime was unacceptable and that at the 7<sup>th</sup> August the Department's view was still that it should try to find what the company's bottom line was as to its Rainbow proposal. It could not be pretended that an equity solution would be easy to achieve; on the one hand the Treasury argument, not hardened into a conclusion, was that the shares were already worthless; on the other hand, in order to get the broad shareholder consent that would be necessary if any proposal of the Rainbow type were to be implemented, *something* would have to be dangled before the existing shareholders, many of whom were already nursing heavy losses on their holdings. It may be that even on 7<sup>th</sup> August the Department mentioned reservations about there being a floor price or interim dividends but the Department did not then say that Rainbow was unacceptable as it had not been decided that it was and CSFB's own bottom line was still being sought. CSFB were told, as was the case, that the Department would instruct or had instructed Schroder Salomon Smith Barney ("SSSB") as its own advisers, which, as it seems to me, would have been a wasteful or eccentric course had it already been decided that both a takeover and Rainbow were immutably unattractive.

**10<sup>th</sup> August 2001**

112. SSSB met the Department with a Treasury representative present. The Treasury manuscript note of the meeting includes the line (without attributing it to anyone in particular) "Must not let them" [i.e. Railtrack] "waste time on unacceptable Rainbow". Mr Rowley took this to be an indication that Rainbow (meaning, I think, here some equity solution to be developed from the initial proposals) was all along immutably unacceptable. I do not accept that. The Department (and the Treasury) certainly could see no justification for a floor price and a fixed dividend at any substantial levels but, until Railtrack's "bottom line" was found, it was not clear that either a substantial floor price or dividend would be insisted on by Railtrack. There was, though, an unwillingness to allow Railtrack to delay by spending time developing any forms of Rainbow which, by incorporating a substantial floor price or dividend, would inevitably prove unacceptable. CSFB or Railtrack or both would therefore need to be told (and were later told) not that they were, as it was put, barking up the wrong tree with any equity solution but, as Mr Rowlands said in evidence, that "We did not want to buy a concept called the floor price and that is why we were worried, for example, about the dividend". The Department could undoubtedly have been more categorical and earlier with indications that a fixed price or dividend at any substantial level, if insisted on in any equity solution, would lead to that solution being rejected but I do not see it as having been unreasonable for the Department to have held back such comment until a more developed version of Railtrack was laid before them. I certainly do not see their delay as part of some Department or Byers' plot to increase Railtrack's difficulties, to lure it into developing no solution other than Rainbow or to make its administration more likely.

**Meetings in mid-August**

113. Whilst the politicians were on holiday, the advisers continued their work. On 13<sup>th</sup> August a meeting was held which introduced Mercers as advisers brought in to assist and advise the Department on the structures best deployed in the railway industry - what was called "railway architecture". Miss Vadera attended and said "We", meaning the Treasury, "do not want to compensate the shareholders". She saw Railtrack's difficulties as an opportunity to re-nationalise but I accept Mr Rowlands' evidence that the Department had still come to no view of how to proceed.
114. On 14<sup>th</sup> August there was another departmental meeting at which Mr Rowlands is recorded in the contemporary manuscript note as saying Railtrack "is finished". In cross-examination he explained; Railtrack was finished if there was no further government support, a belief he took to be CSFB's own view. Without that it would be unable to draw on its bridge financing and unable to launch a bond issue. I do not see the note as assisting the Claimants.
115. It was at this meeting there first emerged the idea that legislation might be necessary to undo the Regulator's ability to conduct an interim review giving money to Railtrack. The idea, which did not come from Mr Rowlands or Mr Byers, was that *if* the government decided as a matter of policy not to give further financial support to

Railtrack in its current form with a view to a structural change in the industry, it would, at lowest, be frustrating to find the Regulator then bolstering that current form by awarding it new money. It could be, therefore, that the Regulator's powers would need to be limited but it was recognised that that would need Parliament's approval.

116. On 15<sup>th</sup> August there was yet another departmental meeting at which SSSB, Mercers, Treasury advisers and CMS Cameron McKenna, newly brought in as the Department's Solicitors, all attended. Mr Challen of SSSB spoke of Railtrack as a "failed privatisation" but I take the view that Mr Rowlands did in his cross-examination, namely that that did not signify that Rainbow in whatever form it might finally emerge was a proposal that was never going to be accepted; Railtrack's and CSFB's "bottom line" was still awaited. Certainly there is no hint that Mr Byers, still on holiday, had come to any decision that the equity option generally or Rainbow in particular was never going to be acceptable, still less that the Department, in his absence, should nonetheless pretend to CSFB that it might be acceptable. The Department was at this holiday stage being neither steered by nor reporting to Mr Byers.

#### **Further Rainbow developments**

117. On 20<sup>th</sup> August CSFB put a more detailed form of Rainbow to the Department and its advisers. The interim period was to be 4 years. Group's dividends would be capped at 20p (down from the 26p they had been enjoying). At the end of the period the shares would be relaunched at a floor price between 350p and 500p depending on a performance regime to be agreed. The Government was to subsidize Railtrack's or Group's revenue to achieve earnings giving a coverage rate of 2.5 times (presumably to keep an "A" rating and hence to facilitate bond issues). The WCML was to be re-financed by Government. Government support was to be unconditional and uncapped.
118. Even if, because of its very grave difficulties, Railtrack needed huge but unquantified and unquantifiable government assistance in ways that broke the April Agreement Principle 1 and required the regulatory regime to be set aside and even if, because of those very difficulties, the government was willing to go to its aid, it would be difficult to see why Group's shareholders should be so sheltered from those difficulties as to continue to receive a dividend only mildly reduced, to have its "A" rating propped up at public expense and to benefit from a re-launch at a guaranteed floor price. Even without Miss Vadera pushing the Treasury against shareholder support it is difficult to see how, *on the figures supplied to it on 20<sup>th</sup> August*, the Defendants could have accepted Rainbow as it then was and I accept Mr Rowlands' evidence that objection was raised to the floor price and dividend proposals (although he did not remember whether it had been raised at this stage or at a previous meeting).
119. But to reject Rainbow as to some of its details and to allow CSFB to try to come up with something better was not to withdraw government support in all its possible forms from Railtrack and, as I have mentioned, the alternatives to Rainbow could be found, for example, to be so inconvenient, expensive or unachievable as to make even

Rainbow, albeit probably at adjusted levels, the least unattractive possibility. There had as yet been no decision to limit government assistance to only that which it was legally bound to give. There had not even been a decision to abandon Renewco. The Secretary of State was still on holiday. Accordingly, the Department, having had all along undertaken to CSFB that it would tell it if it elected not to support Railtrack (as, if that was so, Group would have had promptly to make an announcement to the Stock Exchange) left CSFB to see if it could change or develop its proposals for Railtrack's salvation (including their turning from the financial to the performance and management issues required to be dealt with in Rainbow). But plainly the equity re-structuring option was fading fast.

#### Mr Corry's e-mail

120. Mr Daniel Corry was Mr Byers' Special Adviser, someone in whom Mr Byers could and did confide on political matters inappropriate for discussion between him and his Civil Servants. Mr Corry remained in London whilst Mr Byers was on holiday. On 22<sup>nd</sup> August they spoke. Mr Byers was in Crete. According to Mr Byers Mr Corry said he was encountering a sentiment at the Department that the not-for-profit trust option was fading as a viable option amongst officials. Mr Byers' response, he said, was that it was not to be closed down but that Mr Corry, as Mr Byers put it, was to "Go in hard, make sure you keep this as an option for me to look at when I get back".
121. The e-mail which, in consequence, Mr Corry sent to Mr Linnard at the Department took a very different shape. It speaks of Mr Byers being "very attracted to the option of pushing them into administration. It does not cost too much, allows us to signal a big change. He cannot imagine us putting more money into Ariel ××.". Mr Corry adds that Mr Byers felt that "we would not lose that much control if Ariel" [i.e. Railtrack] "went into administration ××" and that Ariel was by then no more than a conduit of government money.
122. Mr Byers was adamant he had not talked about being very attracted by the idea of pushing Railtrack into administration. His credibility was stretched thin here but it could just have been that, told to go in hard to preserve the not-for-profit trust option to which administration would be seen as a convenient pre-cursor, Mr Corry had mistakenly over-stressed the pre-cursor rather than the need to preserve the end option. But even if I disbelieve Mr Byers' explanation I must note two things; firstly, in context, the pushing into administration would seem to have consisted of nothing more than not putting more money into Railtrack, a course the Government was, within broad limits, fully entitled to consider and adopt and secondly, that Mr Byers' message to Mr Corry, a message which on this basis, was an unguarded and undissembling communication of Mr Byers' intentions, provides no hint of malice against Group's shareholders.
123. I should add that Mr Rowlands (to whom, presumably, Mr Linnard reported the contents of Mr Corry's e-mail) telephoned Mr Corry and told him never again to send such an e-mail because it seemed to him to pre-judge work that the Department had not yet completed. A recurring theme in Civil Service advices to Mr Byers was that

it was important not to close down options until a final fully-informed decision was made and I have no reason to think he ignored such advice. Politicians can change their minds. Even if, away on holiday, Mr Byers, had expressed himself in a way that suggested a mind made up, it does not follow that later, back in the Department and receiving the advices that he did, his mind remained made up; his conduct on his return, so far as that throws light on his state of mind, suggested that no decision as to Railtrack's administration had yet been arrived at.

124. Mr Rowley invited me to draw adverse inferences from the Defendants' failure to call Mr Corry, still in government employ. I decline to do so; firstly because his evidence would be likely to go more to credibility only than to the real issue in the case, secondly because even if Mr Byers' views had been as Mr Corry had described them, I would have been far from sure, for the reason I have given, that they remained so once he was back from holiday and, thirdly and chiefly, because, as I have mentioned, until a late stage it was the Claimants' plan that they should call Mr Corry, a plan not abandoned, I apprehend, until he supplied a witness statement of what he proposed as his evidence.

#### **No. 10's understanding**

125. On 23<sup>rd</sup> August Mr Jeremy Heywood, the Prime Minister's Principal Private Secretary, wrote a note to Dr Brian Hackland, Senior Policy Adviser on Transport at No. 10, saying, after speaking to Mr Rowlands, that a paper was being put together for Mr Byers' return and that it would propose (or was likely to propose) that Railtrack be put into administration to allow the government to restructure it by way of a CLG owned by persons such as the TOCs, the Trade Unions and others. Mr Rowlands told me that he regarded Mr Heywood's note as inaccurate in that at that date the analysis they were doing in the Department had not got to any such point. I accept that that was so but I would also accept that an administration which the government would strive to see was followed by a CLG was already being seen as a lively possible future course, though not yet to the exclusion of others.

#### **Takeover as an option**

126. It will be remembered that one of the three options being chiefly considered was Railtrack being taken over by some other company. Mr Rowley sought to make something of this option not having been seriously explored even though (as was the case) it had seemed to be the Prime Minister's preference. Mr Rowlands' evidence, which I accept, was that he had looked into the possibility with Bechtel and with investment banking advisers J.P. Morgan and that, to use his phrase, "It did not run". There was no evidence from the Claimants that it might or could have "run" and in the circumstances I cannot see that the Defendants were at fault in not pursuing it further and their failure to do so provides no ground for any relevant inference against Mr Byers.

**Ernst & Young enter**

127. On 23<sup>rd</sup> August the Department instructed Ernst & Young to advise it, chiefly on whether or not Railtrack was insolvent within the meaning of the Railway Administration legislation and as to the practical steps that would need to be taken by administrators, if they were to be any. CMS Cameron McKenna, I apprehend, were looking at such issues for the Department from a Solicitors' angle.

**Mr Marshall's presentation**

128. On 28<sup>th</sup> August there was a meeting fully attended by advisers at which Mr Marshall as Railtrack's Chief Executive presented his plan for the restoring of normal railway service. Insolvency and courses of action deriving from it, in other words strategies for Railtrack *other* than Rainbow, were plainly within contemplation at the meeting as Mr Marshall spoke of how administration or receivership would represent a backward step and Mr Robinson also spoke against such action. As noted by Mr Page of CSFB Mr Robinson said that in "his view the Company was free to continue to trade without the need for any announcement" to the Stock Exchange, "however it was clearly dependent on continued Government support of the Equity option", meaning Rainbow. Mr Rowlands confirmed that should that change (meaning, I apprehend, that should the Government decide to reject Rainbow) then the Department would inform the company, although he pointed out that he had been without formal instructions over the last few weeks as the Ministers were on holiday. Some "iterations" would be likely to be needed to Rainbow, said Mr Rowlands, but whilst the Ministers were away he was not in a position to discuss it further.
129. His private position was that Rainbow as it had been fleshed out with the floor price and dividend figures given on 20<sup>th</sup> August was unacceptable but he resisted that there was never any possibility of the discussions bearing fruit from Railtrack's point of view. Foreshadowing Sir Richard Mottram's evidence as to the comparative nature of choosing between options, he said that if there had been no other option left then *some* version, perhaps a very cut down version of Rainbow, would have had to have been put in place; "one thing we could never have contemplated was another shambles on the railway. After all we had had one only in October the previous year", a reference, I took it, to the disruption, ballooning expense and delays consequent on the Hatfield disaster.
130. A point about Mr Robinson's evidence arises out of the note of the meeting taken, as I have mentioned, by one of Railtrack's own advisers. Mr Robinson said that he remembered the meeting reasonably well and accepted that he had strongly believed at the time that the sense of the note was correct where it said that administration would be a major step backward and that managing a company in such a position would lead to escalation of costs and a deterioration in service. Nonetheless he could not accept that he had said what Railtrack's own adviser's note attributed to him. What was attributed to him reflected his views, he agreed, and was in the note and there was no reason given as to how the note-taking adviser could have been

mistaken but, for all that, Mr Robinson would not accept that he had said what the note attributed to him. His witness statement had not disclosed that the note, which he himself exhibited, was incorrect, nor was it put to Mr Rowlands in cross-examination that Mr Robinson had not in fact said what the note attributed to him. I thus have little reason not to prefer the note. The episode does not reflect badly on Mr Robinson's honesty; if he had been dishonest he would have disavowed his belief in the correctness of the sentiments attributed to him. But it does reflect poorly on his memory even of a meeting which he claimed to remember reasonably well. Mr Robinson did accept, though, that by this time Railtrack's directors were taking legal advice from Simmons & Simmons on the procedure for railway administration and on other forms of insolvency, that by now at every board meeting the Board raised with its advisers whether it was proper to continue to trade without any announcement to the market and that Mr Rowlands had made it perfectly clear that the Department *was* considering options as well as the equity option.

#### **The Government takes Counsels' advice**

131. On 29<sup>th</sup> August the Department took advice from Lord Grabiner Q.C. and Mr Jonathan Crow. The Government, said Counsel, could not assume that it had an unwritten power to acquire shares in Group. Given that Parliament had specified railway administration to deal with a situation in which Railtrack could not pay its debts, use of some other procedure (such as buying Group shares at the reduced price then obtaining) would be likely to be regarded as contrary to the intention of Parliament. There were thus two alternative ways for government to proceed; an "equity route" or a "non-equity route", the latter contemplating the assets ultimately being transferred to a not-for-profit company after using the Railway Administration procedure. The Government had to decide which route to adopt and then tell the company's board. If it decided not to fund the company beyond its existing commitment, the decision should speedily be passed on to the Railtrack board. There was no legal obligation on the government to go beyond its existing commitment. It was acknowledged that the fact that no more money would be forthcoming would obviously lead to an immediate collapse in Group's share price. However, the advice did not preclude Rainbow - the SRA could acquire the shares in place of the government - although the Rainbow plan might have needed amendment accordingly. Mr Rowlands appreciated that the advice did not preclude adoption of Rainbow if it were it chosen to be the option adopted.
132. In a follow-up telephone consultation on 31<sup>st</sup> August Lord Grabiner advised that Renewco could not proceed ahead of a decision on the main question as to use of the equity or non-equity route. Proceeding with Renewco could give the Board of Railtrack a confidence that it was to be supported, a confidence which, if the main decision were later to be that it was not, could give rise to difficulties. As Mr Byers not unreasonably understood the advice as passed on to him, it was that if Renewco was done it would suggest that the Government was standing behind Railtrack and that that could be taken as being a decision that the non-equity option had been closed down without that having in fact being decided.

133. Miss MacKenzie, who was at the consultation with Counsel, gave evidence that if, contrary to the manner in which she would have expected Group's board to behave, it failed, on being told that there would be no additional government funding, to make an announcement to the market to comply with the Stock Exchange listing rules, then the Department would have had to consider whether *it* should itself make an announcement. She would have expected the Department to consult Lord Grabiner again as a matter of urgency if that occurred.

#### **SSSB's proposals**

134. On 31<sup>st</sup> August SSSB, who had been working in conjunction with Mercers, put forward to the Department lengthy and detailed proposals to meet the problem, which it plainly understood to be the case, that Group would be unable to make the "going concern" representations that were required to enable it to draw down on its credit facilities and was heading to an illiquidity crisis. It was SSSB's advice that without confirmation of government support, Railtrack would almost certainly go into administration. It is not necessary to go in detail into the proposals save to say that the advisers saw an "equity route" to be possible, adopting what SSSB called "a concept of dormant equity". The plan differed greatly from CSFB's Rainbow proposals, which SSSB thought not to be viable, but it would leave Group as a listed company. The significance of the SSSB-cum-Mercer proposal is that unless there is some reason (and I have seen none) to regard their work as part of a charade (no doubt a very costly one) it tends to indicate that no decision had yet been made either that an equity solution was not to be pursued or that administration was already the chosen route.

#### **A paper for Mr Byers on his return from holiday**

135. On 31<sup>st</sup> August Mr Rowlands wrote a paper to report to Mr Byers, for his return from holiday on 3<sup>rd</sup> September, on what progress had been made over the prior four weeks and to prepare him for his forthcoming meeting with the Prime Minister and Chancellor. In heavy type Mr Rowlands began:-

"It is essential that you do not close your mind or take decisions on any options for Railtrack at this stage. Each of the options still needs careful analysis with a view to determining the most appropriate solution. Any decision would need to be communicated to the company and then by the company to the Stock Exchange, probably precipitating a crisis which we are not ready to handle."

In his opening Mr Rowley, in response to a question of mine, described this as "window dressing" meaning, as I took it, that the Claimants' case was that a decision had in truth already been made, be it either to withdraw further funding, to reject Rainbow and any other equity solution or to manipulate Railtrack towards administration. However, when Mr Rowlands came to be cross-examined none of those possibilities was put to him in relation to this paper. I have no reason,

therefore, not to regard this heavy-type advice as genuine bona fide advice intending to convey and convey only what its words made plain. So far, at least, as Mr Rowlands was concerned, none of the possibilities had yet been a matter of decision by the Department or by Mr Byers; the options still required careful analysis.

136. Mr Rowlands' heavy-type passage throws further light on the earlier Corry e-mail. If, contrary to his interpretation of the Corry e-mail, Mr Byers had earlier already rejected any option or had already decided on any particular course, Mr Rowlands was here ensuring or attempting to ensure, wittingly or not, that that earlier rejection or decision would be undone by his insisting that the time for decision had not yet arrived. So long as Mr Byers accepted that advice and acted on it (as I would expect) then even if Mr Byers' interpretation of the Corry e-mail was flawed, even if Mr Corry's understanding of what he had been told had been correct, then, even so, Mr Byers' original message to his Special Adviser would by now have become no indication of Mr Byers' current intentions.
137. Mr Rowlands reported the advice received as to Renewco, a favourable decision as to which in any event could not be made before 19<sup>th</sup> September when the answer to an application for State Aid clearance was expected from Brussels. He also summarised CSFB's equity proposals, saying, of Rainbow, that only a very much tougher version would be likely to be acceptable. He reported on SSSB's "dormant equity" structure. Turning to "non-equity", he felt there were strong arguments for it but that more work was needed. He touched on administration, pointing out that the Administrator would be independent. Of the Regulator, he advised that he could not see a way of proceeding without side-lining him and that legislation would be necessary to do that.
138. Takeover had fallen away as a practical option; it was not going to run.
139. Mr Byers was taxed in cross-examination on the subject of the legislation contemplated in order to side-line the Regulator. It was put to him that it was to be directed, if there was to be any such legislation, to preventing the Regulator from providing funding for Railtrack in circumstances in which he, Mr Byers, wished to push Railtrack into administration. Mr Byers denied that; he added:—

"× it would have had to have the approval of both the House of Commons and the House of Lords. It would have required primary legislation, but you are right to say that the reason why consideration was being given to a bill was because, if an elected Secretary of State on behalf of the Government takes a major public policy decision, he would not want that to be undermined by the Rail Regulator ×. If I arrived at a decision not to provide more money to Railtrack [still meeting our legal obligations to pay any money over to Railtrack that we were obliged to do] then we would not want that decision undermined by the Rail Regulator ×. [it] would be subject to full democratic debate in the House of Commons and the House of Lords ×."

It is to be remembered that I am not here concerned with whether that approach would have been adequate against attack by way of Judicial Review or under the HRA (which I shall come on to). But, for the purposes of the tort I am considering, that, as it seems to me, was a perfectly acceptable line for Mr Byers to take; I do not see that he or the Department can be fairly criticised for anticipating that *if* there was to be no funding beyond Railtrack's present legal entitlement then legislation *might* be needed to be sure that that important policy decision could not be undermined. I see no ground for any material inference against Mr Byers.

#### **Hard-headed analysis**

140. The Claimants complain that, despite reference on the Government's side to the need for hard-headed analysis of the Rainbow proposals, that was never done and that the Government's work was, at least from the 31<sup>st</sup> August, addressed and addressed only to an examination of the non-equity (and hence administration) alternative. There was no indication that any amount of analysis, however hard-headed, would have led to the equity proposals coming from CSFB to have been so altered as to have become acceptable, as would have needed to be the case, both to a substantial voting majority of Group shareholders and to the Government *once*, as later appeared, it had transpired that administration-cum-CLG was an achievable option but, in any event, whilst a failure adequately to have considered alternatives is a familiar ground for complaint in Judicial Review or HRA proceedings, unless there are grounds for seeing it here as part of a deliberate intent on Mr Byers' part to inflict harm on Group's shareholders it is difficult to regard it as material to this action. Had there been some instruction from Mr Byers that on no account should the equity option be analysed one might have perhaps found some reason for supposing that such a deliberate intent was in his mind but no such message was given by him to his officials and I see this argument as not contributing to the Claimants' case.

#### **A 4<sup>th</sup> September meeting and "Grannies"**

141. On 4<sup>th</sup> September there was a meeting involving the Department, No. 10 and the Treasury. Mr Byers was present. The position at this meeting, as Mr Rowlands explained and as I accept, was that it was acknowledged that both the equity and the non-equity models still needed further analysis. They were to be thoroughly tested. As for the former, CSFB had been told that a dividend at any significant level during the proposed recovery period and a significant floor price being ensured for shareholders at its end was unattractive and would lead to huge difficulties but it was still necessary to find from CSFB what was their "bottom line", some minimum proposal which they felt could be put to Railtrack shareholders yet with a real prospect of its achieving the necessary voting support. As for non-equity, could a CLG, a fairly unorthodox model, work in the railway industry and what would the public expenditure consequences be?
142. It was at this meeting that there was reference to some Railtrack shareholders as "grannies". If there was to be an administration but, of course, with the railway continuing to operate, provision would need to be made for existing creditors who, by

withdrawing their credit or services, could disrupt that operation. The point being made was that it would look unattractive if lending institutions were thus bailed out but that small individual shareholders - the "grannies" - lost out. It is a familiar aspect of administrations that shareholders, large or small, take a lowly place in the order of priorities and it is quite impossible to take the reference to "grannies" as indicative of any form of indifference to, let alone malice towards, small individual shareholders. The reference was not dismissive of them or derogatory; on the contrary it reflects a concern (though not, I think, one about which much could be done short of providing substantially for *all* shareholders) at the likely public perception of the fate the small shareholders might suffer were there to be an administration. I should add that whereas the Claimants amount together to a healthy majority of the number of small shareholders, they hold only a very small percentage of the totality of Group's shares (under 5%), which were largely held by institutions.

**The "Trilateral": 5<sup>th</sup> September**

143. On 5<sup>th</sup> September Mr Byers met the Prime Minister and the Chancellor. Mr Byers said that work done had identified 2 lead options but a lot more work was needed before a decision could be taken. Both the equity and the non-equity route (the latter involving administration at least as a first step) required hard-headed analysis. The Chancellor was concerned at the possibility of a huge additional bill for government; neither option, he said, should "score" as public sector spending. If nothing was done, though, said Mr Byers, Railtrack would go on asking for more money. The Prime Minister said the decision should be based on which option would deliver the most effective management. He preferred there being a single regulator rather than the then system of there being both the SRA and the Rail Regulator. The Chancellor's view (as had been Mr Rowlands' view earlier) was that a "White Knight takeover" was ruled out by Railtrack's financial position.
144. Mr Rowley draws attention to a manuscript note of the 5<sup>th</sup> September in which someone, likely to be either Mr Rowlands or Sir Richard Mottram, said "Equity solution proposed unacceptable". It is important not to drop the word "proposed". What was being said was that the equity solution as then being proposed was unacceptable. The note cannot be taken as a view that all along no equity solution could have been acceptable although, as the note of 5<sup>th</sup> September goes on to say, it was always difficult to imagine an ability to arrive at an outcome that was acceptable both to Group shareholders and to the Government.

**Arthur Andersen**

145. At a Department steering committee meeting on 7<sup>th</sup> September it was noted that, Ernst & Young having already been instructed to advise on the process leading to administration, Arthur Andersen had by now been retained to advise on accounting matters. SSSB, who had been meeting CSFB, had encouraged Railtrack to put its "best foot forward" by revising Rainbow if it wished the equity option not to be dismissed and re-affirmed that the equity option was still under active consideration. Mr Rowlands expected the equity option to be worked on by CSFB whilst the Department concentrated on the non-equity.

**Another Corry e-mail**

146. Mr Byers told Mr Corry, after the trilateral of the 5<sup>th</sup> September, that the Prime Minister was interested in what he had called the "dead" equity option and had wanted it worked up. Mr Byers told Mr Corry that that was the Prime Minister's preference. On 7<sup>th</sup> September, at the level of one Special Adviser to another and without copies to others, Mr Corry told Miss Vadera of that preference and added "We need a bloody good effort to show why this is the wrong option". It is notable that, unlike the case of his earlier e-mail, he does not suggest that Mr Byers had asked him to do what he was doing. The e-mail thus is no more than an expression of a Special Adviser's own view but it does suggest that as far as he knew the equity option was far from discarded.

**SSSB has met CSFB**

147. On 10<sup>th</sup> September Mr Linnard informed Mr Byers that SSSB had met CSFB and had told the latter that a Rainbow package which gave a guaranteed floor price of more than its then current price - around £3 - was unlikely to be acceptable to government and that the proposed performance measures which would apply needed to be fleshed out. To anticipate a little, on a similar subject, Mr Linnard reported on Friday 14<sup>th</sup> September to Mr Byers that Mr Robinson had already been asked to see if he could offer a revised version by early in the next week. Mr Byers thus had good reason to think that Railtrack knew that there were possible difficulties as to a floor price and that some revision of it could be expected.

**Mr Harding meets Department officials**

148. On 10<sup>th</sup> September Mr Harding met Mr Rowlands and others. Mr Rowlands said he did not see how the government could accept a guaranteed floor price for Railtrack shares. Mr Robinson accepted in cross-examination that the Department had raised concerns about the extent to which public funds should be used to support a dividend and Railtrack's share price in addition to supporting the operation of the railway itself. But Mr Harding's response was such that it left Mr Rowlands (to his surprise, as I would think) with the impression that Railtrack did not need Rainbow as it could manage and carry on without it. Mr Rowlands telephoned Mr Robinson to say that the message the Department had thus got from Mr Harding was very different from that presented by CSFB. Mr Robinson then spoke to Mr Harding emphasising Railtrack's "one option" strategy; one principal option only (Rainbow) should be presented to the Department as the way forward. Mr Harding was apologetic; he had, indeed, spoken of "muddling on" but, he told Mr Robinson, he had nonetheless spoken of Rainbow as being the best option.
149. The next day, 11<sup>th</sup> September, Mr Robinson spoke to Mr Linnard and (according to Mr Linnard's note) said that Mr Harding had been completely out of line and had offered Mr Robinson his resignation (as he had). Railtrack *could* muddle on, Mr Linnard was told, but Mr Robinson did not want to do that.
150. Mr Robinson's memory of these events was very poor and not good enough to deny the note; there was no way in which Mr Linnard could have known of Mr Harding's offered resignation other than from Mr Robinson and I thus accept the accuracy of the note; "muddle through" was never a policy (whether or not it could have worked) propounded by Railtrack. On the contrary, the "one option" within its "one option" strategy remained an equity plan.

**10<sup>th</sup>–11<sup>th</sup> September 2001**

151. The Claimants seek to make something of a failure by the Department to have told Railtrack or its advisers at or about this time that a non-equity solution was being seriously considered by Government. The evidence on the question on the Department's side is not clear, depending, as it does, on hearsay. However, I find it impossible to regard the point of any real significance. Mr Robinson never contemplated administration as being likely, not for want of not being told that non-equity solutions were being seriously considered (he accepted, à propos the 28<sup>th</sup> August, that Mr Rowlands had made it clear that the Department was considering other options than the equity one) but because all along he thought administration would be crazy. Railtrack's or CSFB's actions were more likely to have been conditioned by that belief of his than by an absence of their being told or told earlier that non-equity solutions were indeed being considered. There was no evidence of any effective material step Railtrack would have taken or would have taken earlier (as it had no faith in an approach to the Regulator) if only it had been told sooner that non-equity solutions were being considered, nor did the Government ever say that it was not considering alternatives to an equity solution. Nor, either, is there anything to suggest that if there had been a failure to tell Railtrack it was either by reason of some decision by Mr Byers or was known to him.

**A meeting is cancelled**

152. It had been intended that Mr Robinson and Mr Byers should meet on 11<sup>th</sup> September. However, the tragic events in America on "9/11" led to the meeting being cancelled at Mr Byers' request as he had had pressing to turn to other issues than the railways. Sir Richard Mottram said that both Mr Byers and he had, on and after 11<sup>th</sup> September 2001, to deal with events which pre-occupied them for many weeks. Mr Robinson suggested (though not, I apprehend, on the basis of personal knowledge) that thereafter calls from Railtrack were not returned. Mr Byers (again, without, I assume, personal knowledge on the point) said he was sure calls would have been returned. The issue is incapable of resolution but it would have been remarkable if, finding themselves repeatedly spurned, as it would have seemed to them, Railtrack officers would not have made *some* comment on the point by e-mail or in writing. Nothing such was shown to me.

**A third Corry e-mail**

153. On 12<sup>th</sup> September Mr Corry sent an e-mail to Mr Linnard saying, of the Department's lawyers, "× they worry me. They need to be asking how we can deliver what our [Secretary of State] wants, not why it may be difficult. Let's keep them up to the mark". Mr Rowley somewhat ambitiously tried to build that into an indication that Mr Byers had already divulged to Mr Corry that what he wanted was to push Railtrack into administration and for the exit from the administration to be a CLG. Mr Byers, who was clear that he had not yet decided what to do, also denied that he had had any private discussion with Mr Corry to the effect suggested by Mr Rowley. I accept that. It is notable that Mr Corry does not identify what it was, that, in his view, "our [Secretary of State] wants"; I take the e-mail to be no other than something corresponding to the familiar bleat on behalf of a client that his lawyers seemed more interested in pointing to difficulties than to early solutions.

**The Paddington Survivors Group meet Mr Byers**

154. On 12<sup>th</sup> September this Group, formed to get support for the survivors of the Ladbroke Grove rail crash, met Mr Byers and his Parliamentary Private Secretary, Mr Hill. Two witnesses gave evidence for the Claimants on what was said at the meeting. Pamela Warren said that members were not happy that the commercial aspect of Railtrack provided the right atmosphere for safety to be of primary concern. She continued:—

"Mr Byers and Mr Hill sat back, exchanged a glance and smiled. Mr Byers said, again to the best of my recollection, that Railtrack would not be a problem for much longer and that we should watch out for around the early part of October 2001 when we would have some news that would be "very pleasing to us". While I cannot recall the precise words he used, I am very clear that he was suggesting to us that decisions had already been made and Railtrack would cease to exist as a viable entity in October 2001. I made this assumption on the basis that, having run a business myself (as others in the PSG had done) there was no other explanation for Mr Byers' statement as far as I could see and as was subsequently proved."

155. Leaving aside whether those last words indicate that Pamela Warren was relying on later events to found an assumption made at the time, I do not see how, on the safety issue, an announcement that pleasing news was to be released in October could justify an *assumption* that Railtrack would cease to be a viable entity in that month. Whatever option was chosen by Mr Byers, there would either be stringent new performance targets for a re-structured Railtrack under Rainbow, with Railtrack's "commercial aspect" reduced by way of a controlled dividend or, if there was an administration, the Company would still exist but with its management in new and different hands. Mrs Warren, who did not give any oral evidence, does not suggest that Mr Byers mentioned any particular date for the release of the good news.

156. Mr Martin Minns, also at the PSG meeting, whilst in his witness statement saying that he did not recall Mr Byers' precise words, said that Mr Byers had said words to the effect that Railtrack would not be a problem for much longer and, "watch out for October 8<sup>th</sup> for an announcement which I think you will find very interesting and to your liking". He adhered to that in his cross-examination. He, too, had Mr Byers and Mr Hill exchanging a smile as the remark was made.
157. Mr Byers had no memory of the conversation at all and accordingly Mrs Warren's and Mr Minns' evidence goes uncontradicted but even so I am unable to treat it as evidence that by 12<sup>th</sup> September Mr Byers had already decided to put Railtrack into administration; still less can I accept it as any evidence on the more material question of *why* Mr Byers should have so decided, at all events if it was not being suggested by the Claimants that it was for rail safety reasons. By 12<sup>th</sup> September Mr Byers had had no advice as to whether Railtrack was, in Insolvency Act terms, insolvent, whether he was in a position to petition for an administration and whether it would be delayed or resisted if he did. It would have been quite impossible for him on 12<sup>th</sup> September to specify 8<sup>th</sup> October as the date on which Railtrack's administration was to be announced even though that was the date on which that announcement was in fact made. Moreover, although this is a very minor point, the evidence of the exchange of smiles between Mr Byers and Mr Hill would seem to hint, if administration had indeed already been decided on, that Mr Hill may already and might thereafter have been complicit in later dissimulation, namely that no decision had yet been made whereas one had been and was such that arrangements were already in place to lead to an announcement on or about the 8<sup>th</sup> October. There is nothing to suggest he was so complicit nor would have been willing to be.
158. Accordingly, whilst I do not doubt that Mrs Warren and Mr Minns were giving their honest recollections, their evidence does not materially assist the Claimants or damage the Defendants.

#### **A Departmental Meeting**

159. It was suggested to Mr Rowlands in cross-examination that at a departmental meeting on 13<sup>th</sup> September Mr Byers had indicated that there was to be no more financial support for Railtrack. The suggestion was based on a cryptic passage in a contemporary manuscript note. The note could equally suggest that that was a subject which, with others, would need to be addressed before the next meeting with the Prime Minister. Mr Rowlands resisted the suggestion on the basis, which I accept, that if Mr Byers had said as was suggested, then Mr Rowlands would have had to tell him that the Department would accordingly have had immediately to advise Railtrack that that was the case. Mr Rowlands did not then so advise Mr Byers and Mr Rowlands' evidence was that Mr Byers had not then said as it was being suggested he had. Mr Byers' evidence was also that there was no such decision at this meeting and I accept that to have been the case.
160. Sir Richard Mottram, also at the meeting, is attributed in the note as saying, of Renewco, "Slow it down". This, he explained, was not merely because State Aid

clearance for it was still awaited but because of the advice received that going ahead with Renewco could be premature, in the sense of sending what could transpire to be the wrong signal to the Market and to Railtrack. It could suggest that the Government was standing behind Railtrack even if that had not yet been decided. To avoid what Sir Richard called piecemeal decisions, a decision on Renewco had to be or might need to be slowed down. I accept this reasoning; delay in implementation of Renewco was not part of some cynical manipulation intended to exacerbate Railtrack's difficulties but was attributable to a wish not to send out the message that the Government was supporting Railtrack at any time prior to that having been formally decided. A slowing down of Renewco thus provides no ground for any material inference against Mr Byers.

161. On the same day, 13<sup>th</sup> September, Arthur Andersen were requested to consider whether the government could successfully petition for a Railway Administration Order.

**Both sides' advisers meet**

162. On 13<sup>th</sup> September CSFB and Deloitte & Touche on the Railtrack side and SSSB and Arthur Andersen on the Department side met to discuss issues affecting Railtrack's liquidity and its going concern status. The Department side were told that the uncertainties faced by Railtrack, including those as to the WCML and the outcome of a Hatfield Re-opener, meant that its directors were highly unlikely to be able to sign off on the prospectus that would be necessary for the bond issue that Railtrack needed in the first or second quarter of 2002 in order to keep going until settlement of a substantial Hatfield Re-opener. On that basis the November 2001 interim accounts, needed to be settled by late October 2001, would be likely to have to include a strong going concern qualification. Because of that, Railtrack was unlikely to be able to draw down on existing but undrawn "bridge" facilities and hence would experience a "liquidity squeeze" from early December. All this worrying news was despite its being assumed that Renewco would go ahead.

**Mr Linnard's Memorandum**

163. On 14<sup>th</sup> September the Department's Director of Railways, Mr Linnard, wrote a memo to Mr Byers. Of the so-called "muddling through" option which had been thought to have emerged, he advised that both Mr John Robinson and he thought it very unattractive. He looked at both equity and non-equity solutions. The non-equity route, only achievable through administration, had the advantages that there would be no shareholders so the CLG could be run in the interests of the public, passengers and the industry; TOCs as members could make the CLG responsive to the TOCs' demands and the SRA and the Office of the Rail Regulator could be merged. He added, though, that "We cannot pretend to have got to the bottom of these issues". It was hoped to be able by the 18<sup>th</sup> September to answer questions such as what were the best equity models, whether one could be certain that Renewco did not *have* to be proceeded with and whether was there enough evidence to put Railtrack into administration. He plainly did not take it that equity solutions had been already ruled out or that administration had already been decided upon as either as an acceptable or as the already-chosen course.

**Renewco as the kiss of death**

164. On 17<sup>th</sup> September Miss Vadera sent to Mr Corry an e-mail which said "I don't think we can sign Renewco - it's the kiss of death for the admin option". It would, she thought, send the market a signal that Railtrack was going to be bailed out by the government and the government would then not be able not to bail it out. *Her* reason (not identified as anything but that) for not doing Renewco might have had different causes than those of the Department but her e-mail was not inconsistent with Sir Richard Mottram's wish to avoid piecemeal decisions in order not to risk misleading both Railtrack and the market.

**A meeting between the Department and No. 10 Officials**

165. On 17<sup>th</sup> September Mr Rowlands chaired such a meeting. By now the government perception of Railtrack's position as disclosed by CSFB was that, whilst modifications to Rainbow were still awaited, if no additional government support was given the company was not going to be able to go on. If there was to be no such support the question became whether, if no equity model was chosen, Railtrack was to be allowed simply to collapse into administration or whether the Government had some part to play. It was emerging by now that there could very well be a decision not to adopt an equity model. If that was to be the case and there was to be no additional funding, should the government itself take steps under the Railways Act?
166. Mr Byers by now, according to Mr Corry as he said at the meeting in Mr Byers' absence, had indicated that he *preferred* the non-equity model (not that he had decided on it or against any other) but, consistent with the notion that one could not decide on administration, a first step, without knowing what the consequential steps would be, that it was necessary to know whether a CLG was "a runner". It is of little

importance but I would be inclined not to accept Mr Byers' evidence that at this stage he still did not have a preference as between the equity and non-equity options if, by the equity option, he meant Rainbow. When Mr Corry said what was his Minister's preference at this meeting no one seems to have dissented and it was a simple enough message for Mr Byers to have given to Mr Corry and for Mr Corry to have passed on. Mr Linnard's recent memos had given reason to prefer a non-equity solution. Mr Rowlands, too, spoke of the general feeling, about mid-September, that the non-equity option was more attractive than either the equity route or than simply handing over yet more money. Whilst I accept that as yet Mr Byers had made no *decision* and that he wanted further work done to establish feasibility, I prefer Mr Rowlands' view, that, without there being any clear point at which, as if on the road to Damascus, a clear realisation suddenly emerged that the non-equity model was alone the one that had to be followed, the position, in my judgment, was that by now the non-equity model was, so to speak, the front-runner as between it and Rainbow so far as the Minister's *wishes* were concerned and that Mr Corry had been right to say so.

167. However, if, by saying to me that he had then had no preference, Mr Byers had meant none as between *some* equity solution and the non-equity option (which is, I think, what he meant) rather than limiting the equity route to Rainbow, then I would accept Mr Byers' evidence that he would have welcomed an equity proposal from Railtrack that was politically acceptable. "What I was unprepared to sign up to", he said "was a commitment to give a taxpayers' guarantee to the payment every year to Railtrack shareholders, which was part of Rainbow, to give a guarantee that there would be a floor price for the shares  $\times$  when they had come out of their period of convalescence  $\times$  The only circumstance in which I would have been prepared to do so is if we had been able to achieve some very good performance target out of Railtrack, and there then is a possibility that in political terms one could perhaps have deployed arguments in favour of using taxpayers' money that way". Preference apart, until a wholly reliable alternative to Rainbow appeared, Rainbow could not, as Sir Richard Mottram said in evidence, be ruled out.
168. It was put to Mr Byers on the strength of a passage in the contemporary note of this meeting that he had refused to meet Mr Robinson. He said there had been no policy of avoiding such a meeting and that in any event Mr Robinson would have had access to Department officials. I have not been taken to any contemporary but declined requests for a meeting and I accept Mr Byers' answer on this point, especially given the pressures after "9/11". I add that the reason given for the suggested decision to avoid meeting Mr Robinson was that it was to avoid Mr Robinson having the opportunity to put in place an alternative to Rainbow once told it was unacceptable. But even now an equity option had not yet been fully ruled against and all along it had been chiefly CSFB rather than Mr Robinson alone who had presented Rainbow and amendments to it and the Department was already awaiting further refinements to CSFB's proposals as to an equity option. The reason given for the suggested policy of avoiding meeting makes no sense.

**Mr Robinson: kept at bay?**

169. On a similar issue, it was asked of Sir Richard Mottram whether the Department had deliberately tried to keep Mr Robinson at arms' length so that Railtrack would not discover the government's thinking until it was too late for it to devise some alternative strategy (to Rainbow) in order to get out of its difficulties. He denied that had been the case; if it had been, he would have been told of it (presumably to prevent him making or accepting contact with Mr Robinson) and hence would have known of such a plan had it existed. I accept his evidence. Railtrack was in contact with the Department by way of several individuals, not just Mr Robinson, and any plan to ensure that it was kept in the dark would have required not merely a decision that there should be such a plan but a circulation of the decision to ensure it was implemented. The absence of any evidence of the latter suggests the non-existence of the former.

**CSFB's proposals on the 18<sup>th</sup> September**

170. On 18<sup>th</sup> September CSFB in Mr Robinson's presence presented an amended "Project Rainbow", a version which Mr Robinson described as its first really worked-up version. Railtrack, it said, was in a precarious financial position. Without agreement on direct government support this position would come to a head at the latest on 8<sup>th</sup> November when it had to publish a going concern statement. An alternative for the company was an early approach to the Regulator "which may well result in administration". Against that background the earlier Rainbow proposals were further developed. Over the contemplated 3–4 years of the proposed plan dividends would be capped at 15p per annum and there were now sub-models, one with a floor price and one without. Beyond what was already contemplated within the Endeavour-cum-Renewco plans, some £1bn would be needed from government. CSFB felt that this was a proposal which Group shareholders and its Board should support.
171. There was a sting in the tail which in effect said that if this plan proved unacceptable the likelihood was that CSFB would have to pursue other options, including administration. It was CSFB's own position that Railtrack was not in a position to forecast its financial future with an acceptable degree of accuracy, that the Regulator had been clear that he would not accept an approach from it at the time and that only with government support could the necessary going concern statement be made in its 8<sup>th</sup> November accounts so as to enable Railtrack to draw down on existing facilities at about the same time. Without the going concern statement it was most likely that a prospectus for a bond issue would not be possible now and that that might precipitate administration.
172. Mr Robinson in his written evidence had felt that this picture painted by CSFB was unnecessarily gloomy but it was the picture that was presented on Railtrack's behalf and in cross-examination he was unable materially to disagree with it. "We had always believed", he said, "that going down that route", namely seeking an interim review by the Regulator without the company being satisfied it had government

support, "could in the long run take us into administration". Mr Robinson could not accept that it could ever have been contemplated that Railtrack might itself seek its administration but that, I think, was more a reaction based on his feeling that administration would, in his word, be "crazy" than on a study of the text of the proposals which he himself introduced and which plainly hint at that as a possible Railtrack ultimate position.

173. Mr Rowlands took these lengthy proposals to be Railtrack's long-awaited "bottom line" but the Department side did not respond immediately. They took the proposals away to digest. Mr Rowley sought to criticise Mr Rowlands for not saying there and then that the proposals were unacceptable; I do not see it as unreasonable for them instead to have been taken away and studied.

**The bottom line is reported to Mr Byers: 18<sup>th</sup> September**

174. On the afternoon of the 18<sup>th</sup> September Mr Rowlands reported to Mr Byers, in the presence of representatives of No. 10, the Treasury and SSSB, on the meeting earlier that day when an amended Rainbow had been presented. No one thought this new Rainbow, Rainbow II, was materially better than Rainbow I. Mr Linnard told Mr Byers, as was the case, that the Department's legal advice was that the Government was not committed to proceeding with Renewco, as to which a decision from the European Commission was still awaited, and that Renewco was in any event pregnant with the difficulty that it might "score" as public expenditure. Administration was briefly discussed and Mr Rowlands turned to discuss the hypothetical position that could arise if it were decided, on public policy grounds, that the right course was administration. It was not thought that the Department "held all the cards" such that it could force an administration. Indeed, Mr Rowlands advised that there was no prospect of the government unilaterally putting Railtrack into administration - a negotiated solution seemed essential. Mr Byers said, as I accept, that he had not yet reached a final decision as to the way forward. He would hardly have decided that there should be an administration if only because he was given the advice that an administration could not be forced on Railtrack and that it would require negotiation. Moreover, as Mr Rowlands pointed out in evidence, to decide that the new form of Rainbow, Rainbow II, was unacceptable did not of itself mean that there would be no further financial support for Railtrack as if there was no acceptable option so far identified *some* further alternative would have to be found.

**A "muddle through" option**

175. By now "muddle through" could not be considered, if it ever could have been, as an option which had either been in fact presented to the Department or which could be seriously supported by Railtrack. When it had earlier been hinted at by Mr Harding it had immediately been disavowed to the Department by Mr Robinson as a Railtrack proposal. Nor could it have now been revived; Mr Robinson in his evidence to me candidly gave sound reasons why doing nothing was not a viable option from Railtrack's perspective. In any event there is nothing to suggest that it would have attracted Department support, where the perception was, as Mr Rowlands spoke to in evidence, that Railtrack was shameless in asking for more money.

**The Prime Minister and the Chancellor are briefed by their officials**

176. Mr Atter, who had moved from the Department to the Treasury and who had been at the earlier meeting on the 18<sup>th</sup>, reported on the same day to the Chancellor recommending, subject to Mr Byers clearing a number of outstanding issues with the Chancellor, that it should be agreed to put Railtrack into administration and replace it, so said his summary, with a not-for-profit trust (although his fuller text refers to a CLG). Although his summary thus spoke of putting Railtrack into administration his text acknowledged that the government did not have sufficient information to do so without the company's agreement. It was plainly in mind that the *threat* of a short emergency bill to override any intervention from the Regulator would be likely to procure from Railtrack the cooperation from the company which would be needed. He added that the current view, now that the "small print" of Renewco had been examined, was that it would "score" as public sector borrowing. He drew up a list of 10 Treasury issues that needed to be resolved.
177. At much the same time Dr Hackland reported to the Prime Minister that Mr Byers was convinced that a CLG via administration was the best way forward but that the lawyers had advised that a contested application for one might fail. He, too, wrote of quick legislation to close off any attempt by Railtrack to re-open its settlement with the Regulator. Negotiations with Mr Robinson, he suggested, should be begun.
178. Dr Hackland was of the view that by touching on administration if Rainbow were not accepted, CSFB were, in effect, hoping to pressurise the government towards Rainbow. If so, it was a dangerous strategy; it depended on the government regarding administration as virtually unthinkable, as "crazy" as Mr Robinson did. That plainly was not the case.
179. I have no doubt but that by now Mr Byers, as Dr Hackland reported, was convinced that administration followed by a CLG was the best way forward but it was still uncertain whether that would be possible and accordingly no decision had yet been reached that it was to be sought. At the Department, said Mr Rowlands, in the remainder of September what was looked at was, *if* administration was to be the chosen route, how could a point be arrived at which Railtrack would agree with the

Department that it should go into administration, as the Department was not sure that it held all cards needed to procure an administration without that agreement.

180. At about this time there is a manuscript note of Mr Rowlands having said at an inter-departmental meeting that "Govt int is to collapse the share price". The abbreviation "Int" has been taken to be for "interest" rather than, for example, "intent". There is an argument which Mr Rowlands developed in his re-examination that it could have been in the Government's interest to collapse the share price; although, in ordinary circumstances, whether or not there should be an administration would be unrelated to a share price, it could have been that if the share price had been greatly reduced its Board might have been less willing and able to resist administration than it would have been had the price remained high. On that basis it could have been in the government's interest to collapse the price but, as I see it, nothing can be made of the point. It is not said that the Government did collapse or attempt to collapse the share price or that Mr Byers required that to be attempted. Nor does it even establish, as the Claimants' final submissions sought to say, that it showed that efforts were being made to devise a strategy from which Railtrack had no escape which, of itself, would in any event not have been a wrong in relation to the tort I am here considering.

#### The Second Trilateral

181. On 19<sup>th</sup> September Mr Byers met the Prime Minister and the Chancellor to discuss Railtrack's affairs. Mr Byers ran through the options. Rainbow was "unlikely to deliver" and "muddle through" was clearly inadequate. A CLG, by contrast would ensure that the public interest was paramount and it could be best to get there by administration but that would require Railtrack's cooperation and would necessitate difficult talks with Mr Robinson. The Chancellor, concerned with costs, put forward a list of 10 key issues ("the ten commandments") which needed to be resolved before any decision was taken. There was support for a CLG from No. 10, subject to the 10 Treasury issues being met. The CLG would need to be off the public balance sheet but would offer improved performance although it could take 2–3 years to sort Railtrack out. The Prime Minister asked Mr Byers to aim to be ready to begin negotiations with Mr Robinson by 28<sup>th</sup> September. It was agreed that urgent legislation to prevent the Regulator's intervention could be necessary.
182. Mr Byers' evidence that even now there had been no *decision* to go down a particular route was plainly right. The Administration-cum-CLG route required negotiations, possibly legislation and in any event satisfaction of the Chancellor's "ten commandments"; the negotiations might fail, legislation could be delayed and one or more of the "commandments" might be failed. It could still be that some other route would have to be found and, however unwelcome, would have to be tolerated. As for Renewco, whereas the Department felt that it would not "score" as public borrowing, the Treasury thought that it would. If it did "score" as public then one of the "ten commandments" would be broken and there would have to be fresh thinking. Just as there was no decision yet on the route to take, so also was there no decision on the closely related subject of whether there was to be any finance for Railtrack beyond its present legal entitlement or any other indication of general

financial support for it. At the Trilateral Mr Byers had deliberately said that Renewco was not closed off as, so far as he was concerned, no doubt taking his Department's view, it was possible that it would not "score" as public. But thereafter the work of the professional advisers (as opposed to that of the Department itself) was directed exclusively to the Administration–cum–CLG route.

**Arthur Andersen report**

183. On 26<sup>th</sup> September Arthur Andersen, who had been instructed on the 13<sup>th</sup>, as I have noted, reported. They had had no access to Railtrack staff or documents. They set out the Insolvency Act test. Railtrack's balance sheet, they said, appeared solvent but, given a number of uncertainties to which they referred, they were unable to conclude whether or not Railtrack was or was likely to be unable to pay its debts as they fell due. Mr Rowley suggested that this was a blow to the Department. I accept Mr Rowlands' evidence that it was not so regarded, but was consistent with the Department's view that *if* there was to be an administration it would best be done by co-operation; he had in mind a joint petition of the company and the Secretary of State. It could, of course, have been that fuller recourse to Railtrack's books would have shewn the insolvency that a limited view had hidden.

**SSSB report: 26<sup>th</sup> September**

184. On 26<sup>th</sup> September SSSB reported to the Department with a preliminary valuation of Railtrack and its implications for the treatment of shareholders if there were to be an administration of Railtrack. The enterprise value of Railtrack, they said, approximately corresponded to the total net value of its debts and their preliminary valuation (though the valuation range was wide) indicated no clear present grounds to justify the government making an offer to a prospective administrator which would result in *any* value (my emphasis) being realised by Group shareholders.

**A submission to Mr Byers**

185. On 26<sup>th</sup> September Mr Rowlands made a detailed progress report to Mr Byers. He reported that the Department had devised a workable structure for a CLG intended to "incentivise" the CLG in delivering the core railway. It was still dubious, though, whether the CLG would be classified to the private sector, as was necessary if it was to be implemented. Given the professional advice received, it was thought that Railtrack's value roughly matched its debt and there was thus no clear economic ground for the government to offer to buy out its shareholders. Ernst & Young, whom the Department would ask the Court to appoint as administrators should Railtrack be insolvent, had made progress in preparing for the rôle but were asking for an indemnity even from criminal prosecution, an issue that would probably need to be taken to the Law Officers. There were public law risks in any decision *not* to fund Railtrack but two Leading Counsel, he reported, had advised they they could be robustly defended provided, *inter alia*, that the action taken was in the public interest. As for Renewco, it was recommended that it should not go ahead if there was a prospect that Railtrack could go into Administration but that the grants of £162 million and £335 million should be paid on 1<sup>st</sup> October as there would be a legal obligation to pay them. There was a risk, though, said Mr Rowlands in his report, that the SRA would refuse to pay the grants. "In broad outline", though, recommended Mr Rowlands "we have now assembled a set of proposals that, subject to Railtrack not coming up with some entirely unexpected factor, and if insolvency is established, has the potential to deliver a better core for the future of the railways" – but the ten commandments had to be satisfied before a decision was made to proceed down *any* path. The crucial outstanding points were that the CLG would be acceptable in policy terms to its potential members and would score to the private sector. More time was still needed.
186. Mr Rowlands' advice was framed in language consistent only with there having been, as far as he knew, no final decision not to entertain any further proposals put by CSFB, no final decision not to fund Railtrack beyond its present legal entitlement and no final decision to seek, alone or with the company, the administration of Railtrack.
187. Mr Rowlands was taxed in cross-examination with his view, in this submission, that Railtrack had "not yet sought seriously to engage with us" on its proposals for an equity solution. He reluctantly accepted but then withdrew that there had been a lack of serious engagement on both sides. It is a small point but I do not see the chronology as leading to any blame on the Department. It was entitled to expect, if CSFB and Railtrack were truly anxious, even desperate, to develop and present an acceptable equity solution, that they would, as Mr Rowlands said, have been on the Department's doorstep every day, which they plainly were not. Unacceptable aspects of Rainbow I and II had been pointed out. Group, Railtrack and CSFB were the persons best able to judge what would or would not be acceptable to Group's shareholders. It was thus, as Mr Byers said, incumbent on CSFB and Railtrack to come up with a package which was going to be acceptable to the government. I re-iterate that I do not hold the course of negotiations on Rainbow to reveal any ground for any material inference against Mr Byers.

188. The copy of Mr Rowlands' submission bears, in Mr Byers' handwriting, the words "Rainbow to be killed off". "To be" suggests it had not already met its death. Mr Rowley sought to say that the words indicated that the time had come to bring discussions with Railtrack and its advisers to an end. In my view Mr Byers was right to deny that; it was Rainbow not discussions or negotiations generally that the words suggested were to be at an end and in any event negotiations with Mr Robinson about a possible co-operative approach to administration were contemplated as necessary. Mr Rowley bolstered his approach by referring to another Corry e-mail, also of 26<sup>th</sup> September, which said "There is a view that we should get the discussion of Rainbow out of the way before [28<sup>th</sup> September]" but that does not assist him; it suggests that discussion of Rainbow was not yet out of the way and again it is only discussions of Rainbow rather than either discussions generally or discussions on some other equity route that were to be got out of the way. There is no evidence that the "view" to which it refers was Mr Byers', nor, I add, any evidence that Mr Byers had ever told his officials either to conceal from CSFB and Railtrack that Rainbow (or *any* equity solution) was unacceptable or to pretend that it might be acceptable.

#### **An inter-departmental meeting**

189. On 27<sup>th</sup> September Mr Byers with his officials had a meeting at which Miss Vadera represented the Treasury and Mr Challen SSSB. The principal task of the meeting was to work through the ten commandments. Mr Byers is recorded as saying, of Rainbow, "need to kill it off". Mr Rowlands accepted that by now Rainbow as proposed had no life in it but the position, he said, was still, that if the CLG "scored" as public, then they would have to go back to some other version. He was thus proposing to have a last meeting on Rainbow as to performance targets. The plan to have a last meeting on Rainbow was not overruled.
190. Mr Byers made it plain, as, in effect, had the Treasury, that if the CLG "scored" as public it would not go ahead. If the Chancellor would not agree to it, it simply could not go ahead.
191. On the same day Mr Byers advised his officials and others that the forthcoming substantial payments shortly to become due to Railtrack had to be paid irrespective of any final decision on Railtrack's case. It is difficult to see that as the act of a man determined to harm Group's shareholders.
192. It was put to Mr Byers in cross-examination that he was stalling Railtrack on Renewco, meaning, I apprehend, that Railtrack was not being told that Renewco would not go ahead lest that might prompt it forthwith to seek an interim review from the Regulator. But Mr Byers, credibly in my view, and consistently with the Department's earlier approach, said that he did not want to take a *separate* decision on Renewco; legal advice was that adopting Renewco if there could still be a decision not to finance Railtrack would give the wrong message to the market and, he could have added, telling Railtrack that Renewco would not go ahead at a time when it could still be decided further to finance the company could precipitate a crisis within the company. The idea of legislation to prevent the Regulator intervening and

undoing the political decision, if there was to be one, not further to fund Railtrack was acknowledged as something which, the Department thought, Railtrack would regard as a hammer blow. Mr Byers wanted that to be the case; if there was to be a decision not further to fund Railtrack, Mr Robinson was to be left with no option, none other, I take it, than to cooperate in seeking administration. It was at this point in his course through the chronology that Mr Rowley put point blank to Mr Byers in cross-examination that his intention was to injure the shareholders in Group by removing the assets of Railtrack plc without paying compensation to shareholders. Mr Byers answered that there was no such plan.

#### **Grant monies**

193. On 28<sup>th</sup> September the Department paid the SRA £336,590,000 as the "Endeavour" grant for passing on to Railtrack. On the 1<sup>st</sup> October Sir Richard Mottram indicated to the SRA that if the Schedule D grant of £162,000,000 payable under the Regulator's 2000 review was requested by Railtrack, then that, too, would be paid to the SRA. The Department was meeting its existing commitments to Railtrack.

#### **Railtrack and CSFB meet the Department**

194. On 3<sup>rd</sup> October there was such a meeting. SSSB attended. By now the Department was confident that Railtrack had reached its "bottom line" as to Rainbow's structural terms but it had always been intended, as I have mentioned, that there should also be performance targets or requirements as part of the quid pro quo of the government's support. CSFB accordingly made a presentation on performance. There is a dispute as to whether someone on the company side - Mr Robinson or Mr Nelson - said that if no action was taken within the next few weeks then administration would become a real possibility. Mr Rowlands believed that that was said and SSSB's note records the gist of it. I accept that it was; firstly, that it should have been said was consistent with CSFB's presentation of 18<sup>th</sup> September that if an alternative to Rainbow was intended (and doing nothing would be an alternative) Railtrack might need itself to pursue administration. Secondly, the timing - the next few weeks - broadly fitted in with the need to complete the Railtrack November interim accounts, which would need a going concern statement, by late October. Thirdly, if Dr Hackland's interpretation of CSFB's and Railtrack's negotiating strategy was right - that a wholly unacceptable (as Railtrack thought) administration was being used in terrorem to drive the government towards Rainbow - then one would expect the possibility of administration to be mentioned by the Railtrack side to remind the government of the dire alternative to Rainbow. Finally I did not take Mr Robinson's evidence to be that it was not said, rather that it was not said by him. SSSB's note attributes it to Mr Nelson.
195. Renewco was touched on. Mr Harding asked if it was still on the table? Mr Rowland said it was "but there were issues to be resolved. Stephen Byers had made clear that he would decide whether Renewco should proceed". He was undoubtedly playing his cards close to his chest but he had to; to say it *might* be rejected could panic Railtrack into a stock market announcement that government support might be

withdrawn; to say it would be adopted could mislead Railtrack that that support was forthcoming. In any event the reference to "issues" and to a decision not as to *when* it would proceed but *whether* it should ought to have conveyed the message that Renewco could not assuredly be relied on.

196. Mr Robinson left the meeting in a mood of optimism about government support but I would attribute that more to his conviction that a deliberately-sought administration was so unthinkable as to be crazy than to an analysis of what was being said.

**That meeting is reported to Mr Byers**

197. Still on 3rd October there is a document which Mr Rowley treated as made after the meeting on that day with CSFB and Railtrack. I shall treat it as such although some of its grammar suggests to me that it was made before the CSFB meeting. In it Mr Rowlands still described Rainbow as an alternative. He believed a CLG could score as private. He spoke of the possibility of legislation to avoid intervention by the Regulator as a key part of the Department's negotiating hand. Presumably consideration of legislation to circumvent the Regulator undoing what would by then, if adopted, be government policy - no more funding for Railtrack beyond the present entitlement - was on the unspoken assumption that Railtrack would *apply* for an interim review. In fact, to anticipate, Railtrack never did so apply. Mr Rowlands raised the question of whether the final decision on Railtrack's funding was only for Mr Byers and the Chancellor or whether the Prime Minister should also be brought in. If the CLG route was adopted he recommended that Mr Robinson should be called in and be so told, as should the Rail Regulator. The language of the paper is consistent only with no decision having yet been reached, so far as Mr Rowlands understood, either on further funding or administration-cum-CLG, though he felt that Railtrack would have little choice but to cooperate with whatever route the government favoured. The government, if needs be, should be ready, he said, to put out a statement that as a matter of policy it would provide no further financial support beyond Railtrack's present entitlement. That would be to deal with the case as it would be if Railtrack did not cooperate on a *joint* petition for administration. That would pull the rug from under Railtrack; it would avoid them dragging the process out.
198. There was also a report by Mr Rowlands on 3<sup>rd</sup> October to Mr Byers and others that was unequivocally after the CSFB meeting. The ONS's ruling on how the proposed CLG would score was expected on Friday 5<sup>th</sup>. Mr Byers said he would formally decide then. A decision by the ONS as to the scoring of Renewco was also awaited. The ruling on the CLG was asked by the Treasury to be given priority over the one for Renewco.
199. Mr Rowlands was in no doubt as to the message that had been conveyed to the Department by Railtrack and CSFB on 3<sup>rd</sup> October. In cross-examination he said, as I accept, that "×. We were told at the meeting of 3<sup>rd</sup> October that there was a crisis coming within a fortnight. We would have had to have done something, because we

were in danger of them simply collapsing possibly unprepared into administration and all of the difficulties that that might have resulted in".

**Miss MacKenzie's evidence**

200. Her evidence, not challenged, was that at a meeting at 5.30 p.m. on 3<sup>rd</sup> October Mr Byers confirmed he had reached no decision on whether or not to provide further funding to Railtrack. She advised Mr Byers (and was satisfied that he understood the advice) that the decision as to additional funding had to be made on the basis of the issues relevant to *that* decision and must not be confused with later-arising issues such as the desirability or otherwise of the CLG route.

**A meeting is arranged**

201. On the 4<sup>th</sup> October Mr Robinson was asked if he could meet Mr Byers at 4.45 p.m. on the 5<sup>th</sup>. Presumably Mr Byers had been confident that the ONS classification would be known by then though doubtless the meeting could have been postponed were it not. On the 4<sup>th</sup> CSFB prepared a "talk sheet" to prepare Mr Robinson for the meeting. Mr Robinson did not agree with the talk sheet; he regarded it as unhelpful but it throws further light on what the experienced team at CSFB, who had had full access to Railtrack papers and staff, appeared to think was the company's position at the time.
202. CSFB advised that an approach to the Regulator could result in an administration; the attitude of the Regulator was such and the time likely to be needed for a review meant that that was so. It was almost impossible to envisage the Regulator responding quickly enough to save the company from administration. Without government support it would not be possible to continue trading as a going concern and the company would be forced to go into administration immediately.
203. It could have been that CSFB's talksheet exaggerated the danger Railtrack was in as a negotiating tactic to be adopted by Mr Robinson but the sheet gives no hint that the views expressed were other than its true views and they were consistent with CSFB's views as presented to the Department and its advisers at the meetings. I hold them to have been CSFB's true views.

**Mr Byers speaks to the Prime Minister**

204. On 4<sup>th</sup> October Mr Byers telephoned the Prime Minister to say that he was close to reaching a decision and that the final piece which had to fall into place was the ONS classification. The Prime Minister was content to leave the final decision to Mr Byers but said that Mr Byers would need to speak to the Chancellor as to the level of funding needed if he was to decide to let Railtrack "muddle through" or, alternatively, to show that the 10 commandments were satisfied if Mr Byers elected for administration-cum-CLG.

**A decision is made**

205. On 5<sup>th</sup> October Mr Byers telephoned the Chancellor. The ONS classification was still awaited. Mr Byers was keen to keep the CLG option open and would, within limits, have striven to meet whatever requirements the ONS might have specified to ensure that it should be "scored" private, as had all along been essential if the Chancellor was to sanction it. It was agreed that until the scoring was known Mr Byers could reach no final decision. So, as Mr Rowlands accepted, efforts were made on the morning of Friday the 5<sup>th</sup> to get that classification. Further, Mr Linnard provided Mr Byers with a summary paper. It invited Mr Byers to reach a decision on whether or not to agree to Railtrack's request for a package of financial and other assistance. It described the timing as "urgent". Plainly, Mr Linnard did not think a decision on that point had yet been made.
206. Just short of 1.40 p.m. the message was received at the Department that, in effect, the CLG proposed would be classified by the ONS as private and that the Treasury took that to be a sufficient assurance that the Department could move ahead on the basis that the CLG would formally be so classified. Without awaiting the formal decision of the ONS, not received till later that afternoon, Mr Byers made his final decision on funding in the afternoon of the 5<sup>th</sup>. He was satisfied there should be no further funding for Railtrack (meaning, I apprehend, funding beyond its then present entitlement). He had not so decided earlier. A decision that there was to be an administration of Railtrack or that that should be attempted was not made earlier than the 5<sup>th</sup>.
207. In a passage in his witness statement not put to him in cross-examination he said:—
- "I decided against supporting the "Rainbow" option favoured by Railtrack and pouring more public money into the company. We had funded Railtrack in the past and made it clear we did not stand behind individual companies. I had to consider how many more times they would come back for a further handout. There had to be a time to say no. Railtrack had not controlled its costs - there were many deep-seated problems. It would not be right, I felt, to provide further funds for it. I did wonder whether it was worth the pain as, politically, more funding had an attraction. However, it could not have solved the problem. If we had given increased funding to Railtrack at this stage (i.e. used the muddle through option to get through the interim result stage) Railtrack's funding difficulties with the West Coast Main Line (and, indeed, every major project it was involved in) would have been the cause of further concern."
208. The decision made, the Regulator and the Company had to be told.

**Mr Byers tells the Regulator**

209. At 4.0 p.m. on the 5<sup>th</sup> the Regulator met Mr Byers and Mr Rowlands at Mr Byers' office. The meeting had been arranged on the 4<sup>th</sup> but Mr Winsor had not been told what it was to be about. Mr Winsor was told that there would be no further financial support for Railtrack, that its administration would be sought that weekend and that Renewco could not proceed. It became apparent to Mr Winsor that Railtrack had been deliberately keeping him in the dark. He said that Mr Robinson's reaction would be likely to be an immediate application for an early interim review. Mr Byers said that that had been thought of and that if such an application were made he had the authority (as he had) of the Prime Minister and Chancellor immediately to introduce emergency legislation to entitle the Secretary of State to give instructions to the Regulator. Mr Winsor pointed out what adverse effects such legislation would have not just on railway financing but on regulated industries generally. He spoke, too, of implications under the Human Rights Act. He made no headway; Mr Byers said an application to put the company into Railway Administration would be made on Sunday.
210. In the course of the conversation Mr Byers had given to the Regulator a summary of the Rainbow proposal as put by Mr Robinson. The Regulator asked in what conceivable circumstances would the government ever find a proposal of that kind acceptable. His evidence was that in answer Mr Rowlands (not, be it noted, Mr Byers) replied "Quite!". It was from that alone, as it would seem, that Mr Winsor felt it was clear that so far as the government was concerned Rainbow had been a non-runner from the start. I do not accept it was the government's view that no form of equity solution could ever have been acceptable. If, for example, the CLG that was in mind had "scored" public then equity solutions would have had to be revived as what might then have been regarded as the least unattractive of achievable options. Of course, by the date of the meeting with the Regulator it was known that the CLG scored private, there was a real prospect that one way or another an administration would be likely to be ordered and there was thus no longer any need to contemplate the possible acceptability of an equity solution as the lesser or least of several evils. It was not put to Mr Byers that he also must have meant whatever Mr Rowlands had meant.
211. In the circumstances I believe Mr Winsor was reading far too much into the one word "Quite" and I cannot on the basis of that one word discount all the other evidence that Rainbow was given consideration by the government, including by Mr Byers, in good faith. In other words I reject the view, which I think was being suggested on the basis of Mr Winsor's evidence, that Rainbow had been all along simply entertained on the false pretence that it might become acceptable so as to lure Railtrack into a view that it could safely rely on it and need formulate no alternatives. If, as Mr Rowley's cross-examination seemed also or alternatively to suggest, Mr Rowlands' "Quite" had indicated only that a suspension of the then-established regulatory regime had all along been unacceptable, then, firstly, I do not read Mr Winsor's evidence so as to take it that "Quite" referred only to that and, secondly, as Mr Byers said in his evidence, the Prime Minister himself had doubts about what he had called "this crazy

system of regulation". In context a mere suspension of it could not, in my view, have been regarded as always beyond the pale.

**Mr Byers gives the news to Mr Robinson**

212. Shortly after meeting with Mr Winsor, Mr Byers then met Mr Robinson. Mr Robinson was told that the government was not going to proceed with Rainbow and was withdrawing support for Railtrack. Mr Byers asked whether there could be a *joint* petition for administration and said that he hoped that after an administration there would be a CLG. What the shareholders would receive, he said, was still up for consideration, though Mr Rowlands, present throughout, in explaining what administration implied, said that what the Group shareholders got would depend on the course the administration took. Mr Byers foresaw difficulties with shareholders; there were United States class actions that had been budgeted for. He said either that the government had spoken to the chairman of all major banks that day or that it would shortly do so and either had briefed them or would brief them on what he, Mr Robinson, was now being told. I have not been taken to what they were told or when. Mr Robinson was angry but Mr Byers made it plain he would not change his mind. He added that he had seen the Regulator and had told him not to react to an interim review application and that if he attempted to do so, emergency legislation would be rushed through Parliament to stop him.
213. Mr Robinson said to Mr Byers that Railtrack had taken the position that so long as Rainbow was being discussed, it thought it was trading legally. Mr Robinson said that Railtrack had been taking regular legal advice - weekly or monthly - as to whether it was trading legally. It seemed therefore to Mr Byers that Mr Robinson was now accepting, now hearing that Rainbow was not to proceed, that it could no longer trade. Mr Byers indicated that *if necessary*, namely if there was no cooperation on an agreed administration over the weekend, he would probably announce on Monday 8<sup>th</sup> that the government would not provide further support. Mr Robinson left to consult his Board colleagues and advisers.
214. How that public announcement would have been framed and whether the government, had there been no administration over the weekend, would either have *had* to make it or could, without impropriety, have chosen to make it would have been subjects of further legal advice to the Department but no further work was done on that because, as the events unfolded, it was seen that an administration would be likely to emerge. Mr Byers well recognised that such an announcement would, of itself, have been likely to push Railtrack into administration.
215. It has been argued that Mr Byers' unwillingness at this stage to change his mind and to allow Mr Robinson to explore new possibilities is material from which, when joined with other factors, the necessary targeted malice in Mr Byers can be inferred. I cannot agree. Months had already been spent, with the help of skilled and experienced advisers on both sides, and a policy had at last emerged. There must be some finality and it is not as if Mr Robinson then had nor has since claimed to have had any alternative solution that had any prospect of both working and being

acceptable to government. Even if Mr Byers was then peremptory and intransigent that may have laid him open to a Judicial Review or to an HRA claim but it would not, in my judgment, have furnished grounds for any adverse inference against him relevant to the tort I am here considering as such conduct (in the absence of some contrary explanation) would more have pointed to a wish promptly to proceed with a not-unreasonable chosen government policy than to a wish (for which no grounds were given) deliberately to harm Group shareholders.

216. There was, at this stage, no decision that the Department would necessarily alone petition for Railtrack's administration over the weekend. It could have been Railtrack alone that would petition or there could be a joint petition, one by the Department alone, or none. If none, then a Monday announcement by the Department, subject to legal advice, would be likely to go ahead although it was recognised that if there was no petition but an announcement then there could be disruption on the railways. Thus there had had to be pressure brought on the company to cooperate in, or at least not to resist, the administration process. There might yet have been no decision to petition but contingent arrangements had already been made; Ernst & Young who had been familiarising themselves with the case for weeks, were, as I have mentioned, to be the government's proposal as the Administrators and, as it was put later by SSSB to Railtrack's board, a Judge had been "lined up" to hear a petition. The likelihood is that the duty judge that weekend, Lightman J., was merely warned that a hearing on Sunday might be necessary.

#### **Renewco "scores" public**

217. On 5<sup>th</sup> October the ONS indicated to the Treasury, albeit provisionally, that Renewco would "score" as public. I have mentioned earlier that by consent the Claimants abandoned their attempt to require a representative of the ONS to attend to give evidence. In the light of this "score", the Department would not have been able to implement Renewco quite independent of Mr Byers' decision not further to finance Railtrack.

**Railtrack takes advice**

218. Railtrack board members had a series of meetings with advisers on Sunday 6<sup>th</sup>.. Deloitte & Touche advised on accounting matters, Mr Richard Adkins Q.C., Leading Counsel with particular experience in such areas, advised as to insolvency, administration and procedure. Mr Adkins advised that a Railway Administration Order should be opposed only if the Board had some viable alternative. Only the day before Mr Harding had been clear that Railtrack was solvent but the news had changed things and Mr Harding now felt that Railtrack could neither oppose a petition or ask for further time. The Board was resolute, though, that it would not *support* the Petition. The government had a draft Petition at hand which could easily enough have been by Railtrack, by the Department or by both but I do not read the evidence as suggesting that the Railtrack board ever had in mind the Company alone presenting a Petition; at most it was either that there might be a joint Petition or one by the Department alone. When the Board resolved neither to oppose or support *the* Petition they meant that, as I understand the evidence, in relation to a petition by the Department alone. Railtrack's advisers CSFB, Deloittes and Simmons & Simmons supported the Board's approach.
219. The subject of an approach to the Regulator came up. Mr Marshall thought the interim review process not to be a realistic source of funding, especially given the threat to disable the Regulator from intervening. Railtrack were advised, though, to apply to the Regulator in the interests of completeness and to test his response.

**Railtrack speaks to the Regulator**

220. At about 7.0 p.m. on the 6<sup>th</sup> Mr Robinson and Mr Marshall broke out of their meetings to speak to Mr Winsor. He confirmed he had been threatened with legislation by Mr Byers. Mr Marshall asked him if he would assist Railtrack by conducting an emergency interim review. Mr Winsor said he would have to consult his colleagues. Later he said he would be unable to conduct one in such a short space of time, meaning, it would seem, by Monday morning on the 8<sup>th</sup> October. That is Mr Robinson's recollection of the discussion and, in a sense, that is what is important but Mr Winsor's note of that conversation adds further points. He felt that Railtrack was merely going through the motions; they had no expectation he would provide them with any cause for hope. They had no properly justified application anywhere near ready. Mr Winsor said that whilst he could immediately announce the *initiation* of an interim review, he did not think it possible to complete it within 24 hours. Railtrack said it needed cash in hand on Monday but could not say how much beyond saying "hundreds of millions of pounds". They said, remarkably, that unless he could promise them an unspecified number of millions of pounds on the Monday there would be no point in having an interim review. Mr Winsor, on the subject of the threatened legislation, pointed out that it would take time to be passed and was a difficult card for the government to play. It would be likely to be resisted by reason of its effect on other regulators and other regulated industries. It would be hard fought and might not be passed at all, but, despite that, Railtrack showed no interest. He suggested they might call the government's bluff but Mr Robinson just repeated that the government would do it. He did not have the will to take on the government. Mr Winsor asked if they wanted a statement from him saying that he was going to carry out an interim review; they said no. Nothing short of cash on Monday would do.
221. Both the history of other reviews (albeit not interim ones) and the need for the Regulator to consult others made Mr Winsor's view that he could not complete one, even a Hatfield re-opener, by Monday 8<sup>th</sup> undeniably correct. Mr Robinson in cross-examination gave as his impression of the conversation with Mr Winsor that an interim review would take "an awful long time".

**A Press Release in draft**

222. Very late on the 6<sup>th</sup> SSSB (for the Department) received a draft press release from CSFB (for Railtrack). A difficulty the Department was in was that despite all the work done by its professional advisers (work that had been done without direct recourse to Railtrack's most recent and unpublished books and papers) the picture as to whether Railtrack was truly unable to pay its debts as they fell due or was likely to be unable so to pay them was, it felt, less than conclusive. The draft Petition so asserted, basing itself on a draft witness statement of Mr Rowlands and a draft report (on assumptions) from Arthur Andersen, but plainly some comfort on the issue from Railtrack would be valuable. The draft press release contemplated there being a hearing of a Department petition on Sunday 7<sup>th</sup> and said that:—

"Railtrack plc was not in a position to oppose this petition given the Government's decision to provide no further direct financial support beyond that in the regulatory settlement. Railtrack plc therefore reluctantly accepted there was no credible alternative to administration,"

223. That must have been the outcome of advice taken by Railtrack from its accountancy and legal advisers, including its Leading Counsel.

**Mr Robinson's letter**

224. On 7<sup>th</sup> Mr Robinson faxed to Mr Byers and Mr Rowlands a letter above his signature that indicated that in the circumstances as he saw them it was his view and that of the Executive Directors of Railtrack that it would be difficult for Railtrack to draw on its bridging facilities or to access the public bond market in the short term. Without the government support on which the markets had previously relied, now not forthcoming, there was no realistic prospect of its raising further finance or refinancing its existing commitments. To delay administration, said the letter, would cause severe operational difficulties. In the letter Railtrack, importantly, waived the 2 days' notice of the Petition to which it would otherwise have been entitled.

**The Petition is presented and an Order is made**

225. Work on the case proceeded on both sides late on 6<sup>th</sup> and into Sunday the 7<sup>th</sup>. Leading Counsel for the Department—petitioner, Mr David Richards Q.C., had prepared a skeleton argument. The papers were supplied to Railtrack's Solicitors. The Petition was unopposed. The hearing before Lightman J. began at 5.45 p.m.. He indicated he had read the relevant papers. Leading Counsel - Mr Adkins Q.C. - appeared for Railtrack and Mr Moss Q.C. for the prospective administrators. Mr Richards presented the case for an administration. He drew attention to the passage I have cited from the draft Press Release as supplied by Railtrack's own advisers. Arthur Andersen's projections, in the evidence and not opposed by Railtrack, were that further funding of at least £700 million by December 2001 rising to some £1.7 billion by the end of March 2002 was needed by Railtrack, that its ability to use overdrafts to fill the gap was likely to depend on its making a £2.3 billion bond issue and that SSSB had advised that it was highly unlikely that that could be done in the then—present situation. The Learned Judge accepted that the Company either was or was likely to be unable to pay its debts. He observed that administration was not only appropriate but absolutely essential. In his evidence to me Mr Robinson accepted that without government support Railtrack was unable to pay its debts and that that had been true for a long time. He accepted, too, that its financial position before his meeting with Mr Byers on the 5<sup>th</sup> was the same as it had been after and the same in Spring 2001 as it was in September 2001.
226. A Railway Administration Order was made on 7<sup>th</sup> October. Mr Adkins spoke only as to Railtrack's costs, which were awarded to it.

227. Mr Rowley for the Claimants has more than once said that no criticism is made of the Judge; on the material presented to him, the Claimants accept, the Judge could have done no other than as he did. Four senior members of Ernst & Young LLP became Joint Special Railway Administrators of Railtrack.

#### **A Railtrack Plan B?**

228. One of the criticisms of the government's conduct of negotiations over Rainbow was, as I have mentioned, that by its not indicating that Rainbow was, however adjusted, bound to be unacceptable, the Department and Mr Byers deliberately lured Railtrack into a situation in which it did not, until it was too late to do so, devise a "Plan B", a plan to cope with a situation in which Rainbow (or Renewco) was not to proceed. I have dealt with the argument in relation to particular incidents but I now reject that criticism generally. Whilst the portents for Rainbow were never good, there was, in my judgment, no deliberate intent to lure Railtrack into not devising its own Plan B; Rainbow, had the dividend and floor price levels moved downwards, *could* have become possible, perhaps would have had to become possible, especially so if the CLG alternative had "scored" to the public sector. There were good reasons to decide on Rainbow, Renewco and the administration-cum-CLG all at once, as Sir Richard Mottram pointed out. Delay was for those reasons, not in order to lure Railtrack.
229. In any event, nothing stopped Railtrack from putting further alternatives to the government except its own decision, with CSFB, to adopt a "one-option" strategy and nothing at all stopped it trying to develop a "Plan B" to be revealed if and when Rainbow or Renewco came to be rejected. What really stood in the way of a credible Plan B were the facts. Railtrack had tried to find one but nothing emerged save for "muddle through", which CSFB had advised was not a viable option and was not acceptable even to Railtrack's chairman. Railtrack never had a Plan B that even got as far as being written down. I would add that Mr Adkins' advice that the Petition should only be opposed if Railtrack had a viable alternative to administration, coupled with Railtrack's waiver of 2 days' notice of the Petition and the decision not to oppose the Petition, all taken together, suggest that Railtrack accepted that even given time there was no real prospect of its being able to present a credible "Plan B". Mr Robinson accepted that he was told that if Railtrack's board needed more time to consider the evidence presented in support of the Petition they could have it. No request for further time was made.

#### **The aftermath**

230. On Monday 8<sup>th</sup> October trading in Group shares was suspended at the Stock Exchange at the Company's request. The price at suspension was 280p.
231. On 15<sup>th</sup> October Mr Byers made a statement to the House of Commons. A debate followed. Mr Byers said that on 25<sup>th</sup> July 2001 Mr Robinson had said that unless extra financial assistance was provided it would be clear that in November 2001

Railtrack would be unable to make the critical statement that it was a going concern. Mr Byers was cross-examined before me on the dubious basis that Mr Robinson had not then asked for financial assistance but only for a "soft comfort letter". In my judgment such a letter would have been of assistance to and would have been intended to assist Railtrack. It was a letter that would have been drafted in terms such as would have been intended to encourage and reassure banks, brokers and the financial market generally that the government stood, financially, behind Railtrack. That kind of assistance could fairly be described as "financial".

232. On 5<sup>th</sup> November 2001 Mr Byers responded in the House of Commons to a private notice question put by Mrs May M.P.. I have not understood that it is being said that his answers, which, as he rightly said, descended, upon the intervention of others, to "a bit of House of Commons knockabout", were misleading or untruthful and in any event I have not seen them either to add to the analysis I have so far conducted of the events as they unfolded or to provide any material from which targeted malice against Railtrack shareholders could be inferred. I cannot take his remark that the time had come to put delivery to passengers before dividend to shareholders as an indication of such or any malice but rather as a not irrational preference for a railway system that yielded "delivery" to passengers.

#### **Parliamentary privilege**

233. Mr Byers was cross-examined before me for some 20E days. Towards the end of it, Mr Rowley Q.C. turned to consider the answers which Mr Byers is recorded in Hansard as having given, after the Administration Order, to questions put to him by Members of a sub-committee of the Parliamentary Select Committee on Transport, Local Government and the Regions. Mr Rowley turned to the sub-committee's business of the 14<sup>th</sup> November 2001 and to a question put to Mr Byers by a member of that sub-committee, Mr Chris Grayling M.P.. At question No. 857 Mr Grayling and Mr Byers are recorded as follows:—

"857. Was there any discussion, theoretical or otherwise, in your Department before 25<sup>th</sup> July about the possibility of a future change in status for Railtrack, whether nationalisation, the move into a company limited by guarantee, or whatever?

(Mr Byers) Not that I am aware of."

234. In his cross-examination Mr Rowley took up questions with Mr Byers and received answers as follows:—

"Q. Do you see that question?

A. I do.

Q. You see your answer; "Not that I am aware of."

A. Yes.

Q. That answer was untrue, was it not, Mr Byers?

A. It is true to say there was work going on, so, yes, that was untrue.

Q. That was untrue?

A. It was."

235. Mr Rowley then ran through what he called the most prominent examples of discussion about the possibility of a future change in status of Railtrack, referring to events or papers of the 12<sup>th</sup>, 20<sup>th</sup> and 29<sup>th</sup> June and 12<sup>th</sup>, 25<sup>th</sup> and 27<sup>th</sup> July. Mr Rowley continued his questioning and received answers as follows:—

"Q. Amidst that welter of documentation you could not possibly have believed that the answer you gave to Mr Grayling was true, could you?

A. I accept this is not an accurate statement.

Q. It was deliberately not an accurate statement, was it not, Mr Byers?

A. It was such a long time ago, I cannot remember, but it is not a truthful statement and I apologise for that. I cannot remember the motives behind it.

Q. Let me suggest the motive, Mr Byers: you did not want to know, you did not want the sub-committee to know that options for Railtrack, including renationalisation and changes in its status, was something that you had asked your officials to examine within three days of your taking office. That is why you deliberately made that untrue statement in response to Mr Grayling's question?

A. I am sure that was not the reason.

Q. There is no other possible reason, is there, Mr Byers?

A. In the context of a select committee hearing, there are other reasons but they are - none of them are acceptable, I would accept that.

Q. You knew that if you told the truth, far from this being put to bed, there would be further investigations, further questions and further statements, did you not?

A. No, I was - I would be very happy to debate the pros and cons of the various options that were available to us and I am very clear in my own mind about the reasons for my decision on October 5<sup>th</sup>.

Q. Not the pros and cons, Mr Byers, an investigation into your conduct. You knew that if you told the truth, there would be more questions, more investigations and more statements about your conduct.

A. No, I do not accept that.

Q. The truth would have been revealed that you had planned from July that if you could achieve it, you would put Railtrack into administration?

A. That was not the case."

236. Mr Byers having referred in the course of those answers, to "other reasons", Mr Sumption Q.C. took that up in re-examination as follows:—

"Q. You said in giving that answer that there were other reasons why one might be tempted to say that sort of thing in answer to that question. They were not reasons [which you said would excuse you] but there were others. I know that this is a difficult matter for you, Mr Byers, but can you please tell us what those other reasons were?

A. They might be in a Select Committee under pressure, not wanting to - having thought actually that most people would regard those issues as having been considered, but replying in a way which would allow the question to move on to other issues but not to conceal any conspiracy or plot.

Q. Yes. Is there anything else you want to add on that question?

A. Simply I think, looking back at the question, which is the one about a range of options, I think most people would have - I cannot understand why I gave the reply I did really but most people would have expected that those options would be under consideration and ××.. ."

Mr Byers continued by referring to an article in the Guardian which he thought had made it clear that the issue of possible nationalisation would be looked at.

237. All that was on the 14<sup>th</sup> July 2005 (Day 14 of the hearing). On the 20<sup>th</sup> July (Day 16) Mr Sumption added a supplementary bundle of authorities to the existing bundle and, basing himself upon them, drew attention to one of the privileges of the House of Commons in the following terms:—

"My learned friend suggested to Mr Byers that he had deliberately lied to the House of Commons sub-committee in answer to Mr Grayling's question about the period before the

25<sup>th</sup> July in order, he said - my learned friend's suggestion - to conceal the fact that he had already by then decided upon what the Claimants call "the Administration Plan". What Mr Byers said to the sub-committee was factually incorrect, that is beyond question, and he candidly admitted that the moment the point was raised, which in my submission does credit to his evidence here, the only question with which the present trial is concerned.

Mr Byers did not accept that he intended to mislead the Transport sub-Committee. That depends on how much he recalled about the precise sequence of events at the stage when he had to answer on-the-hoof Mr Grayling's question. But he did not accept that. That is a distinct question which is a matter for the House of Commons in due course and may not, in our submission, be debated here.

Your Lordship ought to be aware of the case law about the limits of the Court's function in this exceptionally delicate area. I should make it clear that the Secretary of State for whom I appear has absolutely no desire to inhibit Your Lordship's consideration of any matters that Your Lordship may consider relevant, but he is not in a position, particularly in the office that he occupies, to waive the privileges of the House of Commons which are part of the general law, and the authorities are absolutely clear that this is not a matter which may be relied upon by my learned friend, suggested to a witness or the subject of a finding by Your Lordship."

238. Mr Sumption referred me to *Prebble -v- New Zealand Television* [1995] 1 A.C. 321 P.C. and also to *Hamilton -v- Al Fayed* [2001] 1 A.C. 395 H.L..

239. In his final speech on the 21<sup>st</sup> July (Day 17) Mr Rowley said that in addressing the subject of Mr Byers' integrity he was clearly going to have to tread carefully:-

"×. in the light of the Parliamentary privilege points that my learned friend raised with Your Lordship yesterday afternoon, and having considered the authorities on that overnight, because I saw them for the first time shortly before Your Lordship sat yesterday morning, having considered the position overnight, it does seem that Your Lordship is left with what on the face of it appears to be an unsatisfactory position, but a position [in which] Your Lordship can and should heed the fact that Mr Byers did make a factually incorrect statement to the Transport Committee on the 14<sup>th</sup> November 2001, but in the light of the authorities that is as far as I can properly invite Your Lordship to go, and as far as Your Lordship can properly go in relation to that particular point when Your Lordship is considering Your Lordship's judgment."

I then raised a possibility with Mr Rowley and the transcript continues as follows:—

"Mr Justice Lindsay: I suppose there is nothing to prohibit me from assuming the worst from Mr Byers' point of view.

Mr Rowley: I think that might ×...

Mr Justice Lindsay: Even that might fall foul ×

Mr Rowley: To the extent Your Lordship is now offering me a gift—horse, I am equally reluctant to spurn it. But if I am not permitted to probe with Mr Byers the reasons for that incorrect statement, and it is not a matter on which Your Lordship should be deliberating in the course of Your Lordship's judgment ×.

Mr Justice Lindsay: Anyhow, you do not invite me to make that assumption.

Mr Rowley: I do not think I can on the authorities, my Lord, much as I would like to and it also follows that in respect of the other answers that Mr Byers gave to the sub-committee and also the House to which I drew his attention, equally I cannot invite Your Lordship to make adverse findings against him in respect of those answers, because of the Parliamentary privilege point. So that is where one is. So the position is that the statement was untrue. It clearly puts his reliability as a witness in these proceedings squarely in play, but I am not permitted to address Your Lordship on the basis that it enables Your Lordship to draw an adverse inference as to his integrity."

240. On the authorities cited to me I hold Mr Rowley to have been right to concede that the privileges of Parliament are such that he could not, at the hearing before me, question Mr Byers with a view to showing that Mr Byers had deliberately told an untruth in Parliament and could not address me on the basis that Mr Byers had done so.
241. Stepping aside from the case at hand, the position is unsatisfactory in that it puts both Parliament and the Courts to some disadvantage. Parliament is at a disadvantage because, if it is right, as I have been told, that as a matter of convention it does not turn to questions such as have arisen in the case before me until the relevant Court has completed its proceedings, Parliament thus suffers a delay before embarking upon its own examination. The Court, too, is at a disadvantage; the cases in which such questions arise cannot simply be adjourned until Parliament has ruled on the question (inconvenient as that would generally be) because, as I have said, Parliament conventionally awaits the Court's decision before itself acting. Moreover, the Court is at the disadvantage that in considering the credibility of a witness it cannot accept or rule upon an argument that, having deliberately lied to Parliament, he or she is likely also to have lied in Court. I mention this unsatisfactory position at some

length because (difficult though it may be to find a solution) it may be that Parliament (which alone can deal with the issue) will wish to attend to it. At the moment both Parliament and the Courts are so respectfully intent on not treading upon the other's toes that both stumble.

242. I add only this. I am quite sure that Mr Rowley, questioning Mr Byers as he did, intended no inroad into Parliamentary privilege; no objection had been raised to the questions as he asked them and the relevant authorities had by then not even been collected let alone cited. When the point as to Parliamentary privilege was taken, Mr Rowley, having considered the matter overnight, conceded the issue as I have described. I, too, intended neither to permit nor to make any such encroachment and would hope to excuse myself in a similar way. Judges are loath to intervene in a well-ordered cross-examination, especially at points where the witness *may* be put into some revealing difficulty, but I should, no doubt, have been far quicker to have seen the road-block to which Mr Rowley was heading and to have warned him to divert. I apologise to Parliament for not having done so.

243. The outcome, though, is that Mr Rowley's argument as to, and my assessment, which I shall come on to, of Mr Byers' credibility, is to some extent circumscribed.

#### **Group's results**

244. On 17<sup>th</sup> December 2001 Group published its interim results for the 6 months to 30<sup>th</sup> September 2001. Profit before tax for the Group was £292 million. It had undrawn, committed facilities of about £1900 million. There is there, though, nothing that necessarily signifies that Railtrack had not been insolvent on 7<sup>th</sup> October.

#### **Dinner at the House of Commons**

245. On 6<sup>th</sup> February 2002 Mr Byers and Mr Winsor had dinner, at Mr Byers' invitation, at the House of Commons. In the course of it Mr Byers said that in the Summer of 2001 he had been looking through the Railways Act and that it was he, not officials, who had first come up with the idea of putting Railtrack into administration. He did not put a clear date to his coming up with the idea, which could thus have differed from the date of his looking through the Act. He had then, he said, asked officials to work up the idea to see if it was a flyer. He did not put date to that either. Mr Byers was cross-examined on that. He had, indeed, he said, come across the idea of a Railway Administration and "would" have said to someone in his private office to do him a note. When it was put to him that he had raised it with a view to putting Railtrack into administration he denied that, though he was not in a position to deny Mr Winsor's version of what he had said.

246. Given, as I have noted, that a paper on Railway Administration emerged in completed form in the Department only the day after Mr Byers became Secretary of State, I doubt that it was he who was first to consider it *generally*. He could, though, have

been the first to consider it relative to putting Railtrack into administration so there is added reason to believe Mr Winsor's record of what Mr Byers said but, whatever the truth, I fear I fail to see that Mr Byers' boastfulness, if such it was, is something that evidences or even tends to point towards targeted malice against Group's shareholders. There plainly can have been, indeed, as I shall come on to, were many legitimate policy reasons in favour of Railtrack's administration, reasons other than an intent to harm its shareholders.

#### **Network Rail and the Network Rail Agreement**

247. In March 2002 Network Rail was incorporated as a CLG. Creditors of Railtrack were paid in full in the course of the administration by way of funding provided to the Administrators by the Government. I do not know the extent of such support although it was a recurring theme of asides made by Mr Robinson in the course of his evidence that the outlay by the government to fund the Administration was far more than would have been needed to save Railtrack.
248. Network Rail began to negotiate with Group to buy from it its 100% holding in Railtrack.
249. On 28<sup>th</sup> May 2002 Mr Byers resigned from his office as Secretary of State.
250. On 27<sup>th</sup> June 2002 Group contracted to sell its holding in Railtrack to Network Rail for £500 million. The sale obtained the necessary approval of Group shareholders on 23<sup>rd</sup> July 2002. It was a term of the agreement that Group waived or withdrew any "Administration claims". "Administration claims" were defined to include any claims against any Secretary of State or government department arising out of or in connection with the making of the Administration Order or the circumstances or events leading to it. Plainly, therefore, Group could not have brought the claims now before me but nothing in the Network Rail Agreement could or did preclude the Claimants from doing so.
251. The shares in Railtrack were never, of course, an asset in the Administrators' hands. By dealing direct with Group, Network Rail in effect by-passed any need or further need on the Administrators' part, the creditors having been paid and Group no longer owning the Railtrack shares, to see what Railtrack's assets and businesses could fetch and to sell them at the best price reasonably obtainable.

#### **The Administration ends.**

252. On 3<sup>rd</sup> October 2002 there took effect an Order of Ferris J which brought the administration to an end,

**Group is "delisted"**

253. On 27<sup>th</sup> October 2002, Group's shares having remained suspended, Group ceased to be listed at the Stock Exchange.

**Proceedings are launched**

254. On 2<sup>nd</sup> December 2003 these proceedings were launched but doubt hung over the HRA claim for a while until late June 2004 when an extension of time defeated the Defendants' argument that it was out of time and should be struck out.

**Distributions to Group and to Group's shareholders**

255. In January and August 2003 and in December 2004 Group was enabled to make distributions to its shareholders, including such of the Claimants as were then its shareholders, which included distribution out of the sums paid to it by the Administrators. In all Group's shareholders received £2.52 per share, some 90% of the price of their shares on the morning of 8<sup>th</sup> October 2001 when their suspension began and the Administration became known, although that value fell well short of the average price (£9.90) which the shares had commanded in the 3 years preceding their suspension.
256. So much for a chronology. As I said at its outset, I would not attempt to cover every event, every communication or every issue raised but I hope I have covered the more important ones.
257. At a number of points the Claimants' argument speaks of administration as a route which avoided payment having to be made to shareholders as if that was a commanding advantage that lay behind administration. In the event the administration did not avoid payment to shareholders; Group, as shareholder in Railtrack, was paid £500m for its holding. But, in any event, whilst payment *to shareholders* might be avoided by administration, payment itself was unlikely to be. If, instead of buying Railtrack's shares, it had been Railtrack's assets that had been bought, the Government's offer for them would have had to have been the best price reasonably obtainable for the assets by the Administrators. So payment would not have been avoided. No doctrinal or other reason was ever given why avoiding payment to shareholders should have been regarded as fiercely attractive whereas payment of what could have perhaps have been a corresponding sum to the Administrators would not be. There was no evidence as to this but it surely might reasonably be thought that it was the *amount* to be paid that would chiefly concern Government rather than the identity of the recipients and, as to that, there was no evidence that the Railtrack assets would have fetched either less or more than the £500m paid for the Railtrack shares. I would add that there was no proof that the achievable value of Railtrack's shares had been depressed because of the administration itself, as opposed to the withdrawal of government support, nor did that speak for itself. When the shares were sold in June 2002 Railtrack, funded under

administration by the government and managed under the administrators, could well have more assuredly been regarded as a going concern than due diligence might have disclosed it to be in October 2001.

258. Amongst the Claimants' complaints is that Railtrack was not kept informed about events concerning Renewco. I have no evidence that anything was deliberately kept from Railtrack on the subject of Renewco; no ignored request for information on the subject was drawn to my attention and put to any witness and in any event withholding of information on the subject would have been relevant against Mr Byers only if, expressly or by implication, he had told his staff to procure that information on Renewco was to be withheld. There is no evidence whatsoever that that was the case.

**F. The remaining witnesses**

259. There are 3 witnesses who have so far been left over for comment.
260. I would not for a moment doubt Mr Robinson's honesty as a witness. I am sure he was quite free of any intent to obscure or mislead but his evidence was weakened by two features. Firstly, as he himself said, and not, I think, merely in jest, he had been trying, understandably, over the intervening years to forget the events of 2001. His memory in some areas was poor and without fully repeating them I remind myself of my findings as to the meeting of the 28<sup>th</sup> August 2001.
261. Secondly, his evidence was coloured by his firmly held belief that administration would cause chaos and was so poor a solution to any problem as to have been "on another planet". It never entered his head, he said, that the government could do otherwise than support Railtrack. This led him to persist with optimistic interpretations of events that a mind that did not harbour such fixed ideas would not have entertained. He always believed Renewco would come to fruition, for example, simply because, although there was no legally binding obligation on the Department to bring it to that point, although the April Agreement made express provision for the case that it was not brought into existence and although, because it might "score" as public, the Department, might be unable to do so, the government had said it would use its best endeavours. Although in the negotiations with Railtrack the Department had never expressly or impliedly said to Railtrack that it would give it funding in excess of the regulatory settlement and the Endeavour Agreement, it was reasonable, he thought, to *assume* there would be a reasonable outcome. Viewing things, so to speak, through glasses coloured to exclude any sight of the possibility of an absence of government support, he could see nothing to indicate that such support would not be forthcoming. For all his honesty and directness, his evidence was thus in some respects unreliable and I have in some instances preferred other evidence.
262. As for Mr Rowlands, his honesty is not challenged nor is it said that he was guilty of any deception or sharp practice. It is, though, said that he had been less than frank in his dealings with Mr Robinson, leaving the latter to leave the meetings of 28<sup>th</sup> August

and 3<sup>rd</sup> October believing that Rainbow was the Department's preferred option, one to which the Department's response was positive. It was not established to my satisfaction that he knew Mr Robinson was of that belief or that he had either deliberately or falsely done or said anything to cause him to have such a belief. That Mr Robinson left with such views is, in my judgment, more an indication of the shortcomings in Mr Robinson's mind, as I have mentioned, than of any want of frankness in the Civil Servant. I found Mr Rowlands to be a calm and thoughtful witness whose evidence I had no reason to disbelieve.

263. The Claimants say in their written final argument (overtaken by the point as to Parliamentary privilege and hence not relied on in their oral final argument) that Mr Byers is a proven liar, basing that on his answers to Mr Grayling in the House of Commons. He accepted to me that he had then told an untruth but that, of itself, does not brand him a liar if a liar is someone who tells an untruth knowing it is untrue or being reckless to its truth or falsity. Whether he was a liar within that meaning is not for me; I must leave it to the House of Commons. I cannot therefore proceed on the basis that he is a proven liar.
264. Of, course, that he had lied to the House of Commons, should the House so find, would not, of itself, indicate that he had lied to me. Looking at that, and notwithstanding the lengthy analysis of Mr Byers' veracity attempted in the Claimants' closing material, I do not find Mr Byers generally to have been an untruthful witness. On many issues it would not be possible to attack Mr Byers' evidence without impugning also Mr Rowlands', which, where attempted, was not successful. I have at some points in the chronology cast doubt on Mr Byers' evidence but never to the point of finding him to have sought to deceive or mislead the Court on any issue probative or even persuasive, alone or cumulatively with other issues, one way or another as to his state of mind on the crucial issue of the presence or absence in him of the alleged targeted malice. His demeanour throughout (no doubt the Claimants would say that this was yet more successful dissembling) was of a witness confident in the rightness of his case. The only time his answers descended to unreason was in his answer, in re-examination, as to his reasons for the admitted untruth in Parliament. His explanation as then given seemed to me little above gibberish but it will be for Parliament to assess what he meant. That answer apart, he was not, in my view, truly "caught out" in any way that threw light on the presence of the necessary targeted malice, despite a long, very well-researched and skilful cross-examination. I add only that even if, contrary to Mr Rowley's warning, I were to *assume* that Mr Byers had lied to Parliament in answer to Mr Grayling, my conclusion on the issue of his truthfulness before me would very probably remain the same, not, I hope, because of any obstinacy on my part but because I could not fairly jump from his being held to be a liar in and by Parliament to his being a liar to this Court without some reason to do so and I cannot see that such enquiry as Parliament may make into his behaviour will be concerned to find that reason (it being of no concern to Parliament as to whether or not he had lied to me).
265. The only remaining issue as to witnesses is whether adverse inference should be drawn from the Department's failure to call Mr Linnard, their Director of Railways. *Wisniewski -v- Central Manchester Health Authority [1998] PIQR 324 at 340 CA*

was cited to me. Mr Linnard's notes and reports were already fully in evidence and have been examined in some detail where of possible relevance. There has been no evidence of anything said or done between Mr Linnard and Mr Byers that might throw any light, not available from those notes and reports and from the evidence of Mr Byers, Mr Rowlands, Miss MacKenzie and Sir Richard Mottram, on the important and central issue of Mr Byers' state of mind and in particular as to whether a component within it, when he was deciding when and how to act, was targeted malice against Railtrack shareholders. In the circumstances I do not read *Wisniewski* as obliging me to draw any adverse inference and I do not. I add only that there has been no suggestion that Mr Linnard would not have been willing and able to respond to a witness summons from the Claimants had they chosen to obtain one.

#### **H. A conclusion on the Claimants' claim in tort**

266. The Administration Plan which Mr Byers is accused of devising and then implementing is a mixture of allegations about "ordinary" facts and allegations about intention.
267. As to the ordinary factual element, Mr Byers is accused of engineering a situation in which he could present evidence that Railtrack was or was unlikely to be able to pay its debts as they fell due. But that needed no "engineering". Throughout Mr Byers' time in office down to the point of Administration Railtrack's financial position was such that if the Government told it that it would limit its financial support to only that to which Railtrack was then in law entitled (a message that Group would have had to pass on to the Stock Exchange) Railtrack would have been unlikely to be able to pay its debts as they fell due. The impact of such a message on Railtrack's ability to make a November going concern statement, on its "A" credit rating, on its ability to go successfully to the bond market and on its ability either to draw down existing facilities or replace them with new ones was such that insolvency of the kind required if there was to be an administration would have been immediately demonstrable had full access to Railtrack's situation been available. Mr Robinson's heart-felt evidence that the Government created Railtrack's insolvency is not acceptable. Not only did he, in so saying, ignore his own evidence and that of others that without government support Railtrack was unable to pay its debts but in any event a provider of funds does not "create" an insolvency by providing only that to which the recipient is entitled. The Government can be said to have failed to avert Railtrack's insolvency but that cannot be said to be a fault in the Government unless one can postulate a duty on government to have funded Railtrack without limit and without condition, a hopeless proposition.
268. Another alleged factual element in the Plan is that after the Administration Order "assets of [Group] and/or Railtrack would be removed×..". There was, firstly, no way in which the administration of Railtrack could "remove" assets of Group. The relevant assets of Group were its shares in Railtrack, assets quite outside the disposition of the Administrators of Railtrack and which remained, notwithstanding the Administration, exactly where they had been before it, in Group. As for, secondly, "removal" of the assets of Railtrack, the Administrators, independent of

government and owing duties to the creditors and shareholders of Railtrack, could have "removed" Railtrack's assets only by disposing of them for the best value they could reasonably obtain. In fact, though, no such dispositions, as far as I was told, were made as instead Group, as it could not have been forced to do, rendered such dispositions redundant by choosing to sell its holding in Railtrack. No assets of Railtrack were "removed" and the "removal" of Group's assets can hardly be complained of by its shareholders as it was effected by what was (in the absence of any contrary evidence) by way of an arm's length sale freely entered into by its Board for £500,000,000. It is true that the government paid no price for and did not acquire any shares in Group but it is hard to see why, if not acquiring shares in Group, it should have to pay for them, still less why it should pay for them in addition to paying the £500,000,000 it did pay for the shares in Railtrack, a sum which then became distributable by Group to its shareholders.

269. Nor, as I have touched on above, have I any evidence of what the assets of Railtrack would have fetched if the Administrators had needed to realise them. Presumably, as the government funded the Administrators to keep the railways going, the assets could have been sold (if Group's sale of its holding had not rendered this unnecessary) on a favourable going concern basis. It does not follow that Group's board must have thought that no more than £500 million would be fetched as they may have chosen the certainty and timing of their share sale over the possible uncertainties and delays in an assets sale. I cannot be certain, therefore, even if Mr Byers had been pressing towards an administration, that he must necessarily have foreseen that it would harm Group shareholders, at all events relative to the then price of the shares in the Summer and early Autumn of 2001.
270. Yet another factual element relied on by the Claimants as a component of the Administration Plan was that by the government's threatening of primary legislation the Rail Regulator had been effectively prevented from exercising his statutory power to come to Railtrack's aid by way of an Interim Review. But a mere *threat* of legislation could not undo Mr Winsor's existing powers, nor did he think they could. On the contrary, he pointed out to Railtrack that any such legislation would take a long time, would be a difficult card for the government to play, would be resisted and might not pass at all. It was indicated to him that Railtrack believed that it had no real expectation that an interim review could help in any case.
271. I add, on the factual side of the alleged Administration Plan, that the government did not think it could force Railtrack into administration. It thought that it would need cooperation from Railtrack and when the Administration did come it was with a measure of cooperation. Railtrack, fully advised by its own Accountant, Solicitors and Counsel, chose not to ask for time to oppose the Petition, chose to waive the notice period to which it was entitled, supplied the draft press release and the letter of 7<sup>th</sup> October, chose not to challenge any of the evidence on which the Department relied and chose, though fully represented at the hearing, not to oppose the Petition.
272. That there are glaring weaknesses, indeed failures in the Claimants' case on the "ordinary" factual side of the alleged "Administration Plan" is clear but I am far from

sure that, even if any parts of the Plan as pleaded were made good, the pleaded tort I am considering would be made out as that requires, as I have several times mentioned, proof (direct or by inference) of the specific intent to impair the financial interests of the shareholders in Group, including the Claimants. It would not be enough that Mr Byers well knew that his action would cause that impairment, even if he did know that. It is to that part of the case - the alleged specific intent in Mr Byers to harm, inter alios, the Claimants – that I now turn.

273. Governments often have to decide on policy by reference to what is currently and, one hopes, reasonably perceived rather than what necessarily is or later transpires to be fact. That is not a criticism; it is inevitable and could be denied only by those with very short memories. What, then, in government, was the reasonable perception of Railtrack in 2000 and 2001? I shall collect some of the things said of it in the evidence.
274. In terms of railway performance, it had suffered not only Ladbroke Grove but Hatfield and the disruption that followed it. It was thought that some restructuring of it within the next 5 years was inevitable. It was seen as "frankly a mess", with weak management at the zonal levels. It was pilloried in the Press for bad management. It had difficulty even in funding the necessary regular maintenance. It had major projects without the skills to manage them. It was being ground down by the Regulator (so said its own advisers). Its own business plan accepted that it had not maintained and renewed the railway to an acceptable standard. Its skills base as to engineers had diminished and its training fell short of what was needed. It was reported on as suffering from institutional paralysis. It had no knowledge of the state of its assets. It had allowed the railways to become a complete shambles. Both the Prime Minister and the Deputy Prime Minister had expressed dissatisfaction with its performance.
275. On the financial side the perception, as the Government saw things, was, if anything, even worse. Its own financial plan acknowledged the unreliability of its own estimates and a persistent inability to keep within budgets. It had virtually no management control; there was management paralysis. The Department had identified an amortisation error which, it thought, meant that it would be bust "in spades" in CP 3. Railtrack itself as well as brokers had identified an intrinsic value in its shares way below the market price. Its debts threatened that its equity would become worthless. It had made its first (and substantial) loss. Its own management had acknowledged that it was facing serious financial issues. Its expenses on WCML and the Channel Tunnel Rail Link were not under control; its operating costs generally were such that it could not reliably estimate them and they were bloating. Some form of financial restructuring looked inevitable if it was to survive. Its balance sheet was so weak that it was unable to contribute to the development of the network. The Rail Regulator said it was handing out a begging bowl; the Chairman of the SRA said it "couldn't hack it" and had doubts about where the finance it needed could come from. It did not think that an approach to the Regulator would be satisfactory. Its "A" credit rating was insecure. It was in effect trading as "BBB". Its ability to go to the bond market was in doubt, its going concern status in jeopardy. Things had steadily got worse even since Ladbroke Grove and Hatfield: it

was not trusted to deliver. Its ability to drawdown its existing facilities was problematic. Its relations with the Regulator were appalling and the Regulator had said that its insolvent liquidation could be the best thing for the rail industry. He had told it not to bother to apply for a substantial re-opener until it had sorted out recovery. Its own experienced advisers said there was an impending financial crisis; it was unlikely to be able to sign off on the bond prospectus needed if a going concern qualification was to be awarded and if no additional government support was given it would be unable to go on. Its regulated assets value was no greater than its debts, so there was no reason for payment to its shareholders. Its own board was having to take regular legal advice as to its solvency and its ability to trade. It could not forecast its own financial needs with any acceptable degree of accuracy. Its stated needs seemed only to increase and it was shameless in asking for more. A Treasury adviser regarded it as a bottomless pit. The cliff's edge was, as its own Finance Director acknowledged, nearer than one might realise. By the 3<sup>rd</sup> October, there was a crisis coming within a fortnight.

276. Against such a perception in both railway performance and financial terms, there were plainly ample and sound policy reasons for the government wishing to be rid of Railtrack and for the railway assets to be passed into the control of another or others. There were good avowable and avowed public reasons for Mr Byers to develop a policy to that end. He did so, drawing on advices given to him by Civil Service and other advisers whose skill, honesty and competency has not been called in question. He was aware that the policy ran some risk of litigation; United States class actions were particularly foreseen as was some HRA challenge, but he was advised they could be robustly defended. If he had good public reasons for the policy, as I hold he had, I do not see it as a fault in him (or, at any rate, not one relevant to the tort I am considering) to have said that if necessary he would ask Parliament to legislate so that the policy could not be thwarted. Moreover for Mr Byers to have sought to procure that control of the Railtrack assets should pass out of its Board's control and into more acceptable hands at as low a cost to the public purse as he could arrange, whilst possibly running into trouble on other grounds such as Judicial Review or Human Rights grounds, of itself does nothing to prove the tort I am now considering.
277. I add that at no stage was he advised that the reasons ostensibly being given for his actions (reasons either given by him unaided or given to him by his advisers) were improper. His proposal, fully explained to them, attracted the support of No. 10 and the Treasury, against whom nothing is said.
278. All that, though, say the Claimants, is of no avail because Mr Byers' ostensible reasons were not his real reasons; from a date in July on he was, they say, dissembling and then acted with the specific intent of impairing the financial interests of Group shareholders. As to such an intent, no one gave evidence of it. No witness said they detected it or suspected it either at the time or since. Mr Robinson, speaking of the government decision to put Railtrack into administration, said he was sure the government believed it was the right thing to do. I am thus not looking at actions which can only be reasonably explained if one postulates the existence of the alleged improper motive. On the contrary, Mr Byers had sound motives available to him. The Claimants' case thus prompts this question: with good and avowable

reasons available to support his actions and in the absence of any direct evidence on the point, why should it be thought that Mr Byers harboured the dishonest one attributed to him, either as his sole, the predominant or as *any* reason for his acting as he did?

279. No answer to that question was seriously attempted, let alone that it has been put to rest. No publications or utterances of his, for example, showing a distaste in Mr Byers for capitalism or for shareholders or for shareholders in Group were put to him. One does not prove that such an intent to harm is present merely from a wish to avoid the taxpayers having to pay more than they need, especially where also present were grounds for believing that the shares in Railtrack had no great value, coupled, given that administration was the chosen route, with the obvious facts that if the assets of or shares in Railtrack were to be acquired they would have to be paid for, as, indeed, as it transpired, the shares were paid for. Nor was Mr Byers cross-examined on the notion, one which it had seemed from Mr Rowley's opening might be developed, that he had been motivated by a view that a company owing duties to shareholders was inherently unsuitable as a vehicle for provision of a safety-rather-than-profit conscious railway.
280. It is not as if there was some hidden re-nationalisation agenda. As its attitude to "scoring" exemplified, the last thing the Government wanted was Railtrack's needs being regarded as within the public borrowing and I accept Sir Richard Mottram's evidence which I mentioned earlier that re-nationalisation was completely against the underlying philosophy of the Government. Mr Byers, too, said that the Prime Minister would not have considered re-nationalisation at any great length. Indeed, apart from the bald assertion to him that Mr Byers acted with the pleaded ill-intent, which he denied, the only other impugnable reason put to him as a reason for his acting as he did was that he did so to curry favour with Labour back-benchers. He denied that but even if he had not, it would not have helped the Claimants; a secret intent to curry favour with Party colleagues is not an intent to harm Railtrack shareholders.
281. It was said that Mr Byers had in 1996 been overtly hostile to Railtrack's privatisation. Mr Byers accepted that and that he had voted against it in 1996. He accepted, too, that the Labour Party's attitude had been vigorously to oppose the privatisation when it was *in opposition*. Neither answer suggests that on party loyalty or doctrinaire grounds Mr Byers was still hostile to the status quo as it was in 2001 when the Labour Party was, of course, in Government and had no plan to undo that privatisation.
282. Further, it would be reasonable to think that, if Mr Byers had been so keenly motivated against the shareholders that he had studiously dissembled over 2 or 3 months, then he would surely have demonstrated that determination not to be thwarted that had animated his threat to legislate against the Regulator and would have gone on to ensure that the shareholders would derive as little as possible from the Administration. One could have expected him to harry the Administrators with the need for early realisations of the assets, to have limited the funding of the

administration to the same end or to have sought to impose limits or conditions calculated to depress the prices the assets might fetch so that his intent to harm the shareholders might not be thwarted and that the harm to them should be maximised. No evidence of anything such was adduced; there was no evidence that he took any steps to restrict the Administrators' due performance of their duties.

283. It is not unreasonable, either, to ask whether it could be that an intention to procure that Group and its shareholders should receive nothing for the holding in Railtrack (even if that had been the case) could be taken to represent an intention in Mr Byers to harm Group's shareholders, given that he had been advised by Mr Rowlands, on the basis of the Department's professional advisers' work, that the enterprise value of Railtrack roughly matched its debt.
284. Despite there being no reason established for Mr Byers to have had the unlawful intent he is alleged to have had, the Claimants ask me to *infer* that he had it. It is not enough for them merely to say, to use Mr Rowley's phrase, that he had something to hide. They need to shew, on a balance of probabilities, that he had the pleaded intent without which the tort here asserted does not exist - see *Hornal -v- Neuberger [1957] 1 QB 247 at 258 CA* as to the case where the allegation in issue, as here, is serious. Mr Rowley's and Mr West's final written submissions, basing themselves on anticipated findings of fact against Mr Byers on many of the issues that I have dealt with in the chronology, invite me to infer from a number of suggested incidents the presence of the improper and dishonest intent. Even taking the incidents cumulatively, I feel quite unable to do so; as will have been seen, there are many issues I have not decided against Mr Byers and there simply is no sufficient material available, in the absence also of any direct evidence on the issue, to infer that Mr Byers, to whom were available good policy grounds for his acting as he did, should, without any reason being given for his having such an intent, have nonetheless acted with a specific intent to impair the financial interests of Group shareholders.
285. Even if Mr Byers, for example, had refused further funding and had manipulated events in order to make it difficult for Railtrack to resist administration, even if he had deliberately dallied as to Renewco or in indicating that Rainbow was unacceptable or had encouraged a view that it might become acceptable, in either case in order to deny Railtrack an opportunity to develop a "Plan B", even if he had failed to explore alternatives such as takeover and notwithstanding that he had threatened to seek legislation from Parliament and to announce the withdrawal of additional funding with a view to ensuring that his policy decision was not thwarted, all that would be of no avail to the Claimants for the purposes of this tort unless from all the facts and surrounding circumstances, in the absence of direct evidence on the point, the Court could infer there to have been present not merely an awareness in him of harm to the shareholders in Group but a specific intent to harm them. As I say, no direct evidence was given that he had that intent, no good reason why he should have had it was established and there were many and various other and acceptable reasons why he should have acted as he did. In all the circumstances I am quite unable to hold that he had the required intent.

286. I shall come on to HRA considerations and I am not here concerned with whether his actions would have survived a timely Judicial Review attack by Group or by the anticipated U.S. class action. Limiting myself, therefore, to the particular tort here in issue, and leaving aside the Claimants' failure, for reasons I have given and as I hold to be the case, to have proved what I have called the "ordinary" factual side of the "Administration Plan", I have no sufficient reason to find an intent to impair the financial interests of the shareholders in Group as being the sole, the predominant or as any intent lying behind Mr Byers' actions. I must therefore dismiss the claim based on the tort of misfeasance in public office.

### **I. Human Rights**

287. Article I of the First Protocol to the European Convention on Human Rights ("the Convention") provides, so far as material:—

"Every natural or legal person is entitled to the peaceful enjoyment of his possessions."

288. By way of section 1 (1) (c) of the HRA 1998 and section 1 (2), that right, a "Convention Right", is to have effect subject to any relevant derogation (there is none). By section 6 it is made unlawful for a public authority - here the Secretary of State and Department - to act in a way which is incompatible with a Convention Right. Persons claiming that a public authority has so acted may bring proceedings against the public authority "but only if he is (or would be) a victim of the unlawful act" - section 7 (1) (b). To be a "victim" for that purpose the claimant has to be such that he would be a victim for the purposes of Article 34 of the Convention if proceedings were brought in the European Court of Human Rights in respect of the act complained of. The domestic Court is granted wide powers to grant appropriate relief where it has found the claim justified - section 8.
289. In their re-re-re amended Particulars of Claim the Claimants allege that in implementing the alleged "Administration Plan" and petitioning for an Administration Order the Defendants, as one or more public authorities, acted incompatibly with the Claimants' respective Convention rights. The incompatibility as so alleged was that the Defendants had conducted a de facto expropriation, without compensation, of the value of their interests as shareholders, alternatively had deprived them of the right to sell their shares or, in a further alternative, were responsible for a disproportionate interference with their possessions. It is pleaded that the Claimants were victims because damage to their position as shareholders in Group was an inevitable consequence of the implementation of the Administration Plan and that it was the intention of the Secretary of State and Department to damage such interests.
290. In the course of the hearing the Claimants dropped the claim that there had been a de facto expropriation.

291. The Defendants' argument in response is threefold. First, they look at the leading case on Article I of the First Protocol, namely *Sporrong & Lonnroth -v- Sweden* (1982) *SEHRR* 35 which, at its *paragraph 61* explains the practical effect of the Article. It comprises 3 distinct rules: the first is entirely general - the principle of peaceful enjoyment of property – and the third is concerned with State rights, with which we are not here concerned. It is the second of the three rules that is in play: deprivation of (including interference with) possession of property. As expropriation is no longer claimed, the only remaining claim is that there has been unlawful interference with the Claimants' possession of their shares.
292. But, say the Defendants, wherein lies that interference? Before the "Administration Plan" (had there been one, which there was not) the Claimants had shares in Group. After the implementation of the alleged Plan, they remained shareholders in Group and the numbers of their shares remained unchanged. Before the alleged implementation Group held 100% of the shares in Railtrack, exactly as it did after the alleged implementation. If there had been any "Plan" as alleged, it would have worked no material alteration in anyone's rights unless and until a Railway Administration Order was made but that process, if it represented any interference by anyone, was not by any Defendant but by the Judge. But it is accepted that the Judge acted entirely properly. True it was that Group shares were suspended at the London Stock Exchange but that was a consequence of the combined effect of the Judge's Order, the Exchange's Rules and the Company's own request that the shares should be suspended; it involved nothing unlawful on the Defendants' part. There was no unlawful interference with possession of the Claimants' property by the Defendants.
293. Secondly, the Defendants say that it could perhaps have been that *Group* could have asserted a breach of Article 1 but it never did so and instead it sold the Railtrack shares in what was not said not to have been a proper arms' length transaction for £500 million. It did so in an agreement which had as part of its terms a waiver or abandonment of all Group's rights in respect of the administration process. If Group had ever had an ability to complain under the Article (which the Defendants would doubt), it then gave it up. If, therefore, Group cannot complain under the Article, how can the Claimants, who can only claim *through* Group, (at all events unless they were deliberately targeted as to be harmed) have any maintainable claim - *Johnson -v- Gore-Wood & Co* [2003] *AC* 1 ? They cannot, say the Defendants, unless the Court finds in the Claimants' favour on the tort claim, which requires that sort of targeting. But, say the Defendants, if (contrary to their arguments) the tort was found proven, the Article 1 claim would even so be redundant as adding nothing to whatever relief would be appropriate to remedy the tort.
294. Thirdly, the Claimants, so the Defendants assert, are not "victims" in the required sense - see *Agrotexim and Others -v- Greece* (1996) *EHRR* 250 . The applicants in that case were companies which were shareholders in a brewery company which owned land it wished to develop. The local Council took steps to expropriate the land. The shareholders complained that the Brewery's rights had been violated and that, in turn, that had adversely affected their rights because of the resulting fall in the value of their shares. Their complaint was based exclusively on the proposition that the alleged violation of the Brewery's rights to peaceful enjoyment of its possessions

had affected their own financial interests because of the resulting fall in the value of their shares - see para 62 of the Judgment. The Court held that a lifting of the corporate veil so as to disregard the fact that the person directly affected - there the Brewery - was a separate legal personality and was (if anyone was) the victim, would be justified only in exceptional circumstances such as where it itself could not have raised the complaint. There is, of course, no such issue here; the Board of Group *could* have complained but did not do so and *chose*, of its own decision and for reward, to give up whatever right they would have had to do so.

295. There had, before *Agrotexim*, been cases which suggested that where the complainant was the majority shareholder in the "victim", the person directly affected, or where it could be said that the complainant was in reality conducting his business through that "victim" then the complainant could, too, be regarded as a victim but that, short of that, it was only the direct victim which could complain - see e.g. *Yarrow plc and Others -v- UK* (1983) EHRR App No. 9266/81 and the cases there cited. However, that possibility does not assist the Claimants: firstly, the Court in *Agrotexim* disapproved of the relaxation where it was a majority shareholder in the victim who complained and secondly, even in aggregate, the Claimants' own only a very small percentage of the shares in Group.
296. The reasoning in *Agrotexim* was adopted by Neuberger J. in *Humberclyde Finance Group Ltd -v- Hicks*, 14<sup>th</sup> November 2001 (HC 1998 02156) paragraphs 43-46 and *Agrotexim* was followed in *GJ -v- Luxembourg* (2003) 36 EHRR 40-710 paragraph 23 .
297. Thus, if there was any victim, say the Defendants, it was Group not the Claimants and the Claimants, under *Agrotexim*, cannot be regarded as victims within the required definition.
298. The Claimants have, in my judgment, no answer to these arguments. In particular I see no force in their attempt to distinguish *Agrotexim*. I accept the Defendants' arguments on the Human Rights issue and accordingly dismiss that part of the Claimants' case.

## **J. Conclusion**

299. I have now dealt with both heads of claim as advanced by the Claimants. I have, for the reasons I have given, found each to fail. Accordingly I dismiss the Claimants' action. If a further hearing is necessary to deal with costs or any other matters then that can, of course, be arranged.

*Gaming — Gambling — Cheating — Card game player adopting edge-sorting strategy unbeknown to casino — Implied term in contract not to cheat — Whether “cheat” connoting dishonest state of mind — Whether “cheating” including interference by player with process by which game played so as to gain unfair advantage without other player’s knowledge — Whether claimant in breach of implied term so that not entitled to recover winnings — Gambling Act 2005 (c 19), s 42(3)*

D

The claimant, a professional gambler, played the card game Punto Banco Baccarat, which was a game of pure chance, at the defendant’s casino, winning over £7.7m. Following an investigation due to the large win the defendant determined that the claimant had compromised the game by using a method of play called edge-sorting, which involved exploiting the design irregularities on the backs of the playing cards and then persuading the croupier to rotate the cards so that those of high value could be distinguished from the others before any card was dealt and bet placed, without anyone else appreciating the purpose of rotating the cards. The defendant, which had not known about edge-sorting, refused to pay the claimant his winnings on the ground that such play altered the odds against it unfairly. The claimant brought an action for recovery of the sums which he had won. The defendant contended, inter alia, that (i) the gaming contract between the parties had an implied term that the claimant would not cheat or otherwise act to defeat the essential premise of the game and if he did so the contract would be void and he would recover no winnings under it, which term he had broken, and (ii) he had committed the offence of cheating, contrary to section 42 of the Gambling Act 2005<sup>1</sup> by interfering with the game or deceiving the defendant’s staff and so was not entitled to found his claim on his own criminal conduct. The claimant admitted the implied term but denied cheating or committing a criminal offence, asserting that it was lawful for “advantage players”, such as him, to use such a method of play because they were in an adversarial position towards the casino, and that edge-sorting ought to have been known to the defendant which could have protected itself against it. The judge dismissed the claim on the ground that, although neither dishonesty nor deception was involved, the claimant’s play amounted to cheating for the purposes of the implied term. The Court of Appeal, by a majority, upheld his decision.

G

On the claimant’s appeal—

H

*Held*, dismissing the appeal, that, although there was a difference in standard of proof as between civil and criminal proceedings, cheating carried the same meaning when considering an implied term not to cheat and when applying section 42 of the Gambling Act 2005; that, the expression “cheating” in the context of games and gambling carried its own inherent stamp of wrongfulness; that the issue whether what had been done amounted to cheating, given the nature and rules of the game concerned, was a jury question to be determined objectively; that consideration of the concept of dishonesty would unnecessarily complicate the question; that, consequently, there was no occasion to add to the value judgment whether conduct

<sup>1</sup> Gambling Act 2005, s 42: see post, para 34.

was cheating a similar value judgment as to whether it was also dishonest; and that, in the present case, the claimant's actions in taking positive steps to fix the deck in a game which depended on random delivery of unknown cards was, inevitably, cheating, and the judge's conclusion to that effect was, accordingly, unassailable (post, paras 38, 43, 48–50, 76).

*Per curiam.* When dishonesty is in question the fact-finding tribunal must first ascertain (subjectively) the actual state of the individual's knowledge or belief as to the facts. The reasonableness or otherwise of his belief is a matter of evidence (often in practice determinative) going to whether he held the belief, but it is not an additional requirement that his belief must be reasonable; the question is whether it is genuinely held. When once his actual state of mind as to knowledge or belief as to facts is established, the question whether his conduct was honest or dishonest is to be determined by the fact-finder by applying the (objective) standards of ordinary decent people. There is no requirement that the defendant must appreciate that what he has done is, by those standards, dishonest. If, therefore, there were in cheating at gambling an additional legal element of dishonesty, it would be satisfied in the present case by the application of that test (post, paras 74–75).

### APPEAL from the Court of Appeal

- C By a claim form the claimant, Phillip Ivey, sought recovery against the defendant, Genting Casinos UK Ltd, trading as Crockfords Club, of moneys which he had won while playing Punto Banco at the defendant's casino. The defendant denied liability on the grounds that (1) no game of Punto Banco had been played since the premise on which the game proceeded, that the cards would be dealt at random, had been defeated because the claimant had known what the first card of any coup dealt was likely to be before it was turned face up; (2) there was an implied term that the claimant would not cheat, and that term had been broken; and (3) the claimant had committed the criminal offence of cheating under section 42 of the Gambling Act 2005 by interfering with the game or deceiving the defendant's staff and so was not entitled to found his claim on his own criminal conduct. The claimant admitted the implied term but denied cheating or committing a criminal offence and asserted that he had acted lawfully throughout. By his judgment dated 8 October 2014 Mitting J [2014] EWHC 3394 (QB); [2015] LLR 98 determined that the claimant had given himself an advantage by using the croupier as his innocent agent or tool in circumstances in which he had known that neither she nor her superiors had realised the consequences of what she had done at his instigation, thereby converting a game in which the knowledge of both sides as to the likelihood of the player or banker winning was equal to one in which the claimant's knowledge was greater, which amounted to cheating for the purposes of civil law.

- F By an appellant's notice the claimant appealed. On 3 November 2016 the Court of Appeal (Arden and Tomlinson LJ; Sharp LJ dissenting) [2016] EWCA Civ 1093; [2017] 1 WLR 679 dismissed the appeal.

- G On 16 February 2017 the Supreme Court (Baroness Hale of Richmond DPSC, Lord Wilson and Lord Hughes JSC) granted the claimant permission to appeal, pursuant to which he appealed.

The facts are stated in the judgment of Lord Hughes JSC, post, paras 2–27.

*Richard Spearman QC* and *Max Mallin QC* (instructed by *Archerfield Partners LLP*) for the claimant.

- H The behaviour described in the judgments of Mitting J [2015] LLR 98 and the Court of Appeal [2017] 1 WLR 679 does not amount to cheating for the purposes of the implied term of the gaming contract between the parties or section 42 of the Gambling Act 2005 since, whether viewed from the perspective of its ordinary meaning or for the purposes of the common law or of section 42, “cheating” connotes dishonesty. Prior to the present case

394

Ivey v Genting Casinos (UK) Ltd (SC(E))  
Argument

[2018] AC

the word had not been considered in any reported decision outside the criminal context. Offences of and relating to cheating have a long history in criminal law and proof of guilt in relation to those offences has always required proof of a dishonest state of mind. The leading case, and the only case which is relevant today, is *R v Scott* [1975] AC 819 which shows that the terms “fraud” and “cheating” were frequently used interchangeably at common law and that dishonesty was plainly a requirement of both those offences. Consequently, cheating at common law inescapably involves dishonesty.

The common law offence of cheating was abolished, except regarding offences concerning the public revenue, by section 32(1)(a) of the Theft Act 1968. However, section 25 of the 1968 Act included the offence of going equipped to cheat which remained in force until January 2007. The reference to “cheat” was to an offence under section 15 of the 1968 Act, and this required dishonesty. Those were therefore extant offences when the 2005 Act was enacted and, consequently, that meaning of cheating must have been understood when the 2005 Act was enacted. Further, section 42 of the 2005 Act does not provide a definition of cheating but the Explanatory Notes to the Act prepared by the Department for Culture, Media and Sport state, in para 163, that cheating has its ordinary meaning: see also *Gambling Bill: Hansard (HC Debates) Standing Committee B*, 30 November 2004. Consequently, the concept of cheating within section 42 of the 2005 Act connotes dishonesty as defined in *R v Ghosh* [1982] QB 1053. The same test for dishonesty is applicable in civil cases where liability depends upon an activity which connotes a dishonest state of mind: see *Twinsectra Ltd v Yardley* [2002] 2 AC 164, paras 115–116, per Lord Millett. It follows that cheating requires dishonesty in a subjective sense. The judge found as a fact that the claimant had not been subjectively dishonest: he had believed that what he was doing was not cheating.

If dishonesty were not an element of cheating the concept would, the defendant suggests, have to connote unfairness. That is too vague a criterion to be workable. Applying that test, there are many things which would be accepted as fair in a casino, in the context of the commercial relationship between customer and business, which would not be acceptable in a purely social environment, and the claimant’s conduct would not be unfair in the context. So even if it is not necessary to show dishonesty the claimant was still not cheating.

Consequently, the appeal should be allowed because the Court of Appeal erred in holding that dishonesty is not a necessary element of “cheating” either under the implied term or under section 42 of the 2005 Act and because (as all three members of the Court of Appeal accepted) the judge found neither that the claimant had been dishonest nor that he had perpetrated a material deception, and it is not open to an appellate court to disturb those findings.

*Christopher Pymont QC and Siward Atkins* (instructed by *Kingsley Napley llp*) for the defendant.

There are two limbs to the implied term of the contract: cheating or otherwise acting to defeat the essential premise of the game. Should there be anything difficult about applying the first limb, the second limb is crystal clear and easy to apply. *Punto Banco Baccarat* is a pure game of chance. All the

A odds are fixed and the player bets before a card is played. It is common ground that (i) the essential premise of Punto Banco is that the player does not know what the cards are before he places his bet and (ii) the claimant's edge-sorting was designed to and did give him a good idea of what the cards were before he placed his bet. The claimant thus plainly acted to defeat the essential premise of the game and dishonesty is irrelevant to any breach of contract.

B Further, "cheating" in its normal meaning does not necessarily involve dishonesty and, even if it does, the test for dishonesty is objective not subjective: see *Twinsectra Ltd v Yardley* [2002] 2 AC 164 and *Starglade Properties Ltd v Nash* [2011] Lloyd's Rep FC 102. The key test for cheating is not whether the player acted dishonestly but whether he acted deliberately to gain an unfair advantage in the game. The test suggested by the claimant would lead to inconsistent results applying to the same kind of activity, depending on the subjective state of mind of the player concerned.

C As to section 42 of the Gambling Act 2005, the Explanatory Notes make clear that cheating "has its normal everyday meaning". Accordingly, the actus reus of the offence is any sort of unfair activity which a jury believes to be cheating. A jury is perfectly able to decide whether the gambler cheated or not, once the nature and rules of the game are understood and the activity has been explained. The appropriate mens rea for section 42 is that the defendant intended the actus reus: see *Sweet v Parsley* [1970] AC 132. That is consistent with the earlier statutory offences of cheating at cards which do not contain any requirement that the accused be guilty of dishonesty. Section 17 of the Gaming Act 1845 (8 & 9 Vict c 109) provided for "fraud or unlawful device or ill practice in playing at or with cards". It was held in *R v Moore* (1914) 10 Cr App R 54 that "ill practice" was a question for the jury, who should determine simply whether the game had been played fairly: see also *Baker, The Oxford History of the Laws of England* (2003), vol VI (1483-1558), Part IX, Chapter 42 "Deceit", pp 769-773.

D There is also a large number of offences at English law criminalising conduct which most people would regard as dishonest but which do not have dishonesty as a requirement for the offence to be committed, such as (i) corruption (see *Cooper v Slade* (1858) 6 HL Cas 746; *R v Harvey* (unreported) 8 May 1998); (ii) forgery under sections 36 and 37 of the Forgery Act 1861 (24 & 25 Vict c 98); and (iii) forgery under section 1 of the Forgery and Counterfeiting Act 1981. Therefore, for a person to be guilty of those offences there is no requirement to prove dishonesty as defined in *R v Ghosh* [1982] QB 1053. Further the Hansard materials show that dishonesty was not to be a factor in the offence but fairness was: see Gambling Bill: Hansard (HC Debates), Standing Committee B, 30 November 2004.

E The test of cheating applied by Mitting J [2015] LLR 98 and by the majority in the Court of Appeal [2017] 1 WLR 679 is correct and supported. In any event, if dishonesty is required, the claimant acted dishonestly. As Tomlinson LJ concluded, the claimant's actions were a clear case of intentional deception.

F *Spearman QC* in reply.

H It would be impossible to make a positive finding of dishonesty on the facts of the present case. Cheating is acting with deliberate dishonesty: see *R v Scott* [1975] AC 819.

The court took time for consideration.

396

Ivey v Genting Casinos (UK) Ltd (SC(E))  
Lord Hughes JSC

[2018] AC

25 October 2017. LORD HUGHES JSC (with whom BARONESS HALE  
OF RICHMOND PSC, LORD KERR OF TONAGHMORE JSC, LORD  
NEUBERGER OF ABBOTSBURY and LORD THOMAS OF CWMGIEDD  
agreed)

1 This case, in which a professional gambler sues a casino for winnings  
at Punto Banco Baccarat, raises questions about (1) the meaning of the  
concept of cheating at gambling, (2) the relevance to it of dishonesty, and  
(3) the proper test for dishonesty if such is an essential element of cheating.

### *The facts*

2 Over two days in August 2012 Mr Ivey, the claimant in this case,  
deployed a highly specialist technique called edge-sorting which had the  
effect of greatly improving his chances of winning. He had the help of  
another professional gambler, Cheung Yin Sun (“Ms Sun”). First they set up  
the conditions which enabled him to win. Then, later that evening and the  
following day, over the course of some hours, he won approximately £7.7m.  
The casino declined to pay, taking the view that what he had done amounted  
to cheating. His case is that it was not cheating, but deployment of a  
perfectly legitimate advantage.

3 What happened is not in dispute. It was set out with admirable clarity  
by Mitting J [2015] LLR 98 and very little is necessary by way of addition or  
subtraction. What follows in this section is almost entirely in his words.

4 Punto Banco is a variant of Baccarat. It is not normally, to any extent,  
a game of skill. Six or eight decks or, in English nomenclature, packs of 52  
cards are dealt from a shoe, face down by a croupier. Because the cards are  
delivered one by one from the shoe, she has only to extract them; no deviation  
is permitted in their sequence. She places them face down in two positions on  
the table in front of her, marked “player”, the “Punto” in the name, and  
“Banker”, “Banco”. Those descriptions label the positions marked on the  
table; there need be no person as “player” and ordinarily there is not. She  
slides the cards from the shoe, face down, one card to player, one to banker;  
a second to player and a second to banker. In prescribed circumstances she  
must deal one further card, either to player or to banker or to both, but this  
possibility is irrelevant to what occurred.

5 The basic object of the game is to achieve, on one of the two positions,  
a combination of two or three cards which, when added together, is nearer  
to nine in total than the combination on the other position. Aces to nine  
count at face value, ten to King inclusive count as nothing. Any pair or trio  
of cards adding up to more than ten requires ten to be deducted before  
arriving at the counting total. Thus four plus five equals nine, but six plus  
five (which equals 11) counts as only one.

6 Punters (of whom there need only be one) play the house. They bet  
before any card is dealt and can bet on either the player or banker position.  
The cards are revealed by the croupier after a full hand (or “coup”), usually  
of four cards, two to each position, has been dealt. Winning bets are paid at  
evens on player, and at 19 to 20 on banker. It is possible to bet on a tie. In  
the event of a tie, all bets on player or banker are annulled; in other words,  
the punter keeps his stake and the only bet paid out on is the tie at odds set  
by the casino of either eight to one or, at Crockfords, nine to one. It is  
possible to place other types of bet, but this case does not concern them and

[2018] AC

Ivey v Genting Casinos (UK) Ltd (SC(E))  
Lord Hughes JSC

A they need not be described. The different odds mean that the casino, or house, enjoys a small advantage, taken over all the play. That is standard and well known to all; casinos publish the percentage “house edge” which they operate. In Punto Banco at Crockfords it was 1.24% if player wins and 1.06% if banker wins.

B 7 A pack of 52 playing cards is manufactured so as to present a uniform appearance on the back and a unique appearance on the face. The backs of some cards are, however, not exactly uniform. The backs of many packs of cards for social use have an obvious top and bottom: for example the manufacturer’s name may be printed once only, or the pattern may have an obviously right way up and an upside down. In casino games in which the orientation of the back of the card may matter, cards are used which are in principle indistinguishable whichever way round they are when presented in  
C a shoe.

D 8 Cards with no pattern and no margin at the edge present no problem; they are indistinguishable. However, many cards used in casinos are patterned. If the pattern is precisely symmetrical the effect is the same as if the card is plain; the back of one card is indistinguishable from any other. But if the pattern is not precisely symmetrical it may be possible to distinguish between cards by examining the backs.

E 9 “Edge-sorting” becomes possible when the manufacturing process causes tiny differences to appear on the edges of the cards so that, for example, the edge of one long side is marginally different from the edge of the other. Some cards printed by Angel Co Ltd for the Genting Group (which owns Crockfords) have this characteristic, apparently within the narrow tolerances specified for manufacture. The pattern is not precisely  
F symmetrical on the back of the cards. The machine which cuts the card leaves very slightly more of the pattern, a white circle broken by two curved lines, visible on one long edge than on the other. The difference is sub-millimetric, but the pattern is, to that very limited extent, closer to one long edge of the card than it is to the other. Before a card is dealt from a shoe, it sits face down at the bottom of the shoe, displaying one of its two  
long edges. It is possible for a sharp-eyed person sitting close to the shoe to see which long edge it is.

G 10 Being able thus to see which long edge is displayed is by itself of no help to the gambler. All the cards have the same tiny difference between their right and left long edges, so knowing which edge is displayed tells the gambler nothing about the value of the next card in the shoe. The information becomes significant only if things can be so arranged that the cards which the gambler is most interested in are all presented with long  
edge type A facing the table, whilst all the less interesting cards present long edge type B. Then the gambler knows which kind of card is next out of the shoe.

H 11 In Punto Banco cards with a face value of seven, eight and nine are high value cards. If one such card is dealt to player or to banker, it will give that position a better chance of winning than the other. Thus a punter who knows that when the first card dealt (always to the “player” position) is a seven, eight or nine, he will know that it is more likely than not that player will win. If he knows that the card is not a seven, eight or nine, he will know that it is more likely than not that banker will win. Such knowledge, it is

398

Ivey v Genting Casinos (UK) Ltd (SC(E))  
Lord Hughes JSC

[2018] AC

agreed, will give the punter a long term edge of about 6.5% over the house if played perfectly accurately. A

12 What is therefore necessary for edge-sorting to work is for the cards in the shoe to be sorted so that all the sevens, eights and nines display edge type A, whilst the rest display edge type B. That means rotating the high value cards so that they display edge type A. If the punter were to touch the cards, the invariable practice at most casinos, including at Crockfords, would be that those cards would not be used again. The only person who touches the cards is the croupier. So what had to happen was to get the cards sorted (i.e. differentially rotated) by type A and type B by the croupier and then to get them re-used in the next shoe, now distinctively sorted. B

13 For edge-sorting to work at Crockfords it is therefore essential that the croupier is persuaded to rotate the relevant cards without her realising why she is being asked to do so. Casinos routinely play on quirky and superstitious behaviour by punters. It is in the casino's interests that punters should believe, erroneously, that a lucky charm or practice will improve their chance of winning and so modify or defeat the house edge. Consequently a wide variety of requests by punters, particularly those willing to wager large sums on games which they must, if they play long enough, lose in the long run, are accommodated by casinos without demur or surprise. C D

14 All of the games of Punto Banco played by the claimant and Ms Sun on 20 and 21 August 2012 were captured on CCTV, mostly with contemporaneous audio recording as well. The moment at which they persuaded the croupier, Kathy Yau, to rotate the cards was at 9 p.m. on 20 August. The video shows it and the words spoken have been transcribed. Before then, the claimant and Ms Sun had played part of four shoes, the first two plain backed, and the second two Angel cards but with no asymmetry on the back. E

15 The claimant is a high stakes gambler. He began, by his standards, modestly: bets placed on those four shoes ranged from £4,000 to £75,000 per coup. He was losing. At 8.56 p.m. he requested a new shoe of cards. A new shoe was produced. The cards were blue Angel cards with the rounded pattern described on the back. At 8.57 the claimant asked Jeremy Hillier, the senior croupier overseeing the game: "If I win, can I say I want the same cards again?" to which Mr Hillier replied he could, "because [he was] not bending them". The claimant had in fact avoided touching the cards from either the first or second shoe onwards. F

16 The croupier, Kathy Yau, then put the cards face down in blocks on the table to make the cut, as is conventional. She cut the cards so as to exclude about one deck from play. The claimant asked about the cut: "Why so big?" Ms Sun said: "They don't cut the seven cards", a reference to the traditional cut of seven cards from the end. Ms Yau asked if he wanted her to cut seven cards, to which he replied "yes", he wanted to play 90 hands, slightly more than the maximum likely to be possible with an eight-deck shoe with a seven-card cut. She complied, after checking with the supervisor on duty in the room. That had the effect of maximising the number of coups which would be possible with those packs, and of exposing the maximum number of cards to the sorting (rotation) process. G H

17 Ms Yau then dealt the first coup. After the bet was made, and all the cards then dealt, the next stage was for the croupier to turn the cards face up

[2018] AC

Ivey v Genting Casinos (UK) Ltd (SC(E))  
Lord Hughes JSC

A to reveal whether Player or Banker had won. Ms Sun then asked Ms Yau in Cantonese to do it, in other words to turn the cards over so that the face showed, slowly. Ms Yau said “yes”. Ms Sun then asked her again in Cantonese to turn the cards in a particular and differential way as they were being exposed and before they were put on the pile of used cards. “If I say it is good, you turn it this way, good, yes? Um, no good.” (A slightly different sounding um.) Ms Yau did not immediately understand what was required.

B She asked, “so you want me to leave it?” To which Ms Sun replied, “change, yeah, yeah, change luck”. Ms Yau: “what do you mean?” Ms Sun gestured how to turn it. “Turn it this way”. Ms Yau: “what, just open it? Yeah”. Ms Sun: “um”, signifying good in Cantonese.

18 The claimant then chipped in, “yeah, change the luck, that’s good. Anything to change the luck, it is okay with me.” Ms Sun reiterated her request in Cantonese, “If I say it is not good, you turn it this way. If it is good, turn it this way, okay?” To which Ms Yau said “okay”. When she turned over the cards of the second coup, Ms Sun said of four of them, “good”, and of one, “not good”, in Cantonese. Ms Yau did as requested. What she was being asked to do, and did, was to turn the cards which Ms Sun called as “good” end to end, and the “not good” cards side to side. In consequence, the long edge of the “not good” card was oriented in a different way from the long edge of the “good” cards. The judge found that she had been “wholly ignorant” of the significance of what she was doing, card by card, at the call of Ms Sun.

D

19 This procedure was followed for each of the next 79 coups dealt from this shoe. The maximum amount staked by the claimant on the coups towards the end of the shoe reached £100,000. Self-evidently, at no time during the play of this shoe did he derive any advantage from the rotation of the cards requested by Ms Sun because that rotation occurred at the end, not at the beginning, of each coup. This was all preparation.

E

20 At 10.03 pm, when the shoe was exhausted, the claimant said that he had won with that deck (ie shoe), and that he would keep it. The senior croupier, who had brought in a new collection of cards, was told by the claimant he did not want them, as he “had won £40,000 with that deck”; that was agreed to. The original cards were reused. The defendant has not been able to calculate retrospectively whether that assertion of winnings to that point was true.

F

21 Before the shoe was reused it had to be reshuffled. The claimant had earlier asked Ms Yau’s predecessor as croupier for a shuffling machine to shuffle the cards. The cards were reshuffled by a machine. For a punter using the edge-sorting technique this ensured that the shuffle would be effected without rotating any of the cards unless the croupier did so before they were put into the machine. Ms Yau did not do so. Manual shuffling would have carried a much higher risk of re-rotation as it was done.

G

22 Play with the reshuffled shoe recommenced at 10.12 pm and continued until Ms Yau went for a half hour break at 10.31 pm. The claimant did not play during her break but resumed when she returned until 3.57 am on 21 August. Ms Yau was the croupier throughout. The claimant’s stake increased to £95,000 and then to £149,000 per coup. He won approximately £2m.

H

23 The accuracy of his bets on player increased sharply. In the first two shoes in which Angel cards were used, those without an asymmetric pattern

400

Ivey v Genting Casinos (UK) Ltd (SC(E))  
Lord Hughes JSC

[2018] AC

on the back, he placed respectively 11 bets and then 1 bet on player and a seven, eight or nine only occurred once in that 12 times. On the shoe in which the edge-sorting was done in the manner described, he placed 23 bets on player of which eight were sevens, eights or nines. On the succeeding shoes, those at least that were completed on that night, shoes four to eight, the record was as follows. Shoe four, 23 accurate bets out of 27; shoe five, 22 accurate bets out of 25; shoe six, 20 accurate bets out of 26; shoe seven, 23 accurate bets out of 30; shoe eight, 17 accurate bets out of 19. A similar but slightly less pronounced pattern occurred on the following day.

24 At the end of play on the early morning of the 21st the claimant asked if he could keep the same shoe, which he referred to as a deck, if he returned on the following day. He was told he could. Ms Yau returned to duty at 2 p.m. on 21 August. The claimant resumed play with the same cards at 3 p.m. and played until 6.41 p.m. His average stake was never less than £149,000. For the last three shoes it was £150,000, the maximum that he was allowed to bet each time. In the middle of play of the last shoe, the senior croupier told the claimant that the shoe would be replaced when it was exhausted. When it was, the claimant and Ms Sun left. By then he had won just over £7.7m.

25 Crockfords' practice after a large win such as this is to conduct an ex post facto investigation to work out how it occurred. After quite lengthy review of the CCTV footage and examination of the cards, the investigators succeeded in spotting what had been done. Nobody at Crockfords had heard of edge-sorting before.

26 Nine days after the play, on 30 August, the claimant spoke to Mr Pearce, Managing Director of the London casinos of Genting UK, who told him that Crockfords would not be paying his winnings because the game had been compromised. The claimant said he had not touched the cards, but did not state that which at the trial he freely admitted, that he had used edge-sorting. Arrangements were made to refund his deposited stake, £1m, on 31 August.

27 The judge found that Mr Ivey gave factually frank and truthful evidence of what he had done. The finding was that he was a professional gambler who described himself as an "advantage player", that is one who, by a variety of techniques, sets out to reverse the house edge and to play at odds which favour him. The judge found that he does so by means that are, in his opinion, lawful. He is jealous of his reputation and is adamant that what he does is not cheating. He described what he did, with Ms Sun, as legitimate gamesmanship. The judge accepted that he was genuinely convinced that what he did was not cheating. But the question which matters is not whether Mr Ivey thought of it as cheating but whether in fact and in law it was. The judge concluded that it was, and so did the majority of the Court of Appeal. Were they right or wrong?

### *Gaming and the law*

28 Gaming has been the subject of statutory rules since at least the time of the Restoration. They have addressed, inter alia, both (1) unfair play and (2) the recoverability of winnings by civil action. Very recently, the Gambling Act 2005 has comprehensively revised the statutory framework for gaming. In outline, it makes it lawful but subject to detailed licensing.

[2018] AC

Ivey v Genting Casinos (UK) Ltd (SC(E))  
Lord Hughes JSC

A 29 The Gaming Act of 1664 (16 Car 2, c 7) addressed what it identified as the social ill of excessive gambling, when conducted not for “innocent and moderate recreation” but as a means of trade or making a living. Even in times of relative debauchery, the Act castigated the effect of such gaming on the youth of the day, whether of “the nobility and gentry” or otherwise. By section 3 it made irrecoverable at law any winnings over the then enormous sum of £100. And by section 2 it imposed a forfeit of three times the winnings on anyone who won by (in effect) wrongful means. The forfeit was recoverable by civil action at the suit either of the loser or, if he did not sue, by anyone else. Half the forfeit went to the loser, and half to the Crown. The misbehaviours which gave rise to such forfeit were defined as “any fraud, shift, cousenage, circumvention, deceit or unlawful device, or ill practice whatsoever”, and the activities covered included not only cards and dice, but also tennis and foot races, as well as horse-racing, skittles, bowls and many other games. The forfeit was incurred not only by winnings by wagering, but also by prize winning, if the ill practice was demonstrated.

B 30 By the time of Queen Anne, the attitude to gambling had hardened. The Gaming Act 1710 (9 Ann c 19) repeated in section 5 the list of misbehaviour attracting a forfeit (now five times the winnings), and such was now recognised as a criminal offence attracting corporal punishment. The same Act, by section 2, enabled anyone who lost more than £10 at games, however fair, to recover it by civil action, together with a forfeit of three times the loss, half for the loser and half for the poor of the parish. By section 1 it made void any security given for payment of gaming debts.

D 31 The Gaming Act 1845 (8 & 9 Vict c 109) abolished the forfeits, but (by section 18) made general the rule that gaming or wagering contracts were unenforceable in law. Section 17 dealt with malpractice. It referred to “fraud or unlawful device or ill practice” and made winning by such means a criminal offence, by way of deeming it to be the recognised offence of obtaining by false pretences with intent to cheat or defraud: see section 53 of the Larceny Act 1827 (7 & 8 Geo 4, c 29). Section 17 was headed “cheating at play to be punished as obtaining money by false pretences”.

E 32 This history is of limited importance, given the enactment of an entirely new regime by the Gambling Act 2005, but it does demonstrate that the law concerned itself from very early times with malpractice at gaming, and that by 1845 a general expression used for it was “cheating”. It is also of note that the malpractice thus dealt with was not confined to deception or fraud, but extended to “ill practice”. Given the origins of that expression in the 1664 Act, relating to foot races, tennis and the like, as well as to gambling, it is not possible to treat “ill practice” as having been limited by the principle of ejusdem generis to deception or fraud.

F 33 The Gambling Act 2005 reversed, by sections 334 and 335, the rule that gaming contracts are unenforceable. The new Gambling Commission is, however, given by section 336 a new power to declare void a bet taken by a licensee if satisfied that the bet was “substantially unfair”. Amongst the factors (not exhaustively defined) which are to be considered when deciding whether a bet was substantially unfair is included the circumstance that either party to the bet either did believe or ought to have believed that an offence of cheating had been or was likely to have been committed in connection with it, although that is by no means the only consideration. Supply of insufficient information and the belief of either party that the

402

Ivey v Genting Casinos (UK) Ltd (SC(E))  
Lord Hughes JSC

[2018] AC

underlying contest is conducted in contravention of industry rules are two of the other specified relevant circumstances. The offence contrary to section 17 of the 1845 Act is replaced by a new offence of cheating at gambling created by section 42.

34 Section 42 is in the following terms:

*“Cheating*

“(1) A person commits an offence if he— (a) cheats at gambling, or (b) does anything for the purpose of enabling or assisting another person to cheat at gambling.

“(2) For the purposes of subsection (1) it is immaterial whether a person who cheats— (a) improves his chances of winning anything, or (b) wins anything.

“(3) Without prejudice to the generality of subsection (1) cheating at gambling may, in particular, consist of actual or attempted deception or interference in connection with— (a) the process by which gambling is conducted, or (b) a real or virtual game, race or other event or process to which gambling relates.”

By subsection (4) this offence carries a penalty of up to two years imprisonment on indictment, or 51 weeks on summary conviction.

*Cheating*

35 It has been common ground throughout this litigation that the (now in principle enforceable) contract for betting into which these parties entered is subject to an implied term that neither of them will cheat.

36 It follows that, if what Mr Ivey did was cheating, he is in breach of this implied term and cannot as a result recover his “winnings”. As well as advancing this defence, the casino pleaded that what he did amounted to the offence under section 42, and that in consequence he could not recover the proceeds of his criminal offence. Mitting J held that the implied term had been broken, and that it was therefore unnecessary to decide whether or not the statutory offence had been committed. The majority of the Court of Appeal dismissed Mr Ivey’s appeal. The reasoning of Arden and Tomlinson LJ was not identical, but both upheld the judge’s conclusion that what had been done amounted to cheating. Sharp LJ would have allowed the appeal, taking the view that there could not be cheating unless the statutory offence had been committed and that a necessary ingredient of it was dishonesty as defined in *R v Ghosh* [1982] QB 1053.

37 The core submission of Mr Spearman QC for Mr Ivey runs as follows: (a) the test of what is cheating must be the same for the implied term as for section 42; (b) cheating necessarily involves dishonesty; (c) the judge found that Mr Ivey was truthful when he said that he did not consider what he did to be cheating; therefore dishonesty and in particular the second leg of the test established by *R v Ghosh* had not been demonstrated; (d) it follows that what was done was not cheating, and Mr Ivey ought to have recovered the £7.7m.

38 The concept of cheating long pre-dates section 42 of the Gambling Act 2005. It clearly embraces the kind of malpractice described in the statutes of 1664, 1710 and 1845. Section 42 thus adopted a longstanding concept. However, there is no reason to doubt that cheating carries the same meaning when considering an implied term not to cheat and when applying

[2018] AC

Ivey v Genting Casinos (UK) Ltd (SC(E))  
Lord Hughes JSC

- A section 42 of the Act. There will be a difference in standard of proof as between civil and criminal proceedings, but that does not affect the meaning of cheating. Section 42 expressly does not exhaustively define cheating, and the elaboration in section 42(3) is explanatory rather than definitive. The section leaves open what is and what is not cheating, as is inevitable given the extraordinary range of activities to which the concept may apply.
- B Plainly, what is cheating in one form of game may be legitimate competition in another.

- 39 For his second and crucial proposition Mr Spearman relied, as a matter of authority, substantially on *R v Scott* [1975] AC 819. Viscount Dilhorne, with whom the other law lords agreed, referred in the course of his speech to the ancient common law offence of cheating. He cited, at p 840, *East's Pleas of the Crown* (1803) vol II, pp 816–818 for that author's
- C opinion that that offence consisted in

- “the fraudulent obtaining [of] the property of another by any deceitful and illegal practice or token (short of felony) which affects or may affect the public. It is not, however, every species of fraud or dishonesty in transactions between individuals which is the subject matter of a criminal charge at common law . . . it must be such as affects the public . . .
- D calculated to defraud numbers, to deceive the people in general.”

Says Mr Spearman, this demonstrates that fraud, and thus dishonesty, was an essential element of the common law offence of cheating. The same, he contends, must follow for cheating at gambling.

- 40 Mr Scott and his co-defendants were in the business of film piracy. They bribed employees of commercial cinemas, such as projectionists, to
- E abstract the reels of film overnight so that infringing copies could be made and in due course distributed commercially for profit. The charge was not cheating at common law but conspiracy to defraud. The substantial issue before the House of Lords was whether conspiracy to defraud required as an essential element that there had been deception, which had not been any part of the strategy employed by the defendants. The answer was that deception
- F was one very common form of defrauding, but not the only one. Whilst no exhaustive definition of defrauding was attempted, the House held that defrauding also included depriving another, by dishonest means, of something which is his or to which he would or might be entitled but for the fraud. In so holding, the House followed its own decision in *Welham v Director of Public Prosecutions* [1961] AC 103, where it had emphasised that the essence of defrauding was the effect on the victim.

- G 41 To the extent that defrauding someone may take the form of depriving him of something which is his, or to which he might otherwise be entitled, it is plain, and wholly unsurprising, that a criminal offence of defrauding must contain in addition an element which demonstrates that the means adopted are illegitimate and wrong. Otherwise much perfectly proper business competition would be at risk of being labelled fraud, since
- H such competition frequently involves strategies to divert business from A to B. Hence it is entirely unsurprising that conspiracy to defraud was held to require in addition the proof of dishonest means. Dishonesty, in this context, supplies the essential element of illegitimacy and wrongfulness.

42 As the citation from *East* shows, the ancient common law offence of cheating consisted of a particular subset of fraudulently depriving another of

404

Ivey v Genting Casinos (UK) Ltd (SC(E))  
Lord Hughes JSC

[2018] AC

property, where the fraud affected the public as a whole. This offence was abolished by section 32(1) of the Theft Act 1968, except in so far as it consisted of cheating the revenue. There is no discussion of this abolition in the *Eighth Report of the Criminal Law Revision Committee on Theft and Related Offences* (1966) (Cmnd 2977), which preceded the Act and recommended most of the terms of the statute including section 32(1), but it is clear that the Committee took the view that whatever was previously covered by other forms of common law cheating would be caught by its newly recommended offences, particularly that of obtaining property by deception under what became section 15 of the Act. The Theft Act 1968 used the expression “cheat” only in one place, in relation to the offence of going equipped created by section 25. There, in section 25(1)(5), it was used in a restrictive sense limited to the offences contrary to section 15. (The references to cheat have since been removed from that section.)

43 The common law offence of cheating was referred to in *R v Scott* [1975] AC 819 only because a supplementary argument for the defendants was that section 32(1) had impliedly abolished also the offence of conspiracy to defraud, which argument unsurprisingly failed. There is no occasion to investigate the accuracy of East’s opinion on the scope of the common law offence of cheating. It may well be that it necessarily involved dishonesty, although that expression was not in general use in criminal statutes until the Theft Act 1968 adopted it in preference to “fraudulently”. But to say that dishonesty was a necessary element in an offence of which the gist was obtaining the property of others who may well be strangers, and where the offence would otherwise be likely to be impossibly wide, is of no help in construing the meaning of cheating in the quite separate context of gambling. Still less is there any reason to suppose that the framers of the Gambling Act adopted in 2005 an analogy with a common law offence which had largely been abolished nearly 40 years earlier, and when “cheat” had been used in a different sense in the Theft Act 1968. Whilst it makes perfect sense to interpret the concept of cheating in section 42 of the Gambling Act in the light of the meaning given to cheating over many years, it makes none to interpret cheating, as used over those many years, by reference to an expression—dishonesty—introduced into the criminal law for different purposes long afterwards in 1968. In gambling, there is an existing close relationship between the parties, governed by rules and conventions applicable to whichever game is undertaken, and which are crucial to what is cheating and what is not. Cheating at gambling need not result in obtaining the property of the other party, as section 42(2) explicitly says. Most importantly, whilst the additional element of dishonesty was necessary to the common law offence of cheating, and no doubt still is to the surviving offences of cheating the Revenue and conspiracy to defraud, in order to mark out the illegitimate and wrongful from the legitimate, the expression “cheating” in the context of games and gambling carries its own inherent stamp of wrongfulness.

44 Authority apart, Mr Spearman contended that as a matter of ordinary English, cheating necessarily imports dishonesty. This argument is most neatly encapsulated by inversion: “honest cheating” is indeed, as has been sensibly recognised by those who have addressed the phrase in this litigation, an improbable concept. But that is because to speak of honest cheating would be to suggest that some cheating is right, rather than wrong.

A That would indeed be contrary to the natural meaning of the word cheating. It does not, however, follow, either (1) that all cheating would ordinarily attract the description “dishonest” or (2) that anything is added to the legal concept of cheating by an additional legal element of dishonesty.

45 Although the great majority of cheating will involve something which the ordinary person (or juror) would describe as dishonest, this is not invariably so. When, as it often will, the cheating involves deception of the other party, it will usually be easy to describe what was done as dishonest. It is, however, perfectly clear that in ordinary language cheating need not involve deception, and section 42(3) recognises this. Section 42(3) does not exhaustively define cheating, but it puts beyond doubt that both deception and interference with the game may amount to it. The runner who trips up one of his opponents is unquestionably cheating, but it is doubtful that such misbehaviour would ordinarily attract the epithet “dishonest”. The stable lad who starves the favourite of water for a day and then gives him two buckets of water to drink just before the race, so that he is much slower than normal, is also cheating, but there is no deception unless one manufactures an altogether artificial representation to the world at large that the horse has been prepared to run at his fastest, and by themselves it is by no means clear that these actions would be termed dishonesty. Similar questions could no doubt be asked about the taking of performance-enhancing drugs, about the overt application of a magnet to a fruit machine, deliberate time-wasting in many forms of game, or about upsetting the card table to force a re-deal when loss seems unavoidable, never mind sneaking a look at one’s opponent’s cards.

46 Conversely, there may be situations in which there is deception of the other player but what is done does not amount to cheating. The so-called “three card trick”, much practised upon travellers on Victorian and Edwardian trains especially to and from racecourses, commonly involved a deception of the target traveller by a group of associates pretending to be unconnected to one another. The idea was to lure the target into playing the game. But once he was ensnared, the game was often played genuinely; the target lost not because of any cheating but because the shuffler of the cards had sufficient speed of hand to deceive the eye: see for example *R v Governor of Brixton Prison, Ex p Sjoland and Metzler* [1912] 3 KB 568. No doubt other exponents of the three card trick had less genuine methods, such as a fourth (concealed) card, which would indeed be cheating. Sometimes the game admits of a level of legitimate deception. The unorthodox lead or discard at bridge is designed to give the opponent a misleading impression of one’s hand, but it is part of the game and not cheating. Pretending to be stupid at the poker table, so that one’s opponent does not take one seriously, and takes risks which he otherwise might not, may or may not be another example.

47 These far from sophisticated examples demonstrate the inevitable truth that there will be room for debate at the fringes as to what does and does not constitute cheating. To label an activity “advantage play”, as Mr Ivey and others did, is of no help at all. It asks, rather than answers, the question whether it is legitimate or cheating. It would be very unwise to attempt a definition of cheating. No doubt its essentials normally involve a deliberate (and not an accidental) act designed to gain an advantage in the play which is objectively improper, given the nature, parameters and rules

406

Ivey v Genting Casinos (UK) Ltd (SC(E))  
Lord Hughes JSC

[2018] AC

(formal or informal) of the game under examination. The question in the present case, however, does not depend on the near impossible task of formulating a definition of cheating, but on whether cheating necessarily requires dishonesty as one of its legal elements.

48 Where it applies as an element of a criminal charge, dishonesty is by no means a defined concept. On the contrary, like the elephant, it is characterised more by recognition when encountered than by definition. Dishonesty is not a matter of law, but a jury question of fact and standards. Except to the limited extent that section 2 of the Theft Act 1968 requires otherwise, judges do not, and must not, attempt to define it: *R v Feely* [1973] QB 530. In this it differs strikingly from the expression “fraudulently”, which it largely replaced, for the judge did define whether a state of mind, once ascertained as a matter of fact, was or was not fraudulent: *R v Williams* [1953] 1 QB 660. Accordingly, dishonesty cannot be regarded as a concept which would bring to the assessment of behaviour a clarity or certainty which would be lacking if the jury were left to say whether the behaviour under examination amounted to cheating or did not. The issue whether what was done amounts to cheating, given the nature and rules of the game concerned, is likewise itself a jury question. The judge in the present case applied himself to the question whether there was cheating in exactly this jury manner. He directed himself that it is ultimately for the court to decide whether conduct amounted to cheating and that the standard is objective. In so directing himself he was right.

49 There is no occasion to add to the value judgment whether conduct was cheating a similar, but perhaps not identical, value judgment whether it was dishonest. Some might say that all cheating is by definition dishonest. In that event, the addition of a legal element of dishonesty would add nothing. Others might say that some forms of cheating, such as deliberate interference with the game without deception, are wrong and cheating, but not dishonest. In that event, the addition of the legal element of dishonesty would subtract from the essentials of cheating, and legitimise the illegitimate. Either way, the addition would unnecessarily complicate the question whether what is proved amounts to cheating.

50 The judge’s conclusion, that Mr Ivey’s actions amounted to cheating, is unassailable. It is an essential element of Punto Banco that the game is one of pure chance, with cards delivered entirely at random and unknowable by the punters or the house. What Mr Ivey did was to stage a carefully planned and executed sting. The key factor was the arranging of the several packs of cards in the shoe, differentially sorted so that this particular punter did know whether the next card was a high value or low value one. If he had surreptitiously gained access to the shoe and re-arranged the cards physically himself, no one would begin to doubt that he was cheating. He accomplished exactly the same result through the unwitting but directed actions of the croupier, tricking her into thinking that what she did was irrelevant. As soon as the decision to change the cards was announced, thus restoring the game to the matter of chance which it is supposed to be, he first covered his tracks by asking for cards to be rotated at random, and then abandoned play. It may be that it would not be cheating if a player spotted that some cards had a detectably different back from others, and took advantage of that observation, but Mr Ivey did much more than observe; he took positive steps to fix the deck. That, in a game which

[2018] AC

Ivey v Genting Casinos (UK) Ltd (SC(E))  
Lord Hughes JSC

A depends on random delivery of unknown cards, is inevitably cheating. That it was clever and skilful, and must have involved remarkably sharp eyes, cannot alter that truth.

B 51 Although the judge did not think it necessary to make a finding on the topic, and it is unnecessary to the resolution of this appeal, it would also seem that the facts which he found amounted in any event to a deception of the croupier. Certainly, the judge found [2015] LLR 98, para 40, that pretending to be superstitious did not *by itself* cross the line from legitimate play to cheating, comparing it to the skilled poker player who pretends to be a fool. He also found, contrary to one of Crockfords' submissions, that what occurred did not amount to such deception as altogether to negate the existence of any contract for the game. But that was not a finding that there was no deception at all, and on the facts found there clearly was deception of the croupier into doing something which appeared innocuous or irrelevant, but was in fact highly significant and enabled Mr Ivey to win when he should not have done. If, therefore, there were indeed (and contrary to the conclusion reached above) a necessary legal element of dishonesty in cheating, such a deception would be *prima facie* dishonest, unless it is prevented from being so by necessity to satisfy the second leg of the test in *R v Ghosh* [1982] QB 1053.

### D Dishonesty

E 52 Dishonesty has been adopted since the Theft Act 1968 in the definition of some, but not all, acquisitive criminal offences. Forgery, for example, is defined without reference to dishonesty, but rather by the yardstick of the intention of the forger that his false document should be accepted as genuine and acted upon to the prejudice of someone else (Forgery and Counterfeiting Act 1981, section 1), whilst the Fraud Act 2006 retains dishonesty as an element of several forms of fraud: see sections 2, 3, 4 and 11.

F 53 As recorded at para 48 above, dishonesty is itself primarily a jury concept, characterised by recognition rather than by definition. Most of the Theft Act 1968 offences required dishonesty without any elaboration of its meaning: section 15 (dishonestly obtaining property by deception) was a prime example and the Fraud Act 2006, which replaces this and other Theft Act offences, adopts the same form. There are in section 2 of the Theft Act 1968 limited rules relating to when appropriation is *not* to be regarded as dishonest (claim of right, belief in consent of owner, belief that owner cannot be found) and a specific provision that it may be dishonest despite a willingness to pay for the goods, but these were designed to reflect existing rules of law, they apply only to appropriation, and they do not alter the underlying principle that dishonesty is not defined. This reflects the view of the Criminal Law Revision Committee that dishonesty was a matter to be left to a jury; it said in its Eighth Report, at para 39, that "Dishonesty" is something which laymen can easily recognise when they see it". That is not to suggest that there is not room for debate at the fringes whether particular conduct is dishonest or not, but the perils of advance definition would no doubt have been greater than those associated with leaving the matter to the jury. Over the succeeding half century, whilst there have undoubtedly (and inevitably) been examples of uncertainty or debate in identifying whether some conduct is dishonest or not, juries appear generally to have coped well

408

Ivey v Genting Casinos (UK) Ltd (SC(E))  
Lord Hughes JSC

[2018] AC

with applying an uncomplicated lay objective standard of honesty to activities as disparate as sophisticated banking practices (for example *R v Hayes* [2018] 1 Cr App R 10) and the removal of golf balls at night from the bottom of a lake on a private golf course: *R v Rostron* [2003] EWCA Crim 2206.

54 A significant refinement to the test for dishonesty was introduced by *R v Ghosh* [1982] QB 1053. Since then, in criminal cases, the judge has been required to direct the jury, if the point arises, to apply a two-stage test. Firstly, it must ask whether in its judgment the conduct complained of was dishonest by the lay objective standards of ordinary reasonable and honest people. If the answer is no, that disposes of the case in favour of the defendant. But if the answer is yes, it must ask, secondly, whether the defendant must have realised that ordinary honest people would so regard his behaviour, and he is to be convicted only if the answer to that second question is yes.

55 The occasion for this ruling owed nothing to the facts of *R v Ghosh*. The defendant locum surgeon had claimed payment for operations which either he had not performed, or which had been carried out under the National Health scheme so that no fees were due. The court summarily dismissed his appeal on the basis that no jury could have concluded, by any test, otherwise than that he was dishonest.

56 The occasion for the analysis of dishonesty in *R v Ghosh* was a tangle of what were perceived to be inconsistent decisions, some of which were said to apply a “subjective” test, and others of which were said to apply an “objective” one. Those terms are not always as plain to jurors as they have become to lawyers, but it is convenient to adopt them here when examining the reasoning in *R v Ghosh*. That case arrived, as has been seen, at a compromise rule which is partly objective and partly subjective.

57 Thirty years on, however, it can be seen that there are a number of serious problems about the second leg of the rule adopted in *R v Ghosh*.

(1) It has the unintended effect that the more warped the defendant’s standards of honesty are, the less likely it is that he will be convicted of dishonest behaviour.

(2) It was based on the premise that it was necessary in order to give proper effect to the principle that dishonesty, and especially criminal responsibility for it, must depend on the actual state of mind of the defendant, whereas the rule is not necessary to preserve this principle.

(3) It sets a test which jurors and others often find puzzling and difficult to apply.

(4) It has led to an unprincipled divergence between the test for dishonesty in criminal proceedings and the test of the same concept when it arises in the context of a civil action.

(5) It represented a significant departure from the pre-Theft Act 1968 law, when there is no indication that such a change had been intended.

(6) Moreover, it was not compelled by authority. Although the pre-*Ghosh* cases were in a state of some entanglement, the better view is that the preponderance of authority favoured the simpler rule that, once the defendant’s state of knowledge and belief has been established, whether that state of mind was dishonest or not is to be determined by the application of the standards of the ordinary honest person, represented in a criminal case by the collective judgment of jurors or justices.

A 58 The principal objection to the second leg of the *Ghosh* test is that the less the defendant's standards conform to what society in general expects, the less likely he is to be held criminally responsible for his behaviour. It is true that *R v Ghosh* attempted to reconcile what it regarded as the dichotomy between a "subjective" and an "objective" approach by a mixed test. The court addressed the present objection in this way, [1982] QB 1053, 1064:

B "There remains the objection that to adopt a subjective test is to abandon all standards but that of the accused himself, and to bring about a state of affairs in which 'Robin Hood would be no robber': *R v Greenstein* [1975] 1 WLR 1353. This objection misunderstands the nature of the subjective test. It is no defence for a man to say 'I knew that what I was doing is generally regarded as dishonest; but I do not regard it as dishonest myself. Therefore I am not guilty'. What he is however entitled to say is 'I did not know that anybody would regard what I was doing as dishonest'. He may not be believed; just as he may not be believed if he sets up 'a claim of right' under section 2(1) of the Theft Act 1968, or asserts that he believed in the truth of a misrepresentation under section 15 of the 1968 Act. But if he *is* believed, or raises a real doubt about the matter, the jury cannot be sure that he was dishonest."

And a little later the court added that upon the test which it was setting:

E "In most cases, where the actions are obviously dishonest by ordinary standards, there will be no doubt about it. It will be obvious that the defendant himself knew that he was acting dishonestly. It is dishonest for a defendant to act in a way which he knows ordinary people consider to be dishonest, even if he asserts or genuinely believes that he is morally justified in acting as he did. For example, Robin Hood or those ardent anti-vivisectionists who remove animals from vivisection laboratories are acting dishonestly, even though they may consider themselves to be morally justified in doing what they do, because they know that ordinary people would consider these actions to be dishonest."

F 59 Even if this were correct, it would still mean that the defendant who thinks that stealing from a bookmaker is not dishonest (as in *R v Gilks* [1972] 1 WLR 1341—see para 73 below) is entitled to be acquitted. It is no answer to say that he will be convicted if he realised that ordinary honest people would think that stealing from a bookmaker is dishonest, for by definition he does not realise this. Moreover, the court's proposition was not correct, because it is not in the least unusual for the accused not to share the standards which ordinary honest people set for society as a whole. The acquisitive offender may, it is true, be the cheerful character who frankly acknowledges that he is a crook, but very often he is not, but, rather, justifies his behaviour to himself. Just as convincing himself is frequently the stock in trade of the confidence trickster, so the capacity of all of us to persuade ourselves that what we do is excusable knows few bounds. It cannot by any means be assumed that the appropriators of animals from laboratories, to whom the court referred in *R v Ghosh* [1982] QB 1053, 1064 know that ordinary people would consider their actions to be dishonest; it is just as likely that they are so convinced, however perversely, of the justification for what they do that they persuade themselves that no one could call it

410

Ivey v Genting Casinos (UK) Ltd (SC(E))  
Lord Hughes JSC

[2018] AC

dishonest. There is no reason why the law should excuse those who make a mistake about what contemporary standards of honesty are, whether in the context of insurance claims, high finance, market manipulation or tax evasion. The law does not, in principle, excuse those whose standards are criminal by the benchmarks set by society, nor ought it to do so. On the contrary, it is an important, even crucial, function of the criminal law to determine what is criminal and what is not; its purpose is to set the standards of behaviour which are acceptable. As it was put in *Smith's Law of Theft*, 9th ed (2007), para 2.296:

“the second limb allows the accused to escape liability where he has made a mistake of fact as to the contemporary standards of honesty. But why should that be an excuse?”

60 It is plain that in *R v Ghosh* [1982] QB 1053 the court concluded that its compromise second leg test was necessary in order to preserve the principle that criminal responsibility for dishonesty must depend on the actual state of mind of the defendant. It asked the question whether “dishonestly”, where that word appears in the Theft Act, was intended to characterise a course of conduct or to describe a state of mind. The court gave the following example, at p 1063, which was clearly central to its reasoning:

“Take for example a man who comes from a country where public transport is free. On his first day here he travels on a bus. He gets off without paying. He never had any intention of paying. His mind is clearly honest; but his conduct, judged objectively by what he has done, is dishonest. It seems to us that in using the word ‘dishonestly’ in the Theft Act 1968, Parliament cannot have intended to catch dishonest conduct in that sense, that is to say conduct to which no moral obloquy could possibly attach.”

But the man in this example would inevitably escape conviction by the application of the (objective) first leg of the *Ghosh* test. That is because, in order to determine the honesty or otherwise of a person’s conduct, one must ask what he knew or believed about the facts affecting the area of activity in which he was engaging. In order to decide whether this visitor was dishonest by the standards of ordinary people, it would be necessary to establish his own actual state of knowledge of how public transport works. Because he genuinely believes that public transport is free, there is nothing objectively dishonest about his not paying on the bus. The same would be true of a child who did not know the rules, or of a person who had innocently misread the bus pass sent to him and did not realise that it did not operate until after 10.00 in the morning. The answer to the court’s question is that “dishonestly”, where it appears, is indeed intended to characterise what the defendant did, but in characterising it one must first ascertain his actual state of mind as to the facts in which he did it. It was not correct to postulate that the conventional objective test of dishonesty involves judging only the actions and not the state of knowledge or belief as to the facts in which they were performed. What is objectively judged is the standard of behaviour, given any known actual state of mind of the actor as to the facts.

61 Although there have been relatively few appeals based upon *R v Ghosh*, that is because judges have dutifully given the two-leg direction

[2018] AC

Ivey v Genting Casinos (UK) Ltd (SC(E))  
Lord Hughes JSC

A where there has been any occasion for it. But the existence of the second leg has frequently led to trials being conducted on the basis that even if the defendant's actions, in his actual state of knowledge or belief about the relevant facts, would be characterised by most people as dishonest, the defendant himself thought that what he was doing was not wrong, and it was for that reason honest. Juries are then required first to ask the so-called objective question, that is to say to apply their own standards of honesty, but then to depart from them in order to ask what the defendant himself thought. The idea that something which is dishonest by ordinary standards can become honest just because the defendant thinks it is may often not be an easy one for jurors to grasp.

62 Dishonesty is by no means confined to the criminal law. Civil actions may also frequently raise the question whether an action was honest or dishonest. The liability of an accessory to a breach of trust is, for example, not strict, as the liability of the trustee is, but (absent an exoneration clause) is fault-based. Negligence is not sufficient. Nothing less than dishonest assistance will suffice. Successive cases at the highest level have decided that the test of dishonesty is objective. After some hesitation in *Twinsectra Ltd v Yardley* [2002] 2 AC 164, the law is settled on the objective test set out by Lord Nicholls of Birkenhead in *Royal Brunei Airlines Sdn Bhd v Tan* [1995] 2 AC 378: see *Barlow Clowes International Ltd v Eurotrust International Ltd* [2006] 1 WLR 1476, *Abou-Rahmah v Abacha* [2007] Bus LR 220 and *Starglade Properties Ltd v Nash* [2011] Lloyd's Rep FC 102. The test now clearly established was explained thus in the *Barlow Clowes* case [2006] 1 WLR 1476, para 10 by Lord Hoffmann, who had been a party also to the *Twinsectra* case:

E “Although a dishonest state of mind is a subjective mental state, the standard by which the law determines whether it is dishonest is objective. If by ordinary standards a defendant's mental state would be characterised as dishonest, it is irrelevant that the defendant judges by different standards. The Court of Appeal held this to be a correct state of the law and their Lordships agree.”

F 63 Although the House of Lords and Privy Council were careful in these cases to confine their decisions to civil cases, there can be no logical or principled basis for the meaning of dishonesty (as distinct from the standards of proof by which it must be established) to differ according to whether it arises in a civil action or a criminal prosecution. Dishonesty is a simple, if occasionally imprecise, English word. It would be an affront to the law if its meaning differed according to the kind of proceedings in which it arose. It is easy enough to envisage cases where precisely the same behaviour, by the same person, falls to be examined in both kinds of proceeding. In *Starglade Properties Ltd v Nash* [2011] Lloyd's Rep FC 102 Leveson LJ drew attention to the difference of test as between civil cases and criminal cases, and rightly held that it demanded consideration when the opportunity arose. Such an opportunity is unlikely to occur in a criminal case whilst *R v Ghosh* [1982] QB 1053 remains binding on trial judges throughout the country. Although in *R v Cornelius* [2012] Lloyd's Rep FC 435 the opportunity might have arisen before the Court of Appeal, Criminal Division, it did not do so because there had been in that case no false representation of which the honesty needed to be examined; moreover, there is some doubt about the

412

Ivey v Genting Casinos (UK) Ltd (SC(E))  
Lord Hughes JSC

[2018] AC

freedom of that court to depart from *R v Ghosh* [1982] QB 1053 in the absence of a decision from this court. A

64 Prior to the Theft Act 1968, the expression “dishonestly” had not appeared in the legal definition of acquisitive offences. The mental element was usually marked by the expression “fraudulently”. There is no doubt that that latter expression involved an objective evaluation of the defendant’s conduct, given his actual state of knowledge and belief as to the facts. The Criminal Law Revision Committee, in its Eighth Report, advised the substitution of the word “dishonestly”, on the grounds that “fraudulently” had become technical and its meaning had departed somewhat from the ordinary understanding of lay people. It recommended that “dishonestly” would be more easily understood by lay fact-finders and the public generally. At para 39 the Committee advised that B

“‘Dishonestly’ seems to us a better word than ‘fraudulently’. The question ‘Was this dishonest?’ is easier for a jury to answer than the question ‘Was this fraudulent?’. ‘Dishonesty’ is something which laymen can easily recognise when they see it, whereas ‘fraud’ may seem to involve technicalities which have to be explained by a lawyer.” C

It was in accordance with this substitution that in *R v Feely* [1973] QB 530 a five-judge Court of Appeal, Criminal Division, held that the question whether a defendant had behaved dishonestly was to be left to the jury and should not, as had been the case with “fraudulently”, be the subject of judicial ruling. But there is no hint in the Committee’s report of any contemplation that whether a man was or was not dishonest should henceforth depend on his own view of his behaviour. On the contrary, the report clearly assumed that the prior objective approach would continue, save that the question would be a jury matter rather than one of law. D E

65 Prior to *R v Ghosh* [1982] QB 1053 the post-Theft Act authorities on the meaning of dishonesty were in something of a tangle. The court in that case seems to have thought, however, that there were more or less equal strands of authority supporting the “subjective” and the “objective” approach. It identified *R v Feely* [1973] QB 530 and *R v Greenstein* [1975] 1 WLR 1353 as tending to support an objective approach, and *R v Landy* [1981] 1 WLR 355, *R v Waterfall* [1970] 1 QB 148, *R v Royle* [1971] 1 WLR 1764 and *R v Gilks* [1972] 1 WLR 1341 as tending to favour a subjective one. It treated *R v McIvor* [1982] 1 WLR 409 as an unsustainable attempt to reconcile the two lines. This apparently binary dichotomy is not entirely borne out on analysis. F

66 Chronologically the first two cases, *R v Waterfall* [1970] 1 QB 148 and *R v Royle* [1971] 1 WLR 1764, decided in July 1969 and November 1971, did not concern the characterisation of behaviour as dishonest. Rather, they held that where a false representation is alleged, it must be shown that the defendant knew that it was false, or at least was reckless in making it without caring whether or not it was true. Until there is a false representation, deliberately or recklessly made, the jury does not get to whether it was dishonest or not. Plainly, the defendant’s actual state of mind as to the truth of the representation is a matter for subjective determination. If he genuinely believes that what he said was true, he is entitled to be acquitted, unless of course there is some other behaviour independent of the false representation which can be said to be dishonest. It does not at all G H

[2018] AC

Ivey v Genting Casinos (UK) Ltd (SC(E))  
Lord Hughes JSC

- A follow that, when once an absence of belief in the truth of his representation is established, dishonesty is likewise an entirely subjective matter, nor that it is so in cases which do not depend on allegations of false representation(s). This important distinction was subsequently identified in both *R v Landy* [1981] 1 WLR 355 and *R v Ghosh* [1982] QB 1053 itself, but the court in the latter case regarded it as unsatisfactory that the jury should have to apply successive tests, firstly of the defendant's actual knowledge or belief, and,
- B only if he deliberately made a false representation, secondly of the character of his conduct, given his actual state of mind. *R v Waterfall* [1970] 1 QB 148 and *R v Royle* [1971] 1 WLR 1764 were treated as examples of a subjective test of dishonesty, although they are not. There should in fact be no difficulty in the jury making this distinction, as cases such as *R v Greenstein* [1975] 1 WLR 1353 show. It has to be done in every case where there was a
- C false representation but there is a question whether there is any possible moral obloquy attaching to it. And it falls to be done, easily enough, in non-representation cases such as that of the bus travelling foreign visitor. A not dissimilar two-stage test is routinely applied by juries where self defence is in issue. The first stage is to ask what the facts were, as the defendant "subjectively" believed them to be. The second stage is, assuming such facts, to judge whether the response of the defendant was "objectively"
- D reasonable. See *R v Williams (Gladstone)* [1987] 3 All ER 411 and section 76 of the Criminal Justice and Immigration Act 2008.

- 67 In December 1972 a five-judge Court of Appeal decided *R v Feely* [1973] QB 530. Like some others, the case concerned a defendant employee who had helped himself to money from the till knowing that such a thing was forbidden, but contended by way of defence that he had intended to
- E repay it, and that his employers owed him money anyway. The decision of the court was that it is for the jury, not the judge, to say whether the conduct established was dishonest or not. The court said plainly that employees who take money from the till without permission are usually thieves, but that if the circumstances were such that no possible moral obloquy could attach to what was done, they might not be. It gave as an example the defendant who
- F took the money only because he had no change in his pocket to pay a taxi which had just delivered his wife to the shop, and who meant to and did replace it within minutes. Because the question whether that kind of analysis applied in that case had not been left open by the direction to the jury, the appeal against conviction was allowed. It is therefore inherent in that case that what the jury has to do is to apply its own (objective) standards to whether the conduct was dishonest.

- G 68 *R v Greenstein* [1975] 1 WLR 1353, decided in July 1975, concerned a large-scale operation of a method of the discouraged but not illegal practice of "staggering" new issue shares by applying for vastly more than the defendants could pay for, in the hope that a smaller affordable number would be allocated, but more than would have been allotted if the application had been confined to what they could afford. The charges, of
- H obtaining property by deception, depended on the representation made when a cheque is issued, that it is good for the money on due presentation. The defendants, who applied in multiple aliases, did not have the money to meet the cheques they signed for the full number of shares applied for, which were required by the issuers, but they hoped that the return cheques which could be expected to be sent after partial allocation would feed their

414

Ivey v Genting Casinos (UK) Ltd (SC(E))  
Lord Hughes JSC

[2018] AC

accounts in time to enable their original cheques to be met. The court upheld the judge's two-part direction. First, he told the jury that when it came to asking whether the defendants genuinely believed that their cheques would be met on due presentation (as many were and several were not) the answer should depend on their actual state of belief. Secondly, he told them that when the question was whether the defendants had acted honestly overall (that is if there was a false representation), they must apply their own standards. It was, the judge had said, no good applying the standards of anyone accused of dishonesty, for in that event everyone would automatically be acquitted. That case accordingly supports the principle that the test of dishonesty (but not of belief in a representation) is objective. *R v Feely* [1973] QB 530 was applied.

69 *R v Feely* was also applied in *Boggeln v Williams* [1978] 1 WLR 873, decided in January 1978. The defendant had been acquitted of dishonestly abstracting electricity by re-connecting his supply after the Board had cut him off for late payment. The acquittal was by the Crown Court on appeal and specific findings of fact were accordingly available. They were that he knew how to bypass the meter, but had not done so, that he gave notice to the Board of what he was doing, that he genuinely believed that he would be able to pay when the time came, that that belief was not shown to be unreasonable and that in the judgment of the Crown Court he had not acted dishonestly. The Divisional Court applied *R v Feely* [1973] QB 530 in holding that the decision upon honesty was for the fact-finding tribunal and that there was material entitling it to find as it did. That case did not address the nature of the test of dishonesty beyond saying that the defendant's view of his conduct was, on those findings, crucial. The reality is that the Crown Court did not think the conduct dishonest, given what the defendant did and intended. In *R v Ghosh* [1982] QB 1053, this case was rightly treated as inconclusive upon the perceived binary dichotomy.

70 *R v Landy* [1981] 1 WLR 355, decided in January 1981, was a case of complex fraudulent trading via a bank, which re-affirmed that dishonesty was a necessary element of conspiracy to defraud. It also, and more crucially, insisted on an indictment for conspiracy to defraud giving proper particulars of the conduct complained of, the absence of which had, in that case, led to a confused and diffuse summing up which did not properly identify the issues for the jury. The case was important for laying the early ground for modern case management of fraud trials. In the course of its judgment, given by Lawton LJ, the court said this, at p 365:

"There is always a danger that a jury may think that proof of an irregularity followed by loss is proof of dishonesty. The dishonesty to be proved must be in the minds and intentions of the defendants. It is to their states of mind that the jury must direct their attention. What the reasonable man or the jurors themselves would have believed or intended in the circumstances in which the defendants found themselves is not what the jury have to decide, but what a reasonable man or they themselves would have believed or intended in similar circumstances may help them to decide what in fact individual defendants believed or intended. An assertion by a defendant that throughout a transaction he acted honestly does not have to be accepted but has to be weighed like any other piece of evidence. If that was the defendant's state of mind, or may

[2018] AC

Ivey v Genting Casinos (UK) Ltd (SC(E))  
Lord Hughes JSC

A have been, he is entitled to be acquitted. But if the jury, applying their  
own notions of what is honest and what is not, conclude that he could not  
have believed that he was acting honestly, then the element of dishonesty  
will have been established. What a jury must not do is to say to  
themselves: 'If we had been in his place we would have known we were  
acting dishonestly so he must have known he was.' What they can say is:  
B 'We are sure he was acting dishonestly because we can see no reason why  
a man of his intelligence and experience would not have appreciated, as  
right-minded people would have done, that what he was doing was  
dishonest.' ”

71 This passage was treated in *R v Ghosh* [1982] QB 1053 as  
supportive of a subjective test of dishonesty. However, its context was an  
C alleged banking fraud consisting of dealing with money of lenders and  
depositors in ways which were likely to, and did, lead them to lose their  
money. The ways included reckless and unsecured speculation, preferential  
payments to connected companies, the preparation of false accounts, the  
lodging of false Bank of England returns, and the creation of false discount  
D bills when there was no underlying commercial transaction. The critical fact  
is that the defence was that the defendants did not know enough of what was  
going on to be responsible, and/or that they trusted others to manage the  
bank. Since that was the issue, it is plain that the actual state of mind of the  
defendants was indeed the critical question for the jury, and that the jury had  
to approach it in the way explained by Lawton LJ. The issue in the case was  
not principally whether a state of knowledge, if once established, meant that  
the defendant's conduct fell to be characterised as dishonest. Indeed, a  
E defendant who knew about the means allegedly adopted would be hard  
pressed to suggest that he thought them honest.

72 The position became more complicated in *R v Mclvor* [1982]  
1 WLR 409, decided in November 1981. This was, like *R v Feely* [1973] QB  
530, a case of unauthorised taking from the till by an employee. The  
defendant had asked to borrow money and, having been refused, helped  
F himself nevertheless. He asserted by way of defence that he had always  
intended to put the money back, as indeed he had done ten days later. The  
judge had told the jury that it must apply the standards of ordinary honest  
people to whether what the defendant had done was dishonest, and that  
what he himself thought about that issue was neither here nor there. The  
appeal came before a Court of Appeal presided over by Lawton LJ, who had  
delivered the judgments in both *R v Feely* and *R v Landy* [1981] 1 WLR 355.  
G The court held that the passage cited above in *R v Landy* applied only to the  
offence of conspiracy to defraud and not to the offence of theft (or, therefore,  
to the other Theft Act offences in which dishonesty was an essential  
element). For the latter, the “objective” lay standard of honesty was to be  
applied. In *R v Ghosh* [1982] QB 1053 the court treated this decision as  
suggesting a “subjective” test for conspiracy to defraud and an “objective”  
H one for other offences, and understandably held that such a distinction could  
not be sustained in logic or fairness. It is, however, at least possible, if not  
likely, that all that Lawton LJ was saying in *R v Mclvor* [1982] 1 WLR 409  
was that the passage in *R v Landy* [1981] 1 WLR 355 referred to the issue of  
the defendant's actual state of knowledge of what was happening, and to his  
actual belief in the truthfulness of any representation which he had made,

416

Ivey v Genting Casinos (UK) Ltd (SC(E))  
Lord Hughes JSC

[2018] AC

rather than to the issue of whether an established state of mind is or is not dishonest. With hindsight it can be seen that the court perceived clearly that if a wholly “subjective” test of when an established actual state of knowledge or belief is and is not dishonest were to be applied, the consequences would be that any defendant whose subjective standards were sufficiently warped would be entitled to be acquitted. It might be noted that in *R v McIvor* [1982] 1 WLR 409 the court held that the judge’s remarks about what the defendant himself thought being neither here nor there might have been taken by the jury as requiring them to disregard what he had said about his actual state of knowledge or belief. There had thus been a misdirection, but just as in *R v Ghosh* [1982] QB 1053 the court held that the only possible conclusion was that the defendant had been dishonest.

73 There was in fact only one pre-*Ghosh* case which frankly raised the relevance of the defendant’s own view as to the honesty of what he had done. *R v Gilks* [1972] 1 WLR 1341 had been decided as long ago as June 1972. The defendant had been handed, by mistake, as much as £100 too much by a bookmaker. He realised the mistake but kept the money anyway. Asked to account for doing so, he offered the view that whereas it would clearly be wrong to keep such an overpayment if made by the grocer, bookmakers were fair game. He was convicted notwithstanding the judge’s direction that the jury should put itself in his shoes and ask itself whether *he* had thought he was acting honestly or dishonestly. Amongst other grounds of appeal which the Court of Appeal rejected, he contended that the judge ought to have made it yet clearer that even if he did not believe he had any claim of right in law to keep the money, he would still not be guilty unless he did not have the belief he asserted that bookmakers were fair game. The Court of Appeal rejected that contention also, saying that the judge’s direction was a proper and sufficient one. Thus the case can be said to have endorsed the (subjective) direction as to dishonesty given by the judge. It did so, of course, only to the extent that it rejected the defendant’s argument that the judge’s direction was wrongly adverse to him. The question whether the direction was too favourable to him did not arise and was not addressed. *R v Gilks* preceded *R v Feely* [1973] QB 530, *R v Greenstein* [1975] 1 WLR 1353, *R v Landy* [1981] 1 WLR 355, *Boggeln v Williams* [1978] 1 WLR 873 and *R v McIvor* [1982] 1 WLR 409 but was not cited to any of those later courts, which therefore did not analyse what if anything it had decided. It might, however, be thought that the facts of *R v Gilks* [1972] 1 WLR 1341 are a powerful demonstration of the perils of the second leg of the *Ghosh* test, for it means that if the likes of Mr Gilks are once truthful about their idiosyncratic view of bookmakers, they are bound to be acquitted.

74 These several considerations provide convincing grounds for holding that the second leg of the test propounded in *R v Ghosh* [1982] QB 1053 does not correctly represent the law and that directions based upon it ought no longer to be given. The test of dishonesty is as set out by Lord Nicholls in *Royal Brunei Airlines Sdn Bhd v Tan* [1995] 2 AC 378 and by Lord Hoffmann in *Barlow Clowes International Ltd v Eurotrust International Ltd* [2006] 1 WLR 1476, para 10: see para 62 above. When dishonesty is in question the fact-finding tribunal must first ascertain (subjectively) the actual state of the individual’s knowledge or belief as to the facts. The reasonableness or otherwise of his belief is a matter of evidence (often in practice determinative) going to whether he held the belief, but it is not an

[2018] AC

Ivey v Genting Casinos (UK) Ltd (SC(E))  
Lord Hughes JSC

A additional requirement that his belief must be reasonable; the question is whether it is genuinely held. When once his actual state of mind as to knowledge or belief as to facts is established, the question whether his conduct was honest or dishonest is to be determined by the fact-finder by applying the (objective) standards of ordinary decent people. There is no requirement that the defendant must appreciate that what he has done is, by those standards, dishonest.

B 75 Therefore in the present case, if, contrary to the conclusions arrived at above, there were in cheating at gambling an additional legal element of dishonesty, it would be satisfied by the application of the test as set out above. The judge did not get to the question of dishonesty and did not need to do so. But it is a fallacy to suggest that his finding that Mr Ivey was truthful when he said that *he* did not regard what he did as cheating amounted to a finding that his behaviour was honest. It was not. It was a finding that he was, in that respect, truthful. Truthfulness is indeed one characteristic of honesty, and untruthfulness is often a powerful indicator of dishonesty, but a dishonest person may sometimes be truthful about his dishonest opinions, as indeed was the defendant in *R v Gilks* [1972] 1 WLR 1341. For the same reasons which show that Mr Ivey's conduct was, contrary to his own opinion, cheating, the better view would be, if the question arose, that his conduct was, contrary to his own opinion, also dishonest.

D 76 For these several reasons, this appeal must be dismissed.

*Appeal dismissed.*

THE HONOURABLE MR JUSTICE HILDYARD

**MR JUSTICE HILDYARD:**

***Introduction***

1. In these two actions, the Claimants in FL-2017-00001 (“the SL Claimants”) and the Claimants in FL-2016-000019 (“the MLB Claimants”) claim against the Defendant company (“Tesco”) under section 90A and Schedule 10A of the Financial Services and Markets Act 2000 (“section 90A”, “Schedule 10A” and “FSMA” respectively) to recover substantial losses in respect of their investment decisions in relation to shares in Tesco which they made in alleged reliance on information published by Tesco and falling within Schedule 10A.
2. The shares in Tesco to which the investment decisions for which the Claimants now seek compensation relate were all held in what has come to be known as “dematerialised form” through a computer-based system called CREST (which stands for “Certificateless Registry for Electronic Share Transfer”) using custodians (which in turn used sub-custodians) to acquire, hold or dispose of those shares (as the case may be).

3. The Uncertificated Securities Regulations 2001 [2001 No. 3755] (“the USR”), which have enabled and prescribed the basis for title to securities to be evidenced otherwise than by a certificate and transferred other than by written instrument through CREST as the “relevant system” make clear that the legal owner is the person whose name appears on the CREST register (who must be a member of CREST). It is not the CREST member’s client or anyone else in the chain of intermediaries.<sup>1</sup>
4. None of the Claimants held shares in Tesco as a registered member of CREST. In the case of every Claimant in these two sets of proceedings, the shares held through CREST were registered in the name of a bank or financial institution providing custodian services, as is almost invariable in the dematerialised market. None of the Claimants, therefore, ever directly acquired, held or disposed of a legal interest in any of the shares.
5. Further, and again as is entirely usual, most of the shares in Tesco held by custodians are held by them, not for a claimant, but for another intermediary in what is commonly referred to as a ‘custody chain’.
6. In a custody chain containing only one intermediary, that is, where the custodian is the trustee of the legal title for the relevant claimant and there are no further intermediaries between the custodian and the claimant, that claimant may have a direct beneficial or equitable interest. But, as (and with the consequences) I shall come on to explain at greater length, if the custody chain is longer, the claimant at the end of it is a beneficiary not of the trust of the legal title, but of a sub-trust.
7. Tesco has applied to strike out both claims on the basis that in such circumstances none of the claimants in a custody chain with more than one intermediary is a person to whom as an issuer it could be liable for any untrue or misleading statement in its published information under the relevant provisions of FSMA.
8. More particularly, Tesco’s position is that the consequence of this is that the interests of claimants in such a custody chain is not an ‘*interest in securities*’ within the meaning of paragraph 8(3) of Schedule 10A. Further, Tesco contends that, in any event, none of such claimants can properly be said to have ‘*acquired, continued to hold or disposed of*’ any interest in securities (even if, contrary to Tesco’s first submission, they had one).
9. The question as to the nature of the interests held in a dematerialised market thus raised is a systemic one of considerable importance. Most transactions in publicly held shares in companies listed in an exchange in the UK are in dematerialised form through CREST. The position of the Claimants is entirely typical of the dematerialised securities market. The market is very considerable indeed. The availability of remedies for untrue or misleading statements which have been the reason for investment decisions is obviously of great importance.
10. If Tesco is correct in its submissions as to the true construction of the relevant provisions there is a fundamental hole in FSMA: the provisions enabling investors to

---

<sup>1</sup> Which is why it has been said that the language of ‘*custodian*’, which belongs to the era of certificated securities, is ‘*inaccurate and can be confusing*’ because it tends to suggest that the custodian’s title to the shares derives from that of its client, whereas the true position is the opposite: see L Gullifer and J Payne, Intermediation and Beyond (2019) 7; M Yates, ‘Global Custody’ in M Blair QC et al (eds), Financial Markets and Exchanges Law (2nd edn), para 18.02.

vindicate their rights are unfit for purpose. The SL Claimants and the MLB Claimants submit that Tesco's submissions are misconceived.

***Facts***

11. For the purpose of this strike-out application, it is common ground that the Court must assume that (a) Tesco's published information was false (b) Tesco knew that the information was false (c) the SL Claimants and the MLB Claimants acted in reasonable reliance on that information and (d) they have suffered loss as a result. The evidence has gone to the workings of the market in dematerialised securities, and the manner in which the various Claimants held their investments in Tesco. It may be helpful to summarise key aspects of the CREST system.

***CREST in greater detail***

12. CREST went live in July 1996. Until then, most transfers of interests in registered securities in the UK were effected by transfers of paper certificates. This system came under increasing pressure as trading volumes rose and brokers and transfer agents were unable to keep pace with the administration required.
13. A system for title to shares and transfers of such title in a computer-based system (a 'central securities depository' or 'CSD') became essential. CREST is the only CSD in the UK approved by HM Treasury. CREST is operated by Euroclear UK & Ireland Ltd which is the "Operator" for the purposes of the UK. The shares of most listed companies in the UK are now held in dematerialised (sometimes referred to as 'uncertificated') form through CREST.
14. The operation of CREST is regulated by statute. Only securities registered in the UK, Republic of Ireland, Isle of Man, Jersey and Guernsey are eligible for registration on CREST. Since 1997 the Listing Rules have required listed securities to be eligible for electronic settlement, and thus in practice all UK-listed securities are capable of settlement via CREST. An issuer can elect to make its securities wholly dematerialised; and paper shares are due to be phased out by 2025 at the latest.
15. Under the CREST system, shares are registered in the name of the CREST member. There are "system-members" and "personal members". It is possible for an investor itself to become a CREST member, and some investors do so, but that is very expensive, and so it is more usual to use a "system-member". Thus, the principal members of CREST are custodian banks and other large financial institutions.
16. Every system-member must nominate a bank to be its settlement bank. It is, therefore, usual for the ownership structure to include a chain of intermediaries (as in this case), with the CREST member at one end of the chain (referred to as a custodian) holding for another intermediary (e.g. another custodian) and so on until the ultimate investor at the other end of the chain.
17. The chain of ownership is in another sense indirect because fungible securities such as the Tesco Shares are typically pooled at each stage/link of a custodianship chain. Each CREST member has an omnibus account with CREST in which all securities of a particular issuer (such as Tesco) are held. Those securities are allocated in the books and records of the CREST member (but not of CREST itself) to its clients.
18. Where the CREST member is a sub-custodian, the custodian it holds for will typically have only an omnibus account with the sub-custodian which is operated in the same

way. These omnibus accounts are segregated from the custodian's own assets and the client has the right to call for the delivery up of the legal title to the securities to it or its order. The legal analysis apparent from the case law is that where the intermediary holds the securities for its account holders in a common pool the individual investor is co-owner in equity with other investors.<sup>2</sup>

19. The key feature of intermediated securities held in a custody chain is that the ultimate investor (meaning the person for whose account the securities are ultimately held) is given the benefit of a right without holding the right itself.<sup>3</sup> It has a "right to a right". An investor in intermediated securities cannot enforce the rights attached to the shares (or other securities) against the issuer, although it is entitled to expect that those rights will be exercised in accordance with its wishes as expressed through the chain of interests.
20. Dematerialised securities are transferred by way of computerised book-entry transfers in the accounts of different CREST members. A useful summary of the working of the CREST system may be found in paragraphs 5 and 6 of the judgment of Lewison J (as he then was) in *Mills v SportsDirect* [2010] EWHC 1072 (Ch)<sup>4</sup>.
21. The custodian is not a party to, or involved in, the purchase contract. It is not an actor in the investment decision. The custodian will usually only find out about the purchase contract after it has been entered into. The custodian's role is typically limited to settlement of the trades.
22. Settlement is the performance of the trade. The buyer nominates a custodian to which it wishes its legal title to pass. The seller will usually pass legal title from its pre-existing custodian, although that is not inevitably the case. Settlement on CREST involves matching instructions being given and received by the seller's and buyer's respective custodians.
23. Where a seller and buyer have the same custodian, the custodian / sub-custodian may settle the trade by an internal book transfer, without any need to issue instructions to or inform CREST at all. This is called "internalised settlement" and legal title will (nominally at least) not change.
24. Clearing occurs after trading but prior to settlement: -
  - (1) A clearing house will aggregate the delivery and payment obligations of the participants in the clearing system, in order to establish each participant's net balance in relation to each type of obligation or asset (e.g. Tesco shares).
  - (2) Given the high degree of consolidation of trades amongst a few large custodian participants, netting dramatically reduces the number of book-entry transfers between different CREST participants each day.
  - (3) This is another reason why a securities trade may not correspond to a change in legal ownership. For example, if HSBC Plc had to clear a large number of trades

---

<sup>3</sup> See Ben McFarlane and Robert Stevens, 'Interests in Securities: Practical Problems and Conceptual Solutions' in chapter 2 of L Gullifer and J Payne 'Intermediated Securities: Legal Problems and Practical Issues (2010).

<sup>4</sup> See also M Yates and G Montagu, *The Law of Global Custody* (4th edn), paras 9.1-9.41.

in Tesco shares for different clients in a day, but the aggregate number of purchases and sales those clients had entered into was equal and opposite, there would be no need for the number of Tesco shares it held at CREST to change.

25. It follows that whether or not legal title to shares changes as the result of a share purchase or sale is largely a matter of mathematical fortuity.

*How the Claimants' shares were held in this case*

26. Turning to the particular case, the way in which the Tesco shares were held in the case of the SL Claimants exemplifies the “custody chains” whereby dematerialised securities are held. The 11<sup>th</sup> witness statement of Sean Norman Upson (made on 20 September 2019), who has responsibility for the conduct of these proceedings on behalf of the SL Claimants, he explains that in the SL Claim, the SL Claimants are all institutional investors but clarifies that there is a range of investment structures in the claimant group. Quoting from that witness statement:

“In some cases, the Tesco share purchases and retentions that are the subject of the claim were made by in-house investment management teams of large pension funds. In other cases, the purchases and retentions were made by an independent investment manager pursuant to an investment mandate from an institutional client, or by independent investment managers on behalf of collective investment vehicles marketed to individual and institutional investors in the US, Europe and Asia.”

27. Mr Upson continues:

“As is now common across international securities markets, the Tesco shares purchased and retained on behalf of most of the SL Claimants were not held directly by the institutional client or investment vehicle but held indirectly on their behalf by a nominee shareholder or an independent custodian. Where the SL Claimants engaged independent custodians, these custodians sometimes themselves held the shares for the SL Claimants' account indirectly by using local sub-custodians and/or nominees. The indirect holding structure via a custodian and sub-custodian gives rise to the so-called ‘custody chains’, which are a common feature of institutional investment in UK listed securities.

...

In most cases, the custodian was a third-party custodian bank, such as State Street Bank and Trust Company, JPMorgan Chase and BNY Mellon. In the case of Claimant 9, Rathbone, the shares were held by a nominee within the same corporate group, Rathbones Nominees Limited.”

28. In the MLB Claim, the position of the MLB Claimants is explained in a skeleton argument on their behalf as follows:

- (1) The First Claimant, Manning & Napier Fund, Inc (“Fund”), appointed The Bank of New York Mellon (“BNYM”) to act as custodian of the Shares pursuant to a custody agreement that is governed by Massachusetts law (“the Fund Custody Agreement”). BNYM in turn used The Bank of New York (Nominees) Limited (“BNY Nominees”) to hold the Shares as sub-custodian.

- (2) The Second Claimant, Exeter Trust Company (“ETC”), appointed State Street Bank and Trust Company (“State Street”) to act as custodian of the Shares pursuant to a custody agreement that is governed by New York law (“the ETC Custody Agreement”). State Street in turn used State Street Nominees Limited (“SS Nominees”) to hold the Shares as sub-custodian.
29. Further, by assignments dated 13 and 20 September 2019, BNY Nominees and SS Nominees as Sub-Custodians assigned their rights with respect to the Shares (including any claims they may have arising from the transactions pursuant to which they were acquired or disposed of) to the MLB Claimants (“the Assignments”). Notice of the Assignments was given to Tesco by letters dated 16 and 20 September 2019.
30. The question is whether in the above circumstances, the SL Claimants and the MLB Claimants are persons who have acquired, continued to hold or disposed of Tesco Shares so as to have standing to sue for compensation under section 90A and Schedule 10A of FSMA.

*Sections 90A and Schedule 10A FSMA*

31. Section 90A of FSMA (as in force since 2010) states that Schedule 10A makes provision about the liability of issuers of securities to pay compensation to:
- “persons who have suffered loss as a result of (a) a misleading statement or dishonest omission in certain published information relating to the securities.”*
32. Para 3(1) of Schedule 10A (introduced in 2010) provides for compensation to be paid:
- “to a person who acquires, continues to hold or disposes of securities in reliance on published information to which this Schedule applies”*
- and who has suffered loss as a result of any untrue or misleading statement in it (or omission of any matter required to be included in it).
33. Paragraph 8 contains rules of interpretation which apply to Schedule 10A. Of central importance to the present application is the definition given in paragraph 8(3):
- “References in this Schedule to the acquisition or disposal of securities include:*
- (a) acquisition or disposal of any interest in securities, or*
- (b) contracting to acquire or dispose of securities or of any interest in securities,*
- except where what is acquired or disposed of (or contracted to be acquired or disposed of) is a depositary receipt, derivative instrument or other financial instrument representing securities.”*
34. The provisions of s.90A and Schedule 10A quoted above have been in force since 2010. Prior to then, the first version of s.90A (enacted in 2006) was in force. For present

purposes it suffices to note that the earlier iteration of s.90A provided (in s.90A(9)(b)) that:

*“references to the acquisition by a person of securities include his contracting to acquire them or any interest in them.”*

*Tesco’s two arguments based on statutory construction*

35. Initially, Tesco sought to contend that absent proof of “special circumstances” only the legal owner would have a claim. Tesco quickly had to accept, however, that the effect of paragraph 8(3) in Schedule 10A is to extend the statutory cause of action to a person with an equitable proprietary interest as well as the legal owner of the securities.
36. There are two limbs of Tesco’s case as to the construction of paragraph 8(3) in Schedule 10A:
  - (1) The first limb of Tesco’s case is that none of the Claimants had an “*interest in securities*” within the meaning of that paragraph because none ever acquired an equitable interest in Tesco shares;
  - (2) The second limb is that, in any event, and even if any had a qualifying interest, none of the Claimants can be said to have “*acquired*” or “*disposed*” of an interest in securities, or “*contracted to acquire or dispose of securities or of any interest in securities*” pursuant to the transfer of legal ownership in the CREST register and the creation or extinction of such interest as they acquired or disposed thereby.
37. I shall elaborate on these limbs later by reference to the case law cited in respect of them; but it may assist to summarise now Tesco’s principal submissions:
  - (1) As to the first limb, Tesco submits that the investor at the end of the chain of intermediation, though it has an obvious economic interest in the Shares, has no proprietary interest in them because the legal rights it has can be asserted only against the person immediately preceding it in the ‘custody’ chain, and not against the holder of the legal title, still less against the Shares in specie. It submits that such an economic interest does not suffice.
  - (2) As to the second limb, Tesco submits that there can be a relevant “*acquisition*” or “*disposal*” of securities or an interest in securities (relevant in the sense of bringing the acquirer or disponent within the ambit of Schedule 10A) only if there is a dealing in that interest by the disponent; whereas the very most that the ultimate investor has (and even then, only if Tesco is wrong on its first limb) is a beneficial interest which upon a transfer may be created or extinguished but is not acquired or disposed of.
38. Tesco accepts that its construction would render Schedule 10A ineffective in relation to claims by intermediated securities; but it contends that these consequences flow from a failure of the law in this regard to keep pace with developments in the market, and a failure in the legislative drafting to address properly the legal ramifications of the chains of intermediation and of the change from dealings by certified transfer in certificated securities, with a single intermediary at most, and where the ultimate investor was in law the undoubted owner of the relevant securities. Mr David Mumford QC, leading Mr Michael Watkins and Mr Niranjan Venkatesan, submitted on behalf of Tesco that

there was a gap which could not and should not be bridged by what Lord Collins of Mapesbury JSC called in *Enviroco Ltd v Farstad Supply A/S* [2001] Bus LR 110, at para. 49:

*“an impermissible form of judicial legislation.”*

39. Lest at first blush it be thought that these arguments are over-technical, regrettably, the possible mismatch between the market practice of intermediation and the legal rules governing it is widely recognised.<sup>5</sup>
40. As far back as 2004 the Financial Markets Law Committee (“the FMLC”) recommended legislative intervention<sup>6</sup>. In 2014, the Law Commission observed that *‘the law may have been left behind by the speed of recent changes’*; and it has just in August 2019 issued a call for evidence pursuant to a direction by the Government to conduct a *‘scoping study of investor rights in a system of intermediated securities’*<sup>7</sup>, noting that there is *‘uncertainty as to the legal redress available to investors in certain situations.’*<sup>8</sup>
41. Academic commentators have expressed specific concern too: Professors Benjamin and Gullifer, for example, have recently noted that a claim under section 90 FSMA *“is likely to run into difficulties in practice”* because *“it only applies where the claimant has ‘acquired securities’”* and *‘it is not at all clear that this would include the situation where the claimant acquired intermediated securities.’*<sup>9</sup>
42. In short, the issues raised are serious ones of obvious systemic importance. The question whether ordinary principles of equity are sufficient to enable a comfortable co-existence between legislation originally devised for certificated securities and the special features inherent in the now preponderant market in intermediated securities is of continuing interest.

#### *Summary of Claimants’ arguments*

43. As in the case of the arguments raised by Tesco, I shall need to elaborate on the arguments on behalf of the Claimants that even if serious, the concerns as to the inadequacy of the drafting to cater for intermediated securities are misplaced, and certainly any difficulties are well within the jurisdiction of the court to cure, especially given the legislative purpose and the antecedents of the legislation in an extended process of consultation and in the need to comply with European legislation. In summary, however, these arguments are:

- (1) On behalf of the SL Claimants, Mr Neil Kitchener QC, leading Mr Richard Mott and Mr Simon Gilson, submits that Tesco’s suggestion that the ultimate investor

---

has only economic or contractual rights is wrong. The ultimate investor has the right to call for legal title in the securities to be vested in him or to his order. The securities are not available to any nominee in the custody chain to use in any way other than at the direction of the ultimate investor. The position as to property in the Shares is illustrated by what would occur on an insolvency. Critically, the securities are not available for distribution to the creditors of any nominee in the custody chain; they are protected in the event of insolvency and will be delivered up to the ultimate investor. Whether or not it is correct that the ultimate investor cannot enforce his proprietary rights directly against each participant in the chain (which will depend upon the precise terms of the trust) is not to the point. It does not mean that the interest is not properly characterised as proprietary. In any event, the words in Schedule 10A are apt to include the interest of the ultimate investor; to quote from the SL Claimants' skeleton argument:

“Parliament would **not** have used the words “*any interest in*” had it intended to exclude sub-nomineeship. No reason has been identified for excluding investors who hold shares through sub-nominees (who will necessarily include most non-UK based equity investors and virtually all investors in corporate bonds).” [Emphasis as in the skeleton argument]

- (2) As to the second limb of Tesco's case, the SL Claimants submit that the word “*acquire*” is capable of the broadest interpretation, such as to extend in its natural meaning to include any situation where an investor has acquired a security, whatever the length of the custody chain in which, having directed that legal title be transferred to his nominee, he has directed or agreed the shares in which he invested are held; and that the word “*dispose*”, must be seen in the context of the words “*acquires, continues to hold or disposes*”, so that its natural meaning in context includes any dealing by which the investor no longer “*continues to hold*” what he had previously acquired.
- (3) On behalf of the MLB Claimants, Mr Peter de Verneuil Smith QC, leading Mr Philip Hinks and Mr Dominic Kennelly, adopted these submissions but adapted them to clarify that he accepted that a claimant under Schedule 10A did have to have acquired or disposed of a proprietary interest in the securities, but that the natural meaning of “*any interest in securities*” is wide enough to include what he described as “any interest of a proprietary nature”, including an “indirect” proprietary interest, being an entitlement in the investor, exercisable through a chain of specifically enforceable contracts, to require the securities to be conveyed to it or otherwise held to its order.
- (4) It was also submitted on behalf of the MLB Claimants that it was sufficient that they would be treated under the laws applicable to the ‘custody’ arrangements in its case as having a direct proprietary interest, and that the expert evidence to the effect that they did have such interests under such laws had not been challenged or contradicted.

- (5) Mr de Verneuill Smith described Tesco's second limb as "unsustainable" on the basis that (a) it is incontrovertible that whereas before a given claimant's investment it had no interest in the Shares in which it invested, after that, it had (at least) an interest of some kind in respect of such shares that it had not had previously; and that (b) it is equally incontrovertible that when the custodian sells the securities, full ownership (i.e. including both legal and beneficial title) passes to the purchaser, and the investor can no longer be said to be interested in the securities: using the natural meaning of the word "disposed" (namely, to cease to hold or to remove), the investor must have "*disposed of*" its beneficial interest in the securities.

44. I turn to address these competing submissions, which were considerably elaborated, in greater detail.

*Elaboration of Tesco's submissions: first limb*

45. As indicated above in summarising the first limb of Tesco's case, its foundation is that the words "*interest in securities*" are a reference to a proprietary, as distinct from a purely contractual or economic, interest in the securities themselves. Mr Mumford elaborated on this as follows:

- (1) First, he relied on the natural construction of the words. He acknowledged that there is no authority directly in point, but suggested that an analogy may be drawn from authorities as to the expression "interest in land". He submitted that in that context, the courts have consistently held that such a reference is to a legal or equitable interest in land, not to contractual or personal rights or economic interests.<sup>10</sup> He drew my attention to *Stevens v Bromley LBC* [1972] 1 Ch 400, 410A, where Salmon LJ observed that this expression:

"does not include an interest in the loose or colloquial sense of someone being interested in the land."

- (2) Second, he submitted that the natural construction of the words is fortified by the particular context in which they appear, that is in Schedule 10A, which is essentially concerned with the sale or purchase of property, not the sale or purchase of economic interests.
- (3) Third, he cited the academic uncertainty expressed by, amongst others, Professors Benjamin and Gullifer (see references above) as to the nature of the interest which is acquired by an investor in intermediated securities.
- (4) Fourth, he drew attention to the provision in paragraph 1(1) of Schedule 10A, which states that the Schedule applies only to securities that are admitted to trading in a relevant market '*with the consent of the issuer*'. Paragraph 8(2) reinforces this by clarifying that where the security is, for example, a depositary receipt, '*the issuer*' is to be understood as the issuer of the underlying securities only if it consented to the admission to trading of the depositary receipt itself. This, he submitted, is also the purpose of what he referred to as 'the tailpiece' to paragraph 8(3), which makes it clear that the holder of a depositary receipt (or other secondary security) cannot sue the issuer of the primary security

---

<sup>10</sup> See, eg, *Flynn v Secretary of State for Communities* [2014] EWHC 390 (Admin), paras 32-35 (Lewis J).

without establishing that it consented to the trading of the depositary receipt itself. He submitted that this provision established what he termed “the consent principle”; and that “to extend the words ‘*interest in securities*’ to non-proprietary interests would represent a substantial infringement of the consent principle that underlies Schedule 10A” by enabling it to apply to transactions involving contracts that the issuer knows nothing about and which may not be directly related to the issuer’s shares. He submitted that by contrast, if, as Tesco contends, the expression is limited to a legal or equitable interest in the issuer’s shares, the infringement of the consent principle is modest because only someone with a direct, proprietary interest in the securities to the trading of which the issuer has consented would be able to sue under Schedule 10A.

- (5) Fifth, Mr Mumford cautioned that the Claimants’ approach would introduce uncertainty as to the scope of the sections such as would also increase the risk of multiple claims in respect of the same share transactions. He gave the example of a person interested in shares in a company which in turn held securities in Tesco where the value of the former shares could be affected by movements in Tesco’s share price, and posed the question whether such a person would have standing to sue under Schedule 10A, and if so, how (for instance) that claim would be dealt with if the other company also sued.
- (6) He also pointed out that section 90 FSMA (which provides for the payment of compensation for untrue or misleading statements in, or omissions of required particulars in, listing particulars) also extends to any person who has acquired or contracted to acquire the shares the subject of the particulars “*or any interest on them*”, but does not require proof of reliance. That, Mr Mumford suggested, throws wide open the pool of claimants if the italicised expression in the context of sections 90 and 90A is given a broad construction. He added that one of the defences to a section 90 claim is that the person responsible published a correction of the misstated prospectus “*in a manner calculated to bring it to the attention of persons likely to acquire the securities*” (Schedule 10, para 3(2)(a)), and that if the words ‘*acquire the securities*’ extend to non-proprietary interests, or to interests acquired without a dealing in them, then the range of persons ‘*likely to acquire*’ them is likely to be so wide as to neuter this defence or at any rate make it less effective. He submitted that neither difficulty would arise on Tesco’s construction because the legal owner would have a claim in respect of an acquisition of the legal interest and the beneficial owner in respect of an independent acquisition of the equitable interest.

46. Most of all, however, he emphasised that it is clear from the words ‘*in the securities*’ that the proprietary interest he submitted was necessary must be in the securities themselves, and not in some other property. He gave, as a simple example from the facts of this case, the following: suppose that X, a sub-custodian, is the registered holder and therefore the legal owner of the Tesco shares, and holds those shares on trust for Y, a custodian, and that Y in turn holds its beneficial interest on trust for Z, the ultimate investor. In such a case, Y has an equitable interest ‘*in the securities*’ but Z does not. In support of the proposition that, in line with this example, the ultimate investor at the end of the chain of intermediaries has no equitable or other proprietary interest in the shares held by the ‘custodian’ in the first link of the chain, Mr Mumford relied especially on the decision of Briggs J (as he then was) in *re Lehman Brothers*

*International (Europe)* [2010] EWHC 2914 (Ch) (often, and below, referred to as ‘the *Lehman Rascals* case’) and *re Lehman Brothers International (Europe)* [2011] EWCA Civ 1544.

47. In the *Lehman Rascals* case, Briggs J observed at para 226 that (emphasis added):

“...a trust may exist not merely between legal owner and ultimate beneficial owner, but at each stage of a chain between them, so that, for example, A may hold on trust for X, X on trust for Y and Y on trust for B. The only true trust of the property itself (i.e. of the legal rights) is that of A for X. At each lower stage in the chain, the intermediate trustee holds on trust only his interest in the property held on trust for him. That is how the holding of intermediated securities works under English law, wherever a proprietary interest is to be conferred on the ultimate investor.” [Mr Mumford’s emphasis]

48. As to the last phrase, Mr Mumford acknowledged that Briggs J recognised that ‘*a proprietary interest*’ is conferred on the ultimate investor (B, in Briggs J’s example); but he submitted that this is to miss the point, which is that though the ultimate investor does of course have a proprietary interest, it is not a proprietary interest ‘*in the securities*’: it is a proprietary interest in the trust property which its own trustee (Y, in Briggs J’s example) holds on trust for it. That, he submitted, is why Briggs J emphasised that the only true trust of ‘*the property itself*’ is that of the legal owner for its immediate client; and while that immediate client may well hold its own interest on a sub-trust for the ultimate investor, the sub-trust is not of the Tesco shares themselves.
49. Mr Mumford referred to what he described as the basic principle that an equitable interest is a proprietary interest ‘*in the trust property*’: *Westdeutsche Landesbank Girozentrale v Islington London Borough Council* [1996] AC 669, 705F (Lord Browne-Wilkinson), and relied on that as meaning that there can be a proprietary interest ‘*in the securities*’ only if the trust property consists of the Tesco shares themselves, rather than an interest in Tesco shares.
50. The lesson, he submitted, is that it is crucial to identify what as a legal matter is the trust property. In a case where the legal owner acted as custodian for the claimant directly, the legal owner/custodian is the trustee of the shares of which it is legal owner and (assuming the application of English principles of law and equity) the claimant would have the equitable proprietary interest in such shares. But where there is a chain of intermediaries, so that there is at least one intermediary between the legal owner and the claimant, the trust property held by each intermediary after the custodian is not in the shares but in the trust of the trust. Mr Mumford submitted that once the trust property held at each stage of the chain is properly appreciated, it is clear that any claimant in a custody chain involving more than one intermediary had neither a legal nor an equitable interest in the Shares, only a right to performance of the trust. Mr Mumford also cited Sir Roy Goode QC’s statement that in a custody chain “[t]he subject matter of the sub-

*trust is the beneficial interest that the intermediary has, rather than the underlying securities themselves.*<sup>11</sup>

51. More particularly as regards the facts in the two proceedings, he emphasised that not only is none of the Claimants in either claim the legal owner of relevant shares; but also that:

(1) In the SL Claim, the details so far provided do not enable a comprehensive statement of the nominee arrangements or custody chains in which each Claimant's shares were held. In the case of the 'Rathbone Claimants', Rathbones Nominee Limited ("RNL"), the legal owner, acted directly as custodian or nominee for Claimant 9 in the SL Claim, Rathbone Investment Management Limited ("RIML"). But it appears that many, if not most, other SL Claimants held their interests in Shares through custody chains involving one or more intermediary. A typical example is the claim by Claimant 29, BBH Trust, where the Tesco shares in respect of which BBH Trust sues were registered in the name of BBHISL Nominees Ltd, which was a nominee of HSBC plc, which acted as sub-custodian to BBH & Co, which acted as custodian to the Claimant, BBH Trust.

(2) In the MLB Claim (in which a useful structure chart was appended, which I also append to this judgment marked 'A') the evidence provided on behalf of the MLB Claimants confirmed that all the Tesco Shares in respect of which the MLB Claimants purport to sue were registered in the name of third-party custodians, with at least one sub-custodian in a custody chain where the last link is the Claimant (investor).

52. Accordingly, Mr Mumford submitted that, except in the case of SL Claimants in a like position as RIML, none of the Claimants in either claim could have had any legal or equitable interest in the Tesco Shares.

53. As to the argument raised by the MLB Claimants that some of its 'custodian' arrangements were governed by (in some cases) New York law and (in other cases) Massachusetts law and that under such laws the MLB Claimants would be treated as having a "property interest" in the Shares, Mr Mumford submitted that English law governs the issue of standing and that the question whether the package of rights which each person in a custody chain has is to be categorised as proprietary or not is to be determined by English law. Mr de Verneuil Smith appeared to accept this, since he agreed that I should not be troubled at this stage of the proceedings with any issue as to the application of foreign law for the purpose of this application and making my determination as to what interest would suffice for the purposes of a claim.

*Claimants' arguments to rebut first limb of Tesco's case*

54. On behalf of the SL Claimants, Mr Kitchenier sought to dismiss as misconceived Tesco's analysis to the effect that the statutory remedy is not available where the shares

---

<sup>11</sup> R Goode and L Gullifer, Legal Problems of Credit and Security (6th edn), para 6-18. See also M Bridge et al, The Law of Personal Property (2nd edn), para 6-051 ('*Apart from the first-tier intermediary, who can be said to have an equitable interest in "the securities", all other holds in the chain have an equitable interest in the equitable interest held by the intermediary directly above them*'); and Yates (above), para 18.09 ('*The use of a custodian of itself changes the nature of the asset held by a custody client... Instead of holding legal title to the securities, the custody client holds various rights against the custodian*').

are held through a structure including at least one sub-nominee. He submitted that this would flout the intention of the statute without any good reason; and that the words “any interest” are words of broad import, not requiring the interest to be proprietary and easily capable of extending to the interests of the ultimate investor.

55. As indicated above, Mr Kitchener submitted in that regard that Schedule 90A “extends beyond proprietary interests”; but that even if it did not, Tesco is wrong to suggest that the ultimate investor in intermediated securities has only economic or contractual rights. Rather, their interests have the hallmarks of, and are, proprietary interests.
56. The true legal analysis, according to Mr Kitchener (supported by Mr de Verneuil Smith for the MLB Claimants) is that:
- (1) An investor has a beneficial interest in securities held for it by its custodian, and the right to enjoy and direct all the rights in the bundle of rights which a share represents.
  - (2) where there is more than one link in the custody chain, the investor’s interest in the securities remains a beneficial proprietary interest: the investor is entitled to the same enjoyment and direction of the bundle of rights as it previously had, and that is so even if an intermediary up the chain goes into an insolvency process since the rights are in no sense the property of that intermediary: no-one but the investor can be said in any meaningful sense to own and enjoy those rights.
57. This, Mr Kitchener submitted, entirely accords with the analysis of the Law Commission in the “*Intermediated Securities: Call for evidence*” paper relied upon by Tesco:
- (a) in para. 1.31 the Law Commission describes the ultimate investor in a chain including sub-nominees as “*own[ing] a beneficial interest in the securities*”;
  - (b) in para. 2.45, the Law Commission refers to, “*the ultimate investor having a beneficial interest in the securities*”;
  - (c) in para. 2.46 the Law Commission refers to the “*ultimate investor*” and the “*beneficial owner*”.

This also reflects the words used by Briggs J in *Re Lehman Bros*<sup>12</sup> at para 163, where he refers to the ultimate investor as the “*ultimate beneficial owner*”.

58. Mr Kitchener further submitted that Parliament would not have used the words “*any interest in*” (a change from the word “an” in previous legislation) had it intended to exclude sub-nomineeship: and that Tesco had identified no reason for excluding investors who hold shares through sub-nominees (and thus most non-UK based equity investors and virtually all investors in corporate bonds).
59. Mr de Verneuil Smith, effectively on behalf of all the Claimants (since there was sensible co-operation between the Claimants in the presentation of different aspects of submissions to which both subscribed, which I much welcomed), added to these

---

<sup>12</sup> [2012] EWHC 2997 (Ch.)

submissions the contention that the provisions in question are part of a legislative scheme intended to transpose into or at least reflect in domestic law the (European) Transparency Directive [Directive 2004/109/EC of 15 December 2004] and must be interpreted in conformity with its objectives. Mr de Verneuil Smith drew my attention to parts of the Explanatory Notes to the Companies Act 2006, and especially to note 1636, which states that the insertion of

“sections 90A and 90B into FSMA...establishes a regime for civil liability to third parties by issuers admitted to trading on a regulated market in respect of disclosures made public in response to provisions implementing obligations imposed by the Transparency Directive.”

60. He reminded me that ‘Hansard’ is admissible (as Mr Mumford and Mr Kitchener agreed it was) for the purposes of establishing the context in which a statutory provision has been introduced; and it is clear from the debate in Parliament when section 90A was enacted in its original form that (a) the Transparency Directive required Member States to ensure that an appropriate liability regime was in place in respect of disclosures required by the Directive, with a view to encouraging accurate and timely disclosure by issuers and promoting investor protection;<sup>13</sup> and (b) HM Government concluded that the uncertainty about the scope of issuer liability at common law was such that a statutory regime was required to ensure that the UK had fulfilled its obligation to implement the Transparency Directive.<sup>14</sup>
61. Mr de Verneuil Smith also put weight on the fact that the amendment of s.90A in 2010 followed a comprehensive review (by Professor Davies and HM Treasury) of the statutory issuer liability regime, and a process of consultation which included submissions from market practitioners, city law firms and, for example, the FMLC. That process and the objectives and concerns expressed may illuminate further the purpose and intention of the legislation.
62. With this as the background, Mr de Verneuil Smith submitted that the ‘*Marleasing* principle’ (see the ECJ case of *Marleasing SA v La Comercial Internacional de Alimentacion SA* [61989CJ0106 (1990)]) required this court,

“with a view to making such safeguards equivalent throughout the Community...to interpret its national law in the light of the purpose and the wording of that directive...”

63. To that end, Mr de Verneuil Smith submitted, I should, if necessary, (a) not be constrained by conventional rules of construction and (b) adopt as broad an interpretation as the words could allow, even if that involved departure from the strict and literal application of words or expressions in the provision which the legislature has elected to use, and (c) imply any words necessary to comply with Community law: see a summary of the application of the *Marleasing* principle in the judgment of Sir Andrew

---

<sup>13</sup> Transparency Directive, recital (17) and Article 7.

<sup>14</sup> Hansard 6 July 2006.

Morrith C in *Vodafone 2 v Revenue and Customs Commissioners* [2010] Ch 77 at [37] (citing also *Pickstone v Freemans plc* [1989] AC 66).

64. Accordingly, Mr de Verneuil Smith submitted that any doubt as to the ambit of the meaning of the expression “*any interest in securities*” should be resolved in favour of a construction giving effect to the intention of the Directive and the domestic legislation enacted to implement it which would ensure that those entitled to vindicate their right to compensation in respect of untrue or misleading statements in published information should include persons having the entire economic interest in shares acquired or disposed of on the faith of the statement, albeit that such shares might (at their direction) be held by custodians and sub-custodians in accordance with developing market norms.
65. As to whether such a facilitative or teleological approach was indeed necessary, Mr de Verneuil Smith emphasised that his primary case was that even adopting a stricter approach the expression was still broad enough to cover the derivative interests of his clients in respect of the Shares. He submitted that the expression “*interest in shares*” is not a term of art; but the prefix “*any*” makes clear the intention of the legislature that it should be of broad embrace; and even if (as he, though not Mr Kitchener, was content that it should be) it was limited to an interest which is proprietary in nature, still it was satisfied in the case of his clients. He submitted orally that the “pretty classic conventional understanding of what a proprietary interest is... is that it is an ability to call for and possess and enjoy the thing.” In answer to my questioning, he acknowledged that the investor at the end of the custody chain would not have the right to give instructions in respect of the thing to its legal owner; he had no such “direct right”; but by instructions, as it were, up the line it could indirectly convey such instructions and that would suffice as “*any interest in securities*”. He drew that distinction between a right and an interest: and the latter would, he submitted, suffice.
66. He bolstered this submission by reliance, in effect by analogy, with cases referred to in *Spry ‘The Principles of Equitable Remedies’* 9<sup>th</sup> ed. at page 89 on the position of a sub-purchaser with a specifically enforceable interest in the purchase, and especially *Shaw v Foster* (1872) LR 5 HL 321 at 338-339; and also with a New Zealand case, *McDonald v Isaac Construction Co Ltd* [1995] 3 NZLR 612, where at a preliminary hearing to determine whether to maintain a caveat until a full hearing Tipping J, after a review of authority, determined at page 619 that:
- “there is no reason in principle why a sub-purchaser, whether by sub-sale or assignment, should not be regarded as acquiring an equitable interest in the land.”
67. Mr de Verneuil Smith also tackled the *Rascals* case, submitting that it had been “mischaracterised and misunderstood”. I fear I may not thereby do full justice to his quite expansive reasons for so stating; but I think that the burden of them was that all Briggs J was explaining (at the relevant part of his judgment for these purposes, being [226]) was that the only “true trust of the property itself (i.e. of the legal rights) is that of the legal holder for the immediate custodian”, which is, of course, obviously correct, but does not signify that therefore the investor has no qualifying “interest” in the securities under the series of sub-trusts which the rest of the custody chain represents. Although Mr Mumford in reply described this as merely a “convenient shorthand”, Mr

de Verneuil Smith highlighted also that Briggs J (in the same paragraph) went on to explain that:

“That is how the holding of intermediated securities works under English law, wherever a proprietary interest is to be conferred on the ultimate investor.”

[Emphasis supplied]

- 68 Mr de Verneuil Smith relied also on the decision of the Court of Appeal in the *Rascals* case (neutral citation: [2011] EWCA Civ 1544) as indicating (at [49]) that

“when one speaks of acquiring or disposing of securities in the context, one means dealing with rights as against a depositary (directly or indirectly) who holds the relevant securities of the same type, it makes no difference to the legal analysis.”

69. On that basis, Mr de Verneuil Smith, with a slightly different perspective in this regard to that of Mr Kitchener, was content to restrict the scope of “*any interest in securities*” to any form of proprietary interest, provided that what he termed an “indirect” proprietary interest was included within that concept. As to the notion of an “indirect” proprietary interest, he explained that what he meant was “*the right to put another person in their shoes as the holder of their exclusive rights as owner*” of the securities<sup>15</sup>. Even if that right could only be exercised via instructions repeated along the chain, or by “collapsing” the sub-trusts pursuant to the principle in *Saunders v Vautier* (1841) Cr. & Ph. 240, he submitted that it should be treated as proprietary, citing the major trust text books (including *Lewin on Trusts* 19<sup>th</sup> ed. at 1-046, Underhill and Hayton, *Law of Trusts and Trustees* 19<sup>th</sup> ed (2006) at 2-10) and Spry, *Equitable Remedies*. 9<sup>th</sup> ed. (2014) at pp.89 to 90).
70. Mr de Verneuil Smith submitted that further support for this approach could also be obtained from a consideration of the definition of the expression “*interest in a security*” in the Uncertificated Securities Regulations 2001 (SI 2001/3755) (“the USR”), the enactment of which predated the coming into force of s.90A and Schedule 10A. The USR share a very similar context with s.90A: they have as their purpose the evidencing of title to uncertificated securities, and they make provision for transactions pursuant to which such securities are acquired and disposed of. By Article 3(1) of the USR, “*interest in a security*” is defined to mean:

“any legal or equitable interest or right in relation to a security,  
including –

- (a) an absolute or contingent right to acquire a security created,  
allotted or issued or to be created, allotted or issued; and

---

<sup>15</sup> Underhill and Hayton at 2.15.

- (b) the interests or rights of a person for whom a security is held on trust or by a custodian or depositary.”

71. Mr de Verneuil Smith submitted that where the same expression is used in two similar contexts, a statutory definition in one context may be persuasive in the other: *‘Craies On Legislation’*, 11<sup>th</sup> ed. (2017) at 20.1.38; and *M v Advocate General for Scotland* [2013] CSOH 169; and that accordingly it may properly be inferred that the legislature had this definition in mind when the expression “*any interest in securities*” was used with respect to section 90A. If the USR definition were applied by the Court here, it would enable investors with proprietary rights in securities such as the MLB Claimants to bring claims for compensation under s.90A. Such persons would satisfy the statutory requirements by virtue of their falling within the opening words of the definition, or within sub-para (b). Given the breadth of the definition (particularly the words “*in relation to*” a security), it would be unrealistic to suppose that Parliament intended it to be confined to intermediated holding structures consisting of a single custodian.
72. However, and although Mr de Verneuil Smith thus focused on the sufficiency of any form of proprietary interest, and was plainly reticent in suggesting any wider meaning, primarily (as it seemed to me) for fear of increasing the risk of so broadening the scope as to increase the risk of multiple and possibly conflicting claimants, he did in the alternative submit that even if the language was strictly inapt, its intention to give a remedy to acquirers or disponents of interests held through sub-trust in the intermediated securities market was clear and if necessary a sufficiently expansive meaning should be supplied to give the words meaning to achieve that objective accordingly.

*My conclusions as to the first limb*

73. It is unsettling that the expression providing the touchstone of standing to make a claim for compensation in respect of untrue or misleading statements or omissions in listing particulars or a prospectus should be open to such legitimate disputation and doubt in its application to market norms. The intermediated securities market is of great practical importance and huge significance to the financial strength of UK plc: uncertainty is the enemy of stability and reliability in financial markets. It may be regretted that legislation intended to modernise should adopt expressions derived from a now almost defunct way of doing business. It is quite plain that intermediated securities held through CREST, as most are and all shortly will be in the UK market, are not the same as securities held directly in certificated form, even though economically they are the same. It is in some way surprising that this was not expressly recognised and provided for in FSMA. It appears that the FMLC recognised the potential issue and recommended a clarifying provision<sup>16</sup>; but this recommendation was not adopted.<sup>17</sup>

---

<sup>16</sup> “[I]t would be helpful to embody a specific rule in the statute that unless otherwise agreed an investor enjoys a bundle of co-proprietary and personal rights in and to securities held by his intermediary, including income and other benefits associated with the securities” [July 2004]

<sup>17</sup> It may also be noted that some academic comment has been in favour of the flexibility provided by sticking with equitable principles to resolve the matter rather than resorting to an inflexible statutory definition: see, for example, Ben McFarlane and Robert Stevens, *‘Interests in Securities: Practical Problems and Conceptual Solutions’* [2010], where they concluded that “...the practical needs recognised by the FMLC can be met without the need for any...statutory rule...paradoxically, perhaps, and in England at least, it is general legal concepts that can best solve the practical problems posed by intermediated securities.”

74. The problem is compounded by what I regard as mixed messages from previous legislation. I have found it as much ground for concern as ground for comfort that in the USR 2001 a very similar expression (“*interest in a security*”) to that in issue in respect of sections 90 and 90A and Schedule 10A of FSMA is carefully defined. Whereas the Claimants fastened on this as a guide to the intended meaning of the expression used in FSMA, Tesco quite logically relied on the conspicuous absence in FSMA of a definition already crafted in the USR as a signal that the extended meaning was not intended to be adopted in FSMA, and that there was not intended to be parity of meaning between them. Although the genius of the common law is in working and fashioning answers to the interstices in legislation, the gap in this case is an uncomfortable one. To plug the gap with too broad a definition exposes the issuer, contrary to the invariable practice of the court, to indeterminate liability to an indeterminate class and/or uncertainty as to which of multiple claimants has the better claim. Against that, a deficient plug exposes the market to abuse and inadequate vindication of commercial wrongs.
75. I agree with Mr Mumford on a number of steps in his helpful analysis. As will already be apparent, I readily accept that where there is a chain of intermediaries, the investor at the end of the chain does not have any direct proprietary interest in the underlying security, nor can it enforce any rights held in the chain of sub-trusts directly against the issuer. As Briggs J explained in the *Rascals* case, the subject-matter of each sub-trust in the custody chain is the beneficial interest that the intermediary has and holds on trust, rather than the underlying securities themselves.
76. I also accept that the concept of an or any “*interest in securities*” must denote something more than a contractual right or economic interest in such securities if the ‘custody chains’, which by the time of the enactment of FSMA in its latest form had become the market norm and must have been taken to have been in the contemplation of the draftsman, are to have any legal sustainability. There are a number of reasons for this: two seem to me to be paramount. First, the custody chain would be a frail thing, liable to be broken by the insolvency of any intermediary, if the rights had not some other quality which took them out of the ‘property’ of such intermediary for insolvency purposes. Secondly, and also as indicated previously (as in argument), if any personal right or economic interest were to be sufficient to satisfy the expression “*any interest in securities*”, the class of complainants would be quite indeterminate, and almost inevitably competing and conflicted.
77. I also accept Mr Mumford’s insistent warning, especially by reference to the *Westdeutsche* case, that it is essential not to bandy around the notion of equitable interest or proprietary right without carefully identifying its real subject matter; and that it is similarly wrong to treat sub-trusts as if they were contrivances which could be looked through for the purposes of identifying the true interest held by the ultimate investor.<sup>18</sup>
78. Lastly, in this list of areas of agreement with Mr Mumford’s analysis, I accept his argument that the ‘tailpiece’ to paragraph 8(3) of Schedule 10A does not suggest any widening of the meaning of either “*Securities*” or “*any interest in securities*”. I agree with Mr Mumford that the ‘tail-piece’ or ‘carve out’ is there to ensure that the issuer should not be liable in respect of separately traded derivative instruments, which might otherwise loosely be treated as conferring an interest in the underlying securities

---

<sup>18</sup> See C.H. Tam, ‘Exploding the myth that bare sub-trustees “drop out”’ Tru. L.I. 2017, 31(2), 76-92

represented by the derivative instrument, but which have not been admitted to trading on the securities market with its consent (and see paragraph 1 of Schedule 10A). I do not agree with Mr Kitchener that the carve-out of “*a depositary receipt, derivative instrument or other financial instrument representing securities*” signifies that something less than a proprietary interest would suffice since otherwise (to quote his skeleton argument) “if “*any interest*” was as narrow as Tesco contends, the interests carved out would not come close to qualifying under paragraph 8(3).” That would be to load too broad a significance on the ‘tailpiece’.

79. Where I part company with Mr Mumford is in the conclusion to be drawn from the above analysis. Mr Mumford submits that the interest of the investor, not being a directly enforceable trust interest in the securities, must therefore be personal or economic and not equitable and proprietary, and thus insufficient. In my judgment, the ‘right to the right’ which the investor has via the custody chain is, or can be equated to, an equitable property right in respect of the securities, and this is sufficient.
80. Mr Mumford, when I questioned him, chose to depict Briggs J’s description of the investor as the “ultimate beneficial owner” as being simply a “convenient shorthand”, which should not be taken to signify any view as to whether the investor in law had a proprietary interest in the securities. But I think Briggs J meant what he said, and (as one might expect) used the term advisedly to denote the proprietary interest vested in the investor through the custody chain; whether that is more properly characterised as an interest in relation to the underlying securities, rather than an interest in them, does not appear to me to matter: it is still capable of being within the embrace of the expression “*any interest in the securities*” within the meaning of Schedule 10A.
81. To my mind the analysis, and a further explanation of what Briggs J meant by describing the investor as the “ultimate beneficial owner”, is to be found in another case arising out of the Lehman administration, *In the matter of Lehman Brothers International (Europe)* [2012] EWHC 2997 (Ch). There at [163] Briggs J said this:
- “It is an essential part of the English law analysis of the ownership of dematerialised securities that the interests of the ultimate beneficial owner is an equitable interest, held under a series of trusts and sub-trusts between it, any intermediaries and the depository in which the legal title is vested: see paragraph [226] of my judgment in the *RASCALS* case.”
82. Put another way, there seems to me to be semantically no real doubt that the investor has an “interest” in the securities; and similarly, there is legally no doubt that such interest is equitable/proprietary; those are the hallmarks of beneficial ownership, as Briggs J terms the interest of the investor; and their presence suffices to qualify as “*any interest in securities*” for the purpose of Schedule 10A.
83. It would, to my mind, be odd to deny that the ultimate investor has such an interest. No one but the investor can claim any right of ownership beneficially, nor is the property in the share available in the event of the bankruptcy of any intermediary to any of its creditors: only to the investor whose ‘property’ in reality it is.
84. In the result, I have concluded that the expression “*any interest in securities*” can, by application of established distinctions between rights which are merely economic, contractual or personal, and rights which are in equity at least ‘proprietary’, be given sufficiently certain meaning to confine the class of potential claimants so as not to

expose the issuer to indeterminate liability to an indeterminate class whilst also ensuring proper vindication consistently with the admitted objectives of both the domestic legislature and the Transparency Directive.

85. In my judgment, the expression denotes something more than a mere personal or contractual right; the expression “ultimate beneficial owner” captures the position of the investor as the owner of “a right to a right” held through a waterfall or chain of equitable relationships which is unaffected by the insolvency of his intermediary, and enables it ultimately, even if indirectly, to enjoy the benefit of the bundle of rights which the securities represent to the exclusion of others (unless the ultimate beneficial owner has transferred them away, for example to a chargee).
86. In any event, in my judgment, even if the above analysis requires review, restriction or other refinement, the rights of persons holding intermediated securities through CREST, such as I understand all the Claimants to be, comprise an “*interest in securities*” such as to confer standing to sue under FSMA for compensation in respect of any untrue or misleading statement or omission in Tesco’s published information if they can show that they did “*acquire, continue to hold or dispose*” of the securities in question in reliance upon that statement or omission.
87. I am fortified in that conclusion by the consideration that the adoption of this available interpretation as a matter of semantics is necessary to fulfil the purposes of the legislation. That consideration is the stronger given that, although Mr Mumford disputed this, it seems to me that these provisions were intended also to ensure a proper statutory regime of investor remedies for false statements or omissions required by the Transparency Directive in order to give teeth to the disclosure regime it requires, and compensation for breach of its rules.
88. Further, having regard to the long and detailed review of the legislation, and the process of commentary and debate which preceded its enactment in its present form, I cannot agree with Mr Mumford that the draftsman and legislature simply overlooked or misunderstood the process of intermediation or its legal attributes, and unwittingly deployed language which cannot conform to it. In my view, I must proceed on the basis that the draftsman and legislature did understand the market in intermediated securities, did not intend to strip away the rights of investors who chose that mode of holding their investment, and must have been persuaded that the words they used were appropriate to preserve and enhance such rights. Unless the words cannot be made to bear the meaning intended, then they should be made to do so. That seems to me a conventional approach to statutory interpretation: I do not need to determine whether the *Marleasing* principle applies, although it is a further consideration and comfort that the same objective is apparent in the Transparency Directive.
89. In short, whilst personally I might query whether the adoption of some suitably altered form of definition such as is in the USR might have been wiser, I do not see such mismatch between the plain practical objectives of the statutory provisions in question and the legal concepts which bind me that they cannot be reconciled.
90. I consider that the risk of multiple claimants, whilst important, is likely to prove more theoretical than real on the approach which I favour; and in any event, in my judgment, it is not sufficient to justify confining the application of the section so as to render it practically of no use or purpose in the context of the main market for shares. It is dangerous, and often foolish, to seek to extrapolate a general rule or proposition from a particular circumstance, and I would not wish to be thought to be doing so; but my

conclusion that the ultimate investor, as ultimate beneficial owner, does have standing, does not connote that anyone else than (probably) the legal owner does also.

91. The possibility of the legal owner also having standing is a risk inherent in any situation where equitable ownership and legal title are separate. Even in a certificated market, with no custody chain but where the securities are held (as was very usual) in a nominee or ‘street name’, there could be two claimants: the legal and the beneficial owner. In my view, however, the risk is unlikely to eventuate or cause a substantial problem. The custodian, though the holder of the legal interest, is (as previously noted) unlikely to have been more than a passive recipient, who will thus not have made any investment decision in reliance on published information, and so will have no claim under section 90A and Schedule 10A. The possibility of a claim under section 90 FSMA, in which context proof of reliance is not necessary, cannot be excluded; but it is not at all clear why a legal owner would wish to bring a claim in competition with the ultimate beneficiary; and if it did so, it should not be beyond the power of the Court to insist on a single claimant to vindicate the same right.
92. For the avoidance of doubt, I should not be taken to be deciding that persons having a lesser or more indirect interest, such as beneficiaries under a trust entirely separate from the intermediary chain in which relevant shares were held by the ultimate investor is trustee, or a company holding the shares in the ultimate investor (both being possibilities canvassed by Mr Mumford), would have standing under otherwise applicable provisions of FSMA.
93. All I am deciding is that for the reasons I have given, the Claimants have in each case an “*interest in securities*” sufficient to enable them to maintain proceedings for the purposes of section 90A and Schedule 10A FSMA, and these claims should not be struck out unless Tesco can establish its second limb of argument.

*Tesco’s submissions: second limb*

94. The second limb of Tesco’s case is intended to cover the position of Claimants which do have an “*Interest in securities*”, either because of being in a direct relationship with the only custodian or because it is to be assumed that (contrary to the first limb of Tesco’s case) all the Claimants have such an interest. Tesco’s second limb of argument is that, even in those circumstances none of the Claimants can sue because none can be said to have “*acquired*” or “*disposed of*” their interest in Tesco shares within the meaning of paragraph 8(3).
95. In Tesco’s skeleton argument, Mr Mumford illustrated his argument by reference to the Rathbone Claimants (see paragraph [51(1)] above), they being examples of claimants with a direct relationship with the legal owner. He accepted that a transfer by the legal owner (RNL) to someone else would plainly be a “*disposition*” of that legal title covered by paragraph 8(3). Equally, if RIML had assigned or sold its equitable interest, that would also have been covered. But, he submitted, that is not the Claimants’ case. Their case is that each acquisition or disposal of Tesco shares by RNL as legal owner itself constitutes, as a matter of law, an acquisition or disposal of RIML’s equitable interest and that RIML is therefore entitled to sue under Schedule 10A.
96. Mr Mumford’s point is that the Claimants’ construction of paragraph 8(3) therefore depends upon the proposition that it is possible to ‘*acquire*’ or ‘*dispose of*’ an interest without any dealing in that interest; which he submitted could not be so, on the basis

that properly construed, there can be an ‘*acquisition*’ or ‘*disposal*’ of an interest in securities only if there is a transfer of, or dealing in, that interest (as distinct from some other interest) by the disponent. If that is right, Mr Mumford submitted, it necessarily follows that a purchase or sale by the legal owner of legal title does not constitute a purchase or sale of the beneficial interest: the beneficial interest may be created or extinguished, but it is not ‘*acquired*’ or ‘*disposed*’ of for the purposes of the paragraph and Schedule 10A.<sup>19</sup>

97. Mr Mumford elaborated on this argument as follows:

- (1) He submitted that, simply as a matter of language, the natural meaning of the ‘*disposal*’ of an interest in securities is that it is a reference to a dealing in that interest as a result of which it is transferred or ceases to exist, not to a dealing in a different interest. Thus, if RIML instructs RNL to transfer legal title to the Tesco shares, and RNL does so, it may be that RIML’s equitable interest has been extinguished, but there has been no dealing in that interest and it would be an unusual use of language to say that it has been ‘*disposed of*’ if there has been no dealing in the relevant interest itself.<sup>20</sup>
- (2) He relied on two authorities, namely *Akers v Samba Financial Group* [2017] AC 424 and *Vandervell v IRC* [1967] 2 AC 291 (both at the highest appellate level):

¶ In the *Akers* case, Mr Al-Sanea, the legal owner of certain shares in Saudi Arabian banks, held them on trust for a company called SICL. Six weeks after SICL went into liquidation, Mr Al-Sanea, in breach of trust, transferred legal title to the shares to Samba in purported discharge of personal liabilities that he owed them. SICL brought a claim against Samba under section 127 of the Insolvency Act 1986, which provides that ‘*any disposition of the company’s property*’ is in certain circumstances void. Section 127 applies only to the property of ‘*the company*’ (here SICL); the claim therefore turned on whether the sale of the shares by Mr Al-Sanea constituted a ‘*disposition*’ of SICL’s equitable interest. The Supreme Court held unanimously that it did not. Mr Mumford contended that this was because there was no dealing in the equitable interest itself; and he relied on the case accordingly as authority for the proposition that a transfer of legal title to shares by X does not amount to a disposition of Y’s equitable interest in them, even if Y’s equitable interest is extinguished by, or ceases to exist as a result of, that transfer. He relied on the judgment of Lord Mance JSC (at [51]), stating

<sup>19</sup> Mr Mumford contends that the same points apply *a fortiori* to ‘*acquisition*’: in the context of Schedule 10A, the one is the mirror image of the other. Put another way, if there can be no ‘*disposition*’ of an interest absent a transfer of, or a dealing in, the interest itself, it follows that there can be no ‘*acquisition*’ of it either.

<sup>20</sup> Mr Mumford cited the way Professor Nolan puts it, ‘*it is perfectly comprehensible to call some dealing with an asset a “disposition”, even if the result of that dealing is the destruction of that asset. But it is hard (as the Supreme Court appreciated) to see how some dealing with one item of property, that causes the determination of another, distinct, item of property, can be described as a “disposition” of the latter. The word “disposition” surely connotes at least some dealing with the property in question, rather than the occurrence of an extrinsic event which triggered determination of the right*’: see RC Nolan, ‘Dispositions and equitable property’ (2017) 133 *LQR* 353, 357-58 (emphasis added).

“What is clear, on any analysis, is that, where a trust exists, the legal and beneficial interests are distinct, and what affects the former does not necessarily affect the latter.”

¶ In the *Vandervell* case, Mr Vandervell had an equitable interest in 100,000 shares in a company held on a bare trust for him by the National Provincial Bank. He instructed the Bank to transfer the shares (i.e. legal title) to the Royal College of Surgeons. The Bank did so; and this extinguished Mr Vandervell’s equitable interest. (That was suggested to be similar to the facts of this case in that it is an example of Mr Vandervell as equitable owner (e.g. RIML) directing the Bank as nominee or bare trustee (e.g. RNL) to transfer legal title to the shares to a third party.) One of the issues that arose in the House of Lords was whether the transfer of legal title by the Bank to the RCS constituted a ‘*disposition*’ of Mr Vandervell’s equitable interest within the meaning of section 53(1)(c) of the Law of Property Act 1925: if it did, the transfer was void because it was not in writing. Their Lordships held (unanimously on this point) that it did not. Both Lord Upjohn (with whom Lord Pearce agreed) and Lord Donovan explained that in that case there was no dealing in the equitable interest itself: it ceased to exist as a consequence of a dealing in a different interest, namely the Bank’s legal interest: see pp 312, 318. Lord Donovan added that there must be a dealing in ‘*the equitable interest as such*’. Mr Mumford relied upon *Vandervell*, like *Akers v Samba*, as authority for the proposition that a transfer of legal title by the legal owner does not of itself constitute a ‘*disposition*’ of the equitable interest, even if the equitable interest would be extinguished by the transfer: extinguishment of an interest by virtue of a dealing with another interest is not to be equated with its disposition.<sup>21</sup>

(3) Mr Mumford’s third submission in support of the second limb of his argument was that Tesco’s construction is consistent with the scheme of Schedule 10A, whereas the Claimants’ would undermine it. Given his earlier and repeated acceptance that the overall effect of Tesco’s construction would be to render section 90A and Schedule 10A largely unworkable in relation to claims by the holders of intermediated securities, this was a bold submission; but it has its logic as follows:

- (a) If it were possible for an interest to be disposed of without any dealing in that interest itself by the disponor, a very wide range of transactions would fall within paragraph 8(3): for example, the exercise by a third party of a special power of appointment

---

<sup>21</sup> He relied also on *Re Vandervell’s Trusts (No 2)* [1974] Ch 269 as also being authority for that proposition, because the Court of Appeal held in that case that a subsisting equitable interest in an option was extinguished, but not ‘*disposed of*’, when the option was exercised by the trustee: see 320C-D (Lord Denning MR) and 326C (Lawton LJ).

which terminates a subsisting equitable interest in Tesco shares held by someone else, or the extinguishment of an equitable interest by the acquisition of legal title by a *bona fide* purchaser for value without notice. Such transactions are far removed from the standard purchase or sale of shares to which Schedule 10A is intended to be applicable and are unlikely to have been in the contemplation of the draftsman as being within the object of section 90A.

- (b) Instructions to custodians to buy and sell shares are sometimes given orally. If, contrary to Tesco's case, the extinguishment of an interest even without any dealing in it is a '*disposition*', it would, at least in some cases, not be possible for custodians to act on such instructions, because section 53(1)(c) of the 1925 Act would be applicable and the disposition would be void unless in writing.<sup>22</sup> As Harman LJ observed in the Court of Appeal in *Vandervell*,<sup>23</sup> this would lead to the '*exceedingly inconvenient conclusion*' that '*an owner...of shares registered in the names of bank nominees*' could not instruct the nominee to execute a transfer '*unless he accompanied it by a written instrument operating as an equitable assignment.*' The question would also arise as to the validity, in the absence of writing, of at least some of the transactions in respect of the Claimants purport to sue. None of these difficulties arise on Tesco's approach, which limits the concept of dispositions to dealings in the relevant interest that result in its extinction.
- (c) More generally, the Claimants' construction leads to uncertainty as to the ambit of the provisions, and what transactions should qualify as acquisitions or disposals for the purposes of the relevant provisions.

98. Then the question is whether any, and if so what, extension to the ambit of potential liability and the pool of potential claimants was and is intended by paragraph 8(3)(b) of Schedule 10A and the extension of the notion of acquiring or disposing of any interest in securities to "*contracting to acquire or dispose*" of securities or any such interest.

99. As to this, Tesco submits that paragraph 8(3)(b) was and is addressing the particular problem arising where a claimant has contracted to take shares but has never actually acquired or disposed of them *in specie* because at the date of the relevant transaction they were not in issue but had been allotted to the claimant on provisional letters of allotment (acquisition) or had been disposed of by the claimant by renunciation of the right thus acquired (disposal).<sup>24</sup> It has nothing to do with intermediation: when it was

---

<sup>22</sup> Section 53(1)(c) is disappplied to transfers within the CREST system: see regulation 38(5) of the 2001 Regulations. But Mr Mumford submitted that this disapplication is not exhaustive and is not engaged where a transfer is made without using the system (e.g. a transfer by an internal book-entry): see Law Commission Consultation (above), para 2.78.

<sup>23</sup> *Vandervell v IRC* [1966] Ch 261, 298.

<sup>24</sup> This, it is said, is consistent with contemporaneous commentary, which suggests that the purpose of introducing section 150(5) was largely to enable those with a right to acquire the shares themselves (e.g. following a rights issue) to sue if, for some reason, the shares were not actually acquired (e.g. because the company went into

introduced CREST did not exist and the practice of intermediation and computerised transfers of derivative interests was not yet operational. There is no justification for reading into a special definition a different meaning in subsequent Acts or iterations than the meaning it was intended to have when it was introduced.

100. Recognizing that a court is bound to be sceptical about a construction which, even though its individual steps may appear to be logical, renders a statutory provision ineffective in relation to claims by those whom the legislature seems likely to have wished to protect, and at least, not to discriminate against, Mr Mumford sought to bolster his argument that even so this would not provide any legitimate basis for rewriting the legislation in this case with the following two submissions:

- (1) First, that if Schedule 10A is not capable of accommodating claims by holders of intermediated securities, that is a symptom of a more widespread gap or defect in the legal system that the courts have grappled with in recent years, namely that legislation enacted on the assumption that the ultimate investor is also the owner of the securities (which used to be the case) has not been amended in the light of the prevalence of the practice of intermediation. The consequence of this is that claimants are sometimes deprived of a remedy which one would expect them to have and which they would have had if their shares had not been intermediated. But the courts have consistently taken the view that addressing this gap or defect in the law is a matter for Parliament, not the courts: and he cited
  - (a) *re DNick Holding plc* [2014] Ch 196, where Norris J held, with regret, that the ambit of section 98 of the Companies Act 2006 could not legitimately be extended to enable three individual investors holding through intermediaries in aggregate some 7.2% of a company's shareholding to challenge a resolution to re-register as a private company since it was inaccurate as a matter of law to describe them as shareholders or as having acquired any 'shares': what they owned was no more than '*ultimate economic interests in underlying securities*';
  - (b) *Secure Capital v Credit Suisse* [2017] 2 CLC 428, where the decision of Hamblen J (as he then was) to strike out a claim by the investor (Secure Capital) in respect of misrepresentations in an information memorandum by the issuer (Credit Suisse) of intermediated bearer bonds on the ground that the investor was not Credit Suisse's contractual counterparty, had only an ultimate economic interests in the notes and no title to sue upon them was upheld in the Court of Appeal. Mr Mumford referred particularly to David Richards LJ's observation at paragraph [10] that "*the system operates on the basis of a "no look through" principle, whereby each party has rights only against their own counterparty.*"

(2) Secondly, that these authorities illustrate that the mere fact that Schedule 10A may be rendered ineffective for intermediated securities is not a reason for giving it the construction for which the Claimants contend. What the Claimants must do is demonstrate that there is language in Schedule 10A which, construed in the usual way, enables holders of intermediated securities to sue. In that regard,

- (a) Mr Mumford pressed me to reject the Claimants' suggestion (and see further below) that paragraph 8(3) of Schedule 10A is language with just that effect and entirely apt to enable the holders of intermediated securities to sue. He submitted that (a) what is now paragraph 8(3) was derived from section 90A(9)(b), which came into force in November 2006, which in turn was in the same terms as section 90(7), which was itself derived from section 150(5) of the now repealed Financial Services Act 1986. All the sections must in logic be construed consistently. When the original provision, section 150(5) of the FSA, was enacted the CREST system did not exist, and it cannot have been intended to enable holders of intermediated securities to sue; and
- (b) Thus, according to Mr Mumford, paragraph 8(3) does not have and was not intended to have anything to do with intermediated securities: it is concerned with a different problem altogether, namely dealings in equitable interests themselves (whether intermediated or otherwise).

*Claimants' arguments to rebut second limb of Tesco's case*

- 101. As may already be apparent, the SL Claimants offer an entirely different perspective on paragraph 8(3), on which for their part they rely as demonstrating an intention on the part of the legislature to attribute a broad scope to the application of section 90A. They submit that its purpose is plain and is to ensure that it is the fact of the acquisition or disposal of a security or any interest in a security (or any contract for such acquisition or disposal) made in reliance on false information, rather than the exact mode (or legal characteristics of the mode) in which the security or interest is held at the time of the claim, which is the touchstone of standing.
- 102. Mr Kitchener thus submitted that, whatever may be the strict legal meaning of "*interest in securities*", sub-paragraph 8(3)(b) informs the process of construction and extends the protection afforded by section 90A to persons who have entered into a contract for the acquisition or disposal of shares in reliance on published information, whether or not at the time of claim they have an equitable or proprietary interest, and whether or not the right under the contract is characterised as equitable, proprietary or purely economic.
- 103. Mr Kitchener, in his oral address, elaborated on this in submitting that the provision "shows that the draftsman of FSMA was not concerned exclusively with the protection of proprietary rights, because here he is showing that he is concerned to protect purely economic rights; rights under executory or executed contracts." (Mr Kitchener allowed that the generality of this was specifically cut down by the exception for the acquisition or disposal of depositary receipts, derivative instruments or other financial instruments

representing securities in what the parties referred to as the “tailpiece” of paragraph 8(3), but submitted that this in no way undermined his point.)

104. In response to Mr Mumford’s contention of a more limited meaning, Mr Kitchener submitted that the words “acquisition” and “disposal” covered any process whereby the investor obtains or ceases to have any sort of interest in the relevant thing, citing in further support the broad meaning accorded in dictionaries and in such cases as *Congreve & Congreve v IRC* [1946] 2 All ER 170 at 183,<sup>25</sup> where Wrottesley J commented:

“As used by lawyers the word ‘acquired’ has long covered transactions of a purely passive nature and means little more than receiving”

and *Duke of Northumberland v Attorney-General* [1905] AC 406 at 410-11 where Lord Macnaghten commented on the meaning of ‘disposition’ and ‘devolution’ in the Succession Duty Act 1853 that:

“...it is clear that the terms “disposition” and “devolution” must have been intended to comprehend and exhaust every conceivable mode by which property can pass, whether by act of parties or by act of the law.”

105. Mr Kitchener submitted accordingly that (a) the natural meaning of the word “*acquire*” would include a situation where an investor has acquired a security, obtaining a beneficial interest himself and directing that legal title be transferred to his nominee; (b) that the words “*continues to hold*” take meaning from their context. A remedy in the case of a person who “*continues to hold*” securities and interests in securities was first introduced following the Davies Review. The words simply mean that the investor has retained what had been previously acquired; and that (c) the word “*dispose*” must likewise be seen in the context of the words “*acquires, continues to hold or disposes*”, and that in that context its natural meaning includes any dealing by which the investor no longer “*continues to hold*” what he had previously acquired.
106. As to Tesco’s submissions based on *Akers v Samba* and *Vandervell* (see paragraph [96] above), Mr Kitchener sought to distinguish both as confined to their particular contexts, as follows:
- (1) *Akers v Samba* was distinguished as being a case under section 127 Insolvency Act 1986 decided expressly on the basis of construing that particular statutory provision. Mr Kitchener cited in particular paragraphs [42], [47] and [53] to [55] in the judgment of Lord Mance. He also cited that judgment for the fact that the Supreme Court recognised that in other contexts the word “*disposition*” was capable of encompassing the destruction or termination of an interest: see paragraphs 66 to 69 *per* Lord Neuberger, who cited also Wynn-Parry J’s statement to the same effect in *In re Earl Leven and Melville, decd* [1954] 1 WLR 1228, 1233.
  - (2) *Vandervell* was distinguished as being concerned only with the scope of section 53(1)(c) LPA 1925, and in particular whether it applied to a transfer of legal title intended by the disponent also to pass his equitable title (the House of Lords

---

<sup>25</sup> Reversed on other grounds [1947] 1 All ER 168.

held that it did not). Mr Kitchener submitted that this “tells one nothing about the true meaning and effect of Schedule 10A FSMA.”

107. Mr Kitchener concluded that the permissible broad range of the expressions “acquisition” and “disposal” in other contexts should be adopted in this case.

108. Further or alternatively, he submitted that the SL Claimants had plainly “*contract[ed] to acquire securities or any interest in securities*” in that:

- (1) the SL Claimants entered into contracts as principals to purchase Tesco shares and performed those purchase contracts by calling for legal title to be delivered to their nominee / custodian and held to their order. That falls within the natural meaning of “*contracting to acquire securities*”.
- (2) Furthermore, on the facts, the SL Claimants bought shares pursuant to contracts that entitled them (or their nominee) to take legal title, so there is no basis on which those contracts do not qualify.

109. Lastly, Mr Kitchener returned to the combined effect of paragraphs 8(3)(a) and 8(3)(b) and submitted that “It cannot sensibly be suggested that a contract to acquire legal title attracts protection but that paragraph 8(3)(a) excludes a case in which the contracting party performs that contract by directing the seller to deliver legal title to the investor’s nominee.”

110. The MLB Claimants largely shared this perspective and adopted this construction, although (as explained previously) their focus was more upon the meaning of “*any interest in securities*”, which they contended must include a proprietary interest, which they state under US law governing the intermediation chain they plainly have. Certainly, they shared the view that Tesco’s argument is unsustainable, and in their skeleton argument suggested the following example where an investor instructs its custodian (as trustee) to purchase and then sell securities as a demonstration of this:

- (1) Prior to the securities being purchased by the custodian, the investor obviously has no interest of any kind in those securities.
- (2) Once the custodian purchases the securities, they are held on trust for the investor. The investor therefore obtains a beneficial interest in the securities which he did not have previously. It is entirely in accordance with the natural meaning of “acquired” (namely, to obtain or get hold of) to say the investor has “acquired” a beneficial interest in the securities.
- (3) When the custodian sells the securities, full ownership (i.e. including both legal and beneficial title) passes to the purchaser, and the investor can no longer be said to be interested in the securities. Again, using the natural meaning of the word “disposed” (namely, to cease to hold or to remove), the investor has “*disposed of*” its beneficial interest in the securities.
- (4) Moreover, both the “acquisition” and “disposal” in this example takes place on the instructions of the investor and is therefore an acquisition/disposal “by” the investor.

111. In agreement with Mr Kitchener that the authorities relied on by Mr Mumford (*Akers v Samba* and *Vandervell*) to seek to demonstrate that there could be no qualifying “acquisition” or “disposition” of the investor’s equitable interest under the sub-trust of which it is beneficiary by reason of the acquisition or disposition of legal title by the custodian at the beginning of the custody chain were applicable only in their specific contexts and not, in any event, in this context, Mr de Verneuil Smith concluded that paragraph 8(3)(b) gave his clients standing whether or not their interest could legally be characterised as “any interest in the securities”.

*My conclusions as to the second limb*

112. Mr Mumford’s argument that none of the Claimants ever did anything that can legitimately be characterised in law as an acquisition or disposal of the Tesco shares or any interest in them depends upon a narrow interpretation of the expressions ‘acquisition’ and ‘disposal’ as used in Schedule 10A, and in particular, their confinement to a dealing in the very interest which such Claimant has or had (otherwise than by extinguishment effected by a dealing in some other interest).

113. I must admit to having found this second limb of Tesco’s argument somewhat counter-intuitive in light of my decision on the first limb (and possibly in any event), and given that the draftsman must be taken to have known that this was the way of the market; but I accept that intuition will not suffice. More analytically, I cannot see that either *Akers v Samba* or the *Vandervell* case has any application or provides any prescription for the restrictive construction of the relevant provisions for which Mr Mumford presses.

114. As Mr Kitchener submitted, in *Akers v Samba*, the question was whether a transfer of the legal interest in shares held by Mr Al-Sanea constituted a disposition of the company’s equitable interest in those shares so as to trigger the application of section 127 Insolvency Act 1986 (which renders void any disposition of the company’s property after the commencement of a winding-up). The answer given by the UK Supreme Court that it did not was given in circumstances where the company (SICL) had no input into the transaction of any kind, still less was it instigated by it: indeed it was the foundation of its Liquidators’ case that the transfer of the legal estate was in breach of trust and made without its consent and against its interests. There was no intention to dispose, or anything like it; the equitable interest was simply extinguished by reason of the basic equitable principle that the purchaser of a legal estate for value without notice takes free of any equities; and there was no or no sufficient basis for overriding that equitable rule. In this case, by contrast, any dealing (or the holding) of shares is instigated by the claimant.

115. In the *Vandervell* case, the position was in a sense the converse of *Akers v Samba*, because the transaction in question was instigated by the beneficiary and the issue was whether the passing of legal title by the legal owner at the instigation of the beneficiary was to be treated as passing the entire interest without the need for writing to satisfy section 53(1)(c) LPA 1925. The decision of the House of Lords, as expressed in a nutshell by Lord Upjohn at 311 F was that “the greater includes the less”. I agree with Mr Kitchener that this “tells one nothing about the true meaning and effect of Schedule 10A of FSMA.”

116. Further, in *Vandervell*, Lord Upjohn explained (at 311) that section 52(1)(c) LPA 1925 was derived from the Statute of Frauds, and that

“the object of the section, as was the object of the old Statute of Frauds, is to prevent hidden oral transactions in equitable interests in fraud of those truly entitled, and making it difficult, if not impossible, for the trustees to ascertain who are in truth his beneficiaries. But when the beneficial owner owns the whole beneficial estate and is in a position to give directions to his bare trustee with regard to the legal as well as the equitable estate there can be no possible ground for invoking the section where the beneficial owner wants to deal with the legal estate as well as the equitable estate.”

I do not see in that case any suggestion that where a person (X) enters into a transaction pursuant to which, at X’s direction and for value, shares previously held on trust by a custodian and then through a series of sub-trusts ultimately for X become held by the custodian and then through a series of sub-trusts ultimately for Y, would not constitute a disposal by X and an acquisition by Y of an interest in the relevant shares. Nor do I see in that case any basis for a suggestion that separate writing would be necessary for the transfer of the ultimate interest in equity thereby effected. There is no question of any untoward or secret dealing such as to trigger section 53(1)(c): no person in the chain would have any right to object or dispute the transaction, nor would any person be in doubt as to their beneficiary.

117. The fallacy of Mr Mumford’s approach, as I see it, is to treat as irrelevant that it is the transaction which caused the vesting or ceasing to vest in the claimant of the interest in shares (however to be characterised) which, if made in reliance on an untrue or misleading statement or omission in qualifying information from the issuer, is the relevant trigger for liability. That transaction will have been instigated by the claimant, allegedly to its detriment, on the faith of the allegedly untrue or misleading statement or omission. The whole purpose of the relevant provisions of FSMA is to confer a statutory cause of action in respect of a transaction entered into in such circumstances. Unless the wording was without any semantic doubt entirely deficient to apply in such circumstances, ordinary principles of statutory construction require the court to ensure that the statutory purpose is not thwarted. As Lord Neuberger of Abbotsbury PSC expressly acknowledged at [66], the expressions “*disposal*” or “*disposition*” are plainly semantically capable of extending to a transaction which involves the destruction or termination of an interest; and it seems to me to be plain and obvious that the expressions “*holding*” and “*acquisition*” must in logic be given broad corresponding remit. There is every reason to give the expressions such meaning here, to ensure the achievement, rather than the negation, of the statutory purpose.
118. I do not consider that the *Secure Capital* case assists Tesco either. That case concerned only the contractual rights of account holders in respect of immobilised bearer notes held by a custodian in the Clearstream system. In such a system or arrangement, it is not the bearer note, but interests in the note, that are traded through Clearstream. In a “Programme Memorandum” it was stipulated that the bearer/holder of the notes “would be deemed to be and may be treated as its absolute owner for all purposes”; and the system operates on a “no look through principle” so that each participant in the chain of interests under a custodian only has rights against their immediate counterparty. The question was whether, by reason of a provision of Luxembourg law which, it was said and for the purposes of the application only accepted, conferred a direct right of action on Secure

Capital as an Account Holder, Secure Capital could sue Credit Suisse in contract for alleged misstatement in the issuing material. The decision, upheld on appeal, was that it could not, and the “no look through principle” which was well understood to be the basis of trading on the market, prevailed. But here the claim is not in contract but under a statutory cause of action. Except in the sense explained below, which assists not Tesco but the Claimants, the decision in *Secure Capital* seems to me to have no application to this case.

119. Indeed, and as was pointed out in the SL Claimants’ skeleton argument, the judgment of David Richards LJ in the appeal in part undermines, rather than supports, Tesco’s case. David Richards LJ specifically said at [56],

“I emphasise ‘in contract’ because it is not suggested that a claim in tort, if sustainable, would be similarly barred”.

Academic commentary largely supports the proposition that investors would have a non-contractual claim. For example, Ms Gullifer and Ms Payne make clear when discussing the *Secure Capital* case that the ultimate investor would have claims against an issuer under FSMA ss.90 or 90A (as appropriate) notwithstanding the existence of an intermediated securities structure.<sup>26</sup>

120. Accordingly, I consider that any process whereby, in a transaction or transactions on CREST, the ultimate beneficial ownership of securities that are, with the consent of the issuer, admitted to trading on a securities market in accordance with paragraph 1 of Schedule 10A, comes to be vested in or ceases to be vested in a person constitutes (respectively) “*the acquisition or disposal of any interest in securities*”.
121. For comprehensiveness I should confirm that I do not regard this approach as invalidated or undermined in any way by the point made by Mr Mumford as to the derivation of paragraph 8(3) from a time before the existence of CREST and the development of the market in intermediated securities. The analysis I have adopted depends on the width of the expressions “*acquire*” and “*dispose*” and “*acquisition*” and “*disposal*” and their potential application to any process whereby the potential claimants came to be or cease to be entitled to the ultimate beneficial ownership of the shares, whether that process is undertaken through CREST and a chain of intermediation or not. The concepts are adaptable for all seasons, even if (as I think) a statutory definition would have been the clearer thought, given existing controversy.
122. On that basis, in my view, paragraph 8(3)(b) applies only where the acquisition or disposal is the subject of a contract that has not yet been completed, or where the securities are not yet in issue but the entire right to them when issued is acquired or disposed of (such as is or may be the position in the case of securities allotted on renounceable letters of allotment).
123. Lastly, and for comprehensiveness, I accept that the adoption of Mr Mumford’s argument would further have reduced any risk of multiple claims. But, for the reasons I

---

<sup>26</sup> Gullifer & Payne eds, *Intermediation & Beyond* (2019), page 381. The only problem they identify is that the issuance of securities in *Secure Capital* was a private placement, to which the prospectus rules in s.90 does not apply.

have given in the context of limb I, I do not myself consider that to be more than a limited theoretical risk on the construction I favour.

***Conclusion***

124. In my judgment, therefore, neither of the two limbs of Tesco's argument is sustainable. It follows that Tesco's strike-out application must be dismissed.

125. The parties intimated that they might seek declaratory relief, as might certainly have been appropriate had I reached the opposite conclusion. It may be that in light of the conclusion I have reached, that is not necessary; and I would require convincing that any such relief would in the circumstances be appropriate. However, if any of the parties wish to contend to the contrary, they should notify me as soon as possible. Subject to that, I would invite Counsel to agree and provide me with a draft form of order. Any consequential matters can be dealt with after formal hand-down or at a convenient moment later.

**JUDGMENT (as approved)**

**MR JUSTICE MILES:**

1. This is the first case management conference in this case. The claimants bring an action under section 90A of the Financial Services and Markets Act 2000 and schedule 10A to that Act.
2. There are some 60-odd institutional investors, which manage some 140 different funds. The claimants claim to have suffered loss and damage as a result of acquiring or continuing to hold interests in shares in the defendant in reasonable reliance on allegedly misleading or untrue statements and/or omissions made by the defendant in relevant published information under paragraph 3 of schedule 10A and/or as a result of alleged dishonest delay by the defendant in publishing relevant information under paragraph 5 of schedule 10A. The defendant denies all liability.
4. There is no dispute that, between 2009 and 2013, the defendant's Irish trading subsidiary ("RSA Ireland") engaged in inappropriate accounting practices and the deliberate manipulation of insurance claim reserves through under-reserving. There is a dispute as to whether the under-reserving of other claims (by some £128 million) was a result of any misconduct or inadequate corporate governance.
5. The defendant, which is a listed UK company and whose shares are listed on the LSE, disclosed the misconduct within RSA Ireland in announcements to the market in November 2013, following which its share price dropped significantly.
6. The claimants contend that the defendant published statements that were rendered untrue or misleading by the fact that the financial misconduct within RSA Ireland had occurred, or was occurring, and that inadequate corporate governance and controls existed within RSA Ireland and the defendant. They say, alternatively, that the defendant omitted to disclose such matters, or again alternatively, that it delayed publishing information in respect of them. The claimants contend that senior executives within the defendant knew or were reckless as to the falsity of the published statements and/or knew the omissions to be a dishonest concealment of the material fact and/or acted dishonestly in delaying the publication of relevant information.
8. The first question I have to resolve is an important one about the shape of the trial process. It is common ground that there should be a split trial but there is a difference between the parties as to where the split should lie.
9. The debate has been conducted by reference to an agreed list of issues. To summarise: Issue 1 concerns the standing of each of the claimants to bring claims under section 90A of FSMA; issues 2 and 3 concern the extent of wrongdoing of RSA Ireland; issues 4 and 5 are concerned with whether the published information

was untrue, misleading or incomplete; issues 6 to 8 concern the knowledge of alleged PDMRs (i.e. persons discharging management responsibility, a term used in the statute); issue 9 is concerned with the allegation of dishonest delay; issue 10 is whether the claimants reasonably relied upon the published information in acquiring or continuing to hold shares in the defendant; issues 11 and 12 concern causation of loss; and issues 13 and 14 concern the quantum of the claims.

16. It will be seen that issues 2 to 9 concern the conduct and knowledge of the defendant and its directors or officers. Issue 1 concerns the claimant's standing, and issues 10 to 14 concern other elements necessary for the claimant's claims to succeed. I shall call issues 2 to 9 "the RSA issues".
19. The claimants submit that at the first trial the court should consider and resolve the RSA issues and nothing more. The defendant's position is that there should be a split trial at which the court should determine the RSA issues, but that in addition the court should determine issue 10, namely the issues concerning the claimant's reasonable reliance on the statements or omissions. As a fallback made in the course of oral submissions, counsel for the defendants suggested that the court might also determine issues 11 and 12, concerning causation. I will come back to that in due course.
25. I shall summarise the submissions of the parties, but I have taken into account all they have said, both in their helpful skeleton arguments and orally, in reaching my decision.
26. The claimants say there is a real advantage in determining the RSA issues first. There is a neat and clean separation between these issues and the issues which concern the claimant's knowledge, conduct and actions. They point out that there is overlap between issue 10, which concerns reliance, and issues 11 and 12, which concern causation. The claimants say it is likely that the same witnesses will be required to give evidence twice if the defendant's proposal is accepted, and that, if they have to do that, there is a possibility of tensions arising in relation to the evidence they give and the findings the court might make. They say that, if possible, the court should avoid that kind of duplicative process.
28. They also say, at least in relation to one of the categories of claimants (which has been called "category 3") expert evidence will be required. That category consists of cases where the relevant claimants did not read or see the published information, whether directly or indirectly, but exclusively or primarily relied on the price or the market capitalisation of the defendant's shares. What is said is that the price of shares was influenced by published information, that the claimants made their decisions based at least in part on price, and that that is sufficient to constitute reliance for the purposes of schedule 10A. The claimants say that they would wish to adduce expert evidence from an economist on the extent to which the market in shares traded on the LSE is an efficient one.
31. The claimants say next that their proposal would lead to a shorter first trial. They

have given a provisional estimate suggesting that it should be possible to deal with the first trial in about 15 court days. They say that if issue 10 is added into the first trial, it is likely to lead to something like a doubling of the trial length.

32. Leading on from that, they also say that, on their proposal, the first trial should be possible in early to mid-2022, whereas on the defendant's proposal the trial will probably not take place until 2023.
33. The claimants say that there is the potential for complications on the defendant's proposal, arising from possible appeals. They say that it is far more likely, if there is an appeal, that it will be about the reliance issues rather than on the RSA issues, which are mainly factual. They say that some of the reliance issues, in particular in relation to the third category of claimants, are ripe for appeal, including to the Supreme Court. The claimants say, therefore, that if questions of reliance are included in the first trial and there is an appeal, there could then be a messy and complicated process of seeking to work out what should then happen to the second trial - and this could itself lead to substantial delays.
36. They also say that splitting the trial in the way that they suggest would be likely to assist the parties in reaching a settlement of the case. It will provide guidance on key parts of the case and, looking at things realistically, if they win on the first trial, as they propose, they say it is likely that the defendant will then seek to settle the case. And if they lose on the first part of the case, then, subject to appeals, the case will go no further.
37. Turning to the defendant's position, its counsel submits that the issue of reliance is an important or key part of the statutory cause of action. If the claimants are unable to show reliance they have no right to bring the claim.
38. The defendants agree that the resolution of issues at an early stage will assist the parties to settle the case: but they say this points to the inclusion of another important issue, namely issue 10.
40. The defendant says that its proposal would lead to a more balanced allocation of resources and effort. It is fairer that the claimants should be undertaking work now, towards an overall resolution, just as the defendant will be in relation to the RSA issues.
41. It says that, on its proposal, there is likely to be an earlier resolution of the reliance issues than on the claimant's suggested split. Counsel gave a provisional estimate of how long it would take to get to trial, suggesting, on the defendant's proposal, it could be in autumn 2022 or early 2023.
42. The defendant says that if the trial is split in the way that the claimants suggest it is likely that the trial of the reliance issues would not take place at least until a date in mid-2024. They also argue that the claimants took their time before bringing these claims, and that it is important, if possible, for the issues of reliance (which include factual disputes) to be decided sooner rather than later.

43. The defendant accepts that the trial length would be increased by the inclusion of issue 10 and suggests that the trial length might be increased by some 6 or 7 days or so.
44. It says that the claimant's argument that it would be necessary to call substantial expert evidence is exaggerated. Counsel suggests that there may be no need for expert evidence on the efficiency or otherwise of the markets once the point is properly spelt out. But that, in any event, it is unlikely that any such evidence would occupy the time of the court for very long.
45. As to the possibility of appeals, the defendant says this factor actually points the other way. It says that it would be preferable for any appeals to be part of a unified process with any appeals on the RSA issues to be heard at the same time as any appeals on issue 10. It says that it is realistic to suppose that there may be appeals on at least some of the RSA issues, including those concerning the question whether it is arguable in law that the overall impression given by the information is relevant, and the construction issues concerning the meaning of the published information.
47. The defendant says that the risks arising from the potential overlap between the reliance and causation issues that there may be muddle or duplication is overstated. It says that the issues are different: the question of reliance concerns what actually happened while the question of causation concerns a counter-factual, hypothetical, questions about what would have happened. It argues that in some respects, the questions of causation would actually be better focused once the parties were armed with a ruling on the questions, first, of what information or omissions were inaccurate or misleading, and, secondly, which parts of the information had been relied on by the claimants in making their decisions.
51. I have carefully considered these various submissions. I have concluded that overall the defendant's position is to be preferred. As I have summarised the parties' positions I can provide my reasons briefly.
52. First, it is preferable on balance that more rather than fewer issues should be tried at the first trial. It seems to me that including issue 10 as well as the RSA issues is more likely to bring about a settlement of the remaining issues.
53. Second, it seems to me that the defendant's proposal is likely, overall, to lead to a faster determination of the factual issues concerning reliance than the claimant's proposal. On the claimant's proposal, there would be a first trial some time in mid-2022. There would then no doubt be further directions in order to prepare for a trial in some point in 2023. Indeed, it seems likely that, given what has been suggested so far, one would be well into 2023 before there could be a trial of the reliance issues. By contrast, in my view there could realistically be a trial of issues 2 to 9 and 10 starting in the autumn of 2022. So there could be a saving of up about a year (leaving aside appeals).

55. I do not accept the claimants' submission that this difference is marginal. I agree with the defendant that the claimants have chosen to bring this case late in the limitation period, and the more time that passes the more difficult it will be for the parties and the court to determine what happened on a true factual basis. Another year or so of delay is, if possible, to be avoided.
56. Third, while there is some force in the claimants' point that their division of the issues would lead to a shorter first trial, I do not think, in a case of this scale and importance, this is a particularly telling factor. The claimants have brought this claim and must be ready to take part in it fully, even if that means a somewhat longer first round trial. I do not think that a trial of say 25 days to 30 court days would be excessively onerous for parties as well funded as these (particularly where, as I understand it, the claimants have arranged litigation funding).
58. The fourth point concerns the overlap between the issues of reliance and causation. There is again some force in the claimants' points, and in an ideal world I can see that it would be preferable to have a clean and tidy division of the claimant's issues from the RSA issues. However, decisions of this kind are pragmatic and not based entirely merely on bright lines of principle. I do not think that the potential of overlapping evidence (on reliance and causation) is likely to lead to a serious risk of inconsistencies in the evidence or the court's findings. While it is somewhat unsatisfactory for there to be an element of duplication with the same witnesses possibly coming back to court twice, once they witnesses have given their evidence at the first trial, I would expect the evidence about causation to be fairly short and self-contained.
61. As to the claimant's argument that expert evidence would be required for issue 10, I agree with the submission of counsel for the defendants that it is quite possible that no such evidence will be needed. The proposition advanced by the claimants appears to be that the prices of securities listed on the LSE are at least influenced by published information, which at the moment strikes me as more or less self-evident. But if there is to be such evidence, then I would not expect it to occupy the time of the court for very long.
62. The possibility of appeals seems to me a point that points in both directions. I can see that it might be considered better to hold back the reliance issues and for there then to be appeals after the second trial. On the other hand, I think, overall, there is some force in the defendant's point that if there are to be appeals it would be better if as many issues as possible are dealt with at once. There is a real risk that if the question of reliance is put off to a second trial and there is an appeal after the first trial, the reliance questions (which are essentially factual ones) would be pushed further off into the distance and, for reasons already given, I regard that as unsatisfactory.
64. The next point concerns the allocation of the litigation burden as between the parties. The defendants are entitled to examine and scrutinise the claimants' case, just as the claimant is entitled to examine the defendant's conduct. The claimants'

proposal would effectively mean postponing their burden until a later stage, while placing almost all the work on the defendant. Sometimes, by its nature, litigation is lopsided in that way: the claimant has no evidence to give and the case entirely concerns the conduct of a defendant. But, here, the imbalance would be created by the proposed order splitting the trial. It seems to me that the claimants, having brought the action, should be prepared to undertake substantial work in ensuring the expeditious progress of the proceedings to resolution. That includes giving disclosure, preparing witness statements, and being prepared to provide evidence at trial. It seems to me that the defendant's proposal represents a fairer allocation of the litigation burden on the parties. This would not be a determinative factor on its own, but it does seem to me that it has some bearing.

65. For these reasons I have concluded that it is appropriate to include issue 10 in the first trial. I would not have been attracted by the defendant's fallback position of including questions of causation of loss. It seems to me that those issues are likely to involve substantial expert evidence and there is a real attraction in those issues being hived off together with quantum to a second trial.

**Lord Justice Lewison:****Introduction**

1. A client enters into a contract of retainer with solicitors to prosecute a claim. The contract provides that in the event of success the solicitors will be entitled to a share of the recoveries. The client achieves success by means of a settlement of the claim; and the solicitors claim their share. But the contract also contains a clause which says that if the client terminates the retainer prematurely (which she did not), she must pay the solicitors' normal fees and disbursements. Does the existence of that clause invalidate the whole contract? HH Judge Parfitt held that it did not. His judgment is at [2020] EWHC 1855 (Ch).
2. The particular factual background to this case does not affect the issue we have to decide; so I give only a short summary. Mrs Zuberi borrowed money from a bank. She subsequently brought a claim against the bank alleging that she had been misold certain financial products. She retained Lexlaw to act on her behalf under the terms of a written agreement. Eventually the bank made an offer to settle her claim, which she accepted.
3. Under clause 9.1 of the written agreement Lexlaw were entitled to 12% of any sum recovered plus expenses (such as disbursements). Lexlaw says that the sum due is just under £130,000. Clause 10 provided that if the claim was lost, the client was liable to pay expenses only. But clause 6.2 of the agreement provided:

“With the exception of the circumstances set out in clause 6.3 ... you may terminate this Agreement at any time. However, you are liable to pay the Costs and the Expenses incurred up to the date of termination of this Agreement within one month of delivery of our bill to you.”
4. The expression “Costs” was defined as time charges at an hourly rate for time spent working on the claim; and the expression “Expenses” was defined as the cost of instructing third parties plus disbursements.

**The common law**

5. Retainers under which a lawyer was entitled to a share in the client's recoveries were long prohibited at common law on grounds of public policy on the ground that they were “champertous”, although public policy is capable of changing: *Kellar v Williams* [2004] UKPC 30, [2005] 1 LRC 582 at [21].
6. At common law, where all the terms of a contract are illegal or contrary to public policy, the contract is unenforceable. Where, however, only some of the terms are illegal or contrary to public policy, the court can in some circumstances enforce those parts that are not illegal or contrary to public policy. The general rule is that where you cannot sever the illegal from the legal parts of a contract, the contract is altogether void, but where you can sever them “you may reject the bad part and retain the good”: Chitty on Contracts (33<sup>rd</sup> ed para 16-237).

7. The criteria that must be fulfilled before severance is possible are that (a) the offending provision can be removed without modifying or adding to other terms of the agreement; (b) the remaining terms continue to be supported by adequate consideration and (c) the removal of the unenforceable part of the contract does not change the nature of the contract, such that it is not the sort of contract that the parties entered into at all: *Tillman v Egon Zehnder Ltd* [2019] UKSC 32, [2020] AC 154.
8. In my judgment, these conditions are amply fulfilled in this case. At common law, therefore, I consider that clause 6.2 of the written agreement could have been severed from the remainder of the contract, thus leaving it (including clause 9.1) as enforceable.
9. Sir Rupert Jackson carried out a comprehensive review of the costs regime governing civil litigation in England and Wales. At the time of his review contingency fees were permitted in employment and other tribunals. In his Final Report (December 2009) he recommended the introduction of contingency fees for other types of civil litigation, provided that they were suitably regulated. The reason underlying his recommendation was that there should be as many funding methods as possible available to litigants, because that would promote access to justice.
10. Under the common law, an agreement of that type would have been unenforceable as champertous. It was therefore necessary, in order to implement Sir Rupert's recommendation, to introduce primary legislation to change the common law.

#### **The legislative frame work**

11. Sir Rupert's recommendation was accepted by the government; and initially implemented by section 45 of the Legal Aid, Sentencing and Punishment of Offenders Act 2012 which introduced an amended version of section 58AA of the Courts and Legal Services Act 1990, providing for damages-based agreements ("DBAs"). That version of section 58AA came into force on 19 January 2013; and remained in force when the retainer in our case was entered into. It provided so far as material:

"(1) A damages-based agreement which satisfies the conditions in subsection (4) is not unenforceable by reason only of its being a damages-based agreement.

(2) But... a damages-based agreement which does not satisfy those conditions is unenforceable.

(3) For the purposes of this section—

(a) a damages-based agreement is an agreement between a person providing advocacy services, litigation services or claims management services and the recipient of those services which provides that—

(i) the recipient is to make a payment to the person providing the services if the recipient obtains a specified financial benefit in connection with the matter in relation to which the services are provided, and

(ii) the amount of that payment is to be determined by reference to the amount of the financial benefit obtained

(4) The agreement—

(a) must be in writing;

(aa) ...

(b) if regulations so provide, must not provide for a payment above a prescribed amount or for a payment above an amount calculated in a prescribed manner;

(c) must comply with such other requirements as to its terms and conditions as are prescribed; and

(d) must be made only after the person providing services under the agreement has complied with such requirements (if any) as may be prescribed as to the provision of information.

(5) Regulations under subsection (4) are to be made by the Lord Chancellor and may make different provision in relation to different descriptions of agreements.

(6) ...

(6A) ...

(7) In this section—

“payment” includes a transfer of assets and any other transfer of money’s worth (and the reference in subsection (4)(b) to a payment above a prescribed amount, or above an amount calculated in a prescribed manner, is to be construed accordingly); ...”

12. The first set of regulations made under section 58AA were the Damages-Based Agreements Regulations 2010. They were replaced by the Damages-Based Agreements Regulations 2013, which came into force on 1 April 2013. Regulation 1 (2) contained a number of relevant definitions:

““costs” means the total of the representative’s time reasonably spent, in respect of the claim or proceedings, multiplied by the reasonable hourly rate of remuneration of the representative

“expenses” means disbursements incurred by the representative, including the expense of obtaining an expert’s report and, in an employment matter only, counsel’s fees;

“payment” means that part of the sum recovered in respect of the claim or damages awarded that the client agrees to pay the representative, and excludes expenses but includes, in respect

of any claim or proceedings to which these regulations apply other than an employment matter, any disbursements incurred by the representative in respect of counsel's fees;..."

13. Regulation 3 provided:

"The requirements prescribed for the purposes of section 58AA(4)(c) of the Act are that the terms and conditions of a damages-based agreement must specify—

- (a) the claim or proceedings or parts of them to which the agreement relates;
- (b) the circumstances in which the representative's payment, expenses and costs, or part of them, are payable; and
- (c) the reason for setting the amount of the payment at the level agreed, which, in an employment matter, shall include having regard to, where appropriate, whether the claim or proceedings is one of several similar claims or proceedings."

14. Regulation 4 (on which this appeal turns) provided:

"(1) In respect of any claim or proceedings, other than an employment matter, to which these Regulations apply, a damages-based agreement must not require an amount to be paid by the client other than—

- (a) the payment, net of—
  - (i) any costs (including fixed costs under Part 45 of the Civil Procedure Rules 1998); and
  - (ii) where relevant, any sum in respect of disbursements incurred by the representative in respect of counsel's fees,that have been paid or are payable by another party to the proceedings by agreement or order; and
- (b) any expenses incurred by the representative, net of any amount which has been paid or is payable by another party to the proceedings by agreement or order."

15. Regulation 4 (2) dealt with personal injury claims; and regulation 4 (3) provided:

"(3) Subject to paragraph (4), in any other claim or proceedings to which this regulation applies, a damages-based agreement must not provide for a payment above an amount which, including VAT, is equal to 50% of the sums ultimately recovered by the client."

16. Regulation 4 (4) provided:

“The amounts prescribed in paragraphs (2)(b) and (3) shall only apply to claims or proceedings at first instance.”

17. Regulation 5(1) began: “In an employment matter, the requirements prescribed for the purposes of section 58AA(4)(d) of the Act are to provide” certain matters which it then set out in regulation 5 (2).

18. Regulation 7 provided:

“In an employment matter, a damages-based agreement must not provide for a payment above an amount which, including VAT, is equal to 35% of the sums ultimately recovered by the client in the claim or proceedings.”

19. Finally, so far as relevant, regulation 8 provided:

“(1) In an employment matter, the additional requirements prescribed for the purposes of section 58AA(4)(c) of the Act are that the terms and conditions of a damages-based agreement must be in accordance with paragraphs (2), (3) and (4).

(2) If the agreement is terminated, the representatives may not charge the client more than the representative's costs and expenses for the work undertaken in respect of the client's claim or proceedings.

(3) The client may not terminate the agreement—

(a) after settlement has been agreed; or

(b) within seven days before the start of the tribunal hearing.

(4) The representative may not terminate the agreement and charge costs unless the client has behaved or is behaving unreasonably.

(5) Paragraphs (3) and (4) are without prejudice to any right of either party under general law of contract to terminate the agreement.”

### **The problem**

20. It will be seen that regulation 8 (which applies only to employment matters) expressly permits a legal representative to charge costs and expenses if the client terminates the retainer. By contrast, regulation 4 does not. This potential defect was pointed out by the Civil Justice Council Working Party in a report produced in 2015 (Chapter 27 para 9). Their recommendation was that the grounds and manner of termination of a DBA “and the consequences of termination on either side” were best left to negotiations between the lawyer and the client.

21. This has caused considerable uncertainty in the legal profession; and a widespread fear that if a client terminates a retainer, the lawyer will end up not being paid

anything for what might have been months or even years of work. The authors of Costs & Funding Following the Civil Justice Reforms describe this point at para 2-26 as being “seen as one of the key uncertainties preventing wider use of DBAs”. Friston on Costs (3<sup>rd</sup> ed) takes much the same view at 29.151. Mr Bacon QC, appearing on behalf of the Bar Council as Interveners, told us that because of the uncertainty, neither the Bar Council nor the Law Society has provided a model form of DBA.

22. Opinions on the point seem to be divided. For example, in formulating a model form of DBA the Chancery Bar Association stated that it was “not possible to provide for some other form of payment if the agreement requires early termination” because it would thus contravene regulation 4. That, they thought, would mean that it was likely that the DBA would be unenforceable.
23. On the other hand, the editors of Cook on Costs say at paragraph 7.18 that civil litigation lawyers “would be well advised” to consider following the employment matter provisions when drafting their DBA.

### **The judge’s view**

24. The judge considered that it was unlikely that regulation 4 (1) was intended to preclude a retainer which allowed a lawyer to recover his costs if the retainer were to be terminated by the client. He gave a number of “inter-locking” reasons for his view. They included the lack of any justification for such a stark difference between the position of a lawyer in an employment matter and a lawyer in any other kind of case; an interference with freedom of contract; and the deterrent effect on the adoption of DBAs which that interpretation of regulation 4 (1) would produce, with the consequence that there would be less choice of funding methods for litigants.
25. He also analysed the text of regulation 4 (1) and held that the “amount to be paid by the client” took as its underlying premise that there were recoveries to be shared. A clause like clause 6.2 comes into operation at a time when there are no recoveries to be shared; and thus falls outside the target area of regulation 4 (1). He reinforced that interpretation by recalling that the statutory definition of a DBA in the Regulations was the particular agreement to share recoveries. That was the only subject-matter with which regulation 4 (1) was concerned.

### **Mrs Zuberi’s argument**

26. Mr Davies’ starting point is that although champerty is no longer a tort, statute has preserved the common law rule that a champertous contract is contrary to public policy: Criminal Law Act 1967 section 14 (2). Where DBAs are permitted by statute they are “islands of legality in a sea of illegality”. Accordingly, if a DBA does not comply with section 58AA or the Regulations made under it, it has not reached the safety of the island. In approaching the validity of the contract of retainer, a court should not be disposed to uphold a contract of doubtful validity. It is for the lawyer to show that it is valid.
27. Clause 6.2 of the contract in the present case requires the client to make a payment to the solicitor “other” than “the payment” as defined by regulation 1 (2). It therefore fails to comply with regulation 4 (1). The fact that, in the particular circumstances of this case, the client has not in fact been prejudiced has no bearing on the question of

the validity of the contract: *Garrett v Halton BC* [2006] EWCA Civ 1017, [2007] 1 WLR 554 at [38] and [39].

28. Even if it is permissible to include a provision requiring payment in the event of the termination by the client of the retainer, the amount of that payment must be capped by reference to regulation 4 (1) and 4 (3).
29. There is a clear contrast between regulation 4 and regulation 8 (2). If the judge's interpretation was correct, regulation 8 (2) would be unnecessary. What the judge did was to read down regulation 4 impermissibly, rather than to apply the clear language that Parliament has approved.

### **General approach**

30. If I may repeat something I have said before (*Pollen Estate Trustee Co Ltd v Revenue and Customs Commissioners* [2013] EWCA Civ 753, [2013] 1 W.L.R. 3785 at [24]):

“The modern approach to statutory construction is to have regard to the purpose of a particular provision and interpret its language, so far as possible, in a way which best gives effect to that purpose. ... In seeking the purpose of a statutory provision, the interpreter is not confined to a literal interpretation of the words, but must have regard to the context and scheme of the relevant Act as a whole... The essence of this approach is to give the statutory provision a purposive construction in order to determine the nature of the transaction to which it was intended to apply and then to decide whether the actual transaction (which might involve considering the overall effect of a number of elements intended to operate together) answered to the statutory description. Of course this does not mean that the courts have to put their reasoning into the straitjacket of first construing the statute in the abstract and then looking at the facts. It might be more convenient to analyse the facts and then ask whether they satisfy the requirements of the statute. But however one approaches the matter, the question is always whether the relevant provision of statute, on its true construction, applies to the facts as found.”

31. Although, of course, Parliament may abolish, modify or displace any common law rule, there is a general presumption that it did not intend to make changes to the common law except expressly or by necessary implication: Bennion on Statutory Interpretation (7<sup>th</sup> ed) para 25.6, 25.8. In considering whether a statute has displaced the common law, the court must consider the extent to which the legislative purpose would be undermined by the continuing existence of the common law operating alongside it: Bennion para 25.9. Where a legislative scheme is comprehensive, that may be an indication that the common law has been displaced: Bennion para 25.11.

### **What is a DBA?**

32. For convenience, I repeat the relevant part of the statutory definition of a DBA:

“(a) a damages-based agreement is an agreement between a person providing advocacy services, litigation services or claims management services and the recipient of those services which provides that—

(i) the recipient is to make a payment to the person providing the services if the recipient obtains a specified financial benefit in connection with the matter in relation to which the services are provided, and

(ii) the amount of that payment is to be determined by reference to the amount of the financial benefit obtained.”

33. There are two possible views of what the DBA consists of. One view is that if a contract of retainer contains any provision which entitles the lawyer to a share of recoveries, then the whole contract of retainer is a DBA. In other words, a DBA is a contract which includes a provision for sharing recoveries. But another view is that if a contract of retainer contains a provision which entitles a lawyer to a share of recoveries; but also contains other provisions which provide for payment on a different basis, or other terms which do not deal with payment at all, only those provisions in the contract of retainer which deal with payment out of recoveries amount to the DBA.
34. In my judgment, there are good reasons for preferring the latter view. First, the object of the legislation was to permit the remuneration of lawyers by means of a share of recoveries. Second, the only part of the common law that needed to be changed to achieve that purpose was the rule against champerty. As I have said, at common law the contract of retainer, shorn of clause 9.1, would have been enforceable. There was no particular reason for Parliament to modify the other statutory and regulatory controls over lawyers' fees. Third, there is a presumption that Parliament does not intend to change the common law, except expressly or by necessary implication. There is no express provision which displaces the common law (except the rule against champerty). Fourth, the legislation cannot be said to be undermined by the co-existence of the common law. Fifth, the legislative scheme is far from comprehensive.

#### **Is this view reflected in the Regulations?**

35. In my judgment, it is. Regulation 4 (1) prohibits payment of “an amount other” than that described in that regulation. Taken literally, that may be thought to encompass any money payment, including a payment under clause 6.2. This is the interpretation for which Mr Davies contends. But there are, in my judgment, cogent reasons for rejecting that interpretation.
36. As the judge pointed out, the factual premise underlying regulation 4 is that there were in fact recoveries available for sharing. In that respect he was plainly right. The correctness of that conclusion can be seen by considering how the Regulations operate in employment matters. Regulation 7 prohibits a payment by the client above 35% of the client's ultimate recoveries. If the client does not recover anything (because they terminate the retainer) the payment permitted by regulation 7 is, on a literal reading, zero. (35% of zero is zero, so £1 is more than 35% of zero). Yet regulation 8 expressly permits the lawyer to charge the client his normal costs and expenses in the

event that the client terminates the retainer. It would be absurd to interpret a statutory instrument in a way that resulted in its being either ineffective or self-contradictory. So regulation 7 cannot be interpreted literally: it must be interpreted so as to give effect to regulation 8. Regulation 4 (3) is framed in much the same way as regulation 7. Regulation 4 (3) and regulation 7 must be interpreted consistently with each other.

37. There are other textual indications that regulation 4 is only concerned with circumstances in which a recovery has been made. Again, as the judge pointed out, the heading to regulation 4 is “Payment in respect of claims” and the explanatory note states that regulation 4 deals with “the payment from a client’s damages”. Since “payment” is defined as a share of recoveries, these are also indications that regulation 4 is not concerned with fees calculated on a time basis.
38. The interpretation for which Mr Davies contends would also conflict with regulation 3 which provides that a DBA must specify “the circumstances in which the representative’s payment, expenses and costs, or part of them, are payable”. That regulation is expressed to apply to all DBAs, not just to those dealing with employment matters. As we have seen, “costs” means the hourly charge multiplied by the number of hours spent on the case, whereas “payment” means the representative’s share of recoveries. On a literal interpretation of regulation 4 (1) which enables a lawyer to be paid only where there has been a recovery, therefore, there would never be any circumstances in which a representative’s “costs” as opposed to their “payment” would be payable. But, again, it would be absurd to interpret the Regulations as being either self-contradictory or internally inconsistent. In addition, regulation 3 expressly envisages that a DBA may apply to part only of proceedings. Suppose that a client approaches a solicitor and says that they have a claim that they wish to prosecute; that they can pay normal time charges up to close of pleadings; but that if the case goes any further they can only continue if the lawyer’s payment is limited to a share of the recoveries. I can see no objection to regarding that part of the overall agreement relating to recoveries, rather than the whole of the contract of retainer, as amounting to the DBA. In those circumstances, the effect of regulation 4 would control that part of the contract of retainer which dealt with the share of recoveries, but not that part which dealt with time charges.
39. It is also instructive to consider which statutory power has been invoked in making the Regulations. Regulation 3 is the product of the exercise of the power in section 58AA (4) (c). That power concerns the terms and conditions of an agreement: not the amount of the payment that is permitted. Likewise, regulation 8 (which permits the recovery of pre-termination costs in employment matters) is not an exercise of the power under section 58AA (4) (b) which deals with permitted payments; but is the exercise of the power under sub-paragraph (c) which deals with requirements about terms and conditions. In other words, the recovery of “costs” is not the target of the legislation. The effect of regulation 7 in combination with regulation 8 is that a retainer in an employment matter may include a DBA which provides for a share of recoveries not exceeding 35%, but only if it also includes a limit to the amount that can be charged on termination. As Mr Snell correctly submitted, regulation 8 does not *authorise* termination payments. It *assumes* that they are chargeable outside the scope of the Regulations and caps them. This, too, is consistent with a narrow view of the meaning of a DBA in the primary legislation.

40. In addition, the power to make regulations in section 58AA (4)(b) allows regulations to be made prohibiting payments “above” a prescribed amount or “above” an amount calculated in a prescribed manner. It is thus concerned only with capping fees; and the particular target at which the cap was aimed was the sharing of recoveries.
41. Finally, there is the question of policy underlying the Regulations. A reading of the policy documents underlying the Regulations also supports the view that the payment of a lawyer’s time costs and expenses on early termination of the retainer was not the intended target of regulation 4 (1). It will be noted that a DBA extends more widely than an agreement between lawyer and client. The Explanatory Memorandum drew a distinction between DBAs applicable to ordinary civil litigation on the one hand, and DBAs applicable to employment matters on the other. It said:

“7.4 It was not considered necessary to adapt the provisions in the 2010 regulations which deal with termination (now regulation 8), those which prescribe the information which must be provided to a client before entering a DBA (now regulation 5) or the form in which any amendments to the agreement must take (now regulation 6). This is because section 58AA of the 1990 Act and the 2010 regulations were introduced following concerns that some representatives in employment cases were providing inadequate advice to their clients. This included failure to inform clients about alternative options for funding their claim (for example, through trade union representation and legal expenses insurance cover) and the use of unfair terms and conditions (for example, imposing unfair charges where a client wished to instruct another representative or refused to accept the representative’s advice to settle their claim). The 2010 regulations were designed to ensure that all representatives, whether solicitors or claims management companies, adhered to the stringent requirements specified in the regulations when providing a service under a DBA.

7.5 Only qualified legal representatives, who are subject to regulation by their professional bodies and whose conduct may be subject to challenge through those bodies, will undertake civil litigation (i.e. contentious business). It is therefore considered that, at this stage, further regulation is not required. Moreover, the consequence of failing to comply with these Regulations is that the DBA will not be enforceable and, in those circumstances, the representative will receive no payment. There is a concern that this could lead to attempts to avoid payment, by suggesting that the legal representative had failed to comply with one or more of the additional regulations (as happened when CFAs were subject to greater regulation), leading to satellite litigation.”

42. It is clear, then, from paragraph 7.5 that the regulation of the circumstances in which lawyers could recover their costs and expenses on termination of a DBA was not intended to be covered by the Regulations, and was to be left to their professional

regulators. In addition, if there is a dispute about a solicitor's "costs", the client is entitled to have those costs assessed by the court under section 70 of the Solicitors Act 1974. There were, therefore, consumer protection measures already in place.

43. I would hold, therefore, that time costs as such are outside the scope of the Regulations, except where they are brought in as an additional requirement of a DBA in exercise of the power under section 58AA (4) (c).
44. I recognise that this conclusion means that the current Regulations do not deal with a lawyer's remuneration in the event that the client pursues a case to trial and loses. But that, in my judgment, is a matter that could be provided for in Regulations under section 58AA (4)(c). In other words, it could be a requirement of a DBA that it was part of an overall contract of retainer which either precluded (or limited) a lawyer from charging fees if the claim were lost.
45. In the light of my conclusion, I consider that clause 6.2 of the contract of retainer was outside the scope of the Regulations, and that its presence in the contract of retainer did not invalidate the contract.
46. I would therefore dismiss the appeal.

#### **Other points**

47. Mr Bacon raised a number of other points on behalf of the Bar Council. They included (a) whether, if clause 6.2 fell foul of regulation 4 the whole contract of retainer was invalidated and (b) whether, if clause 6.2 would otherwise fall foul of regulation 4, it could be severed so as to validate the contract.
48. The judge decided the first of these points against Lexlaw; and Lexlaw has not challenged that conclusion by Respondent's Notice. Since the Bar Council has been given permission to intervene in what is a dispute between the parties to the appeal, I do not consider that it is open to us to consider that question on this appeal, tempting as it might be.
49. Similarly, the question of severance was not one that was directly raised by the appeal. Although I have touched on the question of severance in explaining the common law background, that is a different point. Once again, I do not consider that we should embark upon a consideration of that point.

#### **Post-script**

50. I have, since writing the above, had the benefit of reading the judgment of Newey LJ in draft. I agree with him that the underlying policy was to arrive at the result that he has reached. The difficulty for me is to find that result in the words of the Regulations as drafted. Regulation 4 (1) prohibits the payment of "an amount to be paid by the client other than" those specified in that regulation. The interpretation that Newey LJ prefers is that that prohibition prohibits the payment of "an amount" other than expenses if the claim is lost; but permits payment of "an amount" other than expenses if the retainer is terminated early. Try as I might, I cannot find that reflected in the text of regulation 4. If, however, I am wrong, then I would agree with Newey LJ that, for the reasons he gives, the appeal should be dismissed.

**Lord Justice Newey:**

51. I agree with Lewison LJ that the appeal should be dismissed, but I have reached that conclusion by a different route.

**Some more history**

52. Lewison LJ has already mentioned that the version of section 58AA of the Courts and Legal Services Act 1990 (“the 1990 Act”) with which we are concerned was introduced to implement a recommendation made in Sir Rupert Jackson’s Final Report and that the Damages-Based Agreements Regulations 2013 (“the 2013 Regulations”) replaced the Damages-Based Agreements Regulations 2010 (“the 2010 Regulations”). For my own part, I find it helpful to consider the history of the current legislation further.

53. Provision for the regulation of DBAs was first introduced by section 154 of the Coroners and Justice Act 2009, which inserted a new section 58AA into the 1990 Act. This version of section 58AA was limited to DBAs relating to employment matters, but was otherwise in much the same terms as the version quoted in paragraph 11 above. It stated:

“(1) A damages-based agreement which relates to an employment matter and satisfies the conditions in subsection (4) is not unenforceable by reason only of its being a damages-based agreement.

(2) But a damages-based agreement which relates to an employment matter and does not satisfy those conditions is unenforceable.

(3) For the purposes of this section—

(a) a damages-based agreement is an agreement between a person providing advocacy services, litigation services or claims management services and the recipient of those services which provides that—

(i) the recipient is to make a payment to the person providing the services if the recipient obtains a specified financial benefit in connection with the matter in relation to which the services are provided, and

(ii) the amount of that payment is to be determined by reference to the amount of the financial benefit obtained;

(b) a damages-based agreement relates to an employment matter if the matter in relation to which the services are provided is a matter that is, or could become, the subject of proceedings before an employment tribunal.

(4) The agreement—

- (a) must be in writing;
- (b) must not provide for a payment above a prescribed amount or for a payment above an amount calculated in a prescribed manner;
- (c) must comply with such other requirements as to its terms and conditions as are prescribed; and
- (d) must be made only after the person providing services under the agreement has provided prescribed information ....”

54. The background to that form of section 58AA can be seen from paragraph 3.2 of chapter 12 of Sir Rupert Jackson’s Final Report. Sir Rupert Jackson there explained:

“The Ministry of Justice (the ‘MoJ’), although not making any submission to the Costs Review, in relation to the contingency fees issue has drawn my attention to its consultation paper ‘Regulating Damages Based Agreements’. In that consultation paper the MoJ notes that contingency fees are permitted in tribunals. It notes that there are concerns about (i) failures to inform claimants about alternative methods of funding their claims and (ii) lack of clarity and understanding of the fee arrangements and the costs which claimants are likely to pay. Accordingly, the Government proposes to introduce regulations to address these issues. The proposed regulations will introduce requirements in respect of the following elements:

- (i) The provision of clear and transparent advice and information provided to consumers, on (a) costs; (b) other expenses (such as VAT, counsel’s fees, expert reports etc); and (c) other methods of funding available.
- (ii) The maximum percentage of the damages that can be recovered in fees from the award.
- (iii) Controlling the use of unfair terms and conditions (such as penalty and settlement clauses).

Following that consultation paper, section 154 of the Coroners and Justice Act 2009 (which received Royal Assent on 12th November 2009) (the ‘2009 Act’) allows for the regulation of damages-based agreements relating to employment matters only. ‘Damages-based agreement’ is the term used in the 2009 Act to refer to an agreement for contingency fees, as defined in paragraph 1.1 above.”

55. The 2010 Regulations were made pursuant to the new section 58AA of the 1990 Act. They provided:

“Citation, commencement, interpretation and application

1.— ...

(2) In these Regulations—

...

‘costs’ means the total of the representative’s time reasonably spent, in respect of the claim or proceedings, multiplied by the reasonable hourly rate of remuneration of the representative;

‘damages-based agreement’ means a damages-based agreement which relates to an employment matter;

‘expenses’ means disbursements incurred by the representative, including counsel’s fees and the expense of obtaining an expert’s report;

‘payment’ means a part of the sum recovered in respect of the claim or damages awarded that the client agrees to pay the representative and excludes expenses;

‘representative’ means the person providing the advocacy services, litigation services or claims management services to which the damages-based agreement relates.

...

#### Requirements of an agreement

2. The requirements prescribed for the purposes of section 58AA(4)(c) of the Act are that the terms and conditions of a damages-based agreement must specify—

(a) the claim or proceedings or parts of them to which the agreement relates;

(b) the circumstances in which the representative’s payment, expenses and costs, or part of them, are payable; and

(c) the reason for setting the amount of the payment at the level agreed, including having regard to, where appropriate, whether the claim or proceedings is one of several similar claims or proceedings.

#### Information to be given before an agreement is made

3.—(1) The information prescribed for the purposes of section 58AA(4)(d) of the Act is—

(a) information, to be provided to the client in writing, about the matters in paragraph (2); and

(b) such further explanation, advice or other information about any of those matters as the client may request.

(2) Those matters are—

(a) the circumstances in which the client may seek a review of the costs and expenses of the representative and the procedure for doing so;

(b) the dispute resolution service provided by the Advisory, Conciliation and Arbitration Service (ACAS) in regard to actual and potential claims;

(c) whether other methods of pursuing the claim or financing the proceedings, including—

(i) advice under the Community Legal Service,

(ii) legal expenses insurance,

(iii) pro bono representation, or

(iv) trade union representation,

are available, and, if so, how they apply to the client and the claim or proceedings in question;

(d) the point at which expenses become payable; and

(e) a reasonable estimate of the amount that is likely to be spent upon expenses, inclusive of VAT.

...

The payment

5. The amount prescribed for the purposes of section 58AA(4)(b) of the Act is the amount which, including VAT, is equal to 35% of the sum ultimately recovered by the client in the claim or proceedings.

Terms and conditions of termination

6.—(1) The additional requirements prescribed for the purposes of section 58AA(4)(c) of the Act are that the terms and conditions of a damages-based agreement must be in accordance with paragraphs (2), (3) and (4).

(2) If the agreement is terminated, the representative may not charge the client more than the representative's costs and expenses for the work undertaken in respect of the client's claim or proceedings.

(3) The client may not terminate the agreement—

(a) after settlement has been agreed; or

(b) within seven days before the start of the tribunal hearing.

(4) The representative may not terminate the agreement and charge costs unless the client has behaved or is behaving unreasonably.

(5) Paragraphs (3) and (4) are without prejudice to any right of either party under the general law of contract to terminate the agreement.”

56. When the House of Lords was invited to approve the 2010 Regulations on 25 March 2010, the Minister speaking to them, Lord Bach, said:

“A damages-based agreement is a type of contingency or ‘no win, no fee’ agreement, under which a representative agrees to act for a client in return for a percentage of any damages recovered by the client. If damages are not awarded, the representative is not paid. These agreements are of course different from conditional fee agreements, or CFAs. CFAs are typically used in court proceedings, and allow for an uplift or success fee on top of the representative’s normal fee.

I emphasise that damages-based agreements are not permitted in court proceedings or litigation and that the regulations will not change this. They are, however, commonly used by solicitors and claims managers in proceedings before the employment tribunal. The Courts and Legal Services Act 1990, as amended, controls the use of damages-based agreements to claims that are capable of being heard by the employment tribunal....”

57. In his Final Report, Sir Rupert Jackson recommended that lawyers should be permitted to enter into “contingency fee agreements” with their clients in relation to civil litigation. “Contingency fee” was defined in the glossary as “A lawyer’s fee calculated as a percentage of monies recovered, with no fee payable if the client loses”. Sir Rupert Jackson said this about contingency fees in the executive summary:

“3.2 Contingency fees (chapter 12). A contingency fee agreement may be described as one under which the client’s lawyer is only paid if his or her client’s claim is successful, and then the lawyer is paid out of the settlement sum or damages awarded, usually as a percentage of that amount. Lawyers are not presently permitted to act on a contingency fee basis in ‘contentious’ business.

3.3 It is my recommendation that lawyers should be able to enter into contingency fee agreements with clients for contentious business, provided that:

- the unsuccessful party in the proceedings, if ordered to pay the successful party's costs, is only required to pay an amount for costs reflecting what would be a conventional amount, with any difference to be borne by the successful party; and
- the terms on which contingency fee agreements may be entered into are regulated, to safeguard the interests of clients.

Permitting the use of contingency fee agreements increases the types of litigation funding available to litigants, which should thereby increase access to justice....”

Sir Rupert Jackson explained in paragraph 4.1 of chapter 12 that he had concluded that “both solicitors and counsel should be permitted to enter into contingency fee agreements with their clients on the Ontario model”. He also, however, considered that such arrangements should be “properly regulated”. He said in paragraph 4.6 of chapter 12:

“The three matters identified by the MoJ in its consultation paper CP 10/9 are the principal matters which will require regulation. In my view the regulations which the MoJ is planning to introduce in respect of contingency fees in tribunal proceedings should be suitably adapted for the purpose of court proceedings. The regulations should (i) introduce a requirement that clear and transparent advice and information be provided to consumers on costs, other expenses and other methods of funding available; (ii) provide a maximum percentage of the damages that can be recovered in fees from the award; and (iii) control the use of unfair terms and conditions.”

58. Section 58AA was subsequently amended, as Lewison LJ has said, by section 45 of the Legal Aid, Sentencing and Punishment of Offenders Act 2012. The explanatory notes in respect of this Act explained in paragraph 29 that Part 2 of the Act, which includes section 45, “contains provisions to implement reforms to the existing arrangements for civil litigation funding and costs as recommended by Lord Justice Jackson ... in his *Review of Civil Litigation Costs: Final Report*”. This was said about section 45 specifically:

“288. Damages-based agreements (‘DBAs’) are another type of ‘no win, no fee’ agreement under which a lawyer can recover a percentage of the client’s damages if the case is won, but will receive nothing if the case is lost. Currently, solicitors and barristers are not permitted to act under DBAs in civil litigation, but solicitors are permitted to act under DBAs in

non-contentious business, including cases before employment tribunals.

289. Section 45 amends section 58AA of the Courts and Legal Services Act 1990 (inserted by section 154 of the Coroners and Justice Act 2009), which currently provides that DBAs are enforceable only when they relate to employment matters. The effect of the amendments is to enable the use of DBAs in most civil litigation by persons providing advocacy services, litigation services or claims management services.”

59. The 2013 Regulations were made pursuant to section 58AA in the following year. The explanatory note appended to the 2013 Regulations stated:

“DBAs are a type of ‘no win, no fee’ agreement under which a representative ... can recover an agreed percentage of a client’s damages if the case is won (‘the payment’), but will receive nothing if the case is lost.”

60. When the House of Lords considered the 2013 Regulations in Grand Committee on 26 February 2013, the Minister speaking to them, Lord McNally, said:

“Regulation 4 sets the cap as I have outlined. Regulations 5, 6, 7 and 8 replicate the provisions from the 2010 regulations for employment matters. These detailed provisions in relation to information and other matters are necessary because employment matters may be undertaken by non-lawyers such as claims managers. On the other hand, civil litigation can be undertaken only by qualified legal representatives, who are subject to regulation by their professional bodies and whose conduct may be subject to challenge through those bodies. It is therefore considered that further regulation at this stage is not required” and

“On why DBA regulations do not contain requirements on termination for civil litigation, as in employment cases, the DBA regulations of 2010 made provisions for employment cases which can be taken forward by non-lawyers. Detailed safeguards need to be built in as a result. Civil litigation can be conducted only by lawyers, who are subject to their own professional regulations.”

61. A working group of the Civil Justice Council considered DBAs in a report published in August 2015. The working group had been asked to make recommendations to the Government on whether the 2013 Regulations could be made more effective by some improvements, including “clarifying that different forms of litigation funding cannot take place at the same time, although they could do so at different stages of a case”. The working group addressed drafting issues in respect of “hybrid” DBAs in section 8, which opened with this explanation of “The issue”:

“Under one form of ‘hybrid DBA’, a law firm receives concurrent funding via both a DBA and via some other form of retainer (e.g., discounted hourly rates), in the event of the claim’s success; and receives the discounted hourly rate fees in the event of the claim’s failure. This ‘concurrent hybrid DBA’ represents a scenario that the Government has indicated that it wishes to avoid. On the other hand, sequential forms of funding, where a DBA comprises one or other of those methods of funding for different stages of the legal proceedings, do not offend the Government’s policy on co-funding. This is called a ‘sequential hybrid DBA’ in this section, for the sake of clarity.

The distinction between the two types of hybrid DBAs arises directly from terms of reference ... , and in particular, from the query as to whether the 2015 DBA Regulations could benefit from ‘clarifying that different forms of funding cannot take place at the same time, although they could do so at different stages of a case’. This term of reference raises various points of interest and uncertainty, to do with the drafting of a lawful and enforceable ‘sequential hybrid DBA’.

It must be emphasised that this section focuses upon the types of arrangements in which a DBA, plus some other form of retainer, may be feasible, at least as the drafting of the 2015 DBA Regulations stands, in order to facilitate the sequential hybrid DBA. Whether concurrent hybrid DBAs should be permitted (contrary to the Government’s current stance) is a policy matter, and is dealt with in Section 21 of the Report.”

The report went on:

“The DBA must state ‘the claim or proceedings, or parts of them, to which the agreement relates’, per Reg 3(2)(a). By virtue of this provision, a DBA could feasibly relate to one stage only of the proceedings — whilst presumably an hourly rate retainer could apply to other stages or parts of the proceedings. Hence, a permissible type of ‘hybrid DBA’ is where the claim is successful, and the solicitor is paid for its ‘base costs’ (or the WIP incurred in conducting the case) up to a particular stage of the proceedings; and thereafter, the solicitor can be paid a percentage of damages recovered. It is a consecutive or sequential form of funding, which does not raise the same policy concerns as do concurrent forms of funding. The Working Group understands that the Government considers that it is not unreasonable for a solicitor to use one form of funding for one stage of the proceedings (i.e., to investigate the merits of the case, or to obtain expert reports), and then proceeding to another form of funding (i.e., a DBA, as the only form of funding) for the next stages of the claim.”

Section 8 of the report concluded with, among others, this recommendation:

“Although the prospect of sequential hybrid DBAs is allowed by the drafting of Reg 3(2)(a) of the 2015 DBA Regulations, the Working Group considered that the Regulations should define what a ‘part’ of the claim or proceedings could entail (e.g., whether the ‘part’ can be a reference to a time period, or a legal task, or an issue, or a claim or counterclaim).”

62. The working group considered policy issues relating to concurrent hybrid DBAs in section 21 of its report. It concluded in paragraph 21.1:

“The Working Group was divided on the question of concurrent hybrid DBAs, with some members considering that there was no good reason to prohibit their use, and that market freedom should prevail; whilst other members considered that the case in favour of concurrent hybrid DBAs had not been proven. It concluded that it was a policy decision which was ultimately one for the Government. However, the Government should be encouraged to evaluate the arguments in favour of concurrent hybrid DBAs, even in the absence of any cadre of cases which have tested the arguments (given the nervousness of the legal marketplace on this issue).”

### **What is a DBA?**

63. As Lewison LJ has explained, he considers that there are good reasons for taking the view that “if a contract of retainer contains a provision which entitles a lawyer to a charge of recoveries; but also contains other provisions which provide for payment on a different basis, or other terms which do not deal with payment at all, only those provisions in the contract of retainer which deal with payment out of recoveries amount to the DBA” and that that view is reflected in the 2013 Regulations. While recognising that this means that the 2013 Regulations “do not deal with a lawyer’s remuneration in the event that the client pursues a case to trial and loses”, he has concluded that “time costs as such are outside the scope of the Regulations, except where they are brought in as an additional requirement of a DBA in exercise of the power under section 58AA (4) (c)”.
64. The implication, as I understand it, is that neither “sequential hybrid DBAs” nor “concurrent hybrid DBAs” (in the language of the Civil Justice Council’s working group) are at present barred. There is nothing to prevent a solicitor agreeing with his client that he will receive up to 50% of the sums ultimately recovered if the claim succeeds and be paid his full time costs if the claim fails. In fact, it would seem to be the case that a retainer could provide for a solicitor to become entitled to *both* half of recoveries *and* full time costs in the event of the claim succeeding.
65. My own view, with respect, is that this construction of the legislation is neither consistent with its history nor borne out by its terms.
66. In the first place, “damages-based agreement” is defined in section 58AA of the 1990 Act as “an agreement ... which provides that (i) the recipient is to make a payment to the person providing the services if the recipient obtains a specified financial benefit in connection with the matter in relation to which the services are provided, and (ii)

the amount of that payment is to be determined by reference to the amount of the financial benefit obtained". On the face of it, that description extends to any agreement under which a solicitor can become entitled to a share of recoveries and, in particular, encompasses an agreement which also provides for the solicitor to be paid on a different basis. An agreement under which a solicitor was to take a percentage of recoveries in the event of success and be remunerated on a time basis if the claim were lost would thus, on the face of it, be a "damages-based agreement" in its entirety.

67. Secondly, there are multiple indications that section 58AA and the successive versions of the Damages-Based Agreements Regulations were intended to provide for a regime under which payment would depend on success. When, for example, Lord Bach spoke to the 2010 Regulations on 25 March 2010, he described a "damages-based agreement" as "a type of contingency or 'no win, no fee' agreement" under which "If damages are not awarded, the representative is not paid". Again, the amendments to section 58AA which were effected by the Legal Aid, Sentencing and Punishment of Offenders Act 2012 were intended "to implement reforms ... as recommended by Lord Justice Jackson" and what Sir Rupert Jackson had proposed was that lawyers should be able to enter into "contingency fee agreements", i.e. agreements under which (as Sir Rupert explained) "the client's lawyer is only paid if his or her client's claim is successful" and "no fee is payable if the client loses". That was the aim as confirmed by the explanatory note stating that DBAs "are a type of 'no win, no fee' agreement under which a representative ... can recover an agreed percentage of a client's damages if the case is won ('the payment'), but will receive nothing if the case is lost". If "damages-based agreement" is interpreted as outlined in the previous paragraph, the legislation will have achieved the objective: having regard to regulations 4 and 7 of the 2013 Regulations, a solicitor or other representative who has opted for a DBA will not in general be entitled to any payment absent recoveries. In contrast, Lewison LJ's construction of "damages-based agreement" would leave a solicitor or other representative free to stipulate for payment even where the claim had failed.
68. Thirdly, the successive versions of the legislation were plainly intended to cap the share of recoveries that a representative could take in fees. Sir Rupert Jackson's Final Report noted that what became the 2010 Regulations would introduce requirements in respect of the "maximum percentage of the damages that can be recovered in fees from the award" and proposed that, if lawyers were permitted to use contingency fees, regulations should "provide a maximum percentage of the damages that can be recovered in fees from the award". Yet, as I have said, Lewison LJ's approach would appear to me to leave a representative free to require a "payment" equal to a share of recoveries under the DBA on top of time costs pursuant to a separate agreement, and that would be so even though the DBA and the "separate agreement" were contained in a single document.
69. A fourth, and related, point relates to "concurrent hybrid DBAs", to which, on the basis of Lewison LJ's approach, there can be no objection. While "concurrent hybrid DBAs" certainly have supporters, it would be surprising if the legislation had been meant to authorise them without additional safeguards. It might, for instance, have been thought appropriate to insist that time should be charged at a reduced hourly rate

or otherwise to impose limits on the extent to which a representative could become entitled to time costs as well as a share of recoveries.

70. Fifthly, the terms of the 2013 Regulations do not seem to me to show that a DBA is limited to the provisions in a contract of retainer dealing with payment out of recoveries, as is Lewison LJ's view. The expression "damages-based agreement" was, of course, defined in the version of section 58AA of the 1990 Act which the Coroners and Justice Act 2009 introduced into the 1990 Act rather than in the Damages-Based Agreements Regulations which have subsequently been made pursuant to section 58AA. In any case:

- i) As I read the 2013 Regulations, regulation 4 is indeed concerned with circumstances in which recoveries have been made, but in the sense that, termination apart, a representative is to receive nothing unless there have been recoveries. Regulation 8 qualifies that principle rather than indicating that regulation 4 is not intended to limit a representative's ability to charge "costs";
- ii) It is true that regulation 3 speaks of the "circumstances in which the representative's payment, expenses and costs, or part of them, are payable", but the reference to "costs" is not redundant on any construction since regulation 8 allows a representative to charge "costs". While, moreover, regulation 3 is not limited to employment matters, the wording has been carried over from the 2010 Regulations, which were;
- iii) The fact that regulation 3 envisages that a DBA may apply only to "parts" of proceedings may be thought to sanction "sequential hybrid DBAs", as the Civil Justice Council working group noted in section 8 of its report, but does not seem to me to lend any support to the idea that "concurrent hybrid DBAs" are permissible, as Lewison LJ's approach would imply;
- iv) I do not myself read anything significant into the fact that regulations 3 and 8 were made pursuant to section 58AA(4)(c). Although it does not say so, regulation 4 must at least in part be the product of an exercise of section 58AA(4)(b); and
- v) The policy documents which Lewison LJ mentions in paragraph 41 above appear to me to bear on the extent to which the 2013 Regulations control termination provisions, not on the meaning of "damages-based agreement".

### **Termination**

71. While I respectfully part company from Lewison LJ on what a DBA is, I none the less agree that the appeal should be dismissed. In my view, regulation 4 of the 2013 Regulations does not bite on termination provisions and, accordingly, clause 6.2 of Lexlaw's agreement with Mrs Zuberi does not fall foul of the 2013 Regulations.

72. My reasons are as follows:

- i) As I read the 2010 Regulations, regulation 6 shows that regulation 5 was not intended to apply where a DBA was terminated early. It is apparent from regulation 6(2), limiting the amount that a representative could charge on

termination to “costs and expenses for the work undertaken”, that, regulation 5 notwithstanding, it was proper for a DBA to provide for a representative to charge time costs on termination regardless of what, if anything, the client might ultimately recover from the claim;

- ii) Regulations 5 and 6 of the 2010 Regulations have now been replaced by regulations 7 and 8 of the 2013 Regulations, but the latter provisions must operate in the same way as the former formerly did. Just as regulation 5 of the 2010 Regulations cannot have been meant to extend to early termination, nor can regulation 7 of the 2013 Regulations have been intended so to extend;
- iii) Regulations 4 and 7 of the 2013 Regulations perform similar functions in relation to, respectively, “employment matters” and “claims or proceedings other than an employment matter”. In particular, regulation 4(3), capping payment at an amount equal to 50% of recoveries, mirrors regulation 7, save that regulation 7 fixes the cap at 35% of recoveries rather than 50%. That suggests that, like regulation 7, regulation 4 should be seen as having no application to termination provisions;
- iv) That that is the correct interpretation is confirmed by what was said about the 2013 Regulations. Lord McNally explained to the House of Lords on 26 February 2013 that the detailed provisions found in, among others, regulation 8 of the 2013 Regulations were “necessary because employment matters may be undertaken by non-lawyers”, whereas “civil litigation can be undertaken only by qualified legal representatives, who are subject to regulation by their professional bodies and whose conduct may be subject to challenge through those bodies” so that it “was considered that further regulation at this stage is not required”. Lord McNally said, too, that “DBA regulations do not contain requirements on termination for civil litigation, as in employment cases” because “employment cases ... can be taken forward by non-lawyers”, while “Civil litigation can be conducted only by lawyers, who are subject to their own professional regulations”. The same thinking emerges from paragraphs 7.4 and 7.5 of the explanatory memorandum in respect of the 2013 Regulations, which Lewison LJ has set out in paragraph 41 above: it was “not considered necessary to adapt the provisions in the 2010 regulations which deal with termination” because “Only qualified legal representatives, who are subject to regulation by their professional bodies and whose conduct may be subject to challenge through those bodies, will undertake civil litigation (i.e. contentious business)”;
- v) Mr Davies argued that Lord McNally “appears to have been seriously mistaken about how much protection the principles of professional conduct of either branch of the profession offer the lay client”. However that may be, though, both Lord McNally’s comments and the explanatory memorandum indicate that there was not thought to be a need to regulate termination other than in employment matters. As Mr Snell said in his skeleton argument:

“the legislature ... felt it necessary to regulate the extent of the costs and expenses that could be charged by those conducting employment tribunal proceedings *as an additional requirement* to the other matters regulated in respect of DBAs in an

employment tribunal context. There are no additional requirements in respect of civil proceedings; i.e. termination fees in a civil litigation are not regulated by the [2013 Regulations]”.

73. In short, I agree with Mr Snell that the 2013 Regulations “do not regulate, and are not intended to regulate, fees payable to legal representatives in the event of an early termination of the DBA”.

**Lord Justice Coulson:**

74. I agree with my Lords that the appeal in this case should be dismissed. Because their reasoning is different, and because nobody can pretend that these Regulations represent the draftsman’s finest hour, it is appropriate if I add a few words to explain my own approach to the issues.
75. Clause 6 of the agreement comprises an unobjectionable series of provisions relating to termination. The provisions themselves are clear and comprehensive. They are neither unlawful nor champertous. Accordingly, the burden is on the appellant to explain how and why these clear provisions, into which she freely entered, should be set aside. It is not, as Mr Davies sought to persuade us, for the respondent to demonstrate the contrary.
76. The appellant seeks to rely on section 58AA of the Act and Regulation 4. In my view, for three separate reasons, neither avail the appellant.
77. First, I agree with my Lord, Lord Justice Lewison, that the term “damages-based agreement” should be given a narrow meaning. It is the agreement between the parties relating to the payment as defined in the Regulations, namely that “part of the sum recovered in respect of the claim or damages awarded that the client agrees to pay the representative”. Other elements of the agreement between the solicitor and the client, such as at which of the solicitors’ offices the work will be done, or the level of expenses incurred (which is expressly excluded from the payment as defined) or, as in this case, the termination provisions, have nothing to do with the payment as defined in the Regulations, and are therefore not part of the DBA itself.
78. Secondly, however, if that were too narrow an interpretation, I remain of the view that neither section 58AA of the Act, nor Regulation 4, affect the operation of an early termination provision such as clause 6. They do not address termination at all. I therefore expressly agree with the approach set out by Lord Justice Newey at paragraph 72 above.
79. In this context, both before the judge, and again on appeal, Mr Davies made much of Regulation 8, which deals with termination provisions in an employment matter. This Regulation imposes particular restrictions on the nature of such provisions. But in my judgment, that is a point against the appellant. The inclusion of Regulation 8, imposing particular restrictions on early termination provisions in employment disputes, demonstrates that termination provisions are, in themselves, entirely lawful. It is simply that, for the reasons explained by Lord McNally in the House of Lords on 26 February 2013 (paragraph 72 iv) above), it was felt important to have particular restrictions on such clauses in employment disputes.

80. The fact that the Regulations do not prohibit or limit termination provisions for general civil litigation is not an inadvertent omission. On the contrary, as can be seen from the Explanatory Memorandum, it is the result of a deliberate decision. Parliament shied away from imposing any restrictions on termination provisions generally because it acknowledged that, in such cases, lawyers would be involved and therefore would be subjected to the regulatory provisions of their own professional bodies.
81. Thus, taken as a whole, I consider that the Regulations can only be construed on the basis that:
- (a) They expressly assume that termination provisions such as Clause 6 may be included in the terms of the retainer between the legal representative and the client;
- (b) No restriction on (much less prohibition of) such provisions was required by Parliament because, if it was necessary, regulation would be carried out by the relevant professional body.
- Accordingly, there can be no basis now for suggesting that the Regulations render clause 6 unlawful: on the contrary, I consider that they establish its validity.
82. Thirdly, I am confident that the same result is achieved by consideration of the detail of the Regulations themselves. As I have said, the ‘payment’ is narrowly defined. Regulation 3 (b) expressly draws a distinction between the payment on the one hand, and the representative’s “expenses and costs” on the other. Thus, an entitlement to expenses and costs can, by agreement, be dealt with separately and can be maintained on termination. That is what happened here.
83. Regulation 4(1) is a particular provision designed to incorporate what is known as the Ontario Model. It is solely concerned with the calculation of the final payment, as defined. It has nothing to do with what might be recoverable if the retainer was terminated early. Regulation 4(3) is a cap on the total amount of the payment and again is not concerned with expenses and costs.
84. Thus, the highest that it can be put by the appellant is that Regulation 4(1) could be read as saying that a damages-based agreement must not require any amount to be paid by the client other than the payment itself, and expenses, whatever circumstances may eventuate. So, if the narrow view of a damages-based agreement is not accepted, then, on that literal reading, Regulation 4(1) would, for example, prevent the legal representative from recovering any of its own costs, whatever the retainer actually said, even if the client terminated the agreement without cause after two years of work by the lawyer. That would not only be a commercial nonsense, but it would be contrary to the statutory purpose of section 58AA, which was designed to encourage the use of DBAs, not make them commercial suicide for the lawyer. It would also be contrary to Regulation 3, contrary to the assumptions made about termination provisions to which I have already referred, and render Regulation 8 redundant. I therefore reject that interpretation of Regulation 4(1).
85. Accordingly, for these reasons, I conclude that clause 6 was not unlawful and I agree that this appeal should be dismissed.

## **Lord Justice Lewison:**

### **Introduction**

1. On 20 July 2014 and 7 August 2014 Mr Puri signed two cheques, each drawn on the account of IPC Dubai at a Dubai branch of Habib Bank, in favour of Lenkor Dubai. The face value of the cheques was AED 208,500,200 (about US\$ 55 million). When Lenkor Dubai attempted to present the cheques, there were insufficient funds in the accounts to meet them. They were not, therefore, honoured. By virtue of Article 599/2 of the Dubai Commercial Transactions Law a cheque may not be issued unless the drawer has, at the time of drawing the cheque, sufficient funds to meet it. Further, by the same law, a person who draws the cheque is deemed to be personally liable for the amount of the cheque. Following dishonour of the cheques, Lenkor Dubai brought proceedings against Mr Puri in Dubai. Those proceedings resulted in a judgment against him personally in Dubai in the sum of AED 123,272,048 plus interest at 9 per cent. Lenkor now seeks to enforce that judgment against him in England.
2. Mr Puri resists the application on the ground that to enforce the Dubai judgment would be contrary to public policy. His reason for saying so is that the underlying transaction, which was the context in which he signed the cheque, was tainted by illegality. That argument failed both before Master Davidson and before Murray J. The judge's judgment is at [2020] EWHC 1432 (QB), [2021] 1 Lloyd's Rep 47.
3. It is, I think, common ground that the legal framework is encapsulated in Rules 42 and 51 as set out in Dicey, Morris & Collins on The Conflict of Laws (15th ed). Rule 42 is the basic rule, namely that a final and conclusive foreign judgment for a debt or definite sum of money given by a court of competent jurisdiction may be enforced by a claim in England, unless it is impeachable on grounds set out in later Rules. Rule 51 is:

“A foreign judgment is impeachable on the ground that the enforcement or, as the case may be, recognition, would be contrary to public policy.”
4. It is that rule on which Mr Puri relies. In order to explain his reliance, it is necessary to explain the factual background. I do so adopting the very clear narrative of the judgment below.

### **Factual background**

5. Mr Puri is a businessman active in the energy sector. At the relevant times, he was the sole owner, principal, and controller of IP Commodities Dubai (“IPC Dubai”), a company incorporated in Dubai. He is a British citizen.
6. Lenkor Energy Trading DMCC (“Lenkor Dubai”) is a company incorporated in Dubai, with a sister company named Lenkor Energy Trading Ltd (“Lenkor Hong Kong”), a company incorporated in Hong Kong. Both companies operate in the oil supply and energy trading industry. The moving spirit behind each is Mr Atiyeh.

7. On 4 June 2014 IPC Dubai, Lenkor Hong Kong and a third company, incorporated in Pakistan (“the Buyer”), entered into a tripartite agreement (“the Tripartite Agreement”), governed by English law. Under the Tripartite Agreement, Lenkor Hong Kong agreed to supply gasoil to the Buyer. The “Seller” under the Tripartite Agreement is defined as “Lenkor Energy Trading Limited/through IP Commodities DMCC”. The Tripartite Agreement provided for there to be six cargoes of gasoil for delivery ex-ship at the FOTCO Jetty, Port Qasim, Karachi, the deliveries to be made at monthly intervals, with the first delivery to occur during the period 5-7 July 2014 and the last during the period 1-5 December 2014, for a total quantity of 200,000 metric tonnes, plus or minus 10 per cent. Clause 15 of the Tripartite Agreement dealt with payment. In relation to each cargo the Buyer would arrange to effect payment in US Dollars (USD), with half of the cargo value to be paid under a letter of credit and the other half by telegraphic transfer. Before the first delivery, the parties agreed to vary the payment terms to dispense with the requirement for a letter of credit and to provide that payment would be made by the Buyer to IPC Dubai as nominee of Lenkor Hong Kong.
8. Clause 15(C) of the Tripartite Agreement provided that IPC Dubai would, in respect of each cargo to be delivered:

“issue a payment guarantee for hundred percent of the cargo value by cheque in favour of [Lenkor Dubai], that is acceptable to the Seller, 3 days before the vessel commences loading.”
9. It was pursuant to this obligation imposed on IPC Dubai that Mr Puri signed the two cheques.
10. The Buyer understood, and was intended by Lenkor Hong Kong and by IPC Dubai to understand, that it would be supplied under the Tripartite Agreement with a type of gasoil known as “High Speed Diesel” (“HSD”), sourced from the United Arab Emirates, although the Tripartite Agreement did not stipulate that the gasoil to be supplied was HSD, other than in the heading of the document, and did not stipulate the origin of the gasoil to be supplied. Instead, it stipulated a specification, which was a specification for HSD in Pakistan.
11. In fact, Lenkor Hong Kong intended to supply, and did supply, a different but similar type of petroleum product known as “Heavy End Product” (“HEP”), sourced from Iran, with the intention of deceiving the Buyer and the Pakistani authorities into accepting each cargo as a delivery of HSD from the UAE. IPC Dubai, and Mr Puri personally, were privy to the deception at the time of entry into the Tripartite Agreement.
12. For entry into Pakistan, it was necessary for the HEP delivered by Lenkor Hong Kong to meet the Pakistan government-approved specification for imported HSD, which was known as the “PSO import specification”, PSO being an acronym for the Pakistan State Oil Co Ltd. Apparently, despite being a different product, it was technically possible for HEP to meet the PSO import specification for HSD, which in July and August 2014 was more stringent than the specification for locally manufactured HSD.
13. At the time of entry into the Tripartite Agreement, Lenkor Hong Kong and its principal, Mr Atiyeh, as well as IPC Dubai and Mr Puri, believed that it was lawful,

both under international sanctions law and under Pakistan law, to supply gasoil from Iran into Pakistan and to make and receive payment for it in US Dollars. They believed, however, that disclosure of the nature and origin of the gasoil would, or could, lead to the Buyer requiring a discount to the price and to practical problems with the Pakistani authorities in relation to the import of the HEP. They were also concerned that there might be difficulties with the HEP meeting the PSO import specification.

14. Mr Atiyeh took various steps to conceal the origin and nature of the product he was intending to supply under the Tripartite Agreement, including, in relation to the first cargo, altering and falsifying shipping documents, falsifying loadport test results and forging a certificate of origin, stating that the cargo origin was Hamriyah in the UAE. Mr Atiyeh hoped and expected that he would be lucky, and that each cargo would pass the PSO import specification or, if not, that IPC Dubai and Mr Puri would arrange for the cargo to be accepted into Pakistan, even if not in compliance with the PSO import specification.
15. The vessel with the first cargo arrived at Port Qasim on 3 July 2014. The falsified shipping documents and falsified loadport test results were provided to the Buyer and the Pakistan customs authorities. The goods declaration for the cargo given to the Pakistan authorities described the cargo as HSD.
16. Although there were some difficulties with the initial test results for the first delivery and re-testing was ordered and carried out, ultimately the Pakistan authorities accepted the cargo for import and gave customs clearance on 19 July 2014.
17. On or about 22 July 2014 Lenkor Hong Kong issued commercial invoices for the first cargo, one in US Dollars addressed to the Buyer in the amount of US\$23,158,159.50 and one in UAE Dirhams (AED) addressed to IPC Dubai. The commercial invoices were issued for the actual quantity delivered and falsely described the product origin as the UAE.
18. The vessel with the second cargo to be delivered under the Tripartite Agreement arrived at Port Qasim on 12 August 2014. As with the first cargo, Mr Atiyeh had falsified shipping documents and loadport test results with the intention of deceiving the Buyer and the Pakistan authorities. On this occasion he also travelled to Karachi and procured the falsification of the ullage reports. The goods declaration for the cargo given to the Pakistan customs authorities described the cargo as HSD.
19. Following testing, the second cargo was accepted for import by the Pakistan authorities and customs clearance was given, shortly after 14 August 2014.
20. On or about 19 August 2014 Lenkor Hong Kong issued commercial invoices for the second cargo, one in US Dollars addressed to the Buyer in the amount of US\$31,988,620.00 and one in UAE Dirhams addressed to IPC Dubai in the amount of AED 117,398,235.40, which was the equivalent of the US Dollar amount in UAE Dirhams at an exchange rate of 3.6700 AED per US\$1.00.
21. At some point before 18 August 2014, shortly after the second cargo had been given customs clearance and accepted for delivery by the Buyer, the Buyer's Bank, Summit Bank, learned that the vessel that had delivered the first and second cargo had called

at Iran. Summit Bank called for a meeting with the Buyer, which took place on 18 August 2014 with representatives of the Buyer as well as Mr Puri and Mr Atiyeh in attendance. At the meeting Summit Bank said that the vessel had called at Iran and that it would not make any further payments in US Dollars for either cargo without a Certificate of Origin certified by the Chamber of Commerce in the UAE. That led to a change in the payment arrangements. Lenkor Hong Kong reached an oral agreement, at or about the end of August 2014, with the Buyer and IPC Dubai that the Buyer would pay IPC Dubai in Pakistan Rupees (PKR).

22. Initially without informing Lenkor Hong Kong, the Buyer and Mr Puri agreed that the Buyer would make payments in PKR to a sister company of IPC Dubai in Pakistan, namely, IP Commodities Pakistan Ltd ("IPC Pakistan"), a company controlled by Mr Puri's son, Mohammed. IPC Pakistan would receive the PKR payments into an account in Pakistan. In so doing, it would be acting as nominee for IPC Dubai, which would in turn be acting as nominee for Lenkor Hong Kong. Lenkor Hong Kong was unaware of this arrangement until 4 December 2014. Mr Puri's reason for arranging with the Buyer for the PKR payments to be made to a local account of IPC Pakistan was to give him the opportunity to deny (as he subsequently did) that IPC Dubai was liable to account for those sums to Lenkor Hong Kong.
23. After the Buyer had received delivery of the first cargo, it decided to delay payment and pay only in instalments when or after it had on-sold equivalent quantities of HSD and been paid for them, even though it had no contractual right to do so.
24. Under the payment provisions of the Tripartite Agreement, as varied, the Buyer made part-payment amounting to approximately US\$35 million, consisting of:
  - i) payments in US Dollars to IPC Dubai, as nominee for Lenkor Hong Kong, in three tranches on 7, 8 and 13 August 2014, amounting, in aggregate, to US\$4,008,900; and
  - ii) payments in PKR to an account in Pakistan of IPC Pakistan, as nominee for IPC Dubai, on various dates between 22 September 2014 and 9 January 2015, amounting, in aggregate, to PKR 3,196,855,717 (approximately equivalent to US\$31 million).
25. The Buyer made no further payments in respect of either of the cargoes. IPC Dubai has never accounted to Lenkor Hong for any of the monies received by it as nominee for Lenkor Hong Kong, either directly from the Buyer in US Dollars or by payment to its own nominee, IPC Pakistan, in PKR. The upshot is that IPC Dubai has received (either by itself or by its nominee) substantial payments in respect of the oil.
26. Under Clause 15(C) of the Tripartite Agreement, IPC Dubai issued two cheques to Lenkor Dubai as follows:
  - i) in respect of the first cargo, cheque number 156861, dated 20 July 2014, in the amount of AED 91,400,200; and
  - ii) in respect of the second cargo, cheque number 156862, dated 7 August 2014 in the amount of AED 117,100,000.

27. The total face amount of the two cheques was therefore AED 208,500,200, which was the equivalent of about US\$55 million, according to the Particulars of Claim. Each cheque was payable to Lenkor Dubai, was signed by Mr Puri and was drawn on IPC Dubai's account at a Dubai branch of Habib Bank Ltd.
28. Although Lenkor Dubai had received cheques from IPC Dubai in relation to the first and second cargoes, by the second half of September 2014 Mr Atiyeh was agitated that Lenkor Hong Kong had delivered two cargoes and had not received payment for them. Correspondence ensued between Lenkor Hong Kong and the Buyer during which Lenkor Hong Kong attempted to persuade the Buyer to stop making payments to IPC Dubai (being unaware of the role of IPC Pakistan until 4 December 2014) and to make payments directly to Lenkor Hong Kong. The Buyer, having consulted with Mr Puri, refused. Lawyers became involved during the course of December 2014.
29. On 9 January 2015 Lenkor Hong Kong's solicitors applied for and obtained from the Commercial Court a worldwide freezing order against IPC Dubai. In his first affidavit in support of the application for the order, Mr Atiyeh disclosed the true origin and nature of the cargoes and of his deceptions, including the falsification of documents. Shortly after this, the Buyer learned of the contents of Mr Atiyeh's affidavit, stopped all payments in relation to the two cargoes delivered by Lenkor Hong Kong and refused to make any further payments.

### **The arbitration**

30. The dispute between Lenkor and the Buyer went to arbitration. We have been provided with a redacted copy of the award which preserves the confidentiality of the Buyer's identity. The arbitrator (Mr Steven Berry QC) considered the buyer's defence to Lenkor's claim for the contract price, applying the principles laid down by the Supreme Court in *Patel v Mirza* [2016] UKSC 42, [2017] AC 467. He was satisfied that Lenkor had entered into the Tripartite Agreement with the intention of committing illegal acts; and committed them in the course of performing the contract. He then discussed the various policy considerations both for and against enforcement of the contract. He came to the conclusion that it would be proportionate to deny a claim against the Buyer in contract which contained a profit element; but that it would be disproportionate to deny a claim to reverse unjust enrichment. Accordingly, he held that Lenkor Hong Kong had a valid claim for the balance of the value of the two cargoes delivered, after deduction of the amounts that the Buyer had paid in respect of the two cargoes to IPC Dubai in US Dollars and to IPC Pakistan in Pakistan Rupees. The balance due from the Buyer to Lenkor Hong Kong was therefore US\$19,101,284.44.
31. The arbitrator went on to consider Lenkor's claims against IPC Dubai for the amounts that the latter had received on account of the cargos. In essence he held that IPC Dubai was liable to account to Lenkor for the amounts that had been paid to it or on its behalf. He further held that IPC Dubai had forfeited any right to commission because of its knowledge of Lenkor's illegal conduct. IPC Dubai was therefore liable to repay to Lenkor the entirety of the sums it had received. The basis of liability was either a contractual liability under the agency agreement; or was itself based on unjust enrichment. He did not find that the agency agreement between IPC Dubai and Lenkor Hong Kong was unenforceable for illegality.

32. In the course of his consideration of those claims, he also discussed the status of the guarantee cheques. He held that Lenkor was not obliged to return those cheques, but that any amount recovered on the cheques by Lenkor Dubai would be held for the benefit of Lenkor “and would, as between Lenkor and IPC Dubai, be receipt by it for the account of Lenkor”. Accordingly, any sums recovered by reason of any liability on the cheques or any judgment on the cheques were to be credited against the liability of IPC Dubai as awarded in the arbitration.

### **The Dubai proceedings**

33. Lenkor Dubai then attempted to cash the two cheques that it had received from IPC Dubai under Clause 15(C) of the Tripartite Agreement. IPC Dubai did not have sufficient funds in its account to honour them and they were not honoured.
34. Consequently, Lenkor Dubai commenced civil proceedings against Mr Puri under Article 599/2 of the Dubai Commercial Transactions Law, a statutory provision that imposes personal liability on the drawer of a cheque in circumstances where the account on which the cheque is intended to draw has insufficient funds to cover the amount due under the cheque. On 30 May 2017 the Dubai court issued its judgment in favour of Lenkor Dubai for the amount of AED 123,727,048 (approximately UD\$33.5 million) plus interest at 9 per cent per annum. That judgment was subject to various appeals, reaching the highest court, the Dubai Court of Cassation, on two occasions, where it was ultimately upheld on 5 August 2018. Mr Puri's appeal rights in Dubai are now exhausted.
35. Although the reasoning of the Dubai court on this point is obscure, it is important to note that the Dubai court did not order Mr Puri to pay the full face amount of the two cheques, which was AED 208,500,200. The Dubai court ordered that Mr Puri pay AED 123,272,048, which was the total amount found by the court to have been received by Mr Puri and IPC Dubai. In other words, Mr Puri was found liable for the sums which the Buyer had actually paid over to IPC Dubai; but which had not been remitted onwards to Lenkor Hong Kong.

### **The English proceedings**

36. Lenkor Dubai then began proceedings in this jurisdiction, seeking to enforce the Dubai judgment at common law. Mr Puri advanced a number of defences to that application of which only one remains live. The live defence is that the judgment of the Dubai court was tainted by the illegality of the Tripartite Agreement, so as to make it unenforceable as a matter of public policy under English law.
37. Both the Master and the judge rejected that defence.
38. The essential argument which Mr Cooper QC advances on Mr Puri's behalf is that it is contrary to public policy to permit the indirect enforcement (via a guarantee) of a contractual obligation that is illegal. As a matter of English law, a guarantee is unenforceable if the underlying transaction is tainted with illegality so as to be unenforceable. In support of that proposition, he relies on *Garrard v James* [1925] Ch 616, *Heald v O'Connor* [1971] 1 WLR 497 and *Azimut-Benetti SpA v Healey* [2010] EWHC 2234 (Comm). In this case the cheques signed by Mr Puri were signed in order to guarantee performance of the Buyer's payment obligation; and that obligation

has been held to be unenforceable because of illegality. The English court retains a discretion to inquire into the illegality of the underlying transaction: *Westacre Investments Inc v Jugoimport SPDR Holding Co Ltd* [2000] QB 311. The judge was wrong not to have undertaken that inquiry. If he had, he would (or ought to have) concluded that public policy precluded enforcement of the Dubai judgment. The only evidence relied upon by Mr Puri in support of this defence is the arbitrator's award. Thus the case of illegality advanced by Mr Puri rests solely on the arbitrator's findings.

## Conclusions

39. I agree with both the Master and the judge (for the reasons that they gave) that the defence fails. Accordingly, I can state my view shortly. As Mummery LJ said in *Re Portsmouth City Football Club Ltd, Neumans LLP (a firm) v Andronikou* [2013] EWCA Civ 916, [2013] Bus LR 1152, at [38]:

“If the judgment in the court below is correct, this court can legitimately adopt and affirm it without any obligation to say the same things over again in different words. The losing party will be told exactly why the appeal was dismissed: there was nothing wrong with the decision appealed or the reasons for it.”

40. First, this is not a question of enforcing a contract. It is a question of enforcing a judgment given by a foreign court of competent jurisdiction. The two are not the same: *Omnium de Traitement et de Valorisation SA v Hilmarton Ltd* [1999] 2 Lloyd's Rep 222, 224. There are sound justifications for taking a different approach to substantive claims and enforcement claims, reflecting the different role performed by the court in each circumstance: *RBRG Trading (UK) Ltd v Sinocore International Co Ltd* [2018] EWCA Civ 838, [2018] 2 Lloyd's Rep 133 [26] (3). The judgment of a foreign court of competent jurisdiction creates an obligation to pay the judgment sum enforceable in this jurisdiction as a debt, irrespective of the underlying cause of action: *Williams v Jones* (1845) 13 M & W 628, 633; *Adams v Cape Industries plc* [1990] 1 Ch 433, 513. It is common ground that the Dubai court was such a court. Second, Mr Puri's underlying liability is not a contractual liability (nor could it be since he was not a party to the Tripartite Agreement). Nor is it a claim on the guarantee. Mr Puri gave no guarantee; and IPC Dubai is not sued on the guarantee. The only relevant contract in place between Lenkor Hong Kong and IPC Dubai was the separate agency contract. That contract was not found by the arbitrator to be illegal or unenforceable. Nor is it even a claim on the cheque as a negotiable instrument. Such a claim could only have been brought against IPC Dubai. What Mr Puri did was to draw a cheque on a Dubai account held at a Dubai bank, which has particular legal consequences in Dubai for him personally. As both the Master and the judge put it, that liability is independent of the underlying transaction. There is no suggestion that the public policy which arises under the law of Dubai precludes the enforcement of the statutory cause of action. As the judge said, if that point was to be taken, it should have been taken in Dubai. Third, Lenkor Hong Kong's underlying claim against IPC Dubai is not a contractual claim under the Tripartite Agreement either. It is a claim either in unjust enrichment, or under a separate agency agreement. IPC Dubai collected money as Lenkor Hong Kong's nominee. It agreed to and ought to have paid that money over to Lenkor Hong Kong, and has failed to do so. Lenkor Hong Kong makes no claim against Mr Puri. Lenkor Dubai's claim against Mr Puri is

a claim based on a particular statutory liability under the law of Dubai, in support of Lenkor Hong Kong's underlying claim against IPC Dubai in restitution for unjust enrichment or under the agency agreement. Fourth, the quantum of the judgment was neither the same as the contract price, nor the same as the face value of the cheque. It is directly reflective of the amount that was actually paid to IPC Dubai or its sister companies "for the account" of Lenkor Hong Kong. Put another way, whereas a guarantee (properly so-called) would have required IPC Dubai to pay what the Buyer was obliged to pay but had *failed* to pay, the judgment sum corresponded to what the Buyer *had in fact* paid. Thus, even if one "looks through" the form of claim against Mr Puri, the underlying claim is still a long way from an attempt to enforce an illegal contract, let alone the Buyer's payment obligation. There is therefore only a slight degree of connection between the claim sought to be enforced and the relevant illegality. The degree of connection between the claim and the illegality must also be balanced against the strong public policy in favour of finality, and in favour of enforceability: *RBRG Trading (UK) Ltd v Sinocore International Co Ltd* [25] (4), 26 (4). Fifth, applying the principles in *Patel v Mirza*, the arbitrator decided that it would be unjust for IPC Dubai (and those acting on its behalf) to retain the funds that it had actually received on account of cargo actually delivered. It would be equally unjust for Mr Puri to retain the economic benefit of those funds. In *Patel v Mirza* itself the ultimate conclusion of the Supreme Court is encapsulated in the following statement by Lord Toulson at [121]:

"A claimant, such as Mr Patel, who satisfies the ordinary requirements of a claim for unjust enrichment, should not be debarred from enforcing his claim by reason only of the fact that the money which he seeks to recover was paid for an unlawful purpose. There may be rare cases where for some particular reason the enforcement of such a claim might be regarded as undermining the integrity of the justice system, but there are no such circumstances in this case."

41. Even those of their Lordships who were in a minority as regards the correct approach to the question of illegality agreed with that proposition: Lord Neuberger at [146], Lord Mance at [203], Lord Clarke at [210] and Lord Sumption at [250]. I do not consider that Mr Puri has identified any circumstances which would make this case one of those "rare cases". All that he relies on is the illegality of the Tripartite Agreement. Sixth, if the terms of IPC Dubai's guarantee obligation are relevant (and I do not think that they are), the guarantee required cheques to secure the "value" of the cargo: not the price. The value of the cargo is precisely what the arbitrator awarded Lenkor Hong Kong; and the judgment of the Dubai court is limited to the amount that IPC Dubai (or its sister company) actually received for the account of Lenkor Hong Kong.

42. As the judge correctly said at [96]:

"There are, however, several reasons for saying that enforcement of the Dubai FIC judgment does not amount, in legal substance, to enforcement of any of Lenkor Hong Kong's claims for (i) part of the contract price under the Tripartite Agreement, (ii) restitution from the Buyer or (iii) restitution from IPC Dubai. First, it is trite law that the mere fact that two

transactions have an equivalent economic effect is not sufficient to establish that they are, in legal substance, the same transaction or that one can, without more, be recharacterized as the latter. Secondly, the parties are different. IPC Dubai is the payment guarantor under the Tripartite Agreement, and Lenkor Hong Kong the beneficiary of that payment guarantee. Mr Puri is liable as judgment debtor under the Dubai FIC judgment, and Lenkor Dubai is the judgment creditor. Thirdly, IPC Dubai's liability under the payment guarantee in Clause 15(C) is contractual, whereas Mr Puri's liability under Article 599/2 of the Dubai Commercial Transactions Law is statutory. Other distinctions could be drawn, but these are sufficient to illustrate the point.”

**Result**

43. I would dismiss the appeal.

**Lord Justice Arnold:**

44. I agree.

**Lord Justice Edis:**

45. I also agree.

**LORD LEGGATT: (with whom Lord Reed, Lady Arden, Lord Sales and Lord Burrows agree)**

**A. INTRODUCTION**

1. Mr Richard Lloyd - with financial backing from Therium Litigation Funding IC, a commercial litigation funder - has issued a claim against Google LLC, alleging breach of its duties as a data controller under section 4(4) of the Data Protection Act 1998 (“the DPA 1998”). The claim alleges that, for several months in late 2011 and early 2012, Google secretly tracked the internet activity of millions of Apple iPhone users and used the data collected in this way for commercial purposes without the users’ knowledge or consent.

2. The factual allegation is not new. In August 2012, Google agreed to pay a civil penalty of US\$22.5m to settle charges brought by the United States Federal Trade Commission based upon the allegation. In November 2013, Google agreed to pay US\$17m to settle consumer-based actions brought against it in the United States. In England and Wales, three individuals sued Google in June 2013 making the same allegation and claiming compensation under the DPA 1998 and at common law for misuse of private information: see *Vidal-Hall v Google Inc (Information Comr intervening)* [2015] EWCA Civ 311; [2016] QB 1003. Following a dispute over jurisdiction, their claims were settled before Google had served a defence. What is new about the present action is that Mr Lloyd is not just claiming damages in his own right, as the three claimants did in *Vidal-Hall*. He claims to represent everyone resident in England and Wales who owned an Apple iPhone at the relevant time and whose data were obtained by Google without their consent, and to be entitled to recover damages on behalf of all these people. It is estimated that they number more than 4m.

3. Class actions, in which a single person is permitted to bring a claim and obtain redress on behalf of a class of people who have been affected in a similar way by alleged wrongdoing, have long been possible in the United States and, more recently, in Canada and Australia. Whether legislation to establish a class action regime should be enacted in the UK has been much discussed. In 2009, the Government rejected a recommendation from the Civil Justice Council to introduce a generic class action regime applicable to all types of claim, preferring a “sector based approach”. This was for two reasons:

“Firstly, there are potential structural differences between the sectors which will require different consideration. ... Secondly, it will be necessary to undertake a full assessment

of the likely economic and other impacts before implementing any reform.”

See the Government’s Response to the Civil Justice Council’s Report: “Improving Access to Justice through Collective Actions” (2008), paras 12-13.

4. Since then, the only sector for which such a regime has so far been enacted is that of competition law. Parliament has not legislated to establish a class action regime in the field of data protection.

5. Mr Lloyd has sought to overcome this difficulty by what the Court of Appeal in this case described as “an unusual and innovative use of the representative procedure” in rule 19.6 of the Civil Procedure Rules: see [2019] EWCA Civ 1599; [2020] QB 747, para 7. This is a procedure of very long standing in England and Wales whereby a claim can be brought by (or against) one or more persons as representatives of others who have “the same interest” in the claim. Mr Lloyd accepts that he could not use this procedure to claim compensation on behalf of other iPhone users if the compensation recoverable by each user would have to be individually assessed. But he contends that such individual assessment is unnecessary. He argues that, as a matter of law, compensation can be awarded under the DPA 1998 for “loss of control” of personal data without the need to prove that the claimant suffered any financial loss or mental distress as a result of the breach. Mr Lloyd further argues that a “uniform sum” of damages can properly be awarded in relation to each person whose data protection rights have been infringed without the need to investigate any circumstances particular to their individual case. The amount of damages recoverable per person would be a matter for argument, but a figure of £750 was advanced in a letter of claim. Multiplied by the number of people whom Mr Lloyd claims to represent, this would produce an award of damages of the order of £3 billion.

6. Because Google is a Delaware corporation, the claimant needs the court’s permission to serve the claim form on Google outside the jurisdiction. The application for permission has been contested by Google on the grounds that the claim has no real prospect of success as: (1) damages cannot be awarded under the DPA 1998 for “loss of control” of data without proof that it caused financial damage or distress; and (2) the claim in any event is not suitable to proceed as a representative action. In the High Court Warby J decided both issues in Google’s favour and therefore refused permission to serve the proceedings on Google: see [2018] EWHC 2599 (QB); [2019] 1 WLR 1265. The Court of Appeal reversed that decision, for reasons given in a judgment of the Chancellor, Sir Geoffrey Vos, with which Davis LJ and Dame Victoria Sharp agreed: [2019] EWCA Civ 1599; [2020] QB 747.

7. On this further appeal, because of the potential ramifications of the issues raised, as well as hearing the claimant and Google, the court has received written and oral submissions from the Information Commissioner and written submissions from five further interested parties.

8. In this judgment I will first summarise the facts alleged and the relevant legal framework for data protection before considering the different methods currently available in English procedural law for claiming collective redress and, in particular, the representative procedure which the claimant is seeking to use. Whether that procedure is capable of being used in this case critically depends, as the claimant accepts, on whether compensation for the alleged breaches of data protection law would need to be individually assessed. I will then consider the claimant's arguments that individual assessment is unnecessary. For the reasons given in detail below, those arguments cannot in my view withstand scrutiny. In order to recover compensation under the DPA 1998 for any given individual, it would be necessary to show both that Google made some unlawful use of personal data relating to that individual and that the individual suffered some damage as a result. The claimant's attempt to recover compensation under the Act without proving either matter in any individual case is therefore doomed to fail.

## **B. FACTUAL BACKGROUND**

9. The relevant events took place between 9 August 2011 and 15 February 2012 and involved the alleged use by Google of what has been called the "Safari workaround" to bypass privacy settings on Apple iPhones.

10. Safari is an internet browser developed by Apple and installed on its iPhones. At the relevant time, unlike most other internet browsers, all relevant versions of Safari were set by default to block third party cookies. A "cookie" is a small block of data that is placed on a device when the user visits a website. A "third party cookie" is a cookie placed on the device not by the website visited by the user but by a third party whose content is included on that website. Third party cookies are often used to gather information about internet use, and in particular web pages visited over time, to enable the delivery to the user of advertisements tailored to interests inferred from the user's browsing history.

11. Google had a cookie known as the "DoubleClick Ad cookie" which could operate as a third party cookie. It would be placed on a device if the user visited a website that included DoubleClick Ad content. The DoubleClick Ad cookie enabled Google to identify visits by the device to any website displaying an advertisement from its vast

advertising network and to collect considerable amounts of information. It could tell the date and time of any visit to a given website, how long the user spent there, which pages were visited for how long, and what advertisements were viewed for how long. In some cases, by means of the IP address of the browser, the user's approximate geographical location could be identified.

12. Although the default settings for Safari blocked all third party cookies, a blanket application of these settings would have prevented the use of certain popular web functions; so Apple devised some exceptions to them. These exceptions were in place until March 2012, when the system was changed. But in the meantime the exceptions made it possible for Google to devise and implement the Safari workaround. Its effect was to place the DoubleClick Ad cookie on an Apple device, without the user's knowledge or consent, immediately, whenever the user visited a website that contained DoubleClick Ad content.

13. It is alleged that, in this way, Google was able to collect or infer information relating not only to users' internet surfing habits and location, but also about such diverse factors as their interests and pastimes, race or ethnicity, social class, political or religious beliefs or affiliations, health, sexual interests, age, gender and financial situation.

14. Further, it is said that Google aggregated browser generated information from users displaying similar patterns, creating groups with labels such as "football lovers", or "current affairs enthusiasts". Google's DoubleClick service then offered these group labels to subscribing advertisers to choose from when selecting the type of people at whom they wanted to target their advertisements.

## **C. THE LEGAL FRAMEWORK**

15. The DPA 1998 was enacted to implement Parliament and Council Directive 95/46/EC of 24 October 1995 "on the protection of individuals with regard to the processing of personal data and on the free movement of such data" (OJ 1995 L281, p 31) (the "Data Protection Directive"). The Data Protection Directive has been superseded by the General Data Protection Regulation, which became law in the UK in May 2018, supplemented by the Data Protection Act 2018 ("the DPA 2018"). The DPA 2018 repealed and replaced the DPA 1998 except in relation to acts or omissions which occurred before it came into force.

16. Because the acts and omissions giving rise to the present claim occurred in 2011 and 2012, the claim is governed by the old law contained in the DPA 1998 and the Data Protection Directive. The parties and interveners in their submissions on this appeal nevertheless made frequent references to provisions of the General Data Protection Regulation and the DPA 2018. In principle, the meaning and effect of the DPA 1998 and the Data Protection Directive cannot be affected by legislation which has been enacted subsequently. The later legislation therefore cannot help to resolve the issues raised on this appeal, and I shall leave it to one side.

### **(1) The scheme of the DPA 1998**

17. Section 4(4) of the DPA 1998 imposed a duty on a data controller to comply with “the data protection principles” set out in Schedule 1 “in relation to all personal data with respect to which he is the data controller”. As defined in section 1(1) of the Act, “personal data” are, in effect, all recorded information which relate to an identifiable individual. An individual who is the subject of personal data is referred to as the “data subject”. A “data controller” is a person who (either alone or with others) “determines the purposes for which and the manner in which any personal data are, or are to be, processed.” The term “processing” is defined very broadly to mean “obtaining, recording or holding the information or data or carrying out any operation or set of operations on the information or data ...”. Section 2 of the Act establishes a category of “sensitive personal data” consisting of information about certain specified matters, which include the racial or ethnic origin, political opinions, religious beliefs, physical or mental health or sexual life of the data subject.

18. The first of the eight “data protection principles” set out in Schedule 1 is

that: “Personal data shall be processed fairly and lawfully and, in particular, shall not be processed unless -

- (a) at least one of the conditions in Schedule 2 is met, and
- (b) in the case of sensitive personal data, at least one of the conditions in Schedule 3 is also met.”

The other seven data protection principles, in summary, require personal data: (2) to be obtained and processed only for specified and lawful purposes; (3) to

be “adequate, relevant, and not excessive” in relation to those purposes; (4) to be accurate and,

where necessary, kept up to date; (5) not to be kept for longer than is necessary for those purposes; (6) to be processed in accordance with the rights of data subjects under the Act; (7) to be protected by appropriate technical and organisational security measures against unauthorised or unlawful processing and against accidental loss or destruction or damage; and (8) not to be transferred outside the European Economic Area unless the destination country or territory provides an adequate level of protection for data subjects in relation to the processing of personal data.

19. As discussed in more detail below, section 13 of the DPA 1998 gives an individual who suffers damage “by reason of any contravention by a data controller of any of the requirements of this Act” a right to compensation from the data controller for that damage.

## **(2) The allegations of breach of duty**

20. The claimant, Mr Lloyd, contends that Google processed personal data of each member of the represented class in breach of the first, second and seventh data protection principles. The represented class consists in essence of everyone in England and Wales who at the relevant time had an Apple iPhone on which Google’s DoubleClick Ad cookie was placed through the Safari workaround. (The precise definition of the class is set out at para 19 of Warby J’s judgment.) Two principal allegations made are that, in breach of the first data protection principle, (i) the data obtained by placing the DoubleClick Ad cookie on each class member’s device were not processed fairly and (ii) none of the conditions in Schedule 2 (or 3) was met.

21. Schedule 1, Part II, paragraph 2, provides, in substance, that personal data obtained from the data subject are not to be treated as processed fairly unless the data controller informs the data subject of the purpose for which the data are intended to be processed - a requirement with which it is said that Google failed to comply in this case.

22. Schedule 2 contains a list of conditions capable of justifying the processing of data. To comply with the first data protection principle, at least one of these conditions must be satisfied. The first condition in Schedule 2 is that “the data subject has given his consent to the processing”. Other conditions are that the processing is necessary for (amongst other things): the performance of a contract to which the data subject is a party; or compliance with a legal obligation (other than a contractual obligation) of the data controller; or to protect the vital interests of the data subject; or for the exercise of any functions of a public nature exercised in the public interest by any person. The claimant asserts that the members of the represented class whose

personal data Google processed had not given their consent to the processing, nor was any of the other conditions capable of justifying the processing met. Hence for this reason too Google was in breach of the first data protection principle.

23. There is no doubt that the claimant is entitled to advance a claim against Google on this basis in his own right which has a real prospect of success. The issue is whether he can also do so on behalf of all other iPhone users who fall within the represented class. This depends on the scope of the representative procedure available under the Civil Procedure Rules ("CPR"). Before I come to that procedure, I will mention in order to compare them the two other methods of claiming collective redress currently available in English procedural law.

## **D. COLLECTIVE REDRESS IN ENGLISH LAW**

### **(1) Group Actions**

24. A group of people who wish to bring claims which give rise to common or related issues of fact or law can apply to the court for a Group Litigation Order to be made under CPR rule 19.11, providing for the claims to be managed together, usually by a single designated judge. The Group Litigation Order will establish a register of the claims included in the group, which is maintained by the claimants' lead solicitor. The order may also make provision for how the litigation costs are to be shared among the claimants. How the claims are managed is a matter for the designated judge, but procedures typically used are to select one or more claims to be tried as test claims while the remaining claims are stayed and to decide as preliminary issues common issues of law or fact which are potentially dispositive of the litigation. Unless the court orders otherwise, a judgment given or order made in the litigation is binding on all the claimants included in the group register: see CPR rule 19.12(1)(a).

25. Where the individual claims are of sufficiently high value, group actions can be an effective way of enabling what are typically several hundred or thousands of claims to be litigated and managed together, avoiding duplication of the court's resources and allowing the claimants to benefit from sharing costs and litigation risk and by obtaining a single judgment which is binding in relation to all their claims. However, the group action procedure suffers from the drawback that it is an "opt-in" regime: in other words, claimants must take active steps to join the group. This has an administrative cost, as a solicitor conducting the litigation has to obtain sufficient information from a potential claimant to determine whether he or she is eligible to be added to the group register, give appropriate advice and enter into a retainer with the client. For claims which individually are only worth a few hundred pounds, this process

is not economic as the initial costs alone may easily exceed the potential value of the claim.

26. Another limitation of opt-in proceedings is that experience has shown that only a relatively small proportion of those eligible to join the group are likely to do so, particularly if the number of people affected is large and the value of each individual claim relatively small. For example, a group action was recently brought against the Morrisons supermarket chain for compensation for breach of the DPA 1998 arising from the disclosure on the internet by a Morrisons' employee of personal data relating to other employees. Of around 100,000 affected employees, fewer than 10,000 opted to join the group action: see *Various Claimants v Wm Morrisons Supermarkets plc* [2017] EWHC 3113 (QB); [2019] QB 772 (reversed on the issue of vicarious liability by the Supreme Court: [2020] UKSC 12; [2020] AC 989). During the period of more than 12 years in which collective proceedings under the Competition Act 1998 (discussed below) could be brought only on an opt-in basis just one action was commenced, based on a finding of price fixing in the sale of replica football shirts. Although around 1.2 – 1.5m people were affected, despite widespread publicity only 130 people opted into the proceedings: see *The Consumers' Association v JJB Sports Plc* [2009] CAT 2, para 5; Civil Justice Council Report "Improving Access to Justice through Collective Actions" (2008), Part 6, para 22; and Grave D, McIntosh M and Rowan G (eds), *Class Actions in England and Wales*, 1st ed (2018), para 1-068.

27. Likely explanations for the low participation rates typically experienced in opt-in regimes include lack of awareness of the opportunity to join the litigation and the natural human tendency to do nothing when faced with a choice which requires positive action - particularly if there is no immediate benefit to be gained and the consequences are uncertain and not easy to understand: see eg Thaler R and Sunstein C, *Nudge: The Final Edition* (2021), pp 36-38; Samuelson W and Zeckhauser R, "Status Quo Bias in Decision Making" (1988) 1 *Journal of Risk and Uncertainty* 7-59. As the New Zealand Court of Appeal has recently said of opt-in class actions:

"Whichever approach is adopted, many class members are likely to fail to take any positive action for a range of reasons that have nothing at all to do with an assessment of whether or not it is in their interests to participate in the proceedings. Some class members will not receive the relevant notice.

Others will not understand the notice, or will have difficulty understanding what action they are required to take and completing any relevant form, or will be unsure

or hesitant about what to do and will do nothing. Even where a class member considers that it is in their interests to participate in

the proceedings, the significance of inertia in human affairs should not be underestimated.”

*Ross v Southern Response Earthquake Services Ltd* [2019] NZCA 431, para 98; approved by the New Zealand Supreme Court at [2020] NZSC 126, para 40.

28. A further factor which makes group litigation impractical in cases where the loss suffered by each individual is small, even if in aggregate it may amount to a very large sum of money, is the need to prove the quantum of loss in each individual case. Not only are eligible individuals less likely to opt into the proceedings where the potential gain to them is small, but the costs of obtaining evidence from each individual to support their claim is again likely to make group litigation uneconomic in such cases.

## **(2) Collective Proceedings**

29. Compared to group actions, the method of collective redress which is now available in the field of competition law offers significant advantages for claimants, particularly where many people have been affected by the defendant's conduct but the value of each individual claim is small. Section 47B of the Competition Act 1998 (added by the Enterprise Act 2002 and as amended by the Consumer Rights Act 2015) makes provision for bringing “collective proceedings” in the Competition Appeal Tribunal (“CAT”) combining two or more claims to which section 47A applies (essentially, claims in respect of an infringement or alleged infringement of competition law). Such proceedings must be commenced by a person who proposes to be the representative of a specified class of persons, and the proceedings may only be continued if they are certified by the CAT as satisfying criteria set out in section 47B and in the CAT Rules. Two features of this regime may be noted.

30. First, unlike group litigation, collective proceedings may be brought on either an “opt-in” or “opt-out” basis. “Opt-out” collective proceedings are proceedings brought on behalf of each class member except any member who opts out by notifying the class representative that their claim should not be included in the proceedings: see section 47B(11). Where “opt-out” collective proceedings are permitted, a person may therefore have a claim brought on their behalf without taking any affirmative step and, potentially, without even knowing of the existence of the proceedings and the fact that he or she is represented in them.

31. A second significant feature of the collective proceedings regime is that it enables liability to be established and damages recovered without the need

to prove

that members of the class have individually suffered loss: it is sufficient to show that loss has been suffered by the class viewed as a whole. This is the effect of section 47C(2) of the Competition Act, which provides:

“The tribunal may make an award of damages in collective proceedings without undertaking an assessment of the amount of damages recoverable in respect of the claim of each represented person.”

Such an award of damages is referred to in the CAT Rules as “an aggregate award of damages”: see rule 73(2).

32. As Lord Briggs explained in *Merricks v Mastercard* [2020] UKSC 51; [2021] Bus LR25, at para 76, section 47C(2) of the Competition Act “radically alters the established common law compensatory principle by removing the requirement to assess individual loss”. This is so for the purposes both of making and of paying out an aggregate award of damages. How an aggregate award of damages is distributed among the members of the class is subject to the control of the CAT and, as this court held in *Merricks v Mastercard*, the only requirement is that the distribution should be just: see paras 76- 77, 149. No doubt in many cases a just method of distribution will be one which divides up an aggregate award of damages in a way which takes account of individual loss. But particularly where the size of the class is large and the amount of damages awarded small considered on a per capita basis, it may be impractical or disproportionate to adopt such a method. In such cases some other method of distribution, such as an equal division among all the members of the class, may be justified.

### **(3) Representative Actions**

33. Collective proceedings are a recent phenomenon in English law. By contrast, the representative procedure which the claimant is seeking to use in this case has existed for several hundred years. The current version of the representative rule is CPR rule 19.6, which states:

“(1) Where more than one person has the same interest in a claim -

(a) the claim may be begun; or

(b) the court may order that the claim be continued,

by or against one or more of the persons who have the same interest as representatives of any other persons who have that interest.

(2) The court may direct that a person may not act as a representative.

(3) Any party may apply to the court for an order under paragraph (2).

(4) Unless the court otherwise directs any judgment or order given in a claim in which a party is acting as a representative under this rule -

(a) is binding on all persons represented in the claim; but

(b) may only be enforced by or against a person who is not a party to the claim with the permission of the court.”

**(a) Origins of the rule**

34. This rule has its origins in the procedure of the Court of Chancery before the Judicature Act of 1873. The general rule was that all persons materially interested in the subject-matter of a suit should be made parties to it, either as claimants or defendants, so as to ensure that the rights of all persons interested were settled by a single judgment of the court: see eg *Adair v New River Co* (1805) 11 Ves Jr 429; 32 ER 1153; *Cockburn v Thompson* (1809) 16 Ves Jr 321; 33 ER 1005. However, to join all interested persons as parties was not always practically convenient - particularly if they were very numerous. The solution devised was not to abandon the aim of settling the rights of all interested persons in a single proceeding; rather, it was to relax the “complete joinder rule” by allowing one or more claimants or defendants to represent all others who had the same interest as them: see Sorabji J, “The hidden class action in English civil procedure” (2009) 28 CJQ 498. All persons represented in this way, as well as the parties actually before the court, were bound by the court’s decision.

35. In the very early cases in the 16th and 17th centuries in which this procedure was adopted, the persons represented were invariably a cohesive communal group, such as parishioners or manorial tenants, whose members had agreed to be represented; and the representatives were often required to show proof of their authority to represent the group. But as the nature of society changed and new, more impersonal institutions such as friendly societies and joint stock companies with multiple investors emerged, this requirement was dropped. The court allowed persons to be represented whether or not they had consented to such representation or even knew of the action, relying on community of interest among the members of the group to ensure that the interests of all were adequately protected: see Yeazell, "From Group Litigation to Class Action, Part I: The Industrialization of Group Litigation" (1980) 27 UCLA Law Review 514.

36. Many of the formative cases involved joint stock companies at a time (before the Joint Stock Companies Acts 1844 to 1858) when such companies were not yet recognised as separate legal entities which could sue or be sued. An action had therefore to be brought by (or against) the members themselves. In *Chancey v May* (1722) Precedents in Chancery 592; 24 ER 265, the treasurer and manager of a brass-works brought an action on behalf of themselves and all other proprietors of the undertaking, of whom there were 800 in total, except for the defendants, who were its former managers, to call the defendants to account for alleged mismanagement and embezzlement. The defendants objected that the claim should not be allowed to proceed as the rest of the proprietors had not been made parties. The court dismissed that objection on the grounds that, first, the action had been brought on behalf of all the other proprietors, so that "all the rest were in effect parties", and secondly:

"Because it would be impracticable to make them all parties by name, and there would be continual abatements by death and otherwise, and no coming at justice, if all were to be made parties."

37. Another notable case involving a joint stock company was *Meux v Maltby* (1818) 2 Swanston 277; 36 ER 621. In this case the treasurer and directors of the company were sued as representative defendants on a contract made on behalf of all the members of the company to grant a lease. In rejecting an argument that the claim was defective because not all the proprietors were before the court, Plumer MR explained, at pp 281-282:

"The general rule, which requires the plaintiff to bring before the court all the parties interested in the subject in question, admits of exceptions. The liberality of this court has long held

that there is of necessity an exception to the general rule, when a failure of justice would ensue from its enforcement.”

After citing numerous authorities, he concluded, at p 284:

“Here is a current of authority, adopting more or less a general principle of exception, by which the rule, that all persons interested must be parties, yields when justice requires it, in the instance either of plaintiffs or defendants.

... It is quite clear that the present suit has sufficient parties, and that the defendants may be considered as representing the company.”

38. In *Duke of Bedford v Ellis* [1901] AC 1, 8, Lord Macnaghten summarised the practice of the Court of Chancery in this way:

“The old rule in the Court of Chancery was very simple and perfectly well understood. Under the old practice the Court required the presence of all parties interested in the matter in suit, in order that a final end might be made of the controversy. But when the parties were so numerous that you never could ‘come at justice’, to use an expression in one of the older cases, if everybody interested was made a party, the rule was not allowed to stand in the way. It was originally a rule of convenience: for the sake of convenience it was relaxed. Given a common interest and a common grievance, a representative suit was in order if the relief sought was in its nature beneficial to all whom the plaintiff proposed to represent.”

**(b) Effect of the Judicature Act**

39. By the Supreme Court of Judicature Act 1873, all the jurisdiction previously exercised by the Court of Chancery and the courts of common law was transferred to and vested in the new High Court of Justice. Rules of procedure for the High Court were scheduled to the Act, which included as rule 10:

“Where there are numerous parties having the same

interest in one action, one or more of such parties may  
sue or be

sued, or may be authorised by the court to defend in such action, on behalf or for the benefit of all parties so interested.”

This rule became Order 16, rule 9 of the Rules of the Supreme Court and has remained in force in the same or similar form ever since. Save that the requirement for “numerous parties” has been reduced to “more than one”, there is no significant difference in the current version of the rule, quoted at para 33 above.

40. At first after the enactment of the Judicature Act the courts construed the new rule narrowly. In *Temperton v Russell* [1893] 1 QB 435, 438, Lindley LJ, who gave the judgment of the Court of Appeal, expressed the view that the rule only applied to “persons who have or claim some beneficial proprietary right” which they are asserting or defending in an action that would have come within the jurisdiction of the old Court of Chancery; hence the rule did not apply to a claim for damages in tort. That view, however, was repudiated by the House of Lords in *Duke of Bedford v Ellis* [1901] AC 1. Six individuals sued the Duke of Bedford, who owned Covent Garden Market, on behalf of themselves and all other growers of fruit, flowers, vegetables, roots and herbs, to enforce certain preferential rights claimed under the Covent Garden Market Act 1828 to stands in the market. They sought declarations of the rights of the growers and an injunction to restrain the Duke from acting inconsistently with those rights. They also claimed - though only for themselves and not on behalf of other growers - an account and repayment of sums charged to them for selling at the market in excess of what they would have paid if afforded their alleged preferential rights. The Duke applied to have the action stayed either on the ground that the claimants had no beneficial proprietary right, or on the ground that the joinder in one action of parties claiming separate and different rights under the Act, both personally and as representing a class, would embarrass or delay the trial. The House of Lords rejected both grounds (the first unanimously and the second by a majority of 3 to 2) and held that the action could be maintained.

41. Lord Macnaghten, who gave the leading speech, expressly disapproved the restrictive view of the representative rule expressed in *Temperton v Russell* and confirmed that its purpose was simply to apply the practice of the Court of Chancery to all divisions of the High Court. The only change was therefore that the rule was now applicable in actions which, before the Judicature Act, could only have been brought in a court of common law. He said, at pp 10-11, that:

“... in all other respects I think the rule as to representative suits remains very much as it was a hundred years ago. From the time it was first established it has been recognised as a

simple rule resting merely upon convenience. It is impossible, I think, to read such judgments as those delivered by Lord Eldon in *Adair v New River Co*, in 1805, and in *Cockburn v Thompson*, in 1809, without seeing that Lord Eldon took as broad and liberal a view on this subject as anybody could desire. 'The strict rule', he said, 'was that all persons materially interested in the subject of the suit, however numerous, ought to be parties ... but that being a general rule established for the convenient administration of justice must not be adhered to in cases to which consistently with practical convenience it is incapable of application'. 'It was better', he added, 'to go as far as possible towards justice than to deny it altogether'. He laid out of consideration the case of persons suing on behalf of themselves and all others, 'for in a sense', he said, 'they are before the Court'. As regards defendants, if you cannot make everybody interested a party, you must bring so many that it can be said they will fairly and honestly try the right. I do not think, my Lords, that we have advanced much beyond that in the last hundred years ..."

As Megarry J commented in *John v Rees* [1970] Ch 345, 370, this explanation made it plain that the representative rule is to be treated as being "not a rigid matter of principle but a flexible tool of convenience in the administration of justice".

42. In *Taff Vale Railway Co v Amalgamated Society of Railway Servants* [1901] AC 426, 443, Lord Lindley (as he had become) went out of his way to endorse this view and to retract his earlier observations in *Temperton v Russell*, stating:

"The principle on which the rule is based forbids its restriction to cases for which an exact precedent can be found in the reports. The principle is as applicable to new cases as to old, and ought to be applied to the exigencies of modern life as occasion requires. The rule itself has been embodied and made applicable to the various Divisions of the High Court by the Judicature Act, 1873, sections 16 and 23- 25, and Order XVI, rule 9; and the unfortunate observations made on that rule in *Temperton v Russell* have been happily corrected in this House in the *Duke of Bedford v Ellis* and in the course of the argument in the present case."

(c) **Markt and declarations of rights**

43. The subsequent decision of the Court of Appeal in *Markt & Co Ltd v Knight Steamship Co Ltd* [1910] 2 KB 1021 has sometimes been seen as undermining the broad and flexible view of the representative rule adumbrated by the House of Lords in these two cases by imposing significant constraints on its use: see eg *Esanda Finance Corp Ltd v Carnie* (1992) 29 NSWLR 382, 395; Mulheron R, *The Class Action in Common Law Legal Systems* (2004) pp 78-82; Sorabji J, "The hidden class action in English civil procedure" (2009) 28 CJK 498. I do not think, however, that the decision should be understood in this way. *Markt* was heard together with another action also brought against the owners of a cargo vessel which was intercepted by a Russian cruiser on a voyage to Japan during the Russo-Japanese war, on suspicion of carrying contraband of war, and sunk. Just before the limitation period expired, two cargo-owners issued writs "on behalf of themselves and others owners of cargo lately laden on board" the vessel, claiming "damages for breach of contract and duty in and about the carriage of goods by sea". No further particulars of the claims were given.

44. All three members of the Court of Appeal agreed that the claims as formulated could not be pursued as representative actions as there was no basis for asserting that all the cargo owners had the same interest in the actions. That was so if only because a claim that the shipowners were in breach of duty in carrying contraband goods plainly could not be maintained on behalf of any cargo-owners who had themselves shipped such goods; furthermore, each cargo owner would need to prove their individual loss. Buckley LJ would have allowed the claimants to amend their writs and continue the proceedings on behalf of themselves and all cargo-owners who were not shippers of contraband goods, claiming a declaration that the defendants were in breach of contract and duty in shipping contraband of war. The other judges, however, did not agree to this course. Vaughan Williams LJ, at p 1032, rejected it on the grounds that the proposed amendment had not been brought before the court in a way which gave a proper opportunity for argument and doubted anyway whether the amendment could be so framed as to disclose a common purpose of the shippers or any class of the shippers. Fletcher Moulton LJ, at p 1042, considered that making a declaration of the type suggested would be contrary to the practice of the courts and that subsequent claims by individual cargo-owners relying on such a declaration to recover damages would constitute new claims which would be time-barred, as the limitation period had now expired.

45. The readiness of English courts to give judgments declaring legal rights where it would serve a useful purpose has much increased since 1910. An important step was the decision of the Court of Appeal in *Guaranty Trust Co of New York v Hannay & Co* [1915] 2 KB 536, which held that a declaration can

be granted at the instance of a

claimant even if the claimant has no cause of action against the defendant. Two cases decided together by the Court of Appeal in 1921 showed that there is no reason in principle why a claim for a declaration of the kind suggested by Buckley LJ in *Markt* cannot be brought as a representative action. In *David Jones v Cory Bros & Co Ltd* (1921) 56 LJ 302; 152 LT Jo 70, five individuals sued on their own behalf and on behalf of all other underground and surface workmen employed at the defendant's colliery on three specified days in September 1919. They alleged that on those three days the safety lamps in use at the colliery were not in accordance with statutory requirements, were insufficient in number and were not properly examined; and that in consequence the workmen justifiably refused to go to work and lost the wages they would otherwise have earned and were entitled to damages. In *Thomas v Great Mountain Collieries Co*, which was heard at the same time, two claimants sued the owner of another colliery for loss of wages, alleging breach of statutory duty in not having a weighing machine to weigh coal as near the pit mouth as was reasonably practicable. The workmen were divided into two classes - one comprising all workmen whose wages depended on the amount of coal gotten and the other comprising all other underground and surface workmen. The claimants sued on their own behalf and on behalf of the class they respectively represented.

46. In each action the claims were divisible under three heads: (1) claims for declarations upon matters in which the classes represented were alleged to have a common interest; (2) claims for damages by the individual named claimants; and (3) claims for damages by the individual members of the classes represented. Unfortunately, only a bare summary of the judgments is reported. But this records that the Court of Appeal by a majority (Bankes and Atkin LJJ, with Scrutton LJ dissenting) held that the claimants were entitled to sue in a representative capacity as regards claims that came within (1) and (2), but not as regards claims for damages by the individual members of the classes represented.

47. In *Prudential Assurance Co Ltd v Newman Industries Ltd* [1981] Ch 229 the claimant brought a derivative action as a minority shareholder of the first defendant company claiming damages on behalf of the company against two of its directors for breach of duty and conspiracy. At the start of the hearing the claimant applied to amend its statement of claim to add a personal claim against the directors and the company, brought in a representative capacity on behalf of all the shareholders. The relief sought was a declaration that those shareholders who had suffered loss as a result of the alleged conspiracy were entitled to damages. The judge (Vinelott J) allowed the amendment. He distinguished *Markt* and followed *David Jones v Cory Bros* in holding that a representative claim for a declaration could be pursued notwithstanding that each member of the class of persons represented had a separate cause of action. Although the personal claim was later held by the Court of Appeal in

*Prudential Assurance Co Ltd v Newman Industries Ltd (No 2)* [1981] Ch 204 at 222 to be

misconceived as a matter of substantive law, the Court of Appeal cast no doubt on the use of the representative procedure.

48. This decision was important in demonstrating the potential for a bifurcated process whereby issues common to the claims of a class of persons may be decided in a representative action which, if successful, can then form a basis for individual claims for redress. More generally, the *Prudential* case marked a welcome revival of the spirit of flexibility which characterised the old case law.

**(d) Claims for damages**

49. In the cases so far mentioned where claims were held to come within the scope of the representative rule, the relief claimed on behalf of the represented class was limited to a declaration of legal rights. It was accepted or held that the named claimants could only claim damages or other monetary relief in their personal capacity. In *Markt* Fletcher Moulton LJ expressed the view, at pp 1035 and 1040-1041, that damages are “a personal relief” and that:

“no representative action can lie where the sole relief sought is damages, because they have to be proved separately in the case of each plaintiff, and therefore the possibility of representation ceases.”

50. In many cases, of which *Markt* was one, it is clearly correct that the assessment of damages depends on circumstances personal to each individual claimant. In such cases it is unlikely to be practical or fair to assess damages on a common basis and without each individual claimant's participation in the proceedings. However, this is not always so, and representative actions for damages have sometimes been allowed. For example, in the case of insurance underwritten by Lloyd's syndicates, which are not separate legal entities, it is standard practice for a single member of the syndicate (usually the leading underwriter) to be named as a representative claimant or defendant suing, or being sued, for themselves and all the other members. There is no difficulty in awarding damages for or against the representative in such proceedings, as the calculation of any damages which the members of the syndicate are collectively entitled to recover or liable to pay does not depend on how the risk is divided among the members of the syndicate.

51. In *Pan Atlantic Insurance Co Ltd v Pine Top Insurance Co Ltd* [1989] 1 Lloyd's Rep 568 the claimant companies sued on behalf of themselves and members of a syndicate

which had reinsured on a quota share basis a proportion of the risks they had underwritten, claiming under contracts which provided excess of loss reinsurance cover for the claimants and their quota share reinsurers. The Court of Appeal rejected an argument that the claimants were not entitled to sue in a representative capacity. It made no difference that there was a dispute between one of the claimants and some members of the syndicate about the validity of the quota share reinsurance, since as Lloyd LJ said, at p 571: “the question is whether the parties have the same interest as against the defendants; not whether they have the same interest as between themselves”.

52. In *Irish Shipping Ltd v Commercial Union Assurance Co plc (The “Irish Rowan”)* [1991] 2 QB 206 numerous insurers had subscribed in various proportions to a policy of marine insurance. The Court of Appeal accepted that, as a matter of law, each subscription constituted a separate contract of insurance (of which there were said to be 77 in all). Claims for losses allegedly covered by the policy were made by suing two of the insurers as representative defendants. The Court of Appeal rejected an argument that claims for debt or damages could not be included in a representative action, merely because they are made by numerous claimants individually or resisted by numerous defendants individually, and held that the action could continue as a representative action. While the policy terms contained a broadly worded leading underwriter clause, the presence of this clause was not essential to the decision: see *Bank of America National Trust and Savings Association v Taylor (The Kyriaki)* [1992] 1 Lloyd’s Rep 484, 493-494; *National Bank of Greece SA v Outhwaite* [2001] CLC 591, para 31.

53. In *EMI Records Ltd v Riley* [1981] 1 WLR 923, and in *Independiente Ltd v Music Trading On-Line (HK) Ltd* [2003] EWHC 470 (Ch), the claimants sued in a representative capacity on behalf of all members of the British Phonographic Industry Ltd (“BPI”), a trade association for the recorded music industry (and also in the latter case on behalf of Phonographic Performance Ltd), claiming damages for breach of copyright in selling pirated sound recordings. In each case the claims were allowed to proceed as representative actions. Because it was accepted or could safely be assumed that the owner of the copyright in any pirated recording was a member of the represented class, this procedure enabled breach of copyright to be proved and damages to be awarded without the need to prove which particular pirated recordings had been sold in what quantities. Again, what mattered was that the members of the class had a community of interest in suing the defendant.

54. In *EMI Records* it was asserted, and not disputed by the defendants, that the members of the BPI had consented to all sums recovered in actions for breach of copyright being paid to the BPI: see [1981] 1 WLR 923, 925. In *Independiente*, however,

this assertion was disputed and Morritt V-C found that there was no binding agreement that any money recovered should go to the BPI: see [2003] EWHC 470 (Ch), paras 16 and 28. He nevertheless held, at paras 28 and 39, that the claim was properly brought as a representative action, observing that what the claimants did with any damages recovered was a matter for them or between them, the BPI and the class members, and not between them and the defendants.

55. Although not cited in these cases, the same point had been made long before in *Warrick v Queen's College Oxford (No 4)* (1871) LR 6 Ch App 716, 726, where Lord Hatherley LC gave an example of:

“classes of shareholders in a railway company who have different rights inter se, but they may all have a common enemy in the shape of a fraudulent director, and they may all join, of course, in one common suit against that director, although after the common right is established they may have a considerable litigation among themselves as to who are the persons entitled to the gains obtained through that suit.”

While the right enforced in such a common suit would in modern company law be seen as a right belonging to the company itself, rather than its shareholders, it is clear from the context that Lord Hatherley had in mind a representative action brought on behalf of shareholders, as he gave this analogy to explain how in that case a representative claim could be brought on behalf of all the freehold tenants of a manor to establish common rights against the lord of the manor even though different tenants or classes of tenant had different rights as between themselves.

**(e) Emerald Supplies**

56. In giving the Court of Appeal's judgment in the present case, the Chancellor, at [2020] QB 747, para 73, focused on *Emerald Supplies Ltd v British Airways plc* [2010] EWCA Civ 1284; [2011] Ch 345 as providing the latest authoritative interpretation of the representative rule. The decision in that case turned, however, on the particular way in which the class of represented persons had been defined. The claimants alleged that the defendant airline was a party to agreements or concerted practices with other airlines to fix prices for air freight charged for importing cut flowers into the UK. They claimed on behalf of all “direct or indirect purchasers of air freight services, the prices for which were inflated by the agreements or concerted practices”, a declaration that damages were recoverable in principle from the defendant by those purchasers.

The

Court of Appeal upheld a decision to strike out the representative claim on the basis that, in the way the class had been defined, the issue of liability would have to be decided before it could be known whether or not a person was a member of the represented class and therefore bound by the judgment: see paras 62-63 and 65. Such an approach would not be just, not least because, if the claim failed, no purchasers of air freight services apart from the named claimants would be bound by the result.

57. The Court of Appeal in *Emerald Supplies* also considered that a second difficulty with the class definition was that the members of the represented class did not all have the same interest in the claim, as there was a conflict of interest between direct and indirect purchasers of air freight services: see paras 28-29 and 64. If it was shown that prices had been inflated by agreements or concerted practices to which the defendant was a party, it would be in the interests of direct purchasers to seek to prove that they had absorbed the higher prices in order to avoid a potential defence that they had suffered no loss because the higher prices had been passed on to “indirect purchasers” (understood to include sub-purchasers). On the other hand, it would be in the interests of such indirect purchasers to seek to prove that the higher prices had indeed been passed on to them.

58. It seems to me that this second difficulty might have been avoided either by altering the class definition to exclude sub-purchasers or by following the approach adopted in *Prudential* of claiming a declaration that those members of the class who had suffered damage as a result of the alleged price fixing were entitled to damages. However, those possibilities do not appear to have been considered. I think that the judge in *Rendlesham Estates plc v Barr Ltd* [2014] EWHC 3968 (TCC); [2015] 1 WLR 3663 - a case relied on by Google on this appeal - was therefore wrong to conclude from *Emerald Supplies*, at para 90, that “if damage is an ingredient of the cause of action a representative claim could not be maintained”. The Court of Appeal in *Emerald Supplies* did not doubt the correctness of the *Prudential* decision, where a representative claim was allowed to proceed although damage was an ingredient of the cause of action. As Professor Rachael Mulheron, a leading expert in this field, has persuasively argued, it should likewise have been possible in *Emerald Supplies* to adopt a bifurcated process in which the questions whether prices had been inflated by agreements or concerted practices and whether passing on was in principle available as a defence were decided in a representative action. If successful, this action could then have formed the basis for further proceedings to prove the fact and amount of damage in individual cases: see Mulheron R, “*Emerald Supplies Ltd v British Airways plc*; A Century Later, The Ghost of *Markt Lives On*” [2009] Comp Law 159, 171.

(f) **Commonwealth cases**

59. The highest courts of Australia, Canada and New Zealand have all adopted a broad and flexible approach in interpreting representative rules derived from the English rule.

(i) ***Australia***

60. In *Carnie v Esanda Finance Corp Ltd* (1994) 127 ALR 76 the High Court of Australia held that the fact that the claims arose under separate contracts did not prevent the named claimants and the persons represented from having “the same interest” in proceedings. It was enough to satisfy this requirement that there was a community of interest in the determination of a substantial question of law or fact that arose in the proceedings. Commenting on an argument that the representative rule was an inadequate basis for a “class action”, which required a comprehensive legislative regime, Toohey and Gaudron JJ (with whom Mason CJ, Deane and Dawson JJ generally agreed) said, at p 91:

“... it is true that rule 13 lacks the detail of some other rules of court. But there is no reason to think that the Supreme Court of New South Wales lacks the authority to give directions as to such matters as service, notice and the conduct of proceedings which would enable it to monitor and finally to determine the action with justice to all concerned.

The simplicity of the rule is also one of its strengths, allowing it to be treated as a flexible rule of convenience in the administration of justice and applied ‘to the exigencies of modern life as occasion requires’. The court retains the power to reshape proceedings at a later stage if they become impossibly complex or the defendant is prejudiced.”

(ii) ***Canada***

61. In *Western Canadian Shopping Centres Inc v Dutton* [2001] 2 SCR 534, paras 38-48, the Supreme Court of Canada held that representative actions should be allowed to proceed where the following conditions are met: (1) the class is capable of clear definition; (2) there are issues of fact or law common to all class members; (3) success for one class member means success for all (although not necessarily to the same extent); and (4) the proposed representative adequately represents the interests of

the class. If these conditions are met the court must also be satisfied, in the exercise of its discretion, that there are no countervailing considerations that outweigh the benefits of allowing the representative action to proceed. The Supreme Court held that the conditions were met by the claimants in *Dutton*, who sued as representatives of a group of investors complaining that the defendant had breached fiduciary duties to the investors by mismanaging their funds.

62. Giving the judgment of the court, McLachlin CJ, at para 47, distinguished its earlier decision in *General Motors of Canada Ltd v Naken* [1983] 1 SCR 72, where a representative action had been disallowed. In *Naken* the action was brought on behalf of purchasers of new Firenza motor vehicles against the manufacturer, complaining that the quality of the vehicles had been misrepresented or was not as warranted in advertisements, other published materials and contracts which were partly oral and partly written. Damages were claimed limited to \$1,000 per person. The claims were held to be unsuitable for resolution through a representative action, principally because determining both liability and damages would have required particularised evidence and fact-finding in relation to each individual purchaser.

63. McLachlin CJ also commented, at para 46, that over the period since *Naken* was decided the benefits of class actions had become manifest. She identified, at paras 27-29, three important advantages which such actions offer over a multiplicity of individual suits: (1) avoiding unnecessary duplication in fact-finding and legal analysis; (2) making economical the prosecution of claims that would otherwise be too costly to prosecute individually; and (3) serving efficiency and justice by ensuring that actual and potential wrongdoers who cause widespread but individually minimal harm take into account the full costs of their conduct.

64. McLachlin CJ further observed, at para 34, that, while it would clearly be advantageous if there existed a comprehensive legislative framework regulating class actions, in its absence “the courts must fill the void”.

### **(iii) New Zealand**

65. The Supreme Court of New Zealand has recently considered the use of the representative procedure in *Southern Response Earthquake Services Ltd v Ross* [2020] NZSC 126. This was a representative action brought on behalf of some 3,000 policyholders who had settled insurance claims for damage to their homes caused by earthquakes in the Canterbury region of New Zealand. The claimants alleged that the policyholders had been misled by the insurers about the cost of remedying the damage, with the result that they had settled

their claims on a less favourable basis

than otherwise would have been the case. The insurers did not oppose the action being brought on a representative basis, but argued that the class represented should be limited to policyholders who completed a form electing to opt into the proceedings. It was agreed that the proceedings would need to be heard in two stages. The first stage would deal with issues common to all members of the represented class. If the claimants succeeded at that stage in whole or in part, there would need to be a second stage, in which questions of relief were addressed. It was also agreed that, at the second stage, it would be necessary for all of the policyholders represented to take active steps - that is, to opt in - if they wished to establish their individual claims.

66. The New Zealand Supreme Court affirmed the decision of the Court of Appeal that the claim should be allowed to continue on an opt out basis. In doing so, the Supreme Court rejected an argument that it should not develop an opt out regime in the absence of a statutory framework and gave guidance on various matters relating to supervision of opt out representative proceedings.

**(g) Principles governing use of the representative procedure**

67. Although the world has changed out of all recognition since the representative procedure was devised by the Court of Chancery, it has done so in ways which have made the problems to which the procedure provided a solution more common and often vastly bigger in scale. The mass production of goods and mass provision of services have had the result that, when legally culpable conduct occurs, a very large group of people, sometimes numbering in the millions, may be affected. As the present case illustrates, the development of digital technologies has added to the potential for mass harm for which legal redress may be sought. In such cases it is necessary to reconcile, on the one hand, the inconvenience or complete impracticality of litigating multiple individual claims with, on the other hand, the inconvenience or complete impracticality of making every prospective claimant (or defendant) a party to a single claim. The only practical way to “come at justice” is to combine the claims in a single proceeding and allow one or more persons to represent all others who share the same interest in the outcome. When trying all the individual claims is not feasible, the adages of Lord Eldon quoted by Lord Macnaghten in *Ellis* remain as pertinent as ever: that it is better to go as far as possible towards justice than to deny it altogether and that, if you cannot realistically make everybody interested a party, you should ensure that those who are parties will “fairly and honestly try the right”.

68. I agree with the highest courts of Australia, Canada and New Zealand that, while a detailed legislative framework would be preferable, its absence (outside the field of competition law) in this country is no reason to decline to apply, or to interpret restrictively, the representative rule which has long existed

(and has had a legislative

basis since 1873). I also agree with the view expressed in *Carnie* that the very simplicity of the representative rule is in some respects a strength, allowing it to be treated as “a flexible tool of convenience in the administration of justice” and “applied to the exigencies of modern life as occasion requires”.

**(i) The “same interest” requirement**

69. In its current form in CPR rule 19.6 the rule imposes no limit (either as a minimum or maximum) on the number of people who may be represented. Only one condition must be satisfied before a representative claim may be begun or allowed to continue: that is, that the representative has “the same interest” in the claim as the person(s) represented.
